"The Business of Every Man."—"We think that it is the business of every man, who believes that war is inconsistent with our religion, respectfully, but steadfastly, to refuse to engage in it. Let such as these remember that an honorable and an awful duty is laid upon them. It is upon their fidelity, so far as human agency is concerned, that the cause of peace is suspended. Let them be willing to avow their opinions and to defend them. Neither let them be contented with words, more than words, if suffering also, is required. It is only by the unyielding perseverance of good that corruption can be extirpated. You believe that Jesus Christ has prohibited slaughter, let not the opinion or the commands of a world induce you to join in it. By this 'steady and determinate pursuit of virtue,' the benediction which attaches to those who hear the sayings of God and do them, will rest upon you, and the time will come when even the world will honor you, as contributors to the work of human reformation."—*Dymond on War.*

"It is at all times the duty of an Englishman, steadfastly to decline obeying any order of his superiors, which his conscience should tell him were in any degree impious or unjust."—*Gisborne on Duties of Man in Society.*

"War introduces and propagates opinion and practice as much against heaven as against earth; it lays our natures and manners as waste as our gardens and our habitations; and we can as easily preserve the beauty of the one as the integrity of the other under the cursed jurisdiction of drums and trumpets."—*Lord Clarendon's Essays.*

"War does more harm to the morals of men than even to their property and persons."—*Robert Hall, A.M.*

"There is not a virtue of gospel goodness but has its death blow from war."—*William Law, A.M.*

"From whence come wars and fighting among you? Come they not hence, even of your lusts that war in your members?"—*The Apostle James.*

Delusion of Astronomy—Is the Sun Really What It Appears to Be?

But if we suppose the sun and stars to be gigantic fountains of magnetic influence, centers of polarized force—attraction and repulsion—acting upon our globe and its atmosphere, and likewise upon all the other planets, the phenomena of the universe would then become susceptible of the grandest and simplest interpretation. To explain the effects of the sun there is not the least reason to infer that it is itself luminous or even warm. It may be one of the sources of heat without being itself hot, as heat is doubtless the product of combined influences.

This opinion may be elucidated by an example. Take a galvanic battery, which is a dark, cold machine, introduce a little acidified water into its cells and set it in action. By a proper arrangement of wires you may at a long distance from your battery produce a heat intense enough to fuse the hardest metals, and a light too vivid to be endured by the human eye. Now if, while this result is being accomplished, we could see with greater powers of vision the action of the acid on the metal plates of the galvanic battery, we should discover on their surface a

cess of rapid oxidation going on analogously on a small scale to the combustion apparent on the face of the sun, which phenomenon might easily be taken for violent combustion, and which, in fact, judging by the impression made on the senses, could not readily be conceived to be anything else.

Thus we learn that potent action generated in dark, cold body may procure great light and heat at a distance from the seat of activity; and what is thus wrought artificially by a small way by a galvanic battery may be done naturally, in a tremendous degree, by the grand forces of the sun. When we gaze at Mont Blanc at sunset, if our eyes were left to the untrammelled evidence of our senses, we might easily be led to believe the summit of the mountain to be a luminous and incandescent pinnacle, passing through all the hues of the solar spectrum, and finally disappearing in a ghostly white; but knowledge and experience tell us a different tale and correct our inferences.

We ascend the mountain, and we find a cold cone of snow. The appearance of Mont Blanc presented under this aspect is, however, so far distinct from that exhibited by the sun that the sunset brightness of Mont Blanc is a vision of momentarily-born illusion, whereas the light of the sun is the result of intense action and conversion of substances on its surface, and necessarily an emanating force. In estimating the power, quantity and durability of the light and heat of the sun, we must first know where the light and heat begin their evolution. If they be a production bred in our atmosphere by the magnetic action of the sun, and the sun is only one of their causes, we must draw very different conclusions respecting the attributes of light and heat than if we credited the sun with the sole responsibility of their origin.

The intense magnetic action of the sun may present on its surface and in its rays all the appearance of incandescence, when it is rendered visible here by means of our atmosphere and examined by instruments constructed for the detection of solar and astral phenomena. About the beginning of this century the celebrated French philosopher Biot produced light by passing electricity through air or gases. It is not reasonable inference that the sun does not waste light and heat—diminishing as the square of the resistance—through a space of 90,000,000 of miles between us and itself, when, by the means of ethereal and atmospheric conditions, the requisite quantity of light and heat might so easily be distributed at the right spots where it is needed?

With the conditions that surround us on the earth we cannot artificially produce light and heat without the destruction of some material substance; but we are not driven to assume that the same conditions prevail naturally in the sun; and even if a process of self-consumption were continually going on at that body, we are equally justified in drawing the inference that it possesses some innate means and a capacity of self-repair. We think, therefore, that we can naturally account for all the phenomena of heat and the appearance of incandescence and flame on the surface of the sun without resorting to the tremendous theory that the sun is actually in a state of combustion, as understood in our terrestrial experience.—*Frazer's Magazine.*

For "The Friend."

An Interesting Record.

An original manuscript with the title, "First-days' Meetings, supplied by Friends in the Mini-try in and about London, 1682," has recently been placed in the Library of Friends of Philadelphia. It registers a period embraced between the 28th of 11th month, 1682, and the end of the year, 1683; giving the times of holding the several meetings on First-days,—with a few at other times,—the names of ministers in attendance, both in London and vicinity, and others visiting from the country; also such incidents as were considered worthy of preservation at the time. The book is alleged to have been found a number of years ago, in tearing down an old building in Front Street. A memorandum dated 6th mo. 13, 1683, states,—"G. F. seeing this Book approved of it, and ordered it to be kept as a Record." It is interesting and valuable as corroborating the statements of Sewell and others, as well as showing the sufferings and faithfulness of Friends in that day of trial.

During the entire period, we have accounts, although not complete, of meetings held in the Ball and Mooth, Devonshire, Grace Church Street, Horslydown, Park, Poole or Peel, Ratcliff, Savoy, Westminster, and Wheeler Street Meeting Houses, and during a part of the time, of one in Aldersgate. This last appears to have been identical with one spoken of as Sarah Sawyer's, which in one place where Friends were kept out of the house in the street, is mentioned within parenthesis, as being "within Aldersgate."* The names of thirty-six ministers, who appear to have been residents of London and Westminster, are given, three of the number being women. Among them are the familiar names of Francis Camfield, George Whitehead, Alexander Parker, John Vaughton, John Field, Francis Stamper, James Parke, and Gilbert Latey. Some fifty-nine or sixty ministers from the country are recorded, only three of these being women, and including with others, George Fox, Robert Barclay, Stephen Crisp, Samuel Wallenfield, John Banks, Patrick Livingston, William Bingley, Richard Viver, theophilus Green and Ambrose Riggie. The small number of female ministers is a remarkable circumstance, and suggests the thought that, perhaps, Friends being among the first to exercise this gift, the prejudice of many centuries, had to yield slowly before the light of Truth.

Under date of 1683, Sewell says: "At London the meetings this year were often disturbed; but the magistrates themselves seemed not to approve of it, for they clearly saw there was nothing to be feared from the Quakers, and yet they were loth to give offence to the Court Party, which then prevailed." These remarks are quite in accord with a number of entries in the Record. For instance take the following: "4 mo. 24 1683, Ratcliff. Kept out in the street. Jno. Elsen for declaring was taken and carried to Justice —, who discharged him. Afternoon. Kept out, (the new plot occasioning this severity.) Friends not suffered to speak. After some time, D. Baker prayed without hindrance, and Friends departed."

"6 mo. 5th, Grace^s Str. In the yard G. F.

* Sewell says the first meeting held in London, was at Sarah Sawyer's, in Aldersgate street.

taken by the constables for declaring, and had into the meeting-house. He asked the constables whether they were not weary of that work; one of them answered, Truly he was. G. F. was dismissed after meeting."

"7 mo. 9th, Grace^s Street. Within the meeting-house, (the constables and watchmen keeping in Lombard Street entry, as they have done ever since Friends were kept out of that Court and passage.) Jno. Vaughton having done declaring, B. Antrobus rose and spoke a few words, but the trained bands coming in with two constables, making a noise, he having concluded, the constables charged Friends to depart. And immediately the one constable went up in the Gallery, at the furthestmost stairs, and the officers and soldiers following him, he took Friends there, committing them to their charge, &c. And coming down, took some below also, and turned out the rest into the yard and street, and carrying to the Exchange twelve of those that were taken, viz: Wm. Mead, B. Antrobus, J. Vaughton, B. Fiddleman, Rd. Whitpane, R. Langhorn, James Vase and five more, (having dropt Jno. Eldridge, etc.) from whence they were brought before Sr. James Edwards, who appointed the 24 hour after noon for them to come again. At which time they appearing with the officers, he sent them to the Ld. Mayor, and that he would follow them. When being brought, the Mayor talked with Wm. Mead, and said it was a Thanksgiving day, etc., being very kind to him; and sent word to the rest they were all discharged, etc."

"11 mo. 20, Park. Kept out in the street, quiet and peaceable. The constables speaking to a Friend privately not to keep the meeting too long because of the cold season."

The sufferings they were required to endure on account of the severity of the winter, which is in several other places referred to in the Record, as also the practice frequently resorted to of confining ministers in the meeting-house, which Friends were not allowed to enter during the time of meeting, is thus described in the journal of George Whitehead.

"Our being shut out of our meeting-houses for divers years, in and about the cities of London and Westminster, and our meetings kept in the streets in all sorts of weather, winter and summer, was a trial and hardship upon us, even upon old and young, men and women. But that trial was not so great as to have our estates and livelihoods exposed to a pack of ravenous informers; although it was no small hardship to our persons, to be kept out of doors in the streets, in the severe and long frost and snow, in the year 1683, for about three months together, when the river Thames was so frozen up that horses, coaches and carts could pass to and fro upon it, and a street also be erected and stand over it.

"Yet in all that hard season, when we were so long kept out in the streets, in the bitter cold air, I do not remember that I got any harm or injury thereby, to the impairing my health, although I frequently attended those meetings in the streets; wherein I took great and serious notice of the merciful providence of Almighty God towards myself, and many more of our friends, who were sharers in the same mercy and preservation in that suffering and exercise; so thanks to our unmerciful adversaries and persecutors, but to our heavenly Father be the glory and praise for ever.

"We had in those days some opportunities, and were permitted to publish the truth openly in the streets, and also to make public supplication to God; but more frequently were not permitted, but pulled away by force, by the trained bands or officers, and either sent to prison or turned into the meeting-house, and there detained under guard until the meeting was ended in the street. Thus were the ministers and others among us often forcibly interrupted and served, and scarcely suffered, many times, to declare two or three sentences without being haled away; however, we saw it our duty in the fear of the living God, to keep our meetings and patiently wait upon Him; where often we enjoyed his presence to our consolation, even in our silent attention upon Him; being not called to strive or contend with our adversaries or their servants whom they employed, but in faith and patience to bear all, believing that in due time thereby we should obtain victory. It was often then before me, that the Lamb and his faithful followers should have the victory, which was matter of secret comfort to me many times: glory to his name forever.

"In those days I clearly saw that the testimony required of us to bear, was not so much in words, declaration or ministry, as to stand our ground in faith and patience, and to travail in spirit with secret breathing and earnest supplication unto God to plead our cause; it being his own cause for which we suffered, and therefore we patiently committed it to Him that judgeth righteously."

(To be concluded.)

For "The Friend."

The Duty of Cheerfulness.

Some remarks in a late daily paper, on the expression of pleasure as a means of promoting the happiness of others, are worthy of careful consideration. The writer says:—"There are many channels through which we can confer happiness that cost neither money nor time, and are, therefore, held in light esteem, if not entirely overlooked. Prominent among these is the hearty expression of all the pleasure that comes to us. This seems so small, so easy, so simple a thing to do that it will hardly ever attract attention, and is, therefore, very generally neglected. Yet it is an unending source of happiness, as any one may discover by thoughtfully observing social life in its various phases. Who has not seen the brightening, cheering influence shed upon a room full of people by the entrance of a single person who is thoroughly fresh and happy in himself, and who shows it unreservedly in looks and words? Who has not felt the inspiring effect of a companion who freely shares his pleasures, great and small, who lays the emphasis upon the good rather than the evil, and who not only looks upon the bright side of life, but also delights to hold it up for others to look upon?"

"There are a few persons blessed with a constitutional tendency in this direction. Of sanguine temperament, cheerful disposition and sympathetic nature, they are veritable sunbeams in the home, the social circle or the business thoroughfare, dispensing light and warmth naturally and unconsciously by their very presence. Most of us, however, are not thus happily endowed, and if we would do good in this way it must be by thoughtful care and self-denying effort. Some there are who actually produce much unnecessary pain

and depression of spirits, by merely yielding to a natural impulse of expressing their own gloomy views and dark forebodings. Whatever sunny passages their lives may have are hidden in their own breasts and soon forgotten; but all the troubles, annoyances, fears and anxieties they experience, are magnified and freely poured into every listening ear. Others there are who fancy that a sort of dignity adheres to sadness, and frivolity to happiness, and who thus abstain from expressing the latter for fear of compromising themselves, while still more are utterly careless in the matter, and make no effort in either direction.

"One of the strongest elements in human nature is sympathy. Happiness seen and expressed produces happiness; sorrow creates sorrow. Like an electric spark, they communicate their own spirit, and none can resist their influence. It becomes, therefore, a matter which appeals to every generous heart as to which of these influences he will voluntarily disseminate. No one can utterly change his natural bias, or transform a gloomy nature into a light one; but each can so guard his outward demeanor as, in measure at least, to control the influence he shall exert. Every one has the dark and the bright mingled in his existence, though in different degrees, and the question is mainly one of emphasis. Each has trials and crosses to bear; each, also, has pleasant seasons, happy thoughts and joyful experiences. Which shall we communicate in our intercourse? Shall we increase the burdens of life, or diminish them? Shall we shed sunshine into our neighbor's heart, or throw a dark shadow over it?"

"Little kindnesses between friends or neighbors that receive a cordial and grateful response strengthen the bonds of union, but when they are carelessly or silently accepted, the ties of affection or regard are inevitably loosened. If, then, we would win the love of friends and the good will of companions; if we would see the shadow of welcome at our approach, and the smile of regret at our departure; above all, if we should shed the bright sunshine of hope and encouragement around us, and make the world somewhat happier for our having lived in it, let us candidly, freely and heartily give voice to all that is pleasant in our lives, happy in our thoughts, and grateful to our feelings."

The Christian, one who truly loves the Redeemer of the world, and endeavors to make Him alone, his strength, his Omnipotent Friend, and only source of wisdom and living faith and hope, will find that it is not by a cold and forbidding treatment of others that he can draw them into the service of the same blessed Master. He should rather seek to be clothed with a little of the precious influence of that spirit of gentleness, love, and tender interest in the welfare of our fellow creatures which was manifested by our divine Saviour. It is evident that our great Teacher desires that his followers should show, in their intercourse with the world, that his service is not a hard one. Observe what He says (Matt. vi. 16 to 18.), cautioning us against a sad countenance when fasting, and adds, "But thou, when thou fastest, anoint thy head and wash thy face; that thou appear not unto men to fast; but unto thy Father which is in secret; and thy Father, which seeth in secret shall reward thee openly."

It may also be profitable often to call to

mind the following and similar declaration of the inspired writers of the New Testament: "Let love be without dissimulation. Abhor that which is evil; cleave to that which is good. Be kindly affectionate one to another with brotherly love; in honor preferring one another." "Look not every man on his own things, but every man also on the things of others." "But as touching brotherly love ye need not that I write unto you; for ye yourselves are taught of God to love one another." "And the Lord make you to increase and abound in love one towards another, as towards all men, even as we do toward you." "Pure religion and undefiled before God and the Father, is this, To visit the fatherless and widows in their afflictions, and to keep himself unspotted from the world." "Seeing that ye have purified your souls in obeying the truth through the Spirit unto unfeigned love of the brethren, see that ye love one another with pure heart fervently." "We that are strong ought to bear the infirmities of the weak, and not to please ourselves. Let every one of us please his neighbor for his good to edification."

While it is true that the ineffable reward is at the end of the race, our Heavenly Father does not intend that our journey through the world of probation should be a gloomy one. How can it be, if we "are filled with all joy and peace in believing and abound in hope through the power of the Holy Ghost," privileges of the Gospel which are held forth for our acceptance? X.

THE FRIEND.

SECOND MONTH 3, 1877.

Without wishing to meddle in any way with the political complications in which our Government has been involved, by the result of the late Presidential election, or to express an opinion as to which party ought to be successful, we think it is a cause for sincere satisfaction that the two Houses of Congress have, by a decisive vote, passed the bill providing for the counting of the electoral vote for President and Vice-President of the United States, for the next term of those offices.

Presuming that some of our readers may not be so familiar, both with the provision of the Constitution of the United States relating to the presidential election, and also with the facts relating to the present difficulty concerning it, as to have a clear comprehension of the grave crisis through which our government has been lately passing, we submit a brief statement of them, with an extract of the new law. The Constitution declares that "Each State shall appoint in such manner as the legislature thereof may direct a number of electors, equal to the whole number of senators and representatives to which the State may be entitled in the Congress * * * * * The electors shall meet in the respective States and vote by ballot for two persons," for the respective offices of President and Vice-President.

"And they shall make a list of all the persons voted for, and of the number of votes for each; which list they shall sign and certify and transmit sealed to the seat of government of the United States, directed to the President of the Senate. The President of the

ate shall, in the presence of the Senate and House of Representatives open all the certificates, and the vote shall then be counted, and the person having the greatest number of votes shall be the President."

The States of Louisiana, South Carolina, and Florida had provided by law for the appointment of persons in each of those States to canvass or count all the ballots cast in the several counties for all elections, and to declare the result. These "Returning Boards," when they are called, have power to inquire into the circumstances attending the elections in several counties, and if they conclude that fraud, intimidation, or violence had been practised at any polling district, they may cut out the entire number of votes cast therein, and estimate the general result in the State in the remaining ballots. The members of these "Returning Boards," in the States named, were either wholly or by a majority, Republicans in their political views.

The votes in the States of South Carolina and Florida were very nearly balanced between Hayes and Tilden, but were finally declared by the Returning Boards to have given a full majority for Hayes. The supporters of Tilden demur to this conclusion, averring that it was arrived at by an unfair rejection of Democratic votes by the canvassers. In Louisiana the returns sent up from the several parishes—of ballots cast for the Presidential electors to the Returning Board, indicated a majority of about 9000 votes for Tilden.

The Board cast a long time canvassing these, and finally rejected the returns from several parishes where Democratic majorities were given, on the ground of intimidation, fraud, and violence against the colored Republicans, so that the ultimate result of the whole State vote was declared by the Board to give a majority of nearly 5000 for Hayes electors. This conclusion has created the greatest dissatisfaction in the Democratic party, and they allege that the will of the people, as expressed by the ballot, will be defeated if it is allowed to prevail. The two sets of electors named in these three States, represent both Hayes and Tilden, have all been voted for their respective candidates, and have sent certificates of these ballots to the President of the Senate. Thus two certificates have come from the same State, both claiming to be genuine, but those for Tilden claiming the authentication of the Returning Boards.

In the State of Oregon there was no doubt the popular vote having been cast for the Hayes electors, but one of them named Watts, opened by holding a postmastership at that time, and was consequently ineligible as an elector under a clause of the Constitution of the United States. Prior, however, to the when the Electoral College of that State adjourned to meet and cast its vote for President, the elector resigned his office of Postmaster, and when his colleagues met to vote, they did not take the vacancy in their number by electing him again, as they had a right to do.

Forfeiture, however, a Tilden elector named him, who had the next highest number of popular votes below the Hayes electors, and that he was legally entitled to the vacant post of the ineligible Watts, and occupying the room where the Hayes electors met, made his claim to cast a vote for Tilden with the other two. They object-

ing to this, he went through the form of electing two other men as electors to fill what he professed, were vacancies in the electoral college, and then these three proceeded to cast two votes for Hayes and one for Tilden, and the Governor of Oregon (being in sympathy with this movement,) has affixed his name and the seal of the State to a certificate from them, which has been transmitted to the President of the Senate. The Hayes electors have also sent their certificate to that officer. If all the electoral votes from the four States of Louisiana, South Carolina, Florida, and Oregon are counted by the President of the Senate for Hayes, it will give him but one majority, in connection with those cast for him in other States where there is no dispute.

The President of the Senate, since the death of Vice-President Wilson, is Thomas W. Ferry, Senator from Michigan, who is a Republican. Hence the natural repugnance on the part of the Democrats to leave the decision of the question of legitimacy of the different certificates of the electoral votes to that officer. No such exigency in counting the Presidential vote has occurred before in the history of the government. Doubtful points it is true have been raised before, but they were not material to the general result, because there was a sufficient majority to elect one candidate, no matter how they were decided. The Democratic party claim that Tilden has a popular majority in all the States of more than a quarter of a million of voters over Hayes, and serious threats have been made that if he is not seated in the presidential chair on the 4th of the Third month next, by the action of the proper authorities, he will be placed there forcibly by his adherents. It will be observed that by the letter of the Constitutional provision hereinbefore quoted, directing the certificates of the electoral votes to be opened by the President of the Senate in the presence of both Houses of Congress, there is no direction as to who is to count them. The words are, "and the votes shall then be counted." The practice has been for tellers to be appointed by the two Houses, and the certificates being opened by the President of the Senate, he has handed them to the tellers, who have counted them, and then he has announced the result. There is no clause empowering the President of the Senate to decide between rival certificates.

The law just passed is intended to supply this omission. It provides:

"Sec. 2. That if more than one return or paper purporting to be a return from a State shall have been received by the President of the Senate, purporting to be the certificates of electoral votes given at the last preceding election for President and Vice-President in such State, unless they shall be duplicates of the same returns, all such returns and papers shall be opened by him in the presence of the two houses, when met as aforesaid, and read by the tellers, and all such returns and papers shall thereupon be submitted to the judgment and decision as to which is the true and lawful electoral vote of such State, of a commission constituted as follows, namely: During the session of each house on the Tuesday next preceding the first Thursday in February, 1877, each house shall by *voce voce* vote appoint five of its members, who, with the five Associate Justices of the Supreme Court of the United States to be ascertained as here-

inafter provided, shall constitute a commission for the discussion of all questions upon or in respect of such double returns named in this section. On the Tuesday next preceding the first Thursday in February, A. D., 1877, or as soon thereafter as may be, the Associate Justices of the Supreme Court of the United States now assigned to the First, Third, Eighth and Ninth Circuits shall select, in such manner as a majority of them shall deem fit, another of the Associate Justices of said court, which five persons shall be members of the said commission, and the person longest in commission of said five Justices shall be the president of said commission.

* * * * *

All the certificates and papers purporting to be certificates of the electoral votes of each State shall be opened in the alphabetical order of the States, as provided in Section 1 of this act, and when there shall be more than one such certificate or paper as the certificates or papers from such State shall so be opened (excepting duplicates of the same return) they shall be read by the tellers, and thereupon the President of the Senate shall call for objections, if any. Every objection shall be made in writing, and shall state clearly and concisely, and without argument, the ground thereof, and shall be signed by at least one Senator and one member of the House of Representatives before the same shall be received. When all such objections so made to any certificates, vote, or paper from a State shall have been received and read, all such certificates, votes, and papers so objected to, and all papers accompanying the same, together with such objections, shall be forthwith submitted to said commission, which shall proceed to consider the same, with the same powers, if any, now possessed for that purpose, by the two houses acting separately or together, and by a majority of votes decide whether any and what votes from such State are the votes provided for by the Constitution of the United States; and how many and what persons were duly appointed electors in such State; and may therein take into view such petitions, depositions, and other papers, if any, as shall by the Constitution and now existing law, be competent and pertinent in such consideration, which decision shall be made in writing, stating briefly the ground thereof, and signed by the members of said commission agreeing therein; whereupon the two houses shall again meet, and such decision shall be read and entered in the journal of each house, and the counting of the votes shall proceed in conformity therewith, unless upon objection made thereto in writing by at least five Senators and five members of the House of Representatives, the two houses shall separately concur in ordering otherwise, in which case such concurrent order shall govern. No votes or papers from any other State shall be acted upon until the objections previously made to the votes or papers from any State shall have been finally disposed of."

There are other sections of the act providing for certain formalities, which are not important for quotation here.

We think the tribunals thus commissioned to decide the delicate and important questions now pending, will command the respect and acquiescence of all moderate and thoughtful citizens. When we reflect upon the anarchical condition of Mexico and other Central and

South American States, with their rival Presidents and internecine wars, and the readiness shown by the people of our own Union to plunge into the late sanguinary conflict, as well as other proofs which history has exhibited of small sparks of popular discussion being easily blown into a devouring flame, it is evident that the Christian part of the community, and especially those to whom the government is entrusted, cannot be too vigilant in forestalling all such results by a prompt resort to peaceful and fair measures for settling disputes, and allaying popular excitement. It becomes also the duty of all to yield a cheerful compliance with the decisions of such authorities, whether agreeable to their prepossessions or not. It is rare indeed that the maladministration of a government is equally injurious with the avarice and intestine strife which result from attempts to support rival systems or officers by force. We recognize in the readiness of statesmen of both political parties to unite in the present measure of settlement, a better omen for the future of our country than at times seems probable, in view of the prevalence of selfish passion over justice and Christian feeling among many. It is a cause for humble gratitude that the all-wise Disposer of human events has so graciously controlled this nation as to restrain His just judgments for our many transgressions of His righteous laws, and to deal with us in mercy. May a sense of these favors more prevail among the people at large, and our rulers remember that it is by Him alone that kings reign and princes decree justice.

SUMMARY OF EVENTS.

FOREIGN.—The Berlin correspondent of the Times reports that the Russian government has given orders to prepare for calling out the third division of the reserves, which includes all able-bodied men. It has also ordered the railway companies to furnish exact lists of the rolling stock, rails and other material at their immediate disposal, and has requested railway directors to recommend foreign firms which are likely to supply railway material promptly.

The Vienna correspondent of the London Telegraph states that the Porte has informed Serbia that it would on no consideration renew the armistice, but would march directly on Belgrade, if Serbia did not open negotiations with Turkey for peace before the first of Third month.

The plenipotentiaries who were detained at Constantinople after the close of the conference, rendered important service by persuading the Porte to inaugurate reforms of its own free will, instead of yielding to the advice of the war party to force a rupture with Russia by immediately attacking Serbia.

The Turkish government has addressed a conciliatory dispatch to the Princes of Serbia and Montenegro, proposing a direct understanding with the Porte before the expiration of the armistice. The Provincial Governors have also received orders to take measures to prevent disorders and maintain friendly relations with the foreign consuls and residents.

At a recent meeting of the masters and operatives' committees of the Luncheon, Eng., cotton trade, the masters unconditionally rejected the operatives' conditions because they would result in a general advance of wages.

The Registrar General's returns show that the small-pox in London is decreasing. There were seventy-nine deaths from the disease last week, against one hundred the week previous.

On the 24th ult., a fire broke out in the Stonehill colliery, near Bolton, which was attended with considerable loss of life. At least fifteen miners are known to have perished.

Official returns show that the French revenue from indirect taxation for the year 1876, amounted to 2,105,759,000 francs, which is 37,286,000 francs more than in 1875.

There are over five millions of peasant land proprietors in France.

The French Chamber of Deputies has elected the Budget Committee. The successful candidates are, without exception, Republicans. Gambetta has been re-elected president of the committee. He made a speech denying that the Republicans are disunited. He urged the necessity of the maintenance of a complete agreement and declared that he would act as a friendly, trusting fellow-worker of the Ministry.

An official decree promulgated in Paris prohibits the importation of animals to be slaughtered, such as calves, sheep or goats from Germany, England, Austria, the Danubian principalities or Turkey. Importation from other countries is allowed, subject to rigorous preliminary inspection by the sanitary authorities.

Distressing accounts are received of scarcity in Pondicherry, and famine is feared in France. The government will demand a credit of the Chambers for the necessary relief.

The Minister of Public Works has authorized an expenditure of \$100,000 upon the restoration of Rheims Cathedral, which is classed among the historical monuments of France.

The Government has dismissed several mayors for attending masses in memory of Napoleon III., and has decided to treat severely all officials participating in Bonapartist demonstrations.

Fifty women physicians are now studying in the hospitals of Paris in order to improve their medical knowledge.

The present winter has been unusually mild in France, and also in the southern countries of England.

The inhabitants of the Basque Provinces of Spain are greatly dissatisfied with the abolition of the privileges and immunities for a long period enjoyed by them. The new Constitution places all the provinces of Spain on the same footing as regards taxation, conscription for the army, &c.

A Bilbao dispatch states that great excitement continues in the Basque Provinces concerning the conscription, and especially in the mining district of Galdames. Several war steamers have arrived at Bilbao and been placed at the disposal of military authorities.

Ex-Premier W. E. Gladstone, has made a speech at Taunton, in which he dealt especially upon the election of Turkey. He contended that the people of England were in a disgraceful position, having been made accessories in the maintenance of a power marked with perhaps the deepest disgrace recorded in the whole history of the world. He contended that the new Turkish Constitution was worse than imposture, because it committed the Christian minority to the tender mercies of the Mohammedan majority in the council to which it was proposed to leave the task of doing justice to the Porte's subjects.

The Prince Milan, of Serbia, in reply to Mihaloff Pash's proposals for direct negotiations for peace, has expressed his desire that such negotiations should at once commence. The advice of the Russian Emperor being asked by Serbia, he replied that peace was desirable and should be accepted from whatever quarter it was offered. The Porte, it is stated, has requested Serbia to undertake to send plenipotentiaries to negotiate and arrange the terms for peace between those provinces and Turkey.

UNITED STATES.—On the 25th ult., about 7 A. M., after a continuous session of more than eighteen hours, the U. S. Senate passed the Electoral Count bill as reported by the Select committee, by a vote of 47 to 17. One of the negative votes was by a Democrat, and sixteen by Republicans. Of the 47 Senators who voted for the bill, 20 were Republicans, 25 Democrats, and one an Independent. The bill was debated in the House of Representatives on the 25th and 26th of First month, the debate closing on the evening of the 26th, under the able opposition of so large a part of the Republican members is attributed to a few Democrats, in their part that the result of the measure will be the inauguration of the Democratic candidates Tilden and Hendricks.

The Legislature of Illinois has elected Judge Davis, of the U. S. Supreme Court, to succeed Senator Logan, and has elected John H. M. Pierce to succeed F. T. Freylinghuysen at present one of the Senators from New Jersey. H. G. Davis and F. Pierce have been chosen to represent West Virginia in the national Senate.

The interments in Philadelphia from the 13th to the 20th of First month, numbered 395, and from the 20th to

the 27th, 272, including 57 of consumption and 23 age.

During the year 1876, 2,154,281,000 cubic feet of water was made at the City Gas Works, an increase of a fifteen per cent. over 1875. The entire length of mains laid in the city and in use is 674 miles, whole number of street lamps supplied with gas the works was 11,350, at the end of the year.

There are 100,000 inhabitants of Mexico, and a claim of the presidency, with other distinguished Mexicans have arrived at San Francisco. Since the recent Intention in Mexico there was no safety for them and unhappy country.

There were built last year in the United States 2,000 miles of new railroads, about one fourth of which may now be in operation.

The exports from California for the year 1 amounted to \$80,421,971 of which \$30,684,111 consisted of merchandise and \$49,737,260, gold and silver. President Grant, on the 29th ult., signed the Elsea Count bill and sent it to the Senate with a message giving the reasons for his approval of the measure.

It was understood that the two Houses of Congress would make their selection of members to serve on Commission the following day, and that its members would be Senators Edmunds, Morton and Freylinghuysen, Republicans; and Thurman and Bayard, Democrats. Republicans: Hunt and Lisanti, U. S. Senators; Garfield and Hoar, Republicans; from Supreme Court, Justices Clifford, Strong, Miller Field, together with a fifth Associate Judge to be selected by the four already named.

The Markets, &c.—The following were the quotations 29th ult. *Philadelphia*.—American gold, 3 U. S. sizes, 1881, 113 1/2; do. 1868, 114 1/2; do. 10, 5 per cent, 1881, 110 1/2; 111 1/2; do. 4 1/2 per cent, 107 1/2; 107 1/2. Uplands and New Orleans cotton, 13 1/2; do. Flour, -5 a \$10.25 as in quality. Pennsylvania red wheat, \$1.50 a \$1.53; amber, \$1.52 a \$1.55; western white, \$1.55 a \$1.60. Pennsylvania rye, 82 cts. Yellow corn, 50 a 51 cts. Oats, 37 a 40. New York choice, 14 a 15 1/2 cts.; western, 13 1/2 a 14 cts. Sales of 3500 head cattle at 6 a 6 1/2 per lb. gross for extra; 5 a 6 cts. for fair to good; 4 a 4 1/2 cts. for common. About 8200 sheep sold at 7 cts. per lb. gross, and 3200 hogs at 9 1/2 cts. per net for prime, and 8 a 9 cts. for common. New York—Superfine flour, 85.70 a 86. State extra, \$3.60 a \$3.65; finer brands, \$6.50 a \$11.00. Extra white winter wheat, \$1.65; amber winter, \$1.50; No. 2 Chicago sp. \$1.38; No. 3 Milwaukee, \$1.25. Oats, 45 a 54 cts. yellow corn, 60 a 61 cts. Chicago.—Winter extra, \$6 a \$7.00. No. 2 spring wheat, \$1.23; No. 3, \$1.13. Corn, 41 1/2 cts. Oats, 35 cts. Lard, 10 1/2 cts.

FRIENDS' ASYLUM FOR THE INSANE.—Near Frankfort, (Twenty-third Ward), Philadelphia. Physician and Superintendent.—JOSHUA H. WASHINGTON, M. D. Applications for the Admission of Patients made to the Superintendent, and to any of the Board Managers.

MARRIED, at Friends' Meeting-house, Concord, Mont Co., Ohio, 11th of 11th month, 1876, OLIVER NEGUS to DEBORAH, daughter of Israel and Betsey NEGUS.

DIED, on the 5th of 10th mo. 1876, at his residence, Malta, Morgan Co., Ohio, WILLIAM MASSEY, a member of Hopewell Particular and Pennville Meetings, in the 91st year of his age. Although unable from bodily infirmity for the last few years of his life to mingle much with his friends in religious fellowship, his mental faculties remained remarkably bright, and he took a deep interest in the fare of the Society, and strong attachment to its principles.

—, at the residence of Jonathan Fawcett, (her father), Concord, Belmont Co., Ohio, on the 11th of mo. 1876, ANNA H. NEWBURN, in the 22d year of her age. She was a young lady who had very unfortunately some weeks, with exemplary patience, although she did not express much, her friends in comforting belief that through redeeming love and she was fitted and prepared to enter the nuptial rest and peace.

—, at the residence of his son-in-law, James P. Hill, on the 22d of 1st mo. 1877, JOSEPH W. SATTERTHWAITE, aged 94 years and 16 days, a member of Hill Grove Monthly Meeting, Iowa.

From "Seward's Travels Around the World."

Visit of William H. Seward to the Maharajah of Puttecala, in India.

(Continued from page 194.)

This has been a day of bewildering succession of Oriental displays and diversions. The Minister of Public Works came before breakfast, and attended us to the inevitable menagerie. The aviaries, though full, are inferior to those of the King of Oude. We saw, for the first time, the long-legged, awkward, brown cassowary, whose name rhymes to "missionary" in the witty verse where "Timonetto" finds its answer in "hymn-book too." The tiger collection is very fine, many of the animals of huge size and quite unamed, from the cages of the wild beasts we passed to the cages of wild men, the state-prison of uttecala. It covers an area of four acres, enclosed by a low adobe wall. There are eight hundred and twenty-five prisoners, chiefly convicted of the crimes of arson and burglary; of these, only one hundred and fifty can read and write. Two hundred convicts are imprisoned in other parts of the province. Imprisonment is generally for a term of one, two, three, or seven years, occasionally for life. Capital punishment is inflicted only for murder. The population of the city of Puttecala is eighty thousand, and that of the entire kingdom or principality is two millions, and yet there has been no capital execution in two years. The prisoners are neither confined to separate cells, nor do they live together. Those of each caste work, sleep, and eat, in different divisions of the building; the odious distinction of caste is preserved nowhere more absolutely than here. The pariahs, outcasts everywhere in common life, are equally segregated in prison, and subjected if possible to a lower humiliation. All are heavily ironed, and are guarded by an armed police of three hundred men. Their labor is either hard or light, according to the grade of their offence. Hard labor consists of grinding grain with a hand-mill; light labor is weaving carpet, making shoes, pottery-ware, and the like. Our labor reformers in the United States may find a new argument for their claims in the fact that, by the laws of Puttecala, five hours are a full day's work. The prisoners have native medical attendance, but no religious or secular instruction. The products of the prison are sold in the markets, and nearly defray its expenses, which average fourteen cents a day

for each convict. We found at the prison-gate, as we came out, a train of elephants kneeling for our service, but we respectfully declined the honor. On the way homeward, we met a small boy in a gilded coach, with postillions and outriders. He was so richly arrayed and snperbly attended, that we at once conjectured him to be the heir-apparent. It was fortunate that we saluted him as such; for the minister who attended us afterward informed us that the little lad had been sent out to meet Mr. Seward, and was attended by the entire ministry. We breakfasted alone in our little place, at ten o'clock. The Maharajah came at eleven. He invited Mr. Seward and the ladies to a grand durbar. The English ladies whom we have met in India have declared to us that they decline to receive native princes, on the ground that the ladies of India decline to receive gentlemen in the zenanas. The reason given for this seclusion of women is, that a general intercourse with society would be immoral and unbecoming the dignity of the sex. But we are inclined to think that Christian women who thus refuse to recognize the native gentlemen are in fact adopting the bad customs and manners of India, instead of commending our own better morals and manners to the people of that country. The prince's invitation was accepted. He seemed to have only just taken his leave, when we were summoned to meet him at the pavilion at the centre gate. Here he conducted us up a winding staircase, and gave us seats in a balcony, which overlooks the esplanade. He performed this courtesy in a manner which showed that he fully understands the Western sentiment of respect for women. He afterward took care to explain to us, through the prime-minister, his regret that the prevailing and uncompromising religious sentiment of the country prevented him from introducing the Western social custom into his own family. He has two wives, neither of whom has ever seen a foreigner, man or woman, nor has ever met even a countryman of her own, other than the nearest blood relations. The prince added that, before the Mohammedan conquest, the women of his own royal house were more distinguished for political ability and energy than the men. A strange remark for an Oriental.

The entertainment to which we had come was an elephant-fight. Two enormous combatants were brought on the field. They came with manifest reluctance. Their tasks had been cut away half their length, and the stumps were bound with brass. They fought by pushing their broad foreheads against each other, and by crowding with the shortened tusks. It was seen, after one short encounter, that one animal was more powerful than the other. The weaker retreated. No effort his keeper made could encourage him to renew the contest, nor could any urging by the driver of the victorious beast induce him to pursue his advantage. The prince dismissed

these combatants, or rather non-combatants, with disgust, and caused them to be immediately replaced by two other animals of equally gigantic size. They fought in the same way as the first, and with about the same result, except that the vanquished animal in this case retreated quite out of the arena, while the conqueror was with much difficulty held back from pursuit. These latter contestants gave place in their turn to two others, and the form of the combat varied. With their trunks, they clasped each other by the head, and, thus embraced, they continued a battle until one became so worried and exhausted that he gave up the contest. The maharajah said, "These elephants are good fighters, but the heat overpowers them." We agreed with him about the temperature, while we thought the performance of the poor beasts needed no apology. The prince now took his leave, and we returned to our palace, and took our seats on the veranda under a canopy of Cashmere shawls, supported by silver staffs, the fountains gurgling at our feet. Two court-jesters appeared before us, and in the Hindoo language went through a rehearsal of drolleries and pantomimes. They gave place to an acrobat, who, although eighty years old, displayed prodigious strength and agility. With a long sword in hand, he turned a double somersault, cutting a betel-nut in two parts. Although these performances were ordered for our own party, they soon attracted a crowd of native spectators, who manifested a higher appreciation for them than we did. We enjoyed much more highly their rapt attention; but the prime minister would have no such vulgar intrusion. The admiring crowd was dispersed. Then came on another sport, a company of jugglers, one, a young man who performed feats with a goat and a monkey; another, a very old and eccentric Sikh, with long, white hair, and eyes as large and sunken as those of Daniel Webster. He seemed a man to whom we should pay our homage, rather than one who should be required to cater to our amusement. His achievement was to make a pigeon fire a mimic cannon. The ordnance was duly loaded and primed. It went off, but, in the act, the gentle gunner rose into the air, and went off too. The string of his captivity had fallen from his feet. He perched on the palace-roof. The poor old man tripped in vain to entice him down. He appealed to the new audience which had gathered round, but no assistance could be given. The juggler became inconsolable; when he saw his loss, he assumed an attitude as piteous as that of "Rip Van Winkle" when he discovers the absence of his faithful "Schneider."

Next came a musical band, which gave us a concert on native instruments, playing their pensive airs, which we thought at first so unintelligible, but which we now find pleasing, sometimes quite touching. The gamut is like our own, of eight tones, but in playing or

singing a melody, called *rang*, they use all the semi-tones, so that the performance is a chromatic succession of notes, and you have to guess which of the accentuated tones speak the air. Suddenly, at the prime minister's command, this series of diversions came to an end, and all the performers, musicians, jesters, jugglers, acrobats, and fools, disappeared. Thereupon sixty thorough-bred Arabian, Persian, Australian, and African horses, came before us for inspection. They were gorgeously caparisoned, with silver bridles, golden trimmings, kincob and velvet robes, and housings of India cashmere. They wore also gold carriages and necklaces and bangles. One of them, which is claimed to be the fastest horse in India, borrows the name "Hermit" from the great English courser. The fantastical grooms manifested scarcely less pride than the horses themselves in showing their fine points.

What wonder that we now thought the princely exhibition was ended? It was not, though. We were summoned again to our seats in the pavilion at the gate. Two elephants came into the area with their calves—one of these born since the captivity of the cow, the other made a captive with its mother in the jungle. Few persons, perhaps, can imagine how skillfully the little animal throws back its trunk, while taking its nutriment. The calf that was "native here, and to the manner born," was bold and indifferent, the other timid and frightened. Its cries were almost human, and the mother's manner of soothing it not less so.

(To be continued.)

For "The Friend."

I have long felt that I should like to see in "The Friend," the following remarkable and instructive account of Job Thomas who deceased the 15th of Eighth month, 1807.

On reading it over afresh this evening, I was particularly struck with his cheering words to his "dear brethren," that they might "persevere in their faith to the end of their days, and then their rest will be with the Lamb, where no pain or affliction will come." A word of cheer for the Lord's tribulated children in this day.

Job Thomas.

In adding to the accounts, prepared for this volume, of the happy departure of many faithful servants of the Lord, that of the triumphant conclusion of Job Thomas, I feel an inclination to avow that I consider it as no light employment. He appears to have been favoured with a more immediate manifestation of the glorious state which was about to crown his suffering life, than is commonly allowed to spirits yet clothed with mortality. The veil seemed to be withdrawn; the beatific vision to be displayed. He spoke of what he saw, and was on the point of possessing; and if it be lawful to publish an account of condescension so transcendent, of mysteries so sacred, of glories so infinite, I can hardly believe that admiration is the only feeling that should be excited by the perusal. There is a holy awe, a reverential dread, that seems to be due from the awakened mind, on being thus, as it were, a witness of a frail mortal putting on a glorious immortality. And when we almost see the omnipotent and righteous Judge dispensing his reward with his own holy hand; and placing on the Christian the crown of righteousness; surely deep self-

abasement should possess the creature, and the heart of every reader should bow before him, who holds these infinite and inestimable treasures at his will; and, as a part of that holy will, has made known that, through the redeeming virtue of his beloved Son, they are accessible to the broken and contrite spirit.

But before we survey the conclusion, let us advert to the path, through which, this, our departed Friend, was led to blessedness, so far as it is known.

His youth, probably, had been tinctured with some of the vanities incident to that stage of life; for he has been frequently heard to lament that he had not been more obedient to the Lord's requiremings in early life. But he was scarcely known to his surviving friends in any other capacity than that of a diligent attendant of meetings for worship and discipline, an approved minister, sound in doctrine, and holding fast without wavering the profession of the Christian faith. Gospel love enlarged his heart, and he had an universal desire for the salvation of his fellow-creatures. He was bold in delivering plain truths, and in the Welch, his native tongue, he was persuasive, clear, and fluent. His religious visits, however, were much confined to Wales; the meetings of Friends in which principally he visited several times; and, in the compass of the Monthly Meeting to which he belonged, he frequently had more public meetings with those of other societies.

He once attended, as a representative, the Yearly Meeting in London; and when in this great city, his heart yearned towards his numerous countrymen, dispersed within its circuit. He wished to have a meeting with them, but as he had not, on leaving home, asked for a certificate of his Monthly Meeting's approbation of his then travelling in the ministry, it was judged irregular to convene one; and his disability of body not long after supervening, an opportunity did not again occur.

In the estimation of the world he would have been accounted a poor man; and his habitation was certainly mean. It was a small farm house in Caermarthenshire; such as, on this side the Severn, would be called a cottage; retired and sequestered, but not far distant from the public road; and nearly midway between Llandovery and Llanidloes. Yet here he was hospitable, and gladly received his friends, of which hospitality I can testify from experience. His means of support arose not only from the trade of a shoemaker, but from the occupancy of a small farm.

About the year 1797, near his own dwelling, he was thrown from a young horse, and received so great an injury on the spine, as at length to occasion the deprivation of voluntary motion in every limb. His head, only, remained subject to his will. This he could still turn, whilst he was beholden to personal assistance for his removal from his bed to his chair, for any slight alteration of position in it, and in short, for almost every common function of the body; the free performance of which, though it is scarcely observed by the healthy and vigorous, constitutes much of the comfort of animal life. But his body, thus deprived of motion, was still sensible to pain; and much, very much, of this positive affliction was added to the negative one of total helplessness. He used to be fastened, rather than to sit, in a chair, and his body and legs were nearly in one-strait and stiff line; with

his useless arms lying before him, and his bowels, or some other of the interior part, often grievously affected with violent pain to which his worn and pallid countenance gave ample testimony. Yet his mind seemed to have been unimpaired. He received much comfort from the visits of his friends, especially of such as he esteemed alive in the truth; he kept up religious meetings in his house, and often labored in them in doctrine, for the edification of those who were assembled with him; and he dictated some epistles.

It was my lot to see him three times during this trying confinement. The first time was in 1802, in company with several other and among the rest a ministering Friend, on her way to embark at Milford, for a religious visit in Ireland. As I remember, he was that time very lively in his spirit, and in parting much encouragement to the travelling minister; but I am not quite sure whether it was at this, or at a succeeding visit that I was particularly struck, if not edified, with observing how steadfastly his mind seemed to be anchored in Christ; and hearing how clearly and fully he spoke of that confidence.

Thus suffering, and thus supported, he continued about ten years. At length, towards the beginning of the Eighth month, 1807, his symptoms of disease increased, and on the 15th of that month, being considerably indisposed in bodily health, he called his wife and son to his bed-side; and, with a pleasant countenance, spoke to them, in the Welsh language, nearly as follows.

"He inquired of them, whether they had anything to say to him; "for," said he, "the blessed hours are approaching; yea; and before this night I shall have escaped in safety, whether trials nor troubles shall come. Content, and do not grieve after me; for I am settling off to endless joy, to praise him who has brought me patiently through the whole of my troubles and inexpressible affliction. Support me, O Lord, for these few minutes for I am nearly come beyond the bound of time, to a boundless eternity. I am no near giving you the last farewell; but take warning, and be daily on your watch, for; if the hour you do not suspect, death, named the king of terrors, will come to meet you who will make no difference between one of the other. But in the strength and love of Jehovah, you will not fear death; if you see him whilst he is to be found, and serve him with a willing mind and an obedient heart, for his paths are paths of peace, and his ways are ways of pleasantness. O, pray continually to the Lord, to draw your desires and affections from off earthly things, and to establish them upon things heavenly and everlasting.

"My hope is in the mercy of him, who has washed me in the fountain set open for the house of David, and the inhabitants of Jerusalem. Not through my own merits, but through the merits of the crucified Immanuel who died for the sins of all mankind. And you who have to remain a little after me, give the praise, the reverence, and the honor to him; and supplicate day and night before his throne, until you have certain knowledge that you have been baptized with the baptism of the Holy Spirit; which was sealed by the blood of the everlasting covenant. Remember, it is not an outward baptism that will serve; which is but the practising the shadows. Know also, that it is not the pro-

ession of religion that will do; but one that pure and undefiled before God. This will conduct you in safety to the everlasting habitations.

"Now the time of my dissolution draws gh; for me to go to the place where I have been these two nights. The Lord himself me to meet me; and took me with him to the height of heaven; among myriads of his holy angels; where his saints were before him, and will be forever.

"Behold, now I give up the spirit: and lo! my comely companions, coming to hold my hand above the waves of Jordan. Behold! the gates of heaven opened, and the Lord himself with arms stretched out to receive me to his mercy. I hope that you, who are behind will follow me thither. Success to the gospel on sea to sea, and from the river to the end of the earth: also to my dear brethren; that they may persevere in their faith to the end of their days, and then their rest will be with a Lamb, where no pain or affliction will come.

"Behold, the blessed time is come, for me depart in peace with every one, with good desires for every one, and forgiving every one, receive my last farewell, and the Lord bless us with the blessings of Mount Zion."

Having uttered these expressions, he soon peacefully breathed his last. The end of this man was peace!

For "The Friend."

Random Notes of Travel in Europe.

(Continued from page 199.)

Every ancient church that has escaped the onoclast, can boast the possession of some assured relics of days long gone by. The athlete exhibits the bones of the saints, incusted with jewels, but York presents to the admirer of the old, an ancient chair in which ere crowned sundry old Saxon kings, and antique chests which might have belonged to the chiefs of the Brigantes, who flourished long before York had seen a Roman helmet. Here we saw the drinking horn of Ulph, a lord of Deira, who laid it upon the altar, more than 800 years ago, in token that he bestowed upon the church certain lands which are still in its possession, and lie a short distance eastward of the city. The view was unsatisfactory, for who ever knew a vergere remain long enough in hall or chapel, to permit a proper view of anything of interest! This horn of Ulph, it is thought, was bestowed soon after the death of King Canute about 1036. It was carried away at the time of the Reformation, and falling into the hands of Thomas, Lord Fairfax, was by his son returned to the Cathedral. The horn is of ivory, with figures of two griffins, a lion and unicorn, some dogs, trees, &c., carved thereon, and is in perfect preservation.

"Would you like to ascend the tower?" asked the vergere. Unadvisedly we assented, and followed a party up the steep, winding stone steps, narrow and foot-worn. Fortunately for the climber these steep stairways do not permit one to see far above or beneath him. Up and up we toiled, until the more than 200 obstacles were finally overcome and we emerged and stood upon the lofty leads, to see one of the most extensive plains in England, but alas! so shrouded in mist that nothing appeared distinctly. The party that preceded us insisted that the roof shook, and was therefore dangerous, so they descended

and left us to contemplate in quiet the sea of vapor below, through which church buildings thrust their tall spires, and Clifford's Tower, the ancient donjon of York Castle, rose into prominence. That old castle has echoed the agonizing shrieks of hundreds, who in despair have rushed upon death. Here, in 1190, fifteen hundred Jews, driven to desperation by a bloodthirsty mob, destroyed themselves by firing the castle rather than permit their property and their persons to fall into the hands of their persecutors.

The streets of York are narrow, and wind about as is common in old walled cities, and many of its houses bear the stamp of picturesque antiquity. The walls, ten feet in thickness, surround a large part of the city, and afford a fine promenade for the citizens. A bold breach has been made in them by the railway interest, and her gates can no longer close upon the stranger—indeed they were long since removed. As we pause, in some curious angle, to survey the scene around, thought went back to the days when the rival houses of York and Lancaster contended in the streets below, and the red rose was a fitting emblem of many a sanguinary conflict. York can boast of her Roman celebrities: Here Hadrian and Severus lived, and here Constantine the Great was born. Here, also, the first English Parliament was held in 1160, and occasionally met for five centuries.

In the afternoon we crossed the Ouse in a ferry boat, at a place where the Danes landed when they came up the river on their forays into England.

An interesting episode in the history of modern York, was the unwavering support her people gave to their representative William Wilberforce. During the entire period of twenty-eight years, the attachment of his constituents was strong and ardent. Rival candidates were sometimes opposed to him, but these contested elections served to reveal the extent of the regard entertained towards him by the people. In 1807 occurred the greatest struggle. His bill for the abolition of the slave trade having triumphantly passed, he sought to secure the suppression of the same traffic abroad, and to agitate for the total abolition of slavery itself. In his efforts throughout he had been, and continued to be, powerfully* supported by Friends, and by Thomas Clarkson the agent of the six Friends to found the first abolition society, who kept alive an interest in the subject beyond the walls of the House of Commons. "On the first day of the election appearances were against him, and some began to despond. But the country had not yet shown its strength, and the vast muster of freeholders on the third day, changed the aspect of things." "Boats," said a local writer of that day, "are proceeding up the river heavily laden with

* The feelings of humanity and the power of conscience on this subject were almost universally and totally paralyzed. The Premier, Lord North, had coolly observed in Parliament that the slave traffic was necessary to almost every nation in Europe. On the 7th of 7th month, 1783, shortly after the above official declaration, six Friends met in London "to consider what steps they should take for the relief and liberation of the negro slaves in the West Indies, and for the discouragement of the slave trade on the coast of Africa." The names of these pioneers of anti-slavery action were William Dillwyn, George Harrison, Samuel Hoare, Thomas Knowles, John Lloyd and Joseph Woods. "Their names are registered in heaven; let them not be forgotten on earth."

voters; farmers lend their wagons, even donkeys have the honor of carrying voters for Wilberforce, and hundreds are proceeding on foot. No money can convey all the voters, but if their feelings are aroused, his election is secure."

"Nothing since the days of the Revolution," said the *York Herald*, "has ever presented to the world such a scene as this great county, for fifteen days and nights. Repose and rest have been unknown in it, except as it was seen in a messenger, asleep upon his post-horse, or in his carriage. Every day the roads in every direction, to and fro, even in every remote corner of the country, have been covered with vehicles loaded with voters, and barouches, carriages, gigs, flying-wagons and military cars with eight horses, crowded sometimes with forty voters, have been scouring the country, leaving not the slightest chance for the quiet traveller to urge his humble journey or find a chair at an inn to sit down upon." The result was Wilberforce was once more declared member for Yorkshire.

"During the debates on the second reading of the Abolition Bill, Sir Samuel Romilly created the young members of Parliament to let that day's event be a lesson to them, how much the rewards of virtue exceeded those of ambition, and contrasted the feelings of the Emperor of the French in all his greatness, with those of that honored individual who would lay his head upon his pillow, and remember that the slave trade was no more. The whole house, surprised into temporary forgetfulness of its ordinary habits, burst forth into acclamations of applause; a tribute of approbation 'such as was scarcely ever before given,' says Bishop Porteus, 'to any man sitting in his place in either house of Parliament.'"

Leaving Ripon behind us, we took a carriage for Studley Royal, the seat of Earl de Grey and Ripon, on whose domain are the ruins of Fountains Abbey, which are esteemed of the finest of their kind in England. The distance is three miles, the country is interesting, and the road presented for much of the distance, a very lively scene. An Agricultural Fair was in progress in the neighborhood and attracted a large concourse of people from the adjacent country. Wagonettes, drags, dog carts, and the usual farmers' square carts on springs, were out in force, containing a healthy, happy, rural population, who entered heartily into the spirit of their holiday. On the next day we saw an account of the proceedings in a local newspaper, and observed that the Earl and other celebrities were present, bestowing prizes, &c.

The following summer when at Doncaster, we were present for a short time, at one of these annual exhibitions, which was quite entertaining as presenting a phase of English life, peculiarly characteristic. The exhibition was held on grounds belonging to a school. Refreshment tables were ranged under the shade of spreading trees, and great tents leaving an open space in the centre for horses and prize cattle. The draught horses were of great size, larger than any I had ever before seen, perfect behemoths in comparison with the graceful, slenderly built hunters, and glossy Arabians. But the prize cattle never had I seen such mountains of beef. I quite hoped the exhibition would not last long, that the overburdened animals might be permitted to return to their normal condition, or be disposed

of in some other way. Some of the pigs, whose short noses, projecting at right angles from their low frontal region, gave them a most curious expression, were too unwieldily to rise at all, unless forced to do so. Then came the dog department; for remember, we were in a country where "the horn of the hunter is heard on the hill." This was announced long before we reached it by a shrill chorus from a hundred throats. To walk through the long covered passages, the dogs ranged on either side, was a trial to the nerves, though the dogs were all fastened. First came small, round, bullet-headed, short-nosed terriers, with what seemed a large amount of brain, developed probably in the region of destructiveness; next in order were the white, shaggy, long haired Pomeranians, with the blackest of eyes and noses; a tiny heap of greyish satin intermingled with light yellow, announced a French poodle, then yellow and tan rat terriers, played in the shadow of great English mastiffs, staliest of their kind. Setters followed and fox-dogs, and last, not least, the delicate, slender limbs and pointed noses of the beautiful greyhounds. Excited by the crowds around them, and the crowing of the countless fancy feathered bipeds opposite, the dogs kept up a furious barking, being evidently very ill at ease in their new quarters. In a tent near by were exhibited pencils and cement similar to that which had been sent, it was carefully stated, to the Philadelphia Exhibition. The people were very quiet and orderly, the conversation being mostly carried on in an undertone.

(To be continued.)

For "The Friend."

Letter of William Penn.

[The following letter has been sent to us for re-publication in "The Friend." The note which accompanied it says: "A few weeks since I came across, in an old dilapidated volume, this valuable letter of William Penn, which he wrote to his wife and children before leaving them to come to this country in 1682. It interested me much. The sentiments are excellent, and very much coincide with my own. I endeavor to advise my contemporaries who have young children, to bring them up in simplicity in food, raiment, &c.; and see to it that their requirements be simple."—Ems.]

My dear wife and children,—My love, which neither sea, nor land, nor death itself, can extinguish or lessen toward you, most endearedly visits you with eternal embraces, and will abide with you for ever; and may the God of my life watch over you, and bless you, and do you good in this world and for ever! Some things are upon my spirit to leave with you in your respective capacities, as I am to one a husband, and to the rest a father, if I should never see you more in this world.

My dear wife! remember thou wast the love of my youth, and much the joy of my life; the most beloved, as well as most worthy of all my earthly comforts; and the reason of that love was more thy inward than thy outward excellencies, which yet were many. God knows, and thou knowest it, I can say it was a match of Providence's making; and God's image in us both was the first thing, and the most amiable and engaging ornament in our eyes. Now I am to leave thee, and that without knowing whether I shall ever see thee more in this world, take my counsel into thy

bosom, and let it dwell with thee in my stead while thou livest.

First: Let the fear of the Lord and a zeal and love to his glory dwell richly in thy heart; and thou wilt watch for good over thyself and thy dear children and family, that no rude, light, or bad thing be committed: else God will be offended, and he will repent himself of the good he intends thee and thine.

Secondly: Be diligent in meetings for worship and business; stir up thyself and others herein; it is thy duty and place; and let meetings be kept once a day in the family to wait upon the Lord, who has given us much time for ourselves; and, my dearest, to make thy family matters easy to thee, divide thy time, and be regular: it is easy and sweet: thy retirement will afford thee to do it; as in the morning to view the business of the house, and fix it as thou desirest, seeing all be in order; that by thy counsel all may move, and to thee render an account every evening. The time for work, for walking, for meals, may be certain, at least as near as may be: and grieve not thyself with careless servants; they will disorder thee: rather pay them, and let them go, if they will not be better by admonitions: this is best to avoid many words, which know wound the soul, and offend the Lord.

Thirdly: Cast up thy income, and see what it daily amounts to; by which thou mayest be sure to have it in thy sight and power to keep within compass: and I beseech thee to live low and sparingly, till my debts are paid; and then enlarge as thou seest it convenient. Remember thy mother's example, when thy father's public-spiritiveness had worsted his estate (which is my case). I know thou lovest plain things, and art averse to the pomps of the world; a nobility natural to thee. I write not as doubtful, but to quicken thee, for my sake, to be more vigilant herein; knowing that God will bless thy care, and thy poor children and thee for it. My mind is wrapt up in a saying of thy father's, "I desire not riches, but to owe nothing;" and truly that is wealth, and more than enough to live is a snare attended with many sorrows. I need not bid thee be humble, for thou art so; nor meek and patient, for it is much of thy natural disposition; but I pray thee be oft in retirement with the Lord, and guard against encroaching friendships. Keep them at arms' end; for it is giving away our power, eye and self too, into the possession of another; and that which might seem engaging in the beginning may prove a yoke and burden to hard and heavy in the end. Wherefore keep dominion over thyself, and let thy children, good meetings, and Friends, be the pleasure of thy life.

Fourthly: And now, my dearest, let me recommend to thy care my dear children; abundantly beloved of me, as the Lord's blessings, and the sweet pledges of our mutual and endeared affection. Above all things endeavor to breed them up in the love of virtue, and that holy plain way of it which we have lived in, that the world in no part of it get into my family. I had rather they were homely than finely bred as to outward behavior; yet I love sweetness mixed with gravity, and cheerfulness tempered with sobriety. Religion in the heart leads into this true civility, teaching men and women to be mild and courteous in their behavior, an accomplishment worthy indeed of praise.

Fifthly: Next breed them up in a love one

of another: tell them it is the charge I behead me; and that it is the way to have love and blessing of God upon them; what his portion is, who hates, or call brother fool. Sometimes separate them not long; and allow them to send and each other small things to endear one another. Once more I say, tell them it was counsel they should be tender and affectionate to another. For their learning be lib spare no cost; for by such parsimony a lost that is saved; but let it be useful knowledge, such as is consistent with truth and fitness, not cherishing a vain conversational mind, but ingenuity mixed with industry is good for the body and mind too. I recommend the useful parts of mathematics, as building houses or ships, measuring, surveying, dialling, navigation; but agriculture is especially in my eye: let my children be husbandmen and housewives; it is industrious, healthy, honest, and of good example: like Abram and the holy ancients, who pleased God, obtained a good report. This leads to consider the works of God and nature, of things that are good, and diverts the mind from being taken up with the vain arts and inventions of a luxurious world. It is commendable in the princes of Germany, and the nobles of that empire, that they have all their children instructed in some useful occupation. Rather keep an ingenious person in the home to teach them, than send them to schools, many evil impressions being commonly received there. Be sure to observe their growth, and do not cross it as to learning: let them not dwell too long on one thing; but let the change be agreeable, and all their diversions have some little bodily labor in them. Will grown big, have most care for them; for there are more snares both within and without. When marriageable, see that they be worthy persons in their eye, of good life, of good fame for piety and understanding. I need no wealth, but sufficiency; and be sure their love be dear, fervent, and mutual, that it may be happy for them. I choose not they should be married to earthly covetous kindred, and of cities and towns of concourse beware: the world is apt to stick close to those who have lived and got wealth there: a count life and estate I like best for my children. I prefer a decent mansion, of an hundred pound per annum, before ten thousand pounds London, or such like place, in a way of trade. In fine, my dear, endeavor to breed the faithful to the Lord, and his blessed light, truth, and grace in their hearts, who is the Creator, and his fear will grow up with the Teach a child (says the wise man) the way: thou wilt have him to walk, and when he old he will not forget it. Next, obedience thee, their dear mother; and that not for wrath, but for conscience sake; liberal to the poor, pitiful to the miserable, humble at kind to all; and may my God make thee blessing, and give thee comfort in our dear children; and in age gather thee to the joy and blessedness of the just (where no death shall separate us) for ever!

And now, my dear children, that are the gifts and mercies of the God of your tender father, hear my counsel, and lay it up in your hearts; love it more than treasure, and follow it, and you shall be blessed here, and happy hereafter.

In the first place, remember your Creator in the days of your youth. It was the glory

Israel in the second of Jeremiah: and how God bless Josiah because he feared him in youth! or so he did Jacob, Joseph, and Moses. O my dear children, remember, and serve Him who made you, and gave to me and your dear mother; that you live to him and glorify him in your generations!

To do this, in your youthful days seek after Lord, that you may find him; remember his great love in creating you; that you not beasts, plants, or stones, but that He kept you, and given you his grace within, substance without, and provided plenty for you. This remember in your youth, you may be kept from the evil of the world; for in age it will be harder to overcome the temptations of it.

Therefore, my dear children, eschew the carriage of evil, and love and cleave to that your hearts which shows you evil from God, and tells you when you do amiss, and corrects you for it. It is the light of Christ; He has given you for your salvation. If do this, and follow my counsel, God will save you in this world, and give you an instance in that which shall never have an end.

For the light of Jesus is of a purifying air; it seasons those who love it and take it to it; and never leaves such, till it has brought them to the city of God, that has no admixture of evil. O that ye may be seasoned with the gracious nature of it! hide it in your hearts, and flee, my dear children, from all sinful lusts; the vain sports, pastimes, and pleasures of the world; redeeming the time, because the days are evil!—You are now being to live—What would some give for time? Oh! I could have lived better, if I was, in the flower of youth.—Therefore, love and fear the Lord, keep close to His commandments, and delight to wait on the Lord your father and mother, among his chosen people, as we have done; and count our honor to be members of that Society, and heirs of that living fellowship which is offered among them, for the experience of which your father's soul blesteth the Lord ever.

(To be concluded.)

Cardinal Antonelli's Will.—Under this head *Times* has a leader noticing the testamentary disposition of the Cardinal's earthly goods, but omitting all reference to his distaste of his soul, which is as follows:—"I recommend my poor soul to the infinite mercy of God, trusting that through the intercession of Most Holy Innocent Mary, and of my own saints, St. Peter, St. Paul, St. James and St. Louis, He may grant the remission of my sins, and make me worthy of the eternal glory of paradise." Not a word about Christ and His love!—*Late Paper.*

Extract from the Memoirs of Catharine Seely. This kind self-indulgence is one of the greatest dangers to Christian advancement. We learn self-love and humility, or we do not walk in the paths of rectitude. Zionism, which are not strewed with flowers to please the carnal mind, but with crosses and trials to prove our sincerity and faith. This is new to each, and the experience of others cannot make it familiar to us; nor can we labor answer instead of ours, any more than their happiness can satisfy our souls. We must each do our own work, and the hope

of future happiness will cheer and animate the pilgrim in his toilsome journey.

JUST AS THOU WILT.

Just as thou wilt—no more I pray
That Thou would'st take this cross away;
I only ask for grace to say,
Thy will, not mine, be done.

Just as Thou wilt—I cannot see
The path Thy love marks out for me;
Resigned, I leave the choice to Thee;
Thy will, not mine, be done.

Just as Thou wilt—full well I know
Thy hand in mercy deals the blow;
Then, though my cherished hopes lie low,
Thy will, not mine, be done.

Just as Thou wilt—though called to part
With dearest friends, until my heart
Quivers beneath Thy piercing dart;
Thy will, not mine, be done.

Just as Thou wilt—O Lamb divine,
What grief can be compared to Thine?
Then let Thy prayer henceforth be mine—
Thy will, not mine, be done.

Just as Thou wilt—still life be past;
Then, safe beyond earth's stormy blast,
My soul shall sing with joy at last,
Thy will and mine be done.

Selected for "The Friend."

"The Pursuit of Trade and Business." From *Advices of Philadelphia Yearly Meeting.*

(Concluded from page 163.)

We affectionately desire that Friends may humbly wait for Divine counsel in all their engagements, and duly attend to the secret intimations and restrictions of the Spirit of Truth in their business and trading, not suffering their minds to be hurried away by an inordinate desire of worldly riches; remembering the observation of the apostle in his day, and so often sorrowfully verified in ours, that "They who will be rich, fall into temptation and a snare;" and erring from the faith, " Pierce themselves through with many sorrows." Even when riches, to any extraordinary degree, have been amassed by the successful industry of parents, how often have they proved like wings to their children, carrying them beyond the limitations of Truth, into liberties repugnant to our religious testimonies, and sometimes into enterprises which have terminated in irreparable damage to their temporal affairs, if not an entire forgetfulness of the great work of the soul's salvation.

We feel tenderly solicitous on behalf of our beloved Friends who are engaged in trade or business, and who, in pursuing the means of gaining an honest livelihood, are subjected to many difficulties. We believe the present is a day of peculiar temptation to such. Circumstances of latter time have combined to produce a state of extraordinary excitement among the trading community, and an active and eager competition, which is not scrupulous as to the means employed to invite and secure custom. Pressed by the manoeuvres of this selfish and grasping spirit, and beholding the apparent excess which for awhile is sometimes permitted to attend it, we fear lest any under our name should yield to the temptation to resort to any artifices or plans to enlarge their business or to increase their profits, which are inconsistent with the law of universal righteousness, and thus destroy their peace of mind. Strict justice and honesty in all his dealings, and a conscientious

observance of the great precept of our Holy Redeemer, "Whatsoever ye would that men should do to you, do ye also even so unto them," are the indispensable duty of the Christian; and the greatest pecuniary gain would be no compensation for the guilt and the sore distress which, sooner or later, must result from its violation.

The standard which the world adopts, and even defends, in its pursuit of trade and its desire to gather riches, is not a safe one for the disciple of Christ. "Men will praise thee when thou doest well for thyself;" and we sorrowfully see that this praise is often bestowed with but little regard to the means employed to acquire wealth. But we are taught by the Saviour himself, that "that which is highly esteemed among men is an abomination in the sight of God," and we fear that it is true as respects some of the modes of conducting business, and many of the schemes for procuring money, which are resorted to in the present day. Earnestly do we desire that all our dear Friends may be scrupulously on their guard not to suffer their nice sense of Christian integrity to be blunted or numbed by the examples which pass uncorrected in the community, but steadily adhere to that strict uprightness, in all their transactions and converse, which becomes the disciple of Christ, and which so remarkably distinguished our worthy predecessors. How exact were they in the fulfilment of their words and obligations! how careful to avoid all evasive and insincere dealings! and how conscientious not to engage in anything of a doubtful or objectionable character! Their strictness in these respects gained for them and for our religious Society a high reputation, and the Lord blessed their honest endeavors so that they prospered in the world. May their noble example influence us of the present day to follow in their footsteps, that so our conduct may bring no shade over the brightness of our Christian profession, but that, walking and acting in the holy light of the Lord Jesus, we may by our example commend our principles to those who behold us, and experience in ourselves the truth of the Scripture declaration, "The path of the just man is as a shining light, that shineth more and more unto the perfect day."

We believe the desire after large business is one of the besetting temptations of the present day, and we would affectionately entreat our members to beware of being caught with it. "Seeketh thou great things for thyself? Seek them not," is a language of Holy Scripture applicable, we believe, at this day, to every one who desires to be a partaker of the joys of the righteous. The happiness of man's life consisteth not in the abundance of the things which he possesseth, but in the love of God shed abroad in the heart, and daily communion with Him. Trade, or business, or speculations in property, which hold out prospects of a rapid accumulation of riches, often destroy the tranquillity of the mind, and lead to perplexities which not only lessen the desire, but disqualify for a patient, humble dependence upon Him, who is the Author of all our mercies, and whose blessing alone maketh truly rich. May none of our members involve themselves in worldly concerns of such magnitude, or of so absorbing a character, as to disqualify them for acting the part of faithful stewards to God, in the right use of their time, their talents, and the temporal substance

intrusted to their care; or prevent them from being concerned, in all things to pass the time of their sojourn on earth in fear, and by daily watchfulness unto prayer, to have their lamps trimmed, and oil in their vessels, that when the solemn close of life shall come, they may be prepared, through the mercy of God in Christ Jesus, to enter into the joy of their Lord.

It is the judgment of this meeting, that neither Monthly nor other meetings should receive subscriptions, donations, or bequests, from persons [who have failed], until they have paid off their deficiencies, or are voluntarily acquitted thereof by their creditors; for it should be remembered that though, in such cases, the defaulter may have been legally discharged, the property he may afterwards acquire is not properly his own till he has fairly paid off his former debts to the satisfaction of the creditors.

Obey the Captain.

For "The Friend."

Having occasion to cross an arm of the ocean of several miles in width, I was kindly invited into the pilot-house of our little steamer, as a good look-out from which the shores, the waves, and the passing vessels could be readily seen and watched.

The wind was strong, and blowing from such a quarter, that our direct course would have been diagonally across it. To avoid the roughness and discomfort which a side wind and waves would have caused us, the Captain ordered the steersman to keep to the westward, along the shore, for several miles, till he reached a certain point at the mouth of a river, and then turn his vessel towards the port we were seeking. This apparently lengthened our voyage, for at the river's mouth we were but little nearer the place we were going to than when we started; but by going there we had obtained a position from which we could safely and rapidly perform the remainder of the journey without fear of rocks or shoals, and with a favoring wind.

This little fragment of nautical experience furnished food for profitable reflection. Does it not suggest the need there is, that the voyager on the ocean of life, bound to the haven of eternal rest and peace, should seek for direction from Him who alone knows the hidden dangers of the deep? that he should obey His commands, and steer his vessel in accordance therewith, trusting to that wisdom which is profitable to direct? We may think that the path of duty which has been placed before us appears to bring us no nearer to the Heavenly Kingdom than when we entered it; that while others are conspicuously engaged in proclaiming to the world the doctrines of religion, we are confining our exertions to a small cove; and we may be induced by such reflections and suggestions to enter on similar labors and efforts, without knowing the preparation of heart, or the Divine command, without which we cannot safely engage therein. Thus we may expose ourselves to winds and waves, with which our frail bark will be not fitted to contend, and so may meet with great loss, or even suffer total shipwreck. But he who faithfully follows the orders of his Heavenly Captain, will be so guided as to steer the right course, and will be enabled to meet the winds and waves with safety, and to avoid the hidden rocks and sand-bars; for his Master is one who knows all the sound-

ings of the waters over which he has to pass, and is skilful to conduct His vessel safely past all dangers in their voyage toward Heaven.

I noticed also, that the steersman was always moving his wheel; sometimes one way, and sometimes another; while his eye was steadily fixed on the point towards which he was going. This constant exertion was rendered necessary by the fluctuations of the wind and currents, and by the blows of the waves. These causes were continually shifting the position of the vessel; and if their effect had not been counteracted by the vigilance of the steersman, they would soon have turned our boat completely out of her course, and even gradually have headed her back towards the point from which she started.

Even so the Christian needs to keep his attention steadily fixed on that celestial city towards which he is voyaging, so that he may continually counteract the tendency of the cares, trials, and temptations of life to turn him aside from the pursuit of the one thing needful. Without this care we are not safe, even if we have in good earnest set out to seek the Heavenly country; for we are constantly exposed to various influences, which may lead us astray. Hence it is indispensably necessary to observe our Saviour's command, "Watch and pray lest ye enter into temptation." W.

For "The Friend."

An Interesting Record.

(Concluded from page 198.)

The following extracts from the Record show the character of the trials endured by Friends in the city of London at this time.

"2 mo. 29, 1683, Grace's Street. Kept out in Grace's Street. A constable, with some files of trained bands, came and made proclamation. Friends standing quietly, the soldiers thronged along the houses, thrusting Friends in the rain. The soldiers stood quiet. John Field declared and prayed, and meeting ended peaceably, near the 11th hour."

"3 mo. 16, Grace Str. For this meeting, Daniel Quare distressed for 10£ (preaching), though not there."

"4 mo. 10, Grace's Street. Kept out in the street. Patrick Livingstone taken, being in prayer, by a constable. Carried to the Exchange, thence to the Mayor, who committed him to Wood Street Compter for refusing the oath."

"5 mo. 1, Grace's Street. Within the house. The constables coming with three informers, neighbors, took fourteen Friends, and had them before Sr. James E. Wards, Mayor, and Alderman Tulso, who fined twelve of them 5s. apiece and dismissed them. Robert Sandilands and Samuel Martins were bound over to sessions for preaching." "Robert Sandilands was committed to Newgate, by mittimus dated the 3d inst., by the Mayor and Ald. Tulso, upon the 5 mile act, and preaching at Grace's Street, and not taking the oath, nor subscribing to the declaration, for six months." "Wheeler Street. Kept out in the street. John Browne and Thomas Curwin taken and committed to the House of Correction in White Chapel for a riot, pretended, by Sr. Wm. Smith and Ro. Hastings."

"5 mo. 8, Savoy. Kept out in the entry and street. The soldiers were abusive to Friends, striking several with their muskets."

"5 mo. 15, Savoy. Kept out in the entry and street. The soldiers were very rough,

several Friends being knocked down in the street, also when the meeting was dispersed. (John Voughton having ended with pray. J. V. and B. F. [B. Freeman] were struck the soldiers. They say they have ord from the K. not to suffer a meeting there.

"5 mo. 22, Devons. Without. The trains bands coming to disperse the meeting. Goodaker and Jno. Mills taken by the constables and sent away, and twenty-three more all committed to Poultry Compter the mayor, for not giving bond to appear. Afternoon. In the street. B. Antrobus tal by the constables, being in prayer; but the mayor engaged to appear. The twenty five Friends, upon the endeavors of J. O. J. with the mayor, were discharged the 26 in being fined 5s. each, according to the statute "Horslydown. In the street. A. Tonkins declared, and after him Jno. Field, who a soldier of the trained bands coming, look on him and went away, but came again w several files of the trained bands, saying th had orders to disperse the meeting. Intrig Friends; but said at last, 'If you v not go, we must make you go,' and drew i ward, moving Friends forward in the str as far as the tree; and [it] raining f Friends broke up the meeting. The captai name was Smith, threatening the constab for neglecting their office."

"6 mo. 5, Horslydown. In the street. Eitteen taken by the trained bands—were hec the artillery ground, and from thence to J tice —, where two did engage for the r appearance at Sessions."

"Park. In the street. Eighteen taken the trained bands, as soon as they were gared, and had to the artillery ground. Af some time they took twelve more, and t them there, who with the eighteen fr Horslydown, were brought to the same J tice, where two engaging (as before); all w dismissed but Wm. Bingley, [who was] c mitted to the Marshalsea for speaking."

"Peel. In the street. The constables be rough, haled Friends from place to place."

"6 mo. 19, Park. Without. In the morn about half a score Friends being taken by soldiers, and carried to Justice Glover, w enjoined them to appear next Sixth day fore the private sessions, etc."

"Afternoon, without. The soldiers ca about the 2d hour. The sergeant caused s eral forms to be taken in, and threatened nail up the meeting-house door, and said would be pulled down, adding, he would s fer no meeting in the street, and bid Fri depart, or he would send every man to ga having a warrant in his pocket (as he sa) And Friends not departing, he bid his soldi knock them down, fire at them, for they w met in a riotous manner. Some Friends plied, they were there peaceably met to w ship God, signifying that in a little time th should depart. Upon which he said, ' try you,' and drew off his men, and w away. Then J. Field spoke about half three quarters of an hour, and soon after had ended, he came again and said, 'Wh are you here still?' And so took sev Friends into custody. Departing with men he dropt some, but the rest he l away. J. F. ending the meeting with pray About half a score he had to Justice Glo who engaged them to appear next Sixth d at the private sessions, and so dismiss them."

6 mo. 22, Grace Ch. Street. Within the evening-house; very quiet and peaceable. Friends mostly standing, the forms having in taken away last Fourth day by the constables. G. F. declared, and G. W. first."

6 mo. 26, Devonshire house. Morning. At out. The constables and watermen took in Vaughton and eight Friends more. One more against J. V. for speaking, before the Mayor, who fined him 20s, which he paid upon him, and three more, being 5s upon each, and so dismissed them all.

Afternoon, kept out. The constable, etc. (being taken some Friends into custody, was left with Friends to have them be gone, fled peaceably, those in custody being dismissed."

7 mo. 2, Bull and Month. Kept out by liers morning and afternoon. Marrab, tomorrow was taken in the morning and committed to Wood Street Compter for speaking by Justice —"

7 mo. 9, Devonsh. House. Morning. The tables Townsend and another, with the chmen, having set forms on either end of the alley to keep Friends out of the square, W. being there spoke to them, calling in neighbors. Said this was a new way, what order had they for that? Furthering that the Aldermen told him they did not be used worse than other meetings in the city, etc. At last prevailed with in that they took away the forms and put r halberds there. And though the constables proceeded to be rigorous, and to make proclamation threatening Friends with a riot; length G. W. gained upon Townsend and constables that they were more moderate, ng G. W. whether he would go with them be Alderman to-morrow: who said he ld, and that freely, where they would e him; and Friends having had some tme, departed.

Afternoon, Friends were within: some ll bustle was by the watchmen, but ended eable: but being gone, the train bands e with all speed and were disappointed ng the meeting being done."

7 mo. 23, Grace ch. Street. Tho. Barker, in. Low, Sam. Russel and Jno. Broadgate a sessions the 18th 10th mo. for this meet- Fined 10 nobles each.*

8 mo. 7. Grace's Street. Some within some without, kept so by the officers. Robertson declared in the court and ed, and the ending whereof the officers ink the marshal) came and took the said e, though he had finished, and Friends e ready to pass away, and [he] was fined

Savoy. Within. G. ff. was taken by the tables, declaring, etc., and had to a Jus- and was to appear again next morning, accordingly went to the constables. But ng received no mittimus from the Justice, issed G. ff. A. Parker there also, and at Justices with G. F. Several Friends' es were taken. Gabriel Shadd having ed against the meeting aforesaid, and a warrant.

Westminster. Within. Francis Stamper taken declaring by the constables upon information of Gabr. Shadd, aforesaid, was had to a Justice, who examined the tables, &c. But none would swear against

his entry was made after an act. of the meeting; early at a subsequent date.

him; took his name at length (Shadd being present) and for want of information upon oath dismissed the Friend F. S."

"9. Peel. Shadd came with constables and soldiers, taking Friends' names; Wm Bingley being there, had his name [taken] also.

"10. At night Shadd came with officers and red coat soldiers, demanding 20s for the house and 10s for an unknown preacher, by warrant from Peter Sabbs, Justice. Made seizure of the goods, kept possession that night; next day carrying away 12 load of timber and household goods. Carrying all to Brixwell, there to be kept till further order."

"8 mo. 14, Savoy. Within. The informer Shadd, came with the constables, &c.—Eliza Stamper speaking—asking Friends names was refused, because [they] had to object against Shadd (of his being burnt, &c.,)* and would have their accuser face to face. The constables said, 'you shall'; and had many away, both men and women, to Clement's church-house, keeping them almost till night, something strict, and had them to Justice Armitage, where their names being taken, and Shadd not appearing, were dismissed. The Justice afterwards had given their names to Shadd."

"8 mo. 28, Bull and Month. Within the house. Major Pierce, of the Blue Regiment, with several files of musqueteers, came, commanding Friends to depart, if not, 'twas a riot, and they would break everything to pieces. Francis Stamper spoke to Friends to be still and quiet, and wait low in the fear of the Lord, and keep their places, &c., whom they took down from the gallery with Jno. Brooks, Sam. Goodacre, and six more, and turned out the rest. Then [they] broke all the windows in the meeting, flung down the forms out of the high gallery into the meeting room, and hit him that commanded them, breaking the boards of the floor with them. Then went down and broke divers forms to pieces. And in the street commanded Friends to depart, taking Francis Stamper and three more (taken into custody) with them before the Mayor, who engaged the said Friends in case of liberty, &c., to appear next sessions. These being gone, Friends went into the meeting-house again, keeping and ending the meeting quietly."

"The said four persons appearing at the Quarter Sessions for London, the 10th of the 10th mo. following, were indicted for being at a riotous meeting, etc., were brought in guilty, and fined 3s 6s, 8d. each, and carried to prison (Newgate) with thirteen more, after 11 at night."

"9 mo. 11, Park. Afternoon, within. Wm. Gibson declaring, and James Parke having spoke, [they] with six more were taken by the constable, who brought a warrant for meeting on th st-days and other days. All were brought before Justice Reading, who

* I find about this time, that one Gabriel Shad, who had made it his business to serve as informer against the Quakers, and who had lately informed against G. Fox, as hath been said, being confined in Newgate at London, for stealing goods from one William Leman, to the value of three hundred pounds, had been found guilty of felony at the Old Baily; but he had such friends that he was freed from the gallows, and having obtained the benefit of the clergy, was discharged with being burnt in the hand. Such infamous persons were the informers; for honest people scorned to meddle with such a base and abominable work.—Swell's History.

fined W. Gibson 20s, and James Parke 20s, the rest for hearing, 5s. Said, 'If you will not be reduced by your purses, you must go to prison.'

"9 mo. 18, Grace's Street. Wm. Bingley and eight more taken by the marshal, and, with Sam. Waldenfield, were had to the Mayor, and bound over to appear at the sessions next; where they were brought in guilty of a riot, fined 5s each, and committed to Newgate the 14th of 11th mo. 1683-4, and good behaviour.*

"10 mo. 9, Savoy. About fifty Friends taken out of the meeting, thirteen whereof were brought before two Justices by the constables, etc. (by means of the informer Hilton), who put the oath of allegiance to Jno. Vaughton, and referred him to speak to a certain priest, who was to inform him upon his queries concerning the oath and the lawfulness thereof; and all [were] to appear at sessions the day following. Being gone, all were convicted for a Conventicle and fined in their absence. And Jno. Vaughton with the rest appearing at the sessions at Hickshall the day following, found a great deal of moderation towards them, and were greatly commended. Sr. Wm. Smith being chairman, who called Friends early before the bench (the Lord Craven being on the one hand and another Lord on the other hand), and having spoke to Friends concerning the lawfulness and usfulness of an oath, and equity thereof as to defend the King, who takes an oath to defend us his subjects, said at last, 'I must confess, though you have not sworn allegiance, yet you have practiced allegiance by your best life and quiet conversation among your neighbors, etc., speaking pretty much to that purpose. Saving further: 'And therefore this honorable Bench, in hopes you will continue your allegiance and obedience to the King and his government, and have no hand in any plot or designs, as we do not hear of any of you or yours have [done, we] do not intend to put that upon you which they know you cannot perform—which is to swear; and so discharged them; and all were well satisfied. The informers, etc., disappointed and Friends encouraged.'

It is natural for the reader to desire to know the names of the compilers of this Record. A careful examination clearly shows that two persons must have been concerned in it, one of them writing out the names of the meetings, their date, and the names of ministers attending them; the other furnishing the incidents that occurred. The latter, it is suspected, may have been George Whitehead. There are some indications favoring this conjecture in the text, the strongest of which is that one of the statements appears to be signed G. W. A comparison of these capitals, which frequently occur, with the facsimile in Rawlinson Barclay's "Letters of Early Friends," also shows a close resemblance.

It appears that a number of the meetings at that time were held in silence. A more careful examination of the manuscript shows there were over forty ministers therein mentioned, living in London, five of whom were women.

Philadla, 2d mo. 1877.

* It appears by a note in the margin that one of their number died in prison.

For "The Friend."

The following extract from the letters of John Barclay, if the Editors approve, I should be glad to see inserted in "The Friend."

"Domestic life presents many opportunities for the exercise of virtue, as well as the more exalted stations of honor and ambition. For though its sphere is more humble, and its transactions are less splendid, yet the duties peculiarly incumbent on it constitute the basis of all public character. Perfection in private life is by far the more arduous attainment of the two; since it involves a higher degree of virtue to acquire the cool and silent admiration of constant and close observers, than to catch the undistinguishing applause of the vulgar. Men accustomed to the business of the world may think it a mean occupation to be engaged in the duties of a family. It is, however, only by comparison that they are rendered to a superficial eye petty and insignificant. View them apart, and their necessity, their importance, immediately rises.

"How many daily occasions there are for the exercise of patience, forbearance, benevolence, good humor, cheerfulness, candor, sincerity, compassion, self-denial! How many instances occur of satirical hints, of ill-natured witticisms, of fretfulness, impatience, strife, and envyings; besides those of disrespect, discontent, sloth, and very many other seeds of evil, the magnitude of which is perhaps small, but for the guilt of which we shall most assuredly be judged.

"When we consider that private life also has its trials, temptations, and troubles, it ought surely to make us vigilant, when around our own fireside, lest we should quiet our apprehensions, and cease from our daily watchfulness.

"Prove your love and affection for your family, and your friendship and attachment for all your connections, by using, not partial, hypocritical, momentary acts of kindness, but one universal, constant, animated effort,—one sincere desire of rendering others happy, united with compassion for their sufferings, charity and candor for their errors, and forgiveness for their injuries.

"Especially cultivate a benevolent disposition, an inclination rather to think and speak well than ill of those around, accompanied with that candor which exposes, not the errors but rather the virtues of others, to view and which brings to light with regret their failings, for no other end than their suppression."⁷⁷

THE FRIEND.

SECOND MONTH 10, 1877.

SUMMARY OF EVENTS.

FOREIGN.—A census of Paris was taken at the close of 1876, and the number of inhabitants was found to be 1,996,748, which is an increase of 133,956 since the census was taken at the close of 1872.

The population of the German empire is officially stated to be 42,727,620.

The British Privy Council have ordered that no cattle, sheep or goats be allowed to leave London on account of the appearance of the rinderpest in its suburbs. Advertis from the City of Mexico of the 21st ult., state that armed resistance to General Diaz is considered at an end for the present. Lerdo, as well as Iglesias, succeeded in leaving the country safely. Many of the adherents of Lerdo continued to make their escape. The church party tacitly countenance Diaz, but a general opinion prevails that his government would be of short duration.

A dispatch from Constantinople says: It is believed that the Porte in its negotiations with Serbia is disposed to require a guarantee of the continued Turkish occupation of Alexinatz. Montenegro, in reply to Midhat Pacha's dispatch to treat direct for peace, accepts the proposal to negotiate, and requests the Porte to state the conditions it will accord as a basis of negotiations.

A Vienna dispatch says Russia is employing her time well. War preparations are continued with energy and on a larger scale than before. Nothing has been done hitherto which would indicate that the beginning of the war is very close at hand; but the preparations leave no doubt of the determination to follow up the war to its conclusion. It is mentioned that Russia is already commencing her war, but will keep a large army on the frontier, thus compelling Turkey to do the same, which will cause a heavy demand on the already embarrassed finances of that country.

The Porte has sent a dispatch to its representatives abroad, giving notice of the appointment of three Christians to the Governorship of Provinces, and declaring that the application of the reforms is proceeding unerringly.

Montenegro has informed the Porte the terms of peace proposed by the latter power can be accepted only on the condition that Sutorina is annexed to Montenegro territory.

The Constantinople dispatch of the 5th says, that Midhat Pacha has been dismissed from the office of Grand Vizier, and Edhem Pacha, who was noted for his violent opposition to the proposals of the European Powers has been appointed in his place.

Advices from the City of Mexico to 1st mo. 30th, state that the elections were going in favor of Diaz. The church party had triumphed in the elections in the capital and several other cities. A petition was in circulation requesting the government to permit the return of the Sisters of Charity who were expelled from the country two years ago. Protestant worship has been suspended in various places by order of the authorities.

The coffee estates in Ceylon have advanced greatly in value in consequence of the continued high price of coffee. Estates which sold at \$400 to \$500 per acre, are now worth \$650.

In the 25 years from 1849 to 1874, more than 270,000 persons were added to London, an increase somewhat in excess of the actual wants of the metropolis.

The London Pall Mall Gazette is of opinion that the results of the recent elections in Germany are discouraging to the empire, and that it will require all of Bismarck's adroitness to maintain a majority for the government.

The steamer George Washington, which left Halifax on the 18th ult. for St. Johns, N. F., went ashore at Cape Race during a snow storm, and all on board perished. The crew consisted of 22 persons, all held together by New York and the vicinity.

UNITED STATES.—The two Houses of Congress chose the ten Senators and Representatives, who, with five members of the Supreme Court, form the Commission to decide all disputed questions in regard to the Presidential election, with great unanimity, and the four judges selected by Congress chose Justice Bradley to be the fifth member, thus completing the Commission of fifteen. On the first inst. both Houses met in joint convention to count and declare the Electoral vote, taking the States in alphabetical order. No objections arose until Florida was reached, when two certificates were read, objection was made by the Democrats to the Hayes certificates and by the Republicans to the Tilden certificates. The certificates and papers in the case were thereupon referred to the Electoral Commission for adjudication, and the joint convention adjourned to await its decision. The Commission heard the arguments of able counsel on both sides during the 2d, 3d and 5th inst. It was then announced that no public session would be held on the 6th inst., but that the Commission would meet at noon for consultation.

The House adjourned on Appropriations has provided for only \$25,000 for the President's salary in the Legislative Appropriation bill, and accompanied the item with a clause repealing the section of the Revised Statutes making the salary \$50,000. It is believed the reduction will be agreed to.

The bill has passed the House appropriating \$500,000 to be paid to the B. & O. R. R. for the completion of the month of the Mississippi river in building jetties, &c. The channel through the jetties at the mouth of the Pass is 21 feet deep, with a coast width of 200 feet, in which no depth less than 20 feet is found. The entrance from the sea through the jetties is 1000 feet wide, and through the works at the head of the pass 800 feet.

The public debt of the United States was decreased \$2,069,570 during the First month.

The Legislature of Kansas has elected Col. Plur the U. S. Senate.

The tonnage of freights on the New York canal 1876 was 4,172,129 tons, on which the tolls amount to \$1,534,000. In 1862 the tonnage was 5,508,578 the tolls received were \$5,188,942, showing that the business has fallen off only about 25 per cent compensation has declined over two-thirds in consequence of the competition of the railroads.

The total losses to the fishing fleet of Gloucester, Mass., for the year 1876, amount to no less than the vessels with crews numbering 213 men.

On the 3d inst. the President granted a special message to Congress urging the adoption of measures to facilitate and hasten the resumption of specie payment. To this end the volume of legal tender notes in circulation must be reduced, and the President proposes this shall be done by the issue of 4 per cent bonds 40 years to run before maturity, to be exchanged for legal tenders, the whole amount of such bond to exceed \$150,000,000. The President also bid the repeal of so much of the joint resolution for issue of silver coin as limits the amount to \$50,000.

There were 425 deaths in New York city last week, and 242 in Philadelphia.

Sixty-nine emigrants sailed from New York on the 3d inst., in search of more profitable employment than they were able to find here.

A meeting of unemployed workmen was held in New York the 3d inst., at which a memorial to the Legislature was adopted calling for an appropriation of 100,000 to be expended on public works for the purpose of giving employment to the 55,000 men who it is alleged are now without work.

The total imports into New York during the month were \$29,940,937, against \$34,274,836 in corresponding month 1876, the total exports of port were \$29,348,662, against \$24,940,937 in 1876, she a large reduction of imports, and an increase of exports.

The Markets.—The following were the quotations the 5th inst. — Philadelphia. — American gold, U. S. States sixes, 1881, registered 113½; do. coin, 114½; do. 1868, registered and coupons, 116½; do. sixes, 1881, 111; do. 4½ per cent, 107½. Cotton 13½ cts. for uplands and New Orleans. Extra No. 1 \$6.25; finer brands, \$6.50 to \$10.50. Pennsylvania, \$1.49; do. 2½, \$1.50; amber, \$1.52 to \$1.54; do. white, \$1.55 to \$1.58. Rye, 77 to 82 cts. Yellow five 56 cts. Oats, 37 to 41 cts. New York flour, 15 to 15½ cts.; western, 12½ to 14½ cts. Sa 3375 lbs beef cattle at 6½ to 6½ cts. per lb. gross for 3 to 6 cts. for good, and 4 to 4½ cts. for common. 1 sold at 4½ to 5 cts. per lb. gross. Receipts 9200 Hogs 9 to 10 cts. per lb. gross, extra, and common 8½ cts. Receipts 3200 head. New York—Sup flour, \$5.60 to \$5.75; State extra, \$5.80 to \$6.00; brands, \$6.50 to \$1.00. Amber winter wheat, \$ No. 2 Chicago spring, \$1.41. Yellow corn, 59 to 60 white, 60 to 62 cts. Oats, 35 to 55 cts. State bars, Cincinnati, \$1.49 to \$2.00. Receipts 2000 Flour, \$1.17. Corn, 42½ cts. Rye, 65 cts. Barclay, 5 cts. Lard, \$10.85 per 100 lbs. (Cincinnati.)—Flour, \$6.75 to \$7.00. Red wheat, \$1.40 to \$1.48. 24 to 44 cts. Oats, 35 to 40 cts. Rye, 80 cts. La. cts.

FRIENDS' SELECT SCHOOLS.

A suitably qualified Friend is wanted as Prince the Boys' Select School, at the opening of the 10th month. Application may be made to Joseph S. Elkinton, 331 South Fifth Street, or Edward Murs, 127 South Fifth Street. James S. R. Fove, 65 cts. Barclay, 5 cts. George J. Sattergood, 413 Spruce St.

FRIENDS' ASYLUM FOR THE INSANE. Near Frankford, (Twenty-third Ward.) Philadelphia. Physician and Superintendent—JOSHUA H. W. INSURON, M. D.

Applications for the Admission of Patients made to the Superintendent, or to any of the Board Managers.

DIED, 1st mo. 29th, 1877, at her residence in Milton, Elizabeth McBRIDE, in the 81st year of her member of Middleton Monthly and Particular M. of Friends, Columbiana county, Ohio.

PHILADELPHIA.

From "Seward's Travels Around the World"
sit of William H. Seward to the Maharajah of
Puttela, in India.

(Concluded from page 212)

At five o'clock, Mr. Seward, the ladies,
Captain Horsford, and servants, were duly
dressed in gorgeous howdahs on elephants.
Seward being raised to his howdah in a
paleo palanquin. Notwithstanding our pre-
vious experience, we all felt insecure in our
situation. While the elephants rose to their
feet, we held fast to the arms of our howdahs,
trying much as the landsman grasps the bul-
wark of a ship in a high sea. Our animals
trotted three abreast, covering the entire
width of the widened streets. With the
helpful help of numberless supple grooms, the
city came a-fly to the foot of the broad
avenue within the court of the palace, ex-
cept that, on our calling the roll, Freeman did
not answer. He, like the rest, was mounted
on an elephant, but was left behind.

The palace is built on the sides of a val-
ley, is four stories high, and is quite im-
posing. A battalion of infantry presented
arms, and a ringing blast from the bugles of
squadron of cavalry greeted us as we en-
tered the court. While we were dismounting,
brass band played the ever-favorite national
tune in honor of Mr. Seward, and the bag-
pipes followed with "Annie Laurie" in honor
of the ladies. We have heretofore described
the magnificence of the attire of the Ma-
harajah of Puttela, when he appeared at
the opera and at the concert in Calcutta. We
entered at the strings of emeralds and pearls
which he dropped from his neck and turban,
then he met us yesterday at the citadel.
Then he paid his visit of ceremony this morn-
ing at the pavilion, we thought he could have
nothing in reserve so fine as the diamonds
and emeralds he then wore. One chain, sus-
pended from his turban, contained twenty-six
diamonds, each as large as a hazel nut. But
these decorations were simplicity itself when
compared with the pearls, rubies, emeralds,
sapphires, and diamonds, which flashed upon
us as he stood resplendent on the portico
above, waiting to receive us. The music,
until now hushed, burst forth from twelve
bands at once. With majestic courtesy,
he took Mr. Seward by the hand and con-
ducted him up the steps, and across the ter-
race portico, and seated him in a silver arm-
chair, which was placed on a dais within a

recess, in a great hall of audience, which was
filled to its utmost capacity. Then excusing
himself, his highness returned to the portico,
and conducted one of the ladies to an equally
magnificent seat; then returned, and brought
the other lady in the same courtly manner.
He then seated himself between the two
ladies. Mr. Seward had become anxious, and
now asked Captain Horsford for Freeman.
Inquiry was made, and he was found sitting
meekly, if not quite patiently, in the gilded
howdah, forgotten in the bustle, equally un-
able to descend without assistance, or to make
his wants known. At command, a silver lad-
der was raised against the kneeling beast, and
Freeman entered, having had to wait his au-
dience at Puttela, as he had before to wait
for the fifteenth amendment to bring him to
the citizenship of the United States.

The music ceased. The prince, now turn-
ing to Mr. Seward, delivered an elaborate
speech, in which he explained, in a strain per-
haps not altogether free from Eastern hyper-
bole, the pride and satisfaction which he de-
rived from Mr. Seward's visit to his capital,
and to the palace of his ancestors. This dis-
course was followed by an address equally
complimentary to each of the ladies. Mr.
Seward replied that it was particularly gratify-
ing to him to be received with so much con-
sideration in one of the most important of the
native states of India. These compliments
finished, the infant son and heir of the prince
was brought in, accompanied by twenty or
more tutors, and attendants and was formally
presented to each of the visitors. The little
boy, only four years old, is very pretty. He
has large dark eyes and curling black hair.
His small rich scarlet and blue silk dress was
loaded with jewels. An enormous turban,
embroidered with gold, seemed enough to
weigh him down. He stood erect and made
profound *sabams*; then one of his tutors,
spaking in the child's name, said: "I had
the honor of meeting your excellencies in
your morning drive, and I hope you have had
a pleasant day. I shall always remember
that I have seen you here." Having gone
through his part with perfect propriety, the
young prince, like any less distinguished
child, laid his curly head on the arm of his
great silver chair, and was soon sound as-
leep. The maharajah now spoke of his domestic
state, saying, however, nothing of wife or
wives. He dwelt, as a proud father might,
on his two children, the one who was now
with us, and the other a girl, still younger,
in the zenana. He then gave us a brief ac-
count of his father, who was distinguished for
his heroism, and of his two sisters, one of
whom is dead, the other a widow. This easy
and pleasant conversation over, a troop of
natch-girls came upon the floor, more richly
dressed and more graceful even than those we
saw at the regatta on the Ganges. The hall
was now cleared. Fifty Sikh bagpipers, in
British uniform, marched through the hall,

discussing familiar airs under the leadership
of a Scottish piper, in tartan and kilts.

After these amusements, the *business* of the
darbar was resumed. The maharajah's min-
isters of state were announced, appeared and
made *sabams* in a manner which elsewhere
might be thought affected or obsequious, but
here is graceful and dignified. Mr. Seward
detained each, with questions in regard to
the affairs of his department, and the form in
which it is conducted. Next came the general
and commanders of the army, not forgetting
the Highland leader of the pipers. Puttela
has no navy. Last, a great number of per-
sons, presented as "relatives of the prince,"
employed in judicial, political, and municipal
trusts. No presentable man in the city was
omitted. The presentations being over, a
multitude of servants, "that no man in haste
could number," came bearing silver trays on
their heads filled with India fabrics of mus-
lins, cambrics, cashmires, silks, and jewels,
and laid the whole at Mr. Seward's feet, the
trays covering twenty feet square on the floor.
The prince, with infinite gravity, invited Mr.
Seward to accept this "small and unworthy
collection" as a token of his highness's respect
and affection. Mr. Seward, having been pre-
viously instructed, touched with his finger the
simplest article, a turban scarf of purple inter-
woven with gold thread. The trays and their
bearers immediately disappeared, but only to
be replaced by a similar display, no less costly
and elegant. These treasures were laid at
the feet of one of the ladies, who was asked
to accept this "poor trash." In accordance
with an intimation through an officer, she
touched a cashmere shawl. The train and
merchandise disappeared, and the third and
equal presentation was made to the second
lady, who in like manner touched a shawl.
The prince, who had looked on with an air
of supreme indifference to the whole proceed-
ing, then said to Mr. Seward, "I have a great
many other things in the palace, which I
should like to present to you, but I will not
take up your time to look at them." Then,
thanking Mr. Seward and the ladies for hav-
ing accepted these "unworthy trifles" in a
loud voice, and with an imperious manner,
directed that all the articles which had been
thus displayed and offered to us, should be
conveyed to Mr. Seward's palace and deliv-
ered to his servants. For our part, we are quite
sure that "these unworthy trifles" would have
been sufficient to stock an Indian bazaar in
New York. Price, Freeman, and Jeanie, who
had been filled with admiration in witnessing
the august ceremony, became suddenly per-
plexed to know how they should convey so
large a quantity of precious baggage in our
small special railway car.

The Prince of Puttela now spoke with
pride of the *sabam* in which the darbar was
held, and not without reason. It is one hun-
dred and thirty feet long, sixty feet wide, and
thirty feet high. The roof is supported by

double rows of columns, between which are suspended crystal chandeliers, with variegated glass shades for two thousand lights. The walls, on all sides, are hung with mirrors. Mr. Seward rose to take leave. The hotel was offered to our palates, the attar of roses to our hands, and we were dismissed with a suggestion that we should drive through those of the city parks and gardens which we had not yet seen, and then return for a final visit in the evening. The maharajah conducted us down the staircase and placed us in carriages. We drove an hour through the public grounds, being stopped every few rods by gardeners, who covered us with flowers, and filled our carriages with fruit. A band of music, on the way, gave us "God save the Queen," which tune these good people seem to think to be a national hymn of our own. On the way to our pavilion, we met the maharajah, driving his favorite "Hermite" before a dog-cart, at a furious rate, followed by a flying escort.

We returned to the palace at eight o'clock. All the two thousand candles were ablaze, and were reflected to infinity by the broad, bright mirrors. Not only the *salon*, but the court, the grand stairway, the portico, the entire palace, with its thousand windows and balconies, were illuminated. So the ancestral hall of Putteeala was as brilliant as the mountain-palace in which Cupid visited the enchanted Psyche. We had an hour of conversation, which was the more interesting because informal. It turned chiefly on the prince's intended journey the next year to England, and his desire to extend it to the United States. He presented his photograph to Mr. Seward, and requested him to write from different points on his travels in India. He then asked for a minute account of the painful event at Washington, in which Mr. Seward was a sufferer. He showed a deep interest in that subject, although his knowledge of it was imperfect. The maharajah now informed us that he had made all needful arrangements for our comfortable journey to the Himalayas. His thoughts then turned once more upon himself. He ordered in, and exhibited with much pride, his state robes, among them the one in which we had seen him at the concert in Calcutta. All of them were stiffened with jewels. Estimated together, with his paternal shield and sword, their value is half a million dollars.

Taking a final leave, we returned to our pavilion, expecting that our late dinner would be a quiet one. We were mistaken. At the moment when the dessert came upon the table, the Minister of Public Affairs announced an exhibition of fire-works in the garden. We walked through a section of it which we had not previously had time to explore, and amid the murmuring of cascades, took our seats in the balcony of a little palace or pavilion, the counterpart of the one in which we reside. The pyrotechnic exhibition had all the variety of our similar displays at home, but in excess. A party of a hundred artists on each side of the oblong lake were to alternate with a corresponding corps on the opposite side. These performers were, however, so emulous that, instead of making such a measured display as they intended, the whole exhibition went off simultaneously. There were lanterns, transparencies, rockets, serpents, trees, wheels, stars, ribbons, candles, balloons, naval figures, and bombardments; all these illuminations

being reflected from the surface of the clear, smooth lake and surrounding cascades and fountains. The unexpected activity of the performers, while it produced much perplexity and confusion, had, nevertheless, one compensation for us: within twenty minutes from the time the display began, sun, moon, stars, dragons, serpents, and balloons, were expiring all around us, leaving only blackened frameworks on the ground.

For "The Friend."

Letter of William Penn.

(Continued from page 205.)

Next: be obedient to your dear mother, a woman whose virtue and good name is an honor to you; for she hath been exceeded by none in her time for her plainness, integrity, industry, humanity, virtue, and good understanding; qualities not usual among women of her worldly condition and quality. Therefore honor and obey her, my dear children, as your mother, and your father's love and delight; may love her too, for she loved your father with a deep and upright love, choosing him before all her many suitors: and though she be of a delicate constitution and noble spirit, yet she descended to the utmost tenderness and care for you, performing the painfulest acts of service to you in your infancy, as a mother and a nurse too. I charge you, before the Lord, honor and obey, love and cherish your dear mother.

Next: betake yourselves to some honest, industrious course of life, and that not of sordid covetousness, but for example and to avoid idleness. And if you change your condition and marry, choose, with the knowledge and consent of your mother if living, or of guardians, or those that have the charge of you. Mind neither beauty nor riches, but the fear of the Lord, and a sweet and amiable disposition, such as you can love above all this world, and that may make your habitations pleasant and desirable to you.

And being married be tender, affectionate, patient, and meek. Live in the fear of the Lord, and he will bless you and your offspring. Be sure to live within compass; borrow not, neither be beholden to any. Ruin not yourselves by kindness to others; for that exceeds the due bounds of friendship, neither will a true friend expect it. Small matters I heed not.

Let your industry and parsimony go no further than for a sufficiency for life, and to make a provision for your children, and that in moderation, if the Lord gives you any. I charge you help the poor and needy; let the Lord have a voluntary share of your income for the good of the poor, both in our Society and others; for we are all his creatures; remembering that "he that giveth to the poor lendeth to the Lord."

Know well your in-comings, and your out-goings may be better regulated. Love not money nor the world; use them only, and they will serve you; but if you love them you serve them, which will debase your spirits as well as offend the Lord.

Pity the distressed, and hold out a hand of help to them; it may be your case; and as you mete to others God will mete to you again.

Be humble and gentle in your conversation; of few words, I charge you; but always pertinent when you speak, hearing out before you attempt to answer, and then speaking as if you would persuade, not impose.

Affront none, neither revenge the affront that are done to you; but forgive, and shall be forgiven of your Heavenly Father.

In making friends consider well first; when you are fixed be true, not wavering reports nor deserting in affliction, for that comes not the good and virtuous.

Watch against anger, neither speak no in it; for, like drunkenness, it makes a beast, and throws people into desperate conveniences.

Avoid flatterers, for they are thieves in guise; their praise is costly, designing to by those they bespeak; they are the worst creatures; they lie to flatter, and flatter cheat; and, which is worse, if you bel them you cheat yourselves most dangerous. But the virtuous, though poor, love, cheer and prefer. Remember David, who asking Lord, "Who shall abide in thy tabernacle who shall dwell upon thy holy hill?" answer "He that walketh uprightly, worketh righteousness, and speaketh the truth in his heart in whose eyes the vile person is contempt but honoreth them who fear the Lord."

Next, my children, be temperate in things; in your diet, for that is physic prevention; it keeps, nay, it makes people healthy, and their generation sound. The exclusive of the spiritual advantage it bring Be also plain in your apparel; keep out that lust which reigns too much over some; your virtues be your ornaments, remember; life is more than food, and the body thy raiment. Let your furniture be simple & cheap. Avoid pride, avarice, and luxury. Read my "No Cross, no Crown." There instruction. Make your conversation with the most eminent for wisdom and piety; a shun all wicked men as you hope for the blessing of God and the comfort of your father living and dying prayers. Be sure you speak no evil of any, no, not of the meanest; unless of your superiors, as magistrates, magicians, tutors, teachers, and elders in Christ.

Be no busybodies; meddle not with other folks' matters; but when in conscience at duty press; for it procures trouble, and is manners, and very unseemly to wise men.

In your families remember Abraham, Moses and Joshua, their integrity to the Lord; and do as you have them for your examples.

Let the fear and service of the living God be encouraged in your houses, and that plainness, sobriety, and moderation in all things as becometh God's chosen people; and as advise you, my beloved children, do you counsel yours, if God should give you any. Yes I counsel and command them as my posterity that they love and serve the Lord God with an upright heart, that he may bless you and yours from generation to generation.

And as for you, who are likely to be concerned in the government of Pennsylvania and my parts of East Jersey, especially the first, I do charge you before the Lord God, and his holy angels, that you be lowly, diligent, and tender, fearing God, loving the people, and hating covetousness. Let justice have its impartial course, and the law free passage. Though to your loss, protect no man against it; for you are not above the law but the law above you. Live therefore the lives yourselves you would have the people live, and then you have right and boldness to punish the transgressor. Keep upon the square, for God sees you; therefore do your duty, and be sure you see with your own eyes,

hear with your own ears. Entertain no
ners, cherish no informers for gain or re-
use; no tricks; fly to no devices to sup-
or cover injustice; but let your hearts be
ght before the Lord, trusting in him above
contrivances of men, and none shall be
to hurt or supplant.

al the Lord is a strong God, and he can
hatsoever he pleases; and though men
ider it not, it is the Lord that rules and
rules in the kingdoms of men, and he
is up and pulls down. I, your father, am
man that can say, He that trusts in the
I shall not be confounded. But God, in
time, will make his enemies be at peace
him.

you thus behave yourselves, and so be
a terror to evil doers and a praise to
that do well, God, my God, will be with
in wisdom and a sound mind, and make
blessed instruments in his hand for the
ements of some of those desolate parts of
world, which my soul desires above all
lly honors and riches, both for you that
and you that stay; you that govern and
that are governed; that in the end you
be gathered with me to the rest of God.
inally, my children, love one another with
me endeared love, and your dear relations
both sides, and take care to preserve tend-
er affection in your children to each other, often
crying within themselves, so as it be with-
in the bounds forbidden in God's law, that
they may not, like the forgetting unmana-
l, grow out of kindred and as cold as
angers; but, as becomes a truly natura-
Christian stock, you and yours after you
live in the pure and fervent love of God
wards one another, as becometh brethren
the spiritual and natural relation.

o, my God, that hath blessed me with his
ndant mercies, both of this and the other
a better life, be with you all, guide you by
counsel, bless you, and bring you to his
rial glory! that you may shine, my dear
dren, in the firmament of God's power,
the blessed spirits of the just, that cele-
brate family, praising and admiring him,
the Father and of it, for ever. For there is
God like unto him; the God of Isaac and
Jacob, the God of the Prophets, the Apos-
tles, and Martyrs of Jesus, in whom I live for
ever.

So farwello to my thrice dearly beloved fe-
lows and children!

Yours, as God pleaseth, in that which no
waters can quench, no time forget, nor
distance wear away, but remains for
ever,
WILLIAM PENN,
Worminghurst, fourth of Sixth month, 1682.

God's Arrows.—There was a deacon of Dr.
ardlaw's Church who kept a respectable
irrit-shop in Glasgow, Scotland. At the
ayer-meeting one evening, in order to dis-
tinguish him from another of the same name,
Dr. Wardlaw said: "Bro. Ferguson, the spiri-
tualist, will lead our prayers." The good
doctor had no intention of shooting an arrow
to the heart and conscience of his friend by
making such a distinction; but he did it,
raying and spirit-leaving, thus conjoined,
emed so utterly anomalous as to make the
entleman very uneasy in soul. Shortly after,
s young-st son, who was a thoughtful boy,
as playing about the shop door, where an
empty cask had been rolled out for removal.

He went up to the barrel, gave it a kick, and
said: "I wonder how many souls you have
sent to hell!" His father heard the startling
words. They formed another fiery arrow,
and the last that was needed to convince him
of the evil nature of his business, and to bring
him to a right decision regarding it. He
speedily abandoned the spirit trade; became
an abstainer and a minister.—*Late Paper.*

Random Notes of Travel in Europe.

(Continued from page 204.)

The model little village of Studley Royal
lies at the Park gates, and through these
we rode into the wide lime-planted avenue.
Though we were not permitted to inspect the
family mansion, enough was visible to justify
the celebrity of this noble seat, even did it not
boast the ruins of the once stately abbey.
Another gate barred the passage of our car-
riage and thence on foot we roamed over wide
smooth paths bordered on the right by a
wooded hill, whose broad acclivities were
covered with a wealth of rhododendrons,
while on the left a thick yew-hedge rose thirty
feet in height, and cut almost as smooth as a
wall. This verdant wall was pierced at in-
tervals by gothic windows, through which we
saw glimpses of artificial cascades, rural
temples, statues, fountains, the large rectangu-
lar lakes, beside which drooped the purple
beeches, and

"Where the fair trees looked over, side by side,
And saw themselves below."

The sun was warm and the way long, but
sadly in the vale beyond we at length
caught glimpses of grey pillared arches on a
smooth green level. A "cropping out"
of rocks along one side of this quiet vale pointed
to where the builders of these grand struc-
tures had obtained the material. Nearer and
nearer we approached until the whole magnif-
cent ruin, with its great window, its long
avenues of clustered columns, over whose
carving some moultering hand had lingered
tenderly, burst upon our view.

These monastic buildings once covered ten
acres, but time and the elements have done
their work of ruin. They were founded in
1204, and at length became the richest in the
kingdom, their possessions extending over
thirty square miles. West of the abbey stand
Fountains Hall, a fine old mansion built in
1611 from material taken from the ruins of the
monastery. On a gentle eminence, near the
hall, stands one of the once famous yew trees,
and lower down another, twisted, gnarled and
torn by many a wristle with the storm, un-
der whose hospitable shade, it is said, the
monks found shelter, while engaged in build-
ing their abbey, six hundred years ago. This
venerable tree greatly disappointed us, for
hung in chains, and propped by poles, its
leaf shorn of all beauty, it too was fast falling
to decay. The entire scene around the abbey
is very impressive. The profound quiet which
reigns around, the nameless graves imbedded
in the grass, bearing the almost obliterated
symbol of the cross, and many memorials of
forgotten greatness, were indeed "sermons in
stones." The Past only seems to speak, but
it spoke loudly and eloquently,

"Mortal! since human grandeur ends in dust,

And proudst piles must crumble to decay,

Build up the tower of the final trust,

In those best realms where naught shall pass
away."

The sun was almost setting upon our arrival
at the pretty little station for Shotley Bridge,
where we were met by ———. A walk down
a long hill succeeded; but amid such a com-
bination of pleasant influences it mattered
little had it been twice as long! It was the
last day of the week, the people were done
with labor, and the quiet foreshadowed the
recess of the morrow. On our right, we caught
occasional glimpses of the Northumberland hills,
dotted with clumps of trees, forming a fine
panorama; while nearer us was the entrance
to a straggling village, with old style houses,
scattered in the midst of luxuriant gardens.
Then followed strips of woodland at the base
of the hill, almost hiding the Derwent, wind-
ing through the lowlands. We continued to
be favored with the finest weather, and with
a promise in the clouds and wind of its con-
tinuance. Better still, we expected to remain
here for several days, and it was a relief to
feel that it would not be necessary to sit down
at once and study the time table. Travellers
only know what a luxury it is to be exempt
from this constantly recurring trouble. So
the sun slowly descended, to give place to
the delicious summer twilight, which lasts so
long in this latitude, when the softened light
seems to come from neither sun nor moon,
but with something of the warmth, and the
clearness of both; when the people come forth
from hall and cottage to chat and be merry,
when the loom and the anvil are hushed, and
all sounds are pleasant to the ear.

"How mild the light in all the skies!

How mildly the south wind blows!

The smile of God around us lies

His rest is in this deep repose."

We have our Indian summer, and our poets
have sung the praises of this loveliest of sea-
sons, coming when the crimson maple or gold-
en hickory, or scarlet sumach, flash through
the misty veil of blue, which hangs suspended
in the atmosphere, adding far more of beauty
than all it conceals. By it the distant hills
are so softened and glorified that we might
almost look for the palace Beautiful upon
their summits. As a compensation for the
crowning beauty of our year, the English
poets might well sing of their long summer
twilights, which after a bright day, seem like
"lengthened sweetness long drawn out." But
these sober hours steal on so noiselessly, so
unheeded, that like many a common bless-
ing they are almost unheeded. To us who
have so much to see, where all is new, a long
day is most welcome.

But to return—while rambling towards
Shotley Bridge, I have rambled away there-
from. We were soon in the heart of the vil-
lage, and established in our lodgings, after
passing the evening with our friend. The
next morning we attended the Benefield
Meeting, which was small. Having dined
with another Friend, the cloth being removed,
a small Roman altar, found in the neighbor-
hood, was placed upon the table for our in-
spection; an altar upon which perhaps many
a libation had been poured, in honor of a
Roman household god. How widely did the
group gathered around that altar, differ from
those who perhaps had oftentimes regarded
it with reverent spirit, eighteen centuries ago!
Here was a preacher of that gospel the Ro-
man scorned, and whose apostles he perse-
cuted unto death, who had sought to learn
the Indian isles of the West, the results of the
last boon of Christian beneficence granted to

millions of depressed bondsmen. Here were those who had crossed a continent lying beyond the wide Atlantic, afar from whose shores no Roman ship had ever dared to venture, and a fourth a veritable idolater of the past, though a Christian gentleman, an enthusiastic antiquary, who had unearthed many an evidence of Roman supremacy in Britain, and who loved with an unflinching devotion, every waif upon which antiquity had set its stamp. In the intervals between our explorations of the village, the latter friend plunged us deeply into antiquarian lore. The large pleasant room in which we sat was a storehouse of ancient and modern curiosities, the Roman predominating.

(To be continued.)

Selected for "The Friend."

12th mo. 15th, 1826.—"I am daily waiting my change, having only the mercies of God to trust to."

1827.—"I am daily waiting in the temple, if I may be favored to hear this joyful summons, 'Enter thou into the joy of thy Lord,' where the wicked cease from troubling, and my weary spirit I trust, will experience rest."

These appear to be the last words, recorded in John Conran's journal, and in a hand almost illegible, he being nearly blind; but he continued to attend meetings, even sometimes at the distance of fourteen miles, as long as his bodily strength permitted it, so great was his desire to wait with his friends for the arising of the heavenly Power of Christ therein, and to be found faithfully occupying, with the gift mercifully bestowed upon him, often saying, as an incentive to a more perfect dedication of mind and body, "I serve the best of Masters, who, I can testify, from long and precious experience, withhold no good thing from those who faithfully serve and obey Him."

The following extract from the testimony concerning him, drawn up by the Friends of Lurgan Monthly Meeting, will show how he was engaged, with the same zeal, in the last meeting he attended, being the day previous to his death. With affecting energy, he closely pressed friends, to faithfulness and diligence in attending the meetings for worship and discipline, saying the parable of the Great Supper, had deeply impressed his mind, by which he was instructed to believe that no excuse, however plausible, would be taken, for neglecting those important duties; for none, he thought, could be more reasonable than were mentioned, wherein, one having bought a piece of ground, it was but prudent for him to see it before paying for it; another, five yoke of oxen, which it was only reasonable he should be permitted to prove, before he paid the purchase money—whilst a third, had married a wife and could not come, having thereby necessarily undertaken to provide for a family, especially, as he is declared to be worse than an infidel, who provides not for his own.

Then mourning over those who were not sensible of their situation, and of the great salvation offered to all, he said, "I now again tell you, what I have so often declared, that 'Other foundation can no man lay, than is laid, which is Jesus Christ.'" Then warned all to be careful of neglecting calls from Heaven, and by the servants sent as messenger after messenger, testifying, 'Behold all things are

ready;' for should they continue to do so, 'the children's seats at the Lord's table would be filled by others, who, beholding the light, would flock as doves confined in a room to the windows; adding, he was made thankful in being assured that Light had already broken forth and the day had dawned; and when about to resume his seat, he advanced and said, 'For thus having been permitted to live to see this day, I praise, honor, and magnify my God.'—John Conran.

For "The Friend."

Animals, their Intelligence and Affection.

A California newspaper mentions the following incident. Large flocks of wild geese had for some time passed almost daily over the town, and were frequently shot at, but their usual altitude was too high to be reached by the leaden missiles. The writer observes:—"Sometimes, however, the shots take effect. The other day we were watching a flock flying southward, when the report of a gun was heard and we observed one of the geese begin to fall slowly. The others, perceiving that their comrade was wounded, uttered shrill cries of distress, and about a dozen of them flew under the wounded bird, huddling together so that their backs formed a sort of a bed upon which the wounded one rested. They buoyed it up for some time the others meanwhile looking on and manifesting their concern by uttering loud, discordant shrieks. Finding that their compatriot was unable to longer accompany them in their flight, they abandoned him to his fate, and he fell to the earth and into the arms of an expectant Chinaman."

The *London Spectator* gives the following narrative, on the authority of the late Bishop Stanley of Norwich. A goose formed an earnest and disinterested affection for a certain farmer. It would follow him everywhere, climb into his lap at night, go shooting with him, climbing all the hedges, follow him when he was at the plow, turning deliberately at the end of every furrow, and walking back with him along the next, but not infrequently turning to fasten its eyes upon him with the most intense gaze. The countryman being ignorant and superstitious feared that this conduct of his feathered friend was ominous of some impending calamity, which he could avert by killing it, and therefore one day cruelly shot the poor bird.

The *Spectator* also notices the death, from consumption, of a chimpanzee which had lived for some years in the London Zoological Garden, and was known to visitors by the name of Joe. This animal was not only a great amusement to the visitors of the garden, but the really passionate affection which he showed to Sutton, his attendant, endeared him to the public. The *Daily Telegraph* says that "when the nightly good-bye came, Joe would break out into a perfect phrensy of grief, tearing his hair, rolling upon the floor, casting dust and ashes upon his head, and shrieking like a spoiled child."

A Brazilian monkey, which for several years previous to the summer of 1876, lived with a Friend at Hadonfield, N. J., showed in some things almost human ingenuity. He fed in general with black walnuts, which have thick and hard shells. The monkey is no rodent like the squirrel and the beaver, but his sagacity found out a way of getting at the

kernels. Taking a stone for a hammer, he audaciously cracked the nuts on a piece of plank, taking good care not to hurt his fin, and then extracted the kernels. Sometimes when nuts were thrown to him, a few of them would remain beyond the circle to which chain confined him, but his cunning was equal to the emergency, for taking a rod or stick proper length, the nuts were drawn within reach of his long arms.

The goose is not considered a very good bird, but the truth is that our beneficent Creator has endowed all the animals he has created with certain degrees of intelligence varied in kind, but adapted to their servants. One of the writer's family saw a goose which had found a piece of very dry brood hard to be broken by its beak, take prize to a gutter near at hand and immerse it in the water for the purpose of softening.

The following curious and interesting occurrence was related by an aged and enterprising Friend, who died in this country about twenty years since. In her earlier life she lived on a farm in Delaware Co., through part of which flowed a small brook to which the geese loved to resort. In a time of drought the water was so low that the geese could find no place deep enough to swim in. The Friend's attention was arrested one day by the loud and continued cries of the geese, so that she walked from the house down to the brook to see what caused the excitement. To her great surprise she found them busily employed in damming the stream, the patriarch of the family apparently directing the work. There was a place where the brook was very narrow, and perhaps one more sticks had in some way been caught there between the opposite banks. Again this obstruction the gander placed weeds, so long grass, which his companions brought from the banks, until the water began to collect in the little pond thus formed; and the work was persevered in until finally it was deep enough for the laborers again to enjoy the luxury of a good bath.

The fidelity and affection of the dog, and numerous instances of intelligence closely allied to reason are often subjects of remark, but it is perhaps not so well known that the animal sometimes displays traits which in human beings would be called benevolence. One illustration may be given. Some thirty years ago a very fierce dog was kept on a farm near Newark, N. J., whose reputation was such that boys rarely ventured to trespass on the premises over which he kept guard. At one time, however, a little boy attempted to cross one of the fields, thinking probably that he would elude the vigilance of the dog, but in this he was mistaken, as the dog soon discovered and pursued him. The boy in his terrified flight stumbled over a stone, and fell with such violence as to break one of his legs. The dog soon arrived, but instead of seizing and tearing the fallen boy, as might have been expected, he seemed at once to comprehend the case, went to the farm-house and brought assistance for the sufferer.

When the heart is softened and tendered by the operation of Divine Grace, and in measure brought into the heavenly harmony, there will be a feeling of compassionate regard for all the creatures our great Creator has formed. Their wanton destruction for mere amusement cannot be indulged in, and we

be made to remember that there is One omniscient eye watches over even the rows, and without whose notice not one to the ground.

The Holy Scriptures teach us that man is the only object of Divine consideration regard. When infinite compassion and suffering goodness were extended to each, this was the language addressed to prophet Jonah, "Thou hast had pity on gourd, for the which thou hast not labored, neither madest it grow, which came in a night and perished in a night; and could not I spare Nineveh, that great city, wherein are more than sixscore thousand persons that cannot discern between their right hand and their left hand, and also much less?"

We may assure that our treatment of creatures lower in the scale of being than ourselves, cannot be a matter of indifference to him who says: "Every beast of the forest is mine," and whose providence watches over it supplies the wants of all. X.

Wise Charity.

For "The Friend."

When you walk through some parts of the principal streets of Philadelphia, frequent appeals are made to our pity and generosity by half-dressed and shivering objects—children, middle-aged, or older persons—asking in piteous tones a few pennies to buy a loaf of bread, or spring for sale some little stock of pins, soap, shoe-strings. So much is this class of beggars upon the increase, that during some of the bitter weather of the present winter we have had several such appeals within a single square's walk; and the question very naturally arises to every sympathizing heart, can we not best relieve such cases? Certainly not by indiscriminate almsgiving! Yet it is hard to turn a deaf ear, and, saying "be clothed and fed"—pass on to the enjoyment of our many daily comforts. Our hearts cannot but ache as we follow in imagination the sad objects of our pity to their miserable abodes. It has been a great satisfaction to me as a writer to find, upon questioning these persons, that they have almost universally been under the inspection and care of an unpretending but very useful Association called "The Home Missionary Society," located at No. 533 Arch street, which has for many years, in a prudent quiet way, dispensed its limited means, visiting the poor and afflicted of the city in their homes. The 41st anniversary of this Institution was celebrated on the 21st of last month. The following account of its operations is taken from the *Philadelphia Ledger*:

"The annual report was read, showing that the rooms of the Society, on Arch street below Sixth, have been open every business day of the year, to dispense relief and hear the appeals of the needy. An important branch of its work is with the poor, helpless and destitute children, which it gathers from homes of poverty and wretchedness. The children are legally placed under the care of the Society by their parents or guardians, who of themselves are unable to educate or provide for them, and are placed by indenture with respectable Christian persons to be educated and taught some trade or useful industry. For purposes of immediate relief, in extremely old weather, the more essential articles of food have been given out directly from the

office. In other cases, orders for groceries and for coal are provided.

"The following is a statement of the practical work of the agents: Visits made to the poor, 5224; families and persons relieved, 10,650; orders for coal, 1598, embracing in tons, 552; orders for groceries, 2282; pairs of shoes, 245; articles of clothing, new and old, 862; bed quilts, 7; and large quantities of food and dry goods. Persons provided with work, men and women, 162; children provided with good homes in families, 210. A large number were also placed in charitable institutions where their wants will be properly looked after. Among the applicants, 224 were found not deserving. A number of religious meetings were held by the agents, who distributed about 2200 tracts and 1040 religious books. Money distributed through the Society by a friend of the poor, \$1430.57."

Selected.

LINES TO HER GRANDDAUGHTER.

BY SOPHIA JOANNA BAILLIE.

Beautiful baby, where art thou now?
What is thy little pastime now?
Who at this moment is caressing
The fondly-loved, the first-born blessing?

Is it papa, with vigorous dancing,
Thine eyes with timid pleasure glancing,
While added bloom adorns thy cheek,
And seems of "fearful joy to speak?"
Ah! soon with pain is pleasure bought,
And early is the lesson taught!

Or seated on thy mother's knee,
Dost thou some new discovery see—
Some sight thou'st never seen before,
Some object glittering on the floor,
Some little scrap of gaudy hue,
Some toy just placed within thy view?
Or do sweet sounds attract thine ear,
Some words of fondness whispered near,
Some pretty song of angel's way,
Some tale of power and grand glory,
While thou display'st thy little store
Of knowledge and of learned lore?

Or does some latent power within
Its influence now first begin,
Excite thee with a glad surprise,
And animate thy soft blue eyes,
Urge thee to efforts strange and new,
And bring some fresh exploit to view?
Gifts from an high bestow'd on thee,
Thou heir of immortality!

Oh, ye, to whom the task is given,
To guide the little feet to heaven,
Check the first step that goes astray,
And early teach their divine way,
Engage sometimes to be the real
That leads to their virtue's abode,
And sometimes clouds may intervene,
And darken the surrounding scene,
And for a moment hope may fail,
And terrors may the soul assail:
Fear not! the heaven kept in view,
And love divine will help us through;
Help us when most we seem to fear,
When most we think that danger's near;
Help us when most we seem alone,
Help us with power beyond our own!

"Somebody must be in."—Here is a little story which tells better than a dictionary can the meaning of the word "disinterestedness."

The late Archdeacon Hare was once, when tutor of Trinity College, Cambridge, giving a lecture, when a cry of "Fire" was raised. Away rushed his pupils, and forming themselves into a line between the building, which was close at hand, and the river, passed buckets from one to another. The tutor quickly following, found them thus engaged;

at the end of the line one youth was standing up to his waist in the river; he was delicate and he looked consumptive.

"What!" cried Mr. Hare, "you in the water, Sterling? you so liable to take cold!"

"Somebody must be in it," the youth answered; "why not I, as well as another?"

The spirit of this answer is that of all great and generous doing. Cowardice and coldness, too, say, "Oh, somebody will do it, and the speaker sits still; he is not the one to do what needs doing. But nobility of character, looking at necessary things, says, "Somebody must do it; why not I?" And the deed is done.—*Chatterbox.*

For "The Friend."

Public Libraries of the United States.

In consequence of the great increase of public libraries in this country within the last twenty-five years, the Department of Education, recognizing the potential influence of these collections as educators of the people, began in the year 1870 to gather and to publish statistics relative thereto. Within the six years following, so considerable a mass of information had been gathered upon the subject, while so frequent have been the calls for the data relative to the formation and management of libraries, the cataloguing, binding and preservation of books and pamphlets, that it was decided to issue a report containing full details so far as obtained. This report which has just appeared, is contained in a bulky octavo volume of nearly 1200 pages. The book is divided into about forty sections, with nearly as many different varieties—most of them librarians of long experience.

And first, as regards the number of public libraries, which in the year 1800 was but 49, and the number of volumes 89,000, there had been an increase in the 76 years of over 3600 libraries, containing 121 million volumes, besides a million and a half of pamphlets. These figures are exclusive of the libraries of common and "Sunday" schools.

Respecting the common school libraries, which began to be organized about the years 1835 and 1840, reports from the majority of the States show that the interest in them has gradually declined, so that for years past many of them have been very little used. This result has been partially owing to the inefficiency, indifference, or neglect, of many of the county school boards, as well as to the fact that the original contributions of books have been reinforced by very few additions of newer publications. A large percentage of the books have been either stolen or mislaid. The following short but significant return, from one of the Indiana counties, tells the story:

"The public libraries of the various townships of our county are in a most deplorable condition. Many books are lost and but few are read. I am afraid many of our citizens do not know of the existence of such libraries. Our teachers too, many of them at least, are unacquainted with the character of these books, and hence cannot call attention to them and make such recommendations to their pupils as will enable them to read profitably. A great reformation is here needed." The only really favorable accounts are those from the States of California and New Jersey; the report from the latter concluding with the remark that "our system of public school libraries has worked so satis-

factorily that not even a wish for a change has been expressed."

In the chapter upon *College Libraries*—many of which are described in detail—the opinion is expressed that they should not undertake, as is the case in some localities, to fill the place of a public town library; but that the shelves should be supplied with such books only as will best subserve the needs of the student, and that they should be within easy reach. It recommends that, in addition to the main library of a college, the various class and lecture rooms be supplied with their special line of books for reference and study, in the same manner as chemical and physical apparatus are supplied for the scientific classrooms. It is true this usage already obtains in quite a number of collegiate and academic institutions, yet, as regards others, the printed treasures are preserved so effectually with wire guards and keys, that they are not accessible directly to the students—the catalogue being referred to instead, and the books wanted handed over by the librarian.

A description is given of about forty of the principal *Theological Libraries*, which possess collections varying from 5,000 to 35,000 volumes. To our apprehension it would appear as though those figures should represent a pretty fair range over the field of speculation and fact in a single department; nevertheless, the writer of the account concurs with the sentiment which (he says) was expressed by a "distinguished professor" less than ten years ago, that "The investigations of our theological students are checked by the want of books. Among the difficult themes pertaining to the history of the church, or to the history of doctrines, or to the various methods of explaining difficult Scriptures, there is probably not one which can be investigated as it needs to be in this land." He admits, however, that there has been progress of late.

It would seem as though *Law Libraries*, being so specific in character, might, without much trouble, be made measurably complete; but in addition to the fact that the increase of the books is not slow, their price is also usually very high, so that none except State libraries and law associations in the larger cities approach anything like completeness. The bound reports of judicial decisions in the principal law cases, especially those of the United States, have multiplied greatly. In the time of Lord Bacon, the English decisions were contained in 50 or 60 volumes, while during the 250 years which have since elapsed, the published reports have increased to 1350 volumes. The American already number almost twice as many.

Of *Medical Libraries*, the largest, by far, in this country, is that of the Surgeon-General's office at Washington, which numbers 40,000 volumes and the same number of pamphlets. Next in size is that of the Philadelphia College of Physicians, with 19,000 volumes. The need of a good Index of the medical and surgical experiences and speculations of the last 400 years which are contained in so many bound volumes and pamphlets, and are dispersed among so many libraries, is felt to be great, as for want of such knowledge, old exploded theories, speculations and researches are gone over and over again. At the government library above-mentioned, the work of indexing and cataloguing new works is carried out in a thorough manner, while considerable progress has been made in the same

direction with the journals and transactions of previous years.

The author of the section upon *Scientific Libraries* accords to Philadelphia the first place for possessing eminently valuable collections. He remarks that his experience in a number of cases has been that "in no instance could any bibliographical study on an extensive scientific subject be prosecuted to a satisfactory conclusion in any one city, although the means for so doing are best provided in Philadelphia; and in the present state of our libraries a visit to that place is necessary before concluding any such investigation." Special mention is made of the libraries of the Academy of Natural Sciences and of the American Philosophical Society.

The aggregate of books in all of the *Government Libraries* at Washington is very large. The regular Congressional Library, which receives two copies of every work for which a copyright is issued, numbers upwards of 300,000 volumes. The Senate and the House of Representatives have likewise each a large library, that of the latter numbering 100,000 volumes. That of the Surgeon-General's office has already been mentioned; the other departments have similar ones, though not so large. Exclusive of pamphlets, the libraries belonging to the government number altogether, 656,000 volumes, being about 40,000 less than the aggregate of the great national collection in the British Museum.

There are separate chapters devoted to the history and statistics of the libraries of Historical Societies, of Young Men's Christian Associations, Free Town Libraries, &c. There is also much practical information relative to the management of public libraries and how to make them successful; concerning methods of cataloguing, indexing, and the preservation of books; but of which particular mention must be left for a future article. The volume concludes with a lengthy account of the "Public Libraries of Ten Principal Cities," together with statistical tables of all public libraries numbering 300 volumes and upwards.

The following is a list of the number of volumes in twenty-four of the largest public libraries (free or subscription) in the United States. These figures were given over a year ago.

Boston Public Library,	207,000
New York Mercantile Library,	160,000
Harvard College Library,	154,000
Astor Library, N. Y.,	152,000
Mercantile Library, Philadelphia,	125,000
Boston Athenaeum,	105,000
Philadelphia Library,	104,000
Yale College Library,	78,000
Cincinnati Public Library,	71,000
Peabody Institute, Baltimore,	57,000
Apprentices Library, N. Y.,	53,000
Mercantile Library, Brooklyn,	50,250
Louisville Public Library,	50,000
Chicago Public Library,	48,000
Mercantile Library, St. Louis,	42,000
Mercantile Library, San Francisco,	41,500
University of Virginia,	40,000
Cornell University, Ithaca,	39,000
Springfield Public Library, Mass.,	37,000
Young Men's Mercantile, Cincinnati,	36,000
Worcester Public Library, Mass.,	35,000
Mercantile Library, Baltimore,	31,000
New Bedford Public Library, Mass.,	31,000
Anshert College Library,	30,100

(To be continued.)

For "The Friend"

The Emilen Institution, a Philadelphia organization, chartered by the Legislature of Pennsylvania, a free manual labor school for boys of African and Indian descent, located in Warmistown, Bucks County, is in need of funds. Although economically managed, its present income is insufficient to support it, and it is the intention to add more boys, and thus increase its usefulness when the funds will permit. It is desired to train the children in the principles of religion, morality and virtue. They receive plain school education, are taught the various branches of housework, besides assisting on the farm; and are clothed, fed and educated free of charge. Those who feel interested in aiding the descendants of these two races become good and useful men, are earnestly appealed to, to contribute to this excellent but unobtrusive charity. Please send contributions, either as donations or annual subscriptions, to

THOMAS STEWARDSON, Jr., Treasurer,

Philadelphia, 2d mo., 1877.

For "The Friend."

On the Necessity of War.

In connection with the editorial remarks "The Friend" of the 3d inst., and the extracts from "various writers in reference to war in that and the preceding number of the same paper, perhaps Clarkson's refutation of the sentiment that "in the present constitution of the world wars are necessary," will give space and interest.

Select audiences in this 19th century boasted Christianity, to this day and in our city, give hearing to the language, from the lip of influence and mind of talent. "Providence imposed on man the necessity of war; and, 'not even the lives of men' were of value compared with the reforms aimed for through conquests of war.

Clarkson says, "Neither do persons arguing for the necessity of war, do less than set themselves above the prophecies or oracles of God, which declare that such warfare shall some time or other cease."

"There can be no plea for such language, but the impossibility of taming the human passions. But the subjugation of these is the immediate object of our religion. To confess therefore, that wars must be, is either to utter a libel against Christianity, or to confess that we have not yet arrived at the stature of real Christians."

"That wars are necessary, or rather that they will be begun and continued, I do not mean to deny, while statesmen pursue the wisdom or policy of the world."

* * * * *
"For while discussions relative to matters of national dispute are carried on in a high tone, because a more humble tone would betray weakness or fear; while again during this discussion, preparations for war are going on, because the appearance of being prepared would convey the idea of determined resolution, and of more than ordinary strength; while again, during the same discussion, the national spirit is awakened and inflamed; and while again, when hostilities have commenced, measures are resorted to, to perpetuate a national enmity, so that the parties consider themselves as natural ene-

even in the succeeding peace, what hope there is of the extermination of war on earth? But let us now look at the opposite policy, that is that of the Gospel. Now this policy could consist in the practice of meekness, moderation, love, patience, and forbearance, in a strict regard to justice, so that no advantages might be taken on either side. But these principles, all of which are preventive of war, were to be displayed in our negotiations abroad in the case of any matter in dispute, would they not annihilate the necessity of wars? For what is the natural tendency of such principles? What is their tendency, for instance, in private life? And who are the negotiators on these occasions but the nations? Which kind of conduct is most likely to disarm an opponent, that of him who holds his arm to strike, if his opponent should comply with his terms, or of him who does justly, who manifests a temper of love and forbearance, and who professes that he rather suffers than resist, and that he will do every thing sooner than that the affair should not be amicably settled? The apostle, who knew well the human heart, says, "thine enemy hunger, feed him, for in so doing thou shalt heap coals of fire on his head." That is, thou shalt cause him, by thy forbearance, to experience burning feelings within himself, which, while they torment him with the wickedness of his own conduct, shall make him esteem thee, and forgive him over to thy side. Thus thou shalt overcome his evil by thy good. Or, in other words, as fire melts the hardest metals, so thy meekness shall melt his anger.

This policy again would consist of the practical duty of attempting to tranquilize the minds of the people, while the discussion is going on, of exhorting them to await the result with composure, of declaring against the folly and wickedness of wars, as if peace could be the result of abstaining from hostile preparations, and indeed from all appearance of violence. Now what influence could such conduct have again, but particularly when known to the opposite party? If the opposite party were to see those alluded to keeping down the passions of their people, would they inflame the passions of their own? They were to be convinced, that these were making no preparations for war, would they themselves to the expense of arming? Or do we see any other termination of such a contest than the continuance of peace?

And supposing the benign influence of the Gospel of Jesus Christ to have its due place in the hearts of men and rulers, he says, "Many of the causes of war would be cut off, for instance, there would be no disputes but insults offered to flags. There would be none again about the balance of power, short, it would be laid down as a position, that no one was to do evil, that good might be done. But as, notwithstanding, there might still be disputes from other causes, these would be amicably settled. If the matter should be of an intricate nature, so that one veriment could not settle it with another, we would refer it to a third. This would be the 'ne plus ultra' of the business. Both a discussion and the dispute would end."

R. J. A.

We are surprised at the fall of a high pros-
 or; but, in the sight of God, he was gone
 fore; it is only we that have now discovered

it. "He that despiseth the day of small things shall fall by little and little."

Hurry and Haste.— "Never do anything in a hurry," is the advice given to attorneys and solicitors by Mr. Warren. "No one in a hurry can possibly *have his wits about him*," and remember that in the law there is ever an opponent watching to find you off your guard. You may occasionally be in haste, but you need never be in a hurry; take care—resolve—never to be so. Remember always, that others' interests are occupying your attention, and suffer by your inattention—by that negligence which generally occasions hurry. A man of first-rate business talents—one who always looks so calm and tranquil, that it makes one's self feel cool on a hot Summer day to look at him—once told me that he had never been in a hurry but once, and that was for an entire fortnight, at the commencement of his career. It nearly killed him; he spoiled everything he touched; he was always breathless, and harassed, and miserable; but it did him good for life; he resolved never again to be in a hurry—and never was, no, not once, that he could remember, during twenty-five years' practice! Observe, I speak of being hurried and flustered—not of being in haste, for that is often inevitable; but then is always seen the superiority and inferiority of different men. You may indeed almost define hurry as the condition to which an inferior man is reduced by haste. I one day observed, in a committee of the House of Commons, sitting on a railway bill, the chief secretary of the company, during several hours, while great interests were in jeopardy, preserve a truly admirable coolness, tranquillity and temper, conferring on him immense advantages. His suggestions to counsel were masterly, and exquisitely well-timed; and by the close of the day he had triumphed. "How is it that one never sees you in a hurry?" said I, as we were pacing the long corridor, on our way from the committee room. "Because it's so expensive," he replied, with a significant smile. I shall never forget that observation, and don't you!"—
Warren on Attorneys and Solicitors.

Oh! Father of mercies assist me to cherish
 The light of thy Word in my innermost soul;
 Without thy assistance I feel I must perish,
 In the temple of sin which I cannot control;
 But thou, who canst say to the foam-created ocean,
 Thus far and no farther thy proud waves shall come,
 Thou only canst curb each unhalloved emotion,
 And guide me in peace to thy glorious home.

THE FRIEND.

SECOND MONTH 17, 1877.

The Scriptures of truth bear abundant testimony to the goodness and mercy of the Lord; and this testimony is confirmed by all His faithful servants, who walk in obedience to His commands. Though these meet with many conflicts and sore trials when passing through the refining operations of the Lord's grace on their hearts; and like the apostle Paul, are made to partake in the sufferings of Christ to prepare them to be useful to others; yet, not one can be found who does not acknowledge that the Lord is a rich rewarder, and that His service is a most dignified and blessed service; and who would not greatly

prefer the ex-ercises and struggles through which they are led, to a state of coldness, indifference and alienation from religious feeling.

The same merciful and unbounded mercy, in which our blessed Saviour came into the world and was offered as a sacrifice for the sins of mankind, is still manifested in the visitations of His Holy Spirit, which operates on our hearts in every early life, making us feel the difference between right and wrong, and leading us into the path of self-denial and obedience to the Divine will, if we yield ourselves up to its guidance. We are so prone to self-indulgence, and so self-willed, that we often avoid, or rebel against, the restraints which the yoke of Christ would put upon us; and thus we refuse in practice to take up and bear His daily cross. But even in this estranged and rebellious state, His mercy follows us with renewed visitations, warnings, calls, pleadings and judgments. Through the powerful influence of these, the wandering sinner is often arrested in his downward career, and like the repentent prodigal, he is made to feel that his soul is perishing for want of spiritual food, while in his Father's house there is bread enough and to spare; and a holy resolution is begotten in his mind to return, acknowledge his sins and ask forgiveness. He, who has more joy over one sinner that repenteth, than over ninety and nine just persons that need no repentance, is often pleased to favor such returning prodigals with a very sweet and precious taste of the joys which belong to God's salvation, so that He may enliven them with the beauty there is in holiness. Such persons, in their inexperience, and in the fervor of their newly-born zeal and love, sometimes conclude that the work of regeneration is now accomplished, and that henceforth they can rest under the shadow of the Divine wing, without fear or annoyance. But as time passes on, they find that this experience, precious as it is, is only the turning of their feet into the strait and narrow way which leadeth unto eternal life. As they journey on in this path they meet with unexpected trials. The corrupt tendencies of their nature, which had become firmly rooted during their years of self-indulgence, again manifest themselves; and they find that one humiliating dispensation and judgment succeeds another, as the great work of regeneration is being carried forward in them. If they are favored to abide faithfully submissive through these baptisms of the Spirit, they will learn with the Psalmist, that the judgments of the Lord are more to be desired than gold, and that in keeping of them there is great reward; because through them the peaceable fruits of righteousness are brought forth in their hearts.

It sometimes occurs that such persons find that their first feelings of spiritual warmth and zeal are succeeded by an apparent withdrawal of the Divine presence. They seem to be left in measure to themselves, and to be proved whether they will continue faithful in the night as well as in the day, in times of desertion as in times of abounding. They experience somewhat of that hardness which the good soldiers of Jesus Christ must learn to endure. Their weak faith scarcely enables them to believe that the Lord's mercy is still around them, and His protecting hand stretched out to lead them. Just as patiently abiding the day of the Lord's judg-

ments, and continuing to look towards His holy temple for light and help, these may be tempted to turn aside for comfort into some by-path, or even to conclude that their former enjoyments and hopes were a delusion of the imagination. Thus they may again be entangled in the snares of the enemy of their souls.

This is the more likely to be the case, if they have listened to the words of those unwise and superficial teachers, who would lead them to mistake the beginning of the work of redemption for the full accomplishment thereof; and thus settle them in a rest short of the true rest. They who have been unduly elated are liable to a corresponding depression; and he, who is conscious that he has been misled, is in danger of rejecting even salutary counsel.

May all such learn to place their dependence on the Lord; and patiently and humbly wait upon Him for wisdom, help and guidance. May they seek to be preserved in that humble frame of mind, which will keep them from thinking of themselves more highly than they ought to think. And let them not become weary of that "patient continuance in well doing" which the Scriptures declare the Lord will reward with "eternal life."

SUMMARY OF EVENTS.

FOREIGN.—The session of the British Parliament for 1877, was opened by the Queen in person on the 8th inst. After the Queen had taken the oath to the throne, the Lord High Chancellor read his speech to the Lords and Commons. The principal subject of the royal speech is the condition of affairs in Turkey. In regard to this matter the Queen says, her object has been to maintain the peace of Europe and bring about the government of the disturbed provinces without infringing upon the independence and integrity of the Ottoman Empire. "The proposals recommended by myself and allies have not, I regret to say, been accepted by the Porte, but the result of the Conference has been to show the existence of a general agreement among the European Powers which cannot fail to have a material effect upon the condition and government of Turkey. My entire the armistice between Turkey and her principalities has been prolonged and is still unexpired, and may, I trust, yet lead to the conclusion of an honorable peace. In these affairs I have acted in cordial co-operation with my allies, with whom, as with other foreign Powers, my relations continue to be of a friendly character."

Detailed reports of the speeches made by Earl Granville in the House of Lords and the Marquis of Harrington in the House of Commons, after the royal speech have been read, show that the Liberal party intended to uphold the view that the British government should co-operate with the other powers for the recovery of Turkey, and even co-operate with Russia alone if the other powers declined to act.

Prince Gortschakoff, the Russian Prime Minister, has addressed a circular note to the Russian representatives at the principal courts of Europe, in which the dissatisfaction of Russia with the execution of the Constantinople Conference is strongly expressed. He says: "The Porte pays no regard to its former engagements, to its duties as a member of the European concert, or to the unanimous wishes of the Great Powers."

After having made this statement, the Emperor has issued a resolution of the Eastern question. The Emperor has been and remains a permanent neutral to the peace of Europe, as well as to the sentiments of humanity and the conscience of Christian people. Under these circumstances, before deciding on a course he may think fit to follow, he will first consult the Emperor, who he knows what course will be determined by the Cabinets with whom we have acted up to the present, and with whom we desire, as far as possible, to continue proceeding in common accord."

The Vienna *Politische Correspondenz* states that the Porte has proposed the following conditions to Servia, waiting its final reply to be sent to the Emperor First. The right of being diplomatically represented at Belgrade. Second. That Catholics and Jews shall enjoy the same rights as native Servians. Third. That

Servia shall not allow the formation of armed bands or the violation of Turkish territory. Fourth. That the existence of secret societies shall not be permitted. Fifth. That the Servian fortress shall be kept in good repair, and finally, that the Turkish flag shall be hoisted upon these fortresses jointly with the Servian flag. The *Politische Correspondenz* says Servia will doubtless accept these conditions and send a special commissioner to Constantinople.

The Prince of Montenegro has replied to a telegram from the Grand Vizier, that he is willing to negotiate for peace on the basis of the status quo ante bellum, with a rectification of the frontier, but considers it useless to send a delegate to Constantinople, and asks that the negotiations be conducted with the Ottoman Ambassador at Vienna.

A Constantinople dispatch says that the dismissal of Midhat Pasha does not imply any change in Turkey's foreign or internal policy. Her present foreign policy will not only be maintained, but will be pursued with greater firmness.

A Belgrade dispatch of the 10th states that the most important points of the Turkish peace propositions have been accepted to, and when the preliminaries are settled the Servian Minister Bisties will proceed to Constantinople to definitely negotiate terms of peace.

The depression of the silk trade in France causes great distress among the workmen of Lyons, of whom about 60,000 are unemployed. This is the result, in consequence of the dearth of raw silk, and the increasing demand for woolen fabrics in preference to those of silk.

Italy has declared its seventeen universities open to women, and Switzerland, Norway, Sweden and Denmark have taken similar action, while France has opened the Sorbonne to women, and Russia its highest schools of medicine and surgery.

The ravages of small pox continue in London, the mortality from the disease last week amounted to 103.

A dispatch to the London Times, from Calcutta, reports that fifty persons had been killed and a vast number wounded at Allahabad, by an explosion of gunpowder.

The prospects continued gloomy in the provinces of Madras and Bombay. There were many cases of cholera in the distressed districts of Madras. No rain had fallen, and there had been no improvement in the condition of the crops.

An Alexandria dispatch reports another defeat of the Egyptian troops by the Abyssinians, near Massowah.

It is reported from Madrid that the government will probably settle the difficulties with the Basque Provinces on a compromise. Instead of furnishing soldiers by conscription, each province will be required to maintain a battalion of volunteers, which will be placed under the orders of the government in case of war, and administrative autonomy is reserved to the Basque Provinces.

As the gold yield of Australia decreases the wool crop, more valuable. In 1876 the wool product of Australia amounted to 570,000,000, which is four times as much as its gold product.

UNITED STATES.—The Electoral Commission on the evening of the 9th inst., decided by a vote of eight to seven, that the votes of the four States electors from Florida shall be counted by the Joint Commission.

In reaching this decision, James Bayley, Miller and Strong, voted with the five Republican Senators and Representatives. The decision is justified by the majority on the ground that the Commission acting for the two Houses of Congress, cannot go back of the canvases made by the legal authorities of the State, nor can the certificate of the Governor be set aside when it agrees with the certificate of the regular canvassing officers, neither can the Commission consider as evidence any act of the Legislature or Courts determining whom the State had appointed as Electors after the day said Electors gave their votes. This decision was communicated the following day to both Houses of Congress met in joint convention. After it had been read objections were presented signed by six Senators and twelve Representatives, and the Senate thereupon withdrew so that in accordance with the law, the two Houses by a separate consideration of the objection. The Senate, by a vote of 20 to 12, on the 11th inst., rejected the objection, and the House by a like vote of 123 to 108, adjourned to the 12th inst. without acting on the question. On reassembling the House of Representatives, after discussion, rejected the decision 168 to 133, but as the Senate has adopted it, the conclusion of the Joint Commission stands. The Senate and House then again met in joint convention on the 12th inst. Florida, Illinois, Iowa and Kansas were counted for

Hayes, and those of Georgia, Indiana and Kentucky for Tilden. When Louisiana was reached two sets of certificates were opened and objections were presented thereupon the joint convention adjourned, and the papers in the case were referred to the Electoral Commission.

The bill which passed the House of Representatives for the payment of \$200,000 to Capt. Eids on account of his improvements at the mouth of the Mississippi River, met with an unfavorable reception in the Senate. That body by a vote of 30 to 24, has indefinitely postponed the bill.

Ex-President Lerdo de Tejada of Mexico, General Escobedo, and a number of other prominent Mexicans of the Liberal party, landed in New York on the 10th inst.

Foreign immigration to the United States has declined to a small figure. During the First month total number of arrivals at New York was 1823, whom 616 came from England and Ireland, and 5 from Germany; from all other countries 615.

The whole number of Indians remaining in the State of New York is reported to be 5034. They are all descendants of the once renowned Six Nations.

During 1876, 982 railroad disasters occurred in this country, causing the death of 328 persons, and the injury of 1067 others.

The Rhode Island House of Representatives, by a vote of 37 to 28, has passed the bill legalizing the marriages of whites to colored persons.

The case of the United States against General Ednap has been dismissed by the Attorney General and instructions from President Grant, who says that he believes a conviction improbable, and in view of the long suffering of the accused, and the great expense which he has already been subjected, he thinks the District Attorney should be directed to dismiss the suit.

A requisition of the War Department in favor of Capt. Eids for half a million in bonds on account of his work on the Mississippi gorges, has been honored by the U. S. Treasury.

The number of interments in Philadelphia for the week ending the 10th inst., was 270.

The Markets, &c.—The following were the quotations the 12th inst. *Philadelphia*.—American gold, 105 U. S. States sixes, 1881, 112; registered; do. coupon 113; do. 1868, 115½; do. 5 per cents, 118, 110; 4 per cents, 115; do. 12, and 13½; for foreign 123. New Orleans, Flour, 5 @ \$19.50, according to quality. Pennsylvania red wheat, \$1.49 a \$1.54 amber, \$1.55 a \$1.57; western white, \$1.55 a \$1.58 Rye, 77 a 80 cts. Yellow corn, 55 cts. Oats, 37 a 41 cts. About 2500 head cattle sold at 61 a 63 cts per gross for extra; 51 a 65 cts for fair to good, and 44 a 50 cts for common. Sheep, 44 a 71 cts, according to quality. Receipts 10,200 head, Hogs 77, 10 cts per pound. Receipts 4200 head. *Chicago*.—No. 1, spring wheat, \$1.37; No. 2, do., \$1.31; No. 3, do., \$1.27. Corn, 41½ cts. Oats, 35½ cts. Lard, 10½ cts. *New York*.—Superfine flour, \$5.45 a \$5.85; State extra, \$5.90 a \$6.00; No. 1, do., \$5.10 a \$5.20; No. 2, do., \$4.90 a \$5.00; spring wheat \$1.40; do. No. 1, \$1.48; No. 1 Mild, \$1.52; No. 2, Chicago, \$1.38. State rye, 86 cts. Mix corn, 55½ a 57 cts; New Jersey yellow, 55 a 55½ cts; Canada barley, \$1.08.

WANTED.

A Friend to teach London Britain Preparatory Meeting School. Apply to ANEL J. HOPKINS, Thompson P. O., Newcastle Co., Del.

FRIENDS' SELECT SCHOOLS.

A suitably qualified Friend is wanted as Principal of the Boys' Select School, at the opening of the term, the Ninth month. Application may be made to Joseph S. Elkinton, 331 South Fifth St., Edward Marley, 127 South Fifth St., James Smalley, 415 Market St., George J. Scattergood, 413 Spruce St.

FRIENDS' ASYLUM FOR THE INSANE.

Near Frankford, (Twentieth Ward), Philadelphia. Physician and Superintendent—JOSUAH H. WOODSTOCK, M. D. Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board Managers.

DIED, on the 18th of 1st month, 1877, at the residence of Micah Gardner, AMY WELLS, aged 64 years, her age, an esteemed member of Upper Freshwater Monthly Meeting of Friends, New Jersey.

THE FRIEND.

A RELIGIOUS AND LITERARY JOURNAL.

VOL. L.

SEVENTH-DAY, SECOND MONTH 24, 1877.

NO. 28.

PUBLISHED WEEKLY.

Price, if paid in advance, \$2.00 per annum; if not paid in advance \$2.50; 10 cents extra is charged for postage on those sent by mail.

Subscriptions and Payments received by
JOHN S. STOKES,

CATALOGUING.

In the report upon Libraries, issued by the Department of Education—of which some account, mostly statistical, was given in a preceding article—the subject of cataloguing is of especial prominence, inasmuch as it is shown how a large collection imperfectly catalogued, may prove no more serviceable than one of half the size, where the work has been thoroughly done. A classification is made of four different systems of cataloguing, each being again divided into more than twenty varieties. Without entering into any detailed description of the numerous kinds, it will suffice to say that the two typical plans arrangement are (1) the dictionary catalogue, and (2) the alphabetic-classed or systematic catalogue.

A Dictionary Catalogue arranges the titles of books and their authors in one continuous alphabetical list. In libraries of 100,000 volumes and upwards, in which books are apt to accumulate in an increasing ratio, it becomes a question of moment—if a printed catalogue is to be used—how far and in what manner entries may be condensed so as not to impair the usefulness of the collection. Where cards are used, as is now the case in most of our large libraries, this question is not so much concerned, because the card plan admits of indefinite expansion. Here the name of the book and its author, are placed on one card; the name of the author followed by the title, on a second; and other entries, if desired, on still other cards, all of which are kept upright in drawers, where they may be readily consulted. Although this manner of entry does not permit the titles to be looked up quite as quickly as does reference to a printed page, yet it is more expeditious than the task of consulting even a printed catalogue with its several supplements, as has heretofore been the necessary usage in the case of libraries not of recent origin.

By the Alphabetic-Classed system, a division is first made into different classes, as History, Biography, Travels, &c., and these are then divided into sub-classes, sections or sub-sections, according to the necessities of the case. The author's names may be arranged in the sections with the subjects, or (which I think the better plan) they may con-

stitute a separate list. Thus all the works of any author, which the library possesses, may then be seen at a glance, without necessitating a search through the various sections.

Having determined on the kind of catalogue to be used, some general rules governing the style of entries have to be settled, and secondly, where and how the books shall be placed on the shelves. At first sight it may appear a very easy matter to determine how the title of any book should be entered, but upon a more intimate consideration of the subject, it will be seen that the difficulties are by no means slight. Now, every book should be so catalogued that the librarian may answer any or every question concerning (1) the author's name; (2) the book's title; (3) its subject—not always synonymous with title; or, if even no author or title can be named by the applicant, (4) whether the library contains any work on a named subject. Let us take some examples.

Here is a "Life of William Penn," by Thos. Clarkson. We cannot mistake where that goes. If we are using a dictionary catalogue, we put it in its alphabetical place under Penn and Clarkson respectively; or, if a systematic catalogue, Penn is registered in its appropriate place in Biography, and Clarkson in the book of authors. Next, we will say, is "Christ and the Gallows," by M. H. Boree. Here we meet a difficulty. With the systematic catalogue, it would suffice to place the book in the section or sub-section of "Capital Punishment," but in the case of a dictionary catalogue, should a person want a work on capital punishment, and yet not know its name, he would miss this, the most recent book, altogether, if it was entered only by its proper title. It must therefore be placed under "Capital Punishment" in the list, with such a cross-reference as this: see Boree's "Christ and the Gallows." Next is "Baneroff's History of the United States." While it is true this may be easily placed, yet there is something additional needed. There may be twenty or more books on the same general subject, but in case the student should wish to ascertain the particulars of an event which had happened in the year 1777, he would find that his trouble in consulting the work had been in vain, for the reason that the history stops short at its tenth volume with the year 1776. Hence it is requisite to add in brackets to the title-entry of the work [To 1776] or [Colonial]. But now we come to a title which presents a more formidable difficulty. It is—if I remember the wording correctly—"Old Wells Dag Out," by T. DeWitt Talmage,—a title not unlike many which appeared at the time of the rise of our religious Society. If we were to consult no more than the title-page, our book would appear under Hydraulics or Drainage, whereas its appropriate place must be Theology. In the same manner, "To Rome and Back" is not a book of travel, but a work on ritualism, and needs to be entered not only by

its title, but also under the general heading of "Ritualism," with a cross-reference to this particular book. Appleton's "Dictionary of Mechanics, Mining and Engineering" must be so entered that it will be found by one specially interested in mining or engineering, as well as by one who is examining the subject of mechanics generally, and hence will necessitate four entries. Again, Farrar's "Seekers after God," by no means suggests the names of Seneca, Epictetus and Marcus Aurelius, whose lives and teachings make up the contents of the book, and therefore it needs to be entered under those names as well. Likewise, the "Essays" and "Miscellanies" of many writers, hide important articles which might seldom be read if not placed in the catalogue.

Corresponding difficulties present themselves in dealing with the names of the authors. In the case of pseudonyms, some librarians enter them by the first name, and some by the surname. Thus Edith May or Barry Cornwall can either be entered as they stand, or May and Cornwall can be given priority—their true names, Anna Drinker and Bryan W. Procter, being also entered in brackets. In the case of foreign prefixes, such as De and Von, it is hardly advisable to establish an absolute rule. No one would look for Voltaire under De Voltaire, nor Humboldt under Von Humboldt; and on the other hand few would expect to find De Toqueville entered as Touqueville, or De Vere as Vere.

Having mentioned a few of the troubles in the nomenclature, it remains to be considered where the books shall be placed, and how they shall be numbered. For quite small libraries, the accession number only need be used; that is to say, the 250th book received, may be numbered 250, and placed on its proper shelf in the class to which it belongs. In the Friends' Free Library, at Germantown, all the numbers up to 2000 have been reserved for History, from 2001 to 4000 for Science, 4000 to 6000 for Travels, and so on; so that a book bears a number which represents its accession to the division, and not to the whole library. The librarian knows at a glance in what division any book belongs.* If there are alcoves, the letter A, B, or C, &c., is placed before the accession number, the number of the shelf being entered between, as B 25, 650.

In large libraries some form of the decimal or the logical system of arrangement and numeration is adopted. The decimal system, which is the most common, consists in lettering or numbering the case or alcove, the tier, the shelf, and the place on the shelf. Thus, C 75, 10 would mean that the book was to be found in case or alcove C, 7th tier, 5th shelf, 10th book on the shelf. Or, the letter of the case may be replaced by a numeral: 765, 25

* In the British Museum, a classification by colors has been adopted. Books of history are bound in red, theological in blue, poetical in yellow, natural history in green, and so on.

would mean the 7th case, 6th tier, 5th shelf, 25th book on the shelf. The logical system, however, has the advantage that the nomenclature of a book being dependent altogether upon its topic, it can always be readily found by those accustomed to the plan, even though a considerable moving of the books should be necessitated by increase in the size of the library, or its entire removal to another building. This plan, which has been adopted in the Amherst College library, is as follows:—

The library is first divided into 9 classes or special libraries—those of Philosophy, Theology, Natural Science, History, and so forth, and these are numbered 1 to 9. Each one of these special libraries is then divided into 9 divisions of the main subject, also numbered 1 to 9; and finally, each of these divisions into 9 sections. Hence if we take a book numbered 557, 10, the 5 represents class, Natural Science; 8 is its division, Botany; 7 the botanical section, North America; 10 the tenth book in that section. Inversely: suppose the student to have a French dictionary which he wishes to replace, he would know, even without seeing its number, that it belonged to the class 4, Philology; division 4, French language; section 3, French dictionaries—its general number therefore 443.

There is also in use in the same library, an ingenious plan for showing where any book is. When a student takes a book out, he hands to the librarian a paper slip upon which is his name and the book's number. The librarian stamps upon the slip the date, and places it in its proper place in a tray, which is divided into compartments corresponding to the divisions and sections into which the library is divided. Any book taken from the shelves, for whatever purpose, is in this manner represented by a stamped slip. Thus if a book should be asked for which is not in its place on the shelves, the librarian examines the slips, and can tell in a few seconds who has it. One advantage of this plan for a college library is, that if a student can thus ascertain where a withdrawn book is which he may merely wish very briefly to refer to, he can do so without having to wait an indefinite time for its return.

The volume which we have thus briefly reviewed, also discusses the management of free Town Libraries, and how to make them successful; the use and abuse of fiction in public libraries; the advisability of establishing a special professorship of books and reading, for high-class colleges and universities, besides other related topics.

(To be continued.)

For "The Friend."

Sentiments of various writers in Reference to War.

We are at War.—"In nothing has the human mind been so blinded, so surprisingly infatuated, as in the sanguinary business of war. If this point were duly understood, it would not be so easy a matter to set people at war. Every man would consider what he was going about.

Does the Divine government pay a great and scrupulous regard, when a man way-lays and stabs his neighbor, and yet no regard when whole nations bleed? Does eternal justice sleep when the dying groans of thousands pierce the skies? when the blood of millions cries from the ground?

Who killed these people? Oh! nobody. They died in battle. They were killed by the opposite army, who are soldiers by profession! And this answer is satisfactory to a wretched infatuated mortal, who considers not that the eye of God is on this scene of carnage, and views every dead body as one distinct and individual murder. Never was there a delusion so deep and dreadful! Of all errors it is the most destructive and atrocious that ever seized on the human mind. 'We are at war!' In that one little sentence there is a charm which makes men totally forget the value of life, or the immortal destinies of the soul; which makes him careless of murder, and fearless of the wrath of God. Apprehensions, perhaps, may flit about him sometimes, and a little remorse of conscience; but he is ready to say, 'No matter, that is not my business. It is the business of the nation, the government; and, if we are by chance wrong, that wrong is to be divided amongst so many of us that my share will be small.' Deluded soul! such reasonings will not stand before God! 'We are at war.' So mighty is the charm of that word, that professing Christians, and even ministers, lose all scruples about the equity or iniquity of the cause, and hurry to bloody conflict.—*Letters of Governor Strong.*

"The idea of two communities of Christians, separated perhaps by a creek, at the same moment begging their common Father to assist them in reciprocal destruction, is an idea of horror to which I know no parallel. Lord, assist us to slaughter our enemies: This is our petition.—Father, forgive them; they know not what they do.' This is the petition of Christ."—*Dymond on War.*

"Would to God, that the spirit of the Christian religion would exert its influence over the hearts of individuals in their public capacity; then would revenge, avarice, and ambition, which have fattened the earth with the blood of her children, be banished from the counsels of princes, and there would be no more war. The time will come—the prophet hath said it, and I believe it—the time will assuredly come when nation, literally speaking, shall no longer lift up sword against nation. No man will rejoice, my lords, more than I shall, to see the time when peace shall depend on an obedience to the benevolent principles of the gospel."—*From a Speech of Bishop Watson in the House of Lords.*

"Mahometans and Pagans do not believe that our religion allows of war. They reproach us with the inconsistency. Our wars are, with them, a scandal and a taunt. 'You preach to us,' say they, 'of Christianity, and would convert us to your creed; first convert yourselves; show us that yourselves believe in it.' Nay, the Jews at our doors tell us, that our wars are an evidence that the Prince of Peace is not come. They bring the evidence of professed Christians to prove that Christ was a deceiver. Thus do we cause the way of Truth to be evil spoken of. Thus are we, who should be the helpers of the world, its stumbling-blocks and its shame."—*From "An Inquiry into the Accordancy of War with Christianity."*

Our safety as individuals or as a nation is not in arms or in war; but in a uniform, consistent, undeviating obedience to the Prince of Peace, and to the obligations He requires. This will ever be the safeguard of those who conform to it.

(To be concluded.)

The Draining of Lake Fucino.

A correspondent of the New York *Evening Post* reports the recent completion of the great engineering work in which Prince Alexan Torlonia, a citizen of Rome, had been engaged during the past twenty-two years. The work was: "The draining of Lake Fucino, which was the largest lake in Central and South Italy, covering an area of 37,050 acres, been the dream of the Romans since the lake was first conceived by Julius Caesar. The lake was situated in the province of Aquila, fifty-three miles east of Rome and ninety miles north of Naples, and before its drain covered the greater part of a vast table land one of the largest in the central part of the Apennines. This table land, 2,094 feet above the level of the sea, is surrounded on all sides by spurs of the main chain of mountains, it is separated from the adjacent valleys in such a manner that the waters found no outlet, discharge themselves into the neighboring rivers. The only means of discharging the lake was by evaporation into the air or sorption into the earth, and as often as the rainfall was larger than the amount of water thus subtracted the volume increased and overflowed the surrounding country. The proportions of the lake, thus depending on atmospheric changes, were exceedingly variable. Sometimes the water even filled the entire basin of one hundred and seventy-three thousand acres contained within the circle of mountains, and drove the poor inhabitants gradually away from their farms to the surrounding hills. When the waters sank people returned timorously to their lands but scarcely did they begin to make them again productive when a new rising of the lake drove them away. They lived in a state of continual anxiety, their fields being for several years at a time covered by the advancing waters; and when at last they were able to take possession of them they incurred heavy expenditures in rendering the land fit for cultivation, and were also exposed to miasmas from the swampy condition of the soil.

"This state of things was especially serious at Lake Fucino, because the people on the neighboring mountains had no other plan than that of Fucino to which they could refer for their supplies of cereals and other products of the soil, the rest of the territory being nothing else than steep mountain sides, which cultivation was almost impossible. This was a favorite project with Julius Caesar, to drain the land covered by Lake Fucino, a productive tract of country so near Rome would have been very desirable to supply the city with grain. This was one of several magnificent projects, which his murderer Brutus defeated, designed to prevent the terrible famines that so often afflicted the great population of Rome. At the death of Caesar the work was discontinued, and was resumed by his successors until Claudius succeeded to the imperial dignity. The work which he caused to be executed are considered by Piny the most extraordinary that brilliant period. This attempt of Claudius to drain the lake, after an immense expense and employing 30,000 men during a period of eleven years, was only partly successful."

The failure of Claudius was attributed to Tacitus to the dishonesty of the person in charge of the work, who accumulated a vast

tune while he had the superintendence of it.

The works were renewed by Trajan and Adrian, and in the middle ages by Frederick and by several sovereigns of Naples, but they were all unsuccessful, and the waters tended to rise and fall according to un-
known laws, no regular observations having been made before the beginning of Torlonia's work in 1854. This long succession of dikes had caused the draining of Lake Pa-
to to be regarded as an impossibility. The enterprise of Torlonia, who has succeeded in overcoming difficulties which for eighteen centuries had resisted the efforts of the most
valiant monarchs, redounds greatly to his honor. It has been accomplished in a sci-
entific and thorough manner, and there is no probability that like its predecessors it will
fall into ruin. Lake Fucino is the largest
and reservoir that has ever been drained.
Torlonia, with wonderful courage and
perseverance, has during a period of twenty-
years continued the work, first as owner
one-half the stock, and afterward as sole
proprietor.

The tunnel, which follows the direction
of the old Roman one, but is three times as
long and has four times the power, is one-
fourth the length of the Mont Cenis tunnel—
it is, 6,857 yards—and discharges every
hour 10,912 gallons of water. The whole
work consists of this tunnel under a mountain,
and a plain which is higher than that of Lake
Fucino, to the River Liris, into which it falls
at an elevation; a system of canals in the
head of the lake, and massive stone buildings
at the head of the tunnel. The lake, which
Torlonia began to drain it, was 12
miles long and 6.8 miles wide, is of an
elliptical form. It is certain that when the
drainage began it was much shallower than
at present times, the depth of the deposits being
calculated at nearly twelve inches per century.
Before the Christian era the floods were also
higher, and it is said by Strabo that the water
rose to the base of the mountains, occupying
the whole plain." Torlonia has lived to see
the successful issue of his great undertaking,
though he was advanced in years when he
began upon it.

Richard Shackleton.

(Continued from page 206.)

Richard Shackleton in the following in-
ductive letter, says: "Religion consists in
knowledge and practice, hearing Christ's say-
ings and doing them;" and that, "our great-
est duty is, diligently to wait on the motions
of His Spirit in our own hearts, and faithfully
to obey their requirements."

How very true it is, that we must give heed
to the inward teachings of the Holy Spirit,
before we can obey them, and following only
where they lead, if we would know of an ad-
vancement in the way of life eternal. It is
important, then, that we turn inward, seek-
ing thus to have the mind centered and set-
tled upon the alone source and strength by
which we may be enabled to move steadily
forward.

R. S. further remarks: "We may be clear
of the head and yet deceived in the heart;"
we may indeed, be able to grasp these things
with the intellect, and reason with our natural
faculties, and have our notions and under-
standings in regard to the great gospel Truths,

yet this is the least part of it, there must be
a corresponding unity *felt in the heart*, ere we
shall be enabled rightly and truly to know
for ourselves that these are the *very truths*.
We must come to *taste* and handle *ere we can*,
from a living experience, testify that they are
no cunningly devised fables.

R. S. to John Conran.

(About to join the Society of Friends.)

"Ballitore, 12th of Fifth month, 1772.

"Dear Friend. * * * I have no doubt
but that, as thy letter very sensibly im-
parted, the first great work of the inward
creation has been, in measure, effected in thee,
and the great first moving cause to every right
religious sense, has said, 'Let there be light.'
By this light I believe thou hast seen the great
superiority which future, eternal happiness
has above temporary gratification, and thy
mind has been stirred to aspire after the ex-
perience of those things which make for thy
present and future peace. Well, dear friend,
keep to this light, and walk in the shining of
it, and thereby thou wilt know, in the pro-
gress of this inward work, a being more and
more separated from the darkness. Religion
consists in knowledge and practice, hearing
Christ's sayings and doing them. Our great
duty then is, diligently to wait on the mo-
tions of His Spirit in our own hearts, and
faithfully to obey its requirements. It is not the
accumulation of even right religious notions
in the head, it is not a facility of writing or
speaking about them from such conceptions:
it is not a good capacity by which we may
give a reasonable plea for our religious senti-
ments and conduct, and by which we may
defend them from the attack of others—it is
not in these things that our stability and
growth in religion consists. We may be clear
in the head and yet deceived in the heart.
While our eyes are roving about in specu-
lation on these matters, an insidious adver-
sary may lay snares for our feet, and he that thinks
he stands, may too late be convinced of his
weakness by his fall. Let us, therefore, my
dear friend, walk cautiously and circumspectly
as in the day. Let us keep in the child's
state, while we are but children, waiting
patiently to be fed in due season with food
convenient for us, not seeking to be anything
in form or degree, but as the inward opera-
tive principle of life shall gradually make us.
The inward as well as the outward creation
is, I had liked to have said, infinite in its
variety. Let us, therefore, not be so solicitous
to model our conduct after the example of
others, as desirous in simplicity to be what
the Lord would have us to be. If we are pas-
sive enough in his hand to be squared, fash-
ioned and fitted by him, there is no fear, but
that in due time, he will bring us into our
proper respective places in the spiritual build-
ing in his church.

In the mean time, let us keep a watch
over the wanderings of our own imaginations,
and know a limitation to them, as well as a
bridle to our tongues. There is a laudable
parsimony and frugality in religion, espe-
cially suitable to young beginners. We should
not be lavish of the main stock, but rather
imitate the woman who took the leaven (re-
ceived the precious visitation) and hid it in
the three measures of meal, till the whole
body, soul, and spirit was leavened. David
also saith, 'Thy word have I hid in my heart,
that I might not sin against thee.' And the

closer this is pent up in our own breasts, like
fire in a close oven, the sooner and more effec-
tually, it will consume the chaff and the
transgressing (which is the combustible)
nature, and then be as a flame of joy, purifying,
keeping clean, enlightening and enlivening
the mind through all its faculties. * * *

"We are on all sides surrounded with
dangers, and we have but the one all-sufficient
help, which is the grace of God. As our
spirits happily keep in unity with this, we
shall be taught when and how to be free, and
when to be reserved. This is the key of
David, which locks and unlocks. This is that
which alone qualifies to show forth by our
tenets, lives, and conversations, that we are
in reality Christians, followers of Christ. And
after all is said and done, this is what those
of our profession, and of all modes of religion
under heaven, must come to be led and taught
by, if they ever come to be enabled to live
acceptably in the sight of their common Creator,
whilst here, or ever become prepared for
an eternity of happiness hereafter. To this
Divine Instructor, infallible Guide and saving
Help, I heartily commend thee.

"Thy affectionate friend, R. S."

The following is extracted from a letter of
Richard Shackleton to Hannah Plumstead, Jr.

"The elders have been removed,
and are moving off, a succession is wanting in
the church. The call, the invitation is gone
forth, the rich dainties of the Father's house
are prepared, and all is ready. Be thou, my
dear child, one of those who will give up their
names to serve the best of Masters. There is
no honor like the honor of His service; no re-
ward like the reward which He bestows. As
thou art faithful to the discoveries of His
Spirit, in matters comparatively small, as thou
surrenderest thy heart in unreserved dedica-
tion, and spreads thy garments and all super-
fluous branches of every luxuriant growth in
the way of His coming, great will be thy
peace. But if thou sayest in thy heart, to
the Divine visitation, 'Hitherto will I follow
thee, and no further;' if thou secretest the
doves (the seemingly innocent things) when
the Master is turning them out of His temple,
and if thou wilt not suffer the bitterness of
death to pass upon that which is high and
delicate, Goodness and Mercy will strive again
and again, but thy way will be long about,
and thy wilderness tedious. R. S."

(To be continued.)

Counterfeit Half Dollars.

As these pieces are beginning to show them-
selves, though not in alarming quantity, a few
simple directions for detecting them may be
useful, especially in the stores and shops.

Counterfeiters generally content themselves
with the cheap and quiet process of casting
from moulds, though sometimes they strike
the pieces from dies. The mould is made
from the genuine coin, and yields a fac-simile.
They use a type metal, somewhat hardened
and sonorous, by the addition of copper; and
the whole being slightly silvered over in a
battery, and the *gate* neatly ribbed out on the
edge. Such a piece may pass while fresh and
new. They are, however, rather too white
and too thick, or if of the right thickness, too
light.

There is something about the genuine coin
that ordinarily puts it above suspicion, par-
ticularly after the new white surface has given
place to the imitable and permanent nine-

tenths tint. It may be abused by heating or staining, or by contact with gum-elastio bands. It has been dis-figured with tin foil, for the small purpose of provoking a bet. In rare cases it may have a flaw at the edge, or slit in, which destroys the ring. But generally it speaks well for itself as to color and sonority.

The genuineness of a half dollar is some thing worth looking after, to any of us, and especially to storekeepers, taking them often through the day. It is, therefore, worth the trouble to have on the counter one or two witnesses easy to be had.

First, A balance, which need be no more than a thin strip of wood eight or ten inches long neatly poised. Place a good piece on one end and the suspected one on the other, and have a weight of three grains at hand. If the difference is more than that, decline taking the piece.

A much better instrument would be the one in vogue many years ago for gold, made of brass, and taking not only the weight, but also the gauge of diameter and thickness. Any one wishing to see this simple affair, with a view of making it for sale, may call at the office of the undersigned. No doubt, it could be sold at fifty cents. It should be adapted to the half and quarter dollar, and perhaps the whole dollar.

Second, a liquid test, composed as follows: Twenty-four grains of nitrate of silver in crystals; one gramme (say 15 grains) of nitric acid, and one ounce of water. Any druggist can put this up, in a small bottle with a pointed glass stopper, made for lifting drops, taking care to use pure ingredients. Remove a little of the surface of the coin by a knife, and then touch the place with a drop from the stopper. If good, there will be no action; if bad, it blackens at once.

It should be observed this is not the compound we use for examining gold count-ricets and jewelry. And, further, some persons use nitric acid alone, which will discolor a good coin as well as a bad one.

As for the pieces struck from dies, they are generally such poor imitations that the taker almost deserves to lose by them. Such a piece, dated 1876, is now before me; good color, feeble and faulty devices, right weight, but quite too thick. It would be caught by the gauge already mentioned. It is a whitish brass, with silver plating, more substantial than the electro-silvering.

It is well that the courts and officers of the law are diligent in arresting this business, while the tellers of the Treasury and the banks throw out spurious offers, so that it will not commonly be necessary to use any other test than the eye.

The writer has chosen to speak mainly of the half-dollar, because these are chiefly complained of and the lesser pieces are less likely to be imitated. Still, some men seem to take a pride in this despicable work, even if it yields small profit. In the long run, counterfeiters are never enriched, and their sequel is generally in prison walls.

W. E. De Bars,
Assayer, U. S. Mint, Philadelphia.
—Public Ledger.

Temptations of the Saints.—Against whom does Satan multiply his malicious assaults? Against those in whom God hath multiplied his graces. Satan is too crafty a pirate to

attack an empty vessel; he seeks to rob those vessels only which are richly laden.—*Comper.*

"LET THE DEAD BURY THEIR DEAD."

'Tis gone, with its joys and sorrows;
Its sunshine and storms of rain;
Look not away in the distance,
On relics of grief and pain;
Look up, dear friends, instead;
Let the dead year bury its dead!

What if our pride has sufficed?
What if the hour of need
Has shown that the friend we trusted
Was worse than a broken reed?
Look up, though our hearts have bled:
Let the dead year bury its dead.

Let us count the abundant mercies
Our one great Friend has sent;
The days of our light and darkness—
All gifts of one sweet intent;
No matter the tears we shed;
Let the dead year bury its dead.

Ah! youth has been taught stern lessons,
Of man's frailty and of nature's years
Have learned a yet keener knowledge
Of life's vain hopes and fears.
How surely God's hand hath led!
Let the dead year bury its dead.
And the new-born year shall find us
Courageous, alert, and strong;
Girt up for the strife before us,
Though sharp the trial and long.
Oh, on, with a braver tread,
While the dead year buries its dead!

—*The Month.*
Sd. ed.

If all our life were one broad glare
Of sunlight, clear, unclouded,
If all our path were smooth and fair
By no soft gloom enshrouded;
If all life's flowers were fully blown,
Without the sweet unfolding,
And happiness were guile to the man
On hands too weak for holding,
Should we not miss the twilight hours,
The gentle haze and sadness?
Should we not long for storms and showers,
To break the constant gladness?

If none were sick and none were sad,
What service would we render?
I think if we were always glad,
We scarcely could be tender.
Did our beloved never need,
Our patient ministrations,
Earth would grow cold and miss indeed
Its sweetest consolation.
If sorrow never claimed our hearts,
And every wish were granted,
But we would die and hope depart—
Life would be disenchanted.

And yet in Heaven is no more night,
No dawn or eve in its sweet glow?
Such unimagined new delight
Fresh grace from pain would borrow.
As the poor seed that under ground,
Socks its true life above it,
Not knowing what will there be found
When sunbeams kiss and love it;
So, we in darkness yet grow
And look and long for Heaven,
But cannot picture it below
Till more of light be given.

A late London paper says: The officers of customs in London have just stopped what was doubtless the commencement of a most notorious trade. They have seized, under powers given them by 39 and 40 Vic. sec. 12, cap. 36, a harmless looking fluid, which on analysis proved to be nicotine. The importation, which was from Hamburg, was exceedingly small in bulk, being only 23 grills. Its terrible potency may, however, be imagined from the fact that it was the produce of 2.5-0 pounds of tobacco sweepings mixed with alcohol. The presumed intention of the Ham-

burg chemist was that it should be used as ready means of converting our early Yucca cabbages into the finest Havana tobacco. T. Commissioners of Customs retained a sample for their museum, and ordered the rest of the mixture to be returned to the port of shipment.—*Late Paper.*

For "The Friend"
Ellis Hugh—a Biographical Sketch.

The following account of Ellis Hugh, extracted from the 4th vol. of Piety Promoted is copied for "The Friend," with the hope that in its perusal some of our dear young Friends may read their own experience with regard to sacrifices required; and be encouraged by his "faint yet persevering" Christian progress, to lay aside every weight, turn from the temptations to sin which so easily beset and run with patience the race set before them.

Nothing is more true than that the way of the everlasting crown and kingdom of Christ Jesus must ever lay through submission to obedience to the self-mortifying, humbly discipline of His cross. But this, when fully yielded to, He has promised to make easy and light; while we are at the same time assured that it leads to life, liberty, and true peace. So that, as in the case of E. H., though that which formerly delighted "as became burden," yet the blessed exchange became joy and life so to spring, that the desolate—the unchanged heart—becomes, through the renewing, teaching, preserving, sanctifying power of Heavenly grace, to rejoice as blossom as the garden of the Lord; "joy at gladness shall be found therein, thanksgiving and the voice of melody."

Ellis Hugh was a native of Wales, and emigrated to Pennsylvania when about twelve years of age. The account thus proceeds:—"I was naturally of a cheerful disposition, and for some time indulged himself in keeping company with such, whose conversation at conduct were unprofitable and vain; for while though it does not appear he was guilty of immoral practices, he was closely reproved by the witness of God in the secret of the heart, and his condition being thereby plainly manifested, as likewise the danger of pursuing such courses, he did not dare to go on any longer in vanity. Submitting to the reproof of instruction, he was brought under greater remorse and godly sorrow for his past sin in which state, the conversation of his former companions once his delight, was become burden, and increased his distress. But availing to feed their light, airy dispositions, keeping his mind retired, and reading the Holy Scriptures, when they sought to entice him had such an effect, that they forsook him which was a great ease to his mind. In this it afforded him an opportunity for a further search after the will of Him, who in mercy had called him to glory and virtue. As he was thus engaged after many deep baptisms and trials, it pleased the Lord, about the thirty-fourth year of his age, to call him to the work of the ministry; which was an exceedingly humbling exercise to him, and more conflicts he had therein, through the beatings of Satan; but by endeavoring to follow the Lord in the way of his requiring help was administered, so that he had at times to experience, that He gives "the oil of joy for mourning, and the garment of praise for the spirit of heaviness."

For "The Friend."

The "Indian Territory."

Edward King, author of "The Great South," writing of the Territory in 1873-1874, says: "The Indian Territory is, to its inhabitants, a Territory to the Government of the United States, this present writing, a problem. The area 52,750,000 acres has as yet scarcely population enough to make a city of tenth rank. The estimated numbers of the tribes scattered over the vast plains and among the mountains are as follows: Cherokees, 17,500; Choctaws, 17,000; Creeks, 13,500; Chickasaws, 5,500; Seminoles, 2,500; Osages, 3,500; Delawares and Foxes, 468; Shawnees, 670; Cheyennes and Arapahoes, 3,390; Confederate Peoples, 170; Eastern Shawnees, 80; Wyandottes, 0; Quapaws, 236; Senecas, 188. And this the land of 65,000 people is so separated by great distances, unbridged by railways, and by barriers of language and custom, that there is hardly any intercourse between tribes, and land lies waste because there are not men enough to hold the plough, and the country remains a wilderness because the Indian jealously refuses to allow the white man to make it blossom as the rose.

There is something pathetic in the resolution with which the Indian clings to his territory, the very last of his strongholds, his race and his history are soon to be inextinguishably mingled with that of the white men, whom he still considers as intruders; and while he recognizes the inevitable fate attending him and his possessions, he fiercely refuses any attempt at a compromise.

He now stands firm by the treaty stipulations, for the treaties made in 1837 by the Government of the United States with the various tribes east of the Mississippi, giving them the "Indian Territory" on condition that they should move into it and occupy it, were comprehensive and binding. The Osages indeed been the virtual owners of these immense tracts of land until the advent of the white man, but to day have almost entirely disappeared.

A patent in fee simple was given to the Cherokees in 1837, while the other tribes hold their lands under treaty stipulations. From 1837 to 1845 the task of removing the various tribes from their homes east of the Mississippi, and with the unwillingness of the Seminoles to migrate came the Florida war. In the treaties it was provided, that the five distinct tribes, the Cherokees, Choctaws, Chickasaws, Creeks and Seminoles, should hold the lands of the Territory as homes for ever. They, in their turn, have allowed smaller tribes to make homes among them. In 1866, the Delawares and Shawnees, of Kansas, were thereafter, to live in the Cherokee Nation and to give up their own nationality, and the funds resulting from the sale of their lands in Kansas to the annuities of the tribes.

The annuities of the various nations in the Territory arise from their sales of lands in the West; those of the Cherokees amount to about 50,000 yearly; of the Choctaws, \$250,000; of the Creeks, \$175,000; the Chickasaws, \$100,000; and the Seminoles, \$100,000. The various treaties were all revised and renewed in 1866—following on the treaty of peace made at Fort Smith, at the close of the late war.

The Indians of the Territory to day are before, just as securely vested with the control of the Territory as against its settle-

ment by white men as they were in 1837, and they manifest no more disposition to yield their claims than they did a quarter of a century ago.

The Cherokees have naturally made the greatest advances in civilization and are at present the most powerful of all the tribes in the Territory. They have a ruling voice in matters that concern the general polity of the nation or tribes of the Territory, and their manners and customs are better known to the outside world than are those of any other tribe.

Their general status is not below that of the white frontiersmen. They are industrious and capable agriculturists, and understand the care of stock better than any other people in the Southwest. They live remote from each other—on farms, which it is true, they hold in common, yet to which there is an individual and perpetual right of occupancy. All the land is vested in the Nation; a man may sell his improvements and buildings—but not the land.

The Indians throughout the Territory are not, as a rule, farmers in any proper sense, as they raise simply what they need; this however, is because there is no market for surplus produce. The Government originally supplied them with capital; they do not realize the advantages of gain, they simply desire to "make a living." Throughout the various nations there is an utter neglect of internal improvements. An Indian highway is as difficult as the road up Vesuvius, and none of the magnificent rivers were bridged before the advent of the Missouri, Kansas and Texas railway.

The "Indian Agents," who are appointed directly by the President, and who, residing among the different tribes, are properly the interpreters of all the treaties, have charge of the annuities, and make the annual reports—usually have much influence with the Indian chiefs, and of late years, some few improvements have been introduced at their suggestion. The person of an agent is always respected, and as a rule, his word is law. The government of the Cherokees, as well as that of the other principal nations in the Territory, corresponds in a large degree to those of our States. The Cherokees elect a "principal" and second chief for terms of four years. They also have an upper and lower house of the Legislature, the former continuing in power four, and the latter two years. Bills, or acts, are regularly introduced and passed through the various readings, to be engrossed, as in other legislative assemblies. There is a supreme court, with three judges, and there are also district judges and sheriffs.

At Tablequah, the capital, the annual sessions of the legislature are held in the council house, beginning in November, and lasting thirty days. The legislators are paid out of the annuities of the nation. Tablequah is an average town of the Southwest, with nothing especially denoting its Indian origin. The Choctaws and Creeks have the same general form of government. The Creeks are a fine people; their women are handsome, and their men generally brave and honest. The Seminoles have vested their executive authority in twenty-four chiefs, all of whom are controlled and directed by a "principal," who is an absolute autocrat, having an irrefragable veto power. All the tribes or na-

tions join in a general council provided for by the treaty of 1866, and it is presided over by the Superintendent of Indian Affairs for the Southern Superintendency. At this council, only such matters are legislated upon as are of commonality between the nations—the rendition of criminals, the joint action in regard to land, &c.

This superb country, unquestionably one of the most fertile on the globe, is a constant source of torment to the white men of the border, in whom the spirit of speculation is very strong. The hardy citizen of the Southwest bears no ill-will towards the various Indian tribes, but it irritates him to see such vast tracts of land lying idle. He longs to be admitted to the Territory with the same privileges granted Indians, viz.: the right to occupy and possess all the land they may fence in, and to claim all that remains unfenced within a quarter of a mile on either side of their fenced lots. He is tantalized with visions of the far-spreading, flower-be-spangled prairies, the fertile hills, the rich quarries, mines and valley lands. He burns to course at free will over the grazing regions where even the Indians raise such fine stock. And now that the railroad has entered a protest against continued exclusiveness on the part of the Indians, he thunders at the northern and southern entrances of the Territory, and will not be quiet.

The war of the rebellion was most disastrous to the Indians of this Territory, who most unwisely permitted themselves to be drawn into the quarrel, most of them taking part with the South, and the others remaining loyal to the Union. The latter being the weaker party suffered terribly in the civil strife which ensued, and many thousands were compelled to seek a refuge in Kansas. Out of a large party of Creeks led by their aged chief Opotheleho, more than a thousand men, women and children perished from cold and hunger in their winter journey, pursued as they were by their ruthless enemies under the command of General Pike.

Before the war, the Indians were rich in stock, and it was not uncommon for a stock raiser to possess 15,000 head of cattle. But when the war came the total destruction of this stock ensued. Hundreds of thousands of the beasts were stolen and taken into the neighboring States; both armies fed from the herds; and so great was the consequent distress among the Indians, that the general Government appropriated money for the purchase of new stock, and now it is supposed the tribes have nearly as many cattle as before the war.

After the war, the Cherokees invited the missions and their schools to return to the Territory, and the other tribes followed their example. There are, however, very few buildings designed especially for public worship, and religious meetings are usually held in the school houses.

The common schools among the Cherokees were established by the Legislature in 1867. There are schools set apart for colored children, but no spirit of exclusion is now manifested; for the Indians, when the war closed and they emancipated their slaves, at once placed them on the same basis with themselves. Once in two years a superintendent of schools is chosen, and he appoints a board of directors for each school. The district schools are mainly taught by women,

and those pupils who desire more than an elementary education are sent to colleges in the South and West. The Choctaws support forty youths and twenty maidens in institutions at Louisville and other southern cities. Various influences are gradually doing away with the desire to retain the Indian language in the schools. The Seminoles have a missionary boarding school under the charge of the Presbyterian church. This little tribe is improving as rapidly in material wealth and in education, as any other in the Territory.

For "The Friend."

State of Religion in Continental Europe.

An article by A. J. Rowland in a recent number of the *National Baptist*, gives a painful view of the low state of vital religion in those parts of the Continent of Europe which he visited. We can but hope that he has made a similar mistake to Elijah of old, and that amidst the general defection from a true bearing of the cross of Christ, the Lord has reserved to himself many thousands of hidden ones, who truly love and serve Him. The following is extracted from the article referred to.

"I found Sunday was looked upon not as a holy day, but as a holiday differing from other days only in allowing larger opportunities of making money on the one side, and of seeking pleasure by its expenditure on the other—the gayest, noisiest, and so far as personal or social morality is concerned, the worst day, by all odds, in the entire week.

"In Ireland I found a devout sincerity among the adherents of the Romish Church which commanded my admiration. But the further South I went the less I saw of this. The churches were not as well attended. I have repeatedly, in even the grand cathedrals of the Italian cities, witnessed the performance of the regular morning or afternoon service when there was not a soul in the house except the priests and a few tourists with guide books in their hands. It is very evident that the priests themselves are not much in earnest, and that the service is irk-some to them. Especially is this true at Rome. Here, so far as I could see, religion was looked upon as half politics and half form. Under the thin crust of an external profession, and indeed breaking through this, in a hundred places, can be perceived the molten sea of skepticism and infidelity. I had more than one instance which showed me that the priests had no real faith in the things they felt obliged to teach. As for the people—well, the people believe nothing, though when occasion demands, they make believe as suits the circumstances of the case. The Roman Catholic system has produced in Rome its most consummate fruit—a people who look upon religion simply as a means to an end, and that end their own selfishness; to whom deceit is as natural as life; who when the Papacy is uppermost are fervent adherents of the Pope, and when the Papacy is down are ready to insult the holy father on the street and curse him to his face. Of all places in the world Rome is, in my opinion, the hardest to bring religion as a vital force into human hearts.

"Here, however, I feel I must recur to the distinction between sentimental and vital religion already made. Religion as a sentiment flourishes in Rome. Nowhere are the churches so large and costly; nowhere are the displays so imposing and grand; nowhere is art em-

ployed so lavishly and with such effect in illustrating and enforcing Scriptural themes and the history of the church. But with all this, religion as a vital force is almost unknown; society is rotten; intrigue reigns everywhere; beggars abound; vice is shameless. The Spirit of Christ abides apparently in but few hearts, and the great mass of both clergy and laity are sunken in venality and corruption.

"And this is true of all the Roman Catholic countries I visited on the Continent. While everywhere I found much to admire in the way of religious edifices and galleries of art—while everywhere the religious nature has expressed itself in the wonders of architecture and sculpture and painting—the absence of true and vital religion is painful in the extreme. How, indeed, can it be otherwise? The priests do not instruct the people; the service is conducted in a language they do not understand, and by men in whom, oftentimes, they have no personal interest or confidence. I am sure there is nothing in the forms of the church to inspire religious emotion or move the heart. Mr. Macaulay, in his visit to Italy, records his feelings on witnessing the performance of the mass. 'I stayed to the end,' he says, 'wondering that so many reasonable beings could come together to see a man bow, drink, bow again, wipe a nap, wrap up a napkin, spread his arms, and gesticulate with his hands; and to hear a low muttering which they could not understand, interrupted by the occasional jingling of a bell.' I must confess to the same feeling.

"Bad as is the state of things in Roman Catholic countries, I do not know that it is much better in those that are universally Protestant. In Germany, as you all are aware, the religious question has for several years been complicated with politics to such an extent that it is difficult to say where religion ends and statecraft begins. From what I saw, I was led to conclude that religion as an affair of the individual heart was not much known or cared for. The pride of the German intellect, and the desire for worldly pleasures—notably those of drink and the musical drama—have driven religion out of private life, and forced her to clothe herself in the garb of philosophy or politics, or the broadest latitudinarianism."

A simple Christian, who attends diligently to that Spirit of Truth, which is given to every man, and will lead into all truth, will find as little difficulty in comprehending his duty as he that hears a voice behind him, when he turneth to the right hand, and when he turneth to the left, saying, "This is the way, walk in it."—Richard Reynolds.

THE FRIEND.

SECOND MONTH 24, 1877.

In this day of stripping and isolation, when the exercised burden-bearer meets with comparatively few of much religious experience with whom to commune, and from whom, in true fellow-feeling, to derive encouragement and spiritual strength, it is often animating to the drooping spirit to peruse the accounts left by servants of the Lord who, having trod

the path of self-denial and holiness, were fervently engaged, in days that are gone, to promote the cause of truth and righteousness, gathering the people to the inward teach of the Lord Jesus Christ.

Knowing that Friends were called on the forms and will-worship observed by great body of the professing church, to rest a pure ministry and the practice of that worship which is in spirit and in truth, we felt that through obedience to the inspeaking Word of Life, these dedicated servants received power from on high to abandon reliance on man for enabling them to perform these solemn duties. They kept constant view the necessity of waiting upon the Lord, in the silence of all flesh, in order to be prepared to offer the acceptable adoration which the Father seeketh, and to feel their strength renewed; and when gifted there and called thereto, to preach the gospel with a measure of the Holy Ghost sent down from heaven, or to put up vocal prayer in the name or power of Christ. Carefully discarding the common mistake that public worship can be rightly performed without the intervention of some one to preach, to pray, or to stir their faith was firm in the declaration of the great Minister of the sanctuary, that who two or three—or two or three hundreds—gathered in his name, there am I in the midst of them; and they experienced its fulfillment by his making Himself known by the quickening power of his Spirit ministering to the several conditions, and distilling his invigorating influence over the assemblies, like dew on the tender grass.

It is true that backsliding and consequent weakness early made their appearance among individual members, causing sorrow and de travail of spirit; but until our day the church never sanctioned departures from the doctrines and testimonies of the gospel upheld by the Society from its beginning, but maintained them unyieldingly, and bore a faithful testimony against every attempted innovation upon them. How beautiful are the pictures presented in the several records alluded to of the assemblies engaged in transacting the affairs of the church, where a united harmonious labor was known, to hear and obey the still small voice of the Shepherd of Israel under his guiding hand and with the strength He vouchsafed, they might be instrumental to bind up that which was broken, to strengthen that which was sick, and in spreading the kingdom of the Redeemer.

An important lesson thus taught is, that while or where the Society, or a moiety of its members has been or is measurably preserved in a state of spiritual soundness, being in mystical but true sense a part of the body of Christ, and under the government of His glorified Head, He works in and by it, them to effect his redeeming purposes. The ministers and other living members, baptized by the one Spirit into one body, constitute a portion of the universal priesthood of believers; they understand their respective services, keep in their proper places, and a ever ready to submit one unto another, that organized fellowship which constitutes church. Thus "holding the Head, from which all the body by joints and bands having nourishment ministered and knit together, increaseth with the increase of God," the collective and united testimony witnesseth the truth with authoritative power, as all

clear and decided condemnation of error in its multiform fruits.

Surprise is often expressed, that the errors, doctrine, and the innovations on the principles and practices of Friends which characterize the history of the Society during the present century, should have found a place of actual lodgment within a body of professors whose fundamental principles and long-established usages have always been directly opposed to them. But human nature is the same within as without our pale, and birthright membership does not bestow regeneration. The ready acceptance of the seminal principles of these defections and their widespread growth, clearly indicate that a lapse in a life and conversation consistent with original and true Quakerism in very many of our members, had prepared a congenial *aditus* to the reception of the seed, and a spiritual condition favorable for its germination and growth. It should also be borne in mind that many of the unsound sentiments and novel performances now boldly inculcated in parts of our Society are not altogether new; but copied from creeds and services long held and observed by surrounding religious associations. Nor are they the outgrowth of unlearned error; but rather a perversion and sapplification of tenets and religious acts, which in their purity and right administration are closely connected with the interests of the church. Thus these novelties in doctrine and practice have acquired currency among our members, not only because they do not meet the emotional and imaginative nature of the unregenerate heart, but because the superficial reasoner, they seem to spring from the root of primitive truth, and admit being upheld by a plausible sophistry.

That the religious character, standing and influence of the Society should be changed, here these departures from primitive Quakerism have obtained ascendancy, is a natural consequence; for where and when the members have not been truly grafted into Christ, or, from any cause, the spiritual life has been away, however the outward form may be preserved and use continue to be made of the adopted conventional language, respecting the power and operation of the Holy Spirit, yet the constitution of such a portion of the visible church is inwardly changed, and the personal living faith of the members, the headship of Christ, and in his infallible guidance and government, becomes an ineffectual or dead faith; the will and wisdom of an being substituted therefor; and instead of a living organism inspired in every part by the Spirit of the glorified Head, acting and speaking in the authority of Truth, its whole power rests on human ability and educational knowledge, shaping and executing its conceptions, it may be, through forms and machinery once constituted and sanctified in a day of experienced believers.

We have sorrowful evidence, that the tendency of the age is to question all systems of religious belief; more in a spirit of skeptical nihilism, than of informing analysis. In our religious Society it manifests itself as much, perhaps, in discontent with principles and practices involving self-negation which are not rightly understood, as by longing after truths not heretofore revealed. There is no more the exhibit in writers and speakers, of the common defect of reasoning illogically from imperfect comprehension of generally ac-

cepted premises, and of hazarding conclusions, under a persistent determination to make all former experience bend to a result earnestly coveted. It would be a shallow as well as uncharitable judgment to come to, that all the originators and propagators of the novelties introduced among the members, are simply bent on change, and greater laxity in conduct and conversation. Dissatisfied with the antique "offence of the cross," with some exaggerated ideas of the "march of mind," there has been mixed up a conceit that Quakerism should not be the only thing that must continue unimproved; and changes have been made that are supposed to correspond with the more untrammelled intelligence of the times. But the gospel of Christ was perfect when first introduced, and its truths and terms remain unchangeable forever. The only way in which there can be an improvement effected, is by allowing its better relation to ourselves, by its increased power over our will and fallen propensities, and by the more full reception of its government and heavenly love into our hearts.

As before said, many of the innovations made of latter time on the principles and practices of Friends owe their popularity, not merely to their congeniality with the feelings of a soul longing for a religion that will meet its emotional aspirations, without crucifying its lusts, but also from stretching the application of undoubted truths beyond their rightly defined limits; so as to make them appear to sanction proceedings against which Friends have always carefully guarded. We think there is a striking example of this in the sentiments promulgated by a conference of Ministers recently held within the limits of the Western Yearly Meeting.

It was the prevailing judgment of the conference that in the economy of Gospel service it is the will of the Lord that every congregation of worshippers should be supplied with a living ministry.

Meetings without ministers should prayerfully consider and seek to know their duty in opening the way for those whom it may be the will of the Lord to send or raise up amongst them. Individual members or meetings may, in accordance with many examples in Scripture, call for ministers to come into their midst, either to reside or engage in transient service, and they are encouraged to be faithful to duty in making such calls, and providing for the temporal wants of those who answer.

It is believed that one of the greatest hindrances to a right distribution of the ministry will be removed if a liberal support can be given to those who are called of the Lord into this service, thus relieving them from the necessity of making considerations of business prominent in selecting a home, rather than their call to the ministry and the wants of the church.

When the church believes a minister called to devote his time and talents wholly or in part to the exercise of his gift either at home or abroad, it becomes its duty to see that such service is not crippled or hindered for want of means, either to pay his expenses or support his family. This burden should be shared in many instances by the meetings to whom the Gospel message has been sent, especially such meetings as have no expense on account of resident ministers.

Knowledge brought under the sanctifying power of divine grace is greatly blessed in

giving strength and permanence to religious character, and efficiency and power in religious work. The minister should study with direct reference to his calling—entertaining thoughts on texts of Scripture or subjects of divine truth, pursuing such thoughts to satisfactory conclusions, and arranging them in the mind so they can be used when the proper occasion presents.

Friends have always held that as a gift of the ministry is freely bestowed and can be exercised only under immediate inspiration, so the people to whom and the time when it is to be so exercised, are altogether in the ordering of the Divine Giver. While far from supposing ignorance to be conducive to qualification for the service, they have equally discarded the idea of ministers studying for preparation to exercise the heavenly gift. While taking care that no right religious concern of a minister should be thwarted by lack of pecuniary means to perform it, supplying the funds necessary for travelling expenses; they have carefully guarded against making the ministry a means of support; rightly expecting the hands of those "called of God as was Aaron," will, as R. Barclay says, "Supply their own necessities, working honestly for bread for themselves and their families."

But the advice quoted, stretches the views and usages of Friends beyond their just limits; so that a meeting wanting a minister may "extend a call" to any one it thinks it would like to come and preach for it, offering to relieve him of making prominent considerations of business in selecting a home, by supplying the means of support "for himself and family," while he is to "study with direct reference to his calling," arranging his thoughts and conclusions on texts of Scripture, "so that they can be used when the proper occasion presents." This seems very like opening the way for a hiring ministry, with sermons prepared beforehand.

We have read with interest in a late number of the "Episcopal Recorder," a sermon preached by "Bishop" Nicholson at the opening of the fourth general council of the Reformed Episcopal Church, held at Ottawa, Canada, last summer, on "the Priesthood of the Church of God." The special point of interest for those who hold the views of Friends, in this sermon, lies in its testimony to what the speaker designates "as the priesthood of the entire body of believers; the priesthood of every single believer." A few extracts are subjoined to indicate these sentiments.

"Priesthood," says he, "as generally conceived of, instead of being a plant of the heavenly Father's planting, is a parasite of man's device, entwining around the church, and absorbing its gospel juices. I wonder not that so many of those who love the gospel have looked at this whole subject as at a great horror of darkness." Then after casting upon the origin of the term and office as used under the Levitical ministrations and its typical reference to Christ as the great High Priest of His people; that He alone has fulfilled that office so far as its expiatory or atoning sacrifices are concerned, he addresses the language of Peter, where he declares to the believers to whom he was writing, "Ye also, as lively stones, are built up a spiritual house, a holy priesthood, to offer up spiritual sacrifices acceptable to God by Jesus Christ." Thus proving that those who are united to

Christ as branches in the living Vine, are made priests unto God and His Father, in celebrating His glory by such services as He appoints. "And now," he proceeds, "looking back over these declarations, we are at once arrested by the evident equality of all believers in the regard of priesthood." * * * "as well Phoebe the de-a-oness as Paul the apostle, Onesimus the slave as Philemon the master. * * In the fact and office of the priest-hood there is absolute equality; only one and the same right and title among them all to nearest access to God." * * * "That in the church of God all of whom are a priest-hood, there should be a separate class specially called priests, and nearer to God than are the others, is simply an absurdity."

When we remember that the Episcopal Church, as established in Great Britain and this country separates the offices of Bishop, Priest and Deacon so distinctly from each other, and further draws a broad line of demarcation between these classes on the one hand, under the designation of the "clergy," and the ordinary members as called the "laity" on the other, it is indeed a notable advance that the reformed branch of this Society has made, in thus recognizing the equal claims of all the members of the church of Christ to serve as priests unto Him, without the intervention of any specially ordained class. We often doubtless feel discouraged in reflecting upon the slow reception of those spiritual views of Christianity which the Society of Friends has endeavored to uphold for two hundred and twenty-five years. It may serve to stimulate us to faithfulness in this duty, however, to contrast the persecuting example and unchristian precepts of those who claimed the office of *Priests* in the National Church of England in the days of Fox and Whitehead, with the views indicated in the public discourse above alluded to. We believe that in many other respects more spiritual views are gradually leavening the doctrine and practice of some religious denominations of latter time, and that a sensible advance is being experienced in practical piety. The high privileges which are conferred upon all who humbly submit to the washing of regeneration and renewing of the Holy Ghost, should indeed stimulate more to press into the kingdom of Christ, where they may experience the adoption of sons, and become joint heirs with Him in his glorious reign.

SUMMARY OF EVENTS.

FOREIGN.—A dispatch from Berlin to the *Pall Mall Gazette* says: It is stated that negotiations between the Powers about answering Prince Gortschakoff's circular have been concluded, and it was expected the replies would be sent next week. The Powers have agreed that the answers shall not be identical but similar in sense. They will decline to participate in any measures of coercion against the Porte, and also decline constituting Russia their mediator, but some of them appear to be intimated that they are willing to observe neutrality as long as Russia fulfills her assurance to leave the balance of power in Europe unimpaird.

The Vienna correspondent of the *London Times* says: "It is the opinion of persons at St. Petersburg, who agree with the *Czar*, that war is needless, because the fall of Nigbatz is the mark of the commencement of a full scale war; which will eventually compel Europe to interfere. It is said that General Ignatieff, who has arrived at St. Petersburg, and conferred with the *Czar* and Prince Gortschakoff, supports this view. The delay among the peace party seems to be that the Powers, in answering the Russian circular, might avoid Russia to withdraw and await the result of the Turkish efforts at reform."

Constantinople despatches of the 17th say: It is stated that in consequence of a fresh despatch from the *Czar* and Victor urging the expediency of conducting here the negotiations between the Porte and Montenegro, Prince Nicholas has consented to the proposal, announcing that he will immediately send delegates to Constantinople. The Montenegris will come to Constantinople by the first steamer. The armistice will probably be signed at Surin, a steamer passed through Bucharest yesterday going to Constantinople.

It is stated from Vienna that the treaty of peace between the Porte and Servia and Montenegro will be signed next week with the acquiescence of Russia.

A terrible explosion has taken place in one of the Fifty-two Chambers, in the Department of Lyons, France, on the 21st inst., known to have been perished.

Statistical returns of the product of the vines in France for the year 1876 show that the vintage has fallen off one-half from that of 1875. The reduction was caused by the ravages of the phylloxera (insect).

The French Centre has passed a resolution in favor of the restoration of trial by jury for press offences, and has instructed its Bureau to unite with those of the other sections of the Left in urging the government to change the officials in the Press Department.

The French government has submitted to the Chamber of Deputies a proposition to appropriate \$100,000 for the purchase of land for the State of Louisiana, in Lyons, in New York and relief to the suffering operatives who have been thrown out of employ.

Rudolph Meyer, editor of a Socialist newspaper in Germany, has been sentenced to nine months' imprisonment for publishing a libel on Prince Bismarck, charging him with stock jobbing.

The Berlin *Telegraph* states that Germany's determination to participate in the Paris Exhibition is irrevocable. The state of affairs which led the government to decline to take part therein is such as to preclude all possibility of reconsideration.

The lower house of the Austrian Reichsrath by a vote of 155 yeas, to 37 nays, has passed a grant of 600,000 florins to promote the display of Austrian products in the Paris Exposition of 1878, notwithstanding the recent adverse decision of the Budget Committee.

It is authentically reported that nearly all the States of Mexico have recognized the government of Diaz.

The public accounts of Canada for 1876 have been laid before the Dominion House. The receipts for the last year were \$28,587,877, the principal portion of which was derived from customs and excise. In consequence of the falling off in revenue there is a deficit this year, the first since confederation, of \$1,900,785, the total expenditure for the year being \$24,488,372.

Calcutta advices show that the famine in some parts of India is much worse than had been supposed. There is great distress in Mysore and other places. An official telegraphic dispatch from the Viceroy of India dated Second Mo. 17th, reports that the numbers of natives on the relief works show a further reduction of 32,000 in Madras and 41,000 in Bombay. The prices of grain are falling, and some of the most popular ones, owing to large importations. In Bombay prices remain unchanged.

UNITED STATES.—The Electoral Commission decided on the 16th inst. that no evidence should be received in the Louisiana case beyond the Electoral certificates, and that the Electoral votes of Louisiana should be counted for Hayes and Wheeler. The decision was made by the same eight members of the Commission who determined the Florida case, and on similar grounds.

Both Houses were officially notified on the 17th inst. that a decision had been reached in regard to Louisiana. The Senate notified the House of the majority's readiness to go into joint convention and resume the counting of the votes, but the House 152 to 111, adopted a resolution that it would be ready to meet the Senate on the morning of the 19th inst. At that time the decision of the Electoral Commission was read in joint session, and five verbal objections to it were offered by the Democratic members. After the reading the Senate withdrew, in order that the House might separately consider and decide upon them. The Senate after two hours debate, resolved by a strict party vote to sustain in the decision, and directed that the vote be notified of its readiness to go on in joint session the next day. The House on Monday morning, after considering the decision, resolved by a vote of 140 to 139, to take a recess until the next day.

The amount of crude petroleum produced in Pennsylvania last year was 8,965,901 barrels, an average of 24,772 barrels per day. The total amount of shipments of crude and refined oil was 10,917,452 barrels.

Both Houses of Congress having now passed the Senate bill to encourage and promote telegraphic communication between this country and Europe, it is anticipated that in a short time the manufacture of cables and surveys for new routes will be commenced.

The United States Treasury Department notified collectors at the different ports of the appearance of a linkage bill in Germany, which is an instruction prohibiting the importation of neat cattle and hides into the United States from that country until further order.

The interurus in Philadelphia for the week on the 17th inst. numbered 258, and in New York for the same period 438.

A fire occurred at 824 Hurley, N. Y., the 18th inst. by which thirty buildings were burned, and valued at \$200,000 destroyed.

Nearly all the iron works of Pittsburg which have been suspended since the panic of 1873, have resumed business.

The Directors of the City Trusts report the income from the trust estate, for the year 1876, to be \$3,748, out of which \$100,258 was paid for the support of the college and \$378,595 for the estate, leaving a balance of \$71,685 remaining at the close of the year. The collieries of the Girard estate produced 791,568 tons against 705,345 in 1875.

The *Market*, &c.—The following were the quotations on the 19th inst., 1876:—3 percent U. S. Bonds, 104 1/2; 10/4; 11/2; 12; 1868, 115 1/2; 5 per cents, 1881, 110; 4 1/4 per cents, 106 1/2; Cotton 1 1/4 cts. for uplands and New Orleans. Flour 1/3 to \$10.25 per barrel. Pennsylvania red wheat \$1.50 a \$1.55; amber, \$1.57 a \$1.60; western wt. \$1.60. Rye, 75 a 80 cts. Yellow corn, 56 cts. Corn 37 a 41 cts. New York clover, extra, 36 a 36 1/2 cts. 1/2 brands, 36.50 a \$10.00. No. 2 Chicago spring wheat, \$1.35; white winter, \$1.61; No. 2 Chicago spring, \$1.34; rye, 35 cts. New yellow corn, 60 cts. Oats, 25 cts. Lard, 10 1/2 cts. Prime Cuba sugar, 9 1/2 cts.; Orleans do., 7 1/2 a 8 1/2 cts. Carolina rice, 3 1/2 a 6 Chicago. No. 2 spring wheat, \$1.51 1/2; No. 3 do., \$1.60; 4 1/2 cts. No. 3 do., \$1.65; barley, 56 a 60 cts. 10 1/2 cts. St. Louis. No. 2 red fall wheat, \$1.51; No. 2 do., \$1.46. No. 2 mixed corn, 40 cts. Oats, 36 cts. Detroit.—Extra white Michigan wheat, \$1.60; No. 1 amber do., \$1.54. Mixed corn, 48 cts. No. 1 1/2 do., \$1.60. No. 3 do., \$1.52. No. 2 corn, 43 cts. Oats, 33 cts. Liverpool.—Middling uplands, cotton, 93 Orleans, 6 1/2. California wheat, 10s. 8d. a 10s. 9d. 100 lbs. for average white.

I have received from "A Friend to the Freedmen South Dartmouth, Mass., Ten Dollars.

RICHARD CADBURY, Treasurer.

WESTTOWN BOARDING SCHOOL.

The Committee on Instruction of Westtown Boarding School meet on Seventh-day, 24th inst., at 10 A. M. in the Committee-room, on Arch street, Philadelphia.

WANTED.

A Friend to teach London Britain Preparatory Meeting School. Apply to ABEL J. HOPKINS, Thompson P. O., Newcastle Co., Del.

FRIENDS' SELECT SCHOOLS.

A suitably qualified Friend is wanted as Principal of the Boys' Select School, at the opening of the term the Ninth month. Application may be made to Joseph S. Flinton, on Arch street, fifth St., Edward Marley, 127 South Fifth St., James Smedley, 415 Market St., George J. Sattergood, 413 Spruce St.

FRIENDS' ASYLUM FOR THE INSANE. Near Frankford, (Twenty-third Ward), Philadelphia. Physician and Superintendent—JOSHUA H. WOOD (1856). M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board Managers.

WILLIAM H. PILE, PRINTER, No. 422 Walnut Street.

(Concluded from page 218.)

FICTION IN LIBRARIES.

would seem appropriate to make a few
marks—additional to the subject of catan-
ing, already briefly considered—upon one
or two other details of library economy, which
discussed in the recent government re-
port. One recommendation, strongly urged
the report, is that there should be a *pro-
fessorship of books and reading* attached to all
grade colleges and universities. The
of the incumbent would be to make him-
self intimately acquainted with the line of
fictitious and natural bent of mind of every
lecturer, and, by a judicious choice of books,
to direct their reading that it should sup-
plement, to the best advantage, the knowledge
already acquired. The faculty of knowing
how to skip wisely" is a valuable one, as it
enables the student to pass by a great deal
of trash, though inviting, may be of little
practical account, and permits him to fasten his
attention upon that which is of the most im-
portance. In the smaller colleges and academies,
the teacher of English literature, or the
librarian (who is also usually one of the pro-
fessors) should be measurably competent to
the post of director of reading; but it is
which could not be safely entrusted to
except the most conscientious.

Perhaps the most important subject brought
under consideration in the report, is as to the
the *fiction* should have in a free pub-
lic library. The opinion is therein pretty
fully expressed—as indeed we might be
pared to expect—that the furnishing of
of literature cannot be dispensed with; that
presence is quite a necessity in order to
the *habit* of reading. The librarian of
largest public library in the country, uses
following language relative to the matter:
"Silly reading," "trash," at least what is
ish to many persons, must to a considerable
be supplied by the public library. And
se who intend to organize a library for
public, for popular reading, and who in-
d to exclude such "trash," might as well
p before they begin. But what is trash to
be, is, if not nutriment, at least stimulus to
ers. Readers improve; if it were not so,
ding would not be a particularly useful
etic. The habit of reading is the first
ispensable step. That habit once es-

tablished, it is a recognized fact that readers go
from poorer to better sorts of reading. No
case has ever been cited where a reader, be-
ginning with lofty philosophy, pure religion,
profound science and useful information, has
gradually run down in his reading until his
declining years were disreputably wasted on
dime novels and story weeklies."

This is a specious presentation of the sub-
ject, but it will be well to inquire whether it
is altogether sustained by the facts. The
statistics of three branches of the Boston
Public Library, give the following percent-
ages of the use of books of fiction and juvenile
works, for the years 1873, 1874 and 1875,
respectively. *East Boston*, 82, 79, 80%. His-
tory and biography exhibited a fractional increase
of use; travels, a decrease. *South Boston*, 78,
78+, 78+, showing an increase of novel read-
ing. *Roxbury*, 80 per cent, for 1874, 85 per
cent, for 1875, showing a large increase—
biography and travels exhibiting a relative
decrease. It is to be regretted that in the
statistics, the works of fiction and the juvenile
books are so frequently included under one
head; but it is also mentioned elsewhere that
the average use of fiction alone, in the Boston
Public Library and its several branches, is
about 55 per cent. of the whole number of
books taken out.*

Allusion is made in the report of the li-
brarian of the Chicago Public Library for
1874, to the fact that the books of fiction hav-
ing been withdrawn from the library for the
space of several months, for the purpose of
preparing a catalogue, the reading of history
thereupon increased 137 per cent.; of voyages
and travels, 191 per cent.; and of science and
arts, 89 per cent. But when the novels were
again returned to the shelves, the reading of
the other classes of literature *dropped to their
usual level*. This does not seem to indicate
that the habit of reading fiction can be readily
broken, even when conditions so favorable to
its disseminate as the above, have transpired.

The Friends' Free Library of Germantown,
largely used by artisans is mentioned, I be-
lieve, as the only example—so far as reported
—of a free public library which totally ex-
cludes fiction. The following extract from
the report of its librarian, was quoted, and is
pertinent to repeat here:

"In watching the use of our library, as it
is more and more resorted to by the younger
readers of our community, I have been much
interested in its influence in weaning them
from a desire for works of fiction. On first
joining the library, the new comers often ask
for such books, but failing to procure them,
and having their attention turned to works
of interest and instruction, in almost every
instance they settle down to good reading and
cease asking for novels. I am persuaded that

* It may be said, however, that upon the issuing of
special catalogues of the books in the sections of history,
biography and travel, the use of these latter has been
stimulated, somewhat to the loss of fiction.

much of this vitiated taste is cultivated by
the purveyors to the reading classes, and that
they are responsible for an appetite they often
profess to deplore, but continue to cater to
under the plausible excuse that the public
will have such works."

Whoever will take occasion on the after-
noon of the 7th day of the week, to visit a
large public library, and notice the great num-
ber of youth of both sexes who go directly to
the novel cases to procure "entertaining"
books for first-day reading, will be almost
ready to query whether such a public library
which thus panders to the taste for the fictions
and the unhealthfully-stimulating, is
really doing as much good as it is harm.
"Have you read so-and-so's last novel?" is a
very frequent interrogatory, and one which a
person who moves in what is called fashion-
able society, does not care to leave long un-
answered. And inasmuch as the production
of novels is constantly on the increase, those
who have once fully committed themselves to
that line of reading are not apt to discontinue
the practice, for all the time which they can
possibly devote to books must be requisite, in
order to absorb even the most popular of such
publications.

The habit of reading having been formed,
there is undoubtedly a tendency with many
to improve in the choice of books, especially
with those whose reading is also of the nature
of study, or is essential as an aid to their reg-
ular avocation in life. But on the other hand,
where neither necessity nor a due apprehen-
sion of the value of time and of our liability
for its careful use, restrains, I believe there is
an equal inclination towards deterioration in
the character of what is read. In no direc-
tion is this tendency so perceptible as in the
unregulated reading of the daily newspapers.
Scandal, as all know, is a super-abundant in-
gredient of a large part of those issues, and
a loose rein given to its indulgence is not cal-
culated to strengthen those who believe that
"tale-bearing and detraction" should be dis-
couraged. Many a one who has long main-
tained the daily practice of reading the Holy
Scriptures, with reverent waiting, and has
also been diligent in seeking aid from other
good books, has been gradually weaned—per-
haps at a time of great political excitement—
from his first love, by the varied and exciting
entertainment afforded by the newspaper.
Eventually, not only the morning paper, but
also the evening's bulletin, will have become
almost a necessity, greatly to the detriment
of his former good habit, and to the loss, in a
greater or less degree, of his peace of mind.
This tendency was well illustrated in the case
of a certain worthy minister who had taught
a poor man to read, to the intent that the
latter might, with comfort, peruse his Bible
unaided. Upon calling several months later
to learn what progress his pupil had made,
not a little was his dismay when told by the
wife (her husband being absent) that he had

got out of the Bible and into the newspapers long ago.

Must we then believe that there does exist a necessity for managers of public libraries to wearily succumb to the popular demand for fictitious books? One of the queries of our religious Society, addressed to its members, recognizes the relationship between "pernicious books" and the "corrupt conversation" which largely prevails in the world. Thus, when all clearly recognize the *indivisiibility* which is represented by a book—that having found a lodgment on the shelves, it can talk and make its influence felt, in its way, as effectually as the living being could—how watchful should we then be lest, in placing it there, we unwittingly give our sanction to those characters and acts in books, which we would involuntarily shun in actual life. I perceive not therefore how any can consistently encourage the reading of that literature which instils false and harmful views of life, simply upon the assumption that some of the readers may be eventually drawn to a higher intellectual and moral plane. Rather let it be manifest that, in entering the public library, the reader *has come upon a higher plane*, where the yearnings of his better nature—so far as human knowledge can satisfy it—may be abundantly ministered unto, but which affords no harbor (as to books) for the absolutely frivolous—for low comedy and buffoonery—for whatever is hurtful (no matter how entertaining it may be), to the prejudice of that which is improving and ennobling.

J. T. Fields, in a lecture delivered in Boston not long ago, referring to the damaging influences of low classed literature, instanced the circumstance of his interview with a boy-murderer who had been sentenced to death for the crime. He said:

"In the course of the interview, Pomeroy said that he had always been a great reader of 'blood and thunder' stories, having read probably sixty 'dime novels,' all treating of scalping and deeds of violence. The boy said that he had no doubt that the reading of those books had a great deal to do with his course, and he would advise all boys to leave them alone."

Now, although most librarians advocate the utter exclusion from the shelves of such objectionable matter as "dime novels," yet if "silly reading" and "trash" are esteemed to be essential factors in ensuring the popularity of a library, it must be evident that a great

deal that is undoubtedly demoralizing in its tendency, will be admitted notwithstanding. When, therefore, we find that as much as one-half of all the books taken from our great public libraries are simply fiction, and that the lesson which the great bulk of these books convey is, that the first aim in life is the possession of wealth, or physical beauty, or of "standing" in fashionable society, I think we may concede that there exists some connection between these false views of existence, and the low standard of integrity which is so apparent in our midst.

J. W. L.

Selented.

A Testimony from Marsden Monthly Meeting concerning James Haworth, who died at his house at Marsden, in Lancashire, England, the 27th of 6th month, 1837, and was interred in Friends' Burial-ground there, the 2nd of the 7th mo. following, in the 86th year of his age, having been a minister about 50 years.

"The memory of the just is blessed."

This our dear friend, the son of Henry and Elizabeth Haworth, of Hapton Hall, within Crawshawbooth Meeting, was born there the 27th of 10th month, 1751, O. S., and carefully educated in the profession of the Truth as believed in by Friends.

About the 14th or 15th year of his age, he was brought under religious exercise, wherein he was given deeply to feel the necessity of repentance; and the baptism was so effectual that his mind was greatly humbled. He was from that time enabled to take up the cross to his own will, and abiding faithfully upon the convicting, sanctifying operation of Divine Grace—the purchase of the blood of our holy Redeemer—he came in due season to receive the ministration of condemnation to be removed, and to experience peace from God, and from the Lord Jesus Christ. During this peaceful calm he was favored to know a degree of growth in grace; but deeper baptisms and still more humiliating dispensations awaited him. His mind was introduced into a cloud, and into a state of unutterable distress, which continued with little intermission for many months, so that he was brought to the very foundation of all things for himself; he could no longer build upon tradition or education, but found that he was required to appear in some things, particularly in dress, more singular and self-denying than most of his friends.

In the 21st year of his age, he was visited with the small-pox, and was so ill that his life was despaired of. This brought him under close exercise of mind respecting his peace, which for a season was hid from him. But at length being enabled to get into stillness and resignation, his prayer was answered, and his mind was favored with a sweet and peaceful calm. After emerging from this exercise he had to pass through a more fiery baptism, which continued for several years, the door of grace being often shut, and any feeling of good seldom vouchsafed, so that the heavens seemed like brass, and the earth as layers of iron. In the depth of his distress he often withdrew into lonely places in the fields and elsewhere, seeking in secret retirement, if happily he might be so favored, to find a little relief. This, though long withheld, was mercifully granted, as he continued to wrestle for the blessing, resolved not to let go his confidence. Thus patiently abiding under the purifying dispensations of the Holy Spirit, all

his powers bowed in reverent submission, his own will being crucified, he became a vessel meet for the master's use, in what manner he might be pleased to employ it. At the early age of about 27 years, he was appointed to the station of elder, and was quietly engaged in the service of the church.

The natural powers of his mind being sanctified by Divine Grace, and restrained under the regulating power of Truth, he found it required of him to abandon a variety of studies which in his youth had occasionally engaged his attention, that he might more fully devote himself to the Lord's service. He often lamented the many deviations among us from that primitive simplicity in dress, so remarkably characterized our predecessors, and was frequently led to counsel Friends on this subject, both by word and writing, from a persuasion that in thus indulging a conformity to the spirit of the world they sustained great injury in relation to their advancement in the Truth. Sensing how much it is necessary that in our dealings for discipline the wisdom of man should be kept in entire subjection to the power of God, in order to be rightly serviceable in promoting the cause of Truth, he was solicited that these meetings might be conducted in their right authority, seeking to dwell not to the fountain of Divine Wisdom in him, and in all his movements therein evincing close attention to the pointings of the Heavenly President.

About the time of his marriage, and in the 36th year of his age, he came forth into ministry, in which he was a diligent and faithful laborer. In the exercise of his gift he was often led to use figurative language, and draw comparisons from outward things, particularly in his early appearance, which made it the more trying to him. He was very careful not to move therein without the *open* opening of the Holy Spirit, and the fresh painting and putting forth of the great Light of the Church. In meetings for worship was therefore concerned to wait in deep and reverent prostration of soul before the Lord, until he was pleased to hold out the scepter of Divine command; and when thus called unto ministry, he did it in the still which God giveth. His manner of delivery was awakening and impressive, and the doctrines which he preached were sound and consistent with the principles of our Society grounded on the doctrines contained in the New Testament; and these principles he, at times drawn to support in the demonstration of the Spirit and power, in opposition to the views of such as are still seeking in signs and shadows that substance which is to more directly found and enjoyed in pure still waiting upon God. In setting an example this still and patient waiting for Christ, was often made to appear as a fool to others, but upon such occasions he was frequently raised up to testify to the power and goodness of God in a manner which fully convinced those who had thus, though perhaps impatiently waited with him, that they had waited in vain. This last observation may more particularly apply to public meetings with those of other religious denominations, a service in which he was frequently engaged, and for which he was well qualified. He travelled extensively in the work of the ministry in England, Wales and Scotland, and when called from home to labor in the vic-

"One chapter of the report is specially devoted to the subject of *Prison Libraries*. It states that the first record of an endeavor to form such a collection of books is found in the code of rules and regulations enacted for the government of the Kentucky penitentiary, in the year 1802.

The Eastern Penitentiary, at Philadelphia, contains the largest library of any institution of this class, there being in it 9000 volumes, besides 1000 school books. Out of an average of 650 convicts, four-fifths use the library; and there were issued during the year 1871, an average of 71 vols. to each reader. In the South, where the majority of the convicts are colored, the proportion of literary is of course much greater. Of the 450 inmates of the North Carolina penitentiary, but one-sixth could read; in the Mississippi penitentiary, the proportion is one-fourth; in that of Virginia, one-third.

In some institutions the prisoners are allowed to come in squads to the library to choose the books; in others, as at the Eastern Penitentiary, there is a late and printed list of the books in each cell, so that the prisoners having set down on the slates the numbers corresponding to the books wanted, these are brought to them on a truck which rolls along the corridors.

rd, he was diligent in the work assigned him, not suffering his mind to be diverted from it by secondary objects; and as he had lately received so he freely gave, being sensibly careful not to make the gospel charge, either by protracted visits or otherwise. He was a man of a meek and quiet spirit, ready to suffer, rather than to give offence. His words were few and savory; he never made religion a common topic of discourse, and he was very careful not to relate his own experiences to others, without feeling necessity, or a clear permission to do so, his intercourse with the world, both in the office of his profession of a conveyancer, on other occasions, he maintained an unflinching adherence to our peculiar Christian testimonies, whilst his strict integrity, and unblemished life and conversation, procured him the esteem and regard of all who were acquainted with him. A pattern of great self-denial in his daily walk through life, he used the world as not abusing it; he felt himself especially restrained from the acquisition of wealth, and when he had it in his power to be enriched himself in an honorable and proper manner, he declined it, being satisfied in the small patrimony which he possessed; having experienced godliness with contentment to be great gain, he kept himself free from the encumbering things of this life, that he might please Him who had called him.

From a sense of duty he was very diligent in attending Quarterly, Monthly and other religious meetings; and while health and strength permitted, he generally travelled for the purpose on foot. When from the infirmities of advanced life, he felt himself released from active service in the church, he was still diligent in attending his own meeting for worship, often under great weakness of body; he was frequently engaged therein in the exercise of his gift, to the comfort and edification of his friends. In the last meeting in which he was thus engaged, about six months prior to his decease, he was led largely to expatiate on some of the doctrines of our Society, expounding, explaining, and defending them with clearness and force of argument. His dear friend had for several years, a foresight of the present conflict of sentiment prevalent in our Society, and he had seen it in some degree realized. He turned deeply over this state of things; he was very sensibly and tenderly for those who were ordering to his judgment formed from long experience, had grievously departed from the path as it is in Jesus. But such was his love for the cause, that his mind was brought under a very exercise on this account, and he was most desirous that the pure principle of truth as professed by Friends, might not in any degree be compromised, or the standard held by our predecessors lowered, to suit the declining state of doctrine or of practice in those who had suffered themselves to be drawn away from it.

His decline was gradual; and during this time, in the year 1834, it was his lot again to pass through a deeply exercising baptism, into death, all consolation of the Spirit withheld. He was given to feel his own nothingness. Deep poverty of spirit condescended at times to be his portion, and very humble were the views he entertained of him-

self and his services; but under all his confidence in the Everlasting Arm never forsook him. In the Fifth month of the present year, during the interval of relief after a trying fit of coughing, he uttered with earnestness this short prayer: "O Lord! prepare me for thy kingdom; for thou, Lord, art able to turn and overturn within me all that is opposed thereto." Soon after, addressing himself to those present, he repeated the words of the prophet, "I will turn my hand upon thee, and purely purge away thy dross, and take away all thy filth;" adding that he believed it necessary for them to experience this purification. A few weeks after two friends having called to see him and being about to take their leave, he held their hands for some time, and with much feeling said: "I think I shall not be long here." One of the friends having expressed his belief that his change would be a happy one, he continued some time evidently much bowed and exercised in mind, his hands being often lifted up as in supplication: at length he uttered this short prayer, "Forgive us our trespasses as we forgive them that trespass against us; O Lord! we have need of thy forgiveness;" then after a little pause he added: "Salvation hast thou appointed for walls and bulwarks." A solemn and impressive silence ensued, after which he said, "I would not detain you, friends, unless you have something to say to me, who am but very poor," but soon after with tears he continued, "I have been comforted in remembering that it is said, 'Blessed are the poor in Spirit, for theirs is the kingdom of Heaven.'" On its being remarked that he had nearly finished his course, and that it seemed as if he had nothing to do, but patiently to wait till his change came, his hope revived; and alluding to the testimonies of two dear stranger Friends who had both made use of these words of the apostle, "I have fought a good fight; I have finished my course; I have kept the faith," he said, "I felt upon these occasions as if I could lay hold of the words," emphatically repeating, "I have kept the faith; I have kept the faith."

Near the close of the meeting of ministers and elders held at his house the day following, he said: "I have been thinking while we have been sitting together, it is an easy thing to ask questions and give answers (referring to the Queries, &c.) but not so easy to do so in the Life, in a measure of the life and power, without which they are but as a dead letter; but this Life and Light we should seek after and labor for on these occasions, and in all our meetings for discipline; if this were the case, how different they would be! and I believe that in the establishment of them it was intended this should be the case. Seek after the Lord, my friends: call upon Him, whilst He is near, for He is near, I believe, to us all. He has promised to be near to them that seek Him, and they that seek Him early shall find Him. And will He promise and not perform? No; assuredly He will perform. Trust in Him, then, my friends; be not discouraged from seeking to Him, for in the Lord Jehovah is everlasting strength."

A few weeks before his removal, when sitting in his chair, he said, "Lord, thy mercy and thy love towards me have been very great;" and soon after added, "Lord, now lettest thou thy servant depart in peace; for mine eyes have seen thy salvation."
On the 22d of 6th month, he was taken ill,

and for a day or two suffered much from pain, during which he once expressed a desire to be released, if consistent with the Lord's will. After this he kept his bed, nature evidently sinking very fast, and lay very quiet and composed till about 5 o'clock on the 27th, when he sweetly departed "in peace."

Read and approved in Marsden Monthly Meeting, held at Rochdale, the 7th of the 12th mo., 1837.

For "The Friend,"

Sentiments of various writers in Reference to War.

(Our Includer from page 218.)

"Christ said, 'My kingdom is not of this world, else would my servants fight.' This declaration speaks a volume. They did not fight whilst that kingdom continued obedient to its King, and acted upon his maxims. But that kingdom shall be restored, raised to a far greater glory, and spread to a nobler dominion. And the time is near. Some nation must come forward and espouse the cause of peace. Some nation must awake to the true dignity and happiness of our race, to the dictates of common sense and reason; awake to the soul's immortal interests and duties; awake to the wisest and best policy of nations; must soon lift up its voice against war in every form, and against taking away the life of man on any occasion."—*Letters to Gov. Strong.*

"No man that believes the Bible can doubt that the period is coming, when the sword shall be beat into a ploughshare, and the spear into a pruning hook, and when nations will learn war no more. And no man who takes a philosophic view of things can fail to see that there are deep causes in operation now in society, which will inevitably work out this result; that there are principles and maxims beginning to be universally admitted, which can never be fully expanded without putting an end to war."—*Albert Barnes.*

"There are considerations, springing from our situation and condition (that of America) which fervently invite us to take the lead in this great work—the abolition of war. To this should bend the patriotic ardor of the land; the ambition of the statesman; the efforts of the scholar; the persuasive influence of the press; the mild persuasion of the pulpit; the early teachings of the school."—*Charles Sumner.*

"That a large number of persons should assemble and deliberately kill one another, appears to the understanding a proceeding so monstrous, that I think a being who had never before heard of human slaughter would inevitably conclude that they were mad. Nor is it likely, if it were attempted to explain to him some motives to such conduct, that he would be able to comprehend how any possible circumstances could make it reasonable. The ferocity and prodigious folly of the act would, in his estimation, outweigh the weight of every conceivable motive, and he would turn unsatisfied away,

"Astounded at the madness of mankind!"

—*An Essay on the Lawfulness of War.*

"It is, in my mind, no small misfortune to live at a period when scenes of horror and blood are frequent." "One of the most evil consequences of war is, that it tends to render the hearts of mankind callous to the feelings and sentiments of humanity."—*Charles J. Fox.*

"'Tis strange to imagine, that war, which I all things appears the most savage, should be

the passion of the most heroic spirits."—*Earl of Shaftsbury.*

"The proclamation of war passes sentence of death on thousands of our innocent fellow-creatures."—*Channing.*

"For fifteen centuries war has been a standing libel on Christianity, making it a by-word and a reproach over the earth."

"It were an impeachment of our Almighty Ruler to suppose war unavoidable."

"They who are shocked at a single murder on the highway, bear with indifference of the slaughter of a thousand on the field. They whom the idea of a single corpse would thrill with terror, contemplate that of heaps of human carcasses mangled by human hands, with frigid indifference. If a murder is committed, the narrative is given in the public newspapers, with many adjectives of horror—with many expressions of commiseration, and many hopes that the perpetrator will be detected. In the next paragraph, the editor, perhaps, tells us that he has hurried a second edition to the press, in order that he may be the first to glad the public with the intelligence, that in an engagement which has just taken place, *eight hundred and fifty of the enemy were killed.* Now, is not this latter intelligence eight hundred and fifty times as deplorable as the first? Yet the first is the subject of our sorrow, and this—of our joy! The inconsistency and disproportionateness which has been occasioned in our sentiments of benevolence, offers a curious moral phenomenon."—*Causes of War.*

"That a period will come when wars shall cease, I am not able to doubt; I believe it is not credible that the Prince of Peace will all ways endure the butchery of man by man; because He has declared He will not endure it; and because I think there is a perceptible approach of that period in which He will say—'it is enough.' In this belief the Christian may rejoice; he may rejoice that the number is increasing of those who are asking—'Shall the sword devour forever?' and of those who, whatever be the opinions or the practice of others, are openly saying, 'I am for peace.'"—*From an Essay on War.*

The Little Flock.

For "The Friend."

Horatius Bonar, author of Hymns of Faith and Hope, was born in Edinburgh in 1808, educated at the university, and was licensed or ordained, as it is called, as a minister, 1837, by the "Free Church of Scotland." He wrote the *Kelso Tracts*, which had a wide circulation. In 1843, "The Free Church of Scotland" released itself, in casting off the thralldom of the State. The name of H. Bonar was appended to that body of seceders. The first series of Hymns of Faith and Hope, appeared in 1850, the second in 1861. Several of his poems are peculiarly appropriate to the present state of the Christian Church, bearing evidence of true religious feeling, as do the writings of Cowper. It must however be admitted, that some contain sentiments at variance with the Truth as held and believed in by the Society of Friends, particularly in reference to the resurrection of the body, &c., and in offering an occasional selection for publication, it is by no means meant to endorse the whole. The Poems entitled *The Old Words, The White Lament, Flora Novissima, The Seen and the Unseen*, all of which have appeared in "The Friend," are of the embracing true Christian sentiments, and

thought to be free from anything that is objectionable, to which may be added—

THE LITTLE FLOCK!

A little flock! so calls He thee,
Who taught thee with his blood;
A little flock—discerned of men,
But owned and loved of God.

A little flock! so calls He thee:
Church of the first born; hear!
Be not ashamed to own the name;
It is no name of fear.

Not many rich or noble called,
Not many great or wise;
Thou who God makes his kings and priests,
Are poor in human eyes.

Church of the everlasting God,
The Father's gracious choice,
Amid the voices of this earth,
How feeble is thy voice.

Thy words amid the words of earth,
How noiseless and how low;
Amid the hurrying crowds of time,
Thy steps, how calm and slow.

But, mid the wrinkled brows of earth
Thy brow, how free from care!
Mid the flushed cheeks of riot here,
Thy cheek, how pale and fair!

Amid the restless eyes of earth,
How steadfast is thine eye,
Fixed on the silent loveliness
Of the far eastern sky.

A little flock! 'tis well! 'tis well!
Such be her lot and name,
Through ages past, it has been so,
And now, 'tis still the same.

But the chief Shepherd comes at length,
Her feeble days are o'er,
No more a handful in the earth,
A little flock no more.

No more, a lily among thorns!
Weary and faint and few,
But countless as the stars of Heaven,
Or as the early dew.

Then entering the eternal halls,
In robes of victory,
That mighty multitude shall keep,
The joyous jubilee.

Unfading palms they bear aloft,
Unfading songs they sing;
Unending festival they keep
In presence of the King.

For "The Friend."

Selections from a short narrative left in manuscript by Christopher Wynn, and endorsed and recommended by the Quarterly Meeting of Kendal, England: "I was born in the year 1855, and educated in the way of the church of England (so-called), and was according to my power and capacity, a diligent observer of its doctrine and worship, until I found a longing of soul for other food, although I knew not where to find it. I remember, in my young days, something at work in me, reproving for sin and transgression, teaching and leading in the just man's path. The Lord was near at hand and I knew him not, so that I often transgressed afresh, and fear seized me, inasmuch that I often petitioned the Lord that *he would in mercy deliver me from the quaking worm, and fire unquenchable.* It was usual with me to repeat the Lord's prayer when I lay down in bed, and often reproved myself if I suffered other thoughts to intervene when repeating it, desiring to do my best to please God. After a time, by the direction of Divine providence, at a meeting of the people called Quakers held at Brigflats, it was put into the heart of

that worthy messenger and man of *Power Haydock*, to define *who had a right call God Father, and who had not*; by which doctrine my understanding was opened my heart enlarged to consider Friends' epistles, which I perceived *gradually* fitter for receiving the grace and Spirit of God the revelation of his Son in me. Then came more sensible of a cross I was to bear which, when I went from under, I was laden with great fear and horror; so that I then saw the bearing thereof was the to the kingdom of God, and the use of plain language was none of the least. * Being convinced, and *in measure converted* had desires to become more and more Lord's holy temple, which called for sincerity, and in measure purity, as the truth Jesus. I was willing in degree, to imitate Zaccheus, by restoring what I had wronged of, whether by gaining or otherwise; first of which I was addicted to in my youth. The sentence passed on me and I obeyed obtained peace.

About the year 1683, being watchful of my own spirit, and faithful to the Lord; quiring, I grew in favor with him, and was diligently in meetings for his Divine power it was given me to believe I should ere I have a public testimony to bear for him, when the day came a terrible one it was; word of the Lord burned in me like a saying, *this is the day, neglect it not*; so that was willing to speak a few words, and it became my chief care ever since, to minister the ability that God gives; beginning with the oil, and ending when it stayed; which know by manifold experience is the only way to please God and profit his people. In year 1686, having some inclination to marry I had one in view, but consulting Him v answers from between the cherubim, from the mercy seat, as I always did on matter-moment, he was pleased to give me a view one at the time many miles distant, which afterwards gave me, a suitable helpmate a companion to this day." * * * After relating how the Lord was with him and bless him both in temporals and also some particulars in ministry, he concludes: "It likew remains with me to signify what the Lord put in my heart by way of prophecy, at general meeting at Grayrigg viz: *I will be the cedars, I will humble the heathen and enlarge Israel's borders*, and fervent prayer continues upon my mind for the young generation amongst Friends, that the Lord would be pleased to prepare them against that day. I also entreat that our elders, in their Particular and Monthly Meetings, would wait in a godly care and zealous discipline over them, that they may live and act agreeable to a Christian conversation, for unless the *hidden things of Esau and Achan be destroyed* as well as discovered, the Israel of God either journey forward, nor stand before their enemies. I am fully of the mind that whenever it may please God to redeem and recover his church out of her present languishing condition, discipline must be stretched over transgressors, judgment laid to rule and righteousness to the balance."

S. C.

Millville, N. Y., 2d mo. 9th, 1857.
P. S. The Quarterly Meeting testimony of C. W. says: "In the ministry he labored fervently and faithfully, being suitably qualified for the same; and in testimony would

ently speak of the Lord's gracious dealings with his people, exhorting Friends to a readiness of mind to serve him faithfully; and even travelled in pain that Christ might be formed in all. He was powerful in prayer, and in supplication often favored with nearness to Divine goodness. His great care and concern for the welfare of Zion, fully manifested his sincere love to truth, and the brethren. * * * Much concerned that a dilly and zealous discipline should be maintained, so that judgment might be placed on every transgressor, and the church be made clean; and although he dealt plainly with backsliders, yet in a truly christian spirit, entreated with such meekness and loving tenderness as generally had a good effect, being duly cautious of hardening or irritating any. He was full of love, and meek expression to the babes in Christ," &c.

Alas! in how many places has not only doctrine, but discipline and our ancient testimonies been laid aside. The men and women's betings no longer separate as originally set by the Lord and formerly so useful to prevent improper marriages, and the care of the poor and the church, separately considered, without unduly making too much publicity of things which might be checked in the bud by the mothers in Israel arise to maintain at right, which was not obtained but through hard travail, and was greatly resisted at first; and may the fathers in the truth be enabled to realize the danger of these unhallowed doctrines.

For "The Friend."

Random Notes of Travel in Europe.

(Continued from page 212.)

New Castle detained us for but a few hours. lay under a perpetual cloud of smoke, and consequently a dingy and melancholy looking place. It has some magnificence at streets however, which present rather a cheerful appearance, if any thing can do so under such a cheerless sky. New Castle has rejoiced in no less than three names, having been the Pons Ælii of the Romans, the Monchetetta of Medieval days, from its very numerous Monkish establishments, and deriving its modern name from a castle, built by a son of William the Conqueror. Its last cognomen has become inappropriate as those it formerly bore, like the castle of Robert Courthoise is now venerable ruin, and its donjon (dungeon) sep, alone remains to frown amidst the surrounding gloom. We caught glimpses of bleak looking and extremely narrow streets in its neighborhood, with small houses leaning against, or built on portions of the wall merely enclosing the city. Robert Stephenson's new iron bridge, which carries the railroad across the Tyne, is a wonderful piece of engineering. The remains of the great wall, built by the Roman Emperor Severus, entirely cross England from the Tyne to the Solway, on 200 years after Christ, attracts our attention upon the heights on both sides of a low way cutting, through which we passed, in style no Roman imagined could ever be possible. Great pits have been sunk near its termination, and Walls-End coals are the most esteemed of all coals furnished to the London market.

But Scotland lay before us! and we were about to cross the Border. As we approached we entered upon a region of low, rounded hills, covered to their summits by short grass;

fence, wall nor tree, was no where to be seen: small rivulets wound through the grass of the tiny valleys, marking their paths by a greener margin. These are the Cheviot hills. Now, I was very desirous to know the exact point at which we should leave one kingdom, and enter upon the other; therefore it was with great pleasure I hailed the advent of a cheerful-looking, elderly Scotchman, whose grey eyes evidently allowed very little to escape them. Could he give us the required information, inquired. "Yes, sir! I ken the spot vera weel," he replied. "Is this the place?" I asked, pointing to the probable locality. "Na, na," was the answer; "wait awhile, it is o'er yonder. Ye'll ken it soon. Now, now, my liddy, do ye see the wee bit wall? Now ye're in Scotland;" and our train glided rapidly past the few small hand-marks which our friend pointed out, and we were veritably in the "land of the heather." Did we see any difference in the appearance of things? Not yet! For some miles further the sheep walks continued, with their Colorado-like, unvarying uniformity. Very few sheep were seen in the wide expanse, but many reminders of them in the curious little round pens, where salt was given them, and whose low walls could afford them but small protection at any time. We emerged at length from this great tract of meadow and moorland. Scotch villages now began to appear, with long rows of low, one-story houses, white-washed and neat looking, many of them covered by climbing roses, and surrounded by flowers. The country grew more and more beautiful. Station after station was passed, when suddenly the conductor called out "Melrose!" A few passengers emerged from the carriages, and we wended our way to an inn. I kept my eyes resolutely before me, not being prepared to see the Abbey as yet, though I knew it was not distant, for when did ever landscape, ruin, mountain or city, appear well under a noon-day sun! Before dining, or resting, we inquired respecting the hours of admittance at Abbotsford which is not far from Melrose, and learned that we could not see it until the latter part of the week. We could not wait here three days, even to see Sir Walter's home, but afterwards heard that had we gone on, we would probably have been admitted, as Americans. The great distance they travel to see these places, is taken into consideration.—and extra shillings often work wonders, as all travellers soon learn.

The disappointment was softened by remembering that we had still the Tweed to see, and the Eldon hills, and the Abbey. So after a long and much needed rest, and dinner—for, as one of our fellow-travellers observed, dinners cannot be ignored, though among the finest scenery of Europe—we proceeded to the latter. After a short delay, we were admitted. The doors were unlocked by a young girl who acted as guide, and was well qualified for her office by her unvarying watchfulness over us and others, lest anything should be carried away. Her mother sat knitting by the gateway, under a tree which shaded her from the afternoon sun. What peaceful, quiet lives some of these custodians appear to lead within the precincts of old Monastic walls! We found the grass of the same soft, exquisite green, as at Fountains. One felt as though treading upon velvet, and that nature, like Sir Walter Raleigh, had spread her costliest mantle "to keep our foot-soles clean." Unlike

Fountains, Melrose has nothing massive in its proportions, but has rather an air of graceful lightness, blended with stability. It has been said that "There is no end to the charms of Gothic architecture," because it admits of such great variety. Within and without, Melrose is wonderfully ornate, with a profusion of flying buttresses and mouldings, each carved with elaborate designs, often very fanciful and quaint. The minuteness and delicacy of this carving, after the lapse of so many centuries, is really wonderful. The remains of the cloisters, with their carved porticoes, where the old monks used to walk for exercise, contain some of the most elaborate specimens. With consummate taste these early sculptors had taken for models the flowers growing in the fields and gardens around them. There was the Scotch thistle interwoven with the curly hail, or cabbage, trefoil and other leaves peculiar to the district. The exactness of Scott's descriptions must be an apology for their frequent quotation.

"Spreading herbs and flow'rs bright,
Glittered with the dew of night;
Nor herb, nor flow'ret glisten'd there,
But was carved in the cloister arches fair."
And "The keystone that locked each ribbed aisle,"
Was a fleur-de-lis, or a quatre-feuille;
The corbels were carved grotesque and grim;
And the pillars, with clustered shafts so trim,
With base, and with capital flourished around,
Seemed hundred of lances which garlands had bound."

The quatre-feuille is an ornament formed by the union of four leaves; the fleur-de-lis or iris, seems to point to some French sculptor; the corbels are projections from which the arches spring; and the gargoyles or water spouts, which conduct the water from the gutters beneath the eaves, are carved with fiendish, passionate faces, very goblin-like and grotesque. On the exterior of the abbey, flying figures, kindred to the above, represent evil spirits driven away from the sacred place by the holy hymns and worship within—literally, Satan put to flight.

A heap of stones, near the centre of the building, from which the whole interior could be seen, was pointed out as Sir Walter's favorite seat. Here he would come and sit for hours; it is said; no doubt he often did; for Abbotsford is but a few miles distant. As often, perhaps, has he "restored" mentally, the Abbey to its original splendor; filled the windows with their old stained glass; and the passages with solemn processions of monks with their abbot at their head; placed the stately crucifix above the altar, and hung the walls with feudal banners. Scott's favorite seat is so well known, that the mistake made by Hannah More could not well be here enacted. She records that she went to make a call on Dr. Johnson, but finding that he was not at home, seated herself in his favorite chair, that she might catch a ray of his genius. On informing him of the fact soon after, she was told by the learned Doctor, that it was a chair he never used!

Where the high altar had stood was a space free from grass, from which protruded a small head-board bearing the inscription, "The Heart of Bruce!" Could it indeed be the Bruce of "Bannockburn," and then I suddenly recollected that it had been buried here. In obedience to his last request, his heart was embalmed and delivered to the "Black Douglas," the "good Sir James," to be taken to Jerusalem and laid at rest in the

Holy Sepulchre. But this faithful friend was killed in battle against the Moors, in Spain, and the revered relic, together with the remains of the bearer, were brought back to Scotland and placed in Melrose. At a short distance from the wall on the left side, near the first board, was another, on which was inscribed, "The Black Douglas," so that "in death they were not divided." The Black Douglas—a name once so dreaded by English mothers that they stilled their children with its sound. Few names are so interwoven in the history of Scotland as that of this powerful house. Ever foremost in the council, and foremost in the fray; ambitious and turbulent; song and story have conspired to do them honor. Their historian says, "Archeology has failed to discover the origin of this noble house. We do not know them in the fountain, but in the stream; not in the root but in the stem; for we know not who was the first man, that did by his virtue raise himself above the vulgar." The virtues, for some no doubt there were, that prompted many of the deeds of true chivalry, shine on more beautifully in the character of their descendants who have been led by more peaceful ways. By the bedside of the great Bruce, when bequeathing his heart to the Black Douglas, stood two of the lords of Logan, from one of whom it is believed, descended James Logan, the colonial statesman, secretary, chief justice, and president of the council and government of Pennsylvania; the intelligent, the honorable, and the steadfast friend and upholder of the fortunes of William Penn in the hour of adversity.

In this connection the following may not be deemed an inappropriate addition.

Some time after our visit to Melrose we met with a party, who told us, that while dining at the Abbey Inn, which adjoins the ruin, a very tall, dark looking man took his seat at the table with them. The conversation turning naturally on the recent explorations within the neighboring walls, the stranger remarked, that it might interest them to know that he was himself a lineal descendant of the Black Douglas. I do not remember whether he told them he bore the same name. He seemed very pleasant and unobtrusive, with nothing about him worthy of remark except his extremely dark complexion, and his lowering form.

A flat stone, covered with green lichen, and broken in the middle, was marked with the name (on a small board) of "The famous wizard, Michael Scott."

This reputed magician, was in reality a learned Scotchman of the 13th century, who was probably educated at some foreign University. On account of his reputation for abstruse learning, he was looked upon as a conjurer, in accordance with the superstition of his day. Dante introduces him into the Inferno, and other Italian authors. On a small tablet in the wall, was a brief and touching epitaph, "Here lieth the race of the house of Zair." Naturally arose the thought

"Once in the flight of ages past, there lived a man, and who was he?
Mortal, where'er thy lot be cast, that man resembled thee."

The graveyard outside the Abbey is filled with curious, mouldering tablets, one of which is very sad and quaint.

"The earth walks on the earth, glittering with gold,
The earth goes to the earth, sooner than it wold,
The earth builds on the earth, castles and towers,
The earth says to the earth, 'All shall be ours!'"

A plain marble slab, marks the grave of Scott's faithful friend and serving man, Tom Purdie. After his loss of fortune, 8-ott re-remarked, "Poor Tom Purdie, such news will wring his heart, and many a poor fellow besides, to whom my prosperity was daily bread." He had lived so long and so intimately with his master, that he used to speak of "our trees," and also of "our bakes."

"Pull down the nest and the rooks will fly away of themselves." was a common saying at the time of the Reformation. So Melrose, which dates back to the Culdees, the earliest missionaries in Scotland, fared as other monastic institutions, and became a stone quarry for the neighborhood. Its beautiful carved stones were taken to repair bridges, or for any other common purpose, and now, men mourn over the destruction of that which nothing can restore.

For "The Friend."

Attending Places of Diversion.

In these days when it must be admitted that the love of diversion and pastime is great; when, to a fearful extent, "Amusement reigns man's great demand," it would be well for all, and especially for members of a religious society maintaining the standard we do, seriously to consider the responsibility of their existence, and to look about them and see whether the effect of their example, as respects the mode of employing their leisure and means, is such as accords with the precious price of a Saviour's death! who died for all, that they which live should not henceforth *live unto themselves*, but *unto Him* who died for them and rose again." Whether our lives, our conversation and influence are of the character to receive the approbation of that omniscient Holy One who is emphatically "a God of knowledge," and who has declared, "Whatsoever a man soweth, that shall he also reap."

We apprehend, and not without thoughtful consideration, that perhaps in every public recreation or auction for pleasure, the evil overbalances the good; or that the aggregate consequences are more injurious than helpful to the morals of those who attend them, and thus tend the motive to their encouragement. The first to be amused, the wish to shine, the desire to palliate dullness, "the lust of the flesh, the lust of the eye, and the pride of life," which are of the world, are dispositions incompatible with godliness, and which it were far wiser to thwart than to encourage. "If thou wouldst conquer thy weakness," says W. Penn, "thou must never gratify it." Then if the love of novelty and amusement be our idol, or be the weakness by which our great enemy besets us, let us endeavor to say, "Get thee behind me, Satan," by abstaining in the true principle of self-denial, from all those resorts, be they what they may and under whatever name, of vain and needless self-gratification, if not of mis-leading corrupting pleasures, which so tend to pile up a fearful accountability at that tribunal of solemn retribution which to each one of us fast maketh haste.

A Christian poet has written:

"No blinder bigot, I maintain it still,
Than he who must have pleasure, come what will."

Then how should we guard against getting into the insidious current! How wise a noble to turn from the corrupted and corrupting pleasures of life's polluted stream, and resist, not only for our own sakes, but for the sake of our example and influence over others the love of, as well as attendance at all places of sensual diversion, especially when they come in such a shape as our better judgment itself would disapprove, and all our best and true friends advise against.

The subjoined is extracted from "Philadelphia Yearly Meeting's Adverses," and commended to the attentive perusal and serious consideration of all to whom these may come, who are in danger of being captivated by the short-lived and delusive entertainment and pastimes of this vain and deceitful world.

GAMING AND DIVERSIONS.

"As our time passes swiftly away, and of delight ought to be in the law of the Lord, is advised that a watchful care be exercised over our youth and others in membership, prevent their going to stage-plays, horse-races, music, dancing, or any such vain sport and pastimes.

All parents and heads of families are exhorted to seek to be ended with the clothing of the Holy Spirit, that they may, at suitable seasons, be enabled to raise in the minds of the youth and those under their direction, a sense of the inexpressible comfort and delight which attends the exercise of true religion and virtue; thus they will see that the sports and diversions which are used to obtain which is falsely called pleasure, are the invention of degenerate and corrupt minds, who, being ignorant of that solid satisfaction of soul which is of an enduring nature, vainly attempt to supply the want of it by those pleasures which end in anxiety and sorrow.

Among the striking characteristics of the present day, are the instability and love of excitement which pervade the minds of the people. Many, even among the professors of religion, seem to be "lovers of pleasure, more than lovers of God," looking abroad for sources of gratification, and eagerly pursuing anticipated pleasures instead of endeavoring to secure from the present hour as it passes, *those tranquil enjoyments which are the fruit of well-doing*, and to cultivate that retirement antipathetic to the world, in which we may profitably commune with our own heart and be still. One of the effects of this state of our settlement is the great increase of public amusements and pastimes, which has latterly become so obvious; for, as "the eye is never satisfied with seeing, nor the ear with hearing," so when the mind is let out with gratification in these vanities, *the desire for them increases with the indulgence*; and it constantly requiring new objects to please the senses, and to fill the aching void which the leave behind them. Often, after having run the giddy round, in the vain pursuit of pleasure there is a secret sense of bitter disappointment, and a consciousness that these empty trifles cannot satisfy the longings of an immortal mind, designed for nobler and purer enjoyments.

We apprehend, that many of the lectures and readings, with other kindred exhibition are of latter time so mixed up with improper associations, that parents and others have need to be on their guard, lest in going themselves, or allowing their children to attend

ey should be promoting a dissipation of mind, and an exposure to hurtful influences, the consequences of which may be lastingly and unobviously felt. To say nothing of the more objectionable kinds of diversion, it is often the case that pastimes and shows, which seem at first view to be of a more innocent character, when they are strictly inquired into, are found to be attended with accompaniments which are such as a Christian ought to countenance; and we believe there is at the present time particularly, great need for all to be studiously watchful, how they give way to the solicitation to attend on such occasions, lest they walk our religious profession, encourage our things, and thereby wound and weaken their own minds."

The Perils of the Fishermen.—One never gets the scene, if in crossing from Europe one of the great line steamers, he takes his station forward some foggy night on the banks of Newfoundland, feeling the gigantic seas on which he stands quiver as it foams and wrestles with the waves, while all around walls of mist seem to shut out the world, and suddenly the faint stroke of a dull bell comes upon his ear, then a small light in a gloom of mist dances fitfully under the lee bow, and in an instant almost he looks down from lofty height on a little sloop or schooner with tremendous pitches on the waves, like a couple of faces under soot/wester hats set up in the light from the steamer's port, as the great black mass shoots above him, staying off death by a spoke of the wheel. How many of these fishermen's cockle shells, that ride the waves in the midst of the dautic by a hempen cable, have been struck swept down under great ships, making free a quiver from stem to stern, can never know, but certainly many. How many are fouled each other by the parting of waves in some terrific storm, and crushed, like other's sides like egg shells, is equally conjecturable; but out of almost every boat that sails from Gloucester or the towing Cape Cod, some never return by the qualities of even the most favorable season. Agate there are storms as that of December, when waves are torn bodily off by the force of the wind, burying the little barks in an avalanche of water, under which they are rolled like chips, and all that is known of their fate is, that after months of heart-sickening they do not come home. There have in disasters greater than that of last year, but twenty-eight vessels and two hundred and twenty-one lives will cause many an empty cupboard and desolate hearth-stone on windy coast of Cape Ann and Cape Cod, and such a perilous livelihood as this, it is wonder that the suits of solemn black are common wear in Gloucester, and that the pious and fatherless number more than half the population. In the pathetic language of the old Scotch song, the fisher wives will think it's not the fish they are missing, but the lives of the men. The heroic courage of these men, who take more than risks of a battle for a bare subsistence, and generations ago celebrated in the glowing language of Burke, and that it still conveys is a proof of the undegeneracy of New England blood.—*Providence Journal.*

Self-Denial.—When Agassiz visited Oken, the great German naturalist, the latter showed

to the younger student his laboratory, his cabinet, his magnificent library, and all his varied and costly scientific apparatus. At length the dinner hour approached. Oken said to Agassiz, "Sir, to gather and maintain what you have seen uses up my income. To accomplish this I have to economize in my style of living. Three times in the week we have meat on the table. On the other days we dine on potatoes and salt. I regret that your visit has fallen on potato day. And so the naturalists, with the students of Oken, dined on potatoes and salt.

In the charming biography of Mr. Ticknor one meets many similar instances in his intercourse with the scholars of Germany. He found men of world-wide fame living with the utmost frugality that they might devote time and means to scientific research.

This is self-denial; it is denying the lower self for the sake of a higher. And can any one fail to honor and reverence it?

And what is Christian self-denial? It is denying a lower self for the sake of the highest impulse man is capable of, love to man, love to Christ.

Do not the times call us to this? On every hand there is suffering; and yet there is ample means. If the people of God were willing to do for the sake of Christ and his cause, the very thing that Oken did for the sake of science, would there be any lack.—*National Baptist.*

THE FRIEND.

THIRD MONTH 3, 1877.

We have no doubt that many of our members who are not themselves consistent in the support of the doctrines and testimonies of Friends, are yet fully convinced of their scriptural soundness, and their accordance with the requisitions of the Holy Spirit in the heart, and are often desirous that they should extend and prevail on the earth. Though sensible that their own hearts have not been sufficiently yielded to the transforming operations of Divine Grace, they still continue to shrink, as one requisition after another is presented to them, from its accompanying humiliations, and from that denial of self which they well know is inseparable from a life of true dedication to the Master's service; and thus they go on, halting as it were between two opinions, missing of that strength which would be vouchsafed to them in the path of obedience, while the church is deprived of those services to which they would have been called had they given up more fully to the Divine requisitions.

This class we fear is a large one, including some who having resisted the precious visitations of the Holy Spirit in early youth, have advanced to middle or more mature life, in a state of greater or less insensibility and without apparently knowing what it is that has dwarfed their spiritual growth, though remaining outwardly moral, and in many respects exemplary members of the community. These are at times conscious that they are not lively possessors of that which they profess, and feel but little of that enjoyment of heavenly things which is the portion of the humble, faithful and exercised followers of Christ. This class of our fellow members has, we believe, often been the object of the

sympathy and solicitude of faithful brethren, who have labored to encourage them to that deep inward attention to and co-operation with the measure of Divine grace individually received, which while it would first bring them into suffering on account of their lukewarm or lapsed condition, would eventually, as the necessary baptisms were submitted to, strengthen, establish and settle them in the unchangeable Truth.

Greatly does it conduce to the welfare of individuals early to yield to the requirements of the Holy Spirit, and to adopt that course of life, which openly manifests them to be opposed to the spirit of the world, thus acknowledging the distinction which religion does make between her followers and the votaries of fashion. It is cordial to believe that there are not a few among the rising generation, in different places, who are willing thus to show that they are desirous of walking in the footsteps of our worthy predecessors, and by their outward garb, language and demeanor, are not ashamed to be known as Quakers before the world. These will meet with discouragements from within, as well from without the limits of our Religious Society, and to such the following advice of William Penn may be seasonable at the present time, and helpful amid various trials to which they may be exposed:

"And you, young convinced ones, be you treated and exhorted to diligent and chaste waiting upon God in the way of his blessed manifestation and appearance of himself to you. Look not out but within; let not another's liberty be your snare; neither act by imitation, but sense and feeling of God's power in yourselves: crush not the tender budgings of it in your souls, nor over-run in your desires and your warmth of affections the holy and gentle motions of it. Remember it is a still voice that speaks to us in this day, and that it is not to be heard in the noises and hurries of the mind, but is distinctly understood in a retired frame. Jesus loved and chose out solitudes, often going to mountains, to gardens, and sea-sides, to avoid crowds and hurries, to show his disciples it was good to be solitary and sit loose to the world. Two enemies lie near your state, Imagination and Liberty; but the plain, practical, living, holy truth, that has convinced you will preserve you, if you mind it in yourselves, and bring all thoughts, imaginations, and affections to the test of it, to see if they are wrought in God, or of the enemy, or your own selves: so will a true taste, discerning, and judgment be preserved to you, of what you should do and leave undone: and in your diligence and faithfulness in this way you will come to inherit substance, and Christ, the eternal wisdom, will fill your treasury. And when you are converted, as well as convinced, then confirm your brethren, and be ready to every good word and work that the Lord shall call you to, that you may be to his praise who has chosen you to be partakers with the saints in light of a kingdom that cannot be shaken, an inheritance incorruptible, in eternal habitations."

We have received "Old John," but as no name accompanies it, to vouch for its truth, and some of the language employed appears to us extravagant, we feel doubtful of the propriety of admitting it into our columns. Our

rules require the name of the person furnishing an article to accompany it.

SUMMARY OF EVENTS.

FOREIGN.—London dispatches of the 20th report a violent gale and boisterous weather on the south and west coasts of England, the previous night, attended by much rain and squalls.

The rinderpest has appeared in parts of England where it cannot be traced to contact with infected cattle.

France's sugar refinery, England, has been obliged to close in consequence of the scarcity of raw sugar and the influence of the French bounty system. About 200 persons are out of employment.

The agricultural returns of Great Britain for 1876. Lately published, show a cultivated area of 47,393,000 acres, exclusive of heath and mountain pasture land, and of woods and plantations. The acreage under wheat last year was 11 per cent. less than in 1875, and 22 per cent. less than in 1869; that under oats showed an increase, while the potato crop has much decreased from fear of disease. The acreage under artificial grasses is the highest yet recorded—4,540,000 acres.

A statement is published in London that a league has been formed by Fitzjames for the purpose of agitating in favor of the disestablishment of the English Church. The Anglo-American Cable Company gives notice that the tariff for messages transmitted over its line will be reduced to one shilling sterling, per word.

The number of vessels of war of all the maritime nations, amounted in 1876, according to some official statistics lately published in Germany, to 2039, of which 200 were ironclads. The armament comprised 280,000 men and 15,000 guns; 110 war vessels, including 95 iron-clads, were in course of construction.

During the year 1876, eighteen vessels and the lives of 498 persons were saved by the English Life Saving Institution.

The French Government asks for an appropriation of \$10,400,000 for public instruction in 1877. For 1877 there was appropriated \$9,800,000, and for 1876, \$7,800,000.

It is stated that the Spanish Ministry intend to recommend the king to proclaim general amnesty.

A royal decree is published at Madrid permitting the citizens of California to be prosecuted unless they offend against the common law.

The Emperor of Germany, in his speech at the opening of the German Parliament, adverts to the depressed condition of commerce and industry, and also the deficiency in the public revenue. He proposes that the States should be met by raising the contributions payable by the several States. The Emperor expresses the opinion that the peace of Europe will not be broken.

Italy has refused Germany's demand for the extradition of Archbishop Lelouchowski.

The peace negotiations between Turkey, Servia and Montenegro are progressing favorably. A dispatch from Constantinople says: Upon the conclusion of peace Turkey is ready to disarm, provided that Russia does the same.

The Montenegrin Envoys have embarked at Cattaro for Constantinople.

Prince Mind Vizer has sent an anagraph letter to Prince Milan, expressing a firm hope that the relations of Servia and Turkey will be amicable.

Belgrade dispatches say, at the recent elections for members of the Legislature the great majority of the members chosen favor peace. It was not supposed that more than thirty of the 400 elected desired the continuance of war.

An agreement between the Porte and the Servian Envoys was concluded on the 24th ult. Prince Milan will address a letter to the Sultan, accepting the Turkish conditions, excepting those claiming equality for the Jews in Servia and the right of the Porte to be diplomatically represented at Belgrade. The Sultan will grant Prince Milan a new firm, declaring the future relations of Servia and Turkey.

Mexican advices to 21 mo. 11th, state that General Diaz arrived there that day amid great rejoicing. At the same time for members of Congress the most outrageous frauds were perpetrated in some places. The partisans of Diaz formed themselves into a sort of Returning Board, and in some instances counted more votes for their candidates than there were electors. The Church party is booming up and Diaz is said to be leaning toward it. The *Voz de Mexico*, the organ of the Catholic party, denounces the embezzlement recently committed on Protestants in different parts of the country. Diaz proposes issuing a manifesto calling on Liberals of all shades to support him.

Russia asserts that there is no wish on her part to commence war with Turkey, and that a conflict may eventually be avoided if Turkey can be induced to make a bona fide attempt at reform, and appoint some Christian governors of provinces.

UNITED STATES.—The counting of the Electoral vote has been delayed by the objections raised in several instances. When it was decided that Louisiana must be counted for Hayes and Wheeler, the votes of Maine, Massachusetts, Michigan, Minnesota, Nebraska, Nevada, New Hampshire and Ohio for the same candidates passed unchallenged, as did also those of Maryland, Mississippi, Missouri, New Jersey, New York and North Carolina, for Tilden and Hendricks. When Oregon was reached objections were offered to one of the electors, and the case given to the Electoral Commission, which decided as follows: In contested cases, by a vote of eight to seven, that all three of the Oregon votes must be counted for Hayes and Wheeler. This conclusion seems to render their election almost inevitable. On the 24th ult. the decision was communicated to Congress, and the vote of Oregon was counted accordingly. When Pennsylvania was reached objection was made to one of the electors, and the Senate retired and unanimously decided that the vote objected to should be received, but the House, without acting in the case, took a recess until the 26th ult. On that day the vote of Pennsylvania and Rhode Island were counted for Hayes, but when South Carolina was reached objections were offered and the case had to go to the Electoral Commission.

The interments in Philadelphia for the week ending the 24th ult. numbered 292.

At the municipal election in this city on the 26th ult. 126,692 votes were polled, of which Stokley the Republican candidate for mayor received 67,779, and Cavin, Democrat and Reform, 61,913. The R-publicans elected a large majority of the members of Select and Common Council.

The average number of cars containing oil that passed over the Philadelphia and Reading Railroad last month was 100 per day, or \$500 a day. The number of barrels was 175,000, and gallon 7,000,000. The quantity exceeded those of any previous month in quantity.

At half past twelve on the night of the 24th ult, a fire broke out in Fox's American Theatre, on Chestnut St., where Tenth, which resulted in the total destruction of the theatre, and the burning of the Mercantile Library and several of the surrounding properties. Fire Marshal Thompson and two members of the Insurance Patrol, were severely injured. The loss on the theatre is estimated at \$110,000, of which \$20,000 is covered by insurance. In the Mercantile Library, \$20,000 worth of books were damaged or destroyed, loss \$100,000 to \$145,000. The damage is covered by insurance. Several other buildings in the vicinity were more or less damaged, the heaviest loss falling on the establishment of W. D. Rodgers, carriage builder.

The number of children in New York State of proper age to attend school, is reported by the State Superintendent to be 1,285,001, of whom 1,067,199 attend the public schools. Many attend other schools, and a considerable number were not receiving any instruction last year.

The Markets, &c.—The following were the quotations on the 26th ult. *Philadelphia*.—American gold, 105. U. States sixes, 188, 111 1/2; do. 1868, 114; do. 5 per cents, 109 1/4; per cent. 100. Flour—No. 1, \$10.25, etc. for uplands and New Orleans. Flour 5's \$10.25 per barrel. Pennsylvania red wheat, \$1.50 a \$1.55; amber, \$1.57 a \$1.60; white, \$1.60. Rye, 75 a 80 cts. Yellow corn, 56 cts.; oats, \$1.41 cts. New York clover, good, 14 a 15 cts.; choice, 15 a 16 cts. Sales of 3900 bushels of wheat at 67 a 69 cts. per bushel; 55 a 6 cts. for fair to good, and 1 a 5 cts. for medium. Sheep, 4 a 6 cts. per 100 lbs. Receipts 11,000 head. Hogs, \$7.75 a \$9.50 per 100 lb. net. Receipts 4100 head. *New York*.—Superfine flour, \$5.45 a \$5.90; No. 1, \$5.20 a \$6.10; finer brands, \$6.50 a \$11.00. Red winter wheat, \$1.50; do. 2, Chicago spring, \$1.41; No. 3 do., \$1.35. State rye, 80 cts. Yellow upland old mixed corn, 59 a 60 cts., 54 a 55 cts. *Chicago*.—Spring extra flour, \$5.50 a \$7.50. No. 2 spring wheat, \$1.25; No. 3 do., \$1.14. Corn, 40 cts. Oats, 32 1/2 cts. Barley, 63 cts. *Baltimore*.—No. 2 western winter wheat, \$1.51. No. 3 do., Chicago spring, \$1.42; Pennsylvania spring, \$1.40 a \$1.40. Yellow corn, 51 a 55 cts. *St. Louis*.—No. 2 red fall wheat, \$1.41; No. 3 do., \$1.40. Corn, 37 1/2 cts. Oats, 31 cts. Rye, 69.50 per 100 lbs. *Milwaukee*.—No. 1 spring wheat, \$1.42; No. 2 do., \$1.32; No. 3 do., \$1.32. No. 2 do. 40 cts.; new, 38 cts. Oats, 31 1/2 cts. Rye, 66 cts. Barley, 62 cts. *Lard*, 97 cts.

CORRECTION.—In the third column, on page 2 of the present issue, 15th line from top of page error should be pursuing.

WANTED.

A competent middle aged Friend as Matron, in Shelter for Colored Orphans. Apply to

Elizabeth C. Lowry, 1114 Pine St.
Mary Randolph, 247 North Twelfth;

WEST-TOWN BOARDING SCHOOL.

WANTED, a TEACHER to take charge of the "S. ROOM" at the above Institution; one qualified to instruct in all the branches taught in the G. DEPARTMENT.

Application may be made to

Rebecca S. Allen, 335 South Fifth St., Philadelphia
Deborah Rhodes, Haddonfield, New Jersey
or Martha D. Allen, 628 Pine St., Philadelphia

WEST-TOWN BOARDING SCHOOL.

THE SUMMER SESSION opens on *Second-day* the 6th of Fourth month. Parents and others interested in pupils, will please make early application to BENJ. W. PASSMORE, SUPT., (address Street Road P. Chester Co., Pa.), or to CHARLES J. ALLEN, Treas. 304 Arch St., Philadelphia.

WANTED.

A Friend to teach London Britain Prepares Meeting School. Apply to ABEL J. HOPKINS, Thompson P. O., Newcastle Co., Da.

FRIENDS' SELECT SCHOOLS.

A suitably qualified Friend is wanted as Principal of the Boys' Select School, at the opening of the term the Ninth month. Application may be made to Joseph S. Etkinton, 331 South Fifth St. Edward Mars, 127 South Fifth St. James Smedley, 415 Market St. George J. Scattergood, 413 Spruce St.

FRIENDS' ASYLUM FOR THE INSANE Near Frankford, (Twenty-third Ward,) Philadelphia Physician and Superintendent—JOSHUA H. WORTHINGTON, M. D.

Application for the Admission of Patients may be made to the Superintendent, or to any of the Board Managers.

MARRIED, at Friends' Meeting-house, on Sixth 10th month 3d, 1876, THOMAS SCATTERGOOD, Jr. PHIEBE ANNA, daughter of William and Mary Kinsey, all of this city.

—, at Friends' Meeting-house, Frankford, Philadelphia, 21st month 15th, 1877, ALBERT WEBSTER ANNA S., daughter of Sarah H., and the late Will R. DRITON.

DIED, in Philadelphia, the 18th of 12th mo. 18 MARY H., wife of Samuel Woolman, in the 50th y of her age, a member of Wilmington Monthly Meet of Friends. During her short illness she seemed timely resigned to the Divine will, and her family & Friends have the consoling belief that she is gone into everlasting rest.

—, 14 mo. 11th, 1877, GEORGE M. ALSON, in 66th year of his age, a member of Philadelphia Monthly Meeting.

—, at his residence in Plymouth, N. Y., on the 14th of 1st mo, 1877, ALEXANDER KNOWLES, in the 74th year of his age, a member of Suynra Monthly Meet N. York. He was a firm believer in the ancient doctrines and testimonies of the Society, and his dress, duct and conversation were consistent therewith. He was much tried with the alterations of discipline which have been made in this Yearly Meeting several years past. He had suffered great affliction and weakness for some years, which he bore with much patient saying, he "had never one trial too many" and friends have the consoling hope that through abundant mercy he has entered into rest.

—, on the 19th of 2d mo. 1877, at the residence of her father, near Flushing, OHIO MARY, daughter of Daniel and the late Martha S. Williams, in the 37 year of her age, a member of Flushing Monthly Meeting Friends, Ohio.

WILLIAM H. PILE, PRINTER,

No. 422 Walnut Street.

THE FRIEND.

A RELIGIOUS AND LITERARY JOURNAL.

SEVENTH-DAY, THIRD MONTH 10, 1877.

NO. 30.

PUBLISHED WEEKLY.

Price, if paid in advance, \$2.00 per annum; if not paid in advance \$2.50; 10 cents extra is charged for postage on those sent by mail.

Subscriptions and Payments received by

JOHN S. STOKES,

No. 116 NORTH FOURTH STREET, UP STAIRS,

PHILADELPHIA.

For "The Friend,"

Diary of Christopher Marshall.

This book, recently issued from the press, consists mainly of extracts from a diary kept by Philadelphia and Lancaster, from 1774 to 1811. It covers a period of great interest, during which the war of the American Revolution was commenced and carried on, and the dependence of the colonies on Great Britain severed. The author was a birthright member of the Society of Friends; but his sympathy with the revolutionary movement overpowered his attachment to the peaceable principles ever held by them, and led to his own ruin therefrom. He became one of the members of that short-lived body, the so-called Quakers, who met in the building now occupied by the Apprentices' Library, at the corner of Fifth and Arch streets, Philadelphia. This association was composed mainly, not exclusively, of those who had left Friends because they were unwilling to maintain its peaceable doctrines; and who yet retained an attachment to its manner of worship, and to some of its views and practices. It had nothing to keep it together, and it did not hold regular meetings for worship during the lifetime of its original founder.

The Diary contains many curious illustrations of the arbitrary proceedings, and disregard of ordinary rights as to freedom of speech, &c., which marked that period. It is scarcely safe at that time to criticise the actions of the Congress or of the revolutionary committees; and some who had been so impatient as to speak their minds freely, were compelled to make public and humble confession of their error.

On May 21, 1775. This day about noon, Thomas Loosly, shoemaker, was brought to the Coffee-House, and there being exalted as a spectacle to a great number of reputable citizens, he there very humbly and submissively asked and entreated their pardon and forgiveness for his liberally and wickedly vilifying the measures of Congress, the Committee, and the people of New England, sincerely promising that his future conduct could be just, true, and equitable, as should commend him to the particular notices of those whom he had so unjustly, falsely, and wickedly vilified. On those assurances and promises, the company discharged him. Under date of July 17th, 1775, we find this

entry: "Stayed at home till near six; took a walk to the College yard, to see the Dutch butcher ask pardon of one of the companies for speaking disrespectfully of their proceedings."

"August 19. Complaint was made by G. Schlosser of his having stopped a piece of linen of a pedlar,* who thereupon applied to [Isaac] Hunt, the lawyer; who issued out a summons against him for the said piece, upon which a motion was made to send for the said Hunt, who after first notice refused, upon which a fine from the chairman brought him. He owned the doing of it, but insisted it was according to the rule of his profession, and could see no injury he had done. A good deal was said to him upon the importance of such proceedings, upon which he requested time to consult his client, and then he would give the Committee his answer whether he would proceed in carrying on the suit against C. Schlosser, or withdraw and discontinue the action, at the next meeting, which was granted him.

"22. At seven I went to meet the Committee; came home past ten, sundry debates detaining till that time. One respecting [Isaac] Hunt, who would give no positive answer whether he would prosecute the suit against George Schlosser or no, but requested I to have the minutes of this meeting in writing, with leave to give his answer in writing, which was looked upon to be only evasive, so it was determined, *namine contradicente*, that his answer was not to satisfaction.

"September 6. Between eleven and twelve this forenoon, about thirty of our *associators* waited upon and conducted Isaac Hunt from his dwelling to the Coffee House, where having placed him in a cart, he very politely acknowledged he had said and acted wrong, for which he asked pardon of the public and committed himself under the protection of the *associators*, to defend him from any gross insults from the populace. This his behavior, they approved him, and conducted him in that situation, with drum beating, through the principal streets, he acknowledging his misconduct in divers places. But as they were coming down town, stopping at the corner where Dr. Kearsley lives, to make his declaration, it's said the Dr. threw open his window, snapped pistol twice amongst the crowd, upon which they seized him, took his pistol, with another in his pocket from him, both of which were loaded with swan shot. In the

* Congress had resolved that there should be no imports from Great Britain or Ireland of any goods, wares or merchandise, and that they should not be used or purchased, if imported after the 1st of 12th mo. 1774.

† Isaac Hunt was father of Leigh Hunt, poet and essayist.
‡ This probably refers to the members of an organization entitled "The Association of the Sons of Liberty," which was formed to oppose the introduction of tea subject to a duty imposed by Great Britain for raising a revenue in America.

scuffle he got wounded in the hand. They then took Hunt out of the cart, conducted him safe home, put Kearsley in, brought him to [the] Coffee House, where persuasions were used to cause him to make concessions, but to no effect. They then, with drum beating, paraded the streets round the town, then took him back to his house and left him there, but as the mob were prevented by the *associators*, who guarded him, from tarring and feathering, yet after the *associators* were gone, they then broke the windows and abused the house," &c.

The supervision of the Committee reached not only to conversations which were deemed unfriendly to the revolutionary cause, but even private letters were examined—as appears by the following entries:

"October 6. About six, was called to [the] Committee Room, where were twenty-nine members, some of whom by information had been down to Chester after some letters which they were informed were going to England, in the possession of Christopher Carter, who had been partner with — Spikeman, in Market Street, which said person they found, and then recovered [the letters] by threats of detaining and bringing him up to town, and after recovering said letters, in two parcels, one of them directed to Thomas Corbyn, and the other to Mrs. McCalla, and taking his qualification to the whole of them, and of whom and by whom he received them, they then discharged him, and brought the letters, which were now read, and as they appeared to be base and cruel invectives against the liberties of America, and calculated by wicked men to inflame the minds of the people in England against the Colonies in general, it was directed that three of the authors be immediately taken into custody, which was immediately put into practice by seizing Dr. Kearsley, James Brooks, and Leonard Snowden (a Quaker), brewer in Pemberton Street, and they were confined under a guard in the State House until next morning. A seal was also put on the Doctor's desk, and a guard placed at his house. All this done by eleven o'clock. N. B. James Brooks was taken up at the Doctor's, and Snowden at the Doctor's street door.

7. Notices called the Committee to meet at ten. According I went and met them, there being about seventy members. After some time being met, report was made that there was reason to apprehend that there was a great number of inimical letters on board the snow Patty, bound to London, upon which a sub-committee was sent down in a pilot boat to examine and bring them all up, that were suspected, and also all persons on board that were suspected. This being done, a resolve was brought in by three of the Committee of Safety from the Congress, dated the sixth instant, ordering that all suspected persons that were found to act inimical to the rights and liberties of America that fell under our dis-

cessing and notice, should by us be delivered over for trial of their offences to the Committee of Safety, they only being invested with that power and not we—we having no right to hear or determine any case of that kind.

This produced a warm debate for some time, and, at length, upon motion seconded, whether the present papers, relating to Kearsley, Brooks, Snowden and Ordale (minister of Burlington in the Jerseys), should, by a committee appointed, be carried to the Committee of Safety for their sole judgment and determination, the same motion was carried by a majority of the whole, except one and myself. Past two, the Committee broke up.

8. About two, was brought to town, Christopher Carter, with a number of letters from on board the brig Black Prince. He was put into prison, where the three before mentioned were sent by the Committee of Safety, last night, till further examination.

9. Went at ten o'clock to the Committee at the Philosophical; stayed till twelve, in which meeting, fifteen members were chosen to assist the Committee of Safety in the trials of Dr. Kearsley, Leonard Snowden, J. Brooks, [and] Christopher Carter, whose trials then came on before the Committee of Safety and those fifteen members, at the Lodge Room, and continued till just dark before finished. * * N. B. The four persons before mentioned were conveyed from prison and back there again by a guard of associators, not less than fifty, with drums, files, &c., &c.

Subsequent entries in the diary, show that Dr. Kearsley was committed to prison, and there ended his days.

(To be continued.)

Gospel Light.

For "The Friend."

I have for a long time believed that the term *Gospel* in its full extent, means something deeper and more vital than a mere declaration of the good tidings of life and salvation to a fallen world. So I desire, in what I now write, to bring it home to each heart as the power of God to save. I know that the word *Gospel*, in its broad and full sense, includes both the outward and the inward; or as we might express it, both the letter and the spirit. "For our gospel," says Paul, "came not unto you in *word* only, but also in *power*, and in the Holy Ghost, and in much assurance."

The four evangelists have given us glad tidings in words, the truths of which have to be felt in the heart, before they can be savingly realized. And the idea which I wish to carry out is the same as expressed by Robert Barclay in his *Apology*, page 163, where he says, "This saving spiritual light is the gospel, which the apostle saith expressly is preached 'in every creature under heaven,' even that very 'gospel whereof Paul was made a minister,' Col. i. 23. For the gospel is not a mere declaration of good things, being the 'power of God unto salvation to all those that believe,' Rom. i. 16. Though the outward declaration of the gospel be taken some times for the gospel; yet it is but figuratively." And George Fox, while reasoning with some who said "the gospel was the four books of Matthew, Mark, Luke and John," says in his *Journal*, page 265, "I told them the gospel was the power of God, which was preached

before Matthew, Mark, Luke or John were written; and it was preached to every creature, of which a great part might never see nor hear of those four books; so that every creature was to obey the power of God; for Christ, the spiritual Man, would judge the world according to the gospel, that is according to his invisible power. When they heard this they could not gainsay; for the truth came over them. I directed them to their teacher, the grace of God, and showed them the sufficiency of it, which would teach them how to live, and what to deny; and being obeyed would bring them salvation. So that that grace I recommended them, and left them."

From the above prominent writers, and from a host of others who through much tribulation organized our religious Society, it is abundantly evident, that their leading concern was, to turn their hearers away from a dependence on that which was outward and lifeless, to the inward, invisible and spiritual power by which life and immortality were brought to light in them by the gospel. It was this life, light and power, that made them, like Paul, able ministers, not of the letter but of the spirit; for it is the spirit that giveth life. And Paul certifies that the gospel which was preached of him, was not after man; for, he says, "I neither received of man, neither was I taught it but by the revelation of Jesus Christ." And in another place; "Our gospel came not unto you in word only, but also in power and in the Holy Ghost." "For the kingdom of God is not in word but in power." And this is what I long for, that our faith should stand less in the wisdom and intellectual teachings of men, and more in the teachings and power of God; believing as I do, that the gospel "is the power of God unto salvation to every one that believeth." And if our faith and life were more practically in this cleansing and purifying power, we should witness it to be to our salvation from sin, and finally "guide into all truth," and into the glorious liberty of the redeemed children of God.

The design of the letter of the scriptures is to set forth the love of God in sending his Son to save lost man, the life, death, atonement and mediation of Christ, are to bring us to the Spirit, and to the knowledge of things deeper than what words can reach. So if we rest satisfied with a *description* of heavenly things, as outwardly received, without feeling the life and power of those gospel truths brought forth and fulfilled in us, of what avail is all our knowledge?

The old covenant dispensation was ministered in the letter, but the new in the Spirit. 2 Cor. iii. 6. "He came unto his own, and his own received him not. But as many as received him, to them gave he power to become the sons of God, even to them that believe on his name; which were born not of blood, nor of the will of the flesh, nor of the will of man, but of God." And I believe that He through the gospel life and light, still gives his obedient followers power to become the sons of God. But we have first to believe in this power, and receive it, before we can be born of the Spirit; "for that which is born of flesh is flesh, and that which is born of the Spirit is spirit." And as we in our fallen nature, bear the image of the earthy, so we must be renewed by Christ the quickening Spirit, and bear his heavenly image before we can be

prepared to enter the heavenly mansion where nothing that defileth can ever come.

"The law was given by Moses, but grace and truth came by Jesus Christ." And only by grace emanating from Him, was the life and light of men, that we are enticed to see our fallen condition, and the necessity of salvation. For darkness cannot cover darkness. The light shines in darkness, but the darkness comprehends it not, but the fall we have a false light and a false liberty and a false rest. But "as men are led by the Spirit of God, they are sons of God." And they can discern betwixt the false and the true—between the living and the dead, and between the letter of the gospel and the spirit and power thereof.

We err about gospel knowledge and religion when we have not the gospel spirit and life to lead us. But the living God dwells in light temples only. As the light which shined outwardly is to the outward man, so is light that shines inwardly, to the inner man. But while we have the light, we must be in the light, or we never shall become children of light. And if we would see things of God, we must receive the light of Him. "For the things of God knoweth man, but by the Spirit of God." We may take a great deal about holiness, sanctification, without realizing the cleansing and saving efficacy of the gospel life ourselves.

Far more profitable would it be for us to come down in deep humility, as at the feet of Jesus, and seek more earnestly to receive of Him, the spirit, the life, light and power on our own hearts, than to be talking and putting with others on the subject. "In (Christ) was *life*; and the life was the light of men." The life comes before the darkness can comprehend the light. We see how it is in nature; the germ of life lies dormant in seed of a plant until it is quickened, or brought to life by the warming rays of the sun. The seed of the kingdom, sown in the grave of the heart under the influence of the Light of Christ, if in "good ground," will sprout forth and grow from stubble to stature, and from strength to strength until it become "a plant of renown," comparable to a tree which brings forth fruit in its season. But its growth and productiveness will be in proportion to the vitalizing influence and cultivation which the plant is allowed to receive from the great Husbandman. Thus life and immortality are brought to light through the gospel, which Paul says "was preached every creature under heaven." John in his revelations, I think alludes to the same, when he speaks of the "angel flying in the midst of heaven, having the everlasting gospel to preach to them that dwell on the earth, to every nation, kindred, tongue and people. But "who hath believed the report? and whom hath the arm of the Lord been revealed," but those who hear and obey? It is the "willing and obedient that shall eat the bread of life." "For God who commanded the light to shine out of darkness," in the old creation, doth now shine in our day, hearts to bring about a new creation there, new life and a new glory. "The first man Adam was made a living soul," which life he lost in the fall. The second Adam was made a quickening spirit, to quicken and bring a life that which was lost in the fall. "For in Adam all die, so in Christ (not out of him) shall all be made alive." "The first man

the earth, earthly; the second man is the Adm from heaven." The death which Adam suffered in the fall, has "passed upon all men that all have sinned." He begot children in own likeness; in the image that he had received by voluntary disobedience. So now, bear the image of the first Adam; dare by nature the children of wrath; shall so remain until we are renewed after image of Him who first created man in own likeness. Then, as we have borne image of the earthly, we shall bear the image of the heavenly, if we submit to the cleansing and purifying power of Him "who he himself for us that He *might* redeem us a all iniquity." "For since by man came in, by man came also the resurrection of dead." "For as by one man's *disobedience* by were made sinners, so by the *obedience* ne shall many be made righteous." Thus see that God in his mercy has provided a way for our return and restoration, by and through Him who came "to seek and to save that which was lost," and "to finish transgression and make an end of sin, and to make conciliation, and bring in everlasting righteousness" into the penitent soul, by faith in sacrifice that he made once for all. But is not merely by faith in the atonement and ce thus purchased for us, but also by yielding a willing obedience to the purifying operations of this grace and light as revealed in dark hearts, until the gospel day dawn, the day star shall more fully arise. Then we walk in the light, and follow our heavenly guide in the regeneration, we shall fully be made partakers of the inheritance the saints in light; being "born again, not corruptible seed but of incorruptible, by word of God which liveth and abideth ever." Thus the grace of God which brings salvation is our teacher; and we find that its teachings harmonize with the teachings of the Holy Scriptures; for they proceed from same fountain which inspired the holy of old, as they opened the sacred writings. So the true gospel light enables us to love both in what is revealed to us in the art, by the Holy Spirit; and also to believe and understand what was revealed to holy men of old as contained in the scriptures. We find there that Christ died that we, through n, might be raised from spiritual death into ownness of life. He died to reconcile sinners God, but not to reconcile God to sin. Know ye not that the unrighteous shall not inherit the kingdom of God?" "For what lowliness hath righteousness with unrighteousness? and what communion hath light with darkness?" &c. The notion, therefore, at the righteousness of Christ may be imputed to us while we remain in sin, must be a sad delusion. For holiness cannot unite with unholiness; and we are told that without holiness no man shall see the Lord.

D. H.

Dublin, Ind., 2d mo. 1877.

Inoculating Arable Land.—The Duke of Anchester has tried experiments on his estate at Kimbolton, which are well worth consideration by all concerned in the breeding of e-stock. Desiring to convert arable land to pasture, he did not sow grass seeds, but in a machine, made by Messrs. Howard, of Bedford, he cut ropes of sod two inches wide of an old pasture. These ropes were sown to the field that was to be converted,

were broken into pieces about two inches square, and were then placed in regular rows on the surface of the ground by women and children, who gave each piece a slight squeeze with their foot after laying it. The rows are marked by the counters of an empty corn-drill drawn over the land; and, after the inoculation is finished, the field may be rolled whenever necessary. It was in November, 1873, that the first field was thus treated. By the following Autumn it was completely covered with grass, and "was nearly as level and good as old grass land;" and in the second year was "fit for grazing." And as regards the pasture from which the ropes had been cut, we are told that "after the first year the gaps in the turf are scarcely perceptible."

Thus, the tendency of grass to spread and fill up bare places has been turned to profitable account. The subject is not new, nor is this the first time that it has been mentioned in these pages; but the making use of such small pieces of sod to inoculate the land is new. The cost is about three pounds an acre, which, as we are informed, is less than the cost of sowing with grass-seeds; and there is no falling off experienced in the third, fourth, or fifth year, at least to the same extent as when land is laid down to pasture with artificial grasses.—*Chambers' Journal.*

For "The Friend."

Notes of a Southern Visit.

The writer of these memoranda recently accompanied, on a journey in our Southern States, a Friend who was under a religious concern to visit and hold meetings for worship among the colored people there, with the desire to encourage them in that submission of the heart to the work of grace; and that practical obedience to the commands of our Saviour, without which there can be no true religion. One of the objects of the visit was to open the way for the distribution of books and tracts among the people.

The political excitement caused by the presidential election, which had taken place but a few weeks before, was a source of some discouragement; especially in view of the horrible outrages which had been committed in some of the counties of South Carolina prior to the election, in order to intimidate the colored people and prevent them from voting. Some friends thought the minds of the people would be so filled with political discussion, that there would be no room for other matters; and others even doubted the personal safety of the visitors. Yet it seemed best to make the trial, and to set out as soon after the requisite permission had been obtained from the proper meetings for discipline, as the necessary arrangements could be made for the absence from home and business.

Petersburg, in Virginia, was the first stopping point; and a letter was written to the pastor of one of the colored Baptist churches in that city, with whom we were acquainted, requesting him to make some arrangements for meetings with the people on First-day, the 3d of 12th month. A letter was received in reply, couched in courteous and kind terms; but entirely closing up the way, so far as he was concerned, for the visit. He represented the state of political feeling to be so embittered, that we would be liable to annoyances which would involve trouble and expense—such as malicious arrests, as if we were com-

mercial agents selling goods without taking out the requisite license, &c. This discouraging letter, and the conflicting advice of some dear friends, led to some searching of heart; but after a time the language presented: "Fear ye not with man's fear, neither be afraid. Greater is He that is in you, than he that is in the world. Turn not aside; nor cast away thy shield, as though it had not been anointed with oil. Trust in the Lord with all thine heart, and lean not to thy own understanding." This was so confirming, that we left at the time previously determined; and our subsequent experience verified the encouraging expressions of a dear friend in reference to the visit: "Behold I have set before thee an open door, and no man can close it: is the language that ariseth." Throughout our journey, we met with kindness, courtesy and openness from all classes; nor were we sensible that the service of the visit was materially, if at all, interfered with by political matters.

Our concern and interest were so exclusively in another channel, that we scarcely read a political paper during an absence of nearly eight weeks; and perhaps never before felt so little desire to know about national movements, which under other circumstances would have absorbed much time and thought. The information we received on these subjects was principally derived from the conversation of those around us; and this was so colored by the desires or prejudices of the speakers, that but little dependence could be placed on it. So, when appealed to for our views, as we sometimes were, we could conscientiously acknowledge our ignorance of the real state of political affairs. Yet in justice to the people of the South, it may be said, that we were never in company, where fear of insult would have prevented the expression of honest views in a proper spirit and manner. The unjustifiable warmth of party politicians, and the inflammatory language of some party organs, caused some Southern people to believe that there was a real danger of armed collision; but the almost universal expression of sentiment among those we conversed with was, that if there was to be any more fighting in this country, it must be among the northern people, for they should keep aloof from it.

We reached Petersburg about 9 o'clock on First-day morning, and attended three meetings on that day; and one on the following evening. Two of them were large gatherings of people. In this city the Baptists predominate among the colored people. One of their three churches here claims a membership of 2700.

The service in these meetings, as was mostly the case throughout the journey, was largely of a practical character. Those who were passing along in an easy, careless, unconcerned way, were closely but affectionately spoken to; and those who lived from day to day, month to month, and year to year in forgetfulness of God, were asked what right they had to hope, that at the end of time, they would hear the language, "Well done, good and faithful servant, thou hast been faithful over a few things, I will make thee ruler over many things, enter thou into the joy of thy Lord?"

Those who had entered on the Christian journey were encouraged to persevere, and hold out to the end of the race. Our Saviour's command was quoted, "Watch and pray, lest

ye enter into temptation;" for there was a danger of falling away, even after we had entered on a religious life; as was shown by the care of the Apostle Paul, who was concerned to keep his body under and bring it into subjection; lest, after he had preached to others, he himself should become a castaway.

"The petition taught by our Saviour to His disciples, "Give us this day our daily bread," was referred to, to show that frequent supplies of spiritual food were necessary for our spiritual growth. Our religion must not be confined to one day in the week, but should go with us into every transaction of life; and during the intervals of our necessary business, the heart should be lifted to God, in accordance with the exhortation, "Pray without ceasing."

Parents were exhorted to watch over their children, and to train them up in the nurture and admonition of the Lord, so that they might be prepared for usefulness in the church and the world.

The colored people are very attentive listeners, but are not accustomed in their meetings to those seasons of silent waiting, which are often so acceptable and refreshing to the true spiritual worshipper. This is probably true of almost all other denominations of Christians than "Friends," and is not peculiar to those of African descent. We were often impressed with a sense of the loss sustained by a congregation for want of such intervals of silence. The vocal service, either in ministry or prayer, might have been tender and impressive; and the people evidently brought into a degree of serious feeling by the weight which attended it; but when the minister sat down, something else was immediately looked for to occupy the attention, and the solemn covering which had overspread the assembly was often too much dissipated. Few things connected with our manner of worship created such wonder as the announcement, that we sometimes had meetings in which not a word was spoken from beginning to end. When at Newbern, N. C., we were much amused by the remarks of a goodly old colored man, who knew somewhat about Friends, and many years before had attended a meeting appointed by two of them. He said, They sat, and sat, and sat, and then got up and went away without saying anything. He thought it was all right; though he would have been glad to have heard them speak.

Their education in this respect often rendered it necessary to unfold our views of what constitutes true spiritual worship; and to remind them, that a man might attend meetings, listen to eloquent sermons, join in the singing of hymns, and make loud and long prayers; and yet never worship God at all. Though the times of silent waiting on the Lord, which we asked for, as in accordance with the practice of "Friends," were so novel and strange to many of the companies we visited; yet the silence was often profound and solemn, and very grateful to our feelings; and we believed it was so in measure to many others. Indeed, on several occasions, it was referred to in terms of approval by some of the more thoughtful ones.

The vicinity of Petersburg abounds with the remains of the fortifications erected during the late civil war. It was then surrounded by hostile armies; and for many months its inhabitants became familiar with the sounds of musketry and cannon, and with all the

horrible accompaniments of a bloody warfare. The opposing armies lay in front of each other, defended by entrenched lines of many miles in extent—the ruins of which furnish abundant food for thought to the moralist, and tend to strengthen in a northern mind a conviction of the wrongfulness of the system of slavery, which led to such a destructive and fratricidal contest. We saw similar ruins in different parts of the South. The Southern rulers appear to have spared no efforts to carry out their design of forming a separate Confederacy; but to have so greatly drained the resources of that section of our country as to leave it in an impoverished condition.

W.

(To be continued.)

A MITE SONG.

Only a drop in the bucket,
But every drop will tell;
The bucket would soon be empty
Without the drops in the well.

Only a poor little penny,
It was all I had to give;
But as pennies make the dollars,
It may help some cause to live.

A few little bits of ribbon,
And some toys; they were not new,
But they made the sick child happy,
Which made me happy too.

Only some outgrown garments;
They were all I had to spare;
But they'll help to clothe the needy,
And the poor are everywhere.

A word now and then of comfort
That cost me nothing to say;
But the poor old man died happy,
And it helped him on the way.

God loveth the cheerful giver,
Though the gift be poor and small;
What doth He think of His children,
When they never give at all?

—From "The Christian Giver."

THE TONGUE INSTRUCTED.

Guard well thy lips; none, none can know
What evils from the tongue may flow;
What guilt, what grief may be incurred
By one imprecation, hasty word.

Be 's slow to speak; look well within;
To check what there may lead to sin;
And pray needlessly for aid,
Lest, unawares, thou be betrayed.

'Condemn not, judge not,—not to man
Is given his brother's faults to scan;
One task is thine, and one alone,—
To search out and subdue thine own.

Indulge no murmurings; oh, restrain
Those lips so ready to complain;
And, if they can be number'd, count
Of one day's mercies the amount.

Shun vain discussions, trifling themes;
Dwell not on earthly hopes or schemes;
Let words of wisdom, meekness, love,
The heart's true renovation, prove.

Set God before thee; every word
Thy lips pronounce, by him is heard;
Oh, could'st thou realize this thought,
What care, what caution would be taught!

"The time is short,—this day may be
The very last assign'd to thee;
So speak, that shouldst thou ne'er speak more,
Then may'st not this day's words deplore.

"Wait on the Lord; he of good courage,
And He shall strengthen thine heart; wait,
I say, on the Lord." Psalm xxvii. 14.

From "The British Friend"

Extract from the MS. Journal of the Late Joseph W. of Hilsflats.

3rd Month, 1845.—The day after the Quarterly Meeting held at Leeds, Joshua Prieman, of Thornton, breakfasted at the so-called Friend's house as myself, and on inquiring him about a certain young man I had particularly noticed in the meeting, he said his name was "Richard Finnes Foster," he came out of the south and settled at S.boro', that he joined the Society by conviction, and appeared acceptably as a minister and withal, related the following occurrence which I have put down as near as I can remember, viz.—That Doctor Southam, of Buckingham, a man eminent in his profession, by which he acquired considerable property, took a journey of pleasure, he attended the play which was acted "The Quaker"—with which the Doctor was much affected. At the close thereof, the principal manager observed to the company that if any one was desirous to know more of respectable people, he would recommend them to read "Barelay's Apology." According before he left London, the Doctor privately purchased it, and when he got home, secret it in his study, where he employed his leisure time in diligently perusing it. His wife soon perceiving a visible alteration in him and having taken notice that he spent much time in his study, wondered what was the cause; whereupon, taking the opportunity when he was from home, she carefully examined the room, and found the Apology therein, which she began to read, and continued to do so at such times as he was absent the consequence of which was, by turning their minds to that principle of Light and Light which comes by Jesus Christ, and is placed in the secret of every heart, they were both convinced of the truth as professed by the people called Quakers. In time the found strength to make public profession thereof. About the same time Richard Foster's brother Oswald, who was an apprentice with them, was out of his time, and got to London for further instruction. The Doctor having a great deal of business, had proposed on his return, to take him in as a partner. Before he reached home, he heard the were become Quakers, at which he was very much surprised, but being determined to let them know that he was not one, when he entered the house he began to whistle and sing as he passed through the lobby by the sitting room door, and went directly into the kitchen where he was very much struck with the visible alteration he observed in the countenance of the servant girl, and then accosted her—"What! Betsy, are you all turned Quakers—But I will not be one however." But in short time he was also favored with a precious visitation, and became clearly convinced of the truth. The said R. F. Foster hearing that his brother was turned Quaker, light said, "I shall quake also when cold weather comes." But the same Divine Power soon afterwards reached unto him, and caused him to bow therewith, bringing him into a state of willingness to confess Christ before men, and about the same time another brother (John), residing at some distance, was convinced of the truth, without having any previous conversation, one with another. Thus were six persons in rather a remarkable man-

convincing and brought to the acknowledgment of the truth, and became valuable abers of our religious Society.

For "The Friend"

The Mississippi in High Water.

dward King descended the great river a St. Louis to the cotton region when the city stream was rising. He thus describes it as it appeared at that time:

When the rains have swollen its tributaries to more than their ordinary volume, the Mississippi is grand, terrible, treacherous, as subtle and serpent-like in its mode of sliding upon its prey, it swallows up acres at a fell swoop; on one side sweeping them from their frail hold on the main land, and on the other it covers plantations with a broken tree trunks and boughs, driving the frightened inhabitants into the story of their cabins, and driving the dead swine upon high knolls, to starve perhaps finally to drown. It pierces the very lines which have cost the states bordering on it such immense sums, and goes bounding roaring through the crevasses, distracting planters and sending dismay to many thousands in a single night. It promises a fall in the day; or another it rises so suddenly that adventurous woodmen along the border scarcely time to flee. It makes a lake the fertile country between two great rivers; it carries off hundreds of wood piles, which lonely and patient labor have reared in hope that a passing steamer will buy the load, and thus reward a season's work. Out each small town on its western bank, set carelessly by the waters edge, it maves a huge Venice, or floats it off altogether. As a lone steamer glided along the mighty current, we could see families in the second story of their houses, gazing grimly out upon an approaching ruin. At one point, a man scuffling from house to barn-yard with a dog for his stock. The log barn was a dreary in the midst of the flood. The swine and fowls stood shivering on a pine knoll, disconnected burrowing and browsing. As we went beyond the Arkansas and White rivers, a gigantic volume of water had so far overtopped its natural boundaries that we seemed at instead of upon an inland river. The cottonwoods and cypresses stood up amid the utter wilderness like ghosts. Gazing into the long avenues of the sombre forests, we could only see the same level, all-enveloping flood. In the open country the cabins seemed ready to sail away, though their masters were usually smoking with much equanimity, and awaiting a fall of the river.

Below the mouth of the Missouri, the greater takes a wholly different appearance and character from those of the lovely stream which stretches from Lake Pepin down; and one of the old pilots say that section of it low St. Louis should have been called the Missouri, rather than the Mississippi. The Missouri, they claim, gives to the river most of the characteristics which dominate it until it has been reinforced by the Ohio, the Arkansas, the White and the Red rivers. The current is forever making land on one side, and tearing it away on the other, the bends of its course not permitting the stream to wash both banks with equal force. The farmer on the alluvial bottoms, sees with dismay his rich field diminish year by year, acres slipping into the dark current; yet the ease with

which corn, cotton and sugar are raised in their respective localities along its banks is such that they willingly run the risk. The pilots complain bitterly of the constant changes in the channel, which it requires the eyes of Argus almost to detect. They say that the current might be made to bear upon the rocky shore, thus avoiding disastrous losses of land and many crevasses, as the gaps made in the levees by the encroaching waters are enlarged. The stream is so crooked, that a twenty miles' journey by water is sometimes necessary, where the distance across the promontory round which the steamer must go, is not more than a mile. Sometimes the current, tired of the detour, itself brushes away the promontory, and the astonished pilots see a totally new course opened before them.

The occasional inundations of the alluvial lands are so little understood, and the general course of the Mississippi is comprehended by so few, that a little idea of its progress down to the Delta country may prove interesting.

At the junction of the Mississippi and Missouri rivers, begins what is known as the lower Mississippi, although the name is not usually applied to the stream until it has crossed the grand rocky chain or bed extending across its channel between St. Louis and Cairo. All below this chain in the Mississippi valley is alluvium, through which the river meanders from one bluff to another—the bluffs being from forty to one hundred miles apart. Touching these bluffs at Commerce, Missouri, on the west bank, it courses across the valley, passing the vast prairies of Lower Illinois, known as "Egypt," on the east, meets the Ohio at Cairo, then strikes the bluff again at Columbus on the eastern or Kentucky shore. It skirts these bluffs as far as Memphis, having on its west the broad earthquake lands of Missouri and Arkansas. It then once more crosses the valley to meet the Yazoo near Vicksburg, creating the immense Yazoo reservoir on the east bank, extending from the vicinity of Memphis to Vicksburg, and the valleys and the swamps of the Macon and Tensas on the west side. These latter have no terminus save the Gulf of Mexico, as the river does not approach the western bluffs after leaving Helena. From Vicksburg to Baton Rouge the river hugs the eastern bluffs, and from Baton Rouge to the mouth is the pure delta country for a distance of more than 200 miles.

All of this valley, below the rocky chain crossing the river channel, lies lower than the high water line of this powerful current, and the efforts of men to stay an inundation seem quite futile. The valley is divided into several natural districts, one embracing the lands from the chain to the vicinity of Helena, where the St. Francis river debouches; another from Helena nearly to Vicksburg on the east bank, for the Yazoo valley; a third comprises the country from the Arkansas to the Red river, known as the Macon and Tensas valley; a fourth runs from the Red river to the gulf, on the west side, and a fifth from Baton Rouge to the gulf on the east side.

Some of these districts have been imperfectly leveed; others have never been protected at all, and the general opinion is, that when high water does come the fact that there are a few levees increases the danger of a complete inundation, as the stream, finding itself restrained, breaks the barriers which attempt to control the current. Under the slave sys-

tem, the planters on the lowlands were able to guard against ruin by elaborate preparation and vigilance, which they cannot summon now; and it is believed that nothing but the execution of a grand national work by the general government will ever secure to the delta that immunity from ruin, so desirable for people already cruelly stripped by war and political knavery.

Yet the inundations do not come with alarming frequency. In 1867 the lowlands were overflowed and distress ensued; and in this year, 1874, the confusion, distress, and depopulation have been terrible to witness. Starvation has stood at thousands of doors, and only the hands of the Government and charity have saved hundreds from miserable deaths. Below Memphis, and in a wide belt of country round about, along the bottom lands in the State of Mississippi and throughout the Louisiana lowlands, there has been immense damage. In an hour the planter is doomed to see a thousand acres, which have been carefully prepared for planting cotton, covered with water two or three feet deep. The country round about becomes a swamp—the roads are rivers, the lakes are seas.

As the Mississippi valley, south and north, will in future be one of the most populous sections of the American Union, and as the great network of rivers which penetrate to the Rocky Mountains, and the mighty cañons of the Mauvais Terres are so well adapted for commercial highways; as a score of States and territories border on the Mississippi alone, why should not the National Government at once undertake the control and care of the stream and its tributaries?"

For "The Friend."

Noble Conduct in Humble Life.

While walking in the southwestern part of the city many years since, I noticed the driver of a coal cart who was about delivering his load. The man, who had but one arm, was cheerful, strong and active, and seemed but little impeded in his work by the loss of his limb. On being asked whether he did not find the loss of his hand and arm a very serious inconvenience, he answered "no," and said that he was still able to haul seven tons of coal daily, which was as much as most men cared to do. He then showed me how he made the stump of the amputated arm useful by resting the end of the shovel against it, while he grasped the handle and lifted the coal with his remaining hand and arm. Here was a striking instance of energy, courage and the manly determination which enables persons to overcome difficulties; but when he also told me that he had never once regretted the loss of a limb so important to the working man, it seemed strange and surprising.

Here was something that needed explanation; and in answer to inquiries, I learned that the arm had been sacrificed in order to save the life of another person. Years previous to my interview, he had been employed with others at a mill in the country, and on a certain occasion he saw that a large, heavy door which had been loosened from its fastenings in one of the upper stories of the mill, was about falling from a great height, and that a fellow workman, unconscious of the accident, was stooping with his back bent directly on the spot where the door must strike the ground, and that from his position the man must almost certainly be killed if the

door struck him. There was no time for reflection or hesitation, but my informant immediately extended an arm, received the first shock of the falling door, and thus warded it off his companion so that he was little if any hurt. The arm, of course, was so shattered that it had to be promptly removed.

It has often occurred to me that this was an instance of true Christian heroism, such as we have few examples of. He doubtless had the comfort of an approving conscience, and therefore felt no sorrow or regret for the part he had taken. We have good reason to suppose that He who seeth not as man seeth, beholds many who are of small account in the eyes of the world, who are yet objects of His favor and regard. The subject of the preceding anecdote must have had a portion of that unselfish love and spirit of self-sacrifice of which the life and sufferings of our Divine Redeemer has given us the great example. X.

Trout.

Lonesome Lake Cabin, August, 1876.

The season has been an excellent one for studying the habits of trout in the mountain waters. The intense heat of the sun during the latter part of July and the early part of August had its effect on all exposed waters even in this high region. Profile Lake, the most wonderful trout pond in the world, in my judgment, seems to be more fully stocked with trout this year than ever before. In June the fish rose freely, but as July advanced and the heat of the sun penetrated the water there was a sudden change. This is a noteworthy fact, that the change was not gradual, but one day the trout were rising freely, took any fly that was offered, and seemed to be actively at work feeding, and the next day, by a common agreement they refused to rise, did not show themselves on the surface, and though we tried them thoroughly at all hours of the day, from early morn to dark, it was impossible to get up anything but a few very small fish, and these only in shallow water. At the same time the anglers with bait ceased to take any, or took but very few. For some days newly arriving sportsmen, who tried the lake, declared that there were no trout there, and would not believe the assurance that there were thousands lying in the cool recesses. This instantaneous change convinced me that the water had reached a temperature near the surface which was disagreeable to all trout alike, and that as we human beings do not like to go out in a hot sunshine, so they did not like to go out in the warm water. Meantime they did not feed. The habit of the trout is to feed voraciously at times and to remain quiet with little or no food for a long time. I have known a three-pound trout live for months in a glass tank, with clear spring water flowing in it, and keep up his flesh and appearance, though he had no food but the few animalcules which were in the water, and they were very few, as I knew by repeated examination with my microscope.

But one day we had a heavy shower in the early morning, the only shower of the season which had been dry here as elsewhere. Thinking this might have disturbed the water and equalized surface and depth temperature, I went down to the lake at about noon and made a few casts, but without success. I was driven off the lake by the sudden appearance

over Cannon Mountain of a black cloud, which came on with a roar, and I had scarcely gotten in the shelter of the boat-house when a terrible hail storm burst over the lake. It was by much the most severe hail storm I have ever known, and continued for three-quarters of an hour. The stones were very large, and when it cleared away the surface of Profile Lake was covered with a skim of ice-ash, as if the winter ice had just melted. The sun broke out hot and fierce, and an army of gnats came out of the forest. The ice had vanished in a few minutes, but the surface water was cold enough now, and there was evidently the wildest kind of exhilaration and delight among the trout. They came up, literally by the thousand, and leaped into the air to seize the gnats. In all my experience in wild waters I have never seen such an exhibition of trout. They paid no sort of attention to my presence, but rose ten, twenty at a time within reach of my hand, all around me, and all over the surface of the lake. At every cast they tumbled over my flies, crowding one another in their haste. Of course I took all I wanted in a few minutes, and then sat in my boat and enjoyed the spectacle.

This continued all the afternoon and till dark. The night was cold with frost. The next day was much warmer, but they rose till dark again. The day after that it was impossible to persuade a respectable trout to rise, for the water had again become warm.

Now to show you where they were, and what they were doing. The bottom of Profile Lake is dark and you cannot see trout in deep water. But Lonesome Lake is clear as crystal, and in some parts of it the bottom, in water from three to five feet deep, is white granite gravel. These places are where cold spring water comes in, and the thermometer in that water is always at about 43 degrees. During the season of hot sunshine it was useless to cast flies on any part of the open lake, except over these spring holes, and there I would not cast, for the trout were as tame as chickens. They lay on the white gravel, packed closely side by side, thousands on thousands, enjoying the delicious cold water, and paid no attention to me as I pushed my boat over them, but just rested and panted with their gills and looked up at me. They seemed to have such perfect assurance that I would not harm them that I was compelled to let them alone. I had not the heart to take them, and so day after day I would row over them, and take friends to see the immense multitudes, so closely packed that they hid the gravel for rods. If I took an artificial fly and danced it with my fingers on the water, they would rush up to seize it, perfectly confident that I was no enemy. To tell the frank truth, this little intimacy which I established with them had such an effect on me that of late I have not felt like killing trout in the lake at all, and I have only taken enough for the table when I had friends here, never when alone.—*Chr. N. Y. Journal of Commerce.*

Locusts and Wild Honey.—Major General Bisset, C. B., in his work entitled "Sport and War in Africa," gives an interesting illustration of a Scripture narrative: "About the year 1850 some of the dispersed native tribes from the interior of Africa migrated into the Cape Colony to seek employment among the farmers. My father engaged one family, con-

sisting of a man named Job, and his two wife with seven or eight children. Soon after their arrival a flight of locusts came from the interior, and night after night, whilst the camps settled on the earth, the whole of our family, with great sandals of ox-hide tied their feet (very like Canadian snow-shoes) would walk about the whole night where the locusts were thickest. The next day the locusts would again take wing; but when this family had been walking about all night you saw acres and acres of ground covered with swarms of disabled locusts that could fly away; and the natives would collect them and bring them home in baskets; they would then break off the wings, pinch off the tendons of the body, and pull off the head, and with it withdraw the inside of the locust, thus the body and legs alone remained, the inside of the body being covered with it. This portion of the locust was then spread upon mats in the sun to dry, and when dry packed away in luts raised from the ground and built on purpose. These people received a very good ration of food; yet this family preferred the bread made from the locusts to any description of food. The mode of manipulation was as follows: A basketful of the dried locusts would be taken from the store, and one of the women would sit down on the ground by a flat stone, and with another round stone in her two hands would grind or reduce the locusts to flour and therewith make thick cakes, and bake them on the coals or in the ashes, and eat this locust-bread with wild honey. Honey was most abundant in the country at that time, and I have seen Job after a day's hunting, carry home leather bags full, weighing more than I could lift from the ground. Hence I believe it was thus that John the Baptist lived upon locusts and wild honey in the wilderness."

For "The Friend?"

An Appeal to Friends.

Dear Friends,—During a visit made in Gospel love more than a year ago, to the colored people in some of the Southern States, we found among them a great dearth of reading matter. This we endeavored in part to supply with books and tracts contributed by the Book Committee of our Meeting for Sufferings, and by the Tract Association of Friends of Philadelphia. The latter in particular, responded most liberally to our requests, and has furnished us with a very large number of its valuable publications, which we hope will prove instrumental in doing much substantial good.

There is great openness among a large class of these people to receive religious and serious publications, and we had many evidences that such productions were valued and read. We felt the importance of endeavoring some measure to supply this demand, by sending such a selection as would be adapted to their peculiar needs, and their present state of intellectual development. The tracts were selected with some reference to this; but there are many in the series which, though excellent in themselves, are not so well suited to the colored people in the South as to persons of more education and different surroundings.

Before leaving home in the beginning of the 12th month last, on a second and similar visit, an edition of 10,000 copies was printed

cheap form for gratuitous circulation, of small sheet containing instructive religious matter suited to their wants. This was received with a hearty welcome by those we visited, the edition was soon exhausted. Since returning home, we have believed that it would be desirable to issue some additional copies of such a sheet at suitable intervals, the same cheap style; and to circulate them in places where most needed, and where our way has opened the way for their reception. This way we might be able, from time to time, to supply thousands of families with a reading as might, under the Divine blessing, turn their thoughts into profitable channels, enlighten their minds, and point them to spirituality of the Gospel dispensation, to necessity of the inward work of Grace in their hearts, and to the need of their being new creatures in Christ Jesus. At the same time correct moral sentiments and principles would be inculcated; and some information be disseminated of the views held by Society of Friends—views which we fully ever are calculated to promote their present and future happiness.

The issuing of such papers involves considerable pecuniary outlay, especially for postage, the subject is thus spread over many Friends, that those who feel willing to assist therein, may have the opportunity of suggesting suitable matter for the pages of the proposed publication, would be gladly received. Contributions or communications should be directed to

DAVID HESTON, Frankford, Philada., or
JOSEPH WALTON, 262 S. 2nd St., "

How Lumbermen Live.—Three hundred men cover and cut a section of about three square miles taking off over 60,000 logs, which will measure about 10,000,000 feet, each on. Work begins at daylight and ends at dark; and when the days lengthen, or the sun favors a longer twilight or earlier morn, men get the benefit in longer working hours. On the river, when the drive is started work begins at 3 o'clock in the morning and ends at 9 in the evening, the men have five meals; breakfast at 6, lunch at 9, dinner at 12, supper at 5, and tea at 9. The meals consist of pork and beans, corn bread, asses cake, and tea or coffee.

Stout is given to a man's appetite. The stout, such as it is, is abundant, monotonous, nutritious, and cheap. A cook is provided for every fifty men. The beans are generally the large white bush, parboiled in a potting half a bushel, then ten pounds of lard is set in the middle of the beans in the quarter of a pint of molasses poured in, then the pot is set in a hole surrounded by hot ashes and burning charcoal, the top covered with a stone, over which a heavy iron fire is built, and here they stay from about eight hours, coming out a most palatable dish. All the baking is done in rudely constructed stone ovens, which are heated, before the dough is mixed, with a good wood fire. Loaves of biscuit or cake are set upon the stones and are cooked quickly and thoroughly.

A camp of three hundred men will consume four barrels of beans, half a barrel of lard, one barrel of flour, half a barrel of salt, one-quarter of a barrel of sugar and gallons of molasses. The men are en-

camped in tents, making their beds of boughs, while their extra clothing—a pair of duck overalls, woolen shirt and two pairs of woolen socks—is kept in an old grain sack and used as a pillow at night.

All well regulated camps exclude liquor. Being usually fifty to two hundred miles from any settlement, and the men not paid until the end of the season, there is little inducement for any speculator to peddle rum through the woods, or for the men to straggle off in search of it.

The consumption of axes and handles is enormous, an axe lasting a month and a handle about three weeks. The axes are sharpened daily, some camps having regular sharpeners, while others require each man to keep his own axe in order. The old axes are never collected for the junk dealer, the distance to ship them being almost too great to make it an economical measure. Woodsmen generally consider spruce harder on axes than either birch or pine. The gum which runs out of a spruce tree is found hard enough to chip the edge of the axe when striking through it.—*Northwestern Lumberman.*

The Lemon Peel.

Selected.

A simple but pious man complained to Gotthold that in conversing with God, he often felt at a loss for words. "Although," said he, "on other occasions I have no difficulty in making myself understood, still, I can never find such language for my God as His majesty, the confidence I place in Him, and the greatness of my necessities, seem to me to require." Gotthold, at the time, had in his hand a lemon, from which he had just pared a thin and transparent peel. Presenting it to him, he said: "Only on the surface skin, and not in the white below, is the strong fragrance of this fruit contained. And the same," he assured, "is the case with your prayer. However thin and meagre may be the language in which it may be expressed, the fragrance of its fervent piety is strong enough to pierce the clouds. Words, without faith and devotion, are useless, like the white under-skin of this fruit; but faith and devotion, without words, are not despised by Him who knows the heart. Ejaculatory prayers are the most powerful means of dispelling the troubles of the mind. A single sigh breathed from the bottom of a burdened heart, is a loud cry in the ear of God. Our prayers are most fervent when the lips are silent and the tongue at rest. No doubt words are sometimes needful in prayer; but it is on our own account and never on God's, to whom our wants are already known. Nay, He sometimes leaves us to feel the lack of words, for the very purpose of weaning us from depending on ourselves and our ability, more than on Him and His grace. Do in future, as King David did, who, you will confess, knew the art of prayer. When he conversed with God, and was dissatisfied with the way in which he did it, he exclaimed, 'And what can David say more unto Thee, for Thou, Lord God, knowest Thy servant.' (2 Sam. vii. 29.) If you cannot find expressions, cast your heart, with all its concerns, into the bosom of your God, and He will read in it what you wish to say. My God, Thou art a spirit; grant that I may worship Thee in spirit and in truth.'" (John iv. 24.)

THE FRIEND.

THIRD MONTH 10, 1877.

We doubt not the hearts of many of our readers have been lifted up in thankfulness to the Author of all our mercies, in that He has brought to a peaceful settlement the political question which has for some months past been agitating the nation. Whatever may have been their predilections in favor of one or the other of the Presidential candidates, we believe the great mass of the people of the United States have always been ready quietly to acquiesce in the result of the last election, whatever that should be found to be. The remarkable closeness of the vote, and the long continued uncertainty as to who was legally elected, necessarily kept the hopes and fears alive of those who were warmly interested in the success of one party or the other. The unsettlement thus occasioned was increased by the exaggerated and sensational reports, and by the heated and inflammatory appeals published in some of the papers of the day.

A calm review of our political history for the past few months, impresses the mind with the conviction of the truth of the Scripture declaration, "Righteousness exalteth a nation." If those who would public opinion,—the orators and writers, whose voices are heard through the land—and if the people generally, were brought under the government of the Prince of Peace in their own hearts, what a wonderful change for the better would be effected even in our outward and material prosperity. There would no doubt still be differences of judgment as to the expediency or propriety of certain political and financial measures; people would be divided in opinion as to the best methods of raising funds for the necessary support of government; and free-trade and protective duties would each find their advocates. But what a blessed thing it would be to see all heeding the advice of the apostle, "Let all bitterness and wrath, and anger, and clamor, and evil-speaking, be put away from you, with all malice; and be ye kind one to another." Questions on which there was a diversity of sentiment would then be calmly discussed and settled, "in the meekness of wisdom."

One great cause of the bitterness which has animated the contest for power, is the control which is connected therewith of the government offices and of their emoluments. It is not merely a desire to see certain political principles prevail, that stimulates politicians on either side; but to many of them it is a question of dollars and cents. This infusion of mercenary motives into parties, whose ostensible design is the promotion of principles of political economy, is one of the evils which threaten disastrous consequences to our government and people. We believe that thoughtful men, animated with a spirit of true patriotism, would hail with unalloyed joy, the introduction of such a system of civil reform, as would make the tenure of office of government employees dependent on the faithful and skillful discharge of their duties; and not on their adherence to any political chief.

We are settled in the belief that the great safeguard of any people, is their reverence for, and obedience to the Supreme Ruler of the universe. He who by his life and conversa-

tion, thus does his part in drawing down the blessing of Heaven on his country, must be classed among her most useful citizens—for, as the poet says, she

“Receives advantage from his noiseless hours,
Of which she little dreams. Perhaps she owes
Her sunshine and her rain, her blooming spring
And plentiful harvest, to the prayer he makes,
When, heaven-like, the solitary saint,
Walks forth to meditate at eventide.”

It is certain, that a body of men under the government of Christian principles, who have learned to subject their selfish desires to the discipline of the cross of Christ; will be most valuable in preserving a nation from those evils and excesses which are destructive to national prosperity, and even to national life.

We have received an obituary notice, post-marked Emporia, Kansas; unaccompanied with the name of the sender. Our rules require that such notices should be accompanied with the name of the person forwarding them. The propriety of this, we think will be apparent.

SUMMARY OF EVENTS.

FOREIGN.—The London Times and other journals have editorials on the settlement of the Presidential question in the United States. Those who believed that Tilden was justly elected are commended for their forbearance, moderation and respect for constitutional principles.

There were 104 deaths from small pox in London last week.

The London Times says that the export trade of Great Britain is in a most unsatisfactory state. The exports of woollens, linens, and iron, have greatly declined. Those of iron have not only diminished in quantity but have fallen thirty per centum in value. During the first month the total value of the exports was only £15,946,000, which is considerably less than half the value of the imports for the same period.

The Italian Government has in contemplation the erection of an observatory for meteorological and astronomical investigations upon the summit of Mount Etna, which will be placed in communication with the University of Catania.

Official figures show that in the year 1870 there were in the island of Cuba 363,000 slaves; in 1873, 257,000, and in 1876, 190,000. The number of free blacks on the island in 1873 was 20,000; in 1874, 50,000; in 1875, 75,000; and in 1876, 84,000. The free blacks in four jurisdictions where no census could be taken are estimated at 6000.

The Montenegrin delegates have arrived in Constantinople, and appear to desire the restoration of peace. The initiative has been prolonged twenty days to allow time for the peace negotiations.

The treaty of peace between Turkey and Servia has been signed, and orders have been given the Russian troops to evacuate Servian territory. On the 3d inst. the Grand Viceroy received a telegram from Prince Milan ratifying the conditions of peace.

UNITED STATES.—The debt statement for the second month, issued the first inst., shows the total debt of the United States, less cash in the Treasury, to be \$2,088,781,143, having been reduced \$2,070,429 during the past month. The balance in the Treasury consisted of \$9,124,174 in currency and \$20,295,271 in coin.

The count of the Electoral Vote was completed in Congress on the 21st inst., about 1 A. M., and it was announced that Rutherford B. Hayes, of Ohio, and William A. Wheeler, of New York, had been duly elected to the offices of President and Vice-President of the United States for the term of four years. As finally determined by the Electoral Commission, with the approval of the U. S. Senate, the Democratic candidates, Tilden and Hendricks, were awarded the votes of 17 States with 181 electoral votes, and the remaining 21 States with 153 votes, are given to Hayes and Wheeler. The Joint Special Committee of the Senate and House of Representatives, charged with the duty of ascertaining the extent and effect of a Chinese immigration, report that they visited the Pacific coast and examined a great number of witnesses. The Committee say: “From all the facts that they have gathered bearing upon the mat-

ter, considering fairly the testimony for and against the Chinese, the Committee believe that free institutions founded upon free schools and intelligence can only be maintained where based on intelligence and adequately paid labor. Adequate wages are needed to give self-respect to the laborer and the means of education to his children. Free labor life is great advantage to free limited institutions. Chinese immigration involves forced wages, no public schools, and the absence of family. We speak of the Chinese as they have exhibited themselves on the Pacific coast for twenty-five years past, and as they are at the present time. They show few of the characteristics of a desirable population and many to be deprecated by any patriot. This problem is too important to be treated with indifference. Congress should solve it, having due regard to any rights already accrued under existing treaties and to humanity.”

The amount of subsidiary silver coin paid out up to the first inst. was \$28,500,000, and the amount of fractional currency destroyed was \$17,000,000.

The Direct United States Cable Company give notice of a reduction of their rates to twenty-five cents, gold, per word.

The Intermenus in Philadelphia last week numbered 311.

The U. S. Signal Service in this city reports the highest temperature of the Second month as 60 deg., and the lowest 16 deg.; mean 37 deg. Total rainfall and melted snow 0.84 inches. According to the record kept at the Pennsylvania Hospital, the mean temperature of the Second month was 37.39 deg., the highest temperature 60.50, and the lowest 20 deg. Rainfall 1.35 inches.

President Grant, on the 2d inst., issued a proclamation convening an extra session of the U. S. Senate. The session is to commence at noon of the 6th inst.

The oath of office was administered to President Hayes by the Chief Justice of the Supreme Court, in the White House, on the 6th inst. President Grant was present at the ceremony.

The Forty-fourth Congress adjourned on the 4th inst. at noon, after having passed all the general appropriation bills except the Army and the River and Harbor bill. The army bill failed on account of a disagreement between the Senate and House in regard to the means for reducing the army and forbidding the use of troops in the Southern States. Its failure will make an extra session of Congress necessary within three months. The House of Representatives adopted a resolution by a party vote, 137 to 88, declaring that Tilden and Hendricks had received 136 electoral votes, and that Hayes had received 120. Tilden was elected President and Vice-President of the United States for the term of four years, beginning 3d Mo., 4th, 1877.

The thirtieth annual report of the Penna. Rail Road Company shows the gross earnings for the year 1876 were \$26,891,061, the working expenses \$22,881,229, leaving the net earnings for the year \$1,809,832. The company made four quarterly dividends of two per cent. each, and there was still a surplus of \$1,510,951, which was carried to the reserve fund. There was no increase of the capital stock or funded debt during the year, and there is no floating debt.

The inauguration of President Hayes took place on the first day of the month. The inauguration, in presence of an immense concourse of spectators, was a most finished reading his inaugural address he was enthusiastically applauded by the people. Several topics of public interest are referred to in the address. He believes that the interests of the people as well as the permanent settlement of the country, demand an early resumption of the peace process. The necessity of labor in the civil service is brought into view. In this matter we must return to the principles and practice of the founders of the Government, who meant that public officers should owe their whole service to the government and to the people, and that each officer should be inflexible as to the terms of his office, but his personal character remained unimpaired and the performance of his duty was satisfactory. Considerable prominence is given to the condition of some of the Southern States, where the people are still impoverished, and the inestimable blessing of wise, honest and peaceful local government is denied to a large extent. He says, in a subject not related to what he had not to do, in a patriotic sense either Republicans or Democrats, but fellow citizens and fellow men, to whom the interests of a common country and a common humanity are dear. President Hayes recommends an amendment to the Constitution which shall pre-cribe a term of six years for the President, and shall not be subject to re-election.

ANNUAL MEETING OF THE CONTRIBUTOR TO THE ASYLUM.

A Stated Annual Meeting of the “Contributor to the Asylum for the Relief of Persons Deprived of Use of their Reason,” will be held on Fourth-day, 14th of Third month, 1877, at 3 o’clock, P. M., at Street Meeting-house, Philadelphia.

WILLIAM BETTLE, Sec.

WANTED.

A competent middle aged Friend as Matron, a Shelter for Colored Orphans. Apply to Elizabeth C. Lowry, 1114 Pine St. Mary Randolph, 247 North Twelfth St.

WESTTOWN BOARDING SCHOOL.

WANTED, A TEACHER to take charge of the “St Room” at the above Institution; one qualified to instruction in all the branches taught in the G. D. DEPARTMENT.

Application may be made to Rebecca Allen, 305 South Fifth St., Philadelphia; Deborah Rhoads, Hadonfield, New Jersey or Martha D. Allen, 528 Pine St., Philadelphia.

WESTTOWN BOARDING SCHOOL.

THE SUMMER SESSION opens on Second-day of Fourth month. Parents and Guardians intending to send pupils, will please make early application to BENJAMIN PASSMORE, Supt., (address Street Road P. Chester Co., Pa.) or to CHARLES J. ALLEN, Trustee, 204 Arch St., Philadelphia.

WANTED.

A Friend to teach London Britain Prep. Meeting School. Apply to ABEL J. HOPKINS, Thompson St. O., Newcastle Co., D.

FRIENDS' ASYLUM FOR THE INSANE Near Frankford, (Twenty-third Ward), Philadelphia.

Physician and Superintendent—JOSHUA H. WINGGTON, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board Managers.

DIED, 9th Mo. 13th, 1876, at the residence of daughter, LUCINA HARRIS, Winona, Columbiana Ohio, SAMUEL TEST in the 86th year of his age, a member of New Garden Monthly and Particular Meeting of Friends. This dear Friend was a firm believer in the ancient doctrines of Friends, but owing to be infirm he was not able attend meetings for several years, which privation he bore with patience; an trust, through Redeeming love and mercy, he was pardoned to enter the mansions of rest and peace.

—, at her residence, in Chester Co., Pennsylvania on the 24th of 2d mo. 1877, SIMKEY SHARPLES, wife of Benjamin Sharple, in the 85th year of her age, a member of Birmingham Monthly Meeting. —, at her residence in Ridley, N. J., on the inst., MARY THORN, an esteemed member of Rak Particular and Ridley and Plainfield Monthly Meetings of Friends, in the 65th year of her age. To who knew her quiet humble spirit and consistent it is easy to believe that her end was peace.

For "The Friend."

Diary of Christopher Marshall.

(Continued from page 214.)

1774. September 24. This same day began Quakers' Yearly Meeting, and continued a day to day until the first of October, which meeting they sent forth an epistle which has given great offence to the friends of dom and liberty in America."

The valuable epistle here referred to, will be found in full in Vol. 29, No. 36, of "The Friend," in one of a series of articles on "The City of Friends in Pennsylvania and New Jersey, from 1764 to 1782," prepared by the late Nathan Kite. It was addressed "To our Brethren and Brethren in these and the neighboring Provinces," and was widely circulated, referring to the manner in which the early settlers and disciples of Christ, "by faithfully adhering to His precepts, were ended with ending on high, qualified to spread His trines to distant nations, and after patiently enduring many afflictions, triumphed over through faith in His name." As their successors departed from the peaceable spirit and trines of Christ, and "sought an establishment by human wisdom and strength, their cooled, their faith decreased, and their city degenerated." It then states that our "forefathers and predecessors were raised to be a people in a time of great commotions, tests and wars, began and carried on for vindication of religious and civil liberty, which many of them were zealously engaged, when they received the knowledge of Truth; but through the influences of the world of Christ in their minds, they ceased from suffering with flesh and blood, and became obedient to the heavenly vision, in which they truly saw that all wars and fightings proceed from the spirit of this world, which is enmity with God, and that they must manifest themselves to be the followers of the Prince of Peace, by meekness, humility and patient sufferings." It then extends a caution warning, to carefully guard against being won into a vindication of their rights and privileges or seeking redress "by any means which are not consistent with our reasons profession and principles, nor with the Christian patience manifested by our ancestors such times of trial." Friends were also added to discourage every attempt to excite affection or disrespect to the king, who is then the legal head of the government.

Dec. 30. Debates in the Quaker Monthly

Meeting this day which held by and with adjournment till ten at night, and then adjourned to the second day of next month.

"1775. January 2. Which meeting held from six until near ten o'clock. The debates ran high respecting their conduct in these troublesome times that are expected. In regard thereto, their members were enjoined not to concern themselves in public disputes, nor to interrupt any of the king's officers in the discharge of their duty, but to pay all humble and dutiful obedience unto the king or his ministers' mandates, from time to time; not to join, nor to be in any of the city, county, provincial, or general committees, if so, whoever offends is to be dealt with as walking contrary to their discipline.

"24. Meetings daily among the Quakers in order, if possible, to defeat the pacific proceedings of the Continental Congress, calling upon their members not to meet the county committees, but entirely to withdraw from them, under the penalty of excommunication.

" * * This day was also a paper published called a Testimony of the People called Quakers, in which is contained such gross abuse against all persons that oppose their fallacious schemes, and stuffed with such false contradictions, that it will be a lasting memento of the truth of what Robert Walker, one of their public preachers, now here, often told them, and warned them to take care, because, says he, the Lord is departed from you, as he did from Saul, and has given you over to your own devices."

The testimony here referred to was issued by the Meeting for Sufferings, and contained measures which tend "to excite disobedience to the king as supreme magistrate, or to the legal authority of his government; and also writings whose spirit and temper is contrary to the precepts of the Gospel and destructive of the harmony of civil society." After stating that there was ground to believe that "decent and respectful addresses from those who are vested with legal authority" would avail towards obtaining relief and establishing the just rights of the people; it goes on to say, "We are, therefore, incited by a sincere concern for the peace and welfare of our country, publicly to declare against every usurpation of power and authority, in opposition to the laws and government, and against all combinations, insurrections, conspiracies and illegal assemblies."

Robert Walker, whose name is mentioned by C. Marshall, was a Friend from England paying a religious visit to this country, and was an honest, plain-spoken man. He attended the Yearly Meeting at Newport, in 1774, and at the close of the first sitting delivered this short sermon: "I request Friends will bring with them the next time they come together a little salt. God is not pleased with your unsavory offerings." In 1775, when about ready to return to England, he felt a concern to have a religious opportunity with

the delegates to the Congress, then sitting in Philadelphia. As he thought over the matter, he became much discouraged, and went on board the vessel in which he had taken his passage home, without making an attempt to see them. But an adverse wind was blowing, and the captain declined starting, and allowed his passengers to return on shore, saying he would send for them when he was prepared to sail. Robert now found that his peace of mind depended on obedience to his Lord's requiring; and by the aid of some of his friends obtained liberty to speak to the members of Congress. They were all patient and attentive, and Robert retired, doubtless much relieved. That evening he was sent for by the captain, and went on board the ship, which immediately got under way. Before morning the house of Joshua Fisher, where he had lodged, was surrounded by a company of armed men, sent at the instigation of Timothy Matak to arrest him. They searched the house, and not finding him, retired. The next day a cutter was despatched after the vessel he had sailed in. The vessel of war making great speed soon came near the object of its pursuit,—but at that moment a thick fog gathered round, putting an end to all progress. When at last this fog was raised, the ship could not be seen. The military men returned without their prey, and the honest preacher was safely waited to his native land.

"March 1. Early this morning, departed these parts, universally lamented by the friends of slavery, but to the joy and satisfaction of the lovers of freedom, that baneful and detested weed, East India TEA, whose return is never desired or wished for by the true sons of America liberty.

"23. The committee of the county of Cumberland, New Jersey, have published the behavior of Elias Newcomb, Esq., respecting persisting in drinking East [India] Tea, since the first of March, agreeably to the eleventh Article of the American Congress." No doubt the Diarist would have thought it a much more patriotic taste, if S. Newcomb could have contented himself with "New Jersey Tea," a beverage prepared from the leaves of the *Ceanothus*. It is somewhat amusing to notice in subsequent parts of the Diary, how fully reconciled the writer became to the use of the "baneful and detested weed." When at Lancaster in 1778, he writes: "Our good friend in town, Grace Hastings, sent my wife by daughter Patience, one pound [of] fine Green Tea, and would not take any pay for it. Charles Darragh brought it here yesterday, which was very acceptable to us."

"May 28. This day, it is said, Mary Harris, a Quaker preacher from Wilmington, visited the three Quaker meeting-houses in this city, in a very odd manner, viz., by walking through each of the preachers' galleries, then down, passed amongst the people backwards and forwards, seemingly in great affliction and distress, uttering, it is said, words to this

effect: 'See to your standing, for that thus the Lord was about to search and examine his camp,' &c., &c., and then said, 'I shall have peace in having thus discharged and done my Lord's errand. So farewell.' Of this startling and peculiar service we know nothing more than is here recorded; nor whether the report which reached C. Marshall correctly describes it. Yet his own course, and that of some others who were encouraging or joining in military movements, might well have given occasion for the sounding of such an alarm. For a few weeks before he notes, that "There was a company of young men, Quakers, who this day asked leave of the managers to learn the military exercise in the Factory-yard, which was granted, and they began this evening."

"June 30. This being Monthly Meeting, it's said J. [Emberton] took much pains in endeavoring to persuade the auditors, and they their acquaintance, by no means to keep the 20th of next month as a day of prayer and fasting, but to keep open shop and houses. This was in plain terms, saying, 'You may frolic as much as you please on that day, but don't by any means, suffer yourselves to be humble, or pray on that day, because it is appointed by the delegates for that service, to pray and worship God. This he pressed them to observe, that so they might not be like what he called the world's people. Here is another flagrant testimony to the decay of primitive Christianity, viz., 'Pray without ceasing.'"

The minutes of the Monthly Meeting of Philadelphia at this period evince the anxious concern felt by Friends of that day, for the preservation of their members out of entanglement in any thing, which would lead them away from that religion, which breathes "peace on earth and good will to men." The patient and long-continued labor, extended to reclaim some, who had been caught by the political excitement and led into measures inconsistent with their profession, are quite remarkable. The cases of some such re-appear on the minutes month after month; and when finally all hope of effecting a reformation seemed to be lost, the committee would be continued, not to prepare a testimony of disavowment, but to inform the offender, that the meeting would be compelled to adopt that course, if there was not a change. This tender, patient dealing, recalls the pathetic language of Hosea, "How shall I give thee up, Ephraim? How shall I deliver thee, Israel? How shall I make thee as Admah? How shall I set thee as Zeboim? Mine heart is turned within me, my repentings are kindled to gether." It may give the reader some idea of the burthens that rested on Friends at that time, to mention that at the Monthly Meeting of Philadelphia held in the 1st month, 1776, eighteen testimonies of disavowment were issued on military accounts.

(To be continued.)

Extract from a Letter of Richard Reynolds to his daughter, * * * The listlessness, almost amounting to lukewarmness of which thou complainest, is felt I believe at times, by every professor of faith in Christ, however sincerely desirous to be his disciple, at least I am sure it is by me as well as by thee; and like as by thee, lamented by thy father; but may we not hope we shall in the Lord's time experience deliverance from it, and does not the

sorrow it occasions excite our prayers at the same time that it proves we are not left in a state of torpid insensibility? How often have we desired to suffer pain rather than to become insensible? * * * While there is life there is hope; and however sincerely as justly we may disclaim the least shadow of merit, are we not conscious that ours is not the hope of the hypocrite, and may we not confide in His promise who has said, "I will never leave thee nor forsake thee?" * * * and if we read the experience of those whom we have reason to believe have been among the excellent of the earth, and without partiality I think I may refer to some of our own Society; from these it will appear that a great advancement in religious experience does not exempt from mental conflict and apprehending desertion.

For "The Friend."

Random Notes of Travel in Europe.

(Continued from page 236.)

We left Melrose in the morning for Edinburgh (pronounced Edinbro'), passing through a beautiful and cultivated country. The fine weather still continued, and we glided into the railway station, near Waverly bridge, under the brightest of suns. Edinburgh not being either a commercial or manufacturing city, we missed the lofty chimneys which generally surround the more southern towns. Through its famous university and schools, and its numerous and extensive book-selling establishments and printing offices, it has become in modern times a centre of intellectual radiance. Situated in this high northern latitude, Edinburgh may be said to wear an auroral crown of literature, whose columns shoot upward in her famous Review, her Blackwood's and Chamber's Magazines, and other brilliant evidences of a highly charged atmosphere. Our New England has seemed to me to be the Scotland of America, with this difference, that the tougher Scotch mind lacks an element of subtlety, which, on our side of the water, crops out in so many "isms." Edinburgh is a very stately and picturesque city, curiously divided by a deep valley running through its centre, part of which is laid out in private gardens. Rising abruptly from this depth, is the hill on which the castle stands, overlooking the city. These high and almost inaccessible rocky masses rising up so abruptly from a level plain, or valley, are a curious geological feature in Scotch scenery. In a state of society, when

"The good old rule, the simple plan
That they should get who have the power,
And they should keep who can,"
was in vogue; they offered facilities for "castle building," on a secure basis. We found our lodgings near George IV. Bridge, convenient to the most interesting points in the old city. The portions which lie on the opposite western side of the interesting ravine, were modern in character, and not unlike the elegant structures of our American cities. From the bridge we looked down into the Cowgate beneath, a narrow, irregular, dark street, leading from the grass market at the foot of the castle hill, to the precincts of Holyrood, at the other end of the city. On our left was the famous High-street of the ancient city, part of which is the Canonate. In its whole length from the castle to Holyrood, it bears as many as five local names. Beginning at the castle, with our faces towards Holyrood, which by the way lies low at the

feet of the surrounding hills, and a mile least from the castle, we find ourselves rounded by tall houses, with narrow fire-quoins and medieval in character, once residences of "the rank and fashion" of Scotch court, in the time of the Stuarts nearly all of them now in a most dilapidated condition, and within and without ruin. The house of Allan Ramsay, author of *Goose Pie*, stands detached, on the west side of street, called Ramsay Gardens. This house which was octagon shaped, but since altered, was, by his own waggish fire-quoins compared to a goose pie. He told Lord bank one day of this ludicrous comparison: "What," said the witty peer, "a goose pie in good faith Allan, now I see you think the house not ill named." So much pleasant and good humor are mixed with the history of Allan Ramsay, that life is one of the "green and sunny spots" literary biography. His genius was well-warded, and he possessed that turn of wit which David Hume says it is more happy, than to be born to an estate of thousands a year—a disposition always to the favorable side of things.

Not far from the Ramsay-house is a substantial looking mansion of the Seny family, on which is inscribed one of the favorite quotations from Scripture, so frequently found here and elsewhere on the side of houses. "Praised be the Lord, God, my strength, my Redeemer. Anno D. 1638." This was the house of Lord Seny who commanded the left wing of the army at Culloden.

Lower down the street we passed the of the famous Tolbooth, the prison of Edinburgh, which was destroyed in 1817, and door and padlock secured by Sir Walter Scott for his mansion of Abbotsford. It was gloomy pile, four stories in height, built 1561 for the imprisonment of offenders, as well as the accommodation of Parliament and Courts of Justice. Here an attack was made on James VI., who was suspected of secret favoring the Popish party, and here man, the Covenanters were immured previous their execution on the scaffold; and on its pinnacles frowned the heads of such men as the Marquis of Argyll, the Regent Moray and the "great Montrose; not far distant St. Giles, the old "parish church" of Edinburgh, where Montrose and Argyll were buried. The time at which it was built is certain, but it seems to have been previous the year 854. At the time of the Reformation it was divided into four places of worship one of which John Knox delivered his memorable harangues against the errors of the Romish Church. Here, four years ago Charles I. had established the bishopric of Edinburgh, Jenny Geddes threw her stool at the Dean's head for preaching offensive doctrines, and thus commenced "a storm against the introduction of Episcopacy, which raged for half a century in Scotland, deluged the country in blood, and was only allayed when the Stuarts were driven from the throne, and the government established on a basis of greater justice and liberality under the Prince of Orange." A small stone in Parliament Square marked I. K. 1572, indicates the last resting place of the reformer. This area, previous the Reformation, formed part of the cemetery of "St. Giles." Groups of smiling school-

strolling about, took in hand, over what once been the fine garden of Moray-house, the town residence of the Earls of Moray. We were shown several rooms bearing marks of ancient splendor, which was in a fair way to become dimmed beneath the hands of fifty or fifty active school boys. We passed through the school rooms, once the drawing-rooms of the stately house, to the stone balcony in front, from which a bridal party, the guests of Lorne, and his bride, the eldest daughter of the house, looked down upon the cart bearing to the scaffold their opponent, the Marquis of Montrose, whose desertion of the Covenanters and adherence to the Stuart kings, brought him at last to this ignominious death. Moray-house was occupied by us well during his first and second visits to Edinburgh, and the design to behead Charles I. is said, was here first broached. The name of John Knox stands a few yards below it is called South Grey's Close, where the first seditious contracts. Here he resided yearly, and here he wrote the History of the Reformation of Religion in Scotland, many of his fiery invectives against Popery. Over the door is the inscription "Love above all, and your neighbour as y^r self." Self-love, surely, was not excessive!

A place of especial interest in Edinburgh is the cemetery of the Grey Friars, once the site of the monastery, where the old monks died away their lives. Here we found the names of the most celebrated names in Scotch history. Here lies Allan Ramsay, the "Gentle Shepherd," whose house we had seen near the street, George Buchanan, the Latin poet preceptor of James I. of England, Robert the historian, Dr. Hugh Blair, Dr. Black, Mackenzie, author of the "Man of Feeling" and many others, whose sculptured effigies were so overgrown by moss and lichen as to be scarcely legible. On one side of the vaults the houses were built against, if not in the ancient walls, and cats crept out of low windows and sunned themselves on the grey tombs. In a sunny corner, not far from the entrance, was the nameless grave of a beloved master of "Grey Friars Bobby," an attachable faithful dog, whose attachment to only friend might rival that of Lovell's faithful hound, Beth Geleit. His tiny, curly legs, life-size, surmounting a small fountain of George the Fourth Bridge, always received our passing notice. This effigy was erected in his honor by the Baroness Burdett &c. The following notice appeared in the Scotsman, "1867, and presents Bobby's name to this distinction:

A very singular and interesting occurrence was yesterday brought to light in the High Court, by the hearing of a summons in regard to a dog tax. Eight and a half years ago it seems, a man named Gray, of whom nothing now is known, except that he was married and lived in a quiet way in some obscure part of the town, was buried in old Greyfriars church-yard. His grave levelled by the hand of time, and unmarked by any stone, was so scarcely discernible; but although no man interest would seem to attach to it, a sacred spot has not been wholly discredited and forgotten. During all these years, the dead man's faithful dog has kept constant watch and guard over the grave; and it was only a dog which the collectors sought to tax. James Brown, the old curate of the burial-ground, remembers Gray's

funeral, and the dog, a Scotch terrier, was, he says, one of the most conspicuous of the mourners. The grave was closed in as usual, and next morning "Bobby," as the dog is called, was found lying on the new made mound. This was an innovation which old James could not permit; for there was an order at the gate, stating in the most intelligible characters, that dogs were not admitted.

"Bobby" was accordingly driven out; but the next morning he was there again, and for the second time was discharged. The third morning was cold and wet, and when the old man saw the faithful animal, in spite of all chastisement, still lying shivering on the grave, he took pity on him and gave him some food. This recognition of his devotion, gave "Bobby" the right to make the church-yard his home; and from that time to the present, he has never spent a night away from his master's grave. Often in bad weather, attempts have been made to keep him within doors, but by dismal howls he has succeeded in making it known, that this interference is not agreeable to him, and latterly he has always been allowed to have his own way. At almost any time during the day he may be seen, in or about the church-yard; and no matter how rough the night may be, nothing can induce him to forsake the hallowed spot, whose identity, despite the irresistible obliteration, he has so faithfully preserved. Bobby has many friends, and the tax-gatherers have by no means proved his enemies. A weekly treat of steaks was long allowed him by Sergeant Scott, of the Engineers, but for more than six years, he has been regularly fed by Mr. Traill, of the Restaurant 6 Greyfriars Place. He is constant and punctual in his calls, being guided in his midday visits by the sound of the time-gun. On the ground of harboring the dog, proceedings were taken against Mr. Traill, for payment of the tax. The defendant expressed his willingness, could he claim the dog, to be responsible for the tax; but so long as the dog refused to attach himself to any one, it was impossible to fix the ownership; and the court, seeing the peculiar circumstances of the case, dismissed the summons. Bobby has long been an object of curiosity to all who have become acquainted with his history. His constant appearance in the graveyard, has caused many inquiries to be made regarding him, and efforts out of number have been made to get possession of him. The old curator, of course, stands up as the next claimant to Mr. Traill, and yesterday offered to pay the tax himself rather than have Bobby, "Grey Friars Bobby," to allow him his full name, put out of the way.

Continuing our stroll through this quiet resting-place, we were much moved by coming unexpectedly upon a lichen-covered slab in the wall, commemorating the "martyrs" of the Covenant. They were interred in the space formerly appropriated to malefactors, and over their ashes was erected a small enclosed garden, gay with pansies, bright verbenas and geraniums. Beneath the long inscription was the following: "From May 27, 1661, when the Marquis of Argyll was beheaded, to February 17, 1688, when James Renwick suffered, there were some eighteen thousand, one way or other, murdered, of whom were executed at Edinburgh, about one hundred noblemen, ministers, gentlemen and others, noble martyrs for Christ."

Every Scotchman is acquainted with the history of the Covenanters, but to many of us

the name is not familiar, and conveys no clear idea. One of their writers says:

"The National Covenant was a bond of union and agreement drawn up at Edinburgh in 1638, by the leading Presbyterian ministers, and subscribed by many persons of all ranks of life, and was binding on all who signed it, to spare nothing which might save their religion." The proximate cause of this extraordinary manifestation of feeling, was the attempt of Charles I. to enforce Episcopacy and the use of the Service-book in Scotland. "The subscribing of the national Covenant began in the winter of 1638, in the Grey Friars Church, and church-yard, at Edinburgh.* Those who subscribe the National Covenant, promise to 'continue in obedience of the doctrine and discipline of this Kirk, (Presbyterian.)"

"They also give assent to various acts of Parliament in the reign of James VI, which besides repudiating the jurisdiction of the Pope, and all the ceremonial observances and errors of the Romish Church, ordain all sayers, wilful hearers and concealers of the mass, the maintainers and recettory of the priests, Jesuits and trafficking Papists, to be punished without any exception or restriction."

The Solemn League and Covenant which dates from four to five years later, was much more comprehensive. Those who subscribe it setting out with a profession of attachment to the church of Scotland, are to endeavor to bring about a uniformity in religion and church-discipline in the three kingdoms, and further, "That we shall in like manner, without respect of persons, endeavor the extirpation of popery, prelaty," &c. This was subscribed by Charles II., at Spey in 1650, and Scoon in 1651.

"It is customary in popular lectures on the Covenanters, to overlook the fact in compassion for their sufferings, that they contended for what is now quite adverse to the principles of religious toleration. Yet in so far as the manful struggle in which they were engaged helped to accelerate the revolution, the history of the Covenanters must ever be associated with civil and religious liberty," though it may be open to question whether their aggressive course may not have rendered their cause more difficult by raising a violent and virulent defence of papal errors, leading to scenes of blood.

Richard Shackleton.

(Continued from page 194.)

R. S. to Hannah Plumstead, Jr.

* * * * * "The elders have been removed, and are moving off, a succession is wanting in the church. The call, the invitation is gone forth, the rich dainties of the Father's house are prepared, and all is ready. Be thou, my dear child, one of those who will give up their names to serve the best of Masters. There is no honor like the honor of His service; no reward like the reward which He

* "This covenant or bond was written on a parchment 'above an ell square,' which after it had been signed in the 'church' was carried into the graveyard and spread upon a flat grave-stone still extant, that of Bowell of Auchinleck, and signed by as many as could approach. It is mentioned as an extraordinary instance of fanaticism, that hundreds not only added to their signature till death, but actually cut themselves and subscribed it with their blood." Copies may be seen in the Antiquarian Museum.

For "The Friend."

bestows. As thou art faithful to the discoveries of His Spirit, in matters comparatively small, as thou surrenderest thy heart in unreserved dedication, and spreads thy garments and all superfluous branches of every luxurious growth in the way of His coming, great will be thy peace. But if thou sayest in thy heart, to the Divine Visitation, "Hitherto will I follow thee, and no further; if thou seekest the doves, (the seemingly innocent things) when the Master is turning them out of His temple, and if thou wilt not suffer the bitterness of death to pass upon that which is high and delicate, Goodness and Mercy will strive again and again, but thy way will be long about, and thy wilderness tedious. R. S."

How very true are the foregoing remarks of Richard Shackleton in regard to the securing of the doves, (or in other words,) the seemingly innocent things, withholding what might appear to us as harmless, as did the doves which the Saviour saw meet to drive forth with the cattle, from the temple. It matters not how small the thing may be which He may require us to give up, or to perform; if we but feel that He is calling for something at our hands, a true and filial obedience, will prompt us to yield to His commands. We do but make the way harder for ourselves, by lending an ear to the voice of the Reasoner, the Great Adversary of our soul's peace; for he is ready at any moment to seek an entrance into the heart, carefully watching his opportunity to gain, even if it be a small foothold, and so bewilder that we can scarce tell the voice of the true Shepherd from that of the stranger. We may indeed so give place to his plausible suggestions as to entirely lose our way and wander off into by-paths which are leading far from the fold or the Shepherd's tent; whereas, if we do but seek earnestly for strength to enable us to do the will of the Most High, as He, in love is pleased to reveal it unto us, He will more and more become unto us our Diviner and our Helper. And in thus yielding obedience in little things, we shall in the end be better prepared to follow Him, if needs be, through the fire and through the water, for we shall have learned, through suffering, that perfect obedience, which He ever requires of his faithful followers. These shall come to realize in their own experience, that there is One, who can make "hard things easy, and bitter things sweet," and it will more and more be to them as their meat and drink, to do His will.

Under date of 1st month 21st, 1777, Richard Shackleton again writes to Hannah Plampstead, Jr.:

"There is nothing appertaining to man more noble and glorious, than the cause of religion, and an eye is now and then opened in us, which sees it to be so; but unless we be diligent in spirit to have this sight renewed, and this vision of life repeatedly impressed on our understanding, in our frail state the things that are present will be apt to operate more forcibly on our nature, than the things which are to come. The splendor of this world, and its spirit, in some shape or other, will be ready to dazzle our view, or hinder us from seeing the intrinsic beauty and comeliness which is in the Truth. I have at times pondered why the visitation and call of Divine condescension should be so universal, and yet there should be so slender a succession in this generation, of servicable, gifted men and women in our religious Society. I have thought the defect

has been here,—that the visited of the Lord have not sufficiently humbled themselves under His hand, nor gone down the number of times appointed them to wash in Jordan; Ah! yes, it must indeed be, even the seven times dipping (if it be His command); but we are prone to stop short of this, and query too much, as did Naamao of old, saying in effect, "Are not Abana and Pharpar, rivers of Damascus, better than all the waters of Israel? may I not wash in them and be clean?" It is the implicit obedience, the individual faithfulness which is so much needed, even at the present day, when the same query may arise, and meet with the same response; so they come not up sufficiently cleansed, they are in some degree, but not altogether clean, there still remains some of the old disorder to be seen, their flesh is not like that of little children, of whom it is said, "Of such is the kingdom of heaven," and to whom all the mysteries of the kingdom are revealed.

I wish for thee, dear friend, to walk steadily in the path of an humble follower and disciple of Christ, that thou mayest witness Him to be a Comforter indeed, and experience those consolations which flow as a river into the hearts of those, who in the fulness of dedication, offer up their all to Him, and are desirous above all things, to walk acceptably before Him. R. S."

(To be continued.)

CUMBERED ABOUT MUCH SERVING.
"Come ye yourselves apart . . . and rest awhile,"—
Mark vi. 31.

BY H. W. B.

Christ never asks of us such busy labor
As leaves no time for resting at His feet;
The waiting attitude of expectation,
He oftentimes a service most complete.

He sometimes waxes our ear—our rapt attention,
That He some sweetest secret may impart;
"Tis always in the time of deepest silence,
That heart finds deepest fellowship with heart.

We sometimes wonder why our Lord doth place us
Within a sphere so narrow, so obscure,
That nothing we call work can find an entrance;
There's only room to suffer—to endure!

Well, God loves patience! Souls that dwell in stillness,
Doing the little things, or resting quite,
May just as perfectly fulfil their mission,
Be just as useful in the Father's sight,

As they who grapple with some giant evil,
Clearing a path that every eye may see!
Our Saviour cares for cheerful acquiescence,
Rather than for a busy ministry.

And yet, he does love service, where 'tis given
By grateful love that clothes itself in deed;
But work that's done beneath the scourge of duty
Be sure to such He gives but little heed.

Then seek to please Him, whatsoever He bids thee!
Whether to do—to suffer—to lie still!
'Twill matter little by what path He led us,
If in it all we sought to do His will!

In Favor of Arbitration.—The policy inaugurated by my honored predecessor, President Grant, of submitting to arbitration grave questions in dispute between ourselves and foreign powers, points to a new and *uncommonly* the best instrumentality for the preservation of peace, and will, as I believe, become a beneficent example of the course to be pursued in similar emergencies by other nations.

If, unhappily, questions of difference should at any time during the period of my administration arise between the United States and

any foreign government, it will certainly be my disposition and my hope to aid in settlement in the same peaceful and honorable way, thus securing to our country great blessings of peace and mutual offices with all the nations of the world.
Inaugural Address of President Hayes.

For "The Fri"

Notes of a Southern Visit.

(Continued from page 235.)

During our stay at Petersburg, we spent part of the time in visiting some of the and in their own homes; as was frequent practice in other places. We were interested in the insight which this gave into the manner of life and the habits thought of those we had left our homes; and we often found evidences of real and practical faith in the Lord's sustenance, which were comforting and encouraging. On this occasion we were accompanied by a colored man who was a deacon of the Baptist churches, and who had piloted us to the different homes.

We first visited Peter Ramsay and his wife. We found him an infirm old man of 80 years, hovering over a little fire in a grate, but occupying a comfortable room, and supported principally by the assistance received from his son. This couple had been married more than 40 years, and had always lived in this vicinity yet had belonged to different owners, never had been able to live together till days of freedom came. Sometimes they had been allowed to see each other every week, and sometimes oftener. Their man had been kind and reasonable people; but the boon of freedom was highly prized. The old man said he blessed the Lord for the year of freedom he had lived to enjoy.

We very often met with proofs of the value the former slaves set on their liber and noticed with interest the decided manner in which they repelled the suggestion, that the old condition of things possessed some advantages over freedom. When at Hamp Virginia, a sensible colored man with whom we were conversing on this subject, made of this comparison: You may shut up a man in a cage, and give him plenty of food, but the door is open he would prefer to go and pick up his own gravel. Another free man, whom we met with in the south-west part of Georgia, rejoiced over the extinct of slavery as "one of the greatest things" that had ever happened to this country. He said he would not give one year of freedom for his years of slave life, "for nothing in this world I would not be a slave again—*never*. Such was in substance the universal testimony.

After leaving the house of Peter Ramsay our guide next took us to a miserable shanty. We entered a small room destitute of a window, but dimly lighted by numerous cracks in the weather boarding, and by opening where some steps led into a loft above. The floor was of earth excepting a few boards in one corner. There was little or nothing to be seen in the shape of furniture, but a few old boxes, and perhaps a table. Although it seemed to me the most forlorn habitation to be occupied by a human being, that I have ever seen in. When our eyes became somewhat accustomed to the dim light, we found an old colored man of 94 years, sitting by the side of an open fire-place, on which a lit

was smouldering. With an old hand, he was endeavoring to cut in two a stick was lying on a box before him, so as to put up his fire. As we approached him in dark and gloomy apartment, he dropped old saw, grasped our hands as heavily as we were old acquaintance, and seemed at a great us as brethren beloved in the Lord. As we stood beside this aged servant God, (for the apartment was destitute of fire so far as we observed,) we felt that there was spiritual light in this miserable abode, and that the Lord's presence was indeed encamped round about. His tongue was loosened to speak of Heavenly things, and in response to our greetings, he said, that outwardly he was growing very weak, but that his principal strength and constitution was his inward life, that there he was still young. His chief theme seemed to be thanking and praises unto God, who so abundantly filled his soul with joy and gladness. His wife died about ten months before, and he had been living alone. He cooks, washes and cares for himself; and does not wish any one to reside with him. In summer he raises a few vegetables in a little plot of ground adjoining his cabin; and with his rod line often obtains a mess of fish from the pomatomox, for he is said to be a skillful fisherman. His main dependence, however, is the care extended by his colored brethren, to supply his more urgent wants. The porter of our hotel, a very respectable, elderly colored man, who sometimes visited him, said he was very "heart thankful" for any little gift given him; and that he himself would rather talk with the old man than with half a dozen young people.

Destitute of comfort as the surroundings of this old man, he seemed contented and happy, looking forward with entire confidence to the day in which he must pass over Jordan to enter the promised land. When told that he had come from a distant city, he seemed overcome with thankfulness to the Lord; and expressions of gratitude were very affectionate. Laying his hand over his heart, he spoke of the goodness of the Lord in placing his Holy Spirit there; and recognized as brethren Christ all who had the same blessed experience; for there was but one Lord over all, who encouraged us to go on in the good work which the Lord had engaged us, and asked us to bless the labors of love to which we were called. It was a most tender and refreshing season, in which the visitors rejoiced to listen to the words of this dear aged saint, and to notice his unshaken faith in a happy eternity. He spoke of going to heaven as a *travail* that was not to be broken.

He said he had "broken the ice of repentance" some 73 years ago, and since then had been scratching and struggling through the world. He had worked as a slave till old age and feebleness rendered him unprofitable to his master, and then he was allowed to take care of himself as best he could. He was never educated, but by availing himself of the opportunities that presented, he had become able to read a few verses in the Bible. For many years he was a preacher among his people; and one who had listened to him said, that those who heard him were often astonished at the power and authority with which he spoke. He was so evidently under the teaching of Christ himself, that though his preaching may have been without the "enticing

words of man's wisdom," we were quite prepared to believe that it was "in the demonstration of the Spirit," as the apostle Paul declared was the case with him.

Our kind attendant was pressed for time, and we were compelled reluctantly to leave this spot, where outward gloom, poverty and discomfort prevailed; but where the light of God's Spirit shone, and His goodness and presence were conspicuously manifested. So we bade farewell to the dear old man, poor as to this world, but rich in faith, and an heir of the kingdom of Heaven—where he had laid up his treasures and where his heart was fixed.

We next went to the residence of Winnie Jones, a woman of 98 years, blind and poor. She seemed to be a goodly old person, and said she prayed the Master to take her home, but He had not done it yet. Our guide had but little time at his disposal, so that we were cut off from those seasons of quiet waiting on the Lord together, which we would have been glad to enjoy with these interesting people. Yet the visits were instructive and refreshing to us.

The next point beyond Petersburg, was Norfolk. On our route, it was interesting to observe the long rows of stacks of the vines of the pea-nut or ground-nut. The cultivation of this plant has much extended of late years, so that now about 500,000 bushels of the nuts are annually raised in the south-eastern counties of Virginia; as well as large quantities in the more Southern States.

As we were passing down the James' River in the steamboat, one of the officers of our vessel became so irritated at the language and conduct of a man who was under the effect of liquor, that he lost control of his temper, and knocked the man down. After a while the excitement which this produced quieted down, and one of the passengers, at a suitable time, spoke to him of the impropriety of becoming angry; and of the necessity of being imbued with the meek, forgiving spirit of the Saviour, if we ever expected to enter His kingdom. The officer expressed his sorrow for what he had done, and seemed in a cool, satisfactory frame of mind.

Both at Petersburg and Norfolk we were told that the Presidential election had been conducted in a peaceable manner. Indeed, we heard of no exception to this, either in Virginia or North Carolina; though in South Carolina there was much violence, and we were told by persons likely to be well informed, that about 200 colored men were killed in that State on political grounds, during the few months prior to the election. These murders were principally, though not exclusively, in the south-western counties bordering on the State of Georgia. Horrible as this statement is, the condition of things in Louisiana was far worse. There, nearly 400 of the negroes were murdered in the same period—as we were told by a citizen of that State. At Norfolk, the colored people had been advised by their leaders not to remain about the polls, but to leave immediately as soon as their ballot was deposited, so as not to be implicated in any disturbance that might arise. They acted on this advice, and the voting proceeded rapidly for a time. To defend them of their rights, a system of tedious questioning was commenced, by which time was wasted with irrelevant queries. The result was, that when the legal hour for closing

the polls arrived, as many as 200 in one ward were prevented by want of time from putting in their votes.

When in the interior of South Carolina, we were kindly and nicely entertained for two or three days at the house of a very sensible and respectable colored man, who was a member of the State legislature. His wife was a woman of education and refinement, and had spent several years in teaching. The county in which they lived had been less disturbed than some others. Yet here, one of their people had been shot in open day in his wife's presence; and as our landlady described the occurrence, and related some of her own trials and fears, we were impressed with a stronger sense of sympathy than would have followed from a statement of more bloody deeds at a distant point. For some time prior to the election her husband did not dare to spend the night in his own home; and on one occasion, when a party of armed men had come into the little town where they lived, he came about 11 o'clock at night, and advised her to leave. As she went out into the darkness, to seek refuge in the country, with her little girl in her arms, she exclaimed, "Lord, is this freedom?" W.

(To be continued.)

For "The Friend."

The Indian Problem.

A report has been recently published upon the condition of the Indian Agencies and the tribes under the supervision of Friends, in the Indian Territory, by S. A. Gulpin, chief clerk in the office of Indian Affairs, at Washington, who has made a tour of inspection among them during the last autumn, and thus gives the facts and conclusions drawn from his visit. The paragraphs extracted from it below contain encouraging testimony to the practical working of the system adopted by Friends, with interesting views respecting the best modes to stimulate the Aborigines in their progress toward civilization:

"In conclusion, and taking a more general view of the service, the marked advance among these Indians, who have been for the past nine years under Agents nominated by the Orthodox Friends, seems to me to justify some special notice. When their Agents first entered upon the work, the Kiowas and Comanches near Fort Sill, and the Cheyennes and Arapahoes north of them, were all hostile, often defiantly so. Raids upon Texas and Kansas were constant. The strength of the Indians was then so far superior to that of the military that a tone and plan of conciliation was, of necessity, adopted both by the military and the civil agents of the Government. The present disposition and temper of these Indians I have attempted to briefly outline in the foregoing reports, and while I cheerfully yield all credit to the brilliant and effective campaigns more recently instituted against them, by which they felt fully and sharply the superiority of the Government, yet, for the progress of the Indians, since their surrender, and for their present desire for improvement, the credit should be given to the Agents and to the policy which the Orthodox Friends through them, have endeavored to carry out.

I trust it will not be understood that I consider the "Indian problem," so far as it relates to these Indians, as solved. Very far from it. Only the first few steps, and those often feeble and halting, have yet been taken

by the Indians. There will be required much of watchful care and attention: there will be much of discouragement and embarrassment. An impartial observer, who is acquainted with the labor and self-denial incident to the establishment upon the frontier of a white pioneer with all his foresight and skill and habits of industry, and who considers also that these Indians who are expected to attain to self-support are entirely unaccustomed to labor or to steady employment of any kind, and are, indeed, trained to despise them utterly, will not look for instantaneous results or complain that their progress is slow.

It is utterly useless to attempt to transplant the Indian at once from his roving, barbarous life to the steady, quiet life of the agriculturist. The step is too great to be accomplished at one bound; and a hasty glance at the theory upon which it is based will, I think, go far to show its fallacy. That theory briefly is this: Given an Indian, no matter how restless and lazy, and improvident he had come by tribal tradition and personal indulgence to be, that the simple placing of that Indian in a log-house, with sufficient, though perhaps rude furniture, with a well near at hand, a few fruit trees, a patch of broken prairie, some agricultural implements, and a few head of stock, all of this, be it remembered, furnished without effort on his part, and upon a mere oral request, made without serious thought, and, probably, often with the purpose only of self-aggrandizement—that, indeed, this simple change of conditions would change throughout his nature and life; and that by such simple means the most restless and supercilious and insolent of all Indians would, in a scant two or three years, become quiet, law-abiding and industrious, models to Indians and whites alike, of all the virtues of civilization.

Such being the theory, what is the result? As all these benefits cost the Indian nothing, so he very naturally places no value upon them. He will be quite likely soon to abandon his log-house for the old lodge, which he will set up at a different point on the stream, will use his fence-rails for firewood, his stock for food, and allow his patch of land to grow up to weeds, thus affording a fresh and costly illustration of the old adage, that a pig in a parlor is a pig nevertheless.

But the problem of Indian civilization requires something more than all this. Any change in the condition of the Indian effected in this way would be, after all, but a very thin coat of very poor varnish. Let the Indian first feel the need of a better and more permanent shelter, of a herd of cattle and of fodder for their winter's use. Let him show the depth and sincerity of his professions by doing with his own hands so much of the work as his skill and knowledge will enable him to do, and then aid and encourage him. To this point these Indians have now come, and they need instruction and guidance. As they now have absolutely nothing in the line of civilized comforts, and are by nature improvident, and as, further, their first efforts will be always crude and often misdirected, it will be some years before they can be expected to become entirely self-supporting.

Furthermore, any advance of this kind can be best made, indeed can be made at all, only under the incitement which is given by the presence and hearty efforts of a thoroughly responsible and self-denying Agent. No the-

ory of Indian civilization which does not clearly recognize that the Indians are in the main but children with stronger prejudices and passions, with greater shrewdness in the detection of fraud or indifference, and perhaps a more absolute predisposition to idleness and mischief, will, in my judgment, result in any substantial reform or change in their habits of life. Nor will any theory bring prompt and satisfactory results which does not avail itself of the great power for good which lies hidden in the imitative faculty of the Indian and his high appreciation of personal example. He can be easily persuaded to follow; he can be driven only with difficulty. To him the Agent, representing the strength and dignity of the government, is a model. If that Agent is honest, enthusiastic and efficient, able and not ashamed to swing the axe or hold the plow, and at the same time possessed of such good sense and judgment as to secure the respect and confidence of his Indians, he will gain many more followers and an infinitely wider influence in leading them on in industrial effort, by an occasional trip to the fields or to the woods, than any military officer sitting quietly at his desk, and conducting the work of administration in military style through his orderlies and assistants."

For "The Friend."

The following striking testimony, in proof of the fact that intellectual education constitutes but an imperfect safeguard against great temptations, was recently given before a committee of Liverpool magistrates, by "Rev." John Jones:

"I have had an opportunity of paying a visit to a very educated city in Sweden—Gothenburg. There were 11,000 children in the city, every one of whom was at school, (?) and it has been for a very long period the universal practice in Sweden to educate every child. I found that in that city, which has a population of 60,000, with all this education, there were more commitments for drunkenness, in one year, than in the city of Edinburgh with 200,000 inhabitants—a sufficient proof that education is not the panacea which some think it will be. I am satisfied that the remedy lies mainly in the removal of the temptation."

A Quaint Old Bill.—The following curious account for restoring a chapel was engraved in French on a watch crystal in the Swiss department of the Vienna Exposition. The whole was placed on a scroll less than an inch square. A painter had been employed to repair a number of pictures in a convent; he did it, and presented his bill in full for 59 francs and 11 centimes to the curate, who refused to pay it, saying that the committee would require a full detail. The painter produced it as follows:

Corrected and revised the Ten Commandments, 5 francs and 12 centimes; embellished and renewed Pontius Pilate, and put a new ribbon in his bonnet, 3 francs 6 centimes; put a new tail on the rooster of St. Peter, and mended his comb, 3 francs 20 centimes; replaced and gilded the left wing of the Guardian Angel, 4 francs 17 centimes; washed the servant of the High Priest, and put carmine on his cheeks, 5 francs 12 centimes; renewed Heaven, adjusted two stars, gilded the Sun and renewed the Moon, 7 francs 14 centimes; reanimated the Flames of Purgatory, and re-

stored some soals, 6 francs 6 centimes; vivified the Flames of Hell, put a new tail the Devil, mended his left hoof, and did several jobs for the Damned, 4 francs 10 centimes; put new spatter dishes on the Son of Tob and dressing on his back, 2 francs; cleaned the ears of Balaam's Ass, and shod him 6 francs 7 centimes; put ear-rings in the ear Sarah, 2 francs 4 centimes; rebordered robe of Herod, and readjusted his wig, 4 francs 4 centimes; put a new stone in David's Shoe, enlarged the head of Goliath, and extended legs, 3 francs 2 centimes; decorated No Ark, 3 francs; mended the shirt of the Prodigal Son, and cleaned the pigs, 4 francs 9 centimes. Total, 59 francs 11 centimes.

Home and Happiness.

If there is a desire which is shared by the human race it is the desire of happiness. Indeed, this may be said to be the foundation of all desires, or rather that which embraces and includes them all within itself. The germ of wealth, the thirst for fame, the yearning for applause, the longing for affluence, the hope of excellence—all have their root in the natural desire for happiness. It is cause some one of these things seems to hold out the best promise for happiness that we are solicitous to gain it; otherwise we would lose all hold upon us. This is wholly a selfish desire. Deep down in the heart of each man and woman dwells the wish for other's happiness as well as his own. It may be weak for want of active effort; may be obscured by the larger presence of self-interest; but it is there, and if nurtured and developed is one of the richest sources of earth's enjoyments. The readiness with which a community will respond to the needs caused by some sudden emergency is alone sufficient proof of the universal existence of this desire. Yet in our daily commonplace life it is apt to sink into the background and be crowded out by the too prominent and absorbing cares and ambitions which have self for the centre.

There is one source of happiness which seldom, if ever, fully appreciated or made to yield half the delicious enjoyment it is capable of affording. We allude to *home life*. There are more exciting pleasures, more in petuous gratifications, more bewitching attractions, but nowhere can we find more solid and permanent happiness, more calm and enduring satisfaction, more innocent and glorious joy, than in a family home where love reigns supreme. One cause of this lies in the perfect naturalness of its relations. There is nothing forced or arbitrary about the grouping of this assemblage. The father and mother have been drawn together, it is to be hoped, by mutual affection. The children, bringing with them new interests and new joys, have found, one by one, their appointed places and their glad welcomes. It is no artificial assembly, gathered together for some avowed purpose, and dissolved when that purpose is gained. It has, indeed, no direct mission to fulfil outside its own boundaries. Its existence and happiness, and the mutual good of its members, are its sufficient aims. Each member, it is true, has other relations and duties to the outside world, but the family, *as a family*, is a little world in itself. All the socialistic enterprises which have striven to supplant this institution have failed, simply because they were warring

inst one of the strongest instincts of human nature; that which draws father, mother and children under one roof-tree and around a hearthstone.

Another cause of the happiness which family life is capable of shedding may be found in the importance with which each member is invested. We all love to feel ourselves centres around which others revolve; comparatively few in society can have this experience. Most of us are ever circling and others, and are thus reminded of our insignificance; but at home each one is centre. No matter how obscure or petty life may seem in the out-door crowd, let it once enter the sacred portal of home and becomes of consequence. His health, his prospects, his interests are here discussed with avidity, his tastes are consulted, his affections prized, and his whole being seems invested with a higher dignity.

It is true, however, that many families do not realize this happiness. Sometimes this is because they lack the vitalizing power of love, without which family happiness must here and die as surely as the plant without sun. More commonly, however, the love here, but obscured and shadowed by numberless little vexations, tempers and discontents. The husband truly loves his wife and will risk his life for her without a moment's hesitancy; yet he continually sacrifices happiness to his own self-will or ill-humored selfish indulgence. The wife is sincerely attached to her husband, and in any great trial of life would be his staunchest supporter; she carelessly makes him the victim of fretfulness or extravagance, or neglects to make a cheerful and inviting home for his weary hours. So with parents and children, long cords of affection bind them together; the harsh reproof or the stern denunciation on one side, and the sharp retort, or the sullen silence on the other, loosen the bonds and destroy the unity of the relation. It is not great griefs that mar the harmony of family life. It is the faults, little neglects, thoughtless words, harsh exactions, bad habits. There are many things that we crave, that we can never acquire, but a happy home is accessible to whosoever will take the pains to obtain it. It does not require much money, deep culture, great talents nor marked talents;—it does need love, its main support, and the constant expression of that love in kindly deeds, gentle words, and willing self-denial.—*Philo. Ledger.*

THE FRIEND.

THIRD MONTH 17, 1857.

We have received a copy of a publication forth by the late Joseph Bancroft, ofilmington, Delaware, entitled, a "Persuasion to Unity." It is addressed to all bearing the name of "Friends," and as its title indicates, the professed object of the author is to induce the different organizations, claiming to represent the Society, to ignore their differing views, both of doctrine and practice, to meet together as one religious body. His work is being now very generally distributed among the members of Philada. Yearly Meeting by the executors of the writer, in accordance with directions left in his will to that effect; and this fact induces us to allude to it,

under the fear that our younger, and inexperienced members, may be induced to accept the erroneous premises and conclusions laid down by its author, that there is no sufficient existing difference to prevent those who separated from Friends, in the year 1827, and those who adhered to and still maintain the faith of the early founders of the Society, from affiliating with each other in religious communion. We have no doubt but that J. B. was an amiable and well-meaning man, who sincerely wished to promote a coalition of all who professed to be Friends, under the idea that such a union would be productive of philanthropic and beneficent results; but it is evident that he had some very confused, and in certain respects, unsound ideas on the subject of the Atonement and offices of Christ in his relation to the church, and that in his zeal to advance universal benevolence, he would sacrifice some grounds of Christian testimony which are indispensable to the fellowship that is with the Father and his Son, Jesus Christ.

On page 13 he says, "Universal love is that without which men cannot profitably meet together for the worship of God, * * * nor be joined together in meetings; in which joining of men consists that manifestation of God in the flesh, which is the body of Jesus Christ in substance, the church of the living God." Again, page 38. "Thus we may understand that the cause of men meeting together for divine worship in faith, is God dwelling in them by Jesus Christ, the One Mediator between God and man, in his incorruptible body of flesh and blood." The first extract would seem to assert that what the Apostle speaks of as, "God manifest in the flesh," (1 Tim. iii. 16,) is a body of men meeting for divine worship, instead of Christ in His outward appearance as a man; and the 2d broadly, and of course erroneously, conveys the idea that Christ's indwelling in the hearts of believers, is in His "body of flesh and blood," instead of by his Holy Spirit. On page 298 we note this paragraph. Speaking of the "love of the Truth," he says, which love "is that by which the body of Jesus Christ, the true light of the world, the church and form of God manifest in the flesh, was and is preserved from corruption. This body is one, and is sent into the world under necessity to suffer, and to rise from the dead the third day after men with wicked hands, cruelty and slay any member of it; that repentance and remission of sins may be preached in the name of that one suffering and risen body among all nations, beginning at Jerusalem."

It is evident from these and other portions of the book, that J. Bancroft claims for the "church" or assembly of believers, the qualities and offices that belong only to Christ, their Head and Mediator; seeing that he calls them the "true light of the world," whereas the scriptures testify, that Christ "was the true light," &c. The statement that repentance and remission of sins is to be preached in the name of the body or church, is not only contrary to the text from which the quotation is partially made, (Luke xxiv. 47,) but is in direct contradiction to the declaration that "there is none other name under heaven given among men whereby we must be saved," but the name of Jesus Christ of Nazareth. (Acts iv. 12.)

In commenting upon the schism of 1827,

he remarks, "My lot fell with the larger part, who took the initiative step in the division, claiming not to have deviated from sound doctrine, and to have taken that step only to avoid contention. By this course and claim they saw no cause to set forth any statement of doctrine, other than that they were in unity with the writings to that time approved by the Society, and had no new doctrines to promulgate."

We would be far from desiring to prove or believe that all those who separated from the Society of Friends with Joseph Bancroft in 1827, and who have adhered to that organization since, were not or are not in unity with the approved writings of the Society then extant, or that they generally wish to promulgate new views; but it is important to keep in mind the specific declaration made by a meeting of those who took a leading part in organizing the separate Society in Philadelphia, at that time, "that doctrines held by one party to be sound and edifying, were considered by the other to be unsound and spurious;" and that Elias Hicks, in a public sermon in Arch Street Meeting, in 1825, when speaking of the miraculous conception of Jesus Christ said, "We cannot suppose it was the outward body of flesh and blood that was begotten of God, but a birth of the spiritual life in the soul." That on other and later occasions, he denominated the worship of Christ as *idolatry*, and declared that the shedding of His blood was of no more benefit to mankind than the blood of a bullock.

We cannot but think Joseph Bancroft a very unsafe counsellor to our youth on such subjects, when he can so lightly ignore the evil influences which must result from attending meetings where such doctrines as the above are liable to be promulgated. The subjoined paragraph will exemplify the dangerous latitude advocated by him respecting religious association and fellowship in the work in question. "When meetings are held in and under the form of God for worship or discipline, what can justify any sanctified persons, called to be saints, in declining the attendance of them in their respective places, * * * or to introduce by certificate from such meeting to another those who advisedly change their residences; even though such meetings in every place are attended by Satan also, who continues to go to and fro in the earth, and to walk up and down in it and to appear in them in a legion of persons?"

We think a more fitting answer to such a sophistical argument as the above quotation contains cannot be found, than appears in Barclay's Anarchy of the Ranters, which Bancroft reprints almost entire in the body of his work, and from which we quote as follows, viz:

"Were such a principle to be received or believed, that in the church of Christ no man should be separated from, no man condemned or excluded from the fellowship and communion of the body for his judgment or opinion in matters of faith, then what blasphemies so horrid, what heresies so damnable, what doctrine of devils, but might harbor itself in the church of Christ? What need then of sound doctrine, if no doctrine makes us-and? What need of convicting and exhorting gain-sayers, if to gain-say be no crime? Where should the unity of the faith be? Were not this an inlet to all manner of abomination; and to make void the whole tendency of

Christ and his Apostles' doctrine, and to render the gospel of non-effect! To give a liberty to the inconstant and giddy will of man to innovate, alter and overturn at his pleasure!"

SUMMARY OF EVENTS.

FOREIGN.—The Turkish Minister of Foreign Affairs informs the Ottoman Ambassador at London, that the reforms proposed and already accepted by the Turks are already being applied, including revision of the arrears of taxes due to 1st mo. 1st, 1877, in the provinces that have suffered from war, and maintenance of the right to property already acquired by the Christians in Bosnia and Herzegovina.

The elections have been completed throughout the Turkish empire, the results are beginning to arrive in Constantinople preparatory to the opening of the two Chambers next week.

The Montenegrin and Turkish representatives have had various interviews without, so far, coming to an agreement. The demands of the Montenegrins are in some particulars more than accepted by the Turks. The Ottoman government firmly maintains the ground that it will make no concession which will directly or indirectly interfere with its integrity or independence as the supreme power of the nation.

According to an official statement of the Serbian Minister of War, the Serbians lost 8,000 men killed and 20,000 wounded in the late operations.

The Egyptian finance committee has accepted the proposal of de Lesseps, in the name of the Suez Canal Company, to complete the work on the Suez Canal between Sairo and Ismailia, provided the company be authorized to levy certain dues upon vessels passing through. The canal is nearly completed. The works were formerly abandoned, for want of funds. By the execution of Lesseps' plan large tracts of desert land will be reclaimed to cultivation.

An explosion took place the 8th inst. in the Worcester colliery, near Swansea, South Wales, attended with a lamentable loss of life. Sixteen dead bodies were abandoned, for want of funds. By the execution of Lesseps' plan large tracts of desert land will be reclaimed to cultivation.

On the 9th inst. a fire broke out in St. John, N. B., attended with the loss of some lives and much destruction of property. Estimated loss over \$250,000.

On the morning of Second mo. 24th, a remarkable eruption of a submarine volcano occurred near the coast to Ketchikan Bay, in the Sandwich Islands. Blue and green lights appeared on the surface of the water, which boiled up and was agitated like the rapids of a torrent; blocks of lava, red hot and emitting sulphurous steam and gas, were thrown to the surface, while noises were heard in the depths beneath. A small rupture also extended inland for a distance of nearly three miles from the shore, the rent varying in width from a few inches to three feet.

The Times' dispatch from Calcutta says the number of natives on the relief works in the Madras Presidency has decreased 47,500 in the past week, while there has been a small increase in Bengal, the spring crop is coming on in the most distressed districts of Madras. The Mysore government reports that nearly two-thirds of the area and half of the population of Mysore are affected by the famine, and water is scarce.

An Egyptian man-of-war which was cruising in the Gulf of Suez to break up the slave traffic, took fire at Suez, and was completely destroyed, including all on board of whom 400 were saved, including all the Europeans.

It is reported that the German Postmaster-General will soon propose to the Postal Union the introduction of postal clerks serving for all countries in the union at the rate of one penny each.

At an election held in the French Senate on the 10th inst. for a life Senator to succeed General Chaignier, deceased, Stanislas Dupuy de Lome, obtained one hundred and forty-two votes, being the exact number required to elect. The new Senator is a Bonapartist.

The past winter has been the severest known in St. Petersburg, Russia, for many years. On the night of the 11th inst. the thermometer marked near 20° below zero.

At Pesth, Hungary, the weather has been very stormy. A dispatch from that city of the 12th inst. says there has been some loss of life and property. The railways are blocked, and traffic in this city at a stand still. The snow is from three to five feet deep in the streets, and in some places twelve feet.

UNITED STATES.—On the 7th inst. President Hayes sent his Cabinet nominations to the Senate, as follows:

Secretary of State, William M. Evarts, of New York; *Secretary of the Treasury,* John Sherman, of Ohio; *Secretary of War,* George W. McCrary, of Iowa; *Secretary of the Navy,* William A. Wood, of Michigan; *Attorney General,* Charles Devens, Jr., of Massachusetts; *Postmaster General,* David M. Key, of Tennessee; *Secretary of the Interior,* Carl Schurz, of Missouri. The nominations were all referred. Some of the Republican Senators are dissatisfied with the nominations, especially those of David M. Key, who does not profess to be a Republican, and who espoused the Confederate cause and served throughout the war as an officer in the rebel army; and Carl Schurz, whose all-giance to the Republican party is considered doubtful. President Hayes, it is understood, wishes to pursue a policy of conciliation towards the South, and if possible counteract the tendency rapidly and also to effect a much needed reform in the civil service.

The Union Pacific Railroad opened 1038 miles of road last year, and the gross receipts were \$2,887,500, expenses \$3,208,000—leaving a net income of \$7,619,400. The land department of the road has sold altogether 1,350,000 acres of land for \$4,900,000. The land still unsold amounts to 10,758,131 acres.

On the night of the 6th inst. a fire in Bond St., New York, destroyed property of the estimated value of more than one million of dollars.

The United States Senate, when full, has 76 members of whom 39 are Republicans and 34 Democrats, with three vacant seats. In the 49th Congress, which expired in 1879, eighteen are Republicans and six Democrats.

The exports of produce from the port of New York, between 1st mo. 1st and 31 mo 6th, amounted to \$50,064,659, against \$47,347,039 for the corresponding period in 1876, and \$41,003,325 in 1875.

The steaming New Orleans recently went to sea through the South Pass without any detention. At the time she went through the jetties the tide was nine inches below mean high tide. Her draft being 192 feet, the success of Captain Eads' labor at the mouth of the Mississippi is clearly shown.

The attendance at Philadelphia last week numbered 331. The number of visitors to the Zoological Garden during the year ending 31 mo. 1st, was 67,265. The total number of visitors since the opening, 7th mo. 1st, 1874, was 1,304,598.

The present population of the Black Hills is about 6,550, a large immigration is in prospect for the present year. The attendance at Philadelphia last week numbered 331. The number of visitors to the Zoological Garden during the year ending 31 mo. 1st, was 67,265. The total number of visitors since the opening, 7th mo. 1st, 1874, was 1,304,598.

The bill allowing the intermarriage of whites and blacks, which was introduced in the House of Representatives in 1877, and which the House of Representatives has been indefinitely postponed in the Senate by a decided vote.

All the remaining Cabinet nominations were favorably reported and confirmed in an executive session of the U. S. Senate on the 10th inst. The nomination of McCrary as Secretary of War, Thompson as Secretary of the Navy, and Devens as Postmaster General were confirmed without a division, and in the other cases the vote was nearly unanimous. Sherman's nomination had been previously confirmed without waiting for a favorable report by a committee. Senator Cameron and others still dislike the President's selection of his own private secretary, which they regard as an approval of the declared policy of President Hayes.

There were 511 births and 526 deaths reported in New York city last week.

The Governor of Pennsylvania has notified the Legislature of the resignation of Simon Cameron as United States Senator, which took effect in April, 1879, and the Governor of Ohio has notified the Legislature of the resignation of the resignation of Senator John Sherman, both Legislatures will take measures to fill the vacancies. J. Donald Cameron, late Secretary of War, is a candidate for the senatorial chair so long occupied by his father.

W. W. Seward, son of the late Wm. H. Seward, has been appointed Assistant Secretary of State.

The Markets, &c.—The following were the quotations on the 12th inst. Philadelphia.—American gold, 113½; U. S. sixes, 1881, 111½; do. 1868, 113½; 113½;

do. 5 per cents, 1881, 109½; do. 4½ per cent 1196. Middleupland rails and New Orleans cut a 12½ cts. Flour all raises from 75 s \$10.00 to 75 s \$10.12½ according to quality. Pennsylvania red wheat, \$1.55; Ohio do., \$1.48 s \$1.50; amber, \$1.55 s western white, \$1.60 s \$1.65. Rye, 75 s 80 cts. Yellow corn, 54½ s 57 cts. Oats, 37 s 45 cts. New cheese, choice, 15 s 16 cts.; do. western, 14 s. Sales of 3400 beef cattle at 61 s 63 cts, per lb. g extra; 51 s 6 cts. for fat to good, and 41 s a 5 cts. for fat to fair. Hogs, 17 cts. per lb. gross. 1880 head, Hogs, 87 s 9 cts. net per lb. Fat 3800 head, New York.—Superfine flour, 56.25; State extra, \$5.90 s \$5.85; finer brands, \$6 s. White winter wheat, \$1.60; red winter, \$1.48; Chicago spring, \$1.40. Penna. rye, 84 cts.; St. Louis, 82 cts. Corn, 41 cts. per bushel, \$3.45 per 100 lbs. Chicago.—No. 2 spring \$1.23; No. 3 do., \$1.15. Corn, 39½ cts. Oats, Barley, 48 cts. Lard, 89.05 per 100 lb. net. Live—Uplands cotton, 62½; Orleans, 61 11-16d. Louisiana. The bank rate of interest remains at 2 per cent. Loans are made in the open market at 1¼ per annum on three month bills.

TRACT ASSOCIATION FRIENDS.

The Annual Meeting of the Tract Association Friends will be held in the Committee-room of Street Meeting-house, on Wednesday evening, the 14th inst., at 8 o'clock.

Friends generally are invited to attend it.

EDWARD MARIS, C.

FRIENDS' SELECT SCHOOLS.

A suitably qualified Friend is wanted as Prince the Boys' Select School, at the opening of the 10th of the Ninth month. Application may be made to

Joseph S. Elkinton, 331 South Fifth St.; Edward Mars, 127 South Fifth St.; James Smalley, 415 Market St.; George J. Scattergood, 413 Spruce St.

WESTTOWN BOARDING SCHOOL.

WANTED, A TEACHER to take charge of the "8 ROOM" at the above Institution; one qualified to instruct in all the branches taught in the G. DEPARTMENT.

Application may be made to

Rebecca S. Allen, 335 South Fifth St., Philadelphia; Elizabeth Blood, Haddonfield, New Jersey; or Martha D. Allen, 525 Pine St., Philadelphia.

WESTTOWN BOARDING SCHOOL.

THE SUMMER SESSION opens on Second-day the 6th of Fourth month. Parents and others intending to pupils, will please make early application to BENJ. W. PASSMORE, SUPT., (address Street Road, Chester Co., Pa.), or to CHARLES J. ALLEN, Treat 304 Arch St., Philadelphia.

FRIENDS' ASYLUM FOR THE INSANE.

Near Frankford, (Twenty-third Ward,) Philadelphia. Physician and Superintendent.—JOSHUA H. WOLSTON, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board Members.

DIED, 11th mo. 23d, 1876, at her residence in Wilmington, Delaware, MARY GIBBONS, in the 82nd of her age, a member and elder of Wilmington Mon and Particular Meeting. In early life this dear Fr gave evidence of her attachment to the doctrines and testimonies of our religious Society, which she was determined to maintain, and was ever ready to suffer, but her members in conversation, in charity, in faith in purity. Always diffident in the expression of religious exercises, she was mostly silent on this point; yet, during the progress of a protracted illness, fruits of the Holy Spirit were increasingly manifested by her patience under suffering, and the calmness and cheerfulness with which she spoke of her approaching dissolution; leaving to her friends the consoling but that her end was peace.

On the 9th of 2nd mo. 1877, JOSIAH BRIDSON of Jonathan and Elizabeth Bridges, in the 31st of his age. He was enabled to glorify his Creator through several months of severe suffering; he had much pertinent counsel to those around him, friends have the consoling evidence that his end was peace. He was a member of Coal Creek Monthly M. Cong. Iowa.

For "The Friend."

Diary of Christopher Marshall.

(Continued from page 24.)

ing diary reveals some of the difficulties arising out of the Continental paper money issued by authority of Congress. As one of the principal objects for which it was issued, was purchase of military supplies, and in other cases promoting warlike measures; many members of the Society of Friends refused on conscientious grounds to be instrumental in circulating it. There were doubtless other reasons who objected for political reasons, many who had little confidence in its ultimate financial value. How correctly these things will be seen by some of the extracts which follow.

1776. January 30. After five, went to the committee Room, Philosophical Hall. At this time, complaint was made against John Hopson, hatter, for refusing taking Continental money, who, being sent for, acknowledged he did, and that in point of conscience, refused it, upon which he was to be considered agreeably to the resolve of Congress,* to be referred for one week, in order for to consider well of it.

31. Near six, went to [the] Committee room at [the] Philosophical Hall. At this time, Thomas and — Fisher were sent upon a complaint of their refusing the Continental money, to which complaint they made no objection, by acknowledging the complaint to be just and true, and said that from science's sake, they could not take it in; upon which they were ordered to be inserted in the public papers next week."

Several similar entries are made by our author, who also copies an order issued by the Council of Safety, in the 10th month of 1776, which John Baldwin, for a similar refusal, committed to jail, "there to remain with bail or mainprize until he shall be released order of this Council, or some other person fully authorized so to do."

In the approach of General Howe's army Philadelphia, C. Marshall thought it most prudent to remove with his family to Lancaster. Under date of "January 22, 1778," observes—

"This is a wonderful place for variety of Congress ordained that persons refusing to receive Continental Bills of Credit, should be deemed, published and treated as enemies of the country, and be expelled from all trade or intercourse with the inhabitants of the colonies.

sentiments and behavior. You may speak and converse with some, whose sweet countenances will tell you that you are highly agreeable to them while you talk to them in their way, but change the discourse by asking them to spare you some hay, oats for horse, wheat, rye, wood, butter, cider for yourselves, &c., &c., to be paid for in Congress money; oh! then, their serene countenances are all overcast, a lowering cloud spreads all over their horizon; they have nothing to say, nay scarcely to bid you farewell."

So it seems the Lancaster county farmers of a century ago did not choose to part with their produce without receiving what they considered a fair equivalent. The continued depreciation of the Bills of Credit, is shown by the high price of commodities purchased with it.

"Jan. 21, 1779. Wheat ten dollars per bushel."

"May 30. Butter yesterday in market sold for two to three dollars per pound, meat of different kinds from four shillings and six pence to ten shillings per pound, flour (little in market) Twenty Pounds a hundred, green peas from twenty shillings to twenty-five shillings the half-peck. House rent risen from Fifty pence per year to Five Hundred Pounds," &c.

"June 2. Paid Grace Hastings Eighty dollars for two silk handkerchiefs."

Having been elected a member of the town Committee at Lancaster, he proceeded in connection with his fellow-members to settle a scale of prices at which sundry articles should be sold. This was agreed upon on the 16th of the 6th mo. 1779, but on the 25th of the same month, he says:

"After dinner went and met committee at their room in [the] Court House. Sundry affairs were brought before them, amongst the rest, a poor man complained that John Hopson, a committee-man, chosen but [who] never attended, charged two shillings and six pence per pound [more] for coffee than was stipulated. He, being sent for, attended, confessed the fact, and [said] that he would sell no more without he was suffered to sell at his price. The behavior of Hopson satisfied the whole committee that he was no more a friend to the country than his interest led him, that being his ruling passion, it's said.

"Oct. 16. Four dollars for two loaves of bread.

"Feb. 14, 1780. After breakfast I took [a] walk to [the] vendue of Cornelius Sand's household goods, where they were sold extravagantly, as per a specimen here annexed to show that the people here in general set no store by our Continental paper money, viz: A frying-pan, Twenty-five pounds; A wood-saw, Thirty-seven pounds, ten shillings; Three split bone handled knives, three ditto forks, rusty, Twenty-two pounds, ten shillings; An old mare of eleven years old for Eight hundred and five pounds; one gallon stone

bottle of the best sort. Seven pounds, ten shillings; one common razor without a case, with hone for setting, Twenty pounds; one pair of common spectacles in case, Eighteen pounds; small Dutch looking-glass, six inches by four, no ornaments, but worse by age, Eight pounds, ten shillings; fifty sheaves of oats for Eighty pounds; an old eleven-inch square face eight-day clock, walnut case, Two hundred and ten pounds; an old straw-cutting knife, box, &c., Fifty pounds; and so, in general, throughout the sale, the which so amazed me that I told them it was high time for a Bellam to be built in Lancaster.

"April 12. After breakfast, went by my wife's desire, to the drum-maker, to try to get two rims for these rats without bottoms. Returned without them, as he had no stuff to make them of, nor would the farmers, he said, sell him any timber without hard money, so must remain idle in his business.

"Jan. 5, 1781. This day Major Wertz was bound over before Wm. Henry, for refusing to take the State money at the value of gold and silver."

"April 8. Manny went to the potter; bought eight hundred dollars' worth of earthenware."

"May 17. Lent John Jones yesterday three hundred Continental dollars to pay Jacob — for four State dollars at seventy five for one."

It was natural for C. Marshall to look with an unfavorable eye on the British troops who had driven him from his own home in Philadelphia; of whom he accordingly speaks, as a "handful of banditti, to the amount of six or seven thousand men, headed by that monster of rapine, Gen. Howe." In another place, the expression occurs, "Gen. Howe, the head of monsters and brutes." He could not but observe the public demoralization that war inevitably produces in a people exposed to its corrupting influences; and in his diary mentions that "R. Whitehill and myself lamented in conversation over the distressed state of this province, through the ill-conduct and mismanagement of our chief officers in public stations, the indelicate and profane conduct of the inferiors in every other department, the atrociousness of their public and private behavior, with the total neglect of religion, discipline and good order." In the same entry occurs this paragraph: "Last night, I understand, there was in Lancaster what is called a brilliant ball, to which assembled a great number of fops, fools, &c., of both sexes, old and young. It was kept at the house of Major Wertz, formerly a tailor who, sometime past, and many others there met, made a pretense to religion, and to be followers of a crucified Jesus, but are declaring now by their wanton behavior that they will not have him to reign." In the Fourth month of 1781, he says: "The behavior and conversation of most here on the nature of the times gives me pain. Men in words assuming to be hearty Whigs, but in

their behavior rank Tories and enemies to Independency, there being but a small number of the true, sincere-hearted Whigs left here at present to mourn for the abomination of the times, and of such there is great need, as so great a number are engaged in monopolizing, gaming, drinking, dancing, swearing, idleness," &c.

Many of the entries in the Diary, refer to his own domestic concerns, particularly his troubles with their girl "Poll," who seems to have been fond of roaming about and very unreliable; and a servant man named Antony, apparently a little deranged, who delighted in preaching at Friends' Meetings (greatly to their annoyance) and wherever else he could find an audience to listen to him. When set to watch the orchard, from which the boys were in the habit of stealing the fruit, Antony settled himself down in a chair, and paid no heed to what was going on. When reprimanded for his neglect, his answer seems to be that "He thought it his duty to be still and not disturb them, as by so doing he should have peace in himself and a blessing would attend him!" Frequent mention is made of the domestic virtues and good qualities of his wife, who seems to have been a notable house-keeper, and was highly appreciated by her husband. The diary closed on the 24th of 9th mo. 1781, and the last entry refers to poor Antony, who "in the kitchen got to preaching in a strange manner to the negro woman, so that my wife was obliged to interfere upon his saying he would strive to please no man, for he acted as the Lord bid him."

Richard Shackleton.

(Continued from page 244.)

R. S. to a Friend in the Ministry.

"Ballitore, 25th of Seventh month, 1780.

"Dear Friend * * * I trust, in this spirit you, we commended ourselves to the consciences of the visited, as those who sought not ourselves nor the prevalence of any party; but solely the prevalence of Truth, the welfare of all. As to myself, who am one of the least in the family, my mind was much covered with love to you, and my attention drawn to thee in a particular manner. I thought I saw that from the gift which thou hadst received, and the place which thou held in the regard and esteem of the generality, thou might be of peculiar use and service in that city; to defeat which gracious purpose of heaven no doubt but the grand adversary of all good will employ his engines, and he who had the effrontery to tempt the Master himself, (though in vain) will not fail to lay his snares for the servant, how high soever his attainments may be. May thy spirit be so reduced, and self in its various modifications so cast out, that when the prince of this world cometh, he may have nothing in thee—he may find no desire of applause, popularity or pre-eminence, to work upon. And as thou witnessest from time to time, and patiently abidest, the stripping, purging seasons, which are absolutely necessary for the fruit-bearing branches to bring forth more fruit in the progression of heavenly virtue, thou wilt, I trust, in the Lord's time (not thy own) feel the sap of life rising, to thy own inexpressible comfort; thy leaf, the ornament and comeliness of the tree, as well as defence of the fruit against the sunshine of deceitful favor, shall not wither; but whatsoever thou doest at the Master's bidding,

be it ever so little, shall prosper. * * We may have natural or acquired abilities, we may have spiritual gifts and graces conferred upon us, useful in their kinds and places, but if they tend to exalt the creaturely, the fleshly part—if we look more at the splendor of the gift, than at the Giver—if we endeavor to seek ourselves with the Lord's jewels, and to be conspicuous in the eyes of others, seeking the praise of men more than of God, we shall suffer great loss; the gift may for a while be continued, for the sake of the people; but it will decrease in beauty and lustre, and perhaps be wholly taken away, while the capricious applause of unstable men will be changed into contempt. On the contrary, not seeking honor one of another, but the honor which cometh from God only; when a very little matter comes before us to deliver, not looking at the smallness of the morsel, but whether the Divine blessing be upon it, let us not be ashamed to hand the little even to the multitude; being set home by the power of Truth to the conscience, it may be altogether sufficient. It is remarkable how the wisest of men, who spoke three thousand proverbs, expresses himself concerning a single word, 'A word fitly spoken is like apples of gold in pictures of silver; and again, 'A man hath joy by the answer of his mouth; and, 'A word spoken in due season how good it is.'

Thou knowest, my dear friend, thou hast sorrowfully felt, that a great depravity has overtaken us; the people are too much outward, they have, many of them, forsaken the Fountain of living waters, and chosen to themselves this and the other cistern, at which they would drink; their souls are not bowed in silent, solemn worship, silent meetings are foolishness to them, like the Israelites when they rejected the Lord. 'Now make us a king to judge us like all the nations.' This spirit is to be famished, not fed.

May Divine wisdom guide thee, may Divine power humble and exalt thee, may thy God preserve thee from all manner of evil, now and forever.

Thy affectionate friend, R. S."

Under date of 1st of Second month, 1786, R. S. addresses the following letter to Mary Watson:

"Dear Cousin, * * * It seems to me as though it was the will of the great Ruler of the universe, to strip off every false covering of every kind, and lay us naked and bare (as we really are,) before him and before one another. There has been an evil covetousness,—the wedge of gold and Babylonish garment,—there has been an ostentatious parade, and an aspiring to live above the simplicity of Truth, in which is the safety and quiet; the professors of the religion of Jesus Christ, revived in its original purity, have not, many of them, been willing to drink of the cup that He drank of, nor to be baptized with the baptism which He was baptized with; we must get lower and deeper, ere we as a people, become exalted, conspicuous in glory. May such as are sensible that these things are so, be favored with ability to wait and watch unto prayer, for preservation from evil, and for strength and wisdom to walk wisely before the flock, over which, by Divine appointment, they have been made overseers! All our movements are seen and known to our Great Judge; he understandeth all the imaginations of the thoughts of our hearts. This fountain must be thoroughly and often purified, in order that

what proceedeth therefrom may be savory, and edifying. A little thing, and unites; so the little things are to be guarded against, as well as those of greater magnitude, the secret faults, as well as the flagitious; for holiness is to be the clothing of Lord's servants, and this will not be any that are unclean; indeed I often think that it is a capital favor that we are at so clearly convicted in our minds of to be said or done amiss, and that the healings are so soon administered. * * The afflictions are not personal, but general, ably overflowsings which I should do to save for myself. R.

(To be concluded.)

For "The Fr

Notes of a Southern Visit.

(Continued from page 245.)

In our walks around Norfolk, we call on an old blind man, aged about 80, whose was sick. Whatever others might do, he he was bound to get to Heaven. His reply to the question, How he expected to do it? by faith in the Lord Jesus Christ, and his prayer. He seemed quite animated.

We also visited Mary Sheppard, a looking, elderly colored woman, who had suffered greatly in the past three months w rheumatic affection in her right arm, w had swollen it so much as to break the She was living in a comfortable apartm and was more disposed to praise the Lor her blessings, than to murmur at her s ings. She referred to the impression duced on his hearers by a certain serm the colored Methodist minister at Nor which she said was daily or very frequ in her remembrance. On that occasio minister felt that he was not to preac sermon he had prepared; but closing the and turning his thoughts inward, waite the Lord to give him a text and open his jeet before him. A passage of Scripture presented itself to his mind on which he sp as he believed, under the immediate hel guidance of the Holy Spirit. The effe the people assembled was unusually gre an audience, as he was told, that the Le preaching is better than man's.

We had satisfactory meetings at Port Portsmouth and Hampton. We found Baptist minister at Portsmouth, with w we became acquainted a year ago, in afflic from the recent death of his wife. He his people reminded him of the lessons he formerly taught them; but he added that best physician when taken ill needed so body else to prescribe for him. He see in a humble, tender frame of mind; and attention was directed to a patient and missive waiting on the Lord, that he mi receive comfort and spiritual strength f the only safe fountain. It was pleasa find that the visit of last year had left a o dor for service on the present occasion.

At Hampton, a large body of colored p ple are congregated; and the means of p curing a subsistence seemed to us inadeq to supply their wants. Many labor as oys men or fishermen. The number of w persons, or of those possessing capital, is c paratively small; hence there is less dema for laborers than in many other places. Ma of the people earned their own houses had not yet paid for the land on which t were built. Wood was dear, as it was

a distance of from six to ten miles in rude carts drawn by diminutive oxen, being about one-third of a cord at a load, weather was cold, and the people poor; we believe there was much suffering among them, living as they often do, from mouth; yet the thought presented, a degree of comfort and consolation, that were under the protecting care of that merciful Father, who, as our Saviour said, feeds the sparrows.

The labor in the colored Methodist meeting, was close yet tender; touching on soullessness of empty profession in religion; absolute necessity of a change of heart, arising the cross, of submission to the will of the Lord; and of being cleansed, fitted and prepared for the kingdom of Heaven, where light that is impure can never enter. Though tendency of the communication was to off all fig leaf covering, and to arouse to examination, yet there was encouragement for those who were sincerely striving to be right; and attention was called to the promise of our Saviour, that all things necessary should be added to those who seek first the kingdom of Heaven.

The forenoon was spent in visiting the Normal and Agricultural School located at Winton, which is under the charge of S. C. Armstrong, who was born in the Sandwich Islands, being the son of one of the early missionaries sent there from the United States, trying here in on a generous scale—and happily well kept. The number of boarders of both sexes is now 218, and there are in addition 40 or 50 day scholars. The pupils are charged \$10 per month for board, and are credited with the work done. The young men take turns in laboring on the farm, cooking on the table, &c. The girls do the sewing, make up clothing, wash, iron, &c. Their bills are made up for each pupil. One of the boxes we examined contained items about as follows:

12 hours rowing,12
8 hours farm work,61
Care of green-house,	3.00

We examined a map on which were marked a star, the locations in which 175 schools are taught during last year by graduates of this institution. They were principally in Virginia and North Carolina, though scattered over some of the other States. Among teachers we found Mary E. Atkinson, author of a thoughtful poem "On the Mountain" and some other poetical pieces.

The building put up for the use of the "convents," during the war, by General Butler, situated on the school farm. In it a public school is kept, taught by graduates of the Normal School, to which it may be considered adjunct.

The number of scholars in this institution steadily increased; and we rejoiced to see many of them being trained up under instruction and surroundings of an elevating character.

In Suffolk, we found many both of the colored men and women were engaged in the oystereries. The oysters which are brought during the day, are opened in the evening packed so as to be ready for shipment on the following day. This rendered the meeting smaller than it would otherwise have been.

On going down the Chowan River, we left boat at Winton, a place which had pre-

sented itself, before leaving home to enter on this visit. On inquiring there, we found there was a settlement of colored people at a place called Pleasant Plains, some five miles back from the river. We left our baggage at the hotel, and after walking about six miles found the house of Willis Weaver, an elderly colored man, and one of the deacons of the Baptist church, of which these people are members. He received us kindly, opened the way for a meeting on the next day but one, and invited us to tarry with him—an invitation which, in our wearied condition, we were glad to accept. The family were very kind and attentive, kindling a fire in our chamber before we retired for the night, and again before we arose in the morning.

We found ourselves in the midst of a thrifty settlement of colored people, who were freeborn; not one of the members of their church (numbering over 200) ever having been in slavery. Many of them own good farms of a moderate size; our host having one of 56 acres; his son-in-law, whose land adjoins, one of 90 acres; while L. W. Boone, with whom we became acquainted last year, has nearly 400 acres. They raise cotton, corn, pea-nuts, hogs, &c.

In the morning we found our kind host had already sent out notice of a meeting for 11 A. M. the next day—and he and his family used considerable exertion to spread the information. Neither Willis nor his wife could read, but they were careful that their children should be well educated. Four of them had been at the Hampton School. The opposition the old man felt to the Democratic party was founded on the fear, that if successful it would neglect or discontinue the public schools, and thus close up one of the avenues of instruction for their race.

The place of meeting was a new, but unfinished house, without doors or sash to keep out the wind. But the day was so mild and pleasant that this caused little inconvenience. The universal love of God to mankind was pointed out, from the language of Peter, "God is no respecter of persons, but in every nation, he that feareth Him and worketh righteousness, is accepted of Him." They were exhorted to a faithful use of the talents entrusted to them; so that at the end of time they might receive the joyful message, "Well done, good and faithful servant, enter thou into the joy of thy Lord;" and not be cast off with the sentence, "Depart from me, ye workers of iniquity." The satisfaction was expressed, which their comfortable way of living had given us; but the caution was added, that in cultivating their farms, building their houses, and clearing up their lands, they should be careful not to have their thoughts too much engrossed with these matters. Our Saviour said to His disciples, "Lay not up for yourselves treasures on earth, where moth and rust doth corrupt, and where thieves break through and steal; but lay up for yourselves treasures in Heaven"—for where your treasure is there will your hearts be also. Those who would grow in grace, must seek for daily spiritual bread by having their hearts daily turned to the Lord, seeking of Him guidance and help.

L. W. Boone afterwards supplicated for us and our families, and that a blessing might attend our labors. We parted from these people with much affectionate interest, which we believe was reciprocal. For there is a

cementing influence in being favored to partake together of the streams of Divine consolation.

(To be continued.)

For "The Friend."

Want of Standard Bearers.

In looking over some of the back numbers of "The Friend," I have been much interested, and believing the following would be read with interest by many, would be glad to see it republished in this valuable Journal.

"The removal of faithful laborers and bright examples in the Church of Christ, has always brought feelings of sadness over survivors who loved the cause of Truth, and desired the preservation of the flock. In a preface to the works of Charles Marshall, William Penn says, 'It is with some sadness that I remember the departure of so many of the Lord's worthies, as a little time hath deprived us of; but I have sometimes comforted myself in this, that the Lord intends to take His church more immediately under the care and ministry of His own blessed Spirit, whereby that loss would be more than repaired.' And also to raise up more servants, and bestow upon them such measures of the Holy Ghost, and power from on high, as to be thereby amply qualified to gather home the residue of the dispersed of Judah and scattered of Israel, to the hill and city of God; and though they should not attain to the first rank of the Lord's worthies, yet that they may deservedly be reckoned among those who served God and their king valiantly.' We have great occasion at this day to look at the stripped state of our Society, in having removed from it a large number of men and women who had been taught in the school of Christ, and were made quick of understanding and spiritual discernment in the fear of the Lord, by the light and power of the Holy Spirit revealed in their hearts. They did not get their religion by mere human effort or study, but by submitting to the will of God inwardly revealed, and acting in obedience thereto under the humbling power of the cross of Christ. When prepared for it, gifts of various kinds were given them by their Lord and Master, and they exercised them as they were bidden by Him, and received the anointing from Him; and then the divine life from the Holy Head flowed, and circulated from member to member, and the church edified itself in love. But a very active spirit, whose time seems always ready, has taken possession of many, who appear to be little acquainted with dying daily, that Christ only may rule and live in them; and in the midst of much doing and saying, the life that is more than meat, we may fear, is greatly wanting.

Should the trials which the Society is now enduring, lead us back universally to the teachings of the Holy Spirit, and humble us under a lively sense of our inability to conduct the affairs of the church, and to keep ourselves from falling away, the Lord in mercy, we might hope, would hear our prayers put up in sincerity to Him, and in His ancient goodness, put it into the hearts of many to arise and anoint the shield, and stand firm for the defence of His precious cause, as our forefathers stood for it, in the integrity of their hearts. Wm. Penn concludes with saying,

"His works will demonstrate from what fountain they spring, even heavenly love and zeal, for the stirring up of those that read them,

to the fear, love, and service of the everlasting God, and that truth, unity, peace and concord may increase and be multiplied among the Lord's people, where they come. And I would add what I earnestly desire, viz., that the friends of God would be diligent in stirring up their children and family frequently to read the Holy Scriptures, and the writings of our ancient departed Friends, which are an eminent vindication of the Divine authority of that blessed book, upon the experience of those faithful ministers and servants of Christ. And that all who make profession of the holy and blessed Truth in the inward parts, would make the lives and labours of those worthies of the Lord, their lively and constant examples in their known seriousness, retirement, silence, self-denial, temperance, humility, meekness, tenderness, brotherly kindness, and sincerity to God and His people; that so there may be a succession in sobriety, righteousness and godliness, which is the very sum and substance of religion; and that one generation may become heirs in holiness to another, till days be no more, and time be swallowed up in eternity."

For "The Friend."

Extracts from a Chinese Lecture.

For some months past a Chinese mandarin, who speaks English well, by the name of Wong Chin Foo, has been lecturing in different parts of this country on subjects connected with his native land. In the course of a late visit to this city he delivered an address on Domestic Life in China, from a report of which the following passages are extracted, which are interesting as showing the view which is taken of some of our habits and practices by an intelligent Chinaman:

"The Chinese question is one that has been a great deal talked about during the last two or three years. Why should it not be much talked about, when thousands of Chinamen are coming into this great country, and especially when these Chinamen present to us such wonderfully striking peculiarities. It would create such a feeling in any nation. I can remember the time when an American, an Englishman, or a Frenchman created just such an excitement in China. Why? Because their peculiarities were such to us that not a single man among the Chinamen would believe those peculiar people were civilized. Is it possible, they say, that such a curious looking being, dressed up so funny, and speaking so different from us, is it possible they can have reason, like a civilized Chinaman? and I have heard the same about Chinamen in America. But I contend that the Chinaman is as civilized as an American; that the Chinaman knows about as much of principle, and broad domains of thought, as one of these intelligent Christian Americans. We are told that these 450,000,000 of people are enlightened, degraded, and without knowledge of high principle, as well as conception of a Supreme Being; that they are evidently without any reason; without education; without refinement, without imagination. Is it possible that this number of people, who are ruled with such grand excellency, and have such peace and prosperity, and happiness, and without one-tenth as many murders and terrible crimes as I have known in nations of only forty or fifty millions, are without intelligence or civilization? It is impossible, indeed, to govern such an empire without intelligence,

We claim that the Chinese Empire is a refined one, with all the opportunities of intellectual improvement, and that the Chinamen are not ignorant heathens, and were not so thousands and thousands of years ago. They invented some of the most useful sciences of civilization; for example, the art of printing with movable types; also, engraving was first invented by the Chinese; they were the first to invent the mariner's compass; the first cannon, the first suspension bridge, and the first marble structure; as also the first civil service, and the first school. All these were originated among those heathens. There are 75,000 rulers in China, and no man can rule except those who have regularly pursued a course of literary examination; among a hundred thousand men not more than two of those are selected for rulers. Neither rank, wealth nor influence will put a man into a high position. They are examined by a company of wise men, who must not be ignorant of the affairs of the government; 75,000 of these must be selected from 75,000 times 5,000 students.

We have our ways, and you have yours. We are living just on the opposite side of the earth, and it is not strange that we have different ideas. For instance, you box the mariner's compass to the north, the Chinamen to the south, but the Chinamen can sail from the port of Shanghai to Liverpool just as straight as the Americans. The Chinese are in every respect opposite to Americans. It is night time there when it is day here. I noticed the moon the other day upside-down, our moon does not look that way in China. We do not take off our caps in that barbarous fashion, when our friends are coming to call, the very first thing we feel if our caps are on, if not on, we put something else on our heads, a piece of paper or anything. Then, again, you take hold of your friend's hand and squeeze it, and perhaps give him pain all over his body; we take hold of our own hands when we want to make our friends happy, and squeeze our own hands; we torture ourselves, you torture your friends. In eating, you begin a meal by eating soup before any thing else; we sit down to all kind of delicacies, and when we get dry after eating these, perhaps we drink a cup of tea, and last, we have soup, which is very nice, especially birds' nest soup.

We do not understand how it is possible that such a great nation as you are use but twenty-six letters to represent all your ideas. We cannot represent all of ours with sixty-five thousand of them. Now, in this matter we are also opposite from you; we begin to write from the right hand side to the left, you the other way; you also combine your letters, while we frequently make one word by a single letter, or one letter to represent a whole sentence, and no letter is written without a reason for it. 4,500 years ago the Chinese communicated their ideas by pictures. For instance, if a man wanted to sell me a horse, he would draw a picture of a horse and then holding his hand for a piece of money, as if he began for money, which meant I want money for the horse. This was the primitive way, but in the latter days they have reduced these signs to hieroglyphics, but we can still trace them back to the original. I remember the very first day I was taught in the English language; it happened to be the first word I learned was the word horse. My professor said h, o, r, s, e, horse. I repeated h o r s e,

horse, and then turned over the page looked through the book to see if I could see anything like a horse, but seeing not like one, I said, where's the horse, how you make a horse out of h o r s e? He said h o r s e is a horse according to our language. I have not time to draw a picture, but draw what represents a horse in our language and in yours, and you can judge which is the most like a horse. The nouns are easy to represent, but you may want to know how to represent adjectives and verbs. Take adjective 'good'; we draw a picture of a boy and little girl, side by side looking at and to represent 'trouble' we draw three women together with their tongues fast to each other. Verbs all represent action, it is necessary we use portions of nouns that act, as our hands or feet, or head; if we think that will perform action; if we use the word 'fetch,' we make our feet to go our hands to get. Everything they write written with a reason. When the little has learned four or five hundred of these begin to teach her sewing; we think it is work properly belonging to her sex, which is quite contrary to the nature of a man, who has more physical power, to sit down, cut, sew, and use the needle; hence if a man follows the occupation of a woman, he is not loved to hold a public office; likewise, a woman follows the occupation of a man, she is not so much respected as if she followed her own department. Then we teach the young girl the art of cooking, that is one great thing we teach them to make silk. There is no country which does not import silks in China, or use Chinese luxuries. This work not only participated in by a few, but all women, more or less. The Empress herself once a year goes out into the fields and gathers mulberry leaves, and brings them to feed the silk worms, to show and preach to the women to follow her example. There are different qualities of silk; our serfs and beggars can afford to dress up in silk better than you can in woolen. The Emperor takes hold of the plow and follows it until perspiration falls down his face, to show to his sons how to be industrious.

A farmer is ten times more honored than a mere fighting man; a fighting man kills only how to destroy life, while a farmer knows how to support life. Likewise, a literate man is held in the highest esteem. A general of the army cannot sit down to the Emperor, but a scholar or a farmer sit down before the Emperor; nor can a military man sit down with a scholar. I think the pen is mightier than the sword. A Chinaman does not return a blow; it against the teachings of Confucius; those who return blows are very inferior men indeed, it argues he is smart enough to use only physical strength; but a superior man uses his tongue. For this reason, you see, China is one of the so-called weakest nations. Two or three days ago, a gentleman wanted to know why the Chinese, who are so numerous, could be conquered by the Christian who are so few in number. I think if he were a superior man, he would not have asked such a question. Certainly there is no glory in fighting. What nation can stay in this world for thousands of years and live? Did not Rome and Greece conquer the world? But where are those nations now?

Referring to education, he remarked: "V

found by experience that intelligence is a very dangerous thing in society, we have the greatest criminals, who are most brilliant men, as the ignorant do not know enough to invent such great wrongs. Without the great principle of morality to be him to use that intelligence, it is very pernicious to others. We are taught from blood to control ourselves. If a man does not know how to control himself, he does not know how to control others.

The heathen Chinamen teach their children with great respect for those who are older than themselves. You may wonder sometimes how we distinguish which is the oldest, but we are taught it is very impolite not to ask a question. When he is one year older than I am, then I must give him the first opportunity to speak; when he is ten years older than I am, then I must give up to him before he says another, I must give up to him before he ought to know a great deal better than I, and if he leads me wrong, I am not one to be blamed. When he is twenty or thirty years older, then I must respect him; when he is forty years older, I must reverence him, so on.

The boy is taught to study the great works of Confucius, who tells about government, about economy, about moral improvement, about how to take charge of a family. All this he is allowed to go into public examinations, which is given by the Emperor of China, and by a company of wise men, who are about the government. On the day appointed, perhaps thousands and tens of thousands of students assemble together in one each in their separate departments, and one upon 12,000 students have one subject to be upon, and whoever has the best composition is promoted, that is, he is recommended to have a higher examination, and after the third he is a ruler according to his ability. If a very able man, he is invited with the emperor to help make laws for the people, every three years he is transferred to another position, so that he will not show partiality. The women study a great deal, as they have no ambition to become rulers, and do not keep at it so long.

As to property, whatever belongs to the father belongs to the son, and so the son and the father have a common interest in preserving the property, and a father is not allowed to be away, when he dies, his property to any other persons but his own children. The speaking of marriages, he observed that a man and wife "must be of no relation, even to the seventh generation, and they must not have the same name. The first name is the father's name; my name is Wong Chin Foo, my family name is Wong, and the two latter are my given name. I was Wong when I was born, until I had the others given me. It is also, just the opposite from your way, though there are more than 40,000,000 of the Chinese in China, yet they never marry persons of the same name.

The Chinamen that come to this country are mostly of the laboring class; they are not acquainted with whom we most associate at home, and in general rule. But we have now some students, who, when they go back to China, will be able to translate their ideas and fit our government, and one of these days the Chinese will understand a great deal better our powers than they now do, and then we expect the Chinese Empire will make

great changes, so that when an American goes to China, he will be as hospitably treated as a Chinaman is received here."

SEBASTIAN.

Oh! it is easy in life's tranquil day,
When all around is peace, to kneel and pray
"Father thy will be done,"—but when that will
Calls us to suffer, and the patient still
When God's mysterious ways are all unknown,
When clouds and darkness veil His awful throne,
Oh! how we need His all-supporting hand,
To bow submissive to the high command;
To trust Him still in life's beleaguering day,
And in meek resignation thus to pray.

Selected.

WAIT ON THE LORD.

Selected.

"Lord, behold, he whom thou lovest is sick;" John ii. 3.

One touch from Thee—the Healer of diseases;
One little touch would make our brother whole;
And yet Thou dost haste not, O blessed Jesus!
Send a swift answer to our waiting soul.

Full many a message have we sent, and pleaded,
Hill in the heights of love—the depths of grace;
Each message was received, and heard, and heeded,
And yet we welcome no responsive word.

We know that Thou art blessing, whilst withholding,
We know that Thou art near us, though apart;
And though we list no answer, Thou art folding
Our poor petitions to Thy smitten heart.

A bright and glorious answer is preparing,
Hill in the heights of love—the depths of grace;
We know that Thou, the Risen, still art bearing
Our cause as Thine, within the holy place.

And so we trust our pleadings to Thy keeping;
So, at Thy feet we lay our burden down;
Content to bear the earthly cross, with weeping,
Till at Thy feet we cast the heavenly crown.

—Jane Crewdson.

For "The Friend."

A Word of Encouragement.

The following interesting letter was written by that valuable minister Asenath Clark, of North Carolina, shortly after the decease of her husband, Dogan Clark. It was addressed to Mary Kite, of Chester Co., Penna., who had paid a religious visit not long before its date, to the meetings of North Carolina Yearly Meeting. Its words of counsel and encouragement may prove cheering to some at the present time, whose hearts are brought under exercise for the preservation among us of "those precious testimonies of truth and righteousness," and whose concern it is to endeavor to uphold them "in their purity, as they came from the hands of those dignified sons of the morning." George Fox and the other primitive Friends.

Are there not symptoms of the near approach of the time, which she foresaw, when some among us, "Covered as with a mantle of love," will be called out again to execute the commands of the Most High?"

"Oak Grove, near New Garden, N. C.,

11th mo. 30th, 1855.

"My dear and much beloved friend and sister in the unchangeable Truth, I have just been looking over thy truly sympathetic and evangelical letter, which has brought thee, this morning, very near and dear to my best feelings; and whilst thou seems willing in true Christian love, to hold out a hand of encouragement to a poor sister in tribulation, my spirit seemed to salute thee, and many others in your Yearly Meeting, in the language of affectionate encouragement to hold fast that which you have received—let no man take your crown. Though the moun-

tains should depart and the hills be removed, yet thy kindness shall not depart from thee; saith the Lord who hath mercy from thee; and as you keep in the meekness of Him who rode into Jerusalem upon a colt, the foal of an ass. As I was looking towards you this morning, before I rose from my bed, this language seemed to come vividly before my mind. "Rejoice greatly, O daughter of Zion, shout for joy, O daughter of Jerusalem, for thy king cometh unto thee, just, having salvation, lowly, and riding upon an ass."

"I am truly sensible, my dear Mary, that thou art one who serves the Son and sent of God in this humble self-denying way, and thy bread will be given thee—thy water shall be sure; and although your Yearly Meeting seems like being yet emptied from vessel to vessel, and sitted from sieve to sieve, yet the weighty wheat will remain when the chaff is purged away, and the fine gold will lose nothing of its brightness, worth or weight, by being melted, and passing from time to time through the fire. What I earnestly crave for myself and my dear friends is, that we may keep close to Him who was led as a lamb to the slaughter; and as a sheep before her shearers is dumb, so He opened not His mouth. This is the safety of all in this day who are standing for those precious testimonies of Truth and righteousness, and desire to preserve them in their purity as they came from the hands of those dignified sons of the morning. If these keep on the same foundation in lowliness of mind, and are abiding in Him who is the Way, the Truth, and the Life, no weapon formed against them shall prosper, and every tongue which rises in judgment against them, they shall condemn. I believe there are many in your Yearly Meeting who have a foundation to stand upon, and I am comforted in believing they will stand upon it without being moved with evil tidings. My heart is toward you of that Yearly Meeting; although our poor Yearly Meeting has come to the conclusion to break off all correspondence with you in an epistolary way, yet I believe if you and Ohio Yearly Meeting continue still, whilst a mighty and strong wind, which the Lord is not in, is rending the mountains and parting the hills asunder, your hearts will still be covered as with a mantle of love, and in due time you will be called out again to execute the commands of the Most High."

Best Root Sugar.—At a meeting of persons interested in introducing the manufacture of best root sugar into this country, held during the late Exhibition, in Philadelphia, George May Powell read a paper, in which the following was stated, as reported in a late paper: "As from twelve to twenty tons of beets, worth six dollars per ton, can be raised per acre, it pays the farmer to raise them for the factories more than twice as well as he is paid on wheat growing. The beet sugar zone being climatically co-extensive with the temperate zone, the industry would have, in our country, in field space, more than a thousand fold that which is available for cane sugar, the latter being confined to a few parishes in Louisiana. Its adaptation to manufacture in the winter, secures great economy of capital and labor as compared with cane, which has to be hurried through while the juice is fresh in the stock, at great disadvantage." "He said we are now sending out of the country for

sugar one hundred million dollars per year, an amount in excess of the aggregate annual yield of our gold and silver mines. The refuse from the sugar factory is equal, for stock feeding, to the amount of hay from the same number of acres that are occupied in growing beets for the factory, and, therefore, these industries are adapted to being combined. In other words, the refuse from a sugar factory using the beets from five hundred acres is equal to five hundred acres of hay. Such a factory should produce about 720 tons of sugar and 100 tons of syrup."

For "The Friend."

The Yearly Meeting.

As the time approaches for the annual assembling of the members of Philadelphia Yearly Meeting, the minds of many are impressed with various weighty considerations. That it is a time of discouragement on many accounts, must be admitted. The sad declension of some who bear the name of Friends—the untimely zeal of others, as well as the lukewarmness of many, naturally give rise to anxiety in the minds of those who are truly concerned for the faithful upholding in their original purity, of all the important testimonies given us as a people to bear before the world. Our late valued friend, Christopher Healy, when on a religious visit in the Southern States, in a small select meeting, and under some remarkable circumstances, quoted the following impressive language from 2 Kings, vi.: "Shut the door and hold him fast; is not the sound of his Master's feet behind him?" Let us of the present day shut the door firmly against the first insinuation of the enemy, that our forefathers, who suffered so much for the peculiar testimonies that distinguish our Society, were mistaken, and that a new and easier path has been found than that in which they trod; viz., the way of the cross.

Among the trying circumstances attending the communications of some in the present day, is the frequent, and it is feared, the irreverent use of the sacred name. This habit, it is apprehended, is fraught with very dangerous consequences to the speaker; the anointed ear soon detects the want of gospel authority which too frequently accompanies such communications, and no amount of high sounding words can make up that which is lacking. In kindness of feeling and under, it is hoped, a sincere desire for the welfare of all, may we remember the sad consequences that befel Uzzah for having *untidben* put forth his hand and touched that which was sacred: also, the impressive language contained in Mat. vii. 21, "Not every one that saith unto me, Lord, Lord, shall enter into the kingdom of heaven; but he that doeth the will of my Father which is in heaven;" also in Luke vi. 46, "And why call ye me Lord, Lord, and do not the things which I say." W. Penn said, "Love silence, even of the mind." Let us then, endeavor to wait in true silence, inwardly as well as outwardly, when gathered for the solemn purpose of Divine worship, or for transacting the affairs of the Society, and seek for right direction and authority before venturing to disturb the quiet solemnity with which we are sometimes favored, and in which true worship is offered. A dear elder, now deceased, remarked in one of the last Yearly Meetings he attended, "there was something more precious than words." Whilst, however, there are many trying circumstances around and

among us, it is not well to give way to too much discouragement, or too great a foreboding of evil to come, but rather let us grip up the reins of our minds, watch and be sober, and hope to the end, &c., remembering that the Power which raised up, qualified and prepared able instruments in the beginning, and at various other epochs in the history of the Society, is the same that ever it was. It was the testimony of several, and some in latter times, who, we reverently believe have been gathered from works to rewards, that a better time was surely coming. In their dying expressions we may find much to encourage us to faithfulness in this, our day and generation, "to patiently wait and quietly hope," and if need be to suffer all our appointed time, believing that all things will work together for good in the end. It is a great lesson to learn, that of patience. Among those who have thus seen, we humbly believe in the vision of light, a brighter day in coming time for our poor Society, was Joseph White, a valued minister of Falls Monthly Meeting, Bucks county, Pennsylvania, who lived during the last century, and who, when near his end, used the following language: "You that stay to be humble, and when trouble awaits you, look not upon, nor trust to the arm of flesh for assistance, but stay yourselves upon Him, who suffered for you, for me, and for all mankind. I have for some time believed, and lived in the hopes thereof, and am now in measure confirmed, of more glorious things yet to be revealed to the church of Christ; and that further and greater discoveries will yet be made, with respect to the Christian religion, than ever yet has been since the apostasy."

In the memorial issued by Woodbury Monthly Meeting for Joseph Whitall, it is said, "Some of his friends being with him a few weeks previous to his dissolution, after a sorrowful allusion to the existing war (with Mexico), in a very solemn and impressive manner he said, 'Notwithstanding this sad state of things, my faith is strong that the mountain of the Lord's house shall be established in the top of the mountains, and shall be exalted above the hills, and all nations shall flow unto it; and that the knowledge of the Lord shall yet cover the earth as the waters cover the sea; although none of us may live to see it, yet I believe it will be.'"

In the interesting memoir of Edith Jeffrey, an esteemed minister, it is stated, "After I did the little that was given me, Caleb Pennoek took up the same subject, but opened it in another light. He compared our Society to a building that had been torn to pieces; yet, he said, all was not to be lost, for there were many pieces of plank that were worth saving. These would be taken care of and would go towards erecting the fabric again, for the building was to stand. * * * The power of the enemy was limited, and we were not about coming to an end; for the testimonies professed by Friends were in accordance with the gospel of Jesus Christ, and must prevail over all others."

From the account kept of the last illness and death of Christopher Healy, the following is extracted: "One of his daughters coming to see him, he expressed his hope that his children would tread in the footsteps of their father; who had been made willing to take up the cross in early life, which had preserved him from many snares and temptations. Oh! Truth is Truth; it cannot be divided! As re-

gards our poor Society, I believe there was a suffering time for the true seed, but can reign." Then it may be said: "There I will allure her, and bring her into the desert, and speak comfortably unto And I will give her, her vineyards thence, and the valley of Achor for a do-
hope; and she shall sing there, as in the of her youth, and as in the day when came up out of Egypt." He also quoted the fruit of this: "Look upon Zion, the of our solemnities; thine eyes shall see salem, a quiet habitation, a tabernacle shall not be taken down; not one of the thereof shall ever be removed, neither any of the cords be broken. But there glorious Lord will be unto us a place of rivers and streams; wherein shall go no with oars, neither shall gallant ship thereby. For the Lord is our Judge, the Lord is our Lawgiver, the Lord is our King; he save us." Our late beloved friend Har Rhoads, remarked, "I think there is a dis-
approaching in which there will greater outpouring of the Spirit than the now, comparable to that spoken of by prophet, 'Your sons and your daughters a prophesy; and other gifts, not only the prophesy, shall be dispensed. I want you to be dismayed, or too much discourag-
The end of all these valiant testimony be- was peace. More quotations and exam- a similar character might be added."

Selected for "The Friend."

Whoever thou art, therefore, that would do the will of God, but faintest in thy des from the opposition of worldly consid- tions; remember I tell thee, in the name Christ, that he who prefers father or mot- sister or brother, wife or child, house or reputation, honor, office, liberty, or life, be the testimony of the light of Jesus in his conscience, shall be rejected of him, in the em and general inquest upon the world, w- all shall be judged, and receive according to deeds done, not the profession made in this. It is the doctrine of Jesus, that if thy ri- hand offend thee, thou must cut it off; an- thy right eye offend thee, thou must pluck out. That is, if the most dear, the most us- and tender comforts thou enjoyest, stand in- soul's way, and interrupt thy obedience the voice of God, and thy conformity to holy will revealed in thy soul, thou art gaged, under the penalty of damnation, to p- with them.

The way of God is a way of faith, as de- to sense, as it is mortal to self. The child- of obedience with holy Paul, count all thin- dress and dung, that they may win Chr- and know and walk in this narrow w- Speculation will not do, nor can refined not- enter it; the obedient only eat the good- this land. They that do not my Father's w-

* (C. H.) was often much exercised on account the low state of our once favored Society; and said, was his unshaken belief, that the testimonies that w- given our forefathers to bear, would not be suffered fall to the ground; but that there would be stand- bearers raised up, and watchmen to proclaim the of the Lord; as said the prophet formerly, "I will u- my hand upon thee, and purge away thy dress; and I will restore thy judges as at the first, and thy cons- lers as at the beginning;" afterwards, "Thou shalt call the City of Righteousness. Then the song w- be, Lo the winter is past, the rain is over and gone, a- flowers appear on the earth, and the time of singing birds has come, and the voice of the turtle is heard our land."

THE FRIEND.

THIRD MONTH 24, 1877.

the blessed Jesus, shall know of my doings; them he will instruct. There is no man for instruction, whose lawful self is lord not servant. For self cannot receive it; which should, is oppressed by self; fear and dares not. What will my father or her say? How will my husband use me? what will the magistrate do with me? though I have a most powerful persuasion, and clear conviction upon my soul, of or that thing, yet considering how unwise it is, what enemies it has, and how huge and singular I shall seem to him, I let God will pity my weakness; if I shrink, but flesh and blood: it may be, hereafter will better enable me; and there is time enough. Thus selfish, fearful man.

Elaborating is ever worst; for the soul is in parley; the manifestation brings power with it. Never did God convince people, but upon submission. He empowered them, requires nothing without ability to perform it: that were mocking, not saving men. Enough for thee to do thy duty, that God sees thee thy duty; provided thou closest the light and spirit, by which He gives that knowledge. They that want power, such as do not receive Christ in his compass upon the soul; and such will always fail at it. But such as do receive him, receive it also, like those of old, to become the brethren of God, through the pure obedience faith.

Therefore, let me beseech you, by the love mercy of God, by the life and death of Christ, by the power of his Spirit, and the life of immortality, you whose hearts are blished in your temporal comforts, and lovers of self more than of these heavenly things, let the time pass suffice. Think it not enough to be clear of such impurities as too many are found in, whilst your inordinate love awful things has defiled your enjoyment them, and drawn your hearts from the fear, obedience, and self-denial of a true disciple of Jesus. Turn about, then, and hearken the still small voice in thy conscience; forsake thee of thy sins, and of misery in themselves a lively discovery of the very vanity of the world, and opens to thy soul some prospect of eternity; and the comforts of the just are at rest. If thou adherest to this, it divorces thee from sin and self. Thou soon find, that the power of its charms seduces that of the wealth, honor, and beauty of the world, and, finally, will give thee that tranquillity which the storms of time can never wreck or disorder. Here all thine elements are blest; though small, yet great that presence which is within them. — No more, No Croon.

Giving In.—It is better to yield a little in a quarrel a great deal. The habit of standing up, as people call it, for their (little) rights is one of the most disagreeable and undignified in the world. Life is too short for the actual bickerings which attend such a disposition; and unless a very momentous affair, where other people's claims and interests are involved, it is a question if it is not better, happier, and more prudent to yield up what of precious rights than squabble to obtain them. True wisdom is first pure, peaceful and gentle.

low station best suits a living ministry
brist.

The professing Christian Church has been, for some years, and still is passing through a dispensation of trial, arising from assaults on some of the fundamental truths of the gospel. This has called forth much disquisition on points of doctrine, and, as is not unusual in polemics, some of the controversialists on both sides have run into opposite extremes; landing one party in efforts to discredit all religious dogma, and betraying the other into the serious error of attributing saving efficacy to mere belief in the sacred truths recorded in Holy Scripture. In the doubt and ermination thus set afloat, there is danger of very many, unwilling, or not fitted to enter into examination of such subjects for themselves, losing sight of the essentially practical character of that religion which every professed disciple of Christ, whatever his belief, is called to exemplify in his daily life and conversation. Right views of the doctrines of the gospel, and conviction of their truth, are of great value, even when they may be held intellectually only; but unless they are allowed to be carried into practical application by obedience to the requirements of the Holy Spirit, inwardly revealed, they will no more effect the salvation of the soul, than giving credence to the axioms of pure mathematics, will enable the uninitiated to demonstrate the practical working of that science.

The design of "the glorious gospel of the blessed God" is to restore man to the heavenly image which has been lost in the fall; hence, as Paul says, it is preached to or in every rational creature, and is not merely a dead letter without us, but a quickening power within us. Words however true, and however inestimable the truths they are intended to convey, cannot of themselves beget in the mind an availing sense of heavenly things. The mystery of the first quickening into divine life of a soul that is dead in trespasses and sins, must have a far higher origin than language, whether written or spoken, or than simple assent to the truths couched in that language. It can spring from no other source than the Spirit of Him who is "the life and the light of men," and who "callesth those things that be not, as though they were;" and the growth of that life when once begun must be sustained by the spiritual food that comes down from heaven, Christ himself being both the bread of life, and the Giver of it. The natural man may study deeply, he may reason logically or descend boldly on the sacred truths contained in the Bible, but he "receiveth them not, neither can he know them because they are spiritually discerned."

Living faith, then, is a fruit of the Holy Spirit, and is always manifested by works. It is accounted unto us for righteousness, only as we allow it to work by love to the purifying of the heart. It must permeate the whole character of the Christian, and he can no more divorce it from the thoughts, words or actions of his every-day life, than he can separate it from his worship, and those other services which are generally supposed, specially to exemplify the depth and sincerity of his religion. Thus he carries the evidences of his love for and his allegiance to Christ, into the details of his household duties, into all his

business transactions, and into his social intercourse with his fellow-men; so that whether he eat or whether he drink, or whatsoever he may do, he may do all to the glory of Him whose servant he is not ashamed to show himself to be. Keeping in mind the command, "All things whatsoever ye would that men should do unto you, do ye even so to them," he cannot when a buyer, like the man in Proverbs say, "It is naught, it is naught, but when he has gone his way he boasteth;" nor can he dissemble or take advantage, or drive "a hard bargain" with his fellow man, be his condition in life what it may. As the world still lieth in wickedness, he dare not be conformed to its vain and corrupt customs and manners; and as its friendship is enmity with God, he finds that in participating in its needful demands on his time and talents, he must constantly deny himself, take up his daily cross, and follow his despised and crucified Saviour, whose kingdom is not of it.

What is wanting in the professing Church in this day of boasted knowledge and liberality, and what would do more than anything else to repel the arguments and cavils of sceptics, and vindicate the Divine origin of the gospel, is the more general exemplification of its restraining and constraining power to regulate every phase of conduct and conversation, and thus prove, by a life consistent with our profession, that it is "the power of God unto salvation." The apostle exhorts, "Let every one that nameth the name of Christ, depart from iniquity," which does not refer to what are considered crimes, only, but to secret and presumptuous sins, and every fault springing from the corrupt propensities of the unregenerate heart, however the world may tolerate or even commend it.

"Put off thy shoes from off thy feet, for the place whereon thou standest is holy ground," was a command given to Moses when he found himself in the visible presence of Him who dwelt in the bush. And so all who have submitted to the converting, regenerating operation of the Word in the heart and in the month, working secretly and silently in the soul, making them humbly sensible of their true relation to their omnipotent, omnipresent Creator, their responsibility as free agents, and candidates for eternal felicity, must feel that they too stand on holy ground, and that their feet should be shod with nothing but a preparation of the gospel of peace. Ever conscious of their duty to walk worthily of the vocation wherewith they are called, and sensible of their own weakness and proneness to evil, they cherish an abiding sense of having the sentence of death in themselves that they may not trust in themselves but in God who raiseth the dead. The advice given by Philadelphia Yearly Meeting to its ministers and elders is applicable to all, who, as true believers in the gospel, are desirous to "adorn the doctrine of God our Saviour." Let all dwell in that which gives ability to labor successfully in the Church of Christ, adorning the doctrine which they deliver to others; being an example of the believers in word, in conversation, in charity, in spirit, in faith, in purity."

SUMMARY OF EVENTS.

FOREIGN.—It is stated from St. Petersburg that a peaceful solution of the difficulty between Russia and Turkey is now scarcely doubtful. The question really is which of these powers shall disarm first.

One of the difficulties in making an amicable settlement with Montenegro arises from that Principality insisting upon an enlargement of its territory by the cession of some of the country lying upon its southern border. The Montenegrins are now confined to a mountainous region of quite small extent. The Turkish government is unwilling to take the responsibility of deciding upon the various Montenegrin demands, and will submit them to the Grand Council of the Empire, or of Parliament, which is about meeting.

The Khedive of Egypt, through the British representative at Cairo, has renewed and confirmed his father's gift to Great Britain of "Cleopatra's Needle," and preparations for its removal to London are in progress.

The Indian Budget for the financial year, 1876-77, shows a deficiency of £1,000,000. It is a consequence of the expenses of relieving the famine, loss of revenue from the same cause, and the public works undertaken to give employment to some of the starving people. It is proposed to raise £12,400,000 in India, and to ask Parliament for power to borrow \$18,700,000 in England.

Small-pox does not prevail to an alarming extent in London. The number of cases reported last week was 92, and in the Metropolitan Asylum 96 deaths from the disease occurred.

Iglesias, who is now in New Orleans, has issued a manifesto as "Constitutional Provisional President of the Mexican Republic." He informs the Mexicans that "the Diaz Government" is "a symptom of dissolution," and announces that, if he succeeds in getting under his control any portion of Mexican territory, he will "repair thither to re-establish his lawful government."

A London despatch of the 17th says: On and after the 26th inst., the Anglo-American Telegraph Company will transmit political and general news for publication between the United Kingdom and Canada and the City of New York, at the rate of six pence per word. Such news messages to be transmitted when the cables are disengaged, and to be accepted expressly on the above conditions.

The German newspapers continue to comment on Prince Bismarck's speeches on the organization of Imperial Ministries. The *Hannoversche Courier* a National Liberal paper, influenced by Herr Bennigsen, President of the Prussian Diet, has a specially interesting article, which concludes as follows: "We openly profess that the real cause of a better organization of the Imperial Government is the Chancellor's personal behavior and auto-ratic nature."

The correspondent remarks: "Never before would the National Liberal papers have dared to publish anything like this!"

The Czsr has given his consent to the construction of the Northern Siberian Railroad, and the town of Ekaterinoslav expects soon to become an important place in consequence of its central position between European Russia and Turkestan and Central Asia.

The Sultan, in his speech opening Parliament, reviews Turkey's efforts at reform during recent times. He says that the country would have commenced a new era of progress and prosperity if intrigues and culpable agitation had not paralyzed the efforts of the government by obliging it to waste its resources on warlike expenditures. These causes and had financial administration, forced the government on the one hand, and the interference of the Magogina to retard on the other, the progress of the reforms. The Sultan has called to the throne one of the most difficult circumstances, first placed the army in a condition to insure the security and independence of the country, and then devoted all his efforts to internal reform by promulgating a charter which, following the example of the most civilized States, made the nation participate in the administration of public affairs.

The speech commorates the measures for discussion during the session. Among them are the Budget, electoral and press bills, and bills for the reorganization of provincial administration, tribunals and civil service. The speech especially states the adoption of the financial bill, and promises that measures will be taken to offer Turkey's creditors the most solid guarantees consistent with the urgent necessities of the Treasury. The Sultan announces the pacification of the country and the restoration of peace with Servia, and hopes for a durable and honorable settlement of the Bosnian question, which would enable the government to disband the troops. Although the conference did not end in a definite understanding, it has been demonstrated that the Turkish government was and is ready to participate in such wishes of the Powers as can be reconciled with existing treaties, international law and the exigencies of the situation.

The speech concludes as follows: "My government

has constantly given proofs of sincerity and moderation which will aid in drawing closer the bonds of friendship, and sympathy that unite us with the great European family." Of the thirty senators of the re-organized empire, there are only five who are not Mohammedans.

UNITED STATES.—The interments in Philadelphia last week numbered 398. At the commencement of the present year there were 48 public schools in this city, with 10,000 scholars, and an increase during the year of 1876 of 3739. The pupils consisted of 49,602 boys and 49,659 girls. The cost of maintaining the schools during the past year was \$1,688,836. The High School and Girls' Normal School are attended by 644 boys and 302 girls.

Notwithstanding the repeated declarations of the new administration at Washington that very few appointments in the different branches of the public service are contemplated, the President and Heads of Departments are besieged by crowds of importunate applicants. The Post-Master General, to escape the annoyance, has issued a circular to be given to every applicant as his answer, saying, "Your letter has been received and placed on file in the Department for consideration under the rules of the civil service when vacancies occur. At present none exist."

Lot M. Morrill, late Secretary of the Treasury, having been nominated as collector of customs at Portland, Me., the day of his residence, was confirmed by an unanimous vote of the Senate.

Ex-Post-Master General Tyner, at the urgent request of the new Post-Master General, has consented to act as his first assistant. It is desired that he shall take exclusive charge of all the post-offices in the United States north of the Ohio river.

Carl Schurz, Secretary of the Department for the Interior, has given formal notice that during his administration there will be no removal of clerks or other employes except for cause, and no promotions except for merit. It will therefore be useless for office seekers to apply in that quarter.

Frederick Douglass, a prominent colored man, has been nominated for the office of Marshal of the District of Columbia, an appointment with an income of from five to six thousand dollars a year.

At the election in New Hampshire on the 13th inst., the Republican candidate for governor was chosen by a majority of about 39,000, and two of the three congresses were elected to the Republicans. In one district the result is undecided, each candidate having almost exactly the same number of votes.

John Jay Knox, the present able Controller of the Currency, has been continued for another term.

Attorney-General Devens and the Secretary of the Treasury, in defiance of the President of the absolute duty, pursuant to law, to call an extra session of Congress, and the President has therefore decided to issue the call in the latter part of next month, giving thirty days notice so that the session may begin the latter part of the Fifth month.

The extra session of the Senate of the United States closed on the 14th inst., in executive session several presidential nominations were promptly confirmed. That of Frederick Douglass met with opposition, but after debate was confirmed, all of the Republican members present, and several of the Southern Democrats, voting for it. Senator Morgan, of Alabama, not only voted for but spoke in favor of the confirmation. The President will have to call on his political friends on account of the appointment of Douglass and others. President Hayes is said to have replied that "he was sincere in his policy and would adhere to it, unless it should prove to be impracticable. For eight years the policy of force and of the musket had been tried in the South, but it had failed, and public sentiment now demanded a change."

Owing to an inadvertence the U. S. Senate adjourned without voting for a President *pro-tempore*, to be prepared for the possible contingency of the Vice President's death during the recess.

The President will not allow himself to be hurried into measures regarding the anomalous condition of affairs in Louisiana and South Carolina. As he expresses it, the state of affairs is of sixteen years growth, and cannot be changed in sixteen days. It is understood that the difficulties in the two States named will claim the early consideration of the President and his cabinet.

The Red Star line steamship *Red-Land*, from Antwerp for New York, went ashore at Long Branch on the night of the 17th. The passengers, crew and baggage were all landed safely, and cared for at the hotel.

With good weather the cargo may be saved though the vessel was declared a wreck. The number of passengers was 125.

Full returns of the election for Congress in the district of New Hampshire give the Democratic date a majority of about 40 in a total vote of 28,000.

The Markets.—The following were the quotations on the 19th inst. Philadelphia.—American gold U. S. sixes, 1881, registered, 111½; do. coupons, do. 1868, registered and coupons, 113; do. 5 per cent, 1881, 100; do. 4½ per cent, 105; a 106. U. S. and New Orleans cotton, 11½; 12½ cts. Flour prices from 55 to 21.00 per bbl. Pennsylvania wheat, \$1.53 a \$1.55; amber, \$1.58; a \$1.60; \$1.62 a \$1.68. Rye, 75 a 80 cts. Yellow corn, 5 cts. Oats, 47 a 45 cts. Choice New York cheese a 16 cts.; do. western, 14½ a 15 cts. Sides of 380 lb. cattle at 6½ a 7 cts. per cwt. for export; 5½ a 6 for fair to good, and 4 a 5 cts. for common. Hog 7½ cts. per lb. gross. Receipts 9230 head. She 8½ cts. per lb. net. Receipts 3200 head. *Chicago*. Minnesota extra flour, \$6 a \$6.75; ditto patent per \$7.25 a \$9.50. No. 2 Corn, 2 Chicago spring wheat, No. 3, do., \$1.15. Corn, 29½ cts. Oats, 35½ cts. 9½ cts.

INSTITUTE FOR COLORED YOUTH.

A Stated Annual Meeting will be held on Saturday, 26th inst., at 12 m., in the Committee Room, Arch Street Meeting-house.

Third month, 1877. Wm. Evans,

WESTOWN BOARDING SCHOOL.

A Stated Meeting of the Committee having charge of the Boarding School at Westtown, will be held in Philadelphia, on Sixth-day, 30th inst., at 1 p. m.

The Committees on Instruction and Admission meet at 10 a. m. the same day.

The Visiting Committee appointed to attend examination at the School, meet there on Second evening of the 26th inst.

For the accommodation of this committee, carriages will be at the Street Road Station on the inst., to meet the trains that leave the city at 2:30 and 4:40 p. m.

SAMUEL MORRIS

Philada., 31 mo. 17th, 1877. Cl

TRACT ASSOCIATION OF FRIENDS.

The Annual Meeting of the Tract Association of Friends will be held in the Committee-room of Street Meeting-house, on Fourth-day evening the instant, at 8 o'clock.

Friends generally are invited to attend it.

EDWARD MARIS, Cl

FRIENDS' SELECT SCHOOLS.

A suitably qualified Friend is wanted as Principal of the Boys' Select School, at the opening of the term the Ninth month. Application may be made to

Joseph S. Elkinton, 331 South Fifth St.

Edward Maris, 127 South Fifth St.

James Snalesby, 415 Market St.

George J. Scattogood, 413 Spruce St.

WESTOWN BOARDING SCHOOL.

WANTED, a TEACHER to take charge of the "ST. ROAD" at the above Institution; one qualified to instruct in all the branches taught in the G. DEPARTMENT.

Application may be made to

Rebecca S. Allen, 331 South Fifth St., Phila.

Dobrow Roads, Hadonfield, New Jersey.

or Martha D. Allen, 528 Pine St., Philadelphia.

WESTOWN BOARDING SCHOOL.

THE SUMMER SESSION opens on Second-day of the Fourth month. Parents and others intending to pupils, will please make early application to BENJAMIN PASSMORE, STUT., (address Street Road P. Chester Co. Pa.), or to CHARLES J. ALLEN, Treas. 301 Arch St., Philadelphia.

FRIENDS' ASYLUM FOR THE INSANE.

Now Franklinford, (Twenty-third Ward), Philadelphia. Physician and Superintendent.—JOSHUA B. WOODFORD, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board Managers.

DIED, at his residence, near Fallington, Bucks Pa., on the 15th of 12th mo. 1876, JESSE B. TAYLOR, in the 56th year of his age, an esteemed member of the Friends Monthly Meeting.

Random Notes of Travel in Europe.

(Continued from page 234.)

Edinburgh, 7th mo. 14, 1875.—The bold outline of the castle, on its picturesque foundation of basaltic rock, attracts the eye in whatever part of the city the stranger may go; though the great square modern building on one side, with its numerous windows, bears strong resemblance to a cotton mill.

The whole area of the summit comprises about seven acres, and how long it has been applied to purposes of defence is unknown. At the antiquity of part of the present stronghold, may be inferred from the date of the small, low, Norman chapel of Queen Margaret, the wife of Malcolm Canmore (great-grandfather), who died in 1093, and sister of Edgar the Rhylling, the nearest relative of Edward the Confessor. On the invasion by William of Normandy, Edgar found refuge at the Scotch court, with his mother Agatha, and his young, beautiful and pious sister Margaret, and Christina, a younger sister. A marriage with the Scotch king soon followed, and her biographer tells us how affectionately the Saxon princess bore to civilize the people and "enlighten" her husband; but though a man of vigorous intellect, could not read her books of devotion, and kissed them in token of reverence, and adorned them richly bound, and ornamented with gold and jewels. The English king having fled on Carlisle, Malcolm entered England and laid siege to Alnwick, where he was defeated and slain. His wife died immediately on a hearing the fatal news. The chapel of Queen Margaret has been "restored." The general aspect and proportions of the apartment were unchanged; but on behalf of travellers, one might say that I believe many of them would be glad to see, occasionally, something un-restored.

The room immediately under the square tower, admits to an apartment in which are deposited the Regalia, or as they are often termed the "Honors of Scotland," consisting of a crown, sceptre, sword of state, the Lord Treasurer's rod of office, &c. The sceptre performed its last grand legislative office, by affixing the treaty of union with England on the 16th of January, 1707. The Earl of Argyll, then Chancellor, on returning it to the clerk, is reported to have scornfully applied the vulgar phrase, "There is an end of auld sang." The Scotch nation was so gratified by the treaty, that the government

of the day thought it prudent to remove any thing calculated to rouse the national feelings. The Regalia were thrown into an old oak chest and locked up in the castle, where they were almost forgotten. At length, in 1817, a desire arose to search for the lost treasure, and a committee, including Sir Walter Scott, proceeded to the spot. The king's smith was commanded to open the chest, the keys of which could not be found. Great was the joy when the various articles were discovered, folded in linen cloths exactly as they had been surrendered by the Earl Marshall, a hundred and ten years before! "An eye may be sure it was a royal time for Sir Walter," said our guide; "He spoke with and laughed, at every body he met, that day."

Adjoining the crown room is Queen Mary's apartment, the birth-place of James VI., in whom the crowns of England and Scotland were united. The room is small and irregular in form, and lined with antique panelling, some of which has been "restored." It contains a small fire place, and one window only. The original ceiling remains, and the initials I R, and M R surmounted by a crown, are wrought in the panels around the room. On the wall is the following inscription, surmounted by the Scottish arms:

Lord Jesu Christ that crown't it was with Thorne,
Preserve the Birth-places, Balgule heir is borne,
And send his some succession to Reign stidde
Long in this Realm if that it be thy will,
As grant, O Lord, quiet ever of His proce,
Be to thy Honor and Praise, be thy self,
19th IVNII, 1566.

7th mo. 18th.—To-day we have been to Holyrood! For several days we have been circling around it, preferring to see other objects first; but this morning on emerging from the Canongate, at the lower end, we saw for the first time the towers and discolored walls of the old palace of the Scottish kings. The first feeling is that of disappointment, in feeling as it does the stately height of the eight and ten stories, familiar to the eye in ancient High street. We crossed a rather low plain at the foot of Arthur's Seat and Salisbury Craig, with city and castle at our back. It must be remembered that the palace was built upon the site of a convent, founded by David I., which may account for its lowly position. Among other gifts bestowed by this king upon the abbey, was, a "tithe of the whales" and other sea-monsters" accruing to the crown on the whole coast between the mouth of the river Almond and Colbrand's Path." James I., remarking on the liberality of the founder, said that he was a "sair sanct for the crown." Being still a royal residence, for the queen generally spends a night or two at Holyrood going to, or returning from Balmoral, quite a show of stateliness is maintained. Soldiers were pacing the open court in front of the building, and sentinels stood on guard at the entrance. The rooms occupied by the present queen are not thrown open, but as almost all the interest attached to Holyrood centres

around the apartments of Queen Mary, visitors are conducted to them and others connected with her sad history. The audience chamber of Lord Darnley, on the floor beneath the queen's suit, was a spacious, cheerful, handsome room, on the wall of which appears a portrait of himself, when young, which bears a resemblance to Queen Elizabeth, ignoring of course the immense ruff of the latter. She never showed much respect for the "long lad" whom though so nearly worthless, she so reluctantly bestowed upon her cousin. The Queen's bed-chamber contains her bed covered with crimson damask, with fringes and tassels of green silk, some pieces of tapestry, and her portrait at eighteen, a very lovely, youthful face, but whether a genuine likeness is questionable.* On the right side of this chamber is a small dressing-room, and also the cabinet, about twelve feet square, in which the Queen, the Countess of Argyll, Rizzio and others, were seated at supper when the conspirators, headed by Darnley, entered by the adjoining private stair case, seized upon Rizzio, and in spite of the tears and entreaties of the Queen, dragged him into the vestibule and there dispatched him. The vindictive ferocity of this attack upon an innocent foreigner, made in this presence of the sovereign, presents a sad picture of the lawless spirit that prevailed among the nobility of that day.

It was a weird and strange experience to wander through these sombre looking rooms, their dark wainscoting and panelled ceilings carved with royal initials and coats-of-arms—to listen in imagination to the light footsteps of the Queen and her four "Maries," or to their merry laugh as it resounded through these now silent halls! The memory of their unhappy queen seems as fresh in the nation's heart as though she had perished but yesterday. They draw a veil over the crimes into which she was led, and the sorrows that attended her career, and they remember more kindly that in the freshness of her youth, she was obliged to exchange the lilies of her beloved France for the rude Scotch thistle, which is ever inclined to sting the hand which presses it too closely.

It appears to me that though much may be said in extenuation of the earlier errors of Mary, little can be adduced in defense of those which marked her later course; but when we remember that at the age of six, she was placed under the control of such a woman as Catharine of Medici, who systematically ruined her own sons that she herself might rule France without a rival,—a woman in who could plan and carry out a massacre of St. Bartholomew!—we could not suppose the young Queen of Scots would remain unharmed.

* It is stated, upon the authority of Sir Walter Scott, that no genuine portrait of Queen Mary is in existence, except a cast now in the museum of the Castle of Heidelberg. The best authorities also pronounce all the objects exhibited as pertaining to Mary and Darnley, to be spurious.

After leaving this part of the palace we descended the stairs to the Chapel Royal, a fragment of the ancient abbey, which was founded in 1128, by David I., whose liberality to the clergy has been already referred to. Under the south-west corner of the ruin is the sombre looking royal vault, covered with a litter of decayed leaves. In this vault are deposited the remains of David II., James II., James V., and his fair young queen Magdalen, of France, daughter of Francis I., who gave her to the young Scotch king reluctantly, on account of her declining health, and who lived but forty days after her arrival in this bleak northern climate: too frail a flower to bear transplanting.

To an eye accustomed to the broad streets and well ventilated thoroughfares of our American cities, the "wynds" and "closes" of Edinburgh and continental cities, appear very dark, narrow, and repulsive. One queries whether a subseam can reach the flagstones at our feet. Gaunt, wretched looking people congregate on the floor-steps or through the open street, at all hours of the day. The favorite time is late in the afternoon, when the whole population is abroad, and no wonder, for in the open street only, can they catch a breath of fresh air, if such a thing is known in the old part of Edinburgh. The crowning evil of this city is intemperance, which opens a door for so many others to follow. Our favorite walk on these fine summer evenings, so long and so like day, was down the High Street, when each flat, for these lofty old-time houses are divided into floors or flats, accessible by a common stair-case, sent forth its inhabitants to the outer world. Here we had many opportunities for witnessing the effects of the destructive habit above alluded to, which absorbs the wages of so many workmen, and keeps them so low in the social scale. We also saw something of their favorite pastimes, as well as *tastes*.

16th.—Last evening we noticed quite a crowd in front of "St. Giles," the neighborhood of which seems to be a favorite rendezvous for the surrounding inhabitants. On approaching it we found two crowds, one surrounding their favorite piper, a fine looking old man, whom we had noticed before at the castle gate, and from his aspect perhaps an old soldier. The drowning of the bag-pipes, though disagreeable to many, seems dear to the Scottish ear. The other crowd which we joined, was gathered around a street preacher, a woman of middle age and respectable appearance, who was gesticulating violently, her arms either thrown over her head or extended before her, her head bent forward, and her voice raised almost to a scream. Her strong Scotch accent rendered it impossible for us to understand anything; but the people listened with respectful attention. But as her agitation increased, the crowd gradually left her and gathered around the piper. "Gie them the Campbells are coming," said a voice in the crowd to the old man: "Sure an ye'd like to do that, seeing ye're a Campbell yersel." Soon the intoxicated wife of the kindly looking piper came to him, and carried away all his silver and pennies. "Ah!" said some one, "she gives him na rest—she takes all he earns." A young-looking man, severely able to stand, kept circling round, trying to snatch away his bag-pipes. "Go away, mon! go away!" said the old man, but again and again he returned to the charge, much to the amuse-

ment of the crowd. I thought if the govern ment would expend some of the money which supports the idle garrison at the castle, for instance, importing ice from Norway, to cool the warm insipid water in summer, one step would be taken towards ameliorating this great evil, this love of strong drink.

Yesterday morning an extensive importation of chairs into the parlor, and various other preparatory movements, indicated that something unusual was to take place in our quiet domicile. Our kind host informed us that a Temperance meeting would be held there in the afternoon. Would we give them our company? Friends to the Temperance cause from America would be most welcome! At 4 o'clock, on entering the room we found some thirty or forty persons, mostly temperance lecturers, assembled, and that the speech-making had begun. From a few whispered questions we inferred that part of two societies were present, one of them, I believe, from Leith, the neighboring port of Edinburgh, which afforded an opportunity for a great deal of pleasant raillery and some self-gratulation by either party, over their successful efforts for the cause. An elderly woman, Blind Maggie, who sat in front of the company, we found to be a very important personage, for she not only sang the temperance ballads in the street, but composed them also. A very enthusiastic little woman, who, when anything especially witty was said, clapped her hands energetically, and as it seemed to think that every thing any one said *was* witty, the hands were going incessantly. I had heard of "sixteenthies" and "seventeenthies" in the sermons of former days; and had admired the patience of the listeners which had held out to the end. Now one queried whether this kind of patience had not emanated from Scotland; hour after hour passed, and still the speeches went on, and the good humor continued, and no one seemed tired. Tea was handed and then they all assembled again. After we had left them we still heard their pleasant voices, encouraging each other to keep on in so excellent a course in the midst of so much discouragement. Sidney Smith has said that "it takes a surgical operation to admit a jest into a Scotch brain," but we saw no indication of this necessity; the speakers were generally very fluent, and exhibited a great deal of shrewd intelligence and quickness of repartee, their abounding wit, effervescing as it did, like "the foam on the flagons" of their proscribed ale.

From "The British Friend" of 21 mo. 1st, 1877.

Hymn Singing in Conventional Worship.

In the present month's number of this Journal there are two pieces very diverse on the above subject: the one is headed "Profanity in Hymn Singing," the other "The Belper Conference." The former points out the injurious effects of the free use of hymn singing. In the latter we have a member of our own body telling us, under conditions named, "The singing of a hymn and the reading of a chapter from the Bible at the commencement of the meeting, would be a suitable introduction to the worship and service to follow, preparing the minds of the people for stronger meat, if that should in mercy be dispensed."

The foregoing, to my mind, raises a vital question not lightly to be passed over by a brush of the pen, for if I am to accept the views put forth by J. J., of Preston, I must

accept the entire negation of our principle a distinct religious body, and the testimony, the spirituality of divine worship. The question must be asked and answered, *What hymn singing? Is it worship, or is it amusement? If worship, dare any so use it, anything higher or nobler than self? Are the views of other professing religious bodies in this matter? Having been brought beyond the pale of the Society, I have some knowledge. The minister, in giving out the hymn, generally prefaces it with words, "Let us now unite in singing to praise and glory of God." And here is the truth of the whole matter; we must, by so a practice, glorify God, or mock Him. At further, we take a solemn responsibility upon ourselves to encourage others to do what we prove to be but a mockery.*

In essence I am unable to separate between prayer and praise, the same divine power must actuate in both alike, and alike may be in secret be offered acceptably unto God. I deem of the two, praise is the higher form glorifying God, as none but a soul so fill with a sense of infinite goodness can be rightly so lifted up. Hence it was that George Fox, and others in their prison-houses, lift up their voices in vocal praise because the cup ran over. And in like manner might souls be so lifted up if so filled, and such would be true and acceptable worship. Can anything point more clearly into what we are, a people, sliding, and from what we have slid, when we can speak and use so light the matter of hymn singing. As to the "rough and raw from the streets," I have known some of these sit in such a way in our meetings; might well shame many who bear our name! It is the love of novelty and change, and the want of a deeper grounding in the truth and reality of our principles that makes so man desire, and, where they can, introduce singing of hymns; and it is one of those things that will work our destruction, as a religious body, if our eyes be not opened to see the pat of *solemn trifling* we, as a people, are entering. We cannot teach others to do and practise among them that which we would not do among ourselves, and be held guiltless. I have said before the reality of our principles, but I should have said it is the principle of truth in which we, as a people, need deeper grounding even to understand aright that no part of God's worship can be engaged in but by the Spirit of God, and Christ must be our Lord and Master to govern us in this matter as in every other act we engage in for His holy name's cause and name's sake. I have no wish to press into an unprofitable correspondence or to write for writing sake, but I desire that my fellow-members may lay this matter to heart, and be willing to look a little closer at what has been the profession of this people from the beginning, and they will see how fully it harmonises with all scripture declaration on this matter. The royal psalmist says, "psalms of praise to God; yea, and with harp, he made a noise unto the God of his salvation, for joy filled his soul. And the apostle Paul would have us sing in the spirit and with the understanding, and I am quite sure if our friends rightly understand this matter they will not teach people to sing solemn words, the import of which so many neither feel nor understand. I would ask why encourage a practice which if any become convinced of, our

principles, they must see to be inconsistent therewith, and have to be abandoned?

One word with regard to the ministry. There are now amongst us who do not hesitate to avow there is no need of divine call or qualification for the ministry of the gospel but who believe in a natural qualification, they call it, and say the Bible is their authority to go preach the gospel to every creature. Is not this one of the causes of our lack of weakness as a body? O for that purity that we might know ourselves as individuals, and as an associated body, more as really are, then would we again shine forth in the early days of this people, and be esteemed more by His Spirit would bring forth more of the fruits thereof to the glory of His holy name, and the spreading forth of truth abroad; but so long as we are separated and removed from the fountain as a united body, we cannot move as a united force until evil to gain the victory, for what one unaiding up another is pulling down, and if all is not glorified, and we are not edited or built up in our most holy faith.

One may think I love to dwell upon our weakness and defects as a body. To such I simply say I speak of things as they are before me, and as I am made to feel they are, and an often sorrowful to find so true unity among a people toward whose professed principles, by convictionment, I have drawn, and further to find so many who are grown up under the nurturing hand of Society doing all they can to pull down at others, like myself, would rejoice to see it up. And why? Because we see in these peoples, in their integrity, the truest happiness of man, inasmuch as they tend to bring soul near unto God through the indwelling of Christ Jesus, and consequently the life in a holy harmony. If I may but rightly up one soul to seriousness in this matter, may all the praise be given where alone it is.

CHARLES W. THOMPSON.

For "The Friend,"

Notes of a Southern Visit.

(Continued from page 253.)

We had meetings at Edenton and Elizabeth City, in the country lying to the north of Alhambra Sound. It was a better farming district than some we had seen. The land is a level, and there are large tracts of swamp bordered with cypress, gum and other trees, abounding in cane or reed, as it is here much. These afford pasturage for the cattle, which are generally expected to take care of themselves. They are sometimes molested by the bears, which frequent the swamps, among the smaller plants, not found in the northern States, we observed a species of cecilia, called Bear-grass, and an abundance of the yellow-flowering jessamine, not now in bloom, but covering the bushes with its even-veined foliage. We were interested also in a species of Smilax, or green-brier, ornamented with numerous clusters of dark blue berries. In our walks around Edenton, we called on Abraham Paxton and his wife. He is his 85th year, and was a slave till liberated the war—though always a trusted servant, well-treated by his owners. His room is neat and comfortable, and he does not seem to suffer want in his old age. He said, often think of that passage, Seek ye first the kingdom of heaven and the righteousness thereof, and all things necessary shall be

added unto you. It seems like I am mighty low as to strength, but the principle within me is as young as ever. I have had to pass through many deep waters and trials since I undertook to fight the good fight. I had a mighty religious old mother; and though I was wild in my youth, yet what she said followed me through life, and I never lost it."

In allusion to his prolonged life, and what a relief it would be to be released from its cares and troubles, and taken to enjoy that rest which remains for the people of God; he intimated that when such thoughts arose, he turned his mind from them, and endeavored to be content with the Divine will; saying, "The Wise Man knows better than I do," when it is the best time for me to be taken from this world.

He tried to encourage us in our religious services, saying in substance, that a man may labor in his field, and for a time see no fruit; yet the seed may spring up afterwards, when he may know nothing about it. So the minister may labor among the people, and see no good result, and be "discouraged," and go away. But his duty is to do that which is set before him, for the Lord will certainly do His part of the work.

After leaving Edenton, we reached Washington, N. C., on the Tar River, on the 21st of 12th mo. Among the colored people whom we visited in their own homes at this place, were "old man Mustapha" and his wife. She thought she was 99 years of age, from the fact that she was a grown up girl of 17 or 18 when the great storm of 1795 passed over this section of country. This seemed to have made a great impression on her mind; and in comparison with it she considered all subsequent storms to have been scarcely worth noticing. It was amusing to notice the contempt with which she spoke of one which the "young folks" thought severe. "It did blow a little house up the street, but it were of no account."

The square and massive frame, and the whole appearance of the woman, evidenced great strength, and rendered it easy to believe her statement, that she had been accustomed to do a man's work in any kind of field-labor. There were considerable energy and spirit left in the old woman, and she was quite disposed to complain of her former master, whose bread she had chewed for him when an infant, that he did not help them in their poverty.

We next called on Barry Crawford, a feeble old man of 80, whose sands appeared to be nearly run out. He is comfortably cared for by a son with whom he lives, and who is a thrifty man, carrying on a fishery on his own account. The old man thanked the Lord for his years of freedom, which gave him a time of rest after a life of hard bondage.

We found that the colored people here had been very anxious about the result of the election; fearing that the Democratic rule would be unfavorable to the system of public schools, and would be marked by the adoption of measures interfering with their rights, such as the compulsory binding out of their children, &c. The daughter-in-law, who was a religious woman, seemed to have been able to place her trust in the Lord's oversight and care. This was a satisfactory visit to us, from the evident religious sensibility that prevailed. The daughter-in-law was at our meeting held in this place one year ago.

Though the recent election was quiet and

peaceable, yet many of the colored people here were turned out of their employments for voting the Republican ticket. There was but little demand for labor at the time, and it was a sorrowful spectacle to see many standing about idle, who would gladly work. The partial exhaustion of the pine forests, which formerly supplied large quantities of turpentine and rosin, has contributed to the dullness of business in Washington.

The waiter of the hotel where we stopped in Washington was a very important personage in the establishment, as on him rested most of the duties of steward, chambermaid, waiter, clerk and porter. One morning he spoke to us of the days of slavery, and said he had seen twenty-five or thirty slaves handcuffed together in their streets, who had been bought by speculators to be taken further South to be sold. Mothers would be screaming after their children, and children after their mothers; so that they could be heard even out of the town. This violent rending of the family tie, was one of the very objectionable features of that unrighteous system.

We designed leaving Washington on Sunday morning, the 25th of 12th mo., but a heavy snow had fallen the previous day, which covered the ground to the depth of 13 inches; and a sleeting rain had covered this with a crust of ice which would badly cut the legs of a horse travelling through it. The surrounding country is thinly populated, and the journeying to and fro proportionally small; so that several days elapsed before the mail hacks resumed their trips, or the lively stable men were willing to trust their horses abroad. After making considerable inquiry, and finding no door of escape, we settled down in our room as patiently as we could, and waited for the morrow, in hopes that a thaw might liberate us. The morrow came, and the roads seemed untouched, and were impassable. No steamer, bound in our direction, was lying in the river; but we found a little one-masted sailing boat at the wharf, which its owner used for making trading voyages among the creeks and rivers of eastern North Carolina, exchanging groceries and dry-goods for the produce of the plantations. This we chartered to take us to Newbern, 100 miles by water, though the land route is only 36. Procuring a few hard-boiled eggs, cheese and crackers for provisions, we embarked at noon on the 26th. The extreme dimensions of our craft were 28 feet long and 10 wide. The hold occupied much of the interior, leaving space for a tiny cabin in the stern of the boat.

Our captain, John Pilley, was a thoughtful, elderly man, who had formerly been a respectable merchant in the place; but had become impoverished. He carried a Bible with him on his voyages, and we had some serious and satisfactory conversation with him. He was interested in knowing the views of the Society of Friends on baptism, ministry, worship, &c.; and appeared to appreciate the supreme importance of that washing of regeneration, without which all forms and ceremonies are of no value in religion. It was a great satisfaction to be able to hand to him, as to many others with whom we met, a religious book; which was received with hearty thankfulness.

He had with him as assistants, a boy of about 18, and another of about 14, a bright, good-natured, willing-hearted little fellow, who was a thorough sailor. The old man often appealed to his younger eyes, as we

sailed through mist and darkness. He had been to Newbern with his father more than once, and seemed more familiar with some portions of the route than the captain, so he was called on to guide us over a dangerous sand-bar off of Brant Island, and past the blockade obstructions which had been placed in Neuse River during the time of war to prevent the Union vessels reaching Newbern. The three formed a happy family, mutually considerate, and all good-natured and kind.

The wind was light and inconstant, so that night overtook us long before we reached the point where the Pamlico River is considered to end, and the Sound to begin. A light fog came on, which discouraged our captain, who feared the sand-banks; and induced him to cast anchor early in the evening. About 8 P. M., all prepared to turn in for a nap. A bunk on each side was given to the two passengers, who found their sleeping shelf was long enough to stretch in, and a little wider than their bodies; but it was so near the deck of the vessel that the attempt to turn would bring one's shoulders in contact with the timbers above. The captain and two boys crowded themselves into the narrow space of floor that lay between the bunks, where, however, they had the advantage of more head-room. The night was cool and damp, but when all five (and the dog) were packed into the little apartment, and the doors tightly closed, the fire in our stove made it seem abundantly warm. Scarcely had we settled into our positions, before one of the company, whose nerves were unable to endure the sense of suffocation, made a sudden start for the outer air, with an exclamation implying that pecuniary considerations would have no influence in inducing a longer tarryance in the confined abode. Wrapped in such equipments as were at hand, he seated himself on the deck, preferring to endure the chilliness of the night air to the closeness of the cabin. His sudden exit caused some amusement to those below, but in process of time he was joined by another, whose power of nervous endurance had become exhausted by the sense of confinement and restraint of motion. About 10 P. M. it commenced to rain slowly, which compelled the weak-nerved brethren to take refuge in the cabin. But by stowing the other part of the company into the bunks, and taking possession of the floor, with their heads near the open door; and the skillful use of shawls and overcoats, they managed to make themselves tolerably comfortable.

any one let his station be what it may, is not crippled by this associating in these worldly combinations.—*Journal of William Evans.*

For "The Friend"
PREVENTING MERCIES.

BY H. MACMILLAN.

"Let thy tender mercies speedily prevent us!"—
Psalm lxxxix.

The Hawthorn hedge that keeps us from intruding,
Looks very fierce and bare,
When, strip by winter, every branch protruding
Its thorns that wound and tear.

But spring-time comes, and like the rod that budded,
Each twig breaks out in green;
And embryos soft of tender leaves are studded,
Where spines alone were seen.

And honeysuckle, its bright wreath upbearing,
The prickly top adorns;
Its golden trumpets victory declaring
Of blossoms over thorns.

Nature in this mute parable unfoldeth
A lesson sweet to me;
God's goodness in reproof my eye beholdeth,
And His severity.

There is no grievous chastening but combineth
Some brightness with the gloom;
Round every thorn in the flesh there twinneth
Some wreath of soft'n'g bloom.

The sorrows that to us seem so perplexing,
Are mercies kindly sent,
To guard our wayward souls from sudden vexing,
And greater ills prevent.

Like angels stern, they meet us when we wander
Out of the narrow track,
With sword in hand, and yet with voices tender,
To warn us quickly back.

We fain would eat the fruit that is forbidden,
Not heeding what God saith!
But by the flaming cherubim we're chidden,
Lest we should pluck our death.

To save us from the pit, no screen of roses
Would serve for our defence;
The hindrance that completely interposes,
Stings back with violence.

At first, when smarting from the shock, complaining
Of wounds that freely bleed,
God's hedges of severity us painning,
May seem severe indeed.

No tender veil of heavenly verdure brightens,
The branches fierce and bare;
No sun of comfort the dark sky enlightens,
Or warms the wintry air.

But afterwards, God's blessed spring-time cometh,
And bitter murmurs cease;
The sharp severity that pierced us bloometh,
And yields the fruit of peace.

The wreath of life, its healing leaves discovers,
Twined round each wounding stem,
And, climbing by the thorns, above them hovers
Its flowery diadem.

The last day only, all God's plan revealing,
Shall teach us what we were,
To these preventing mercies, thus concealing
Them-selves in masks of woe;

Shall tell what wrongs they kept us from committing,
What lust and pride they cross'd,
What deeds of sin they fouled, in which unwitting
Our souls would have been lost.

Then let us sing, our guarded way thus wending,
Life's hidden snares among,
Of mercy and of judgment sweetly blending;
Earth's sad but lovely song.

(To be continued.)

W.

My mind had been under exercise on account of Friends mingling with those political parties and associations, and I revived the ancient testimony, "Lo! the people shall dwell alone, and shall not be reckoned among the nations." Whenever they did mix with them, they were caught in their idolatrous practices, lost their strength, and were often overrun and overpowered by them, because they forsook the Lord and his worship. And so it is with us. Those who join the political assemblies, lose their spiritual strength; become impregnated with their spirit; and if they continue, become like fruitless branches cut off from the vine; they are dead, as to the Divine life, and the men of this world gather them into their fellowships, and they are ruined or destroyed, as to any life or virtue. Friends were called on to observe whether

Dark seasons are never pleasant to us, but they are always good for us. A cloudless harvest.—*Johnson.*

Communications.

Extracts from recent Letters received from A. H. Jones, Danville, Va.

3d mo. 12th, 1877.

We have now attending the school at Columbus, N. C., an instance of the benefit of our own work and what may be done in a short time, in the case of Julia Snyder, seven years of age, of light complexion, full bright eye, pleasant face, and medium stature.

Her first introduction to the school was in 1871. She learned the alphabet in a day. She soon began her first lessons simple reading and spelling, and though necessarily obliged to be out of school some portion of the time, so rapid has been her advancement that she is now one of the best scholars. For six weeks during the winter she taught school in the country.

Besides this case there are two grown up who never attended school before the present term, and are now reading quite well in 3rd reader, studying arithmetic, and spell such words as "treasurer," "jeopardy," &c.

The Methodist minister at Lincolnton, educated in our school at Goldsboro, is quite a young man, but is well liked, and seems voted to his work.

I have found our work uniformly prosperous so far, and have reason to be truly thankful to our Father in heaven, that it has been interrupted in any way. All has been quiet and peaceful, and we have the satisfaction witnessing large improvements as the results of the self-sacrificing earnest efforts the workers. It is not too much to say, that we certainly have an efficient corps of teachers.

Salem, 3d mo. 15th, 1877.

I came from Charlotte, Third-day morning to Thomasville, visited the schools at Howell and Andrews Grove the same day, a back to Thomasville in season to have a meeting at night. Yesterday, visited the school of Alice Davis, thence to Greensboro, where I visited the Bennett Seminary for Color Youth and our own school, and reached home last night. I have been in our school to-day and think it a most excellent one. Dr. Keck called at the hotel to see me, and speaks of the teachers in terms of great commendation; says he will give us public money for five months. He expresses a strong wish to have the same teachers sent them again. He says they have made many friends among the families by their consistent course, and had like bearing towards all. The Doctor has been a warm and faithful friend to all our teachers, and deserves the highest credit for his assiduous attentions in looking after the comfort; in providing suitable and good boarding places with nice families; in seeing that the school house was made comfortable and kept in repair; and in many other ways. He has also done much in visiting the school and encouraging the children and teachers and is always ready as a counsellor in what they could do.

We are concerned that the management of our Christian Discipline be not committed to hands unclean; particularly of such who allow or connive at undue liberties in their own children or families. "If a man," said the Apostle, "know not how to rule his own house, how shall he take care of the church of God." *Discipline of Philadelphia Yearly Meeting.*

For "The Friend,"
 Gospel a Power.—not merely a record claiming
 assent.

to the knowledge that we have the
 of salvation placed within our reach,
 gh a compassionate Redeemer, there is
 ps no thought so precious as the sense
 all, without distinction, are invited freely
 me to Him, as to a Fountain of Life;
 the light of His blessed Spirit has
 d every heart; access thereto depending
 upon any instrumentality of others, but
 our own sincerity and obedience. If we
 I drink of this Fountain, we must first
 mpted of all our own righteousness,
 humility would take the place of self-
 edence; and having faith in its healing
 and all-sufficiency, we should seek for
 bread and Water of Life, and not seek
 in vain.

e work of regeneration, though it must
 egin and perfected in each individual
 by co-operating with the manifested will
 od to us, a sight and sense of which are
 all received by the Spirit, which searcheth
 ings, and showeth all things; is also the
 of free and unmerited grace, because it
 living faith any can thus stand; as in
 words of the Apostle, "By Grace are ye
 I through faith, and that not of your-
 s, it is the gift of God." Its very begin-
 is in the inward manifestation of the
 ; the dawn of His Light upon the soul;
 re the "seed of the kingdom," if watered
 fed, will grow and overshadow the earthly
 re, and exalt the whole being.
 le the earnest inquirer after truth will
 to avail himself of every help which
 lie in his path, highly prizing the Holy
 ptures as a secondary means; the Source
 hich he will ever flee for refuge and safe-
 eance, will be that which is bestowed free-
 e gift of the Holy Spirit. This is that
 pel of which the early Christian believers
 argely testified, even the unspeakable gift
 easure of God's Spirit; His own free-
 e, shed upon mankind more abundantly
 gh Christ our Saviour. What greater
 on or privilege could be conferred upon
 ional immortal being, than is thus offered
 e hope set before him; so comprehensive
 the apostle defines it to be the "power
 od unto salvation" to as many as truly
 ve therein; referring, doubtless, not merely
 an outward declaration, for he speaks
 definitely, as an operative, regenerating
 er, which reaches the heart, and fills the
 ient believer with joy and rejoicing, under
 acious sense of the love of our Heavenly
 r through a crucified, risen and glorified
 I. Paul in his Epistle to the Galatians,
 rges upon this interesting subject, and
 our attention upon the Divine character
 rewith the Gospel is clothed. After de-
 g the nature and authority of his apostle-
 y, and his commission to teach and preach
 s Jesus, "Who gave himself for our sins,

He might deliver us from this present
 world, according to the will of God and
 Father; to whom be glory for ever and
 ever." "I marvel," he adds, "that ye are
 not removed from him that called you into
 grace of Christ, unto another gospel,"
 which he asserts, "is not another, but a perva-
 sive of that which he preached; and solemnly
 as those he was then addressing, who
 more easily allured into crooked paths,
 some others who had received the Truth,

against giving ear to such as would preach
 any other Gospel unto them; stating, "though
 we, or an angel from heaven," were thus to
 preach, "let him be accursed."

And the same gifted Apostle, further un-
 folds and enforces the nature and dignity of
 his calling, by defining the way in which
 he received the blessed Gospel; distinctively
 known from all other covenants and adminis-
 trations, as the Gospel of Christ; and in this
 explanation, he sufficiently sets forth the na-
 ture and essence thereof, coming from his
 blessed Source into the soul, as the Lord is
 pleased to reveal it. He says:—"But I certify
 you, brethren, that the Gospel which was
 preached of me, is not after man; for I neither
 received it of man, neither was I taught it,
 but by the revelation of Jesus Christ." And
 then to show that the Gospel was universal,
 and not designed to favor one portion of the
 human family more than another, he refers to
 his former unconverted life as a Jew, and to
 the deep-biased prejudices implanted in his heart
 by the traditions of his fathers, which were
 all swept away, after that his mind had been
 turned to embrace Christianity; when he saw
 with a changed heart, his spiritual vision
 being no longer obscured; and though his
 preaching was first among the Jews, to his
 own kindred and people, yet very early his
 labors took a much wider range, and were
 even more abundantly blessed among those
 nations which were of the Gentile world. His
 mind seems to have been particularly fitted
 for the work which was assigned him. He
 says:—"But when it pleased God, who called
 me by His grace, to reveal His Son in me, that
 I might preach him among the heathen; im-
 mediately I conferred not with flesh and
 blood." In addition to these several passages,
 there are many others to be found in the New
 Testament Scriptures, which assert the same
 doctrine, and show very clearly that the Gos-
 pel the apostles were commissioned to pub-
 lish, was not merely an outward instrumen-
 tality, nor merely the recorded sayings of
 inspired and holy men; for some of these had
 not taken form, and were not known in the
 early years of apostolic ministry.

Is it not manifestly clear from the language
 which Paul uses:—"When it pleased God to
 reveal his Son in me," &c., that he Paul, did
 ascribe the availing knowledge which had
 been communicated to his understanding con-
 cerning Christ and his Gospel, to the awak-
 ening power and love of God poured in upon
 his soul? That it was hereby the mysteries of
 Christ's kingdom, the beauty, excellency and
 glory of the New Dispensation were unfolded
 to him, and that he became even more valiant
 for the Truth, than he had been on the side
 of error. And the same Power that opened
 these things to Paul, instructed him to carry
 the Truth he had received unto others; gave
 him a clear view also of the work for which
 he had been prepared, and set his path plain
 before him.

The Gospel being, therefore, in its spiritual
 meaning, as Paul asserts it to be, a living
 animating power in the heart of the true be-
 liever, is to be regarded also as a message of
 the love of God freely extended to all man-
 kind; and as that which is known of God is man-
 ifested by the Spirit, the conclusion is plain-
 ly reached, that the Gospel cannot be avail-
 ingly received by tradition, or learned saving-
 ly in any outward school, but only as Paul
 was taught it; and as George Fox sets forth,

he was also instructed; becoming first a pupil,
 and then an able teacher in his defence, "with-
 out the help of any man, book or writing."

While the influences which are apparent to
 us, as active causes in working a change of
 heart in different individuals, are much varied,
 we must bear in mind these are the agencies
 chosen by an all-wise Providence to reach
 the various conditions of His children, being
 adapted as they are, to their different neces-
 sities. Instruments of good we are all de-
 signed to be, but the work of redemption in
 any soul, whereby Christ's image and super-
 scription are received, is of God our Saviour,
 whether performed, as in Paul's wonderful
 conversion, or by whatever means it may
 please the Lord to visit His people. It is He
 alone that giveth spiritual increase, and this
 power He will not delegate to another. Hence
 the wonderful uniformity that prevails in the
 dying testimony of such as have been safely
 gathered to their eternal home; that what-
 ever they may have attained to in the Chris-
 tian life, was to be ascribed to the free and
 unmerited grace and mercy of God, through
 His dear Son their Saviour: an assurance of
 hope; the glad tidings to them which none
 can fully realize, save those who have been
 washed and made clean. And such as these
 know the Gospel, even as Paul knew it. Their
 own lives, and peaceful close, are its sufficient
 vindication. Christ's doctrines are adorned
 and exalted by their faithfulness; and finally
 in their crowning victory over death and the
 grave, the evidence is clear and overwhelm-
 ing; as they received Him, their Saviour, not
 only in his outward appearing, meritorious
 works and death, but in His spiritual presence
 within them, they became renewed men and
 women; and walking in the fear of God, and
 in the comfort of the Holy Spirit, they exem-
 plified the preciousness and sufficiency of the
 Gospel of Christ, by a life of faith, and con-
 formity thereto.

P. B.

(To be continued.)

For "The Friend,"

New Jersey Reform Schools.

The Reports of the schools under the care
 of the State of New Jersey for the reform of
 Juvenile delinquents, detail their operations
 during the year ending 10 mo. 31st, 1876.

The object of these valuable institutions is
 to provide a refuge for those neglected or way-
 ward children, who would otherwise be sub-
 jected to the degrading influences too preva-
 lent in our common jails, or be suffered to
 fall into vicious courses for want of a restrain-
 ing hand. In the Reform Schools, their phys-
 ical wants are well supplied; suitable liter-
 ary and moral instruction is given them; and,
 which is a matter of prime importance, they
 are brought under the control of a steady,
 firm, yet mild discipline.

During the past year, additional buildings
 were erected for the boys' department, near
 Jamesburg, N. J. The number of boys
 in the school at the close of the fiscal year
 was 214, being 22 more than at the same time
 the preceding year. The admissions during
 the year were 74, and the average age a
 little over 13 years. Of these, 57 had lost one
 or both of their parents, or had parents who
 were intemperate in the use of intoxicating
 drinks. The table of offences, for which these
 children were consigned to the care of the
 school, shows that 52 of them were guilty of

dishonesty in some form, and 22 were vagrants or disorderly.

The Report of the Girls' School, located near Trenton, shows 33 children under care, being 13 more than the previous year.

The efficient and satisfactory manner in which these schools are conducted, is largely owing to the conscientious and thorough supervision and labor of the Trustees, with whom this care is evidently a labor of love.

W.

Moorestown, N. J.

For "The Friend."

Interesting Incidents in the Life of George Withy.

The following interesting incidents in the life of George Withy were related by our friend, Thomas Evans, a short time before his death.

George Withy was the son of an Ale-house keeper in Bristol, who was a dissipated man, but his wife was a religious woman and much concerned for the welfare of her children. Thomas Carrington, a minister of the Society of Friends, from Pennsylvania, while on a religious visit to England, felt a concern to visit the Ale-house keepers of Bristol.

Among others was the father of George Withy; the latter being at that time about 13 years of age, was engaged in carrying round the ale to his father's customers, and having a remarkably sweet voice, he was often asked to sing. The exposure to which he was subjected was cause of great concern to his pious mother, which she had expressed to Thomas Carrington. Before the interview closed, George Withy came in. T. C. looked attentively at him for awhile—then placing his hand on his head, remarked to his mother—thou need feel no concern for the lad, for he will be met in a narrow place, he will become convinced of the principles of the Society of which I am a member, and will have to visit my native land in the love of the Gospel.

George, mentally resolved he would never become a Quaker, nor ever become a minister, and he would certainly never visit America.

In the course of time he had an alarming attack of sickness, during which, he was attended upon by his anxious mother, whose exercises on his account were very great. He was indeed met in a narrow place, and became convinced of the principles of Friends, and while relating this circumstance to Thos. Evans, he said, When I left my sick room, I appeared in the garb thou now seest me in.

He was received into membership about the 22d year of his age, and first appeared as a minister in his 25th year. He became interested in a young woman, a member, whose family objected to the marriage on account of his humble position in life. But their attachment having such a foundation as to induce the belief that it would be right to take that important step, the objection was finally removed. They settled several miles from Bristol, and were in the practice of regularly attending the meeting twice in the week, and having no conveyance were obliged to walk, which they continued to do, until they had six children old enough to walk with them, never omitting a meeting except in case of sickness, and always taking the children with them.

His memorial states, he removed in the year 1805, to reside within the compass of Friends Meeting. Some years after this, feeling a

religious concern to visit America, which he had long been resisting, reasoning that he could not leave his dependent family, and aged mother, who was then about 87 years old, he was brought to a state of submission by a remarkable circumstance. As he was lying on his bed one afternoon with closed eyes, under a feeling of deep distress on account of this prospect, it appeared to him that two men entered the room, each carrying a stool, such as are used at funerals, and set them at the foot of his bed, they then left the room, and returned, bringing in a coffin which they placed on the stools; observing a plate on the lid, he read—George Withy, died 7 mo. 13th, 1822, aged 59 years. This increased his distress—when he heard in his mental ear, the language, "If thou wilt be faithful and yield to my requiring, thy family shall be cared for in thy absence, and I will add fifteen years to thy life, and thou shalt return to close thy mother's eyes in death."

The visit to America was performed in 1821-2, and while in this country, George Withy frequently had Thomas Evans for his travelling companion. One day G. W. seemed thoughtful, and was evidently passing through religious exercise. He informed T. Evans that this was the day that he had seen on the plate on the coffin should be the date of his death. He feared that he had not been sufficiently faithful, and that his death therefore, would really occur. This, however, did not prove to be the case. Exactly 15 years from that time George Withy died. They visited Washington during the sessions of Congress, and G. W. wishing to hold a public meeting, Thomas Evans consulted some of the prominent men, who encouraged it, and proposed to have it announced by hand bills, which were accordingly posted in different parts of the city.

On their way to attend the meeting, the friends observed a large number of vehicles collected in the neighborhood of the Capitol, the sight of which, almost overwhelmed George Withy, who remarked to his companion, that he feared he had made a mistake; the latter encouraged him to believe that this was not so. On arriving at the door of the House of Representatives, so large a crowd had assembled, that way had to be made through it for them to reach the seats it was intended they should occupy.

On a stand before them were a bible and a glass of water, which at their request, were removed; on seeing such a large concourse of people, G. W.'s heart almost failed him, and again he was assured by his companion.

After sitting some time in silence, George Withy arose with the text—For ye see your calling, brethren; how that not many years men after the flesh, not many mighty, not the foolish things of the world to confound the wise; and God hath chosen the weak things of the world to confound the things which are mighty; And base things of the world, and things which are despised, hath God chosen, yea, and things which are not, to bring to nought things that are: That no flesh should glory in His presence." Upon this he enlarged in a remarkable manner, the audience being much impressed and affected. Old men with white hair, and women dressed as dowagers, were equally broken under his baptizing ministry, the tears streaming down their faces, so that, to use the lan-

guage of Thomas Evans, "the floor was almost strewn with tears, and it was one most remarkable meetings I had extended."

After the meeting, the people crowded to speak to him, expressing their satisfaction and approval of the sentiments delivered; he was descending the steps of the Cap. Presbyterian minister embraced him—My dear brother—you have preached the Gospel this day.

Upon returning to his native land he the promise verified—his family had been cared for, and his mother was still living deceased soon after, being about 90 years of age. George Withy died the 13th of 7th 1837.

The Southern Negroes.

Edward King in his observations regarding the recently emancipated slaves in the Southern States, remarks: "It has been the faith in both North and South, to believe that negro would prove susceptible of civility only to a certain point. But the univ. testimony of the mass of careful observers that the negro can go as far in mental excess as the white child. The blacks' wonderful memories and strong imitative penchants; eloquence, passionate and natural; a strange and subtle sense of rhythm poetry; and it is now pretty well settled there are no special race limitations. V. then, should they not go forward to a future? Is it not the duty of that see which gave them political power before they were fit to use it, to give them an opportunity to fit themselves for its exercise? It will long before they can, of their own effort, ply the funds needed for their education; will they can, the North should not fail to follow all the schools, which like the normal institutions, are required to sow the good seed.

The schools are doing much to lift up negro's idea of the dignity of religion. Practically Christian institutions, they struggle to inculcate that morality and self-denial which it seems so difficult for the blacks exercise. Although there are many exemplary Christians among the freedmen & freedwomen, it may safely be said that majority do not allow their religion to interfere with their desires. They believe in a spasmodic shouting, stamping and groaning which characterize them, as essentials of true worship; they are excited to the most altered state by the rude and picturesque ranges of their preachers and obey them implicitly, so far as they understand them. Wherever education goes, this conduct ceases. The missionaries from the normal schools struggle against the besetting sins of the African, and are gradually helping him. The school-houses and the church, together with intelligent earnest advisers in each, will transform the character of the freedmen in another generation.

The negroes have a profusion of church organized by themselves, in all the large cities of the South and South-west; in Memphis, New Orleans, in Richmond, and in Charleston, the churches are well sustained, and attended by immense congregations. Preaching is sometimes absolutely fine; the are colored men of great culture and natural talents in the ministry; but as a rule, ministers are rude in their language, forcible in their illustrations, and possessed of an

ism which, whether or not the proof of spirituality, is certainly inspiring to one who witnesses it. The emotional of the black man's worship is, of course, which develops the greatest number of rarities. It will always, even when the is educated, remain a striking feature, will be chastened and subdued." "er some mention of the efforts always for the education and improvement of interesting portion of the human family: "But for the millions of freedmen women in the South the work which has been done is only as a drop in the te. Hundreds of thousands of dollars needed to supply this people with the necessities of their intellectual inment; a steady charity for ten years to will be in no wise mistaken. They need all, to be taught how to help them; and by the normal schools and the ete education of the most promising inals of their race, that will be soonest plished."

Selected for "The Friend."

great work and business of the cross rist in man, is seldennial; a world of depth in itself, and of sore contradiction to the world; little understood; but less eed by it; which yet must be borne. Son of God is gone before us, and, by itter cup He drank, and the baptism offered, has left us an example that we follow his steps. This made him put ar question to the wife of Zebedee and two sons, upon her soliciting that one sit at his right, and the other at his and in his kingdom: "Are ye able to of the cup that I shall drink of, and to pized with the baptism I am baptized?" It seems their faith was strong; they eed, "We are able." Upon which he d, "Ye shall drink indeed of my cup, and pized with the baptism I am baptized" but their reward he left to his Father. at was the cup he drank, and baptism fered? I answer; they were the doual offering up of him-self by the eternal Spirit will of God, undergoing the tribulations of life, and agonies of his death upon the for man's salvation.

at is our cup and cross that we should and suffer? They are denying and ing up of ourselves, by the same Spirit, or suffer the will of God for his service lory. This is the true life and obedience cross of Jesus; narrow still, but before, beaten way. When there was none to not one to open the seals, to give knowl- to direct the course of poor man's re- y, He came in the greatness of his love and ght; and though clothed with the inrma- of a mortal man, being within fortified e Almightyness of an immortal God, he lled through all the straits and difficul- of humanity; and, first of all others, trod the rotten path to blessedness.—*No Cross, crown.*

weeds grow fastest in a fat soil, so our ous grow and thrive most when our tal state is most prosperous. There, God's love and care of us constrain him limes to use severe discipline, and to tur- in our temporal enjoyments.—*Bishop ins.*

THE FRIEND.

THIRD MONTH 31, 1877.

There is much instruction to be derived from the advice given by George Fox to the ministers among Friends in his day, "Though they that travel may have openings when they are abroad, to minister to others; yet as for their own particular growth, they must dwell in the life which doth open; and that will keep down that which would boast."

There are many who can bear witness to the truth of this statement. For though the mind may be covered with concern at times for the good of others, and individuals may be exercised in the labors which flow from this concern; yet there is often spread over such, a feeling of poverty, leanness and spiritual starvation, which leads the soul to wait upon the Lord, humbly begging from Him a crumb of Heavenly bread to nourish and keep it alive. The true servant of the Lord is thus taught his dependence on Him from whom cometh every good and perfect gift; and all boasting is excluded.

In the message which the beloved Apostle John was directed to write to the angel of the Church of Ephesus, from Him who walked in the midst of the seven churches, and was "like unto the Son of Man," it was declared, "I know thy works, and thy labor, and thy patience, and how thou canst not bear them which are evil: and thou has tried them which say they are apostles, and are not, and hast found them liars; and hast borne, and hast patience, and for my name's sake hast labored, and hast not fainted. Nevertheless, I have somewhat against thee, because thou hast left thy first love."—

It is evident from this passage, that though we may labor abundantly, be very zealous for the cause of the Lord, and firmly uphold the doctrines He has taught His church; yet there may be at the same time a gradual, and perhaps almost unnoticed departure from our first love to Him—from that humble, contrite and tender state of mind which we were once favored with. We may become so occupied in keeping the vineyards of others, as to neglect our own; and may substitute active labor for others, or in the performance of the services of the Church, for those seasons of prostration of soul before the Lord, which are necessary for the renewal of spiritual strength.

The need of care on this point applies not merely to those who have been commissioned publicly to proclaim the truths of the Gospel, but to all who make profession of the Truth. We are too apt to forget, that it is only the Divine blessing which makes any labor in the cause of righteousness effectual; that it is the Lord's works alone which praise Him. This consideration should make us careful to seek reverently for Divine direction. Whilst we are preserved in a humble and teachable disposition, let us also be faithful and earnest in our efforts to fill up our measure of service in the Lord's cause. We are exhorted to be "fortent in spirit, serving the Lord." But in all our labors, may we ever bear in mind, that for our own growth or preservation in the Truth, we "must dwell in the life."

SUMMARY OF EVENTS.

FOREIGN.—A dispatch from London says Russia refused to demobilize her troops until there has been a preliminary demobilization by Turkey, the signature of the Porte to the protocol, and the conclusion of peace between Turkey and Montenegro. England opposes the protocol unless Russia pledges herself to demobilize.

The Berlin correspondent of the *Standard* telegraphs: "I can affirm confidently that the Porte, on the 20th inst. informed the Powers that it would under no circumstances, yield assent to the Russian proposal if the document required Turkey to demobilize before Russia, Constantinople, 31 mo. 25th.—The Montenegro delegates have again conferred with Sivev Pasha. The Porte still refuses to cede Niesitz and Koutchik, but claims a disposition of the frontier under the terms of the Montenegrois. The latter, however, decline to renounce their demands for Niesitz and Koutchik. The Porte has informed the Montenegrois that it will submit to the Turkish Parliament next week for final decision the concessions which it is willing to grant Montenegro, and will also submit therewith the Montenegrois demands.

London, 31 mo. 26th.—The *Standard's* Berlin despatch states that the Marquis d'Abzac, the aide-de-camp of President MacMahon, who came to Berlin to congratulate the Emperor William on his birth-day, met with a distinguished reception. Prince Bismarck, at a dinner to the diplomatic corps, expressed great satisfaction that the friendly relations between France and Germany had so far improved as to enable the Emperor to send a special envoy to the Emperor.

In the German Reichstag the bill fixing Leipzig as the seat of the Imperial Court of Germany has been adopted.

The *Morning Post* publishes a special telegram from Berlin stating that the Finance Committee of the Reichstag have reported in favor of refusing the increase of the navy estimates demanded by the Government, declaring the present military expenditures so burdensome that further charges are inadvisable.

One hundred deaths from small-pox occurred in London last week.

In 1835, when England had a population of 14,928,477, 10,125 persons were sentenced to imprisonment and 3311 to transportation and penal servitude. In 1875, with a population of 23,000,000, only 9282 were sent to prison and 1629 to penal servitude.

A passing vessel recently brought news of the Pitcairn Islanders. They numbered about eighty-seven, and the *San Francisco Bulletin* says "are without law or money, governed, if such a term can be used, or perhaps more properly led, by Mr. Young, who acts as their leader, preacher and schoolmaster, and in all matters requiring arbitration or decision is recognized as the high tribunal."

Mail advices from the City of Mexico to the 15th instont, received in Havana yesterday, indicates the dissolution of the Diaz party. Several generals, original adherents of Diaz, had resigned; Congress had been for two weeks without a quorum; and the opposition was consolidating. The *El Globe* has already, but the people were talking of recalling Lerdo.

The Norwegian Government proposes to send out a vessel during the year for the purpose of deep-sea explorations in the Atlantic. A credit of 103,000 *krone* has been sought from the National Parliament to cover the expense of the expedition.

The great business of fish-lake making in France employs 90,000 operatives, two-thirds of whom are women. In a year 2,500,000 dozen pairs are made, and three-fourths are exported.

UNITED STATES.—The interments in Philadelphia last week numbered 351.

The weather has recently been winter and stormy. At Chicago a blizzard fell on the 20th, and blocked the streets to travel. On the sides of the streets the snow was piled up from three to four feet high.

Secretary S. H. Hurl has appointed the following persons under the provisions of law, to investigate closely the habits of the locusts, grasshoppers and Colorado beetles which for a few years past have been so destructive in the extensive regions especially west of the Mississippi river. The commission consists of Prof. C. V. Riley, of St. Louis, Prof. Cyrus Thomas, of Carbondale, Ill., and Dr. A. S. Packard, of Salem, Mass.

The Secretary of War has issued the following circular: The civil employés now in the service of the United States under the War Department are hereby informed that hereafter removals will be made in this Department for cause only, and promotions will be ordered upon the sole ground of merit. Every official must understand that retention and advancement in the service will depend upon record of good behavior and efficiency,

and not upon external influence. No political test is required beyond an earnest support of the Constitution and its amendments, and a proper respect for the rights of man against the Government. Liberty and fidelity in the discharge of duty, a good moral character, and strictly temperate habits will be required and enforced, and I heads of bureaus will report promptly any ease of idleness, neglect of duty, incapacity, leniency or any immoral or dishonest conduct. In case of vacancy report thereon to be made, also applied for by all the most reliable and prominent clerks in the same office, division or bureau from which list the vacancy shall be filled.

It is understood that all the other departments will be controlled in accordance with these principles.

General Sheridan informs Gen. Sherman at Washington, that four or five hundred men will be sent to the Red Cloud Agency, to confirm the breaking up of the hostiles. A number of scattering lodges have already surrendered, with arms and ponies, at Red Cloud and Spotted Tail's, and quite a considerable number are on the way, in between the Bellefleur and Red Cloud Agency. A delegation is reported to have gone to make terms with the Miles.

The explorations of Professor Hayden's geological surveying party during the coming season will be conducted north of the Union Pacific Railroad, along the 4th parallel, explored by Clarence King, and continued north and west in the Territories of Idaho, Wyoming and Montana, and will extend to the mouth of the Snake River, and a distance of five months. A comparatively unknown region will be examined and mapped.

Notwithstanding the explicit declaration of President Hayes and his official advisers that very few appointments in any department of the public service were likely to be made, and all applications for places were discouraged, the real and disgraceful fact is presented at Washington of hundreds of applicants, both men and women, whose petitions for office are backed by Congressmen and other persons of influence, vainly striving to crowd themselves into the public service. This mischievous delusion dates back to the early part of 1872, when General Jackson, who had been elected after a three party struggle, announced that frequent rotation in office was desirable, which was supplemented by Secretary M. S. Drexler's agent "that to the victors belong the spoils." This was introduced the pernicious idea that offices in the public service were to be made the reward of political services. These principles have been too faithfully carried out in all the past 45 years by Jackson's successors, of whatever party, the result being a demoralization of public sentiment so inveterate and deep-seated, that President Hayes' efforts, aided by the Heads of Departments for its eradication, seem almost hopeless.

The administration have a difficult task to deal with in regard to the complications in Louisiana and South Carolina, but a far more onerous one in regard to the much needed reform in the public service.

It was decided at a Cabinet meeting held on the 21st inst., to call an extra session of Congress early in the 83rd month, and to send a commission of prominent public men to Louisiana before taking final action in regard to that State.

On the 21st inst., the Legislature of Pennsylvania, in joint convention, declared the election of J. Donald Cameron as U. S. Senator, to fill the vacancy caused by his father's resignation, and that of Ohio declared Charles Matthews to be elected, to fill the vacancy caused by Sherman's resignation.

It is understood that Wade Hampton will visit Washington in response to the invitation of President Hayes. Chamberlain has accepted the invitation and will arrive in Washington to-morrow.

General Grant left Washington on Sunday night for St. Louis, Mo., to be here on Tuesday, and to spend a few days at Harrisburg, and then come to Philadelphia. He will call from this city for Europe with his family on the 10th of 5th mo.

Local option was defeated in the Pennsylvania House of Representatives by the decisive vote of 109 to 70. The vote secured was 41 in favor in Kansas and Missouri, occurred on the 21th. It was followed by hard frost.

At Albany, N. Y., in the Senate, the bill allowing women to hold office in school boards was passed.

The paper forests in the region of country north of Burlington, Me., have been cut down for timber for the manufacture of paper. The forests are now considered by the farmers as almost entirely worthless, a good deal of the wood or lumber hardly paying for the cutting and hauling; but now the timber brings a high price.

The ruffians who murdered the Chinese in Ohio, (I. I.), have been captured. They are three in number—Starkweather, Conroy and the boy named—The convict. Conroy was arrested for sending threatening letters to citizens who were working up the case, and he gave the information which led to the arrest of others. Conroy and the Slaughter boys wrote most of the letters. Two other men, named Ames and Wright, have been arrested on a charge of arson, presumably in connection with the same case.

The fish commission of Vermont are proving successful, with some most interesting experiments. They have transplanted the smelt from the salt water to the fresh waters of the State, with improvement in their quality. Herring have also been transplanted into some of the larger deeper Vermont lakes, mainly in the State of New York, with the same result.

The peach crop for all this year, according to the reports coming from all parts of D-I-ware, promises a large yield. With favorable weather, it is thought there must be as large a crop of gold peaches as we have had for many years.

Among the acts passed by the Pennsylvania Legislature and signed by Governor Harrist, was one "for the better protection of passengers upon railroads, and to insure the prompt transportation and delivery of freights," which is similar to an act passed by the Delaware Legislature a few weeks ago. The act prohibits engineers from abandoning trains between stations, and it also forbids different companies of railroads in the State is that the law of D-I-ware makes it a misdemeanor punishable by fine and imprisonment for a railroad employed to live another, by offer of recompense to leave the service of a railroad company, whereas the Pennsylvania Legislature struck this provision from the act before its final passage.

It is stated that the now array bill to be submitted to the House at the extra session of Congress, will provide for a force of only 17,000 men, and an appropriation of a little less than \$37,000,000.

John D. Lee's execution at Mountain Meadows, Utah, on the 21st inst., took place on the spot where, nearly twenty years before, he had been a leading party in the execution of a killing of nearly a hundred men, women and children belonging to a party of emigrants on their way from Missouri and Arkansas to California. It was a wholesale massacre, under circumstances of the most heartless treachery and revolting cruelty. For some reason the travellers had incurred the hostility of the Indians, and of the depredating and hostile allies, who camped at Mountain Meadows the night surrounded by the Indians at the instigation of the Mormon authorities of that region, and their camp was twice attacked, the Indians being beaten off by the emigrants. There were considerable numbers of women and children in the party, and these being in a condition of intense terror, the whole party were invited to enter into negotiations for surrender—invited by the white Mormon leaders—for these cruel men having discovered that the Indians could not capture the camp without the aid of the white Mormons, deliberately planned a proposition for surrender with protection, intending at the same time to slaughter the whole party. The women and children were separated from the men, the solemn promise of protection being given the surrender was made, the arms of the emigrants given up, the women and children were separated from their husbands and fathers and sent on in advance, a line of march was formed, stretching out like a mile in length, the Indians were hiding in ambush along the line, and at an early hour they commenced to enter upon the women and larger children, putting them all to death with their knives, and the treacherous Mormons shot and killed all of the adult males, including several wagon loads of wounded men. The only persons saved from the savage butchery were a few infants who were taken care of by the Indians.

Lee has left a very long confession giving an account of the massacre, in which he states that he tried to prevent it, and lays the guilt upon Brigham Young, Higbee, Dame and other Mormon leaders, who, according to his statement, were guilty of the vilest hypocrisy, as well as the most atrocious treachery and cruelty. The report of Lee's confession is given in the 13th and 14th inst., 132 hostile Cheyennes and 130 Sioux surrendered at the Red Cloud Agency, making in all 359 that have surrendered there since the last report. The Cheyennes had been for some time living on horse-meat. General Miles reports that on the 19th, the Indians, and an entire company of Cheyennes, came into his camp on Tongue river to learn the terms of surrender. After being informed, they went back on the 21st, promising to bring in their people. A despatch from the Red Cloud Agency, received at Sheri-

dan's headquarters yesterday morning, states that the Cheyennes, who had been driven from the country by the conditions of his policy, was about to complete his mission to the hostile Indians.

At a meeting of the Chamber of Commerce of Boston, S. C., yesterday, a committee of eleven men and bankers was appointed to go to Washington to the President the true condition of the country, and the terrible effect of the existing complications on its industrial interests.

The new census of San Francisco indicates a population, 31st mo. 1st, 1877, of 301,029, and 3d 1876, 272,345, showing a gain during the year 675, or over ten per cent.

The Post-office Department receives about 1,000 delinquent applications daily for the position of postman. When replies are sent, they are in the shape of a lar, stating that removals will not be made, excuse, and that at present no vacancies exist.

The rain storm of the 26th inst., was spread wide over the Atlantic States. At the hour of morning when the rain was falling so heavily in Philadelphia there was a down pour everywhere from Carolina to Maine, and back in the interior a Lakes Erie and Ontario, and the weather was thin southwestward nearly to Mobile on the Gulf of Mexico, and northeastward to Nova Scotia. The rain and clear weather east of the Rocky Mountain along a belt following the Mississippi river breaks up into a Lake Michigan.

The coal operators of the Lehigh region, Bethlehem on the 26th, to consult with the officials regarding a reduction of coal tonnage.

The total quantity of cattle shipped to Great Britain from New York during the month of January, 1876, 600,000 pounds.

The M. C. 62.—The following were the numbers on the 26th inst. *Pala* *Polina*—Gold, 1011, 1012, 1868, registered, 111; do. coupons, 11, 1808, coupon and registered, 113; do. 5c 1881, 110; do. 4c 14 cents, 1891, 1063. Coat (Lamb and New Orleans, 114 a 115 cts. Flour, from \$5 to \$10.00 per bid. Beans, 100 lbs. red 51.62, white 51.45 a 51.67; white, 51.05 a 51.62, 75 a 82 cts. Yellow corn, 55 cts. Oats, etc. Choice New York cheese, 15 1/2 a 16 cts; v. 14 1/2 a 15 cts. 2800 head of beef cattle sold at 107 cts. for extra; 51 a 6 cts. fair to good, a 5 cts. for common. Sheep, 5 a 7 cts. Hogs, 7 cts. Corn, No. 2, 31 cts. 31 cts. No. 3, 30 cts. No. 4, 29 cts. Oats, 32 cts. Lard, 91 cts.

WANTED.
A situation by a Friend qualified to teach fish branches and 4 classes.
Apply to
J. SMEDLI
304 Arch St., Philadelphia.

FRIENDS' SELECT SCHOOLS.
A suitably qualified Friend is wanted as Principal of the Boys' Select School, at the opening of the term in the Ninth month. Application may be made to the Secretary, J. S. Edington, 231 South Fifth Street, Philadelphia.
Edward Mark, 127 South Fifth St.
James Smedley, 415 Market St.
George J. Scattergood, 413 Spruce St.

WEST-TOWN BOARDING SCHOOL.
WANTED, A TEACHER to take charge of the "Room" at the above Institution; one qualified to teach in all the branches taught in the DEPARTMENT.
Application may be made to
Rebecca S. Allen, 335 South Fifth St., Philadelphia.
Dorothy Rhoads, Haddonfield, New Jersey
Martha D. Allen, 523 Pine St., Philadelphia.

WEST-TOWN BOARDING SCHOOL.
The SUMMER SESSION opens on *Sunday* day of *Fourth* month. Parents and other intending pupils, will please make early application to BEN W. PASSMORE, SECTY., (address *Street Road* *Chester Co., Pa.*) or to CHARLES J. ALLEN, To 394 Arch St., Philadelphia.

FRIENDS' ASYLUM FOR THE INSANE.
New Franklin (a *Tranquilized Ward*) *Public* *Physician* and Superintendent—JUSTUS H. W. INGRAM, M. D.

Applications for the Admission of Patients made to the Superintendent, or to any of the Boarding.

Random Notes of Travel in Europe.

(Continued from page 28.)

Hawthorneden and Roslin.—Yesterday morn-
J, visited the University in company with
a student in the Science department.
re are about 1500 students in attendance
the lectures, some of whom are from the
Indies. Having a world-wide reputation,
alls are always thronged. During the ab-
e of Prof. Thompson, who had gone out
the Challenger Expedition around the
e, Prof. Harley had been engaged to de-
a course of lectures. His subject was the
parative anatomy of the crania of birds
reptiles, which he illustrated in a masterly
ner, by rapid drawings upon the black-
ed. Formerly, many American youth at-
tended the lectures on medicine and anatomy
his distinguished school, but at present no
merican names appear upon its rolls,—our
nstitutions having become qualified to
art the requisite instruction.

In the afternoon, we visited the Botanic
Gardens, which extend over 27 acres. The
house interested us most; for it is so
cientific, that in some of the dark corners one
can almost imagine oneself in the recesses
of a tropical forest. Here beautiful rare or-
chids contrive to appear very natural, not-
withstanding their surroundings are artificial.
As you bend over their little square boxes,
which are *not* suspended in the air, quite as
carefully as oriole nests, and nod to the curi-
ously twisted spotted saracenia below them,
which are petted and watched and watered,
as if they spring from the soft mossy mould
freely as in their native wilds of New
Zealand. The open gardens, and the high
and dry mounds, where sedum and kindred
plants flourished, and alpine flowers strag-
gled through a more feeble existence, we
found well worthy of a visit. Plants are here
arranged according to their natural orders,
and exceedingly interesting we found it, to
look upon a living text-book of botany, spread
before us. Those allied to the rose were
bunched together in one division, or large-
ly; the grasses in a second, cone-bearing
nuts in a third, &c., and all in excellent con-
dition, offering a fascinating field of observa-
tion to one of botanical tastes.

Hawthorneden and Roslin! the very names
suggest a poem! Eleven miles by rail from
Inburgh and a short walk, slightly descend-

ing to the banks of the Esk, brought us to
the former. The world seemed left behind
us, as we approached this old castellated man-
sion, quaintly and curiously built with high
gables, and walls overhung with ivy, which
seems to have been expressly and tenderly
designed by nature, ever to throw a veil of
beauty over the decay and ruin which Time
leaves in his track. The walls rise from the
very edge of the gray cliff which descends
precipitously to the stream below. I queried
whether any of the poetic tribe, the singing
birds of nature, had ever owned a more se-
cluded or more charming nest, than the poet
Drummond. Universal quiet reigned around,
broken only by the murmur of the rapid Esk.
On one side of the house was a low sunny
wall, covered by a mass of roses, which were
not "born to blush unseen," though the old
housekeeper told us, "It is a very lonely
place—Lady Drummond is away; the young
gentleman is at college, and I miss them
much; would you like a handful of the roses?"
The dew was scarcely dry upon them, but
they were too tempting to remain untouched.

On the south side of the house were the
ruins of an old tower, probably the abode of
the poet's ancestors, three centuries since; and
save that they enjoyed the benefit of daylight,
it seems to have been an abode which cannot
have been much more comfortable than the
caverns we shall shortly visit. Judging from
the interiors of the houses and the furniture
that remains to illustrate the manners and
modes of living in those olden days, the world
comfort had then a very modified significance;
yet probably these very days have been called
by some, "The good old times;" for in every
era men have looked back to some by-gone
period, and named it "the Golden Age," when
"things were much better than they are
now;" when men, though ruler, were more
upright, when honor and honesty so abounded
as to walk crowned kings in the land! This
beautiful dream of the past, I believe to be
wholly Utopian. The surgings of the great
sea of Time are ever bearing us onward to a
higher level: there is a tide which, though
we may be unconscious of it, knows no ebb.
There may be periods when no progress is
apparent, but this is but the reaction of the
wave which prepares for another onset.

Eastward from the old tower is the large
sycamore tree, one of a group called the "Four
Sisters," under the shade of which Drummond
was seated when the celebrated Ben Jonson
arrived, on foot, from London, on a visit to
his brother poet. At first sight of his friend,
Drummond exclaimed, "Welcome! welcome!
royal Ben!" to which Jonson as promptly re-
plied, "Thank ye! thank ye! Hawthorneden!"
Johnson remained here three weeks, and much
of the obloquy against him is said to have had
its origin in the famous and curious notes pre-
served by Drummond, of the conversation
which passed between them. In defence of
the host, it must be said that he did not in-

tend they should be made public. There
could exist no true congeniality between them,
Drummond being refined and elegant, Jonson
coarse, rude and indelicate.

Beneath the mansion are those curious
caves which have excited so much specula-
tion among antiquarians. These are simply
small apartments scooped out of the solid
rock, and connected with each other by pas-
sages of differing lengths. Whether they were
rude dwellings of an aboriginal race, who bur-
rowed in the earth like wild beasts, or were
constructed at a later period when public ca-
lamities rendered ordinary habitations unsafe,
we may conclude that necessity only could
reconcile men to such dreary, dark abodes.
There are many such in Scotland, on the
banks of the Teviot, the Jed and other rivers.
Several of these rooms are said to have be-
longed to king Robert Bruce, who was hid-
den here for some months. One apartment,
whose walls are cut into small divisions re-
sembling pigeon-holes, is called the king's
library. A sword six feet in length and weigh-
ing twelve pounds, is still shown as the veri-
table weapon of Bruce. Some assert that it
belonged to Wallace, and the sceptical travel-
ler will safely doubt the worth of either au-
thority. Another tier of caves lie beneath
these, which had a secret communication with
the valley below, and also by means of two
wells, connected with the outside world. A
kind of seat in the rock, near the house, is
called the "Cypress grove," after Drummond's
moral treatise on the Vanity of Human Life,
which was composed here, and where he may
have written:

"Three happy he who by some shady grove,
Far from the clamorous world doth live his own;
O! how more sweet is bird's harmonious moan,
Or the hoarse sobbing of the wretched dove,
Than those smooth whiffs-ings near a prince's throne
Which good make doubtful, doth evil approve;
Oh how more sweet is zephyr's wholesome breath
And sighs embled, which new-born flowers unfold,
Than that applause with honor dash beneath!
How sweet are streams, to poison drank in gold!
The world is full of horrors, troubles, slights,
Woods' harmless shades, have only true delight."

The vale of Roslin, which connects Haw-
thorneden with the former, is one of the most
beautiful in Scotland, and if the beauty of
nature only could make poets, they would
spring up like mushrooms on the banks of the
Esk. The surrounding country is compara-
tively uninteresting, until we come suddenly
up on the little dell, at the bottom of which
the Esk flows rapidly, now dashing over its
stony bed, now curving among the copse
wood, or throwing itself carelessly over a low
fall. The cliffs, which rise on each side, often
present the appearance of a broken ruin "to-
tering to its fall." The narrow path ascends
and descends, even seems somewhat dan-
gerous at times, and is on the whole charming.

When expectation has reached its height;
when the narrative has arrived at its most
thrilling point; when any promised pleasure

approaches fruition, then prepare for an interruption! Ours advanced slowly in the shape of a thin, weak-eyed little man, who, fixing his light eyes as firmly upon us as they permitted, remarked in a most insinuating voice, that it was a "pretty place!" "Yes, very," was my unspontaneous reply. Not having had much experience in the wily nature of guides, I did not suspect his calling, in fact, the necessity for a guide upon this not very intricate path, had not impressed me, until an experienced traveller at hand whispered, "Don't speak to him—he will be a nuisance—we do not need him." The little man continued, walking backward, his face towards us, "I'm sure y'd like to see the caves of Garton, ma'am, where Ramsay of Dalhousie hid away with his men!" "There're other places down the glen y'd like to see!" and enumerating others, closed with "There, now, ye have the whole list, every one." No response was made, and after following us for some distance our self-imposed guide left us in great disdain.

Ascending from the defile we soon reached the chapel of Roslin, which stands on the north bank of the river. Architecture has here expanded into a full blown flower; intricate, exquisite, perfect. It is a tiny gem, however, nothing but this small portion having been completed, owing to the death of the founder, in 1146, who was one of the "lordly line of high St. Clair," and prince of Orkney. It is said the founder drew some of the most skilful masons in Europe to this work. The vaulted ceiling is divided into five compartments, and supported by sixteen columns; the capitals and architraves are covered by a profusion of ornament, executed in the most elaborate, florid gothic. The Prentice-pillar is distinguished from the others by four wreaths of flowers which ascend the shaft in a spiral manner. Tradition says that the design of this pillar was taken from one in Rome, but the master-workman despairing of executing it correctly, undertook a journey to that city for the express purpose of examining the original. In his absence it was completed by the apprentice, and this so enraged the master, on his return, that he killed the aspiring workman, with a blow of his hammer.

In a vault below the floor, lie many of the Barons of Roslin,

"Each baron for a sable shroud
Sheathed in his iron panoply?"

for they were buried in their armor, and without coffins. About two hundred yards from the chapel are the ruins of Roslin Castle, which stands on a peninsula of high rocks, overhanging the stream. The only means of access to it, is by a bridge thrown over a deep incision in the strata. The origin of this castle is involved in obscurity, but it was a long time, a seat of the family of St. Clair, "whose titles," says Sir Walter Scott, "would have wearied a herald," yet who, perhaps, were "not so wealthy as an English yeoman."

Of all the noble names in this distinguished family, perhaps none is more worthy of remembrance than that of Sir John Sinclair, who represented a branch of the house of Caithness, in the extreme north of Scotland, near John O'Groats house; and whose indomitable industry and devotion to the true interests of his country, led him in so many ways to the advancement of the community at large, as well as that of his own particular province. He travelled over Europe to gather information on economical and commercial

questions, and drew up a Statistical Account of Scotland in 21 volumes, based upon communications from the ministers of various parishes. "No publication," says a critical writer on agriculture, "of equal information and curiosity, has appeared in Great Britain since Domesday Book." His exertions led to the formation of the Board of Agriculture, in 1793, of which he was for thirteen years president. He wrote on "all manner of topics," including treatises on health and longevity; corresponded with General Washington, and his publications during fifty years numbered 357. His life, which was prolonged to his eighty-second year, was one extended blessing to his country. He died at Edinburgh, in 1835, and was interred in the Chapel Royal of Holyrood. His conspicuous tomb we recall, as that of a man far more worthy to be shrouded than were most, or all, of the crowned ones to whom memorial honors have been awarded.

NOTE.—Two typographical errors occur in former papers; one on page 189, where Bromley, should read Burnley; the other on page 229, where Monkchetua, should read Monckchester.

For "The Friend,"

The Gospel a Power,—not merely a record claiming assent.

(Continued from page 201.)

In the foregoing observations, it has been my desire to hold up the Gospel as a Divine power operating on the heart of man, bringing out of the darkness of his fallen nature, awakening, quickening, and renewing him, that so he may be gathered to the one Fold, and one Shepherd, and made the rich partaker of spiritual blessings through Him, our only Advocate with the Father, by the effectual working of His Spirit in and upon the heart. The command to every one is, open the door of thy heart and permit the King of glory to come in, and tarry as a welcome guest. There He all thy longings. Were this obeyed, then would the Spirit of our God become unto Israel wisdom and knowledge; his fields and vineyards would flourish; nor would wasting be known in all her borders. The table of the Lord would be abundantly spread with good things in every soul where this blessed messenger is received and entertained. Our hearts would be His. There would be His abode; where we should sit in spiritual communion, and receive our measure of strength and inward life from His all-bountiful Hand.

Paul in writing to the Ephesians, 2d chap., says: "And you *hath* he quickened, who were dead in trespasses and sins; wherein in time past ye walked according to the course of this world, according to the prince of the power of the air, the spirit that hath no worketh in the children of disobedience; among whom *also* we all had our conversation in times past in the lusts of our flesh, and were by nature the children of wrath, even as others." He is here addressing himself to a Gentile church. What he says in this connexion, looking backward as into his own heart, when in a state of alienation and hardness, (though careful to observe the "letter of the law") is particularly instructive, as showing the emptiness and folly of mere profession, or the exercise of formal observances in the worship of the Almighty, and that *all* are included in a state of separation from God, who are resisting the touches of His love, spirit and power, whereby He would cleanse and quicken every soul.

Paul adds: "But God, who is rich in mercy for his great love wherewith he loved us, when we were dead in sins, hath quicker together with Christ, (by grace ye are saved) and hath raised us up together, and made us together, in heavenly places, in Christ Jesus." What a testimony to the fullness of the Gospel of our Lord; comprehend its application even those who seem to be dead in sin, and wholly forgetful of it, which was the state of the heathen buried in idolatry, and given to every ear, and according to Paul's own declaration, "And yet, is not this the very work which the Gospel was designed to accomplish? even reach the vilest of every class.

"I am not come," said our Saviour, "to the righteous, but sinners to repentance. And when, (about to ascend to His Father) having finished the work which had given him to do, He gives the blessed assurance of His continued presence in these words: "Peace I leave with you; my Peace I unto you; not as the world giveth give I unto you;" He does not only refer to those as Him, but to all who bow in humble submission to His yoke and cross. Upon all this shall rest the peace of God, as they continue steadfast; for in Christ there is neither Jew nor Greek, there is neither bond nor free; all are made one by obedient faith in the Jesus Christ, partaking of His life through the Gospel which is His power; and hence all who so attain, of whatever nation or people, have a part in that blessed offering once made for all.

Nor is it to be presumed mankind had previously been shut out from the Lord's mercies and tendering grace, only as the heathen as now, became alienated from Him through disobedience. The darkness and infidelity in which the heathen world had been groping for ages prior to the dawn of Christianity, and which is the sad and melancholy state of the same class to-day, had so numbed the spiritual faculties, and checked the growth of the good seed in their hearts that the Light of Truth, which has fallen upon mankind in every age, even that very same Word which foretold things to come by the prophets, did scarcely penetrate the veil. The outward dispensation of ordinances under the law, extended to the Jews, where they became a marked people, "peennially" the prophet describes them, through many special providences visibly manifested, has been finished at the death of Christ. As instrumentality in the promotion of godliness and "a schoolmaster to bring to Christ," no will question its authority or adaptation to the time and people; for it was of the Father. "Moreover," says Paul, in writing to the Corinthians, "brethren, I would not that I should be ignorant, how that all our fathers were under the cloud, and all passed through the sea; and were all baptized unto Moses in the cloud and in the sea; and did all eat the same spiritual meat; and did all drink the same spiritual drink; for they drank of the spiritual Rock that followed them; and the rock was Christ."

The gift and operation of faith, by which we have confidence toward God, has never been willingly withheld from any age or people, else His loving kindness would not have been so impartially displayed. In the economy of God's grace and providential care over the human family, we are bound to regard all His

ings as just and righteous. We cannot but be the errors into which men fall to shortness on the part of the Almighty, in this view of the subject, it has always been clear to me, that the whole scheme of punishment as applied to the Israelites, does furnish the evidence they were favored by all others, but that, in the loving kind of God, and in His impartial justice to every soul, they were chosen as His instruments; ministers to carry, as I have hinted, light abroad, by their example, and to attain also before the world in type, the glorious dispensation of Life and Peace through Jesus Christ, which would in the thirty of time succeed it. And there were among them who faithfully upheld the seal of God.

This may appear to be rather a digression from our subject, and yet it is in close sympathy, as showing the universal love of the Father to a fallen race, whereby in His own time, through his only begotten Son the eternal Spirit, He would restore man back into His own image; step by step, one dispensation to another, as man was ordered to receive it, until the promised seed woman came, the Messiah, and the best work for effecting man's redemption, about to be visibly unfolded. Then was proved in that blessed Gospel, whereby a new living way into the holiest was opening the blood of Jesus, and through living in we inherit the promises; the Gentiles come to its light, and kings to the brightness of its rising. Under the law it was sealed down as beneath a weight, but released to the mind of faithful Abraham, and smitten through the ages in prophetic vision, by prophets and holy men; but in Christ had its full consummation; had expired into a glorious hope of reward, "to them that believe."
P. B.

Philadelphia, 21 mo. 26th, 1877.

Gabriel Daniel Fahrenheit.

Fahrenheit, whose name is usually printed thermometers to this day, was a Prussian merchant of Dantzic, a very ancient, narrow, gloomy seaport on the Baltic coast, which, in barbarous ages, the Danish booters set forth to ravage the English shores. Interested from his youth in the study of nature, he made a small discovery when he was nineteen years of age, one effect of which appears on the face of all our common thermometers. The winter of 1709 was remarkably cold, the temperature falling lower than Dantzic than the oldest inhabitant could remember it; and young Fahrenheit observed, by mixing salt and snow he could produce a degree of cold equal to that which prevailed on the coldest day of that coldest year. He concluded that it was the lowest degree of cold known in the world, and the best also that could be produced artificially, was an unfortunate error; for when, at a certain day, he arranged the scale of his improved thermometer, he called that degree of zero, and fixed the boiling point at 212 degrees above it, a scale which is both arbitrary and inconvenient. Zero should have been the freezing point, and then the boiling point might have been indicated either by one hundred or two hundred, which would have been calculation easy. Such a scale the whole world would have finally adopted, and

we should have had one scale in use, instead of four.

While still a young man Fahrenheit became so interested in natural science, that he gave up his business in Dantzic, and went abroad in search of knowledge; for, in those days, if a man wanted knowledge of that kind, he had to go and place himself under the personal instruction of the few men who possessed it. After residing for a while in various parts of Germany, France and England, he settled at Amsterdam, then one of the most renowned capitals of Europe, where he established himself as a maker of philosophical instruments.

But he was content to follow the established patterns. The instrument which we now call a thermometer was an improvement upon a rude contrivance, invented about the year 1600, styled a weather-glass. This was merely a glass bulb and tube, from which the air had been partly expelled, inserted in a vessel of colored liquid. When the air in the bulb was rarified by heat, the liquid rose; but when it was condensed by cold, the liquid fell. This was the beginning of it. The next improvement was to fill the bulb with spirits of wine, expel the air from the tube, and seal it. This was a real thermometer, which was further improved by coloring the spirits of wine, and fastening the instrument to a piece of wood or metal marked with a scale of degrees. This was the point of development which the thermometer had reached; in 1720, when Fahrenheit directed his attention to it in Amsterdam.

Two changes are attributed to him: First, he substituted mercury for spirits of wine; and, secondly, he constructed the scale which still passes by his name. Whether he originated the substitution of mercury, or whether he derived the idea from some of the learned men with whom he associated, is not certainly known. The Royal Society, at the time, evidently regarded him as the originator; for in 1724, two or three years after the introduction of his thermometer into England, he was elected a member of the Society.

The Fahrenheit scale has only been adopted by three countries, Holland, Great Britain and the United States. Various other scales have been introduced, but the thermometer of the future has yet to be made—the freezing point at zero, and the boiling point fixed at the figure best adapted to decimal subdivision and calculation.

Notes of a Southern Visit.

(Continued from page 260.)

The fog having lifted we weighed anchor, and again went forward, and reached the entrance of Pamlico Sound about day-break. Sailing over this seemed almost like ocean navigation, so wide is the expanse of water. The day proved unexpectedly pleasant, and with a light breeze we sped smoothly on our way, watching the shores, islands, and light-houses, and the numerous flocks of wild ducks of several species, which would rise at our approach. The cooking operations were very simple. Corn meal and sea water were mingled in a wooden dish to the proper consistency, and the mixture transferred to an iron pan on our little stove, where it soon assumed the brown tinge which indicated the right degree of baking. When eaten hot we found it tender and good. Thin strips of salt pork were placed with fresh water in a similar pan

and slightly boiled. The water was then poured off and the pork fried. Coffee completed the meal; and this last material we found very grateful after exposure to the cold and damp, even when drunk without milk out of the tin cup, which represented the entire array of cups and saucers of more liberally furnished households. On one occasion a savory stew of salt beef and turnips was substituted for the pork.

It was nearly dark when we entered the mouth of Neuse river, and the wind was so slight that the captain decided he could not reach Newbern that night. Though the motion of the boat was slight, yet it was sufficient to give one of our number a most distressing headache, rendering it very trying to think of spending another night in the cramped quarters of our little cabin. So the captain considered it best to anchor near a sandy beach on the north shore of the river, and sent us on shore in a little canoe to seek for a night's lodging. After some search in the dim light, we met with a path which led to a house, but as we came near, we found it deserted. Returning to the water's edge, we walked down the beach about three quarters of a mile before we discovered any indications of another dwelling. This proved to be inhabited by two women. The mistress at first refused our application for lodging, saying that as they had no man about, they did not accommodate strangers. After some parley, she took pity on our forlorn condition, and invited us in. The house consisted of one room (with a loft above,) and contained two beds. A cheerful wood-fire was burning on the hearth. We soon engaged in conversation, and found our landlady much interested in theological questions, such as the possibility of falling from a state of grace—a subject which had recently occupied the attention of a debating society in the neighborhood. She treated us very kindly, gave us a good bed in the loft, and objected to receiving any compensation for its use, on the ground that it was a Christian duty to entertain strangers. The loft was approached by a dangerous flight of steps on the outside of the house, which had no railing or other protection. But we slept sweetly, and arose in the morning much refreshed. As soon as it was light enough to see our path, we returned to the vessel, and reached Newbern at 12 o'clock, just two days from the time of leaving Washington. We then learned that no mail had come from that city; so that we saved time by our voyage, tedious as it was.

There was some sense at times of discomfort and inconvenience connected with our sea-faring experience, but the remembrance of the Apostle Paul's remark, that he had learned in every state therewith to be content, tended to repress every impatient thought.

At Newbern there was much openness among the colored people, of whom a large number reside there and in the vicinity. We readily made arrangements for holding meetings among them, and also for the distribution of books and tracts. Among those of them visited, was Elijah R. Brown, a member among the Methodists. He had long believed that it would be his duty to preach the gospel, but did not enter on the work of the ministry till freed from slavery. While in health he had saved enough to put up a small house, in which he and his wife lived. As a minister he had a circuit of five congregations to visit,

and sometimes walked twenty-five miles to reach them, wading through deep swamps. These exposures had broken down his health, and for two to three years he had been an invalid. Though he had no rent to pay, he had nothing to live upon, and often sat in the cold because he was unable to buy wood. His last stick was then on the fire. He was a goodly old man, and was very grateful for the little help he received.

Kitty Down, a feeble old woman, was cared for by a consumptive daughter of middle age, who seemed serious and thoughtful. One of her lungs was gone, and she was subject to hemorrhages. She spoke of her daily concern to be ready for her final change. They were very poor, so that they were unable to buy the material for a mustard plaster, which the mother needed. The visit here was an interesting one.

Cesar Connor, a man aged about 35, was a helpless cripple with rheumatism. He had lain on his back for seven years. His lower limbs were permanently drawn up with the disease, both hands twisted out of shape and useless, and his arms partially so. He said he believed the Lord knew what was best for him, and would lay no more upon him, than He would give him strength to endure. He had endeavored patiently to endure his sufferings, which had been very great; but now he was free from pain, and could be lifted out of bed and placed on a chair with pillows, for a change, which was a great relief. He was bright and cheerful, and was cared for by his mother and sister, but could not always get enough food to satisfy his appetite.

The last of these calls was on Job Fletcher, an elderly man, with decayed bone in one of his limbs, which partially crippled him. He is a class-leader among the Methodists, and made a favorable impression on the Friend who visited him. He bottomed chairs with corn husks, when he could get any to do, and did other little jobs, but had a hard struggle to get along. His disease was of many years' standing, and after it came on him, his wife left him. Yet he seemed very cheerful, and was confident that the Lord, who had never deserted him, would still care for him. Before leaving, a covering of silence, and a sweet feeling of the Lord's presence, spread over; under which a few words of encouragement were expressed.

At the meeting among the colored Baptists, held here on First-day morning, 12th mo. 31st, the scripture passage was recited, "Except the Lord build the house, they labor in vain who build it; except the Lord keep the city, the watchman waketh in vain." The church of Christ, it was said, is composed of living stones—of those who have been changed, purified and made new creatures—not of mere professors; and the Lord alone is the builder thereof. Our own efforts will not avail without the help of the Lord's Holy Spirit. The attention of the people was turned to the Word nigh in the heart, the indwelling Spirit of Christ. The minister present recommended it to the people as a Divine message to them.

The meeting in the afternoon was at the Methodist house. The pastor of the congregation is Wm. H. Bishop, a Methodist, whom we met at the Conference, in Wilmington, a year ago. He seemed to know something of the customs of Friends, for without any request on our part the meeting settled into a profound silence, which was solemn and grate-

ful. The comparison of our Saviour was received, in which he likens him who heard His sayings and did them, to the wise man who digged deep and builded his house on the rock; and him who did them not, to the foolish man, who built on the sand. The people were reminded of the necessity of submitting to the cross of Christ, of being born again, and of not remaining mere professors of religion. When meeting closed we met with many wishes for "luck," and other expressions of good-will.

In going from Newbern to Goldsboro, on the first day of the year, 1877, we were in company with a crowd of politicians going to Raleigh to witness the inauguration of the new Governor of North Carolina. Many of them carried black bottles or flasks, which were frequently used; and the accompaniments of loud talking, swearing, and smoking, rendered the ride peculiarly unpleasant.

In the rail road office at Goldsboro, we met with a pleasant, and kindly-disposed man, who said he had been brought up among Friends. "Good Quakers," he thought about the best sort of people to be found anywhere; but "Hickory Quakers" (which he explained to mean unfaithful ones) about the meanest. He said the younger Friends in that neighborhood had laid aside the Friendly garb; and that he told them there would be no Quakers left in the next generation. W.

(To be continued.)

For "The Friend"

Thomas Story.

(Continued from page 163.)

"I now proceed with the account of my further progress. In writing the last paragraph of a piece, the people called Quakers were suddenly, and with some surprise, brought to mind; and so strongly impressed on my remembrance that thenceforward I had a secret inclination to enquire further concerning them, their ways and principles. It was some time in the Fifth month, in the year 1691, when an opportunity was presented. The occasion of it was some concerns that I had in the west parts of Cumberland, when lodging at an inn kept by one of that profession, on a Seventh-day night; and inquiring of him concerning some points of their religion, I perceived no material difference between his sentiments and mine, in the particulars then asked after; and he also perceived I was nearer them than he or perhaps any other had thought; for I had formerly opposed the same man in some things; which gave him occasion to inform me of their meeting to be held next day, at a country village called Broughton.

As I had been desirous to be rightly informed concerning that people, and to see them as in truth they were, I was pleased with the opportunity; and the next morning the Friend and I set forward toward the meeting. He being zealous to have me further informed and convinced of the truth of their way, spoke of many things as we rode along, and with a good intent; but my mind being composed, and its attention directed towards God, who knew I wanted only to see the truth, and not to be deceived, I could not take any distinct notice of what the Friend said; which he perceiving, after some time desisted, and said no more. And then we rode some miles together in profound silence, in which my mind enjoyed a gentle rest and consolation from the divine and holy presence.

When we came to the meeting, being a late it was full gathered; and I went into the throng of the people on the forms at the still among them in that inward calm and mental retirement; and although our ministers, a stranger, began to read to some points held by them, and declared against some things held by others admitted by them, particularly predestination asserted by the Presbyterians; yet I took much notice of it. I did not doubt but all other sects, they might have something to say, both for their own and against the opinions of others; yet my concern was rather to whether they were a people gathered in sense of the enjoyment of the presence of in their meetings; or, in other words, who they worshipped the true and living God, the life and nature of Christ, the Son of the true and only Saviour; and the Lord answered my desire according to the intention of my heart. Not long after I had sat among them, that heavenly and watery overshadowing my mind, broke into a steady, abounding shower of celestial rain, and the greatest part of the meeting was broken together, dissolved and comforted in the presence of the true, heavenly Lord; who was divers times repeated before the meeting ended. In the same way, by the same power, I had been often favored before alone, and when no eye but that of heaven held, or any knew, but the Lord himself, in infinite mercy had been pleased to be so great a favor. And as many small spouts and streams, descending into a proper place and forming a river, becomes more deep, weighty, even so this meeting with a gathered of the living God, into a sense of enjoyment of His divine and living presence through Jesus Christ, the Son of God, Saviour of the world, I felt an increase of joy of salvation of God; and the more, by much I now perceived I had been mistaken like mistake as the prophet of God of old now was otherwise informed by a surety and token, by the witness of the divine truth, in which no living soul can err, or be deceived, being self-evident and undeniable all those who truly know him. Our joy mutual and full, though in many tears, cases of the deepest and most unfeigned love for the Friends there being generally sent I was affected and tendered with their influence of the divine truth they had and made profession of, did conclude I had been at that time, and not before, convinced and come to the knowledge of the way truth among them; and their joy was as heaven at the return of a penitent; and as the joy of salvation from God in view of the work of the Lord so far carried on in earth; when I had thought not long before there had scarcely been any true and living faith or knowledge of God in the world.

The meeting being ended, the peace of which passeth all the understanding of mortals, and is inexpressible by any language, but itself alone, remained as a holy covering my mind, in a silence out of the reach of all words; and where no idea but the will itself can be conceived. But being invited together with the ministering Friend, to the house of the ancient Widow Hall, I went along with them; but the sweet silence commanded in me still remaining, I had not to say to any of them, till He was pleased to draw the curtain and veil His presence; and

I found my mind pure, and in a well-ordered liberty of innocent conversation with it. Having staid there a short time, I was led to dinner at the house of Richardson, an ancient and honorable Friend in exile, where I was made kindly welcome, and where I had great freedom in conversation.

Being now satisfied beyond my expectations, referring the people of God in whom the work had begun, and, in a good measure carried on, a great work and reformation in the land, I determined to lay aside every business, and anything which might hinder or veil in the enjoyment of the presence of the Lord, either among his people or alone, or obstruct any service whereunto I was or might be called by him; especially things of an engaging or confining nature, not regarding what the world might say, or what name they might impose upon me.

The business being over which had brought me to that part of the country, I returned to Bristol, where I had been but about two weeks till the Friend of the inn before mentioned, coming to town, informed me of their coming for business and affairs of their Society, and invited me to it, being about four days distant. At first I was a little surprised, lest he should invite me to such a meeting, as hardly thought him prudent in it; for I had not yet made any outward profession in them, or declared myself of their communion. But though I found some aversion rather than inclination towards it, yet I yielded to go, that I might see in what spirit and manner they managed the discipline and business of their Society in matters of religion, and I might view them a little more clearly under all circumstances, before I should appear for their way in all things—some subjects yet remaining as to some points—and whether they thoroughly agreed with the way I had conceived in my mind of the state of the church of Christ, viz: that they believed in God and Christ; were settled in the practice of Christian morality; that they were disposed to suffer any persecution or opposition to true religion, when thereunto called, in the course of divine providence; that the characteristic mark of the disciples of Christ should be fairly upon them, 'to love one another,' not in word and tongue only, but in deed and truth; and that they should be proved by that love, in uniformity and unity among themselves; and also being loving and kind to all men, as occasion might offer; and receive the same by doing them good and doing them no harm. These qualifications I had deemed sufficient to demonstrate such to be the children of God, brought forth in his image, righteousness, and true holiness in his own man.

The meeting being set, they had first a season of silence, waiting upon God, as I did believe and practice, for the renewing and lengthening of their minds; and after that they proceeded upon the business of the day. It happened at that time that a matter of great moment among them was debated, and it was without some warmth on both sides; but the zeal of both did not arise from the same source. It was concerning the manner and sense of their discipline, which a sect among them had opposed, from the time of the first proposal of any discipline in the Society. The debates arising pretty high, and they observed me to be there, and most of them, I doubt

not, having heard I seemed to favor their way; and being cautious lest I should take offence at their debates, not knowing the state of the case, or, perhaps, not qualified to judge in matters so foreign to me, some of them prudently put the Friend who had introduced me, upon an inoffensive way to procure my absence; and accordingly he called me into an outer room, offering to discourse on some foreign subject. But, as my mind, in time of silence in the meeting, had been comforted in the life of truth, I remained under the sense of it; having taken little other notice of what had passed in point of argument, than in what spirit they managed and contended on each side. Though I observed the Friend's good intent in calling me out, I could take no cognizance of what he said; for a deep thought now entered my mind, whether these could be the people of God, since they seemed to be divided among themselves and treat one another with an acrimony of language which I thought could not arise from love, neither altogether suited to the humility of Jesus, the true Christ. The Friend observing my silence, and that I was under a deep inward concern, became likewise silent, and a trouble also seized him, but of another kind; for I was concerned to know the truth, and on what side, if either, it might lie; and he was afraid I had taken, or might take offence, and depart from the beginning I had made among them. Thus we remained silent for some time; during which I plainly observed a struggle between two distinct powers working in myself, which exhibited two different conclusions in my mind concerning the matter then in hand, and the spirits and persons concerned therein, viz: the first was Truth, establishing himself in his own nature, a law-giver and ruler in every member of his church and body, as alone needful unto them who were truly so.

But as He who knoweth all things, did foresee that many would, in time, come into that profession, as of old, without any knowledge of divine truth, or the work of it in themselves, but, as thieves and robbers, climbing up some other way, by education, tradition, imitation, or sinister interests and worldly views; who, not being under the rule and law of grace in the second birth, would act and say of themselves, contrary to the way of truth and the church of the living God; and therefore, in his wisdom and power working in the minds of the just, he had early established, and was yet more firmly establishing, a due order among his people, for preserving the right and passing judgment and condemnation on the wrong and evil-doers, that such as should profess the truth of God, and yet walk contrary to the same, bringing forth fruits of another kind, might be bound and confined by outward moral rules adapted to human reason and understanding.

Secondly, that the spirit of this world had been and still was working in the other sort to oppose all order and discipline, and to live loose as they list, without any order or account to the Society, though professing the same truth with them; wanting to be judged only by their own light, or what they called so, and accountable only to the Spirit in themselves; though several among that party were only against some branches of the discipline already established by the body of the Society, and not against the whole. During this time of silence I clearly beheld the contrary natures

and ends of these differing spirits, the one truth, the other error; the one light, the other darkness; the one for moral virtue and a pure holy mind, and the other for a loose unbounded liberty; and yet, that these last, as creatures, did not see the sophistry of the evil one, to whom themselves were instruments, nor the snare; but intended well, in their own view and way of conceiving things.

As these distinctions were gradually made clear to my understanding at that time, the load and trouble I was under abated; and at last my mind settled down again to its own centre in peace, and became serene, as before; which being fully sensible of, I was cheerful and kind to the Friend, we may now return into the house, for the danger is entirely over. I knew thy meaning before we came out of the other room; and commend your care and caution. With this he was greatly pleased; and so were the rest when they came to know it."

For "The Friend"

Training Children for War.

In the year 1845, an endeavor was made by the military authorities of England, to secure recruits for the army from the class of pauper orphans attached to the various work-houses and schools. This invading process aroused great indignation, and, by many of the newspapers of the period, it was characterized by such strong terms as "kidnapping," "tyranny," and "trafficking in human blood." The effort of the government at that time does not appear to have been successful.

At present, however, renewed activity is manifested in the same direction, and, be it said, with more effective results. For, the poor orphans, instead of being distributed over the country in small numbers, as formerly, are now conveniently massed in the large District and Union schools, where they may be readily inspected by officers from the barracks, and the most likely subjects selected for the military service. A committee, presided over by the Inspector-General of Recruits, was recently appointed by the War Department, charged with the duty of reporting upon "the best system to be adopted for training lads from pauper schools, as soldiers, with the view of their being drafted into the army." How effectively this work has been begun appears from the following statement, extracted from a late number of an English periodical—the *Herald of Peace*.

"The spectacle may now be frequently witnessed in these large pauper schools, of scores, or hundreds of orphans, some of them decorated with stripes, being drilled with the promptitude and precision of veteran soldiers, marching and counter-marching, forming square (with the military officers in the centre,) preparing to receive cavalry, and presenting arms, (wooden imitations of bayonets and guns.)"

It is also stated that, in some of the schools, the drill has been carried even into the "devotional exercises" of the children, so that they not only rise from their meals at the bugle's sound, but also at the blast of the same, assume the outward attitude of prayer, their hands uplifted and eyes closed. Then, another note being sounded, the prayer or "grace" is chanted, and with a final blast, they are dismissed to other duties.

Although pauper children, whose parents are living, frequently become temporary in

mates of these large Union schools, they hardly remain long enough to make much progress in the military drill. And besides, the parents of these—the English laboring class—are by no means uniformed of the degradation and misery that war and its necessary product—a burdensome national debt—has caused them. Thus, Joseph Arch—the same who, on behalf of a large body of his fellow-workers, who contemplated emigration, visited this country several years ago—enters, in the *English Laborer*, a London newspaper, the following strong protest against countenancing war:

"While victory means what I have described—aye, and more than tongue can tell, or pen can picture, are the horrid miseries of war—not only do ministers pray for victory, but when perchance that victory is won, how loud will be their voice of thanksgiving! What! thank God that millions of money which ought to have been spent in building better homes for the honest workmen, have been worse than wasted in wholesale murder! Will God accept such blasphemy? Brother laborers, let us countenance such hypocrisy no longer, but rather let us *set our faces against the war game.*"

The laboring poor, therefore, have warning of the peril, and can attend to their offspring, but the fatherless and motherless of the same class, are, in a manner, the children of the state. The State Guardians of the schools and workhouses become officially their protectors, yet by these unnatural parents are they handed over to the officers of the barracks, thence to be exposed to moral evils, which as they are known to *exist*, and to be always active, are hence more to be dreaded than the perils of the battle-field, which may never be actually met.

But, are not the orphan poor of our own country exposed to a like jeopardy? For instance, it is stated in the Girard College Report for last year, that the orphans' battalion, numbering 250 (or about one-half the whole number of inmates,) is regularly drilled by a captain, with the accompaniment of a martial band; and that on Independence Day they paraded the streets, being reviewed by the Governor, and eliciting his praise for their soldier-like bearing. Doubtless the same sort of discipline prevails in many similar institutions in the land—certainly in the Homes for soldiers' orphans. Hence, notwithstanding the continuous reduction in size, of the regular army of the Republic, there would appear to be cause for concern, lest the spirit of militarism must increase, seeing that the young are allowed to be thus early and persistently brought within its baneful influence.

L.

For "The Friend."

Report of the Proceedings of the Tract Association of Friends, for the year 1877.

During the year ending Second month 28th, 1877, there have been printed 499,850 Tracts; 6,100 Almanacs for 1877; 163 Sarah Grubb, 600 Biographical Sketches; 600 Musings and Memorials; 5,020 Juvenile Books; 10,000 Sermons on the Mount; 10,000 Proverbs of Solomon; 200 volumes of Tracts have been bound, three volumes in a set.

There has been taken from the Depository during the same period, 410,659 Tracts; 4,281 Almanacs; 5,260 Sermons on the Mount; 5,119 Proverbs of Solomon; 6 Spiritual Pro-

gress of M. R.; 18 Divine Protection; 31 Sarah Grubb; 32 Mary Dudley; 69 Biographical Sketches; 6,353 Juvenile Books; 27 Select Readers; 116 Musings and Memorials; 10 Select Extracts; 14 Ann Reeve, and 10 Rachel C. Bartram.

The stock of Tracts on hand 31 mo. 1st, 1876, was 219,214. The number printed since that time is 499,850. From the sum of these deducting those distributed during the same time, 410,659, we have a balance on hand 3d mo., 1877, of 308,495.

A very large proportion of Tracts taken from our Depository during the past year, were gratuitously distributed through a large extent of country, as will appear from the following detail, viz:

In Philadelphia	281,483
In other parts of Pennsylvania,	11,033
" Massachusetts,	2,788
" Rhode Island,	3,039
" New York,	4,296
" New Jersey,	32,464
" Delaware,	707
" Maryland,	710
" Virginia,	5,119
" North Carolina,	15,442
" South Carolina,	5,390
" Georgia,	14,011
" Florida,	450
" Tennessee,	377
" Ohio,	1,150
" Michigan,	300
" Indiana,	159
" Illinois,	688
" Missouri,	2,880
" Iowa,	5,116
" Wisconsin,	352
" Minnesota,	519
" California,	290
" Kansas,	2,899
" England,	86
" South America,	1,475
" Texas,	136
" Barbadoes,	129
" Africa,	130
" Places not particularly designated,	14,338
There have been sold for cash,	2,712

Making the total number taken from the Depository, 410,659

At the request of the Tract Distributing Association, of this city, that has been similarly supplied on several previous occasions, we have printed and placed in their hands, one hundred thousand copies of our Tract "On Profane Swearing," No. 18, and 102,000 of Tract No. 117, "What is it?" making two hundred thousand in all. They were both translated into German, and fifteen per cent. were printed in that language. It is a satisfaction that they made selection of the last named Tract, illustrating as it does the fundamental doctrine of the immediate presence and guidance of the Holy Spirit. We have also added to our series, a four page Tract entitled, "Tender Counsel and Advice," by William Penn, and numbered 128. It contains some observations respecting evil thoughts, a subject not very often, perhaps, brought prominently into view, that are well adapted to the serious consideration and help of such as are tempted in this way, and who are under an awakening visitation of Divine Grace.

The Moral Almanac for the present year was issued as usual, and material for that of 1878 has been selected.

Through the medium of the two Friends

mentioned in our last Report, who have been engaged the past winter in religious labors among the people of color in the seaboard Southern States, a door has been opened through which our Tracts have passed in considerable numbers. The same avidity hitherto shown by this neglected people, reading matter of this kind, was again manifested. It is our desire freely to respond to this feeling, as far as our funds will justify. And here it may be proper to call attention to the large outlay which the repeated calls our tracts in such quantities require. The greater part of this, our friends are probably aware are under the necessity of relying upon their liberality to supply.

We believe that the time calls loudly those who claim to be Christians, to be careful that example and precept go hand in hand together; and to show by consistency of deportment the reality of their profession. It is rounded as we are by so much that is either openly evil, or more covertly concealed unbecomingly which will not bear the test of light which "makes manifest," a pure and correct standard is greatly needed to be held before the people. And like the well-spoken in due season, which is good, a word or tract which clearly sets forth that which is the truth, when seasonably presented, is sometimes been of especial service. The substance of the issues of our Association, which have been collected and compiled with more care, is of the following character: Narratives of men, women and children, who at the measure of their knowledge, were faithful to that which convicted and led them out of sin, into holiness of life; essays on moral and religious subjects, with incidents calculated to awaken to thoughtfulness respect individual duties and responsibilities; also, some of them, a variety of information designed to increase the stock of useful knowledge. The circulation of such publications as these, costing so little, and being within the reach of all, offers an opportunity of usefulness, even to those whose pecuniary means are small, as well as those whose time is necessarily much employed in business. We commend the subject to our friends, reminding them that all our tracts and some of our smaller books are kept constantly on hand at the Depository, No. 34 Arch street, for gratuitous distribution.

On behalf of the Board of Managers,
EPHRAIM SMITH, Clerk
Philadelphia, Third mo. 7th, 1877.

OFFICERS OF THE ASSOCIATION.

The following Friends were appointed fill the respective offices of the Association for the ensuing year:

Clerk.—Edward Maris, M. D.
Treasurer.—Elton B. Gifford.
Managers.—John C. Allen, Edward Rich, Horatio C. Wood, William Kinsey, Sam Allen, Mark Balderston, George J. Scattgood, John S. Stokes, Richard J. Allen, John W. Baddeley, Ephraim Smith, Joseph W. L. Pincoett, S. Mason M. Collin, Thomas Elkinton, William Evans.

The Annual Meeting is held in the Arch Street Meeting House, on the last Fourth-day in the Third month, at 8 o'clock in the evening.

He who speaks an uncharitable word, matter how wittily, will, if he have a spu-

man nature in him, regret that he did so on the occasion is passed.

THE FRIEND.

FOURTH MONTH 7, 1877.

Although no official information of the setting of Iowa, Western, Canada, or Kan-Yearly Meetings has been received by Philadelphia Yearly Meeting, and therefore it not officially recognized them as co-ordinate bodies, yet notices of their proceedings have been given in our journal as their printed notes have come to hand, and having just received a copy of the printed minutes of Kansas Yearly Meeting, held in the 10th month last, present below some information of its proceedings and condition, as gathered therefrom.

The Yearly Meeting is composed of five quarterly Meetings; a new one, called Wald-Creek, being instituted at the last Yearly Meeting. There are 36 established meetings, with a total membership of 3,350. 1,000 persons were received by their own request during the year, and 37 children by request of parents. There are 44 recorded ministers within its limits, and 15 meetings which have no recorded minister belonging to them. Members are reported as using intoxicating liquor as a beverage. 2 new meetings were within the year.

The following are the summary answers to queries:

1st Answer.—All our meetings for worship discipline have been attended except in a few instances, for which reasons have been recorded. Some remissness is reported in two quarters. Unbecoming behavior is not entirely avoided in any of the Quarters. Some exceptions as to punctuality in attendance in two Quarters. Care reported in two Quarters.

Christian love generally exists amongst us, but there are exceptions in all the Quarters to its entire prevalence. Talebearing and faction are discouraged, but not altogether avoided in any of the Quarters. Some care is taken in one Quarter. Endeavors are used to end differences, but not so seasonably would be best, in one Quarter.

Friends exercise a care to educate their children, and those under their care by precept and example, in the principles of the Christian religion and in plainness of speech, behavior and apparel, to guard them against dissipated reading, corrupt conversation, and encourage them in the diligent reading of the Holy Scriptures; but more care in these respects is considered desirable in all the Quarters.

Friends are clear of importing, vending, distilling, and the unnecessary use of indicating liquors, except a few cases of unnecessary use in two of the Quarters. Some exceptions in all the Quarters as to attending cases of division—some care taken in two of the Quarters. Moderation and temperance steadily observed.

Care is taken to aid those in need, and attend to the education and assistance of their children.

Friends maintain the testimonies quoted after, except a few cases of bearing arms, and a few of taking oaths.

7. Friends are careful as queried after, though some exceptions are noted in all the Quarters, especially as to fulfilling engagements and reasonable payment of debts. Some care has been taken in three of the Quarters.

8. Care is taken to deal with offenders as queried after, except that the dealing is not always reasonable.

The proposition of Western Yearly Meeting for a conference, received the previous year, and laid over to this for consideration, "being fully considered, the Meeting comes to the conclusion that way does not open for it to take any action on this subject."

A minute of counsel adopted by this Yearly Meeting, for ministers and elders, was read and approved, and directed to be inserted in the minutes, for the use of the meetings and members.

Reports were read from committees of the Yearly Meeting, on the subjects of "Indian Affairs," "Peace," "Books, Tracts, and Temperance," "General Meetings," and "Bible Association."

The committee on the Yearly Meeting school, report that they have given attention to the subject, by correspondence and otherwise, but no way has opened for progress. The subject is continued under the care of the same committee, who are requested to solicit means for opening a Yearly Meeting school upon a self-sustaining basis, at such point as may seem to them best.

"The clerk reports, that as directed last year, he acknowledged to Philadelphia Yearly Meeting, on behalf of this Meeting, our appreciation of the brotherly kindness manifested by Friends of that Meeting to us in the destitution with which we were visited in the preceding year."

The concluding minute is as follows:—"We thankfully acknowledge our Heavenly Father's blessing upon our several sittings, by which we have been enabled to dispose of the various matters before us in harmony and to good satisfaction. His gracious presence has solemnized our religious assemblies, and ministered to the necessities of many souls. We now solemnly conclude, to meet again at the usual time and place next year, if the Lord will."

SUMMARY OF EVENTS.

FOREIGN.—Constantinople, Third mo. 25th.—The Turkish Chamber of Deputies, in their session yesterday, discussed an address in reply to the speech from the throne. The speakers, without exception, resented all foreign intervention in the domestic affairs of Turkey. The address, referring to Servia, says: "We hope the Servians will prove grateful for the peace accorded them."

The Nord, the Russian organ, declares that the proposition for the simultaneous disarmament of Russia and Turkey is quite as inadmissible as that for the preliminary disarmament of Russia, unless positive pledges are given for the Porte's submission to the decisions of Europe.

Advices from the Transvaal Republic say that the idea of union with the British colonies is regarded more favorably. Other accounts even say that annexation is inevitable. President Burgers is co-operating with Sir T. Shepstone.

Mail advices from Ceylon say the aspect of affairs in regard to the threatened scarcity is becoming daily more grave. By the end of the 3rd mo. 25,000 laborers will be paid off from the coffee estates, and in a month or two there will be some 60,000 to provide for. Meantime gangs of starving men, women and children are coming over from India.

The London Times of the 16th ult. announces a dividend of 5 per cent, for the six months ending the 25th

of 2nd mo., by the Bank of England. The four preceding dividends were 13 per cent, for the six months, 5 per cent, not having been paid since 1874.

John Bright, the English statesman, has written a letter to General Eaton, Commissioner of Education, acknowledging the receipt of a copy of the Commissioner's report on the public libraries of the United States. Bright expresses his appreciation of the volume, which, he says, "strikingly indicates the wide-spread education of the American people" and he adds: "There is great and universal satisfaction here at the settlement of your Presidential difficulty, and the good sense of your people is admitted and admired on this side of the Atlantic."

The city statistics for Liverpool in 1876, show 20,426 births and 13,447 deaths. The deaths of infants under five years were 6827, or 47 per cent, of the total mortality, the principal cause being an epidemic of measles and whooping-cough, which prevailed up to the 7th mo. Small-pox caused 288 deaths during the year.

The Japanese Minister has received a telegram from the capital of Japan announcing the sudden suppression of the rebellion in Kinshu by the Imperial forces.

UNITED STATES.—The Louisiana Commission has been finally announced, and the members were expected to leave for New Orleans on the 31st inst. They have received formal instructions. The commission consists of ex-Governor Brown, of Tennessee; Judge C. B. Lawrence, of Illinois; General J. R. Hawley, of Connecticut; General John M. Harlan, of Kentucky, and Wayne McVeigh, of Pennsylvania. Of the five men to whom this difficult and important service has been assigned only one, ex-Governor Brown, is called a Democrat. The others are classed as Republicans, but are supposed to be liberal high-minded men, in accord with the policy of conciliation and justice which the new administration is desirous of establishing.

Governors Wade Hampton and Chamberlain, the representatives of the two rival governments in South Carolina, have come to Washington at President Hayes' request, and have had a free and friendly conference with both of them, endeavoring to ascertain their respective views on the anomalous condition of affairs in that unhappy State. In the interview the President did not commit himself to any expression of opinion, but informed them that no action whatever would be taken without the concurrence and approval of Congress, and after the most careful reflection and consideration.

It was decided at the Cabinet meeting on the 2d inst. that the troops should be withdrawn from the State House in Columbia, and the Secretary of War was directed to prepare an order for their removal.

The news that the troops are to be removed from the State House in Columbia, and the withdrawal with demonstrations of unbounded joy in that city, and elsewhere throughout South Carolina.

It is a singular fact that the old State of New Hampshire persists in withholding the full privileges of citizenship from Jews and Roman Catholics. This remnant of old time bigotry is constantly condemned by nearly half the people, and at the late election a strong effort was made to adopt a constitutional amendment which would make the institutions of New Hampshire harmonize with those of the rest of the Union, but it failed for want of a few more votes.

The Treasury Department has reason to believe that the whole amount of the four per cent. interest loan will be taken before the regular meeting of Congress in the Twelfth month.

The public debt statement for the 3rd mo. shows a decrease of \$14,107,016. The largeness of the reduction arises from the cancellation and destruction of \$9,453,800 of the balance of the 5 per cent. bonds of 1861, held in trust for the payment of the awards made by the Commissioners of the Alabama Claims.

The internal revenue receipts for the 3rd mo. were \$9,250,297, nearly \$1,000,000 in excess of the receipts for the same month of 1876.

During the three months ending 3d mo. 31st, there were 132 deaths from cholera, 233 from typhoid fever, and other violations of the Post-office law. Not more than one letter was lost out of every four thousand registered letters deposited in the mails last year.

A large number of supernumerary employees in the Bureau of Printing and Engraving at Washington, and some superfluous clerks in the navy department, have been dismissed as a measure of economy.

The fast freight train of twenty cars of silk and tea, from San Francisco, arrived in New York on the 30th ult., having crossed the continent in ten days.

The interments in Philadelphia for the week ending 3d mo. 31st, numbered 321, which was 67 less than for the corresponding week in 1876.

A telegram from New Orleans says the Times of that

city will today publish a statement which it says "comes from high Republican sources," that the eight Electoral votes of Louisiana "properly belong to Governor Tilden," and that "the testimony will be furnished him in the prosecution of his quo warranto, suit."

The New York Express says the papers for the quo warranto suit to test the title of Hayes to the Presidency have all been prepared, and are in the hands of a lawyer of Washington. The suit will be instituted in the Supreme Court of the District of Columbia.

The Market, &c.—The following were the quotations on the 3rd inst. Philadelphia.—Gold, 104½. U. S. sixes, 138½, 117½; do. 5½, 184, 110½; do. 4½, 42½, 189, 106½; Cotton, 11½ to 12 cts. Flour, \$5.75 to \$10.00. Pennsylvania red wheat, \$1.64 to \$1.66; amber, \$1.67 to \$1.70; white, \$1.72 to \$1.75. Rye, 74 to 82 cts. Corn, 54 to 54½ cts. Oats, 41 to 46 cts. Cheese, 14 to 16 cts. Beef cattle, sales \$8.00 head at 6½ to 6½ cts. for extra; 5½ a 6 cts. for fair to good; and 4 to 5 cts. for common. Sheep, 10.00 per head, at 3 to 7 cts. Hogs, 3.200 head, at from 7½ to 8½ cts. New York.—Superfine flour, \$5.90 to \$6.15; State, extra and fancy, 6.15 to \$6.55. Finest western brands, \$7.75 to \$10.75. Winter wheat, dull, no quotations; No. 2 spring, \$1.47 to \$1.49; ungraded, \$1.30 to \$1.40. Barley, 46 to 53 cts. Corn, 3½ to 57 cts. Oats, 39 to 58 cts.

For "The Friend."

Notes of a Southern Visit.

(Continued from page 263.)

Wilmington, N. C., while calling on a Baptist minister, at whose place of worship we had a meeting about a year ago, with some curious superstitions prevailing among these people. His wife handed me cake and nuts for refreshment, and only remarked, that if we had come on Monday (the first of the year) we might have received anything. This led to the notion that some of their people think bad omen to give anything away on New Year's day, as it implies that they will go away all the year. They think also that if they eat delicate and costly food on New Year's day, they will be poor as the year advances. Hence they buy the coarsest and cheapest materials for new Year's meals; which custom has led to cow-peas, and hog's head. So usual is the practice, that the stores are stripped of these articles as the day approaches.

Mears' Bluff, a few miles from Wilmington, had an opportunity of examining one of the large rice plantations which border the Fear River. The ground is low, and soiled with banks and flood-gates, that it is covered with water from the river. The crop requires it. The rice-plant nearly resembles oats than any other cultivated in the North. Most of the rice used in its production in the neighborhood of Wilmington, is farmed by the colored men who rent patches of it from the owners' soil. About fifty bushels of grain in the soil is considered an average crop.

We found a large and well-conducted guano yard located here. The basis of the manufactured article is a phosphate rock, which is brought from Navassa, a small island in the Indies. This is pulverized, treated with uric acid, and mixed with potash salts from Germany, and dried blood and other matters. The proportion of the ingredients, and the price of the resulting compound, varies with the purpose for which it is intended. Tobacco-growing is the richest and most expensive production; while the cotton planters buy a good article, because their crop is much less resting to the soil. The company will ship their guano to the planters on condi-

tion of receiving 300 lbs. of the cotton raised by its help for every ton of the manure. This method of selling guano we found to be common in the South.

The colored people in the neighborhood spoke in high terms of the superintendent of the factory, as a "Christian gentleman," who did not interfere with their politics, or attempt to control their votes.

From Mears' Bluff we went into the central part of South Carolina, and soon found we were in a warmer political atmosphere. We met with several of the colored members of the State Legislature, with whom we had free conversation. Two of these confirmed the reports we had heard, of attempts on the part of the Democrats to obtain by bribery a quorum for that portion of the House of Representatives which adhered to their side. They said they had been offered \$4000 each, to induce them to make the change.

The recent political contest in South Carolina was one of unusual bitterness. A widespread belief prevailed, that the State government had been badly managed, and that it was desirable on financial grounds, to put its control into other hands. In endeavoring to effect this, violence and intimidation were freely resorted to in some places; and in others, the support of a party was made the condition of obtaining employment, or of being received as tenants on the lands that were rented. In Darlington county we found much unsettlement and distress from a combination formed by the owners of a large part of the plantations to rent land to none of the negroes who would not sign a pledge to support their candidate for governor. We were there about the beginning of the year, when contracts are usually made; and many of the small farmers were greatly at a loss to know where to go or what to do. In listening to their troubles, one was ready to exclaim,—"who shall pour oil on the troubled waters." Yet it was a stay to the mind to reflect, that there is an over-ruling Providence, who is able to make the wrath of man to praise Him, and can restrain the violent passions of men.

We had meetings at Darlington, Sumter and Camden, which were satisfactory opportunities. At one of these, held at Sumter, when the minister in charge intimated, that it would be a suitable time to address the congregation, he was told that an interval of silence would be acceptable. He mentioned it to the congregation as our wish. A time of deep silence followed, which was referred to in the communication which followed, as being unusual in their meetings; and that text was brought to view, which says, "Keep silence before me, O islands, and let the people renew their strength." The more fully we came to experience the work of Divine Grace, the more we would value the communion of the soul with its God; and that we would seek to experience it oftener than the returning day. The desire was expressed

that all might know the transforming power of Grace to perform a thorough work in them, so that they might become new creatures. There were some present whom the Lord (it was believed) was visiting with His Holy Spirit, and seeking for an entrance into their hearts. These were earnestly exhorted to be obedient.

In going from Sumter to Camden, it is needless to wait several hours on the banks of the swamps (here four miles wide) which border the Wateree river, at the crossing of the two railroads, till the Camden train comes along. It is a lonely spot, with no carriage-road nearer than two miles, and no house in sight, but a small one by the side of the railroad, occupied by the flagman. The tediousness of the delay was greatly relieved by a walk in the woods, where much of the vegetation is unlike that of the more northern States; and by watching the birds. The Cardinal Grosbeak and Blue Jay were quite abundant. The Mocking Bird seems partial to the vicinity of man, and is more tame and domestic than even the Robin is with us. It was a mild, pleasant day; and as one wandered along the woodland paths, or rested on a fallen tree, listening to the murmur of the wind through the pine leaves, and to the sound of falling waters from a brook near by; the mind enjoyed a season of rest, in a quiet reverie of pleasing but sober thought.

The meeting at Camden was large, and was attended by the three colored ministers who reside there, and by a number of white persons. The pastor of the colored Baptists, in whose house it was held, called on us before the meeting; and we explained to him the custom of Friends when assembled for worship. This prevented the singing which is usual in their assemblies. In the vocal service, reference was made to the peaceable nature of Christ's kingdom, as illustrated by the prophetic declaration, that the wolf should lie down with the lamb, the leopard with the kid, the calf, the young lion and the fattening together, and a little child should lead them.

This indicated a great change in the destructive nature of those beasts of prey; and showed the character of that change wrought in the heart of man by the regenerating power of Christ. It was needless that we should be born again, and be grafted into Christ; and those who had thus become true Christians would live together in love. Yet there was a spiritual warfare to be fought by every individual, so that every thought might be brought into the obedience of Christ. Many young people in their setting out in life, intended at some time to become good Christians; but postponed yielding up their hearts to the work of grace, desiring first to enjoy more of worldly pleasures. These were plainly admonished of their danger, and exhorted no longer to delay, lest they might be like the foolish virgins, who were refused admittance when the Bridegroom came, because they were

not prepared. Those who had in earnest entered on the heavenly journey, had need to be on their guard, that they be not drawn back into inattention and forgetfulness of God.

We had reason to believe that the meeting was acceptable to the people, and that an open door was left behind.

After leaving Camden, we made no tarriance for religious service till we reached Beaufort in South Carolina. This is near the ocean, on one of the salt water rivers or creeks, that run far up into the land, and make a perfect net-work of channels; thus forming numerous islands along the coasts of North and South Carolina and Georgia. It is beautifully situated on the bluff shore of a semicircular sweep of the river, of perhaps two miles in diameter. In former times, it was the favorite residence of many wealthy slaveholders, who owned plantations on the surrounding islands. It was here the ordinance of secession was concocted; and we were shown the house where it received its final touches and signatures. Little did the active agents in that measure imagine that they were signing the death warrant of their favorite system of slavery. It is but one of the many illustrations furnished by history, of the great fact, that the Most High ruleth among the kingdoms of men; that He taketh the wise in their own craftiness, and makes them His instruments in working out designs they never intended.

In this part of South Carolina, the colored population is far more numerous than the white; and a large portion of them own land, and are free from the annoyances to which their race is exposed in some other sections of the State. One of us called on a former member of the State Legislature, a colored man, who had assisted Friends a year ago in procuring some legislative action respecting the meeting-house property under their care in Charleston. He was living at the house of Robert Small, a large and well-furnished mansion. In his youth, R. Small lived as a slave in the out-building attached to this property. During the war, he brought the steamship Planter out of Charleston harbor, past the guns of the Confederate forts in safety; and was awarded salvage by Congress. He subsequently purchased for his home, the property where he had been brought up as a slave.

W.

(To be continued.)

The late Hannah C. Bachhouse on the Christian Profession of the Society of Friends.—I believe, my dear friends, that we might go among any people, that we might search all the families of mankind, and make the most diligent investigation of the principles we make profession of—yea, we might search the whole of professing Christendom, and after all has been discovered that the most penetrating eye can behold, we shall not be able to find more evidence of the profession of the faith once delivered to the saints, than are to be found in the Society of Friends. And I believe that the testimonies they have borne to the spirituality of the Christian religion, and in consequence of these testimonies the practices resulting therefrom, will remain even unto the end of time. I believe that Christianity in its purest form is still to be found within the pale of this Society. We believe in the Father, the Son and the Holy Spirit; and that these three are one. We believe that the Word was made flesh, and dwelt

among men; that He was "the Son of God"—"God made manifest in the flesh." We believe that through this mysterious revelation of the one eternal, self-existent Almighty Jehovah, salvation was opened to man; that in the inscrutable counsels of Omnipotence, it was His good pleasure to be reconciled unto man through the death of His Son. These are mysteries which have been acknowledged by the Society from its beginning.

—British Friend.

Hannah Gibbons.

For "The Friend."

It is thought the publication of the following brief extracts from the memoranda of our late beloved friend Hannah Gibbons, might be seasonable, and perhaps encouraging to some at the present time. After attending the Yearly Meeting of 1852, then 81 years of age, she writes: "Desires are raised that the hands of the laborers may be strengthened by the mighty God of Jacob to do his work; and that a succession of laborers may be raised up to support the precious doctrines and testimonies given to us as a people, that Zion may again arise in her ancient beauty."

4th mo. 1853. "I attended our Yearly Meeting under much discouragement and lowness of mind, and considerable infirmity of body. The meeting was favored to proceed in the weighty concerns which come before it, in more harmony than at some former annual gatherings. It seemed as though the house of David was growing stronger and stronger, and the house of Saul weaker and weaker; yet there was cause for mourning on account of an unsanctified ministry appearing in a few individuals. May He, who is the Head of His own church, work in us and for us, until all that is offensive in His holy eyesight may be purged out; and more of the calming, cementing influence of His blessed Spirit be felt to prevail, and the body be edified in love."

1854. 4th mo. "Our Yearly Meeting occurring, I was favored to get to nearly all the sittings of it. It was more satisfactory than any we have had of latter years; and the Blessed Head of the church condescended in mercy to overshadow the assembly at seasons, with the solemnizing influence of His own blessed Spirit, to the comfort and refreshment of many minds; and Friends were favored to transact the weighty business of the meeting in a good degree of harmony. Indeed it felt to me a time wherein we had cause to thank God and take courage."

5th mo. 13th, 1855. "It seemed to me in our meeting to-day, as at other times, that there are a number of seeking individuals, that attend with us on First days, who are not members of our religious Society. For such I have craved, that their minds may not be outward, but that they may be turned inward, where availing prayer is wont to be made; that so they may be taught by our blessed Saviour who condescends at seasons to teach his people Himself. Earnest desires were also felt for our poor scattered Society, the church, that through the powerful cleansing operation of the Holy Ghost and fire, she may be brought out of her present wilderness state, clear as the sun, fair as the moon, and terrible as an army with banners."

9th mo. 30th, 1856. "The present is a day of close trial and searching of heart to those

* This continues to be the case.

who are concerned for the welfare of the religious Society. Nevertheless, a hope arises, that as those who are concerned maintain it on its ancient foundation through holy help, steadfast, there will Lord's time be a gathering unto the our poor Society be favored with the settlement, and know an arising as in beauty."

From a letter to her friend and Hannah Rhoads, 1863: "I was much hearing that our late Yearly Meeting time of renewed favor, a time whereof of the cementing influence of heaven was experienced than for some years past. Such seasons are cause of humble gratitude to the Author of all our blessings. I doubt not, of renewing the times, those who have none to look to for but the Lord alone. I will also leave amidst of these an afflicted and poor people they shall trust in the name of the Lord."

1857. 4th mo. 19th. On hearing of a being exercised in the Select Yearly Meeting on the subject of silent, reverential work and recommending it as one of our privileges, she said, "It did me good to it. Oh! this is what we want as a society, silent waiting before the Most High." "worship spirit which is among us, I don't what it will come to; and yet I will check the liping of a babe in Christ. A few words, fitly spoken, are like apples in pictures of silver."

26th. In allusion to the late Yearly meeting she said, "I think I saw on Seventy morning, with undoubted clearness, the Friends gathered under feelings of reverence and holy fear—fear to offend—and if any was expressed, if it was under the same influence, it would have a tenderer gathering; but if the wisdom of man got up, it would do a great deal, it would make serious work;" adding, "it is only that which comes from above can gather there. Oh! the great 'I Am' may govern." On informed it was thought a better feeling, veiled, she said, "that is what we want, seemed greatly comforted."

The following is from a letter to her friend William Evans, in 1854: "Desires are raised that we may not be suffered to cast away confidence in the unerring arm of Israhel's Shepherd. I think I often see our state to be as on a sea of glass; wherein great the necessity of watching unto prayer. There is no time to be idle, lest, as our forefathers while men sleep the enemy sow tares. 'Tis a day when he is very busy, striving draw the mind away from the pure and simple Truth as it is in Jesus, and persuade the unwary that there is an easier way to kingdom of heaven, than by self-denial the daily cross."

From a letter to the same friend in 1854: "I have never been without the hope that our poor Society will not be utterly laid waste; believing there are a few in the different places who may be compared to the remnant of Jacob in the midst of many people, given from the Lord. As these are faithful, their Divine Leader, striving through His to uphold the excellent testimonies given us as a people to bear, I trust they in Lord's time, will be brought to see eye to eye; to walk by the same rule, to mind same thing; and to be built up a spirit house to the praise of His excellent Name."

* "I unite with thee in believing that *spirit of supplication* was lived in by thee universally—and it is the duty of all hearts would be softened towards one, and that mercy which we crave for thee would be sought for others also, often have I desired that this kind of might more prevail among us." In a letter to the same, 1853: "The being of my heart often is, Lord help us, in the help of man. What a mercy that through all the shaking permitted, foundation of God standeth sure: having seen, the Lord knoweth them that are real, he knoweth them, and will tenderly direct these, I surely believe, who are entering to follow Him in the obedience of not leaning to their own understanding, a better can we do, dear friend, than to quit the cause unto the Lord, whose power over every other power, hoping and trusting in his own time He will take it into His hands, and then who shall let it." The following is from a letter thus endorsed: "G.: 'The within is the latter part of a letter sent to W. and E. Evans, dated 4th July, 1859.'" "Yearly Meeting is fast approaching, and I doubt not brings an increase of exercise of mind, in which you have my sympathy. But how consoling is it, you can say from heartfelt experience, unto the Lord hath helped us: and I trust will help you even unto the end of the slated path."

Scientific Notes.

Artificial Butter.—For some years past attempts have been made to manufacture from fat of beef, mutton or veal, a substitute ordinary butter, but until recently with little success. At the present time, however, an article is produced in considerable quantities, a sample of which was lately prepared by X. A. Willard, the President of New York State Dairyman's Association, which is far superior to any I have seen in flavor or texture. He adds, "I have shown it to a number of experts in butter, and they are greatly surprised at its flavor," and it is of a fine white texture in the article was produced, "it would puzzle some to distinguish from genuine butter." This wax compound, it is said, is acquired by age. From an account of the process, given by Henry A. List, one of its originators, in the *American Chemist*, the following description of it has been condensed. After the fat is well cleansed, it is thrown into large tanks containing lepidolite, where it is thoroughly washed in successive portions of cold water. It is then removed to a machine in which it is reduced to small fragments. In this condition it passes the melting tank, where it is exposed to a temperature of about 122° F. Here it is separated from the adipose membrane accompanying it, and a clear yellow oil is obtained, which is carefully drawn off and allowed to solidify. It is solidified oil or refined fat, is divided into all blocks about 4 inches wide, 8 inches long, and 1½ inches thick, which are placed in cloths, and subjected to heavy pressure in suitably arranged press. This operation results in separating the refined fat into two portions,—a pure white solid stearine, which remains in the cloths, and a more oily portion which is subjected to further treatment. The stearine thus obtained is in a condition for use, and is one of the by products of the

manufacture. The oil at the temperature of 70°, is now introduced into a churn with sour milk, in the proportion of about one hundred pounds of the former to fifteen or twenty pounds of the latter, together with a small amount of a solution of annatto, to impart an orange color to the product, when the whole mixture is thoroughly agitated for 10 or 15 minutes. The mixture is then allowed to flow from the churn into a tub containing pounded ice. As the contents of the churn fall upon the ice, the oil is solidified. The tub is constantly kept in motion until it becomes filled with the solidified oil. This is then emptied out, the ice allowed to melt away, the solidified oil collected, crumbled up by hand, and then agitated in a suitable vessel with a nearly equal quantity by weight, of churned sour milk, for about 15 minutes, during which the solidified oil takes up a certain percentage of the milk, together with its flavor and odor, and pure artificial butter is produced. Thus as the finished product, is removed, drained, salted, worked and packed into firkins for sale. This made, the manufacturer states, it contains nothing foreign to the very best butter, and its keeping qualities are much better than that made from cream, while chemical analysis shows that they are almost identical in composition. 500 lbs. of artificial butter, it is said, can be made from 490 lbs. suet, and the cost of producing it in a suitably arranged factory, including all expenses excepting the license fee, is set down at 13 cents per pound.

Stoves.—A commission of the French Academy has been investigating the effect upon health of cast-iron and wrought iron stoves. Soft coal was burned in stoves of each kind, and rabbits were exposed to the air heated by them, and their condition afterwards examined. It is stated that the results of these experiments show that the use of cast iron stoves at a red heat diffuses an amount of poisonous carbonic oxide gas which produces changes in the blood the repetition of which may become dangerous, while the same method of investigation has not shown similar effects from stoves of wrought iron. The carbonic oxide which is produced when stoves of cast iron are used, may arise from several different causes. 1st. The permeability of the stove by the gas, which will pass from the interior of the fire pot to the exterior. 2d. The direct action of the oxygen of the air upon the carbon of the cast iron, heated to redness. 3d. The decomposition of carbonic acid contained in the air, by its contact with metal heated to redness. The commission recommend that all stoves and heating apparatus of cast iron, and some of wrought iron, be lined with fire-brick, or other substance, so as to prevent their attaining a red heat.

Selected for "The Friend."

They Shall Build the Waste Places.*

One of the most important objects of religious Society, is the oversight of its members, particularly those of little age and experience, with the view of guarding them against temptations, and promoting their growth in the Truth. Scarcely any thing

* The above article was published in "The Friend" in 1850, and has been transcribed and sent to us by a valued correspondent for republication at this time. We commend it to our readers as containing pertinent counsel for our approaching Yearly Meeting.

[EDS. OF "FRIEND.,"]

around them more effectually contributes to this end, than the consistent example of the older, and those who are regarded as the most experienced Friends. As constant watchfulness is essential to enable any to furnish this example, so it has a powerful influence upon observers. Watchfulness is inseparable from inwardness of spirit—an eye continually directed to the Preserver of men. This will appear in the countenance, the spirit, the temper, and the general manner and practice. It is putting the candle on the candlestick, so that all who are in the house do see the light. Where young people have such examples before them, they feel their influence, which restrains them in some measure from doing wrong, and incites many to obey the requisitions of the Truth, in the love of it. If instead of showing forth the fruits of the Holy Spirit, the active members get from under this watchfulness, and division and contention spring up, and a different spirit producing other fruits, takes the place of the spirit of Christ, this stumbles the weak, and tends to turn away the younger members, from the cause of religion, to the pleasures and profits of the world. The effect of spiritual religion is to make men "steadfast, immovable, abounding in the work of the Lord;" but where unsettledness gets into the visible church, and the inexperienced members think they see that there is little difference between themselves and their brethren, lukewarmness is introduced, and they substitute temporal pursuits for their religious duties. Innovation upon the doctrines and discipline of the Society has had a very unsettling effect. Many young people have been greatly perplexed, and the enemy has taken advantage of this, to entice them to the world for their enjoyments, that he might thereby hinder the Lord's work in their hearts. But while the church keeps under the government of the blessed Head, He will lead it to look after the flock, over which He has appointed watchmen, and bring it under a lively concern from time to time, to extend a helping hand where it is needed. How cheering to young persons, to see the devotedness of elder brethren and sisters to their Lord and Master, striving under the power of His gathering arm to draw them into the fold of Christ.

When George Dillwyn with many other worthies, occupied our galleries during the sittings of the Yearly Meeting, he often had a sweet word of encouragement for the younger and less advanced members, which spread like balm over their exercised spirits, and animated them to increased dedication to their heavenly Leader. Such evidences of love and tender solicitude in the fathers for the children, produced returning feelings of love and respect towards them, and the unity of the Spirit bound them together in true and unfeigned fellowship. Many young people went to Yearly Meeting to participate, according to their capacities, in the general travail for the welfare of the Society, the mutual help of each other, and to receive the admonitions and the counsel of experience, dictated by the Shepherd of the sheep.

Since that day we have partaken of a large share of afflictions; and were it consistent with the will of the Head of the church, many would rejoice to witness the flowing of the healing waters, to restore the diseased, to renovate the feeble and the faltering, and to invigorate the weary with energy to rebuild

the waste places. Possibly some of the hardships we have endured, have been permitted to show us, that worldly ease throws open avenues for the enemy to enter under various guises—the dangers of unwatchfulness—and that nothing but a patient, confiding reliance upon the Lord, who alone can keep the city, will serve to draw down His protecting power. It may be that prayer has not been the clothing of many, as it ought to be; not asking of Him to undertake for us and His cause, nor putting their trust and faith in Him, instead of their own wisdom and strength. Well will it be to learn by the things we have suffered, and to join in fervent mental breathings, that He would hasten the period, when true Gospel love and unity shall take the place of all party feelings, throughout our borders, and laborers be sent forth, qualified to build up the broken walls, and to sound forth the Truth so as to awaken to righteousness, many who are in danger of sleeping the sleep of spiritual death. Could we experience in our approaching solemnity, something of the feast of ingathering, every one abstracting his thoughts from things abroad, and looking into his own condition, witnessing Christ Jesus to be in the midst, teaching us Himself, and opening to the collected church the way to minister to the various branches, there would be a little harvest of comfort and Divine strength, to animate the members to discharge their respective duties, when they reach their homes. The burden-bearers would be made to rejoice, and the Lord's name would be praised by hearts, humbled in a sense of His unmerited goodness to His afflicted people. Thus saith the Lord, "again there shall be heard in this place, the voice of joy, and the voice of gladness, the voice of the bridegroom and the voice of the bride—the voice of them that shall say, praise the Lord of hosts, for the Lord is good; for His mercy endureth forever—and of them that shall bring the sacrifice of praise into the house of the Lord. For I will cause to return the captivity of the land as at the first, saith the Lord." May it prove to be our happy experience!

The Tiger.

John McLaurin, Missionary at Cocanada, East India, writes to the *Canadian Baptist*:

About 2 p. m., as we were standing on the veranda of the Travellers' Bungalow, we saw a few men run swiftly along the road which we had to go, towards a pass or gorge in the hills; they were followed by three or four women crying and weeping at top of their voices. These were followed by scores of people, gesticulating and apparently greatly excited. We went off to enquire the reason, and the word came back, "A boy carried off by a tiger."

It appears that the boy had been out watching cattle, when the *real* king of the forest came and took him off. This was not very encouraging, especially as we had to pass along that same way after dark that night. However we had with us a double barrelled shot gun, which we nearly half filled with powder and swan shot, and giving a few directions to our servants and preachers, how to act in case we were attacked, and commending ourselves to our Heavenly Father's care, started on our way. We saw nothing of our friend.

Just as we were getting ready to start home

(on account of trouble in the school we had to come home sooner than at first intended) word came to us that a man had been mauled by a tiger. He was a shepherd and was out herding a flock of goats when the fellow came and laid hold of one. Like a good shepherd he shouted and ran at the beast. It dropped the goat and seized the man. Several of his neighbors being near came and rescued him, but not before he was mangled very much. We saw him as they were starting with him for the hospital in this place. The animal had taken refuge in a hill on the road we had to travel, just about a mile in advance of us. Now this was not a cheering prospect; a disappointed tiger with a supper in view so near us, might be lurking under any bush by the wayside. However, we did not choose to remain any longer in Tuni, so we started. I told all our people to keep well together with one lantern before the bandies and one behind. We had three bandies; Bro. Currie was in the hindmost one, our tent, &c., in the second, and I in the first. We had passed the place where the brute had secreted himself, and had passed on about nine miles, when I heard just in front of my bandy the half whispured words, *puli, puli, (tiger, tiger)*. I had jumped up and grasped my gun when Josiah came saying that there was a tiger before us on the road. The bandies had stopped. I came to the point, and there he was just passing along among a few bushes by the roadside, not more than seven or eight yards distant. I had my gun in my hands, but thought discretion the better part of valor, as the shot in my gun could not possibly kill such an animal, and he would certainly have turned and either killed or badly injured some of us had I provoked an assault. He passed along just behind Bro. Currie's bandy, and across the road as if intending to come before us for another chance. (They often do this,) and evidently displeased at being balked of his prey. When first seen he was crouching on the side of the road, ready for a spring, evidently having seen the lantern from a distance; but he was disconcerted by those in front seeing him before he sprang, and by the bold front they put on. He then slowly arose, and keeping an eye on them moved away step by step.

The tiger is the king of beasts of prey. A full grown Royal Bengal Tiger is one-third stronger than the strongest lion. This is a well ascertained fact in natural history. The one we saw would be about nine feet long in all. His head about the size of a common pumpkin. He would stand about three and a half feet high, and his forearms would be about the size of a French pony's foreleg. He is about as heavy as four or five of the largest sized dogs at home. His tusks are between two and a half and three inches long above the gums, while at the base they are nearly an inch in diameter. Such a tiger as this could spring about fifteen or twenty feet if need be.

The day after our arrival here, a number of men came to Cocanada, bearing the tiger which had maimed the man at Tuni. They brought him to the house to show him to us. He answered the description given above. He had been shot by one of the Tuni Teminlar's hunters. We were glad to see the monster dead.

In-shrine memories in gratitude.

If the Editors of "The Friend" think following extracts, from the writings of thy, godly men in their day, have any practical application at the present time, will please publish them for the perusal and consideration of the general reader:

BARCLAY AND JORDAN.

"The present, indeed, is with us a degraded degeneracy; and many, many of those who should by this time, have been as monuments of Divine grace and good are merely dwarfs in a real heart-felt excellence and possession of what they profess, 'having the form of godliness, but in reality denying the power; by not receiving the seed and dwelling under it; and so hardly desiring the honorable stigma of Quaker, nevering themselves 'trembled at the Word of Lord,' in any sense of the expression. They are the stumbling blocks indeed to those who plainly see them to be, more or less worldly-minded set. Such greatly clogged chariot wheels, many ways; and we are increasingly concerned in tender love for desiring they may be aroused and awakened to see their lamentable condition, and, through merciful help, still held out to many, mend it."—From a letter of John Barclay.

Richard Jordan, in the Eighth month 1826, a day closely foreshadowing deep to the Society of Friends, "lamented much feeling, the deviations from simplicity and plainness which were conspicuous many of the members, the avidity with which they pursued the pleasures and riches of the world, and the apparent want of religious concern on their own account, and for the welfare of the church. Much labor, he remarked had been bestowed upon them; spiritual temporal blessings had been dispensed with liberal hand, and yet disobedience and ingratitude had been too generally returned for these favors; and he feared lest those might be considered as the children of kingdom, if they persisted in this course would be cast out, and others raised up from the stones of the streets, to support doctrines and testimonies given to Friends bear. He however expressed, that gloom as the prospect of a succession of unstandard bearers seemed, he had faith to believe, that those doctrines and testimonies never would fall to the ground; * those who continued to maintain the ancient faith and discipline of Friends, would be served as a distinct body of Christian professors.

Great was the anxiety he evinced, that friends of Christ and his holy cause might stand firm in a patient, persevering testimony against every innovation, whether in doctrine or discipline, and by the steadfastness of their faith, the purity of their lives, and the meekness and humility of their spirits, evince while they dared not strive to carry party views and schemes, they felt themselves strained by a sense of religious duty, earnest to contend for the faith once delivered to saints."—From an Addenda to the *Journal of Richard Jordan*.

It is the delight of the Lord and his glory to deliver his people, when to the eye of seer it seemeth impossible. Then doth the Lord delight to stretch forth his arm, when a false can help; and then doth it please Him deal with the enemies of his truth and peo

on they are lifted up above the fear of Him, are ready to say in their hearts concerning them, "They are now in our hands, who deliver them."—*Isaac Pennington.*

For "The Friend."

Random Notes of Travel in Europe.

(Continued from page 268.)

Edinburgh, 7th mo. 11th.—On First-day ended Friends' meeting, where we found a full company assembled, including a number of students from the University, who are members of our Society. The meeting was interesting one; the silence being broken our friends W. and I. M. We seemed here for a season, within "a quiet habitation" wherein the ceaseless throb of the heart the great city, was scarcely audible. We enjoyed the unexpected pleasure of meeting with several relatives whom we had never seen. Taking tea with the dear friends named, at their beautiful place at Millerside, here, as well as at the homes of our relatives, had opportunities to see something of the domestic life of Edinburgh. These were "as brooks by the way."

The Museums of this city are full of interest. The Antiquarian collection contains many ecclesiastical curiosities, among which may be seen "the Brank," an ancient instrument, Scotland often called "the Scot's bridle," is made of iron, and is a cruel invention for purpose of "correcting incorrigible scolds." It has also been preserved one of Rob Roy's scabbards, with pistols so concealed that on snapping to open the purse one would be struck through the hands. The Thumbstick or Ambuscade, an instrument of torture for pressing the thumb, largely used by the Inquisition in Spain, and occasionally in Britain, is applied to some of the Covenanters, may be seen.

The Industrial Museum we found extremely interesting and very instructive. Here are deposited Hugh Miller's collections of Geological specimens, and here the history of almost every art is fully illustrated, oftentimes by bits of great beauty and value. We lingered long and admiringly among the wonderful displays of Venetian glass, old porcelain or tery, or to dwell upon the beauty of the architecture of this museum. We remarked that Europe could present us with institutions that we do not rival, except industrial museums, a want that is about to be supplied by our permanent exhibition in the new Park.

On the morning before us, and we therefore left Edinburgh with less regret, though a feeling sadness came over us, as we cast our last lingering look upon the fair city, where we spent nearly a fortnight of pleasant days. On Hill, with its modern ruins of the National Monument, "often pointed at as indicative of the pride and poverty of Scotland," its beautiful Grecian temples, dedicated to Dugald Stewart, Prof. Playfair and Robert Burns, Arthur's Seat, Salisbury Crags, and graceful Gothic pile in memory of Sir Walter Scott, must all be left behind us as long as those we may never see again. Our weather still continued; literally floods of sunlight were poured upon rock, tree and shadow as we passed along, and we have yet scarcely seen a Scotch mist. Suddenly the conductor called out "Linnithgow!" and we staid long enough to catch a glimpse of the ruined walls of the fine old palace, the

birth-place of Mary Queen of Scots, as well as glance at the narrow streets of the town which will ever be associated with the dark tragedy of Hamilton, of Bothwellhall, and the Regent Murray. Thence our course was onward, through a well cultivated country, abounding in historic names and places, each awakening a new interest, until Bannockburn was announced. As we gazed eagerly from the window at the small village, and the sloping hill beyond it, an old Scotchman exclaimed, "Surely, madam, y'e're no English lady, or ye would na wish to see the field of Bannockburn!" with a meaning smile, and a most exulting twinkle in his grey eye. But soon

"The bulwark of the north,
Grey Stirling with her towers and town,
Upon our fleet career looked down."

We were enjoying a much more speedy transit from place to place, than was ever contemplated by the jaded hunting party who rode up the narrow streets to the castle gate, on the summer morning pictured by the poet in the lines we quote. With what consternation would they have looked upon our shrieking engine entering the depot at the foot of the hill; what triumph of mechanical art and science crown our day with comfort and convenience! Stirling appears at first glance a miniature Edinburgh—its castle seated upon a similar bold eminence, around which, especially in former days, the town at its foot, clung for protection. The streets are, however, more difficult of ascent than are those of Edinburgh.

Stirling of old was appropriately named Stryveling, the Celtic name having been Strilla, both of which terms signify the hill or town of strife, from its having been the scene of many conflicts between the Picts and the Romans. The conflicts between the Scots and the Picts were also many and sanguinary, and in the words of the old ballad,

"The Picts were undone—every mother's son—
For not teaching the Scots to brew heather ale."

At the expiration of this warlike race by the Scots, two persons, says an early historian, alone remained, who were possessed of the secret of brewing a delicious drink from heather tops. The lives of these were offered them on condition that they would teach the ancient enemies of their race the mode of brewing this favorite beverage. They were father and son. The father agreed to make the disclosure on the condition that a boon should be granted him. This was promised and sworn to. "My demand then is," said he, "that you strike off the head of my son."

The Scots were surprised at this request, but he persisted, and they complied. "Now," exclaimed the stern old captive, "you may put me to death also; my son was young and timorous, and the promise of his life might have availed with him. I am old and resolved, and by no tortures which you can inflict, shall you ever extort from me the knowledge you so much desire." The next moment he also lay stretched in death. The name Snowdon, meaning the fortified hill, has also been applied to it. The castle stands upon the site of a Roman station, and one of our walks was along a narrow path, which led to the precipitous side of an adjoining portion of the hill, to some rocks bearing the appearance of heath stone, and which may have been part of the Roman stronghold, judging from the faint marks thereon, which seem to have been made by the 6th Roman Legion.

The castle wall is eight feet in thickness, and thus quite broad enough for a promenade upon its top. At one corner a low stone step was pointed out by our guide as the favorite stand of Victoria when visiting the castle. I have seen nothing finer than the view from this parapet overlooking towards the North, the beautiful Ochil hills, and in the distance the tower of Alloa. To the southeast, on a calm day may be seen in the distance the Lammermoor and Pentland hills, Edinburgh Castle and Arthur's Seat; westward "the Vale of fair Menteith" stretches away to the highlands where Ben Lomond, Ben Ven, Ben A'an and Ben Ledi close the scene, while the glittering folds of the Forth, like the tortuous windings of a serpent, appear along the course of Stirling, bordered by fields of deepest green, interspersed with luxuriant woods. The Abbey Craig surmounted by the Wallace Monument rises boldly on the North. In the foreground are the town and its bridges across the Forth, Cambuskenneth Tower and ruined Abbey, and the Bridge of Allan, which last is a very picturesque village imbedded among trees. No one endowed with any perception of the beautiful in landscape but would sympathise with Prince Albert and the Queen, who always gazed with admiration upon this magnificent outlook, perhaps the finest in the United Kingdom. A few yards from the Victoria Lookout is Queen Mary's aperture, simply a hole in the wall through which she could view the tournament and other sports below and remain herself unseen.

Stirling Castle is used for barracks; soldiers were marching and countermarching in the great square of Castle Green, drilled by a pompous officer on horseback. "Food for powder," is the involuntary suggestion on seeing men thus employed. The present store-room and armory was once the Chapel Royal, built by James VI. for the baptism of his son Prince Henry; while the lower Court contains the palace begun by James V., and finished by Queen Mary in 1565. This last edifice is richly ornamented with pilasters and the most grotesque statues we have yet seen. Passing through a low archway, the entrance to the ramparts, we found ourselves in a small beautiful garden, containing some of the most delicate creamy-white roses I had ever seen. "This," said our guide "is the Douglas Garden, and from that small window above your head the body of the Earl was thrown after he had been killed by the King."

"Ye towers within whose circuit tread
A Douglas by his sovereign bed."

Ascending a broad flight of steps we entered a large wainscotted room which had been partially destroyed by fire a few years ago. This had been a royal chamber or reception room, and a door on one side opened into a smaller one where the above tragedy had been enacted.

The Earl of Douglas came to Court protected by a safe-conduct from the King's own hand, but upon refusing to break up a rebellious confederacy with other disaffected nobles, he was slain in a fit of passion, the King exclaiming, "If thou wilt not break the bond, this shall!"

"Here," said our guide, pointing to a low door, "here you see the entrance to the prison house of Roderick Dun—yonder is the guard room, and on the Castle Green they still use

the Douglas Cast." It had been long since I had read the poem which has rendered us most familiar with scenes in the life of that chieftain, and I therefore concluded that the "Cast" was some sleight in wrestling, but found that "To hurl the massive bar in air" was the feat referred to. Thus history, song and tradition alike conspire to throw a veil of romance around these grey old towers.

At the foot of Broad street stands the house in which Darnley lived when his son James VI. was baptized. As we passed it, a woman suddenly appeared with a child in her arms at an upper window, thus giving us a vivid realization of the little prince, who inheriting the blood of the Tudor and the Stuart kings, rivited the two kingdoms in a union to which Scotland ascribes much of her prosperity.

Bannockburn lies two miles south of Stirling, in a hollow between Milton and Gillies Hill. The whole ground is covered by waving grain, and we look in vain for any traces of the old field as we imagine it to have appeared. The morass which bordered the rivulet, and where, it is said, the Scotch digged so many pits which disabled the English horses, is now drained; but the Borestone, where Bruce displayed his royal standard, still marks the centre of the battle field. This stone lies on the right side of the road as we approached, and would 'er this have been entirely clipped away by Vandal visitors, had it not been protected by an iron frame-work secured firmly in the earth.

Almost six hundred years have passed since this famous battle field, on which we stood in peaceful musing, had shook with the tramp of armed men, and momentous as the consequences were to Scotland, the event would probably have almost faded from memory, had it not been kept ever fresh by the stirring ode of Burns, which can still arouse the spirit of his countrymen to the highest pitch of patriotic ardor. "I told you," says a companion of Burns, "that in the midst of the storm, on the wilds of Kenmore, he was wrapt in meditation. What do you think he was about? He was charging the English army along with Bruce at Bannockburn. * * I did not disturb him. Next day he produced me the address of Bruce to his troops." In a letter to the Earl of Buchan, he says: "Independently of my enthusiasm as a Scotchman, I have rarely met with anything in history which interests my feelings as a man equal with the story of Bannockburn; on the one hand a cruel but able usurper, leading the finest army in Europe to extinguish the last spark of freedom among a greatly daring and greatly injured people; on the other hand, the desperate relies of a gallant nation devoting themselves to rescue their bleeding country or perish with her."

Note.—On page 255, Prof. Hurley should read Prof. Huxley.

Our duty, our greatest duty is, humbly to follow on to know Him; to abide under his holy redeeming hand; that every branch which would sprout out of his holy counsel may be early removed; thus, I believe, a happy equanimity of spirit might be more generally known, and perhaps less of that deep suffering which sinks beneath the happy medium. I am afraid deep sufferings and baptisms must be known by all who retain their place in the Lamb's army; but such is the equity and truth of our captain, that if pa-

tience have her perfect work, his true followers, even through the region of the shadow of death, fear no evil. May the stay of the righteous in every generation thus direct our steps, in the midst of the paths of judgment, to the honor of his cause, the dignifying his name, and to our own peace.—*S. Fothergill.*

For "The Friend,"

The Gospel a Power,—not merely a record claiming assent.

(Continued from page 267.)

The Gospel, therefore, as it was presented to the mind of the inspired teachers under the law; as the apostles received it, and as it is communicated to all now who truly embrace it, is not merely the declaration of glad tidings written or spoken, but the means by which the Father in His great love toward a fallen race, would infuse renewed life and energy into His Church, and finally procure for all His awakened children an inheritance in the Church Triumphant. As a power, it therefore manifested by its fruits. Hence it is apparent, the faithfulness of the professing church, may be estimated by the life and warmth thus received into it.

If filling up its measure of usefulness by an example worthy of its high calling, as the representative of the Divine character and efficacy of this blessed Gospel, the only hope of salvation, whereby we come to partake of a measure of Christ's sufferings, even unto the death of the cross, its [the church's] light will indeed go forth as brightness, and its "Salvation as a lamp that burneth." "The Gentiles shall see thy righteousness, and all kings thy glory, and thou shalt be called by a new name, which the mouth of the Lord shall name; thou shalt be a crown of glory, and a royal diadem in the hand of thy God."—*Isa. lxi. 1.*

And again the prophet breaks forth in these words, "I have set watchmen upon thy walls, O Jerusalem, which shall never hold their peace, day nor night, until he establish, and make Jerusalem a praise in the earth." This lively and beautiful description respecting the Church of God, as thus quickened and renewed, presents to the mind a touching picture, deeply instructive; showing that the accomplished purpose of the promulgation of the Gospel is nothing less than the redemption of the world; the lifting up of mankind out of a state of separation through disobedience. That it describes or points to a condition far above the state to which the great mass of men, as well as the professing Church as a body have yet attained, is cause for deep humiliation; yet there is rich compensation in the assurance from the inspired penman, that the provision is abundant, not only as it applies to each soul, but that it pre-eminently the work of the Gospel through Christ to establish a mystical church, without spot or wrinkle, or any such thing; which shall ultimately absorb all of whatever name, into its own purity, simplicity and beauty, even as the natural heart of man is created anew by being born of the Spirit, and united to Christ, and to the brethren. The life and efficiency of the Church must primarily consist in perfect love individually exercised toward God, and to all mankind; and this will be shown in minding the promptings of the Holy Spirit, leading into great watchfulness, and true abasement. The service which the child of God renders must be a willing service, and how can this be given, except a

pure love fills the heart for Him whose "grace has led thee to repentance."

As the carnal mind is at enmity with God and is ever resisting all that promotes his cause, no progress in the highway of holiness can be made, until under a deep sense of our proneness to sin and need of help, we embrace in the fulness of faith "the law of the Spirit of Life in Christ Jesus as inwardly and spiritually revealed." No external help, of his own power, save any soul from guilt wherein it stands by nature. The power of escape is that provided in the Gospels through a crucified and risen Saviour, with power, is knocking at the door of every heart. By this only can the affections be changed, and we led on into purity of purpose, uprightness, and that holy fear which is as an anchor to the soul. By this only the Church put on her beautiful garment and Christ come to be known as its Head; its Priest and Lawgiver, Bishop and King; His government the rule more of all who profess His name; outward helps less depended upon, and the hope before us in the Gospel would abound in perfection of faith and the dispensation of His richest blessings and gifts, to the exaltation of His Grace. Christ dwelling with the Church spiritually, we should witness the fulfilment of Paul's declaration, that the Gospel is indeed the power of God unto salvation to every one that believeth. I refer here to the Church, in that sense which comprehends those who are of the household of faith, with regard to outward condition or circumstance. All are equal in the sight of the Almighty and the objects of his redeeming love and mercy; so that if any are shut out from Him it is because of their impenitence and hardness of heart.

"If our Gospel be hid, it is hid to them that are lost; in whom the god of this world hath blinded the minds of them which believe not, lest the light of the glorious gospel of Christ, who is the image of God, should shine unto them."—*2 Cor. iv. 3, 4.* In the same chapter, Paul makes this clear declaration of the universality of God's love in bringing the Gospel of His dear Son, whereby it would be brought nearer to the Fountain of Life, and being directed to Christ Jesus would in Him behold the excellency and glory of the Father. "For God who commanded the Light to shine out of darkness hath shined in our hearts, to give the light of the knowledge of the glory of God in the face of Jesus Christ. But we have this treasure in earthen vessels, that the excellency of the power, may be of God and not of us." cannot be supposed the apostle referred to those who were known as Christ's disciples to the Church at Corinth whom he was dressing; who were engaged with him spreading a knowledge of the Gospel, which he speaks of God revealing Himself to the world, or as in the text, shining in their hearts. His was a *comprehensive belief*, as is evident from many other passages, embracing all whatever name upon the one condition of faith, and submission to that which maketh manifest; "For that which maketh manifest is light."

Hence it is again evident that Christ reveals Himself by his Spirit to every rational soul; and freely condescends to communicate all that may be essential for His children know, whose outward situation places th-

and the reach of, or the knowledge of the tidings recorded in the Holy Scriptures. We fully appreciating the great blessing conferred on us by a knowledge of the truths revealed by inspired men in the New Testament, we may rejoice to believe, that through whose power is not bounded by space, who knowing the wants of all His house as a compassionate High Priest touched the feeling of every human infirmity, descends graciously to help the ignorant; seeking soul is placed within the promise He hath made for salvation. The Good message is, "Come unto me all ye that are weary and heavy laden, and I will give rest; take my yoke upon you and learn of me, for I am meek and lowly in heart, and shall find rest unto your souls."

Thus the call is without exception: all are led to come, renouncing themselves, and relying upon Him, whose Spirit and power would bring them to confess their sins, and to would be faithful and just to forgive their iniquities." "Preached in every tongue," the Gospel speaks availing to thy heart, however estranged from God, will but turn to and obey that measure of light and Grace, which is our appointed portion; and if followed, thou shalt magnify His Power, though it may be in great similitude, which has thus opened a way for thy perseverance through Him who died for all.

Hereby is the Christian's hope established upon a Rock which never faileth; a pledge to which he may cling with safety every storm; for he feels the covenant of grace to be a perpetual covenant, unless he breaks it. No wonder, therefore, that Paul, who was perhaps the most eminent instrumental Gospel laborer the world has known, should have left upon record in his several epistles so many comforting assurances, in which the Gospel's power and fitness, to set the believing heart in the way and work of salvation.

To his life, and labor in its defence; and his testimony in support of its Divine character, and the means whereby he was solemnly arrested in his downward course—Gospel message being freely poured into his heart, may we refer with comfort and engagement; and for the clearest vindication of our faith, we have in the life of any Christian teacher, that the Gospel of Christ is indeed an unsatisfying, renewing power, bringing gladness to the true believer.

P. B.

(To be concluded.)

Perils of English Railway Travel.—The apartment cars used on English railways, wherein passengers are securely locked, and stand end each other's company from station to station, whether agreeable or otherwise, with no chance of escape, have from time to time been the theatre of shocking scenes. Two singular instances of insecurity recent occurrence are recorded. In a train running between Liverpool and Chester there were in one compartment three persons—one artist, and two laborers, father and son, and Holmes. After the train had passed down station, the young man Holmes drew knife and attempted to cut the artist's coat. The latter, thinking his money was stolen, handed forth his purse, containing £8, which was promptly thrown out of the car window, and then his watch, which

shared the same fate. In the struggle which ensued the artist received knife-wounds in his neck and face, and had his right thumb bitten off. He and the father together were unable to overpower the infuriated young man, who managed to get out of the car window and was clinging to the outside of the car as the train approached a station and was stopped, when he fell to the ground. The explanation of his dangerous conduct was that "he had buried his wife on the previous Sunday, and had been drinking to excess."—*National Temperance Advocate.*

Selected.

Abraham Keyser, an esteemed member of Germantown Particular and Frankford Monthly Meeting, Pa., was convinced of the Truth about the 25th year of his age; he was admitted upon his application into membership with the religious Society of Friends, and stood firm through many vicissitudes therein, to the testimonies of Truth as professed by them. When in his 86th year, he penned the following: "I have a strong testimony to bear in favor of the attendance of all our religious meetings, held on what are called week-days. Many and various are the difficulties and losses that those sustain that plead they cannot leave their temporal concerns on those days, but are not sensible of the Hind that permits them. If the discipline is established in best Wisdom, which I believe it is, that enjoins their attendance, then eventually no loss will be sustained, but rather a blessing, as I have experienced."

All the events of life are precious to him who sees in everything the hand of his heavenly Father. No wind can blow wrong; no event be mistimed; no result be disastrous. If God but cares for our inward and eternal life, and if by all our earthly experiences he is unfolding it, and preparing for its full and perfect disclosure above, then nothing can befall us but prosperity. Every sorrow is but the setting of some luminous jewel of joy. Our very mourning is but the enamel around the diamond, and our very hardships but the metallic rim that holds the opal, gleaming in splendor with strange interior fires.

Our times (some read it our opportunities) are in God's hand; and therefore he knows how to choose the best time for his bestowment or our deliverance, and we must wait for it.—*Matthew Henry.*

THE FRIEND.

FOURTH MONTH 14, 1877.

Ere this number of our Journal reaches very many of our subscribers, a large part of them who are members of Philadelphia Yearly Meeting, will have left their homes to attend the annual assembling of that body. The recurrence of these solemn gatherings calls forth feelings of varied character. The young and those of buoyant spirits, look toward them with pleasing anticipations of reunion in social intercourse with loved friends and companions; some of them, we doubt not, with desires to share with their elder Friends in religious travail for the welfare of their be-

loved Society, and the promotion of the cause of truth and righteousness in the earth. The older members and those more deeply experienced in the work of religion, sensible of the peculiar trials that abound, and the loss sustained in the removal by death of many who had long stood nobly for the cause of their Divine Master, feel their burden to press heavily upon them; and that their hope and confidence must rest on that power which is invisible, and which in days that have gone by and in seasons of close conflict, has again and again worked deliverance for his struggling people, and enclosed them in his protecting, preserving arms.

It has always been the assured belief of Friends that the church, when assembled for the purpose of transacting those affairs that pertain to its welfare, and the right administration of its trusts and duties, must know its dependence to be on its adorable Head alone, in order to be made instrumental to enlarge the kingdom of the Redeemer, to expose and refute error, and to edify its members in love. To experience this, the individuals composing it, must dwell in a lowly, contrite and prayerful state of mind, that so those "who by reason of use have their [spiritual] senses exercised to discern both good and evil," may recognize and obey the voice of the good Shepherd, while they watch against following the voice of the stranger, and refuse to walk in his by-ways or crooked paths. Is there not reason to fear that this fundamental doctrine of the necessity for the immediate revelation of the will, wisdom and strength of Him, who "loved the church and gave himself for it, that He might sanctify and cleanse it with the washing of water by the Word," has been disregarded by many in membership in various places; and instead of waiting in deep reverent exercise of soul before the Lord, which is needful to attain to this knowledge, and that the assembly may witness the arising of Divine life and power, the wit and contrivance of the natural man has been substituted therefor, and the important business of the church transacted under no higher authority than the unsanctified intellectual abilities of the actors.

How unspeakably desirable it is, then, that those who still adhere to the doctrines and testimonies that have distinguished Friends from the beginning, should have their minds imbued with a correct sense of the importance to the whole visible church, of their supporting them in their purity and their integrity. There is but one way in which this can be accomplished. By laying the burdens and afflictions which are inseparable from the present low state of things in the Society, on the almighty arm of Him, whose ear is ever open to the cries of his poor militant church, and who has declared, "Lo! I am with you to the end of the world," and "Greater is He who is in you, than he who is in the world," while each one continues to take up his cross daily, despising the shame, and in abasement of self, follows the leading of the Shepherd of Israel, though it may be into deaths' dith. In proportion as this is the case, we shall know the "Lord of hosts to be for a crown of glory, and for a diadem of beauty unto the residue of his people, and for a spirit of judgment for him that sitteth in judgment, and for strength to them that turn the battle to the gate."

We commend the following extract from the Discipline of Philadelphia Yearly Meet-

ing, to the serious consideration of every one who may attend its sittings.

"Dear Friends, be patient in the exercise of your gifts and services, and take no offence at any time, because what seems to be clear to you is not presently received by others; let all things in the church be propounded with an awful reverence of Him that is the head and life of it; who said, 'Where two or three are gathered together in my name, there am I in the midst of them.' Therefore, let all beware of their own spirits and keep in a gracious temper, that so they may be fitted for the service of the house of God, whose house we are, if we keep upon the foundation that God hath laid; and such He will build up, and teach how to build up one another in Him. And as every member must feel life in himself, and all from one Head, this life will not hurt itself in any, but be tender of itself in all; for by any one life of the Word, we were begotten, and by it ye are nourished and made to grow into your several services in the church of God. It is no man's learning, nor artificial acquirements; it is no man's riches, nor greatness in this world; it is no man's eloquence nor natural wisdom, that makes him fit for government in the church of Christ: all his endowments must be seasoned with the heavenly salt, his spirit be subjected, and his gifts pass through the fire of God's altar, a sacrifice to His praise and honor, that so self being baptized into death, the gifts may be used in the power of the resurrection of the life of Jesus in him."

SUMMARY OF EVENTS.

UNITED STATES.—The mean temperature of the Third month, by the record kept at the Pennsylvania Hotel in Philadelphia, was 39.4 deg. The highest point attained during the month was 71 deg., and the lowest point reached was 19 deg. The amount of rain and melted snow during the month was 6 inches. It is stated that the average mean temperature of the Third month for the past 88 years has been 39.10 deg., that the highest mean temperature period was 87.8 deg. in 1871, and the lowest mean in all that time was 30 deg., in 1843.

The number of interments in Philadelphia last week was 267. There were 68 deaths from consumption, 40 inflammation of the lungs, and 18 old age.

President Hayes and his wife have determined that at their public receptions, they will entertain whites and neither wines nor liquors of any kind shall be dispensed.

The President and his official advisers, after hearing the heads of the two rival State governments in South Carolina state the grounds on which each claimed to be the rightful organization, concluded that Wade Hampton had the better of the case, and he is elected. The party of which he is the head at present, does not consist exclusively of white men, but embraces many thousands of the most respectable and intelligent of the colored voters who have become convinced that the ignorant and prejudiced negroes who, led by unprincipled white men, have lately contrived the State and waded its resources, would soon bring it to financial ruin, and even cause a relapse into partial barbarism.

Gov. Hampton gave emphatic assurances that he and his friends desired and had the ability to protect all classes of the people in their just rights. The President and cabinet believed these declarations and promised to make it good faith, and have directed that the U. S. troops to which Chamberlain looked as a last resource, in case of need, should be withdrawn from the State and placed in barracks elsewhere. On this decision being announced Chamberlain at once withdrew from the contest.

In regard to Louisiana the Commissioners have been requested to take some time to inform themselves fully in regard to every thing it is important to ascertain, and when they make their report at Washington, the President and Cabinet will carefully consider and decide what duty the general government has to perform in the case.

On the night of the 4th inst., about 1500 of the Indians who were recently engaged in hostilities with the

United States troops encamped near Butte Creek, Dakota, on their way to Spotted Tail Agency to surrender. They were destitute and anxious for peace. They report that Sitting Bull and his followers will accept no terms, and were retreating to British Columbia.

The total anthracite coal product of Pennsylvania is about 20,000,000 tons, about half of which would ordinarily come to tide water. This quantity is probably two millions more than can be consumed during the present depressed condition of trade and manufactures. The Presidents of the various coal companies have unanimously agreed that the quantity sent to tide water or other competing points shall not exceed 8,000,000 tons, and that it shall be divided among the different companies in the following proportions: Philadelphia and Reading 25, Lehigh Valley 18, Delaware and Hudson 15, Delaware, Lackawanna and Western 15, Central New Jersey, and Lehigh and Wilkesbarre 15, Pennsylvania Coal Company 10 hundreds, and that each interest be left to sell at any price or in any manner it may desire.

During 1876 there was received of the precious metals at Omaha, over \$60,000,000 in value of gold and silver. The Black Hills gold product amounted to \$2,000,000. The total received about 27 millions was in silver, and 33 millions in gold.

The writ of *quo warranto* which was stated Samuel J. Tilden and his friends intended to offer to test before the Supreme Court the right by which President Hayes holds his office, had not been presented up to the 9th inst., and it was generally supposed the attempt would not be proceeded with in view of the title ground there was to expect a decision in accordance with their wishes.

The Supreme Court of the United States has decided that the Congressional appropriation of \$1,500,000 to the Centennial Exhibition, must be repaid to the U. S. Treasury before there is any distribution among the subscribers to the stock.

The *Market*.—The following were the quotations on the 9th inst. Philadelphia.—American gold, 105 1/2, U. S. sixes, 1881, 113; new five per cents, 111 1/2; 4 1/2 per cents, 106 1/2; 107. Uplands and New Orleans cotton, 11 1/2 a 11 1/4 cts. Pennsylvania and Southern wheat, choice at \$1.82 a \$1.85 for amber and white. Rye, 80 cts. Yellow corn, 56 a 57 cts. Oats, 40 a 47 cts. Sales of 3250 sheep at 4 a 6 1/2 cts. per lb. gross, and 10,000 sheep at 4 a 7 cts. per lb. gross. About 3800 hogs sold at the range of 7 a 8 1/2 cts. per lb. net.

FOREIGN.—The merchant navies of the world at the beginning of the present year, aggregated 58,298 sailing vessels, with 15,533,338 tonnage, and 5771 steamers with 5,675,342 tonnage; these figures include only self-propelled vessels, those engaged upon inland waters not being enumerated. Of the sailing vessels, more than one-third are British, and not quite one-sixth American.

Prince Bismarck, Chancellor of the German Empire, has tendered his resignation on account of failing health, but his Emperor has not accepted it, and wishes him, instead, to take a prolonged period of rest and relaxation.

The quarrel between Turkey and Montenegro remains unsettled. On the 5th inst. the Montenegrin delegates at Constantinople had another interview with the Turkish Minister of Foreign Affairs, in which they demanded that all their previous demands, including a cession of territory on their southern border. They informed the Turkish Minister that they would leave Constantinople during next week in the event of receiving a definite refusal.

Intelligence from the City of Mexico to Third mo. 20th, represents that dissatisfaction to the government of Diaz has been rapidly spreading among the people and the army. Some of the troops had pronounced for Lerdo, and there was a great probability that his party would soon regain power.

The correspondent of the *London Standard* in Berlin says, he has reason to believe that Bismarck will retain office, but he doubts whether the Kaiser ever alone, provided the organization of the Imperial and Prussian Governments are thoroughly changed in accordance with his views.

Fintel and Sons, of Bristol, England, sugar refiners, have failed with liabilities amounting to \$2,500,000.

The *London Pall Mall Gazette* says that unless Turkey yields to all her previous demands, including a cession of territory on their southern border, they will leave Constantinople during next week in the event of receiving a definite refusal.

The Wolverhampton Iron Works, England, are about to be closed, because the enforcement of the eight hour system by the miners has resulted in a continuous loss, and 1200 workmen will be thrown out of employment.

NOTICE.

A person has been engaged to take charge of Committee Room, Arch Street, during the sitting the Yearly Meeting in order to give greater scope to articles left there during that period.

The Eighth Annual Meeting of "The Indian Association of Friends of Philadelphia Yearly M." will be held in Arch Street Meeting-house, Philadelphia, on Fifth-day, Fourth month 19th, 1877, at 9 o'clock, P. M. Friends generally are invited to attend.

RICHARD CABREY, Clerk.

FRIENDS' FREEDMEN'S ASSOCIATION PHILADELPHIA AND ITS VICINITY.

The Annual Meeting of The Contributors will be held in the Committee Room of Arch Street Meeting-house, on Second-day evening, the 16th inst., at 9 o'clock. Friends generally are especially invited to attend.

JOHN B. GARRETT, Secretary.

WANTED.

A situation by a Friend qualified to teach the English branches and classics.

Apply to J. SMEDLEY,

304 Arch St., Philad.

FRIENDS' SELECT SCHOOLS.

A suitably qualified Friend is wanted as Principal the Boys' Select School, at the opening of the term the Ninth month. Application may be made to BENJ. W. PASMORE, Supt., (address *Street Road P. Chester Co., Pa.*) or to CHARLES J. ALLEN, Treasurer, 304 Arch St., Philadelphia.

WESTTOWN BOARDING SCHOOL.

THE SUMMER SESSION opens on Second-day the 5th of Fourth month. Parents and others intending to sojourn, will please make early application to BENJ. W. PASMORE, Supt., (address *Street Road P. Chester Co., Pa.*) or to CHARLES J. ALLEN, Treasurer, 304 Arch St., Philadelphia.

FRIENDS' ASYLUM FOR THE INSANE.

Near Frankford, (Twenty-third Ward,) Philadelphia Physician and Superintendent—JOSUAH H. WORTHINGTON, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board Managers.

DIED, at the residence of her brother, John Swen-ton, Nannch, Rockland Co., N. Y., on the 21st of 2 month, 1877, SUSAN KING, widow of the late JOHNS KING, Ledyard, N. Y., in the 66th year of her age, at a long and painful illness, which she bore with patience and resignation, a member of Scipio Monthly Meet-ing of Friends.

—, on the 24th of 2nd mo., 1877, at the residence of Thomas Cornelius, PIERRE HAIGHT, relic of the late Hiram Hight, of New Derham, in the 67th year of her age, a member of Norwich Monthly Meeting of Friends, Canada. She manifested a lively interest in the welfare of our Society and a strong attachment to its principles. In her last illness she was favored with calmness and resignation, being sustained through much suffering by the Everlasting arms which she felt to be round about her, and with an assurance of having a building of God, a home not made with hands eternal in the heavens.

—, on the 25th of 2nd mo., 1877, at the residence of her father, PIERRE, daughter of John Palmer, in the 63rd year of her age, a member of Norwich Monthly Meeting of Friends, Canada. Through her illness was favored with resignation to the Divine will, a few friends have the convincing evidence that her death was peace.

—, Second mo. 28th, 1877, in Philadelphia, M. daughter of Daniel E. and Mary H. Thompson, a member of Bradford Monthly Meeting, Chester Co., Pa., the 26th year of her age. Naturally of a quiet disposition, she exhibited much innocence of heart and was accompanied with that "circumference of meek and quiet spirit which, in the sight of God, is declared to be of great price." Her last illness was short, yet as the glow near, a comfortable assurance was granted that her death was peace.

Notes of a Southern Visit.

(Continued from page 274.)

In making arrangements for meetings with colored people at Beaufort, we called on pastor of one of the Baptist congregations, had an interesting conversation with him. He is a man of decided character, and of considerable mental ability. He was originally from Savannah, where he married in his life. Having been sold to a firm in Columbus, Georgia, he was there employed as a porter in a hardware store; and was thus separated from his wife. He longed to communicate with her, but was unable to write, could not bear to disclose his thoughts to any person to write for him; and thereupon sent her verbal messages, as opportunity offered. The desire to write to her with him, and one day he picked up in street an envelope torn from a letter, and read some one to read to him the address on it. This he carefully studied, and then practiced when alone, imitating the forms of the letters. The first letter he learned was "T.," availing himself of the chances thrown in this way, he gradually learned to read and to write.

His writing abilities at one time nearly brought him into trouble. A colored man, who had been badly used, persuaded him to take a pass to enable him to go on the cars to Alabama. The man went, and remained there for some time; but his desire to see his wife was so great, that he ventured back to Columbus. He was arrested at the depot, and destroyed the pass before it was taken from him.

A change in the firm rendered his services necessary; and his master permitted him to return to Savannah, and find a purchaser where he could be near his wife. Here he remained till freed by the war. Though he had been comparatively well-treated himself, he used strong language in talking of the cruelties of slavery; and of the ill-treatment of his people recently on official accounts. He seemed fixed in the belief, that the Democratic party at the South had no intention of giving equal political rights to his race; but that its rule meant the placing of power in the hands of a few, and the subjection of the bulk of the people to their government. His hope for the future seemed to be placed in the goodness of the

Lord, who sitteth king for ever. Divine Grace, he thought, was the preserving power which restrained the evil passions and propensities of men, and prevented man from becoming worse than the brutes.

The meetings at Beaufort were satisfactory opportunities. At the close of the service of that held in the evening, the pastor of the colored Baptist congregation commended to the audience the advice which had been given them, and expressed his belief that it came from the Holy Spirit. In conversation afterwards, he referred to the closeness of the doctrine preached, and said it struck a hard blow at his people, but he was satisfied and thought it all right.

The day following, a meeting was held a few miles off, near Port Royal, in a school-house. It was largely composed of children, as many of the men were engaged in loading and unloading some vessels. We afterwards drove to the residence of the teacher, Elizabeth Botume, who is a northern woman, and much interested in her charge. She resides a short distance from the school, in the old family mansion of the plantation, surrounded by an extensive grove of live oaks. Near the house are the walls of a fort, built by the French Huguenot settlers in 1562. Along the river front, the foundations have been washed away, and the wall lies in huge masses; but the other three walls are in good preservation. They are between five and six feet in thickness and built of oyster shells and cement.

In this grove, on the first day of the year 1863, President Lincoln's Emancipation Proclamation was read to a great assemblage of slaves, estimated at 5000 in number; who gathered there from the surrounding country, to listen with mingled joy, surprise, and bewilderment, to that most important document.

"Old and young, and little children,
Deaf and blind, and sick and lame,
In their worn and tattered garments,
Shoeless, halless—in they came—
Just as slavery's ruth had left them,
Trembling, doubting, waiting, sad,
Bewildered,—ever hopeful
For a word to make them glad."

At Beaufort we were most kindly and comfortably accommodated at the house of an old schoolmate of one of our party, who had moved down here during the war to labor among the colored people. The family not only provided for our outward wants, but entered heartily into our concern, and greatly assisted us in the arrangements which were made for holding meetings. Through the help of our host, the way was made easy to visit the island of St. Helena, which lies between Port Royal and the ocean. The population of this island is estimated at more than 5000, of whom only about fifty are whites. It is peculiarly isolated, being approached by but one road, which crosses Ladies' island, and connects with a ferry from Beaufort. This isolation imparts some peculiarity of charac-

ter to the islanders; who look with coolness or suspicion on strangers coming among them, without some apparent motive for their movements. They are an orderly people, having no civil officer among them but one constable. If any one is arrested on a criminal charge, he must be taken to Beaufort, perhaps 10 or 12 miles distant, where the nearest magistrate resides.

This island came into the possession of the United States forces, early in the war; and schools were soon established, which are still kept up. A large portion of the former slaves purchased land, and their thrifty condition is shown by the decided improvement in their houses, and manner of living. During the time of slavery, they were an exceptionally degraded and ignorant body of people; because they were shut out from intercourse with the outside world, and had practically no redress, when exposed to the cruelty of a severe master. We were the guests of Laura M. Towne, a Philadelphia woman; who went there soon after it was taken in possession by the Union troops,—and has since resided on the island. She has made it her permanent abode, and purchased the buildings and one hundred and sixty acres of land on the old Frogmore plantation. Here she makes a home for two other of the women teachers engaged in the schools. She presides over a school of about 170 scholars, where the more advanced pupils from different parts of the island collect. Her own services, as well as those of one of the teachers who resides with her, are altogether gratuitous.

She gave us a most amusing account of her first experience in teaching. It was in the early days of her residence in St. Helena. The teacher then employed was sick; and Laura, who had never tried her powers, was induced to take her place for the day. She entered the room, with about 80 little black things, who looked all alike to her, not one of whose names she knew, and whose language she could not understand. The natural result was a wonderful scene of confusion; children fighting with one another, rolling over the floor, and a general uproar. She compared it to a number of colts let loose together in a yard. A black woman passing by heard the noise, and, comprehending the situation, came to her rescue with a big stick, with which she smote right and left. The children soon slunk to their seats; and then her new assistant wanted the delinquents pointed out, so she might give them a whipping. At this juncture, one of the boys stepped out into the aisle and made a speech with very animated gestures and a wonderful flow of words, not one of which could Laura understand. Her school is now well disciplined and in good order; but she discards corporal punishment. The children generally receive an education, and the influence exerted over them by their teachers has been beneficial. They have a temperance society of 750 members, and it

is considered disreputable to drink whisky among the younger and more cultivated class.

The people are principally Baptists. They have one large brick place of worship, and the congregation claims 2000 members. There is also a small company of Methodists, who meet in a very old building, formerly used by the whites. In addition there are little log or frame buildings scattered over the island, called praise-houses, where the neighbors often meet in the evening for religious exercises.

One cannot dig many feet on any part of the island, without coming to water. Hence the houses are all without cellars; and, wherever they can afford it, elevated a few feet on posts, so as to permit a free circulation of air underneath. This no doubt adds to their healthfulness. The proximity of the water to the surface makes all their graves wet, and explains an expression used by an old colored man, who spoke at a meeting which we attended, of the time when they should be committed to their "watery graves."

The manner in which they clip their words in pronouncing their peculiar idioms of speech, and the native accent, often render it difficult for strangers to understand all that is said. As an illustration of this, we were told of a northern man, who in riding on the island noticed something wrong among the bushes, and inquired of the colored boy who was driving him, what it was. The boy replied, "I ant been a shim, sir." The stranger made him repeat it over and over till he had imprinted it on his memory; and in the evening asked Laura what kind of a thing, "I ant been a shim sir," was. The interpretation of the mystical words was found to be, that the boy had not seen the cause of the movement; the expression, in a less contracted form, being, "I have not been a seeing him, sir;" i. e. "I did not see."

The shouting and modulated movements which were formerly common, and are still somewhat practised among them towards the close of some of their meetings, or after the regular services are ended; are supposed to be a relic of customs which were brought over from Africa. The same explanation is given of a practice which prevails here, when a man marries, of living for the first year at the former home of the bride; and also of the right which the grandmother possesses, to claim the first-born child of her daughter, and bring it up herself. W.

(To be continued.)

From "The British Friend,"
"At Ease in Zion."

Is an easy-going religion—a religion easily acquired, and easily pursued—the religion of our Lord Jesus Christ? His Kingdom suffereth violence, and the violent (the striving) take it by force (strife). To strive for entrance at the "strait gate" is to *agonize* for it. And if the "straitness" of a baptism of repentance for the remission of sin, which belongs to the "baptism of the Holy Ghost and of fire," has not been livingly experienced, so as to raise the cry, "A Saviour, or I die; a Redeemer or I perish for ever," there is but too substantial a ground for the belief, whatever may be our "name to live" or our standing in the church, that we are not members of Christ, and have not yet really entered that fold of which He is both the door and shepherd. There will be no true submission to these purifying operations, as by fire, of the Holy Spirit, no efficient

preparation to endure hardness as good soldiers of Jesus Christ.

In fact, if through religious education and orderly conversation there has been an easy sliding into the visible church, it may become our *world*, as surely as the world of vanity is the sphere of worldly men. Such a place in the outward church may not, indeed, have been obtained by "climbing up some other way" as thieves and robbers, for the doctrine and authority of Christ have not been questioned; but He has not been known as the door—that was found (it may be) after many struggles—by which there was such an "entering in" as is for salvation, and finding pasture. Nothing but an experience in penitential baptism makes Christ so unutterably "precious" that His love constrains to take up the cross daily and follow Him. "There is a necessity," says Rutherford in one of his deep and racy sermons, "for us to go once through the fire. Can our Lord not get a kirk from among the dross, but by fire? No, indeed. Christ plucks his own out of hell, and from among the rest of the world, by fire and sword, as it were by the hair of the head." At the same time, it is to be remembered, that the manner and duration of this baptismal work is widely different amongst true subjects of it.

With some, and not the least experienced of the baptized members of the church, the operation, while effectual, has been so gradual, that there is scarcely the recollection of a time when the Spirit did not strive in the secret of the heart; and certainly there is no ability to assign a date to conversion. But with all, however varied the dealing, who are introduced into the living church of Christ, there must have been the experiences of a process, whether shorter or longer, that has driven out of self-dependence; out of all reliance save in Christ alone, out of every "refuge of lies," and that settles the soul upon Him, who is the refuge of the soul and the rock of its salvation.

Moreover, when such living members of the church are brought out into true liberty, the peace and joy of believing, such a "remembrance of the wormwood and the gall" of conviction for sin, and of the baptism for its remission, continues to attend the spirit, as keeps it broken and lowly. A contrite heart is a reverent heart; and the "much forgiven" while they "love much," approach holy things, still, with penitential awe, as well as humble gratitude. Their tone of mind religiously, is deeper and richer than is found with the superficial in heart-work, how good soever their esteem among men. The recollection of all that preceded the sense of pardon remains lively, "my soul hath it still in remembrance, and is humbled within me!" and the hope of present "acceptance in the beloved" is gently chastened (though by no means neutralized) by bearing about continually the weight of the imputation, "Let him that thinketh he standeth take heed, lest he fall."

WILLIAM BALL.

The cultivation of red clover was introduced into the upper end of Bucks county about 1800, by Isaac Barson, for which he is entitled to the thanks of every farmer. While the field was in bloom it attracted great attention, and people came for miles to look at it, some days the fence around the field being lined with spectators.—*History of Bucks County.*

Captain Ball's Experience, as Related by Himself

"I have had a strange experience," said Captain Ball, speaking with much emotion. "It began about three weeks ago. I had just been making some very good trades; and, one night, I was riding home, reckoning up my gains, and feeling a pride and triumph in what I had got in the world by my own shrewdness and exertions. It was starlight, and very still; I could scarcely hear a noise but field-crickets and the tramp of my horse on dark road, when suddenly a voice said, 'What shall I profit a man if he shall gain the whole world, and lose his own soul?'"

"Was it actually a voice?" I questioned. "No; I knew it wasn't at the time. It was I have no doubt, my own mind; or rather, the voice of the Holy Spirit in the conscience. But the expression was just as distinct and unexpected as if it had been spoken by some person in my ear. I went to talk with my minister. I wanted to go into the church where I thought I should be safe. I had conception of repentance and a change of heart. I supposed our pastor would commence questioning me about doctrines and forth, to let me know what I would have understand and believe before I could become a church member. But he didn't take a such course. He made me go into the hall and sit down in his study, where he talked with me a long time about the blessedness of religion, and its value above all other things of this world, independently of its reward hereafter. Then he said,

"Captain Ball, do you know the first thing requisite to be done, if you would be a Christian?"

"I did not know."

"The Christian life—the life of a faithful follower of Jesus Christ," said he, "can be founded only upon repentance. Now, it is easy to say we repent, but the only repentance that is worth anything is an active repentance—by which I mean not only sorry for sin, and an earnest desire to avoid it in the future, but one that goes to work, and seeks, as far as it is in his power, to make amends for every wrong we have ever done. Is there a person in the world, Captain Ball, who can look you in the face, and say 'I have wronged him?'"

"He knew my weak point," added the captain. "Every man has his weak point, and suppose the lancest man be applied there first. That question was like sharp-screwing steel driven into my soul. I writhed and groaned inwardly, and struggled and perspired a long time before I could answer. I saw it was going to be dreadful hard for me to be a Christian. I meant, however, to get off as easily as I could. So I determined to confess some thing which I suppose was known to everybody who knows me—my horse-trade with Peter Simmons, last spring.

"Did you wrong Peter?" said the minister.

"I shaved him a little," said I.

"How much?" said he. "Tell me honestly what you think."

"I let him have a ring-boned and wire-braced nag that I had physicked up to be pretty gay—worth, for actual service, over ten dollars, and got in return a sound and steady beast worth sixty dollars, a twenty-five dollars to boot. So I honest think," said I, "that I shaved him out about seventy-five dollars."

"And with seventy-five dollars in your

ession belonging to poor Peter Simmons, or think you can commence a life of christianity? Do you think that Christ will your prayers for pardon, with stolen in your pocket?" said the minister.

"I said something about a trade is a trade, men must look out for themselves when swap horses—but he cut me short.

"Your own soul," said he, "will not admit excuses which your selfishness invents." But the rule you apply," said I, "will cut the heads of church members as well as es. There's Deacon Rich; he trades in es, and shaves when he can."

"No matter," said he, "whose head is cut no matter what Deacon Rich does. You to deal with your own soul, and with Lord. And I tell you, whether you are of the church or in it, a single dollar which have unjustly and knowingly taken from man, without rendering him its full value be best of your ability—a single dollar, I will be like a millstone hung upon your to sink your soul into the sea of spiritual b?"

"I couldn't stand that. The Spirit of God those words with terrible effect upon my t. I was greatly agitated. The truth en by the pastor appealed to my understanding with irresistible power. I went y, but I couldn't rest. So I took seventy-dollars, and went to Peter and paid him; ing him promise not to tell anybody, for is ashamed to have it known that I was science-stricken, and had paid back money. Then I went to the minister again, and him what I had done. He didn't praise s I thought he would. He took it as a er of course, and no more merit in me it is to wash my hands before I sit down upper. On the contrary, he seemed to eet that my hands were not quite clean."

"He wanted to know if I had wronged ody else besides Peter. I tried to say ut by my conscience wouldn't let me. I d have told a plumper lie than that once out flinching—yes, and flattered my own t to believe the lie. I was discouraged. t bitterly disheartened. It was, indeed, uch harder being a Christian than I sup- ed, that I regretted going to talk with the ister at all. Like the young man who had at possessions, I was on the point of going y sorrowful. But my heart burned with- e, and I was forced to speak."

"In the way of business," said I, "no doubt- e taken advantage here and there—as ybody does—as church members them- es do, where they can."

"What everybody does is no rule for you me, Captain Ball," said the minister. "It o be Christians in the fullest sense—not- ly to be church members—that we must e with all our hearts. The fact of being he fold does not make the lamb; there are ves in the fold, alas! but we are by no ns justified in doing as the wolves do, even o they appear in sheep's clothing."

"I felt the rebuke." "Well," said I, "there Deacon Rich—I think he paid me a note ce. The first time he paid it we were nsacting other business, and by some mis- e the note wasn't destroyed. I found it ng my papers afterward. I was a good e excited, and lay awake more than one t thinking what I ought to do about it. Deacon was a hard man, I considered, took advantage of people when he could.

He had driven more than one hard bargain with me."

The Deacon, who was present, and heard these allusions to himself, winced and coughed uneasily. Captain Ball went on, without appearing to mind him.

"So," said I to the minister, "I concluded I would serve the Deacon as he would probably have served me under similar circumstances. I kept the note by me a good while, and when I thought the particulars of our settlement had slipped his mind, I said to him one day, maybe he would like to take up that note which had been due then a considerable time. He was surprised—looked excited and angry—said he had paid it, and held out stoutly for a while; but there was the note. There was no proof that it had ever been paid, and finally he took out his pocket-book, and with some pretty hard words, paid it over again, with interest."

"And now," said the minister, "what are you going to do about it?"

"I suppose," said I, "the money must be paid back."

"So I went to the Deacon the next day, told him that, on reflection, I was convinced that he was right and I was wrong about the first payment of the note, and returned the money—one hundred and thirteen dollars—a good deal to his astonishment."

The Deacon coughed, and wiped his forehead.

"I hoped then all was right," continued Captain Ball. "I tried to satisfy my conscience that it was. But I was afraid to go back to the minister, he has such a way of stirring up the conscience and finding mud at the bottom, when we flatter ourselves that because it is out of sight there is no impurity there. And I knew that as long as I dreaded to see the minister, something must be wrong; and on looking carefully into my heart, I found the little matter of a mortgage which I had foreclosed on a poor man, and got away his farm, when he had no suspicion but I would give him time to redeem it. By that means I had got into my possession property worth two thousand dollars, for which I did not actually pay, and for which Isaac Dorr never actually realized more than half that amount. But the proceeding was entirely legal, and so I tried to excuse myself. But my awakened conscience kept saying, 'You have taken a poor man's land without giving him a just return; the law of God condemns you, although the law of man sanctions the wrong. You shall have no peace of soul; your heart will burn you until with justice you wipe out your own injustice to him and to all others whom you have wronged.'"

"Against the decree of my conscience I rebelled a long time. It was hard for me to raise a thousand dollars, together with the interest due from the time the mortgage was foreclosed; and it was like taking a portion of my life to be obliged to subtract so much money from my gains, and give it to a man who had no legal claim upon me. I groaned and mourned over it in secret, and tried to pray; but that mortgage came right up between my prayer and God, and heaven looked dark and frowning through it. At last I could not resist the appeals of conscience any longer, and I went again to the minister. I told him my trouble and asked him what I should do.

"'What is a simple test,' said he. 'Do you

love your neighbor as yourself? If you do you will be just to him, if it takes from you the last dollar you have in the world.'

"That was a terrible sentence. I went out, staggering from it as if I had received a blow. 'Oh God,' I said, 'how can I be a Christian?' But I had help beyond myself, otherwise I could never have ended that struggle. I knelt before God, and solemnly vowed for His sake, for the sake of His pardon and love, I would not only do justly to the poor man I had wronged, but would give up, if need be, all I had in the world, so that I might find peace in Him. A strange, soothing influence came over my soul, and a voice seemed to say, 'Though you lose all you have, God and Christ, and the blessings of a heart pure and at peace, shall be left you—the best and only true source of happiness and life.' And in the solemn night time, after I gave up the struggle, that comfort seemed to me so great and precious, that I felt willing, if it would only stay with me, to accept poverty, and to go into the world poor and despised, hugging that priceless blessing in my heart. The next day I was as light as if I had wings. Nothing could keep me from going to see Isaac Dorr, with a couple of hundred dollars in my pocket, and a note for the remainder of what I owed him.

"Well," said the narrator, with tears running down his cheeks, "I only wish that every person here could have seen the Dorr family when I visited them and made known my errand. Poor Isaac had grown discouraged, and had just made up his mind to quit his wife and children and go to California. His children were crying, and his wife was in an extremity of distress and despair. She received me a great deal better than I anticipated; I had acted according to law, she said, and Isaac, careless and imprudent, was greatly to blame.

"Yes," said Isaac, with the firmness of a desperate man, "it was a savage game you played me, but I was a fool ever to get into debt as I did, and then fancy that any man would not take an advantage when the law permits it. I am ruined in consequence, and here you see this woman and these babes—"

"The poor fellow broke down as he looked at them, and cried like a child.

"Isaac," said I, as soon as I could speak, "I have come to show you that a man can be honest even when the law doesn't compel him to be. I want to do right, because God commands it, and I have come to tell you that you needn't leave your wife and babies yet, unless you prefer to."

"Prefer to—go off into a strange country, and leave them here to suffer," he cried; and he caught the children in his arms, and wrung his wife's hand, and sobbed as if his heart would break.

"Then I counted out the money I had brought, and explained what I intended to do, and gave him the note; and such surprise and happiness I never saw. They would have kissed my feet if I would have let them. It seemed to me as if heaven were opened then and there—and it was opened in my heart, with such a flood of light and joy as I had never experienced, or thought possible before.

"My friends," added the Captain, his once hard voice now almost as mellow as a woman's, his cheeks still moist with tears, "I have been constrained to make this confession; I thank you for listening to it. The

minister tells me a man may be a church member and not a Christian. I mean to be a Christian first, and if I fail—"

He could proceed no further, but sat down with an emotion more effective than any words.

I have nothing to add to his narrative, except that he became a church member, and that his example of thorough repentance, of child-like faith in Christ, and of vigorous, practical, every-day righteousness, elevated many degrees the standard of Christianity among my people.

The Late George Smith.

The discovery of the manner of reading the Persian cuneiform by Grotefend in 1803, and the subsequent decipherment of the Assyrian by the late Dr. Hincks and Sir. H. Rawlinson in 1836, followed by the researches of Edwin Norris, Fox Talbot, and in 1866 by the late George Smith, placed his country in the first rank of this branch of inquiry. He had already attained ten years ago such an eminence in this study that, at the recommendation of Sir H. Rawlinson, he was employed on the Egyptian collections of the Museum, and, from his own powers of decipherment, and from the materials placed at his disposal, rapidly attained to the position of the most advanced Assyriologist in this country. His chief works were a history of the Assyrian monarch Assurbanipal, or Sardanapalus, accompanied by the Assyrian texts and translations, in 1871, and his discovery of Assyrian tablets in the collections of the Museum recounting the Chaldean version of the flood, communicated to the Society of Biblical Archaeology on the 31 of December, 1872, at an evening meeting, at which Gladstone, then Prime Minister, was present. He had already, at the close of 1871, discovered the value of most of the letters of the Cypriote alphabet. G. Smith made three expeditions to Kuoyunjik, the ancient Nineveh, opposite the modern Mosul, 1873-1874 and in 1876—two for the Trustees of the British Museum and the third for the *Daily Telegraph*, and died on his return from the last in the autumn of this year, having secured by purchase about 2,000 tablets and other objects for the national collections. Educated only till his 15th year, and acquainted with no other language than his own and the ancient Assyrian, the admirable penetration, undaunted research, and logical acumen he showed in the interpretation of Assyrian texts entitle him to be considered an instance of self-taught and reliant scholarship rarely found. His premature death, in the 37th year of his age, is a loss to science and a deep affliction to his family; and although the Queen has graciously accorded a pension to his widow sufficient to place her beyond want, the large family he has left behind him requires some additional aid, which will without doubt be accorded by those who admire genius and sympathize with its misfortunes. The tablets obtained and forwarded by his care for the national collection have arrived, and are an additional claim on the consideration of the public. The collections of Babylonian and other antiquities purchased by the late G. Smith at Bagdad have arrived at the British Museum. They consist of about 2,000 objects; among them are the celebrated lion, with the name of the Egyptian Shepherd King Set inscribed on its

breast, some pieces of sculpture, and a great number of clay tablets with inscriptions in Babylonian cuneiform, supposed to be the deeds of a commercial firm which continued from the time of Neriglissar to that of Darius. Some are dated in the reign of Belshazzar, whose name occurs as King for the first time in these cuneiform inscriptions. Some other documents of interest are among the collections.—*London Times*, 11 mo. 20th, 1876.

"A THANKSGIVING."

For the morning's ruddy splendor,
For the noontide's radiant glow;
For the golden smile of sunset,
Flung all his halos;
For flowers, these types of Eden,
That gem the verdant sod,
And seem to ope their petals
To tell us of our God.

They flood the silent wilderness
With beauty and perfume;
They bloom around our pathway,
They blossom on the tomb;
They are alphabets of angels,
Thought written on the sod;
And, if man would read them wisely,
Might lead his soul to God.

For the Spring, with all its promise,
For the Summer's boundless store;
For Autumn's richer treasures,
And the Winter's wilder roar;
For the jorons evening fireside,
By thought and feeling awed;
For the loving hearts around it,
I thank Thee, Oh, my God.

For the memories that enircle
The happy days gone by;
For the holy aspirations
That lift the soul on high;
For the hope in brighter regions,
By seraph footsteps trod,
To meet the lost and good ones,
I thank Thee, O, my God.

WHICH LOVED BEST?

"I love you, mother," said little John;
Then, forgetting his work, his cap went on,
And he was off to the garden swing,
And left her the water and wood to bring.

"I love you, mother," said rosy Nell;
"I love you better than tongue can tell;"
Then she tossed and played fall half the day,
Till her mother rejoiced when she went to play.

"I love you, mother," said little Fian;
"To-day I'll help you all I can;
How glad I am school doesn't keep!"
So she rocked the babe till it fell asleep.

Then, stepping softly, she fetched the broom,
And swept the floor and tidied the room;
Busy and happy all day was she,
Helpful and happy as child could be.

"I love you, mother," again they said—
Three little children going to bed,
How do you think that mother guessed
Which of them really loved her best?

The Growth of the Earth.—In the interesting course of lectures on astronomy which R. A. Proctor has been delivering in the theatre of the Society of Arts, for the especial benefit of young persons, his subject the other evening was "Meteors, Comets and Stars."

In speaking of meteors, he developed at some length the thought, which will strike many as a novelty, that the earth is, has always been, and so long as it shall exist as a part of our cosmoical system must ever continue to be, growing in size. Meteors are bodies, composed of extra-terrene matter, which travel in vast belts and in highly eccen-

tric orbits round the sun. These belts, or tens of meteors, are very numerous, and their orbits intersect that of the earth are brought within the influence of its gravitation, and on entering our atmosphere come luminous and fall to the surface of planet in those periodical showers of shooting stars which are so well known.

Not a night passes in which some fast stars are not seen, and in certain months on particular nights the golden rain is is sent. Of course, too, meteors fall in the time, although unseen. It is computed, the lecturer, that hundreds of thousand these extra-terrene bodies become incited with the earth every twenty-four hours and 400,000,000 in the course of each day. They may vary in weight between a grain and a ton. One is known to have fallen in South America which weighed fifteen tons. Yet these small accretions to the earth's surface would take many millions of years to amount to a single foot to its diameter.

It had been shown that one of these meteoric systems followed in the track of a solar telescopic comet, although not to be confided with its tail, and it was now the general opinion of astronomers that all these belt meteors were similarly related to comets.—*London Times*.

Worldliness.—The following remarks, taken from one of the Journals of the day, are applicable to other religious societies, as well to the Methodists. They are clear and forceful and may well awaken serious thoughtfulness in the minds of many:

"The tendency to build costly churches for the wealthy, while the poor are neglected, springs from the same cause as the tendency to loose church discipline,—Christian morals, and the patronizing of dance and the theatre, as allowable Christian recreations. A conformity to the world's spirit and habits of life, instead of a transformation into the image and spirit of Christ, leads to it all. In times past the Methodists were marked for their protests against worldliness, and the broad distinction they made between manners and habits of life between the professed disciples of Christ, and worldly people. Then their piety had a stern simplicity which might have repelled the carnal, but had immense power over men. Then they dressed plainly, lived abstemiously, built modest meeting houses, abominated the theatre and dance, and labored earnestly and successfully for the salvation of souls. Those were the days of their glory,—days which are fast departing. And with them depart the power of Methodism over men, to compass their salvation. Worldliness and the worldly will applaud the change, and call it improvement; but the godly will lament it as an inevitable loss to the cause of true piety."

Insincerity in Asking Advice.—Nothing less sincere than our manner of asking and giving advice. He who asks advice would seem to have a respectful deference for the opinion of his friend; whilst yet he only aims at getting his own approval of, and his friend responsible for his conduct. On the other hand, he who gives it, repays the confidence supposed to be placed in him, by a seemingly disinterested zeal, whilst he seldom means anything by the advice he gives but his own interest or reputation.—*Roche孚cult.*

For "The Friend."

Political Parties in France.

Hamerton in his book, "Round my fire," gives some account of his efforts to establish a book-club in the part of France he resided. His experience furnishes a curious illustration of the strength of party spirit among the French people; and gives insight into the dominant ideas which mark their political differences. He says: "I began by suggesting the idea to three who belonged to three entirely different parts of society, and each went to work in his own sphere, with so much success, that in a month we had a surprisingly long list of subscribers, when all the three lists added together.

"I drew up a set of rules, very like the rules of such book-clubs in England, when one of my private friends asked where the place was to be established, and who was to be secretary to it. Evidently, we must have come from somewhere for the library, and a man to give the books out, and keep an account, and get the books back again (most full of duties!) from members who kept them indefinitely.

"The most tempting solution was immediately offered by a friend who was also a member, and was no less a personage than the Sub-Prefect. It happened that in the court-yard of the Sub-Prefecture, close to the entrance, there was a neat little building one story high, which served as offices for the clerks. There were several small rooms in this little building, so the Sub-Prefect showed me one room, not occupied, and said, 'Would not you do capitally for the library?—you shall have it for nothing, and we can save the expense of a clerk, for one of my clerks shall take the accounts and deliver and receive them. He has plenty of leisure moments, they may just as well occupy them in this way.'

"Nothing could be more perfectly adapted to the needs of the nascent book-club than this most amiable proposal. The place was delightfully accessible; the building looked clean and nice (it had some pretensions to architecture); then it was close to the gate, none had to be passed through to get at the clerk was there all day; and such a diligent, intelligent, attentive clerk, that we had brought a long time for the like of! 'I will have shelves put all round the room for the books,' said the Sub-Prefect, for as part of my scheme that the books belong to the club were to accumulate and be in a library in time. In my innocence I thought we could at least accept these charming facilities for the first year or two, after which we might set up more independently, if necessary. Another consideration was, that I liked the Sub-Prefect personally. He always been very civil to me, and I did not wish to refuse his amiable proposal. He was certainly one of the most intelligent men in the place, so that there was a certain attraction to the Sub-Prefecture, as when he opened to be at leisure, we went and smoked and chatted together in the garden.

"All this only shows that a foreigner may be for years in a country, and be little better than a fool about it after all.

"In those days we were living under the Emperor Napoleon III. Our Sub-Prefect was a Bonapartist, of course, or he would not have held that official position. Political

reasons had never prevented me from being on friendly terms with any one whose acquaintance I liked to cultivate, and this made me forgetful, for a moment, of the intensity of political hatreds in the country where I now lived. This man and I had never once talked politics together; we had found plenty to talk about in other pursuits or amusements, so that he was not associated with politics in my mind. Not so in the public mind, however. The Legitimists all abominated him as the representative of a low usurper; the Republicans at the same time hated and dreaded him as the instrument of a tyrant who was ready at any time to repress liberty by the most arbitrary exercise of force, ready to cast them into prison or banish them to a deadly climate if they stirred hand or foot in the cause that was dear to them. When political differences are so profound as to reach down to the nature of the government itself, official position does not command respect. In a country where the system of government is settled and accepted, an official is recognized by all as a legally appointed person. In France, under Napoleon, the prefects were respected only by the Bonapartists; the Republicans looked upon them as paid spies; the Legitimists despised them as men who took a share in the booty of a successful thief. Under every French regime the officials are hated by the partisans of the other regimes, and this hatred goes to such a length that men cannot tolerate each other enough to meet as gentlemen on some neutral ground of literature or art. Of course, I knew that a Bonapartist Sub-Prefect would be an object of political animosity to other parties, but I was innocent enough to hope that this animosity might be forgotten in relation to literature. There was my mistake. I accepted the Sub-Prefect's offer, he put a joiner into the room, who soon shewed it round, the clerk opened a new account book for the concerns of the club and I congratulated myself on having concluded a most convenient and inexpensive arrangement.

"Then came the storm! The representative of the Legitimists, who had promised to subscribe (a very ardent Legitimist himself, and appointed agent of Henri V.), at once told me in the most decided manner that neither he nor any other member of his party would ever consent to fetch their books from the Sub-Prefecture, and they all withdrew in the body. Then the representative of the Republican members of the club met me in the street and said, 'It is all over the town that the books are to be kept at the Sub-Prefecture, so all the Republican members have withdrawn their names from the club.' Now there were seventeen Republican members, which in a small country book-club may be considered rather an important contingent. There may have been a dozen Legitimists. The next question was, who remained with us? Had we a remnant strong enough to carry on the scheme? There were a few Bonapartists, and a few men of not very decided political colour who liked to keep well with the authorities. Some books were bought, and the club maintained a precarious existence for perhaps eighteen months, after which it died of inanition. Other subscribers had succeeded my friend the Bonapartist, but I have never sought their assistance for the foundation of any more book-clubs.

"This little history may give some faint idea of the extreme division of French society as a consequence of the events which have agitated the country during the last hundred years. The English reader will no doubt think of his own country, and congratulate himself that Englishmen can meet on the common ground of literature, as cultivated men and gentlemen, without carrying political animosity into everything."

"Speaking of a sitting in the French National Assembly in March, 1872, the *Graphic* said in conclusion: 'We may congratulate ourselves that in the British House of Commons such a scene would be impossible. With us, a member, however unpopular his opinions may be, is sure to receive a patient hearing.' This was curiously put to a practical test in the same month, when Mr. Auberon Herbert supported Sir Charles Dilke's motion for an inquiry into the employment of the Civil List. A German who was present, the London correspondent of the *Allgemeine Zeitung*, said that a large number of honorable members 'formed into a dense group in the background, set up a frightful howling, crowing like cocks, bellowing like cows or oxen, neighing like horses, braying like asses, barking like dogs, and mewling like cats—in short, a whole menagerie seemed to have broken out into a maniacal orgy.'

"Now as we see that the members of this assembly, who sit so high above us, and are an example of manners for our study and imitation, actually bark, bray, neigh, howl, crow, mew, and bellow, when the question of monarchy is touched upon at its extremest outskirts, we ought, I think, to regard Frenchmen with some indulgence if they do not always disguise their sentiments when their monarchial or anti-monarchial feelings are, not merely tickled rather unpleasantly on the outside by asking a question about a Civil List, but wounded to the very quick, and that in the very sorest places."

"You cannot reasonably expect a Republican, whose dearest friends were imprisoned, or exiled, or shot by the agents of Louis Napoleon, to think only of his amiable qualities (they say he could be very amiable in a drawing room.) A Legitimist, on the other hand, remembers the death of Louis XVI.,—rememberers, too, very probably, that his grandmother had her head cut off, or that the family estate was confiscated—so that he does not quite like liberty, equality, and fraternity as understood by the democratic party. The Bonapartists have had much less experience of persecution than either of the other two great parties, and yet they seem always to have dreaded the possibility of a future application of it to themselves. On the whole, it must be admitted that political differences are very serious when society is living in a condition of suppressed civil war, with the recollection of civil war in violent outbreaks, and the anticipation of similar outbreaks in the future."

"How do you know, with certainty, the truth of your religion?" said an inquirer to a humble but faithful disciple. "Just as I know the sun shines," replied the other: "because I see its light and feel its heat." And so there are thousands, competent and faithful witnesses, who know from their own experience the truth of Christianity, because they have

felt in their own hearts and lives its transforming and comforting and sustaining power.

The Society of Friends.

BY H. H. SIMMAN,
AN OUTSIDE VIEW.

This body of Christians, venerable alike for its age and its devotion to moral reforms, has for the last fifteen or twenty years been undergoing a change in some respects, and no little uneasiness is felt as to the result by many of its members.

What may be called the Progressive School, hold that the spirit of entire consecration which was the animating principle of Fox, Penn, and the early Quakers, has long since given place in a large degree, to formalism; that the slow progress they have made as a church, and the heresies that have arisen among them, have resulted from a decline in spiritual life. It is held that the changed circumstances under which we live demand a modification of the usages of two hundred years ago; and that true consistency requires a cheerful acceptance of what God, in His Providence, has shown to be useful as a means of leading men to Christ. Hence revival meetings, in which singing, the anxious seat, and other methods of Christian work have been largely adopted. Many hopeful conversions and much apparent prosperity to the church has been the result.

On the other hand it is held by what may be called the Old School Quakers, that while it is true that the church is in great need of a genuine revival, yet the end will not be secured by such means; that the old landmarks are being departed from; that unworthy members are being received into the church, and that statistics show an actual decline in morals as the result of the new measures.

It is true that on both sides, it is there that in the world's great harvest, the Society of Friends has an important mission. She cannot afford to be slothful or careless, and that a great want of the church is a more earnest, active and aggressive piety.

I cannot but warmly sympathize with those faithful men and women that are laboring to awaken the church to a higher life, are teaching anew the doctrines of holiness as taught by Paul, Fox and Penn, and whose hearts yearn for the perishing multitudes that are outside of the church. But I perceive (or think I do) that there is imminent danger of departing from what has always been the crowning glory of this Society of Friends, viz: that they applied Christianity to all the affairs of life, and if they shall in their zeal for growth and outward prosperity be led to accept a mere emotional and sentimental religion for practical righteousness; if they shall fail to insist on a religion which makes men abhor war and oppression, and which teaches them simplicity and plainness in speech, manners, and dress, if they shall neglect to inculcate simplicity and candor as the essential elements of true spiritual life, and which is utterly inconsistent with the cunning craftiness of lodge secretism, then they will have done incalculable injury to the cause of Christianity.

In the world's great battle we cannot spare the Society of Friends, nor afford to have them forget their distinctive principles. May they have the wisdom of the Lord to direct, *Christian Cynosure.*

Higher Education for Women.

Whatever differences of opinion may exist upon the question of female suffrage, or even upon the less mooted point of woman's employment, there is, at length, an entire unanimity in regard to her right to the best and highest education that her abilities and circumstances will enable her to obtain. In the thirteenth century, the proper education of woman was defined, by a European writer, as "knowing how to pray to God, to love man, to knit and to sew;" and for several centuries, scarcely more than reading, writing and accomplishments were added to the list. Gradually, however, the barriers against her mental improvement have given way, and now each year opens up new and improved methods for her intellectual development. Even the sneer of "blue-stocking" has died away, or if at times feebly echoed by some would-be wit, it falls harmless, having lost its sting. Many of the best colleges in the land have freely opened their doors to women, and we hail the day when, in fact as well as in name, her educational advantages shall be established on as solid a foundation as those of the other sex.

To promote this desirable end, there is nothing so much needed as *thoroughness*. At present, the chief impediment to the higher education of woman is the superficial character of her studies. In the two, three or four years commonly devoted to the higher branches, she is rapidly led through a maze of languages, mathematics, sciences, philosophy, history, literature, and accomplishments that a lifetime would be too short to apprehend. If conscientious, perhaps her health breaks down under the constant strain, and then we hear the cry of the physical incapacity of the sex for mental labor. In any case her mind is left with an inextricable tangle of confused knowledge, which she can neither classify nor remember; and her mental powers, taxed but not disciplined, are unable to cope with subjects of deep thought or of practical importance. Education, to be worthy of the name, necessitates time, labor, patience, system, and those who crave its privileges must pay its price. It is far better to learn a few things thoroughly than many superficially; not only for the worth of the knowledge thus obtained, but still more for the mental development that ensues.

Teachers and friends of education generally are becoming awakened to this need of thorough mental training for our young women, and many judicious plans are being brought into operation to secure it. Perhaps none have been found of greater practical efficacy than that of frequent written examinations, given at short intervals, upon the studies which have previously engaged the attention. These afford so fair, and usually so correct a test of the scholar's real acquaintance with the subject, as to leave no doubt as to her fitness for further advancement. They also afford an equally correct test of the character of the teaching and the wisdom of the plans that have been pursued, thus keeping alive in both pupil and teacher the spirit of improvement, and exposing all superficiality, however brilliant a gloss may have hidden it from view. In many of our best schools, both public and private, this plan is being put into successful operation, and we cannot too highly recommend it in every stage of education.

In 1874, Harvard University offered to women, as a test of culture, written examina-

tions of two grades, preliminary and a final, and promised certificates to successful candidates, stating that they had "passed" or "passed with distinction," or "passed the highest distinction," the prescribed examinations. These were held for the first in Boston, then in Cambridge, New York, Cincinnati. A local committee is now organized in Philadelphia, to co-operate with Harvard, and to offer the same opportunities in the spring of 1878. Neither of the examinations are identical with the entrance examination of the University, or with any given to resident students, but are impregnated as tests of liberal culture, and thenceforth as assurances of proficiency in high and most trustworthy source. It is hoped that many of our young women take advantage of this opportunity, and during the coming year, will prepare themselves to join this class of candidates for literary honors. Whether regarded as a special preparation for teaching, or other literary work, or as a means of purely private mental cultivation, it cannot fail to richly compensate those who are willing to strive earnestly for a thorough education.—*Phila. Ledger.*

Selected for "The Friend"
Samuel Fothergill to John Brazz,
Warrington, 1st mo. 21, 17

I received, about twelve days ago, an anonymous letter, requesting my return there agreeable to the subscription I intend to fix upon this. The author is personal stranger to me; but I am not altogether stranger to the situation described, and I deeply value for instruction and ability direct, agreeably to the mind of Truth, the sympathy I feel on my mind with distressed. Expect not from me an elaborate disquisition into speculative points; for I know from experience, that part must which longs to comprehend more truth, yet the former discoveries are yet disobeyed. The first principles of religion, as I have found are the knowledge of our own weakness, & Almighty sufficiency to supply all defects. Whoever builds on another foundation will be finally disappointed. Thy letter manifests a sense of want; and as thou attends to it, sense, that which gives it, will, in due time supply it; for the Lord our God hears our own. The state of leprosy Naaman has strongly with me on thy account. He was disquieted under his malady, and sought relief, but he had like to have missed it, by attending the means; his pride was piqued at the prophet came not out to work an immediate cure with some visible demonstration power; so that stooping to the simple means of bathing in Jordan was very mortifying to him; he remembered Abana and Pharpar rivers of Damascus, and was willing to believe they were of equal virtue.

But know this assuredly, there is no rivulet capable of cleansing the soul but that which proceeds from under the throne of God—a stream flowing from speculation, or any natural powers can wash out the stain and bring peace to the soul. Deeply and submissively abide with the sacred Minister of the new covenant; if thou art weak, he is strong; and I am, the God of all strength and Truth would not leave thee destitute. Be content to be a child, or thou wilt be a monster; let thy day come upon that which is lofty, and thy cross be taken up to hurtful things, and

ght thou wilt see more light; and until hast been fed from on high with milk a babe, stronger meat or higher dishes would not be good nourishment, but disorder for want of digestion.

God fervently desires thy help; but number with holy trembling, the way to lies through the gates of death. The of all mercy and strength renew effect his visitation to thy soul, and build thee the sure foundation that can never be n.

thy true friend and well-wisher,
SAMUEL FOTHERGILL.

Selected.

ny were the baptisms he passed through, such his faith and allegiance were closely id; but as he endeavored to abide pa- by under the operations of the Divine y, he was not only brought down into lows, but through the mercy and goodness im who is the resurrection and the life, God was preparing him for an important on in His church, he was raised up again of the pit and the bury clay, and his feet pon the rock Christ Jesus, the foundation any generations. It was in this school rned to distinguish the voice of the trueed from the voice of the stranger, and epared to understand the language of pirit unto the churches, and to wait idly upon the Great Head from whom eived the gift of a discerning spirit, and d judgment in things pertaining to the ing of the household of God. * * * He a practical believer in the necessity of e qualification, renewed from season to on, for transacting the affairs of the So- y; and in meetings for discipline, and on- nities, or when otherwise engaged in ervice of Truth, he was weighty and de- vative, seeking for, and relying upon its- ings, as the ground of right judgment in church. * * * Having accustomed him- through life to frequent retirement and ation, he possessed an unflinching source of plation and support in his daily reverent paches before Him, who had been his igh light, his sun and shield in the ighth of his days, and through dedication on, he was now established as a father pillar in the church of Christ.—*Memorial*
Joathan Evans.

THE FRIEND.

FOURTH MONTH 21, 1877.

he Yearly Meeting of Philadelphia as- sessed for the transaction of its business on nd-day, the 16th inst. The number in- andance was large, though there were paratively few from other Yearly Meet- ings. For the first time within the memory y present, the clerk was prevented by- ness from opening the meeting. In- vitation was given, that in accordance with provision of the Discipline in such a case, and had been appointed by the Meeting Sufferings to arrange the reports and srs to come before the Yearly Meeting, so s its business might not be delayed. The er Assistant Clerk, Clarkson Sheppard, appointed to act as Clerk till the Repre- natives made their report as usual; and a nd was named to assist him.

During the season of waiting on the Lord, which preceded the commencement of busi- ness, a covering of solemnity and exercise was graciously vouchsafed; and some earnest desires were briefly expressed that we might individually so dwell under that covering as to experience Divine help and preservation.

Three only of the Representatives were absent—and for these satisfactory excuses were given.

After the opening business, the minutes of the Meeting for Sufferings, which were quite long, were read. They showed that many concerns had claimed attention during the past year. The occurrence of the Centennial Exhibition at Philadelphia last summer, and the strong effort then made to open the gates to the public on the First-day of the week, had led the Meeting for Sufferings to draw up an Appeal for the observance of that day, which had been widely circulated. Eighty thousand copies in English and twenty thou- sand in German had been printed. In this Appeal, any superstitious regard to one day of the week as more holy than another was dis- claimed; but the propriety, advantage and duty of setting apart such a portion of time for religious observances and for rest, was enforced and sustained by solid argument. It is believed that its publication was timely. It has been noticed with terms of approval by several of the religious periodicals of the day.

The attention of the Meeting had been called to an effort made in the Legislature of Pennsylvania to repeal the law which prohibits horse-racing, so far as relates to Agri- cultural fairs, or to trials of speed under the auspices of certain incorporated companies. Believing that the proposed measure would open the door to a further influx of vice and immorality, a Committee was set apart, who visited Harrisburg, and had an interview with the Committee of the House to whom the bill had been referred. Their remarks were listened to with respect; and while they were still present, it was decided, unanimously, to report the bill with a negative recommenda- tion. The session closed without its becoming a law.

A communication had been received from the executors of Henry Mosher respecting the bequest of \$10,000, left by him to Philadel- phia Yearly Meeting for the distribution of the writings of Friends. To this a reply was sent—that when the subject was first laid before the Yearly Meeting, it had decided to accept the trust, if the executors should pay over the amount—that the executors them- selves were the proper persons to decide any questions which might be raised under the will—and that it was not within the duties entrusted to the Meeting for Sufferings to take any action in the case.

When a person consents to act as an executor of a will, he assumes the responsibility of carrying out its provisions; and it would be an unusual and unsafe proceeding for him to act on the advice and judgment of the beneficiaries themselves. We have no doubt, that it was the intention of H. Mosher that \$10,000 of his estate should be placed under the care of Philadelphia Yearly Meeting of Friends; and that there is no other body, but that which is holding its sessions in the house on Arch street, Philadelphia, during the present week, that can possibly claim to be the meet-

ing intended. Yet this is a point of which the executors of his will must satisfy them- selves before they can safely relieve themselves of the charge they have undertaken; especially, as there is nothing in the will, so far as we know, which requires any Meeting to prove its claim to the funds in question.

The Trustees of the Charleston Meeting-house property, procured, a year ago, an act of the South Carolina Legislature authorizing the application of funds in their hands to the erection or repair of meeting-houses of Friends in any part of the United States. An appropriation of \$500 from this fund had been recommended by the Trustees, and approved by the Meeting for Sufferings, to aid in paying for a meeting house recently erected at Barnesville, Ohio.

A new circular had been prepared and adopted, for the guidance of the Friends who have charge of paying the travelling expenses of Friends attending Philadelphia Yearly Meeting and other services of the Society. The funds at their disposal arose out of the sale of a lot of ground left by that valuable minister, John Pemberton, for the pasture of Friends' horses, and which came into the possession of the Society after the decease of his wife. The altered situation of things at that time prevented its being used as originally designed; and by authority of the Legisla- ture, the ground was sold, and the interest of the proceeds used for "like purposes." The income is about \$1000 a year, and is principally expended in paying the railroad fares of Friends from distant parts of the Yearly Meeting, who attend our Yearly Meeting, Philadelphia Quarterly Meeting, and the Meeting for Sufferings; or who have occasion to leave home on committees of either of those bodies. It was stated, that during the past year the expenditures had more than equalled the receipts.

The report of the Book Committee showed an unusually large distribution of books during the year—amounting in all to 5936 volumes and 67,538 pamphlets. Of these, 62,000 pamphlets, principally The Appeal for the Observance of the First Day of the Week, and the Tract on Theatrical Amusements and Horse Racing, had been donated to "The Philadel- phia Tract and Mission Society." The remainder had been widely scattered over various parts of the United States; and some had been sent to England, Italy and S. America. Several hundred volumes had been given to colored persons in the Southern States, principally to those officiating as ministers to the different congregations. A large number had been sent to Friends and others in the Western States.

There had been added to the sets of stereo- type plates belonging to the Yearly Meeting, Isaac Pennington's Letters, Life of John Roberts, Epistle of the Yearly Meeting of 1876, Mary Brook on Silent Waiting, Life of Richard Jordan, Bevans' View of Christian Religion, Appeal for the Observance of the First Day of the Week, and Biographical Sketch of William Penn. The plates of "Friends in the Seventeenth Century" had also been presented to the Yearly Meeting, by the author.

The total expenditure for books, stereotype plates, &c., for the year had been \$3,828 22; of which, part was received from books sold and from the income of sundry funds, and the balance, \$1972, was paid out of the general fund of the Yearly Meeting.

The number of copies of books printed was 6250, and of pamphlets 116,000.

The Book Committee had received many expressions of thankfulness and appreciation for the works which had been thus widely circulated. One person, writing from Texas, said of a copy of Barclay's Apology which had been given him, "It has recalled me to things, once of momentous interest to me, but unhappily lost in the cares of life. It has been of great pleasure and profit to me." Another refers to the religious writings that had previously been in his possession, and adds, "They are of little account, compared to the writings of Fox, Barclay, Pennington and others. With these come deeper and more intense longings for a larger measure of the Holy Spirit." A colored teacher in a large public school at the South, to whom a few books had been sent, remarks, "The three first propositions of Barclay's Apology have satisfied me as to the merits of the book. I say honestly, that I would not now part with them under any consideration. For I have never seen anything which so nearly accords with my views on the subject of a spiritual religion, or the immediate presence of God's Spirit with His church."

Satisfaction was expressed in the Yearly Meeting with the labors which had been thus detailed, and encouragement given to persevere in attending to whatever openings for service, in the line of its duties, might present to the Meeting for Sufferings. Reference was made to the increasing openness to receive and read the approved writings of Friends; and to the inquiry, among other professors, for more spiritual views of religion. An exercise spread over the meeting, that our members might individually exemplify in their lives and daily walk among men, the blessed effects of the doctrines we profess, so that others, seeing our good works, might glorify our Father who is in Heaven. Such books as the Life of John Woolman and of Thomas Shillitoe were spoken of; and the desire expressed, that we might live, as those Friends did, in the obedience of faith.

The harmony of exercise which prevailed was very grateful to the feelings of many. After appointing a committee to examine the Treasurer's account, the meeting adjourned, with thankfulness for the favors vouchsafed.

It was particularly satisfactory, that the members of other Yearly Meetings, whose voices were heard among us, were prepared to enter into sympathy and unity with the concerns that arose; and were preserved from being made instruments of unsettlement and trouble.

We propose giving an account of the remaining sittings, in our next number.

SUMMARY OF EVENTS.

UNITED STATES.—The United States troops were withdrawn from the State House in Columbia, S. C., on the 10th inst., and Chamberlain issued an address announcing his abandonment of the contest for the governorship. His private secretary was instructed to deliver up the executive office to Governor Hampton on the following day.

The law relative to appointments in the Treasury Department provides that they shall be so arranged as to be really distributed among the several States and Territories and District of Columbia according to population. It is announced that Secretary Sherman will rigorously enforce this law, and that under it those at present he no appointments from New England, New York, Pennsylvania, Ohio, Maryland, Delaware, Virginia, West Virginia and the District of Columbia.

The Secretary will insist also that only one member of a family shall be employed in the Treasury Department.

The Southern Hotel, in St. Louis, was destroyed by fire on the morning of the 11th inst. A considerable number of the lodgers perished in the flames. Estimated loss on the hotel \$720,000.

A severe gale and rain-storm prevailed at Charleston, and throughout South Carolina, on the 13th inst. Considerable damage was done to the wharves at Charleston, and a larger portion of the city was flooded.

A clipper ship recently sailed from New York with 262 passengers for Australia. The emigrants include 56 married couples, 172 single men, 8 single women, and 70 children.

An English steamer has sailed from New York for New Haven, Conn., where she will load a cargo of munitions of war for the Turkish Government. This will make the seventh cargo of war material taken from this country to Turkey.

A bill passed at the last session of Congress, contains an appropriation of \$25,000 for a survey of the Mississippi and its tributaries, with a view of determining the proper method of reclaiming the alluvial lands of the Delta of the river. The Chief of the Engineer Corps has given directions for the expenditure of this money for surveys, with a view to the construction of levees.

The Markets, &c.—The following were the quotations on the 14th inst. *New York*.—Superfine flour, 26.60 a \$7.00; State, extra and fancy, 27.30 a 27.75; finer brands, 28.00 a 28.50. No. 2 Chicago spring wheat, 21.75 a 22.00. No. 3 Chicago do, 21.50 a 21.75. No. 1, 21.82 a 21.90. Yellow corn, 62 a 65 cts. Oats, 45 a 58 cts. *Philadelphia*.—American gold, 104½. U. S. sixes, 118½, 112½; do, 1867, 112½; do, five per cents, 111½; U. S. 4½ per cents, 108. *Uplands and New Orleans*.—Cotton, 14 a 14½ cts. Flour, \$5 a \$16.50. *Pennsylvania*.—Red wheat, \$1.92 a \$2.06; do, amber, \$1.98 a \$2.12; white, \$2.05 a 2.10. No. 3, 21.50 a 21.75. No. 2, 21.82 a 21.90. Oats, 46 a 58 cts. *Choice New York City*.—Choice, 15½ a 16 cts.; western, 14½ a 15 cts. *Chicago*.—No. 1 spring wheat, \$1.49; No. 2, 1.41; No. 3, \$1.30. Corn, 48 cts. Oats, 35½ cts. Rye, 76 a 77 cts. *London*.—S. Louis, \$8 a \$2 red fall wheat, \$1.71; No. 2, \$1.65; No. 3, 2½ cent. *Calcutta*.—No. 2, 21.82 a 21.90. Red wheat, \$1.70 a \$1.80. Corn, 46 a 48 cts. Oats, 39 a 43 cts. *Lard*, 10½ cts.

EUROPE.—The danger of an early commencement of hostilities between Russia and Turkey is increasing. The Turkish Chamber of Deputies has finally rejected the demand for an armistice for a year or 18 months.

A despatch from Constantinople to the Telegraph Company says, the Turkish Senate has not confirmed the Deputies' rejection of Montenegro's demands, but has decided to leave the settlement of the question to the Government.

The Voyage Lord Derby's reservation on signing the protocol has been misinterpreted at Constantinople. Lord Derby has since written to Constantinople categorically declaring that the Porte must in no way rely upon England.

An Imperial order grants leave of absence to Prince Bismarck until the 8th inst. Hoffmann, President of the Imperial Council, will take his place in the absence of the Duke of Saxe-Coburg in the Department of Foreign Affairs, and Camphausen will represent him in the Prussian Cabinet.

Business on the London Stock Exchange is very dull. Turkish bonds are lower than at any time since the debarment of Sultan Abdul Aziz, last Fifth month.

The United States Fish Commission has decided to maintain its independence and not to amalgamate with the Anglo-American Company.

A telegram from Halifax reports the capture of a whale, 96 feet in length, at Schooner Pond, Cape Breton. It was driven ashore by ice.

The Chancellor of the Exchequer has informed the House of Commons that there is an actual surplus revenue for this year of £443,000. No addition to or remission of taxation is proposed.

Renter's Constantinople dispatch says the Montenegrin delegates had a final interview with Selvet Pasha, who declared that the Porte rejected their demands. Subsequently the Grand Vizier telegraphed Prince Nicholas that the armistice had ended and would not be prolonged.

Hostilities have broken out between the Turks and the Christians in population of Albania, near Sutarri. In the House of Lords, the Porte's circular in reply that the proposed was laid on the table. Lord Derby said that he would not vote in support of a satisfactory character, or that it would lead to a peaceful settlement.

It is announced that on the 1st of the 5th mo, next,

the tariff on the Atlantic cables will be three per cent. per word.

Lord Derby, in a despatch to the British Mission Constantinople, dated the 12th inst., says that he did not see what further steps England could take in war, which appeared inevitable.

WEST-MON BOARDING SCHOOL.

THE SEVENTH SESSION will commence on *Saturday the 20th of Fourth month.*

In order to avoid delay in the classification of the School, all new scholars should be present on *Monday*, that they may be examined and assigned appropriate classes; and the *old* scholars show on that day, or not later than *Thursday* evening it is expected that the regular recitations will commence on *Thursday* morning.

Pupils who have been regularly entered and by the care from Philadelphia, can obtain tickets from the West Chester and Philadelphia R. R. corner of Thirty-first and Chestnut streets, by their names to the Ticket-agent there, who is furnished with a list of the pupils for that purpose. In the passage, including the stage fare from the R. R. Station, will be charged at the School, to be paid with the other incidental charges at the close term. Tickets can also be procured of the Ticket-agent at the R. R. Station. Conveyances will be at the R. R. Station on *Saturday* and *Sunday* mornings, the 30th and 1st prox. to meet the trains that leave Philadelphia at 7.50 and 10 A. M., and at 12.30 and 2.30 P. M.

Baggage may be left either at Thirty-first and Chestnut streets or at Eighteenth and Market. If the latter place, it must be put under the care of Alexander & Son, who will convey it thence to Thirty-first and Chestnut at a charge of 10 cents per ton to be paid to them. Those who prefer can have the baggage sent for to any place in the built-up part of the City, by sending word on the day previous (thor' post-office or otherwise) to H. Alexander & Son, corner of 18th and Market Sts. Their charge is 25 cents per ton for baggage to be taken to the streets, will be 25 cents per ton. For the same they will also collect baggage from the other roads, if the checks are left at their office, on 18th and Market Sts. Baggage put under their care properly marked, will not require any attention the owners, either at the West Philadelphia depot or at the R. R. Station, but will be forwarded to the School. It may always be returned to the owner, but it will go on the *same* day, per the notice to H. Alexander & Son reaches 11 o'clock.

DURING THE SESSION, Passengers for the School meet at the Street Road Station, on the arrival of the first train from the City, every day except First and small packages for the pupils, if left at the Book Store, No. 301 Arch street, will be forwarded every Sixth-day at 12 o'clock, and the expense of it in their bills.

Fourth month 17th, 1877.

FRIENDS' SELECT SCHOOLS.

A suitably qualified Friend is wanted as Prince the Boys' Select School, at the opening of the term the Ninth month. Application may be made to Joseph S. Elkinton, 331 South Fifth St.

Edward Mark, 127 South Fifth St.
James Smalley, 415 Market St.
George J. Scattergood, 413 Spruce St.

FRIENDS' ASYLUM FOR THE INSAN
New Frankford, (Twenty-third Ward), Philadelphia
Physician and Superintendent—JOSHUA H. W. INGTON, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board of Managers.

DIED, at the residence of his son, Lewis Passmore London Britain township, Chester Co., Pa., on the 10th mo, 1876, GEORGE S. PASSMORE, in the year of his age, a member of New Garden Mo. Meeting.

On the 4th of 2nd month last, at the residence of his son, William C. Sheppard, near Salem, Jersey, CHARLES SHEPPARD, in the 79th year of age, a member of Salem Monthly Meeting of Fri New Jersey.

WILLIAM H. PALE, PRINTER,

No. 422 Walnut Street.

Experiments with various Fertilizers at the Bussey Institution.

Trials of Various Fertilizers upon the Field of the Bussey Institution" of Har-University, by Professor F. H. Storer, such more elaborate, accurate, and useful any other field experiments ever ated in this country, and will, if continued, in these respects all European ones ex-hose of Lawes and Gilbert at Rotham- in England.

The motive of these experiments has been determine, if possible, what kinds of fer- rous, among those ordinarily obtainable in on, are best fitted to increase the yield of grown upon a field that had been chosen typical representative of the thin, light, ty soils which so frequently overlie the dly drift in New England." The plan en to divide the field into plots, and to upon them dif-ferent crops with different s of manure, repeating the same crop on ame plot, with the same manure, year year. Three kinds of crops—barley, e, and ruta-baga—were grown. Yard stable manure, muck, fish scraps, lime, meal, superphosphates, salts of ammonia, b and soda, and other fertilizers were either singly or in combination with other. The experiments were com- ed in 1871, and reports for four years -4) are now issued.

Idea of the magnitude of the work may be obtained from the fact that some 285 ex- perimental plots, each five meters (=about od) square, have been cultivated, some g the whole, and others for part of this

The experimental crops suffered some- from the casualties to which crops in ral are exposed, such as heavy rains, deprivations of animals, failure from eed, and particularly from drought. The ification of the experiments through a series ars, however, served to make up for the rances from these causes, so that the ral results are, on the whole, quite con- ve and reliable. The conclusions apply, rse, to such soils as that of the experi- al field, and only in a more limited de- to others.

one respect, however, these experiments a very great value. Most of the investi- ons upon which the accepted theories of ural science are founded have been e in Europe, where circumstances obtain,

in many respects, different from our own. And so long as we depend entirely upon re- sults of European experience to guide our practice, we shall run the risk of falling into error. A number of illustrations of this truth are brought out by these experiments of Storer.

In the experiments described above it was found that potassic manures yielded the best crops, while phosphates and nitrogenous ma- nures did but little good, and in some cases positive harm. The largest crops were ob- tained with farm and city stable-manure, and with wood ashes. Nitrate, sulphate, and car- bonate of potash (pearlash) likewise brought large returns. In a summary of comparative results, wood-ashes proved more efficacious than any other single fertilizer, the yield being larger than with either yard or stable manure.

Professor Storer concludes that the soil needed potash rather than phosphoric acid or nitro- gen. "The addition of potassic ma- nures to the soil manifestly enables the crops to make use of a certain store of phosphoric acid and nitrogen that the land contains. It is clearly shown, moreover, that the amount of available potash in the soil must be very small, since neither the phosphatic nor the nitrogenous manures by themselves, nor mix- tures of the two, such as several of the so- called superphosphates are known to be, could enable the crops to get enough potash from the soil to keep them from starving after the first year." And further, "It is plain that the soil of this field, like those of thousands in New England, needs fertilizers that are rich in potash, and that, under the existing condition of things, no advantage can be gained by applying mere phosphatic and ni- trogenous fertilizers to the land. . . . If only potash enough be given to this soil, the latter can of itself supply all the other ingredients that compose the food of plants, at least for the term of years during which the experi- ments lasted, and for as many more, of course, as the store of phosphates and nitrogen may hold out. . . . The crying want of the land is for potash, and potassic manures should be applied to it to the well-nigh complete exclusion of all other fertilizers until an equi- librium can be reached."

Besides the results of his own experiments, Professor Storer finds proof of the lack of potash in New England soils in the common impressions and practice of farmers. Good farmers about Boston maintain that wood-ashes and the so-called "long" horse-manure from city stables, which contains a good deal of straw, are worth more than night-soil and Peruvian guano. These all, except the ashes, are rich in nitrogen, and all contain phos- phoric acid. The night-soil, and particularly the guano, a good deal. But the night-soil and guano are poor, and the ashes and straw horse-manure rich in potash. The fact, then, that on soils in the district near that of the

experiments ordinary practice shows the long horse-manure and ashes to be more useful than guano and night-soil is an additional proof of the lack of potash in these soils. The guano and night-soil, with their large supplies of available nitrogen, would temporarily stimu- late the growth of plants, but the result would be a speedy exhaustion. That is to say, these fertilizers would enable the plants to make speedy use of the small amount of available potash in the soil; but thereafter, until the potash was re-supplied, a large yield would be impossible.

The widely prevalent opinion that, in nearly all cases, nitrogen and phosphoric acid are the only important ingredients of commercial manures is of essentially transatlantic origin. In European practice, the lack of phosphoric acid and nitrogen has been felt more than that of potash. Mr. Lawes, who, with Dr. Gilbert, has conducted the famous experi- ments at Rothamsted, England, states that "the only two substances really required in artificial manures are, first, nitrogen; second, phosphoric acid;" and that "potash is generally found in sufficient quantities in soils, and the artificial supply is not required." This opinion is evidently based upon his own ex- perience and observations on the other side of the Atlantic. In England and on the con- tinent of Europe the great bulk of commer- cial fertilizers are bought for the phosphoric acid and nitrogen they contain, though in Germany, especially, potash salts are coming into very general use.

As Professor Storer points out, the circum- stances affecting the amounts of plant-food in the soil in New England have been different from those in Europe. Here grass and forage crops, with very little grain, make up the chief produce of the soil. But little dung has been applied, nor has the custom of re- turning straw to the soil ever prevailed as in Europe. Clearing land by burning wood has probably aided the exhaustion. No doubt other matters besides potash have been removed from the land by these practices, nor that, in many instances, phosphates are needed also; but the evidence would seem to show that, in the present case, the supply of potash originally contained in the land has given out first. It is no great matter of sur- prise that this thing should have occurred in a country mainly devoted to grazing and the growth of forage. If New England had been a grain-growing country, phosphoric acid might perhaps have been its weakest point.

In the field experiments of Lawes and Gil- bert, in England, alongside of heavy crops that have been raised, year after year, on manured plots of land, smaller yet not inconsiderable yields had been obtained in suc- cessive croppings, on similar plots, without ma- nure. This has served to bring out very forcibly the fact that soils have a certain capa- bility of re-supplying the plant-food removed in cropping by the working over of materials

present in greater or less quantity in every soil, into forms fit for the nourishment of the plant. To this restoring power the term "natural strength" has been applied.

In Storer's experiments, crops of some, though limited, size were obtained without manure. By adding moderate quantities of appropriate manure a much greater yield was obtained. But an increase in the manure above this amount was not followed by a corresponding increase of crop. Very heavy manuring was not economical.

In the causes of this are to be found some principles of great practical importance.

From the fact that only very small crops were obtained without manure, Storer concluded that the natural strength of his soil, in the sense above referred to, is not great.

But there is another sense in which this term may be used, and another condition of the capability of a soil for producing crops, besides its capacity for working over into available forms the stores of plant food it may contain. It is important that it should be able to utilize, economically, the manure it receives. And this latter is an important factor of the natural capability of a soil.—*Annual Record of Science and Industry, 1875.*

For "The Friend,"

Notes of a Southern Visit.

(Continued from page 282.)

The annual meeting of the ministers belonging to the South Georgia division of the African Methodist Church, was held the present year at Bainbridge, near the south-western corner of the State. Even before leaving home, drawings had been felt towards this body of people; and though there was some shrinking when at Beaufort from taking such a long journey, involving time, expense, and about 600 miles of additional travel; yet when favored to attain a state of true submission to the Divine will, the light again and again shone in that direction.

After leaving our kind friends at Beaufort, and carrying one night at Savannah on our way; we took the cars at the latter place, intending to stop at one or two places. The day train, in which we left Savannah, went no farther towards our ultimate point, than the station where the cars diverge to Florida. From that place onward, the journey must be made in the night; and a delay of some hours is unavoidable. We selected Blackshear as our first stopping place, chiefly because the night train passed there about 10 P. M., which seemed a suitable hour to commence a night journey. After dinner, we walked out to view the place; and finding a meeting of colored people would be held in the evening, believed it would be right to go to it. The heat of the sun was oppressive; and it was with a sense of weariness and physical weakness, that the meeting was attended. It proved to be a relieving season, in which the light of the Lord's countenance was lifted up; and we came away refreshed in body and mind.

At Thomaston we again left the cars, and remained over First-day. (1st mo. 21st.) holding two meetings there. On Second day morning, an early train took us to Bainbridge, where the Conference was meeting. The Bishop, J. P. Campbell, received us very kindly and cordially, and spoke to those assembled in very eulogistic terms of the Society of Friends, with whom he had been acquainted for fifty years, as a body of people

who always opposed war, but were always ready to mitigate the evils inflicted by that scourge of mankind. He referred also to their long-continued kindness to his race, saying he had himself known of many cases in which it had been extended. His remarks were quite eloquent.

The way opened to make some observations; exhorting them to place their dependence on the Lord, and to keep in view the true source of all Gospel ministry. There was reason to believe that in the dark times of slavery, the Lord had raised up from the ignorant and unlearned among them, those whom he had enlightened by his Holy Spirit, and whom he had made living witnesses to point to others the way of salvation. There was a danger now, when literary education was opened to their people, and the opportunities for acquiring it eagerly embraced, that some might depend too much on it in the work of the ministry. The call to be a minister of the Gospel must come from the Lord; and the ministry itself could only be exercised in the ability which He gives. For though a man of talent might compose eloquent sermons, yet if they lacked the Divine anointing, they could not be of any spiritual benefit to the people. Reference was also made to the distribution of some tracts and a few books among the people they represented.

What was said to them was received with evident marks of approbation; and the offer of books and tracts was thankfully accepted. The Bishop recommended the publications of Friends, as reading matter which they might receive and use with all confidence, and arrangements were speedily settled as to the method of their distribution. We left the room with light hearts, feeling at liberty to turn our faces homeward.

The southern part of Georgia is principally a sandy, pine country, with a soil of only moderate fertility. In passing through it, one of the principal vegetable peculiarities we noticed, was the great abundance of the dwarf palmetto, which in many places seemed almost to cover the ground. Our homeward route was via Mason and Atlanta; and we observed the more rolling character of the country, and change of soil from sand to red clay, as we receded from the sea, and attained greater elevation above its level.

We passed in sight of the stockade that formed the famous prison enclosure of Andersonville—a place where so many thousands of the Union prisoners died from exposure, hardship and neglect—a place which will ever be associated with sad memories in the hearts of many who there lost relatives or friends. That such scenes as Andersonville witnessed, should be possible in a Christian country, is a proof of the wickedness of war; which has been truly described as a reversal of all the principles of morality.

Some of the isolated mountains in view from the railroad, are very interesting objects. Among these is Stone mountain, north-east of Atlanta, with a beautiful dome-shaped summit; and King's mountain on the southern border of North Carolina, more irregular in its outline, but standing out in view with much distinctness. On its top, a battle was fought during the war of the Revolution.

A rapid railroad passage through central North Carolina gave no opportunity for mingling with Friends there—a privilege which would have been gladly embraced, if way had

opened for it. A close look-out at the stations, near which Friends reside, if discover any who could be recognized as members of our Society; though it is possible such may have been seen, and not be from not wearing the plain dress.

When we left southern Georgia, the fields there were ploughing the fields, early; work had been performed, beets and other vegetables were above ground, arquils were in bloom in the yards. We rode home, to find the ground frozen and covered with snow.

For "The F"

Random Notes of Travel in Europe.

(From St.

(Continued from page 275.)

Trossach and Loch Katrine.—From St. by rail, to Callander, at the foot of Ben A. short distance above the bridge at the place, the waters from Loch Venachar Lubnaig meet and form several picturesque islands, one of which is used as the bar place of the Baehanans. It is said that Gaelic is the prevailing language of this district, though English is spoken tolerably well, a strong provincial accent. The usual employments of the people are carting wool, and wood, to the Lowlands, and bringing back coals, and a few of the luxuries to the Highlands; providing accommodation for tourists also brings occupation to others.

As many passengers left the railwayriages for the Trossachs, a general resort ensued to obtain seats in the coaches wply between Callander and the former p. There were sixteen on ours; the seats ejected over the wheels, and we were peralot in the air, in rather an uncomfortable fashion. Had we known what awaited it would have been much better to have taken a private conveyance. Our fellow-travellers were generally English tourists, out for holiday. A quaint Chinese poem says,

"That in London about the period of the ninth mo. The inhabitants delight in travelling to a distant land. They change their abodes and betake themselves to the country,

Visiting their friends in their rural retreats."

Our companions had no intentions, apparently, of a social character; enough of rural forest lay around and before us all for present. As we rode along the banks of Teith, the scenery became every moment more grand and wild. High rugged mountains closed around us, then receded, leaving wider valley for the windings of road a stream; small meadows and richly wooded knolls, with here and there a Highland cottage, gave a softened beauty to the scene.

Our coachman did not allow us to forget that we were on classic ground, and seem to consider it part of his vocation to dole out small portions of the "Lady of the Lake" to the passengers, as occasion presented; and as proceeded he announced in lugubrious notes that—

"This is Coliantogle ford,
And thou must keep thee with thy sword."

At length we came where stern and steep
The hill sinks down upon the deep,
Here Venachar in silver flows,
There ridge on ridge Ben Ledi rose,
Ever the hollow path twined on
Beneath steep bank and threatening stone."

Loch Venachar is not more than five miles long, but very beautiful notwithstanding its tiny proportions, with Ben Ledi rising in

ly three thousand feet above it, and the Scotch mountains we saw, wear purple bloom upon the summit; whether the color of the rock or from masses of purple bloom we could not tell. This lovely scene was coming into blossom, bestowing an site grace on rock and moorland. Then Loch Achray and the Brig of Turk, and our coachman remembered

That nearer was the copsewood grey,
That waded and went on Loch Achray,
And mingled with the pine trees blue,
On the bold cliffs of Ben Venue."

And when the Brig of Turk was won,
The foremost horseman rode alone."

Each of life has been thrown, by the poem,
These quiet scenes, that we almost cease
To think

"The hunter and the deer a shade,"

er resting awhile, and lurching at the which stands near the entrance of the arches, we took our seats on another coach, but this time with a great decrease in number of passengers, as many preferred to walk through the defile which leads to Katrine. How much did I regret not having joined one of the walking parties, for found afterwards that there was time to have loitered by the way. "Here time embalmed the air,—hawthorn and mingled there." Gay groups passed us hands filled with blue harebells and the rose, and "creeping shrubs of thousand" of which we eventually obtained a at the landing place.

I did not about the Trossachs: I do not in this celebrated pass quite so "grand and peculiar" as the poet thought it. Probably for the reason that our own northern States, has so many mountain passes, and are far more wild and precipitous than I imagine there are deeper depths, however, than those we saw, for Scott told us until the present road was completed, there was no mode of issuing therefrom except by a ladder composed of the branches of roots of trees.

As we were on board the steambot which crosses Loch Katrine; and our passengers, the boat was crowded, were rushing to see "Ben Isle," which lies like an emerald on water—where "weeping birch and willow, and their long fingers swept the sand," or saw themselves reflected in the waters of this loveliest of Highland mir-

The day was like many which had added it, if not absolutely without clouds, enough remained to ascertain their claims of supremacy of beauty in the upper deep, were now in the heart of the Highlands, on the lake which derives its name from wild robbers who once haunted its shores. I had a long time to wait at the Stronacherr Inn, few of us wishing to enter it, while could watch the changing hues on lake mountain. A piper brought out his bagpipes to entertain those who remained; but I thought the droning of his time-honored instrument too great an infliction to be patiently endured. At length the coaches ap- peared, and all who were bound for Invers- ardy, including ourselves, were soon singly seated among the cushions on top, and were to enjoy the short drive of five miles to the country to Loch Lomond. So we were and gave a parting glance at this High- land, in its summer setting of green and

gold, mentally repeating with Roderick Dhu, "Tis the last time, 'tis the last."

Our road became quite steep as we descend- ed the hill not far from the Inversnaid Hotel. Two days before the coach had been over- turned here, and some of the passengers rolled over the precipice next to the lake, but none were seriously injured. A few minutes later and we had passed the wood on our right, and this queen of Highland Lochs lay before us, glowing beneath the warm tints of a rich sun- set, which deepened the blush on the forehead of Ben Voirlach on the opposite side, and tinged the white spray of the beautiful falls near the Inn. It seemed impossible to leave all this at once, and go on board the little steamer lying at the small wharf, so we concluded to remain until the next morning.

Just as I was needing rest, I wandered out alone for a walk. The air was deliciously cool and invigorating, and fragrant with the smell of the resinous trees which bordered the path along the hill-side. Budding heather lay at my feet, opening into a rosy bloom where it could catch the sunbeams, and paling beneath the dark shadows of the pines. Up, and up, my path led me: away, far away, from the sun and its surroundings—not a sound could be heard—suddenly my path ended, a small field lay before me, covered with long grass of vivid green, such as we see among mountains only, and at the upper side of this was a low, tiny cottage: Yes! a veritable Highland home, hidden away among the firs and birches, just such a one as we had caught glimpses of ever since we had been among the lakes, and I had longed to explore. It was built of large grey stones, undressed, and laid together without mortar, the walls of great thickness, as could be seen at the doors and windows. It was covered with thatch, and not more than eight feet in height. Roses grew over the doors and windows, while a bent Scotch-fir leaned with a protecting air over the whole, screening the humble abode, somewhat, from the keen mountain air. Had Wordsworth this Highland hut in his mind's eye when he wrote—

"The walls are cracked, sunk is the flowery roof,
I dressed the pathway leading to the door;
But lore as nature loves the lonely Poor
Search for their worth, some gentle heart wrong-
proff,
Meek, patient, kind, and wore its trials fewer,
Belike less happy.—Stand no more aloof!"

After sitting for some minutes on a great stone in front of the house, contemplating the quiet scene—for there seemed no appearance of life anywhere—a respectable looking woman came to the door and invited me, in the kindest manner and in the purest English, to enter her humble abode. She seemed to enjoy my interest in her surroundings, and bade me be seated in her "best room," which was clean and neat, with a floor of flag stones; the walls and ceiling were covered with paper, which hung in festoons, and how it was made to adhere to the uneven stones beneath was a mystery; a bed, with high-posts reaching to the low ceiling, almost filled this "ben" or "spence!"—while an cupboard containing a few pieces of chinaware occupied another corner. The woman told me she was a MacFarlane, that she lived here with her two brothers; that their ancestors had owned the house and lived in it for five generations, and that this was the MacFarlane side of the lake. I should like to have seen the inside of the kitchen or "but" as well as of the "ben" of the little es-

tablishment, and did catch a glimpse of it as I came away—a low, dark, smoky apartment. Many of these houses have no chimney proper—a hole in the centre of the ceiling answering that purpose; an iron basket contains the burning peat, and the smoke curls above it among the rafters, until they become black and polished like ebony. But a warm-hearted hospitality sends forth a stronger glow than the mouldering peat fire, and the wandering stranger feels that he is among a manly, intelligent and noble race, who have few superiors in any clime or country. Humble must be the cottage which contains no books, generally of a theological cast. "Their the Genevan's sternest creed;" but works on history, poetry, ballads especially—are not uncommon.

A low, wattle, circular fence in front of the door, seemed scarcely strong enough to keep a cow within bounds, but various milk-pans announced the existence of that useful animal; while various washing-tubs indicated that work was to be had of the kind to which they are appointed.

On my return to the hotel I inquired of the boatman the name of the small house on the hill. "Clach Boule," was the reply, spelling the name as correctly as possible in accordance with its Gaelic sound. He added, "Would ye na' like to see Rob Rye's cave? this is the MacGregor country, ye ken!—I could so na' tak ye there!"—but much to our regret it was too late to visit it. This celebrated cave is on the shore above the inn, and is formed of masses of rock, all so stern and wild and dreary, that necessity alone could induce any one to hide there. Yet, in its utmost need, Robert the Bruce found refuge here after his defeat at Strathblair by MacDougal of Lorn; as also did Rob Roy and his proscribed clansmen.

The falls of Inversnaid are of no great height, but their feathery foam falling over mossy rocks are beautiful enough to have elicited from Wordsworth, in his address to a Highland maid, the belief that

"Till I grow old,
As fair before me shall behold,
As I do now, the cabin-small,
The lake, the bay, the waterfall,
And thee, the spirit of them all!"

See cont.

Oh! that our young friends, who are growing up, would come to seek the Lord in their early years. He would assuredly be found of them; my soul is a witness of what I now speak. When I was but a lad, I had secret desires after him, inasmuch that I thought I could be content to mourn out my days in a cave of the earth, so that I might have an assurance of a dwelling with him, when time here should be no more. So strong were the desires that the Lord had raised in me, that nothing short of this would satisfy, which caused me many times, I might say years, to go mourning and seeking the Lord, till at length he was pleased to appear by his inspeaking word in the secret of my heart, saying, Thou art mine, wait thou on me, and I will protect thee. Oh! how has he made good his promise; yea, he has done more for me, both inwardly and outwardly, than at any time ever entered my heart to desire or expect; the which causes adoration and praises to ascend from me, who am but as a worm before him.—Account of Thomas Bitsby.

The Stage and its Virtues.—An eminent and very logical preacher of the present day, in a sermon on Nonconformity to the world, argues thus as to theatrical performances:—

"We will suppose every play to have its moral, and the audience to be duly impressed with it. * * * Yet, here begins our objection to the stage. We ask what model of excellence is there held up for imitation? What virtues are exhibited on the stage; what character would you be conformed to if you followed out the lessons there taught? Would it be to the image of God? Are the stage virtues the virtues of the Bible? Is the good man of the stage the good man of Scripture? Is he not emphatically worldly, and his goodness that of a man conformed to the world? He is at best an honest, honorable man, benevolent and moral upon the whole, though not too strict in his religion; high-minded, certainly, and not likely to put up with an insult; in short, a worthy, agreeable, amiable man of the world. Does the morality of the stage ever rise above this? Who would venture to produce upon the stage a character humble, holy, patient, forgiving, gentle, self-denying; one in whom was the mind of Christ? Would such a character as this draw crowded houses? We know it would not. * * * Here, then, is our objection to the stage; not solely for its attendant and inseparable evils, nor yet for the vice it displays, but for the *virtue* it exhibits; we object to it, because it sets up a false and worldly standard of morality."

Orange Culture in Florida.—Just across the river St. Johns from Palatka, lies the beautiful orange grove owned by Colonel Hart, in which seven hundred trees, some forty years old, annually bear an enormous crop of the golden fruit, and yield their owner an income of \$12,000 or \$15,000. The trees bear from 1200 to 2500 oranges each; some have been known to bear four or five thousand. The orchard requires the care of only three men, an overseer and two negroes. The myriads of fish to be caught at any time in the river, furnish material for compost heaps, with which the land is annually enriched. At the gateway of this superb orchard stand several grand bananas; entering the cool shade—some fine December day—one finds the negroes gathering the fruit into bags strapped at their sides, and bearing it away to store-houses where it is carefully packed for the steamers which are to bear it north. On the sand from which the hardy trunks of the orange spring, there is a splendid checker-work of light and shade, and one catches through the interstices occasional glimpses of the broad river current. In an adjacent nursery a hundred thousand young orange trees await transplanting and budding.

This culture of oranges will certainly become one of the prime industries of Florida. The natives, of the poorer class, who might make fortunes by turning their attention to it, are too idle to develop the country. They prefer to hunt and fish, and, as a rule, cannot be prevailed upon to undertake serious work. The mass of Northern men who undertook orange raising directly after the war, failed because they did not employ skilled labor. The eastern bank of the river is considered safer than the western for the culture, as frosts rarely reach the former. But for many miles up and down the stream, this culture has proved resoundingly successful on both

sides. The property is becoming exceedingly good, yearly rising in value. Colonel Hart thinks his grove is worth at least \$75,000.—*From "The Great South."*

A WATERFALL.

By H. MACMILLAN.

"When thou passest through the waters, I will be with thee; and through the rivers, they shall not overflow thee."—Isaiah xliii.

Beside a lofty waterfall I've stood,
Formed by a torrent from a mountain height,
And gazed far up, to where the foaming flood,
Burst from the sky-line on my awe-struck sight.

So vast its volume, and so fierce its shock,
No power at first its headlong course might stay;
It seemed as if the everlasting rock,
Before its furious onset would give way.

But as it fell it lingered in mid-air,
And melted into lace-like wreaths of mist,
Decked by the sun with rainbow colors fair;
And surged by passing breezes as they'd list.

And when at last it reached the dimpled pool,
Hid in its granite basin far below,
Its spray fell softly as the showers that cool
The sultry languor of the summer glow.

The aspen leaf scarce quivered to its sound,
The blue bell squired beneath its benison,
And all the verdure of the forest round,
A fresher greenness from its baptism won.

So have I watched for coming sorrows dread,
With heavy heart for many a weary day,
Foreboding that the torrent overhead,
Would bear me with o'erflowing flood away.

But when the threatened evil came, I found
That God was better than my foolish fears;
The furious flood fell gently to the ground,
And blest my soul with dew of grateful tears.

God bless my mercy with each judgment stern,
Brings goodness out of things we evil see;
Then let us from our past experience learn,
That as our day, our promised strength shall be.

Selected.

A HUNDRED YEARS TO COME.

Where, where will be the birds that sing.

A hundred years to come?

The flowers that now in beauty spring,

A hundred years to come?

The rose hip, the lofty brow,

The hearts that beat so gaily now?

Oh! where will be love's beaming eye?

Joy's pleasant smile, and sorrow's sigh,

A hundred years to come?

Who'll press for gold this crowded street,

A hundred years to come?

Who tread your church with willing feet,

A hundred years to come?

Pale, trembling age, and fiery youth,

And children at its side as of yore—

The rich, the poor, on land and sea,

A hundred years to come?

We all within our graves shall sleep,

A hundred years to come;

No living soul for us will weep,

A hundred years to come!

But other men our lands will till,

And other men our streets will fill,

While other birds will sing as of yore,

As bright the sun shine as to-day,

A hundred years to come!

After a meeting held at the house of Bulstrode Whitlock (one of the most accomplished men of the age) to which he gave an entire liberty for all that pleased to come, he was so deeply affected with the testimony of the light, spirit, and grace of Christ in man as the Gospel dispensation, that after the meeting closed in prayer, he rose up, and pulled off his hat and said, "This is the everlasting Gospel I have heard this day; and I humbly bless the name of God, that he has let me live

to see this day, in which the ancient Gos- is again preached to them that dwell up the earth."—*No Cross No Crown.*

An Opium Den in San Francisco.—Describing the Chinamen and their haunts in San Francisco, the *Bulletin*, of that city, gives the following account of one of their opium dens and the method of smoking the drug: "The first class opium den is fitted with a table about eight feet long and five feet wide, about two and a half feet high. This is covered with matting, and fine mats are placed on top. In the centre of the table is a tray containing opium, opium pipes and a peculiarly-shaped lamp, which has a small flame. The opium pipe is made of a piece of mahogany or ebony wood. The stem is about three-quarters of an inch in diameter, and about two feet in length. A hole, about half an inch in diameter, runs the whole length of the stem. About six inches from the end of the stem is the bowl of the pipe. It is made of a peculiar kind of sand and clay in China, and is very hard and fireproof. The bowl is about two inches in diameter. The top of the bowl is entirely closed, except a small hole in the centre, about the size of a large darling-nail. In the bottom is a hole about half an inch in diameter, into which is inserted a brass coupling connecting the stem of the pipe. The opium is kept in a small box made of horn. Every Chinaman carries one. When a person desires to smoke opium he reclines upon the table upon one side. With a piece of steel, about the length and size of a large knitting-needle and sharp pointed, a little of the opium is taken from the box. It is held over the bowl of the lamp until it is thoroughly cooked. The piece of steel is kept in motion all the time, and the opium when cooked is forced into the shape of a small pistol cartridge. The point of the steel needle is then inserted in the small hole in the centre of the bowl of the pipe, and gently drawn through the cartridge of opium. The smoker then turns the bowl of the pipe to the flame of the lamp, and upon a wooden pillow, and smokes. He gets draws in his breath in long and rapid respirations. He must be careful, however, to slightly remove his lips from the stem of the pipe when taking breath. If he should breathe slightly into the stem it stops the flow of the smoke of the opium. When the flow is stopped the sharp pointed steel is used to open a small hole in the bowl of the pipe. It takes about three minutes to prepare the opium in the pipe and about one to smoke it out, or twelve whiffs only being required. From six to twelve pipefuls are generally smoked before the smoker is satisfied. A little of a year ago a great many white people of both sexes patronized the opium dens. The Board of Supervisors deemed it best to put a stop upon the growing evil, and a stringent law was passed making it a penalty of not less than \$50 nor more than \$500 for the keeper of any opium den to allow a white person to smoke in the place. It was also made criminal act for any white person to be found in an opium den, the fine being fixed at not less than \$50. Since the passage of this law the dens do a less lucrative business. The customers are all Chinese, two generally occupying one table and using one lamp. The Chinese resort to opium smoking for a slight ailment, and it is regarded by many of them as a panacea for all their ills."

For "The Friend"

Richard Shackleton.

(Concluded from page 250.)

bringing to a conclusion sketches of such a life passed from life's busy scenes of action, we may trust, an eternity of happiness is but natural for the mind to revert to the footprints which marked their way thither.

recurring to the early days of one whose happy has been briefly placed before us, we are reminded that those, who, like Richard Shackleton, are made willing in the morning to yield their hearts to the secret visitations of the Holy Spirit, and to bow in the submission to the Divine will, shall, as they continue faithful thereunto, be enabled from time to time to put their feet in the power and guidance of One who leads them also, safely along through life's way, and, through adorable mercy, in the land them in the same haven of peace rest.

On wishing to retrace what has in the part of our sketch afforded us some insight into the life of Richard Shackleton, we were it may not come amiss to revive his language which is fraught with deep instruction for all. In a letter to a friend he writes:—"God Almighty visited my heart with a sense of his goodness (precious to all things) in the very early part of my life as early as I think I have any remembrance. He graciously renewed the same influence upon my soul, at various periods of my childhood and more advanced years. This sense and savour were every day needful to me, it was knowledge enough, strength enough, joy and comfort in abundance; while in possession of this I wanted nothing, all things as to me were right. But temptations, suited to my cast and disposition, as a boy, were thrown in my way; pleasures, amusements, reading unprofitable vain things, were spread before me, and I was at times taken in the snare. When the heart's preference to these gratifications, the only Guest withdrew, and would not re-visit such rivals. Yet good and gracious the Lord, who, notwithstanding my unfaithfulness, would knock again for entrance, offer again to visit; and as I opened the door of my heart, (or rather He opened by spirit) He came in with the power of his merits, and by his operative Word, burned the chaffy, combustible nature; and this being over, remained a flame of pure heavenly joy. So I experienced him to be not only a jealous God, but a consuming

Thus, with these alternate visits and visits, I went on till I grew to a more advanced stage of youth; then the subtle nets, worldly wisdom, and the tools of the devil's lusts, which war against the soul, led too strong for me, and often carried vessel back again down the stream of moral inclination. Arrived at manhood, being about to settle in life, a high hand laid me in my course, showed me my state of alienation, and the impossibility of making a happy progress without the Dis- blessing, so, in the sincerity of my heart, eyed the heavenly vision, became as if amongst my companions, and an alien- genist my intimate acquaintance. I sought comfort, and the company of them who associated with Jesus. My sincerity was by the great Creator, and many were

the baptisms I was baptized with in that day; it was also felt by His approved servants, and close was the fellowship cemented between many of their spirits and mine. Thus I have gone on to this day and hour, on the same search, hungry and thirsty still; not desiring anything so much as the bread of life, for myself and my dear friends, companions in the same travail."

In a letter, a few months before his decease he wrote:—"The faithfulness and dedication of some of you has been cause of joy, and a kind of triumph to me; so that, according to my measure, I can join a remnant in adopting the apostle's expression: 'For what is our hope, or joy, or crown of rejoicing? Are not even ye in the presence of our Lord Jesus Christ at his coming? for ye are our glory and joy.' To the Lord alone be the praise of his own works, but let his own works praise Him."

About three weeks before his decease he wrote as follows to a particular friend:—"I trust that we know something of the vicissitude of day and night, and the revolution of the Lord's year, in our spirits, and that He will be mercifully pleased to deliver us from evil, and preserve us to the end, and at the end."

He died on the 28th of the Eighth month, 1792, in the 66th year of his age. His wife survived him twelve years, and died in the 78th year of her age.

Rights of Property Among the Esquimaux.

Of every seal caught at the winter station small pieces of flesh, with a proportionate share of blubber, were distributed among the place-fellows. In this way the very poorest could never want for seal-meat or lamp-oil, provided the usual capture of seals did not fail. There could be no Esquimaux Jack Horners sitting on the ledge of the house all alone and munching the seal which they had been fortunate enough to harpoon. Beyond the confines of the district inhabited by such a community any one was at liberty to set up his house and hunt and fish; and every one, whether in a community or out of it, had the right to all drift wood which he found and was strong enough to carry up on the shore above high water mark, taking care to put a stone upon it to mark it as his own. If a seal was harpooned, and escaped with the harpoon sticking in it, it belonged to the harpooner, so long as the bladder was attached to the harpoon. If two hunters at the same time hit a seal or bird, it was their joint property, and was equally divided. Whales, however, and other large animals, as walrus and bears, however captured, were considered common property, as being of that size and strength that, except in rare cases, they could only be secured by the united strength of the community. In case no seals or other food were brought home, those families in it who were best off for provisions invited the inmates, but not the place-fellows, to share their meat with them. In no stipulation does the common right to share all the property that another had beyond necessary articles stand out so prominently as in that which provided that if another man borrowed the tools or weapons of another, and lost or injured them, he was not bound to make any compensation to the owner; for it was based on the notion that if a man had anything to spare or to lend it was considered as superfluous, and not held with

the same right of possession as his more necessary belongings, but, on the contrary, as something to be classed among those goods which were possessed in common with others. In fact, we are led to the conclusion that the right of any individual to hold more than a certain amount of property was jealously regarded by the rest of the community, who did not scruple to borrow it and waste it.

No one could deprive any man of his weapons or his clothes; but if he possessed more than a certain amount of that property, his right to it passed away and became vested rather in the community, who could use and wear it than in him who could not. There was no room in the Esquimaux code for the hundreds of coats and waistcoats which fashionable tailors send in to the account of silly young men. This common sense view of the accumulation of property led to a very natural result. Superfluous clothes or weapons rarely existed, and even in the case of kayaks, though a man might possess two of these necessary boats, if he owned three the third must be lent to some relative or homestate. According to this view of political economy, anything that was not used was regarded as idle and wasted, and liable to forfeiture for the good of the community.—*London Quarterly Review.*

Getting Ready.—You are going off on a long journey, and you must get ready. You must think of everything you cannot do without, and of such things as you may possibly need. You collect numerous articles indispensably necessary. You would not be foolish enough to delay packing your trunk until you should hear the signal of the train that is to bear you away; then you would not have time. But one thing you cannot dispense with, no matter what else you may, and that is money. You will need that in every stage of your journey. You must have plenty of it too, because you may be delayed by accident, or may fall sick by the way. Then, also, there are thieves always and everywhere ready to rob you, without regard to what might then become of you. You are wise enough to conceal safely about your person sums sufficient for all contingencies. How much more important are all these preliminary concerns if you should be removing without expectation of return. In that case you would give the most careful attention to every detail of preparation, for you could not think of running a single unnecessary risk. We observe such things almost every day; and is it not marvellous that, with their experience in making ready for journeys from one part of the earth to another, men seldom consider that they must shortly set out on a journey which lies across the boundary of time and ends in eternity?—*L. Observer.*

Immense Distance of the Stars.—The star Centauri, in the Southern hemisphere, is found to have a parallax of about one second, but no other star in the celestial vault has been found to have a parallax of more than half a second. In quite a number of stars the parallax ranges from two-tenths to half a second. Let us see now what these measures give us for the distance of the stars. When a star has a parallax of one second, it shows its distance to be a little more than two hundred thousand times the distance of the earth from the sun; with a parallax of half a second, the

distance is twice as great; with one of a third of a second, three times as great, and so on, the distance being inversely proportioned to the parallax. As there are only two stars of which the parallax exceeds half a second, it follows that, with the exception of these, the stars are all more than four hundred thousand times as far as the sun. The sun being nearly a hundred millions of miles, this distance amounts to about forty millions of millions of miles. Hence the nearest known star is distant twenty millions of millions of miles; there are about a dozen others of which, the distance ranges from two to five times this amount, while all the remaining ones are situated at distances yet farther. See that bright star, *Lyra*, a little west of the zenith? Dr. Brammow has recently determined the parallax of that star to be almost one-fifth of a second, consequently by the rule we have just given, its distance is more than a million times that of the sun, i. e., it is just about one hundred millions of millions of miles.—*German town Weekly Guide.*

“What son is he whom the father chasteneth not?”—*Heb. xii. 7.*

Is not God's chastisement of his children often spoken of in the Bible as one of the marks of their sonship? Does this thought make me quiet in affliction, and help me to bear trouble with humble and submissive faith? Does it not sweeten the bitterness of trial to know that whom the Lord loveth he chasteneth, and scourgeth every son whom he receiveth? If life were unclouded, and God's chastening hand were never felt, might we not with reason doubt whether we were indeed his children?

Concerning Nervousness.—We easily know a nervous man. You say, “He never walks, he runs.” Born in a hurry, he lives in a hurry; and you anticipate that he will depart this life with corresponding precipitation. Full of fears freely expressed. Afraid he will be too late for the train, or the train will be too late for him. Afraid it will rain, or afraid it will not. You ought to pity him, but you can't. Entitled to commiseration, he awakens only vexation. You pronounce him a wearing companion. He comes in with a “whee” uttered or unexpressed. A sh-sh-sh rises to your lips as he approaches, and you long to administer to him some quietus. He makes door knobs ache and break. In your provocation you call him an animated threshing machine. His is unconscious, out-side, or active nervousness. You know how infectious it is. As catching as the small-pox. You feel that if you don't get out of his orbit you will be just like him. His watch outruns his neighbor's time-pieces. True, he is always in time for every thing; but at the cost of whatever comes in his way. You pity his tired-looking wife. How can life go smoothly with her? He loves her dearly, but as you look into her worried face, you remember that poor pussy never purrs when you rub her for the wrong way. As for his own quantum of comfort, you can't see when he stops to take it; and the funniest of it is he utterly repudiates the idea of his being nervous.—*Tadmage.*

Triumph of Application.—Few things are impracticable in themselves; and it is for want of application, rather than of means, that men fail of success.—*Rechejoucault.*

The putting of any outward or ritualistic observance between the soul and its salvation, is fraught with inconceivable danger both to men and a pure gospel. It is in human nature to lay almost immediately an undue stress upon the outward and forget the deeper work of the Spirit in the heart.

THE FRIEND.

FOURTH MONTH 28, 1877.

We continue the account of the proceedings of Philadelphia Yearly Meeting commenced in our last number.

On the opening of the meeting on Third-day morning, Clarkson Sheppard was appointed to act as Clerk, and Joseph Walton as Assistant Clerk for the present year—their names having been brought forward by the Representatives.

The Queries and answers were read and considered as far as the Fifth, inclusive. Friends were comforted with the belief that there was an increase of religious weight in the assembled body. The deficiencies apparent brought a lively concern over the meeting; under which, warning and exhortation were delivered by several brethren.

Whilst considering the First Query, on the attendance of meetings and conduct therein; those who were constitutionally subject to drowsiness, were exhorted to seek for such a lively and fervent exercise of spirit, as might repel the insidious approach of that weakness. Those who were in the practice of attending meetings were reminded that it was quite possible to do this from habit and education; and yet, when assembled, to sit in a listless, lukewarm state of mind. In a meeting where many persons were convened, who were thus careless and indifferent, the real travelers for the arising of spiritual life might be so burdened, that the living would scarcely be able to bury the dead; and hence the meeting might be flat and unprofitable. Such meetings were discouraging in their effect on those who attended; and these unconcerned members were encouraged to endeavor to seek for the arising of spiritual life and refreshment in their own hearts, comparable to the drawing of water from their own cisterns, rather than to depend on the ministry of others.

Reference was made to the Fourth Query, as peculiarly calling attention to the right training of children. A fervent and affectionate appeal was made to parents, to dwell under deep religious concern for their beloved offspring; and to seek by every means to preserve them from evil, so that the seed sown by the good Husbandman might find a prepared soil and grow to His praise.

The practice which largely prevails amongst other professors, and is creeping in among Friends, of decking the corpses of deceased relatives with flowers, was condemned, as being altogether improper. It was believed to have had its origin in a desire to evade, in measure, the feeling of the solemnity of death. The costly and ornamental dresses and cases in which the dead are placed, were also to be avoided by Friends. This concern spread over the meeting, and several voices were raised in expression of unity therewith.

The difficulties were mentioned which Friends often experience in finding suitable

places for their children while receiving business training to fit them for the actual duties of life. It was said there were few young men now brought up to mechanical employments than formerly. The lads themselves were exhorted to seek for Divine direction as to the employment which it would be right for them to follow; and the belief expressed, that the impressions made on their own minds, in connection with the counsel and judgment of their parents, would be profitable in leading them to make a right choice of their business pursuits.

On Fourth-day the remainder of the Queries were read and considered. The deficiencies reported in the upholding of our testimony against an hiring ministry were adverted to, and earnest, tender and persuasive appeals were made to our younger members, that they might consider the ground of this testimony and the importance of faithfully maintaining it. Their attention was called to the way which one deviation from the right path opens the way for another. He who, in dress and language, acts consistently with his profession, would not be seen in a place of worship where such a ministry is supported, as would be felt by himself and others that was out of his place. Without sitting in judgment on the character of individuals who acted as such ministers, or going further into particulars respecting the objections which Friends must ever hold to the system which they are maintained, the meeting was reminded that the continued existence of it is largely due to the support which is given to it by the body of such ministers, and to the recognition of the right of the Head of the Church to qualify those whom he pleases, women as well as men, to proclaim the everlasting go-spl, is still practically denied withheld among them.

The answers to the Annual Queries contained an unusually long list of the names of members of the Select Meeting—many of them of great age—who during the past few months have been removed from the church militant.

The earnest desire was expressed that of our members might heed those convictions which the Holy Spirit has made and is making on their hearts, as the true foundation of their religious experience. As individuals were watchful and faithful to these Divine openings, standard bearers would be raised up to proclaim the principles of the gospel. An earnest exhortation was given that we might so dwell under the preparing hand of the Lord, as to be fitted for the wide field of labor which exists around us in the church and in the world. The testimonies which Friends have been called on to uphold held not to us alone, but to the church universal.

A Friend who had recently attended Canada Yearly Meeting, informed the meeting that within the limits of that body there were many valuable Friends who were earnestly endeavoring to maintain the original principles of the Society in the midst of many difficulties, towards whom his sympathy had freely flowed, as also towards that class who were perplexed by the conflicting voices abroad in the church; and he had felt that it might be right to bring to the consideration of the meeting the subject of addressing out-bodies in the love of the gospel; our dear Friends of Ohio Yearly Meeting had been brought to the view of his mind in their

d position, and it would be a cause of regret if the meeting was prepared to address him a written assurance of its continued pathy and fellowship with them amid the trials to which they have been exposed; but every thing that no step of this kind could be taken, to our or their true comfort and profit, about a measure of the call and qualification, which should accompany the exercise of a gospel ministry by individuals, he decided, after introducing the subject, to leave to the solid consideration of Friends, and it was decided not to open in their minds to be decided in it, that it should not long detain the meeting from its other business.

The observations which followed the introduction of this concern, it was evident that the minds of many were weightily engaged in favoring to move in the direction of Truth, in the disposal of this important subject. The opening of correspondence with Ohio Yearly Meeting was felt to be an important step, while several Friends were now prepared to unite with the proposition, others, though saying that the time was approaching for a decision, did not see that it had yet come, and a few members expressed a desire that in correspondence was resumed, it should be held with all the Yearly Meetings. The discussion was calm and deliberate; and nothing occurred to mar the harmony of the assembly, without taking any action the meeting passed to the subject.

Fifth-day.—Meetings for worship were held usual in the morning. In the afternoon an interesting Report from the Committee for the Civilization and Improvement of the Indians was read. The Boarding School for their care has been attended by an average of 29 pupils during the year, and was held to be in an efficient condition; and there are evidences that serious impressions have been at times made upon the minds of children which it was hoped would not be lost when they were again subjected to temptations to which they are often exposed at their own homes. A letter of address prepared by the Committee had been presented to the Indians living on both the Seneca and Cattaraugus Reservations, and presented to them by a sub-committee, had had several interviews with them of recent passes; and it was believed that letter and visit had been useful in revivifying and strengthening those feelings which the Indians had long entertained towards us. The recent death of a valuable young woman, formerly a pupil at the Boarding School and afterwards a teacher among her people, was mentioned; whose example and expressions on her sick bed gave evidence of the work of Divine Grace in the heart. A financial statement showed that during the past two years the invested funds had considerably diminished, and that there was a balance due the Treasurer, upwards of \$1000.

The report was satisfactory, and the Committee was encouraged to continue its labors. An appropriation of \$500 was decided to be made by the meeting in aid of the same.

The report of the Committee having charge of the Boarding School at Westtown, was read. Among the subjects particularly interesting was the recent adoption of a new system of classification by which the pupils were assigned to their respective classes entering the school with less difficulty

than heretofore, and would advance regularly from session to session, with their class, if suitably prepared. Two buildings for the accommodation of married teachers have been erected, which with those previously provided, it was believed will contribute towards the efficiency of the Institution by retaining the services of experienced teachers for a longer period than might otherwise be the case. Some changes in the arrangement and uses of some of the rooms in the school building were reported, and the collection of philosophical apparatus and objects illustrating natural history had been transferred to an apartment occupying the north end of the room where the meetings for worship had formerly been held. An addition of several hundred specimens of insects had lately been procured. In addition to the usual expenditures, the cost of erecting the new dwelling houses, and of fitting up the room now used for religious meetings in the central part of the building and the other changes consequent thereon, together with some items carried to the profit and loss account had considerably reduced the available funds on hand and rendered it necessary to dispose of a portion of the securities, a course which it was expected would also be necessary the present year.

The Committee brought to view the need of the hearty co-operation of parents and all connected with the Institution for the maintenance of its discipline and rules, so that the minds of the children may not be confused by a want of that harmony which should exist between the training received at home and that compliance with its wholesome regulations which is expected of them while there. Our young Friends and others who may visit the Institution were also reminded of the influence of their example, and encouraged to observe the well known concern of their older Friends for the true welfare of the Institution. Visiting on the First-day of the week, was alluded to and discouraged. The Report was an interesting and satisfactory one, and in commenting upon the subjects thus brought before the meeting, parents were reminded that the comfort and happiness of the children at the school were greatly promoted by the co-operation of the parents, as alluded to in the Report, by which the minds of the children were prepared cheerfully to acquiesce in the established regulations. Sympathy with the Committee was expressed, and they were encouraged not to relax in their care and labors in any direction.

The Committee on Education, as shown by their Report, had endeavored to ascertain the situation of some of our members in remote places respecting their facilities for obtaining instruction for their children, by personal visits in the limits of different Quarterly Meetings; and in such neighborhoods the establishment of family or other schools where the children should be educated under the care of a member of our Society, had been encouraged. With the means at their command, and some additions which had been made to it by interested Friends, assistance had been given in maintaining 13 schools in different places, in which 78 children had been instructed, many of whom would probably have otherwise been sent to the public schools. The labors of this Committee were believed to have been useful, and the Friends constituting it were reappointed, and \$1200

directed to be placed at their disposal from the funds of the Yearly Meeting for the present year. The Report was directed to be sent to the Women's Meeting, and a proposition was subsequently made to invite its co-operation. On the following day the subject was introduced to their notice, and two women Friends from each Quarterly Meeting were appointed to unite with the Committee.

The Committee to examine and settle the Treasurer's account, reported that they had found it correct, and proposed that \$5,000 should be raised for the use of the meeting. As this sum had been decided on by the Committee previously to the appropriations by the Yearly Meeting for the use of the Indian Committee and the Committee on Education, it was directed that these amounts should be added, and \$6,700 should be forwarded by the Quarterly Meetings. In accordance with a recommendation of the Committee it was decided that the respective quotas should be paid to the Treasurer early in the year.

The statements from the Quarterly Meetings showing the number of children of a suitable age to attend school, and the kind of schools to which they are sent, were read. The total number of children reported was 949, but owing to a want of sufficient details in some of the reports, the number not receiving instruction under the care of Friends was not clearly stated, but it was believed to be about one-fourth of the total number, a considerably less proportion than was reported a few years ago. The subject was again referred to the attention of subordinate meetings.

The concluding sitting of the Yearly Meeting was held on Sixth-day.

The reports on Spirituous Liquors stated, as the result of the close individual inquiry made of our members, that 44 of them had used spirituous liquors as drink during the past year, most of them but seldom, and that two others had handed the article to others for that purpose. This is a smaller number than has generally been reported, and Friends were encouraged, by the results which had thus far attended their efforts, to continue to extend patient, affectionate labor for the entire removal of the practice from among us.

Friends were exhorted to keep their attention awake to the great evils of intemperance, so as to be prepared to improve such openings to lessen those evils, as it might be right for them to engage in. Reference was made to the manner in which railroad and steamship companies are connected with the traffic, by keeping a bar for the sale of liquors at hotels, depots, and on board of the vessels, subject to their control; and the attention of those who were shareholders in such companies was called to the measure of responsibility thus brought upon them.

The propriety of abstaining from everything which can intoxicate, was also commented on; and the injurious effects of tobacco were spoken of. These kindred subjects claimed rather unusual attention; and there was a lively exercise for the help and preservation of those in danger; and for the spreading in the earth of this righteous testimony. How would these and all other evils lessen or disappear, if men were willing to bear the yoke of Christ, and bring all their appetites and passions under the regulating power of his cross!

A report was presented by the Committee

appointed last year, to consider the proposition sent up from Concord Quarterly Meeting, to change the discipline in respect to marriage. The report proposed several changes on that subject, particularly as to the manner of dealing in those cases where one of our members marries a person who is not a member of the Society of Friends. The meeting decided not to adopt the proposed changes, and to dismiss the subject, leaving the discipline to stand as it has heretofore been.

The consideration of this subject opened the way for the extension of affectionate and timely counsel to our young unmarried men, and to their parents and interested friends, that care might be extended in season for the good of those concerned.

The Clerk read a minute which he had prepared, setting forth the exercise that was prevailed in the meeting on various subjects brought before it during the reading and answering of the Queries.

Testimony was borne by several Friends to the goodness of our Heavenly Father, whose solemnizing presence had been extended over us from sitting to sitting, enabling us to conduct the business with much harmony and concension.

After the concluding minute, and a short interval of solemn silence, the meeting adjourned.

CORRECTION.—In the account of the proceedings of the Yearly Meeting, published last week, the annual income of the fund derived from the bequest of John Pennock, was stated to amount \$1900. It should have been printed \$1800 a year.

SUMMARY OF EVENTS.

UNITED STATES.—The Post-master-General has issued an order providing that hereafter all appointments of railway post-office clerks, route agents, mail route messengers, or local agents, shall be made only for a probationary term of six months, and that at the expiration of this probationary period, no re-appointment shall be made unless the appointee shall have shown himself competent and passed a satisfactory examination upon the duties of his position.

Three hundred and fifteen supernumerary employees of the Bureau of Engraving and Printing and the Patent Office, have been discharged, in accordance with the new policy of retrenchment and reform.

Later information from Concord, N. H., states that in the late election the constitutional amendment for placing all religions sects on a perfect equality was actually adopted by a majority of a few votes.

About 1000 of the hostile Indians have made a formal surrender of their arms and 1450 ponies to Gen. Crook, at the Spotted Tail Agency.

The Secretary of the Treasury has concluded to direct government officers not to pay, hereafter, ten hours wages for eight hours labor.

Secretary Schurz has appointed P. W. Norris, of Michigan, to be Superintendent of the Yellow Stone National Park. It will be his duty to prevent spoliation, to guard against encroachments, and to protect the timber in the park.

It has been decided at a Cabinet meeting, to withdraw the United States troops from the State House in New Orleans, and orders in accordance with this decision were issued subsequently by the President and Secretary of War. The evacuation will take place on the 21st inst. No many members of the Peckard Legislature have gone over to that of Nichols, that the latter has obtained a clear majority in both branches. The Nichols government declares its solemn decision to abide by the Constitutional amendments, to protect the rights of all classes of citizens, and promote the interests of the nation. The clerk of the Nichols House has furnished the Commission with a statement of the membership of the consolidated Legislature, which shows that of the total membership of 120 forming the Constitutional House, there are in attendance 106, including 61 Democrats and 42 Republicans, and of the constitutional number of 37 senators, there are in attendance 32—29 Democrats and 13 Republicans—three Republicans being absent. Only four Republican

members were absent from their places in the Nichols Legislature on the 24th inst. The President's just and conciliatory policy appears to produce almost universal satisfaction in the South.

The Chicago Times publishes reports from the great wheat-growing sections of the Mississippi and Ohio valleys showing a larger acreage than usual of winter wheat, with a good prospect of abundant harvests.

California dispatches report great mortality among the sheep, where they are perishing from drought.

The Markets, &c.—New York.—Superfine flour, \$6.70 to \$7.50; St. Geo, extra, \$7.50 to \$7.90; spring wheat, \$2.10; showing a larger acreage than usual of winter wheat, with a good prospect of abundant harvests. California dispatches report great mortality among the sheep, where they are perishing from drought.

The Markets, &c.—New York.—Superfine flour, \$6.70 to \$7.50; St. Geo, extra, \$7.50 to \$7.90; spring wheat, \$2.10; showing a larger acreage than usual of winter wheat, with a good prospect of abundant harvests.

California dispatches report great mortality among the sheep, where they are perishing from drought.

FOREIGN.—A large portion of the English people appear to be fully persuaded that Arthur Orton, the impostor, who is now undergoing imprisonment, is really the rightful heir to the Fishburne title and property.

It is reported that the Fishburne title and property in London, said to have been participated in by between fifty and sixty thousand persons, the object of which was to induce Parliament to take measures for Orton's release. It will be remembered that on the trial of this remarkable case, it was shown that Tichborne's mother had recognized him as her son, and that from a variety of circumstances it was made clear that she must have been mistaken, and that Orton's size and whole appearance differed very greatly from that of her long lost son.

A. B. Foster, who was largely interested in the Dominion Railways, is reported to have failed. His liabilities are stated at \$2,290,000, chiefly due in England, though a portion is said to be owing to New York banks.

Two hundred thousand German colonists in Southern Russia intend to emigrate to Brazil and other parts of America, to avoid draft into the army. The emigration has already begun.

President MacMillan has instructed the Minister of Justice and Public Worship, to express to the Bishop of Nevers his entire disapproval of the latter's letter asking intervention for the Pope, and to state that the President sees with pain the clergy meddling with internal and even foreign politics. The French Cabinet has issued similar remonstrances to all the bishops.

It is stated that in the House of Lords on the 20th inst., that from all he heard, he was bound to say, he was not justified in indulging the expectation that we should be able to avoid the great calamity of a European war, but he repeated what he said in the Fifth mo. inst., that in that case the Porte must not rely on material support from England.

Later intelligence from China informs that the Government, in consequence of French representations, has proclaimed full toleration to native Christians. A famine in the provinces of Chihli and Shantung was causing fearful mortality among the people.

A dispatch from Calcutta states that a serious outbreak of cholera has occurred in Akyah. Twenty-five per cent. of the European population died in thirty hours.

The Times Calcutta dispatch announces that it appears that the famine shows traces of approaching its worst points, but there is good reason to hope that the maximum distress may be less severe than was anticipated.

FRIENDS' ASYLUM FOR THE INSANE.
Now in charge of (Twenty-third Ward), Philadelphia.
Physician and Superintendent—JOSHUA H. WORM-INGTOWN, M. D.

WESTTOWN BOARDING SCHOOL.

THE SUMMER SESSION will commence on *Sunday the 30th of Fourth month.*

In order to avoid delay in the classification the School, all new scholars should be present on *Sunday*, that they may be examined and assigned to appropriate classes, and the old scholars should be on that day, or not later than by *Third-day* evening it is expected that the regular recitations will commence on Fourth-day morning.

Pupils who have been regularly entered and by the care from Philadelphia, can obtain tickets—depot of West Chester and Philadelphia, and depots of Thirty-first and Chestnut streets, by their names to the Ticket-agent there, who is furnished with a list of the pupils for that purpose. In such the passage, including the stage fare from the Rail Station, will be charged at the School, to be paid with the other incidental charges at the close of term. Tickets can also be procured from the 304 Arch Street. Conveyances will be at the ST. RAIL STATION on Second and Third-days, the 30th and 1st prox. to meet the trains that leave Philadelphia at 7.50 and 10 a. m., and at 12.30 and 2.30 p. m.

Baggage may be left either at Thirty-first and Chestnut streets or at Eighteenth and Market. If left at either of these cities, the Philadelphia depot, Alexander & Son, who will convey it thence to Thirty-first and Chestnut at a charge of 10 cents per trunk to be paid to them. Those who prefer can have their baggage sent to any place in the built-up part of City, by sending word on the day previous (through post-office or otherwise) to H. Alexander & Son, corner of 18th and Chestnut streets. The charge in case for taking baggage to Thirty-first and Chestnut streets, will be 25 cents per trunk. For the same effect they will also collect baggage from the other rail depots, if the checks are left at their office, corner 18th and Market Sts. Baggage put under their care properly marked, will not require any attention at the other cities. For Philadelphia depot at the Street Road Station, but will be forwarded to the School. It may not always go on the same as the owner, but it will go on the same day, prior notice to H. Alexander & Son reaches the time.

DURING THE SESSION, passengers for the School be met at the Street Road Station, on the arrival of the first train from the City, every day except First and small packages for the pupils, if left at First and 304 Arch Street, will be forwarded every Sixth-day at 12 o'clock, and the expense charged in their bills.

Fourth month 17th, 1877.

FRIENDS' SELECT SCHOOLS.

A suitably qualified Friend is wanted as Principal of the Boys' Select School, at the opening of the term (the Ninth month). Application may be made to Joseph S. Elkinton, 331 South Fifth St. Edward Mars, 127 South Fifth St. James Smedley, 415 Market St. George J. Scattergood, 415 Spruce St.

DIED on the 21st of Eighth mo., 1876, EVERETT ROBERTS, aged 24 years, son of Edwin and Ann Roberts, of Moorestown, N. J., and a member of Philadelphia Monthly Meeting for the Western District, at the residence of Cyrus Britton, Lancaster Co., Pa., on the 1st of 1st mo. 1877. ANNA, daughter of the late Andrew Moore, in the 76th year of her age, a member of West Chester Particular and Salisbury Monthly Meetings, died on the 21st of 1st mo. 1877. This dear Friend was of a meek and diffident disposition; she manifested a firm attachment to ancient doctrines and testimonies of the Society of which she was a member. Although she was suddenly moved, yet we have the consoling belief, that through redeeming love and mercy of a compassionate Father, she was prepared to join her dear relations—who robes have been washed and made white in the blood of the Lamb.

at her residence, in Plumstead township, E. Co., Pa., on the 2d of 2d month, 1877, RACHEL F. a member and elder of Plumstead Particular and Irlingham Monthly Meetings, died on the 21st of 1st mo. 1877, at her residence at Manstead, N. J., 4th 14th, 1877. LYDIA AARONSON, in her 83d year, a member and minister of Upper Springfield Monthly Meeting. Like a shock of corn fully ripe, it is believed has been gathered into the heavenly garner.

(Continued from page 230.)

versnaid, Loch Lomond and Glasgow.—
t morning, took passage on board the
steamer which touches here, for Balloch,
the lower end of the lake, on our way to
row. We found very few persons on
it, the morning air was deliciously cool,
the sun shone out with undimmed lustre,
broad surface of the lake reflected the
color, and seemed covered with an infinity
azzling points, leaving a very galaxy of
ant stars in our wake. The width of the
varies greatly, sometimes the shores
ed quite near, then receded until they
d in the distance; elegant mansions re-
ed them-selves among the trees, and the
herds' shieling modestly hid itself beneath
shadow of the hills. It is a matter of
that the waters of Loch Lomond were
a agitated during the great earthquake
fishion, in 1750, rising greatly above their
l level, and then suddenly falling below
ordinary height. This movement of wa-
ters continued for a considerable time,
was not long before the lofty summit of
Lomond was seen on our left, looking
in serene condescension upon the lower
s around him. At Rowardennan, our two
ng English pedestrians landed for the pur-
of ascending the mountain—a climb of
miles, if the traveller prefers walking,—
gh ponies may be had for the ascent if
ed. The view from the top is said to be
e fine. The windings of the Forth are
le until it enters the German ocean; Stir-
lesque to lie at the very base, though really
miles distant, while Edinburgh Castle
ears on the verge of the horizon. To the
h are seen, Goat Fell in Arran, Jura, and
a Crag, while on a clear day, a strong eye
discern the Solway Firth, the Isle of Man,
the bold coast of Ireland. It is worth
le, then, to endure the fatigue of the long
miles over the rough rocks and slippery
y soil.
ough an enthusiastic admirer of fine
ery, Ruskin remarks: "That in reality
etter for mankind that the forms of their
mon landscape should offer no violent
nits to the emotions; that the gentle up-
d, browned by the bending furrows of the
gh, and the fresh sweep of the chalk down,
the narrow winding of the cope-clad

dingle, should be more frequent scenes of hu-
man life, than the arcadias of cloud-capped
mountain or luxuriant vale; and that while
bumble (though always infinite) sources of
interest are given to each of us around the
homes to which we are restrained for the
greater part of our lives, these mightier and
stronger glories should become the objects of
adventure,—at once the cynosures of the fan-
cies of childhood, and themes of the happy
memory, and the winter's tale of age." He
also reasons, "That man is a creature incap-
able of satisfaction by any thing upon earth,
and that to allow him habitually to possess, in
any kind whatsoever, the utmost the earth
can give, is the surest way to cast him into
lassitude or discontent." Discontent may ac-
cure from the possession of excessive wealth,
or power, or honor, or other mere worldly
advantages; but it may be questioned whether
even the constant contemplation of the grand-
est works of nature, affect the mind in the
way described, seeing that in themselves

"They're freshest from the hands of God!"

We passed on our left Rob Roy's Rock,
which rises perpendicularly from the water's
edge some thirty feet. From this platform
tradition states that the Red Macgregor let
down his refractory clansmen by a rope en-
circling the waist. If they continued obsti-
nate they were lowered the second time, with
the hint that the rope might possibly be slip-
ped a little higher, which generally pro-
duced the effect desired. The boat of the fierce
chieftain lay below, to cut off all hope of
escape that the lake might offer.

Rob Roy was not a myth, as some suppose,
owing his existence to the pages of Scott.
He was the second son of Col. Macgregor, of
Glengyle, whose ancestors held feudal sway
over all this district, so that he claimed as his
birth-right, the glens and mountain pastures
around Inversnaid. But having early forfeited
his right to the Dukedom of Montrose, he was
forcibly ejected from the possessions of his
father, and his wife exposed to the most
harsh and severe treatment from the steward
of the Duke. While suffering therefrom,
Helen Macgregor composed and sung the
pathetic tune known as Rob Roy's Lament,
that the anger of her husband might be
aroused to avenge her injuries. Thus driven
from society, he commenced a course of life,
which was not held respectable by the Gael,
which spurned the bonds which his Saxon
neighbor endeavored to impose on his race,
and who levied black mail, on the bold plea
that it was due to him as original lord of the
soil. Rob Roy left several children, one of
whom was a captain in the army of Charles
Stuart, but made his peace afterwards with
the Hanoverian king.

Rob Roy spent the last years of his life
near the upper end of Loch Veol, and his re-
mains lie at Balquidder, "where the tomb-
stone raised over his resting place shows,
rudely sculptured, a fir tree crossed by a

sword, supporting a crown, as such were the
arms of the Macgregor, whose family thus
sought to mark that the blood of their fore-
fathers had once mingled with the ancient
line of the Stuart princes of Scotland." That
he is remembered kindly,

"Bear witness many a pensive sigh,
Of thoughtful Herdsman when he strays
Alone up on Loch Veol's Heights
And by Loch Lomond's Braes."

At the southern end of the lake we found
ourselves among the islands—

"This, with its woods and upland green,
Where shepherd huts are dimly seen,
And songs are heard at close of day;
That too, the deer's wild covert fled,
And that, the asylum of the dead."

All too soon our pleasant voyage came to
an end, and we were ere long rapidly crossing
the beautiful vale of Leven. Cultivated fields
and a fine rich country were all very well in
their way, but I looked disconsolately at my
sprigs of heather, which were already droop-
ing and bid fair to wither away and die of
"too much civilization."

We had a passing glance at the double-
beaked rock of Dumbarton, crowned by its
Castle, which rises grandly from the bed of the
Clyde, over five hundred feet in height. Its
desolation is sung by Ossian, "I have seen
the walls of Balclutha, but they are desolate.
The fire hath resounded in the halls, and
the voice of the people is heard no more. The
stream of Clutha was removed from its place
by the fall of the walls. The thistle shakes
there its lonely head. The fox looks out from
the windows, the rank grass of the wall waves
round his head. Desolate is the dwelling of
Morra, silence is in the house of her fathers."
The thistle, the national emblem of Scotland,
is said to grow luxuriantly on the scant soil
of the rock, and to attain to great size and
beauty. Dumbarton is chiefly remembered
as the last stronghold which held out for the
interests of Mary of Scotland, after her hopes
had been destroyed at the battle of Langside.

Glasgow.—A roar of traffic, crowds of
factories, and a forest of chimneys stalks, greeted
us on our arrival at this ancient city of St.
Mungo. Glasgow dates its origin from a
Culdee cell, and the motto of the city, "Let
Glasgow flourish by the preaching of the
word," originated from a reputed miracle
which happened to its saintly founder. The
city is built on both sides of the Clyde, which
has been so widened and deepened of late
years as to present a scene widely diverse
from that which Sandy Lindsay saw about
eighty years ago, when he fastened his vessel
of thirty tons, to the broom-bushes on the
spot where now stands the great Broomielaw
Bridge. This early navigator, it is said, built
a boat at the head of Loch Lomond, on the
grassy bank in front of his house, and having
heard of "a wee bit burn ca'd the Clyde," and
wondering what sort of savages lived in that
part of the world, determined on a voyage of

discovery. After toiling more than a week in clearing a passage through embankments of mud and sand, he discovered a town, in front of which he moored his bark to the broom-bushes above referred to. The news that a large merchantman had arrived in the harbor, so greatly excited the curiosity of the townspeople, that the magistrates were pleased to grant a holiday that they might inspect this arrival from a foreign country. Crowds collected on the shore while the magistrates, in their official garb, presented the daring navigator with the freedom of the city, amidst the plaudits of the assembled citizens. Capt. Lindsay found one vessel in the harbor, and one only, and that of very moderate dimensions. Mark the change within eighty years! We visited and crossed the famous Broomielaw Bridge, near which a forest of sailing and steam vessels from all maritime nations was seen, and so vast has become the commercial activity of Glasgow that many would consider the above story somewhat, if not wholly apocryphal. The first steam vessel that successfully navigated a European river, moved upon the Clyde in 1812, five years after the achievement by Fulton upon the Hudson in 1807, and here the construction of steam vessels of iron has attained an extent and importance almost unparalleled elsewhere. Glasgow produces an immense amount of cotton goods, and her manufactures of chemicals are on an extraordinary scale. Among her numerous chimney-stalks there is one 150 feet in height,—that of St. Rollox,—an imposing structure, which carries the noxious vapors from the largest works in the world, which employs 1000 men in the manufacture of soda-ash.

Most of the buildings in Glasgow of any pretension, are constructed of freestone, generally white, imparting an air of elegance and solidity to the city. The Botanic Gardens on the banks of the Kelvin are particularly beautiful. Nowhere else have we seen more ornate ribbon-gardening or such gem-like borders of flowers. Here pale green sedum bordered ruby rosettes, stars of primrose yellow alternated with rings of pearly blues, and diagrams of various patterns were laid upon the surface, in colors as various and complicated as the changes in a kaleidoscope. While admiring these beautiful creations of the Scotch gardener, we suddenly came upon a fountain throwing out jets of crystal water and falling into a marble basin where many light colored fish were sporting, heedless of the small boys who were eagerly dipping their tiny cups and drinking therefrom. An inscription on the marble front informed us that this water came from Loch Katrine; the place of outlet therefrom we had seen when upon the lake. We dipped our hands into the clear liquid and renewed our acquaintance, gladly greeting the cool mountain stream, which, submitting to the guidance of man, had left all its waywardness behind among the rocks and the heather, bearing its great blessing to the heart of the city; performing its mission noiselessly, and like the quiet course of the humble Christian, spreading its beneficence unostentatiously around.

But Glasgow is not a wholesome city in summer, and her inhabitants leave in crowds for the suburban retreats, near the mouth of the Clyde, and elsewhere. Our esteemed Friend, W. S., having left home, we found him at Helensburgh, 21 miles distant, and enjoyed a few hours in his society. It was

cheering to note his remark that during a life of eighty years, not unmarked with trials, he could acknowledge with gratitude that "mercies had always been uppermost."

Selected for "The Friend."

Extracts from Isaac Pennington's Works "Concerning the Principle and Way of Life."

* * * "There is no salvation, but by the cross and yoke of our Lord Jesus Christ; for in that is the power to crucify the affections and lusts, which lead into sin and death, and will not cease to tempt and lead aside, till the soul be gathered into unity with that, and become subject to that which is contrary to them. So that this is the main thing in religion, even to know Christ revealed in the soul as a standard against corruption, and to be gathered under his banner, which is the cross, or that living principle in the heart which resisteth the corrupt principle; and he that is gathered hither, and continueth faithfully fighting here, shall receive mercy, help, and strength from on high in every time of need.

"The true and certain way of knowledge of the things of God, is in the faith and obedience of this principle. It is not by reasoning and considering things in the mind (after the manner of men) that a man comes to know spiritual things; but they are spiritually revealed by God, after a spiritual manner, to the believer, to the obeyer; and they are revealed to him in his believing, in his obeying, in his waiting, in his holy fearing, in his trusting of himself, and feeling his own insufficiency, either to attain them or retain them, but as the Lord makes them manifest in him, and preserves him in the sense of them." "He that doth my will, shall know of my doctrine," saith Christ. This is the way. Wouldst thou know what God requires of thee, what this or that is which appears in thee, or that sort as truth, whether it be so, or no? Mind this principle in thee, mind the pure, the holy light, inward touches and leadings of this pure, divine principle: that will make manifest to thee whatever is fit for thee in thy present state to know; and thou art not to desire more, but as a child to rest contented with that portion of knowledge and strength, which the wise and tender Father judgeth fit for thee; and as thy state groweth capable of more, he will not fail to administer to thee. And what he giveth thee is good, seasonable, and proper for thee, which thou mayest safely feed upon and enjoy in the sense and fear of him. But if thou press after what he would not as yet have thee know, thou enterest into the will and wisdom of the flesh; and there are the disputes, discontents, murmurings, and ill tempers and dispositions of the mind, which there will increase and grow upon thee to thy hurt. * * *

"Oh, how doth the will and wisdom strive within a man's own bosom! What risings of the impure are felt against the pure! What secret and subtle reasonings to ensnare and entangle the mind! and if they cannot draw the soul back from the Lord and the living path, then they strive to vex, afflict, and torment it! There is none known what is felt inwardly by the followers of the Lamb, but those that travel with him in the living path; they are often sensible of that they meet with in their travels, and how hard it is to abide in the path of salvation, inasmuch as they understand the truth of that saying: 'If the

righteous scarcely be saved.' It is seen, indeed! so subtle, so strong, such a n holds, so many stratagems hath the su twining, crooked, piercing leviathan, to snare, perplex, overrun, and entangle t with. And then, outwardly, the same cro will is striving in men without also, to down and subject the pure principle in t who are born of God, to their devices an institutions, decrees, ways, customs, &c., w are of the will and wisdom of the flesh, that, as the apostle said, *through much tribulation is the entrance of the soul into the heav kingdom*; and there is no way of avoiding many tribulations, but by turning aside of the way (which though thereby the I get ease for a time, it will be to the gre loss and sorrow in the end.) For the sp of the world, the wisdom of the world, nature, religion, worship, and whole cours the world, is contrary to the way of the wisdom and spirit of God, and useth it as an enemy, wherever it findeth it; and they t will not bow to the spirit, wisdom, and of the world, must feel the force of its be claws. * * *

"That there is a glorious crown prep for all those, who are gathered to the La in this principle, and abide with him fait therein to the end, hearing his voice, believ the demonstration of his Spirit, obeying i in all his motions and requirems, underg every yoke which is appointed by Him, yoke down the fleshly nature and mind, taking up every cross of every kind in me ness, patience, fear. And there is not on crown laid up for them at last, but the po of the Lord God is nigh unto them to w all in them, to bear them up through and c all, and to keep to and in that princ whereby and whereinto his tender merc powerful arm gathered them. For as *power of the Lord began the work*—for t could never any heart be gathered from th power of darkness to the light which le out of it, but by the power of the Lord; the powers of darkness stand between, would hold and keep their own, did no greater power appear, and put forth its self the soul against them; I say, as the powe the Lord began the work, so the same *po alone is able to go on with it and perfect it*; it will go on with it and perfect it upon same terms it began, and no other. * * *

"And now what is of man in this? Where is the man that can boast before the Lord, who is thus saved? He h all from a principle; yea, he is gathered i preserved in, and abideth in this principl the power, goodness, and mercy of the Lo The power begins the work in him, the po accompanies him; the power carries E through, or he falls and miscarries. Th is no man can stand any longer here, than submits to and is upheld by the power, i act nor suffer, but as the power acts in h and helps him to suffer. Let the man t boasteth, bring forth somewhat of his own he can, here. Is the will at any time own? Doth not he that is spiritual, and the true sense, always find God to work him to will, whenever he wilth rightly a holily? And if he cannot will of himself, he do anything of himself? Can he belie of himself, pray of himself, wait of hims resist enemies and temptations of hims nay, so much as give a look to the Lord any time of himself? Indeed, in the grac

ord, and the principle of his life, there efficiency; and therein he that is joined to Lord, and become one spirit with him, can he not do here? but that is, as he is made in Christ, and as Christ ariseth, and acts in him; which he that is in the sense and feeling will still acknowledge, only in his words to men, but in his heart spirit before the Lord."

The Cat-bird.

All the feathered choristers, none were harming, none so confiding and intelligent, as the cat-bird (*Galeoscoptes carolinense*), two pairs of which nestled close to the e, each pair rearing two broods of young, one nest was near a second story window, in a limbing rose-bush; at first, the birds slight-ly assented my attempts at familiarity, but I persevering and very quiet, sitting by an open window with only a light wire-screen over us; after they had become accused to seeing me thus, I raised the screen, and sat where I could have put my hand upon the occupant of the nest, but I never disturbed the mother bird; so, by the time the young were hatched, the parents would feed while I sat by the window. But this pair slightly irritated me; they treated me with a sort of indifference, just as they would some animal of which they were not afraid. One of the young were fledged, they came in the back piazza, where the old ones fed me, close to my side.

Another pair of this species nested in a bay-suckle that climbed over the back-piazza, and here was a bird, the male, who was not only not afraid, but he appreciated and was companionable and intelligent, the best musician of the grove, fully equal his famed Southern con-in, the mocking-bird (*Mimus polyglottus*). I could call this bird from any part of the grove or orchard, and set him to singing as if in an ecstasy of delight; but in return for this I must be his rant and do his bidding.

There is a keen sense of enjoyment, I might say, of exalted happiness, in being able to sing free birds of the grove around one, which well repays for the time and patience, and hermit-like life necessary to accomplish

the feat made its appearance on the grounds, I was not in sight, the bird would come complaining close to the door, when I would accompany him, he pointing out the eat, which I would drive in no gentle way from lurking place; other birds clamored about chasing the intruder, but he was the only one that returned with me to the house, where he expressed the most decided satisfaction. Several times, just as it was growing light, he wily cat was prowling about, and the bird would call me from my bed with his cries; wilyly throwing on a water-proof cloak, I rans went to the rescue, and often drove the robber through the wet orchard, out across the street, the bird always accompanying and turning with me. The female was confident and gentle, but not so intelligent as the male.

The second nest of this pair was built in cedar tree back of the house, within a few feet of the dense shrubbery before mentioned. The birds were three or four days building, and during this time I could not win the male from his work. I tried the softest blandishments—talked, chirruped, and whistled—all

in vain; he was intent upon his work, and I was of no consequence whatever. He was a most exemplary mate, doing his share of the work with a will and perseverance, even in the face of temptation—an example of allegiance well worthy to be followed. I began to fear that I had lost my power over him; but no; no sooner was he at liberty than he returned to his pretty, confiding ways; he would flutter close to me, and chatter and sing, and perform curious evolutions, as if in an ecstasy of happiness.

I had a large shallow dish of water set on the ground in the midst of the shrubbery, for the accommodation of the birds; but soon so many came to bathe that it was necessary to renew it every morning. My favorite soon learned when I was coming with the water, so he was on hand superintending the work, and waiting for me to rinse out the dish and supply the fresh water, which was no sooner done that he was in it, splashing and enjoying himself.

It was August before the second brood were hatched, and now that he had graver duties to perform, he was much less attentive to me; still he occasionally recognized and played around me, but his powers of song were greatly diminishing.

On the evening of the 13th of August three of the young birds left the nest, and the female immediately took them into the orchard, many rods away; but she left a younger-looking, helpless bird in the nest, to which I am quite positive, she never returned. But the male fed and nourished this young one, and seemed wholly devoted to it, and would now pay no attention to me whatever; he was as much preoccupied as when building. This continued for three days. Toward the evening of the 16th, this young one left the nest and accompanied the parent to the bushes, where he soon had it perched on the tallest shrub—a Judas tree (*Cercis canadensis*); and now he manifested great delight, acting quite like his old self. All the next day he fed his charge, pausing now and then to assure me of his continued regard. On the second day the female came to the shrubbery, bringing the three young, reuniting the family; but, as far as I observed, the male still persisted in feeding only the smaller bird.

I found the birds like soft sweet peas, but they would not break into a perfect one; so I cut a slice from each pair and laid them on the grass, when the parents would bring the young to feed. The three older ones could now help themselves, but the youngest would only look on and wait to have the pieces put into its mouth.

It was now very warm weather, and the family remained among the bushes a large part of each day for about three weeks, at night perching on the Judas tree, or in the branches of an adjoining Austrian pine.

The cats by this time were quelled. They had either become thoroughly frightened by missiles hurled at them, or had committed suicide by taking strychnine; at all events, they no longer prowled about the grounds, and the birds enjoyed quiet and peace.

My favorite bird was monarch of the shrubbery, except when the robins came for a bath, when, with a very ill grace, he took the place of a subordinate. Upon one occasion I witnessed a very amusing scene. I had just supplied the fresh water, and the bird was enjoying it, when a robin came flitting in, followed

by a young speckle-breast. The cat-bird, without a single protest, left the water. Of course he was afraid of the robin, or he would not have left so promptly; but after he had gone he manifested the greatest anger; he flew to a shrub just above them, and screamed with all his power, dropping his wings and looking very fierce and hostile; to all of which the robins paid no attention. Then he came toward me and back again, evidently asking me to drive them away; but I would not interfere. After the robins were satisfied, they left the water and flew into the sunshine, and coolly proceeded to arrange their feathers.

Upon another occasion an incident occurred showing the bird's intelligence. A side gate had been left open, and a neighbor's hen had wandered in. The bird's cries called me out, when he pointed out the hen, which was scratching among the shrubbery. All summer the bird had been accustomed to seeing the fowls in the adjoining lot, and was not at all afraid of them; but he knew this hen had no business in his dominions, and he was not content until she was driven out, which he assisted in doing, following her up with his mewling cry until she passed through the gate, when he returned to his place with a very complacent air.—*Mary Treat, in Harper's Magazine.*

For "The Friend."

The Deceitfulness of the Human Heart.

All who profess themselves to be christians will doubtless acknowledge the truth of the solemn declaration of Holy Writ, that "the heart is deceitful above all things, and desperately wicked: who can know it?" But do we consider how often a mixture of impure motives enters into even our apparently sincere efforts to promote the cause of truth?

Could we only see ourselves as we appear in the eyes of Infinite Purity and Omniscience, we should be humbled under a sense of our villainy.

It is only as the Divine Light, the Light of Christ, our Holy Redeemer, shines into our dark hearts, that we are enabled in any degree to have a just sense of our real condition. Hence it behooves us fervently to pray, earnestly to seek and wait for the insinuations of this blessed light which would bring us in lowliest humility to the feet of the dear Saviour.

This is a painful and humiliating experience to the unregenerate heart, but if truly experienced, will enable us to cast all our care upon Him who is mighty to save, and able to deliver to the very uttermost aid who come unto God by Him.

It is in this state of humble abasedness that true living faith is received, and we are enabled to cast ourselves with undoubting confidence into the compassionate arms of Him who desires that clean hearts and right spirits should be given to all of his poor lost creatures. X.

The pool, in Old Jerusalem, in some sort, represented that fountain, which is now set open in the New Jerusalem. That pool was for those who were under infirmities of body; this fountain is for all that are impotent in soul. There was an angel then that moved the water to render it beneficial; it is God's angel now, the great angel of his presence, that blesteth this fountain with success. They who went in before, and did not watch the

angel, and take advantage of his motion, found no benefit of their stepping in. Those now who wait not for the moving of God's angel, but by a devotion of their own forming and timing, rush before God, as the horse into the battle, and hope for success, are sure to be defeated in their expectations.—No Cross No Crown.

The Lesson of a Life.—In December, 1845, in the Department of the Vosges, Xavier Thiriat, a boy of ten, accompanied four young girls of about the same age to the church. They had to cross a brook, over which was placed a single loose plank. The boy crossed safely, the first girl who attempted it, fell in. The boy jumped in, pulled her out, and then, walking in the water, guided each of the girls across. Some time was lost by this, and the party reached church late. Xavier, ashamed of being late, did not go up to the stove, but kept behind. He reached home chilled, a dangerous disease followed, by which he was left a complete cripple for life; his only mode of moving about was on hands and knees, so completely were his legs paralyzed and distorted. Coming of very poor people, there was every prospect that Thiriat would be a heavy charge to his family and a wretched burden to himself. Instead of this, he reached manhood bright, cheerful and intelligent. Reading all the few books which he could lay hold of, he was soon the best educated man in his district, and rapidly acquired extensive influence, which was always used for good. He induced the young people to read and to study. Some contributions to the local news paper, the *Echo des Vosges*, attracted attention and made him known, the result of which was that further intellectual opportunities were extended to him. He made himself a good botanist, meteorologist and geologist, instructed others in these branches, and procured the foundation of several local libraries. He could not, however, be satisfied without achieving his complete independence and earning his support. He obtained the position of manager of the telegraph at a neighboring town, was made secretary to the Mayor, became a favorite correspondent of several agricultural papers, and received the highest reward of the French "Franklin Society"—its gold medal.

All this was accomplished by native force of character and strong religious feeling, under circumstances not merely adverse, but at first sight absolutely hopeless. A horrible deformity, intense suffering, absence of instruction, crushing poverty—all these disabilities were overcome unaided, and this ignorant and crippled lad made himself the light, intellectual and moral, of his whole district.—*Phila. Ledger.*

"Let us labor, therefore, to enter into that rest."—
—Heb. iv. 11.

Do I find the true rest of my soul in Christ here on earth, that so I may be preparing to rest with him forever in heaven? Do I bear in mind that labor, diligent and faithful labor, in the field of my own heart and in the field of the world, is the only evidence of being fitted for that rest, and that they who labor not now for Christ, shall not rest with him hereafter? Does the prospect of that rest, blessed, satisfying and never ending as it will be, cheer and encourage me to be faithful to the end?

THE GOLDEN MILE-STONE.

Selected.

Leafless are the trees; their purple branches
Spread themselves abroad, like reefs of coral,
Rising silent

In the red sea of the winter sunset.

From the hundred chimneys of the village,
Like the Afeet in the Arabian story,
Smoky columns

Tower aloft into the air of amber.

At the window winks the flickering fire-light;
Here and there the lamps of evening glimmer,

Social watch-fires

Answering one another through the darkness.

On the hearth the lighted logs are glowing,

And like Ariel in the cloven pine tree,

For its freedom

Groans and sighs the air imprisoned in them.

By the fireside there are old men seated,

Seeing ruined cities in the ashes,

Asking sadly

Of the Past what it can or'er restore them.

By the fireside there are youthful dreamers,

Building castles fair, with stately stairways,

Asking blindly

Of the Future what it cannot give them.

By the fireside tragedies are acted,

In whose scenes appear two actors only,

Wife and husband,

And above them God, the sole spectator.

By the fireside there are peace and comfort:

Wives and children, with fair, thoughtful faces,

Waiting, watching

For a well-known footstep in the passage.

Each man's chimney is his Golden-Mile-stone;

Is the central point, from which he measures

Every distance.

Through the gateways of the world around him.

In his farthest wanderings still he sees it;

Hears the talking of him, the answering night-wind,

As he heard them

When he sat with those who were, but are not.

Happy he whom neither wealth nor fashion,

Nor the march of the encroaching city,

Drives an exile

From the hearth of his ancestral homestead.

We may build more splendid habitations,

Fill our rooms with paintings and with sculptures,

But we cannot

Buy with gold the old associations!

Longfellow.

LIVING FLOWERS.

Selected.

BY SARAH DOUDNEY.

"Flowers that could bless you for having blessed
them, and will love you for having loved them: flowers
that have eyes like yours, and thoughts like yours, and
lives like yours; which, once saved, you save forever."

—John Ruskin.

In the cool, tempered light, and mellow shade,
I saw you stand amid your plants one day,
Sprinkling the slender fronds that seemed to fade
With showers of silvery spray.

And as the treacherous sunlight softly crept
into the ripples of your golden hair,
And your white robes across the blossoms swept,
I thought they loved your care.

If you could kiss the rose's velvet mouth,
To charm the cruel cankerworm away,
And cry, "Awake, O north wind! come thou south!
Breathe on my flowers to-day!"

Would you not love to save them from the blight,
And flush them into beauty fresh and new?
To bring them gifts of fuller life and light,
Sunshine and limpid dew?

This you can do, for fairer flowers than these,—
Flowers that have thoughts and feelings like your own
Whose stems are broken by the stormy breeze,
Whose freshest tints are flown.

Out in the darkness of the miry street
Those bruised lilies in their weakness lie;
Down-trodden by the tramp of reckless feet,
Left there alone to die.

Go, raise them gently,—wash away the stain
On their white petals with your tender grief;
Your tears shall fall like showers of precious rain,
Cleaning each sullied leaf.

Oh, give those human blossoms human love!
Uplift the fallen seventy times and seven;
Save these sweet living things to bloom above,
In the fair land of heaven.

[In her desire to stimulate her readers
the discharge of loving service to their fell
creatures, the author of the above bare,
lines too much overlooks the important f,
that

"Transformation of apostate man
From loth to wise, from earthly to divine,
Is work for Him that made him."

"No man can save his brother," or indeed,
do him any *spiritual* good, except as he is
sisted by the Spirit of God, to which all
praise must ever be ascribed. Yet the Lord
does often condescend to use His servants
instruments in carrying out His gracious
signs—and happy will it be for all those
we seek to be guided by Him in their labors
among men, and faithfully follow where
He leads them.]

[The following extracts from a letter
that worthy minister of the Gospel, the late
Wm. Kennard of Ohio, are offered for insi-
tation in "The Friend,"]

6th mo. 24, 1838

My dear friend, Joanna Meader,—My
husband has oftentimes been brought to sympathize
a feel for thee, my dear friend, in the loss a
sore bereavement which has been dispensed
to thy lot, with desires that the everlasting
Arm may be underneath to sustain and be
up thy tried and proved mind, not doubt
thou hast known a safe hiding place, a refuge
to flee unto and find safety; an anchor to the
soul that is both sure and steadfast, amid
all sorrows and tempests, both inwardly and
outwardly. But after such seasons in which
we have freely drank of the pure river of the
water of Life, and sat at the Divine Master
feet, and eat of that bread which he has me-
ritfully blessed unto us, and hath satisfied our
spiritual appetites, and filled our souls with
his praises; after all this, we are brought
again and again to feel our poverty and lean-
ness in renewed trials that await us, and the
old adversary, who dared to tempt the dear
Son of God, is ever ready to step in, not only
to impede our progress Zionward, but to cast
down below hope; and would, if possible, de-
ceive the very elect; but thanks be to God
for his unspeakable gift, even the gift of faith
in Christ Jesus, which works by love to the
purifying of our hearts, and overcomes the
world: this is at some seasons hard to keep
Paul fought the good fight and kept the faith
and had to rejoice, when he was ready to be
offered, knowing that there was a crown of
righteousness which the Lord, the righteous
Judge, had laid up for him, and not for him
only, but for all those who love the appearance
of the Lord Jesus. Oh! that this may be my
lot, and the portion of all his tribulated fol-
lowers, who have none to look to, none to flee
to but Him alone, who is the Alpha and
Omega, the beginning and the end, who liveth
and was dead, and is alive forevermore.

6th mo. 7th.—My mind is turned in tender

owards you—dear and fatherless child—that you may be a comfort to your mother, to alleviate her sorrows by walking in the counsel of the Lord; taking his yoke upon you and learning of Him, who is meek and lowly of heart. Thus would the Lord, in His rich mercies, be pleased to be a father to the fatherless; and He who is the Parent of the whole human family, sees and beholds the children that love Him, and is not in the way of evil doers, but keeps commandments, which is life everlasting. He hath ever blessed; and all those who first the kingdom of God and His righteousness, shall have added unto them such as are necessary. It is the meek that inherit the earth, and are blessed in basket and store, and have a well-grounded hope anchor to the soul, a staff to lean upon, a foundation and corner-stone to build.

And "such as hear these sayings of God," said the dear Lamb of God, "and doeth shall be likened to a wise man who has built his house upon a rock," which stood the storm and fell not,—you may read the whole in your leisure. Surely there is much to be had through the blessing of Heaven, to be read by a frequent reading of the Holy Scriptures. They are profitable for doctrine, as a school master to bring us to Christ, and is your day and visitation, whilst ye are in the light, and whilst the mind is tender and sensible when good comes. Seek, and ye shall find. Oh blessed promise, to find Him whom Moses in the law and the prophets wrote: Jesus of Nazareth, the Emmanuel, with us, who is holy and is calling unto us, without which no man shall see the light.

His call is loud and awakening, but not painful; yet the sheep know his voice, and reaches the witness in the heart. It quickens, it animates, it gives life, it raises the dead. It restores the lost sheep of the house of Israel, and when restored, what joy is unto you, that likewise joy shall be in heaven over one sinner that repenteth," and "there is joy in the presence of the angels of God," with the redeemed; and these things the song of Moses the servant of the Lord, and the song of the Lamb, saying, "Great and marvellous are thy works, Lord Almighty, just and true are all thy ways. King of saints! Who shall not fear thee, Lord, and glorify thy name?" Therefore, children, bear with me, and suffer me more to entreat you, as you love your souls, to make your calling and election sure; "behold I come as a thief, blessed is that watcheth and keepeth his garments, he shall walk naked." Therefore, keep your garments unspotted, your eye single, and your heart clean, and ye shall grow stronger and longer, and reap an hundred fold in this life, and in the world to come life everlasting. Love to thee and thine, in which my wife, I am thy affectionate friend,

WILLIAM KENNARD.

owards his end, being weak in bed, and came to visit him, and speaking of the things of the world, and the liberty some of the professors of truth took to revile the innocent, said, "Dear friend, be not discouraged, though there is darkness in Egypt, there is light in Goshen; yea, it is such darkness as can be felt. My soul hath travailed under the weight of it many times; and thought it had not been so, the Lord will have re-

gard to his own seed. * * * Do not distrust his goodness, he never fails those who have a true dependence upon him; my soul is a living witness of it."—Account of the *Last Illness of Thomas Bosby*.

For "The Friend"

Indian Aid Association of Philadelphia Yearly Meeting.

The eighth annual meeting of this Association was held on Fifth-day evening, Fourth mo. 19th, 1877.

Interesting reports of the work among the Indians in the West were read. There has been a considerable improvement in the mode of keeping accounts at the Agencies, and in the distribution of supplies. The quality of some of these supplies, especially beef cattle, has also been much improved. These changes have been largely owing to the efforts of the Superintendent, Dr. Nicholson, who has earnestly followed up those of Enoch Hoag.

From various causes the previous hopeful condition of the Osages has been much changed; their boarding-school had to remain closed during several months, and the activity in making farms, &c., came to a stand still; but Congress at its late session having made a special appropriation for them, their affairs are now in a better condition. Seven Agents continue to act under the care of the Associated Executive Committee. Three of these have suffered much in health the past year. They are exposed to malaria, and have a great amount of anxiety and labor to pass through. The compensation being small, and their homes remote from schools, &c., they find it difficult to support and educate their families. Their trials and isolated position entitle them to the sympathy and kindly thought of Friends. It is satisfactory to know that in some cases the Associated Executive Committee have made an addition to the salary allowed them by the government. There are twelve boarding- and two day-schools in successful operation, with about nine hundred children enrolled. These schools are believed to be fully equal to Indian schools generally, and it is worthy of note in this connection, that no member of Philadelphia Yearly Meeting is now engaged at any point in the Indian service. It is much to be hoped that we may not fall short of our duty in this matter.

The religious interests of the Indians have largely occupied the attention of the Associated Executive Committee. It is believed that at all the Agencies a very decided religious influence is exerted by the Agent and the employes. At two of these, simple church organizations, including a few Indians, have been formed. It is not expected that any of these will at present become members of the Society of Friends, although the hope was expressed that with further instruction in some of them may, under the Divine blessing, become qualified for membership with us. As usual, the Women's Aid Committee furnished an interesting report of the three schools especially under the care of this Association: the Wyandotte, Wichita, and Kiowa and Comanche. In addition to the care extended to the children, the Indian women have been instructed in the "white women's ways," and attention was again called to the importance of this service with the recommendation that suitably qualified persons who would devote themselves to this branch of the work, would find abundant service at any of the Agencies. The Women's Aid Committee have sent

603 articles of clothing, 188 pairs of shoes, 43 pairs of blankets, 2938 yards of material for clothing, &c., and a variety of other articles of dress, toys, books, pictures, tracts, &c., the value of which has been to

81,539 37

In addition to which, books, costing \$124.32, a special contribution for the purpose, have been sent. The salary of the assistant teacher at the Wyandotte Mission, for four months, has been paid.

The reading of the reports, followed by a rapid summary of the present condition of the Indians at the different Agencies by a Friend, familiar with their condition, was listened to with much interest, and though little verbal expression was made, it seemed manifest that the judgment of the meeting was that the work should go on and the laborers be encouraged to do what their hands might find to do.

Upon nomination of a committee appointed for the purpose, the old officers were continued for another year.

Sponge Fishing in the Bahamas.—When a vessel arrives at the fishing-ground it is anchored, and the men in small boats proceed to look for sponges in the waters below. The water is a beautiful light blue in color, and so clear that a sixpence can easily be seen on the white sand bottom in thirty-five and forty feet of water. Of course when there is no wind, and the surface of the water still, the sponges are easily seen, but when a gentle breeze is blowing, a "sea-glass" is used. A sea-glass consists of a square pine box about twenty inches in length, with a pane of glass about 10x12 inches placed in one end water-tight. To use it the glass end is thrust into the water, and the face of the operator is placed close to the other. By this means the wave motions of the water are overcome, and the bottom readily seen. Sponges, when seen on the bottom attached to the coral rocks, look like a big black bunch. They are pulled off their natural beds by forked hooks which are run down under the sponge, which is formed like the head of a cabbage, and the roots pulled from the rocks.

When brought to the surface it is a mass of soft, glutinous stuff, which to the touch feels like soft soap or thick jelly. When a small boat-load is obtained they are taken upon the shore, where a crawl is built in which they are placed to dry, so that the jelly substance will readily separate from the firm fibre of the sponge. These crawls are built by sticking pieces of brush into the sand out of the water, large enough to contain the catch. It takes from five to six days for the insect to die, when the sponges are beaten with small sticks, and the black, glutinous substance falls off, leaving the sponge, after a thorough washing, ready for market. To the fisherman generally the occupation is not a lucrative one. I am told that the wages will hardly average three dollars per week, beside board. There is but little diving for sponges, except for a particularly fine bunch which cannot easily be got with the hook. The sponge is

formed by small insects and is the hive in which they live. Different qualities are found growing side by side, although in certain regions the finer and more valuable sponges are found.—*New Haven (Conn.) Register.*

For "The Friend."

The Gospel a Power,—not merely a record claiming assent.

(Continued from page 270.)

It is here clear, the Gospel, pointed to by this eminent man and servant of God, was that revelation of the Father's will, and dispensation of the Spirit, made known to man in sending His Son, a Lamb without blemish, to be a propitiatory sacrifice for the sins of all mankind, blotting out the hand-writing of ordinance, and calling all men away from the deadness of the letter, to the revelation of His Spirit and power in the heart; that by faith, herein brought forth, working repentance and amendment of life, we may come to have fellowship with the Father, and with the Son, and thus be made partakers in larger degree of the Divine nature, and built up in a more lively hope, through Christ, who became flesh, suffered and died, that we might be united to Him in this Holy Covenant of Life; the gospel of which Paul writes.

In its application to each individual condition, therefore, we cannot separate regeneration and salvation from this inward work of the Lord. Though we may understand religious truths clearly, and love to sit under the outward teaching of them, yet we may not have come to that living witness for God in ourselves which would be as a hammer to break in pieces our flinty hearts, and would give us hearts of flesh. Yielding to this necessary work, we should surely be introduced into a measure of Christ's sufferings for us, whether acquainted with the outward history or not; and thus realize in our own experience, the blessed truth, that it is the power and life extended to mankind by Christ's Spirit, as well as by His coming in the flesh; His death, atonement, and resurrection, that any are renewed and born again;—brought to see their condition by nature; their inclination to sin, and need of Divine help to escape it. Robert Barclay, in his Apology, pages 184, 185, in pointing out the religious state of the heathen world, under a former dispensation, says: "They also had a knowledge and discovery of Jesus Christ inwardly, as a remedy in them, to deliver them from that evil seed, and the evil inclinations of their own hearts; * * * and by His working in them many were brought from unrighteousness to righteousness, and to love that power by which they felt themselves redeemed."

The Scripture record, containing "a faithful historical account of the actings of God's people in divers ages," and a full and ample narration concerning Christ and His blessed mission, is ever precious to all who are seeking spiritual food. The Scriptures cannot, however, of themselves, as they also declare, make men wise unto salvation, but by faith in Him of whom they testify, and the aid of that Power which revealed them. In the words of the Apostle; they are "Profitable for doctrine, for reproof, for correction, for instruction in righteousness;" when read under a measure of Holy help. It is the spirit and not the "letter" which conveys awfully the message and mind of the Redeemer.

It may be said with some degree of truth,

that the principles of the Gospel, in the assumed general progress of mankind, have become more widely diffused, so far as they may be received by reading the Holy Scriptures and hearing their Gospel truths spoken, but do the great body of believing believers adorn their profession by a life of separation from the spirit of the world, consistent with the truths thereby conveyed; and does not the manifest lack of real piety show how very many are resting in religious observances; in outward testimony; in oral instruction; or on efforts of their own to teach that they have thus learned, without having themselves been first taught in the school of Christ? These are they who as a class are resting in what has been "done for them without them;" and who claim to be believers in the Gospel, and entitled to its gracious benefits, though unwilling to participate in the ministration of suffering; shunning the cross and its fiery baptism, without which the work of Christ in that prepared Body is rendered nugatory. A formal life and belief, begets a nominal faith.

I would therefore regard the outward Gospel as glad tidings, as a declaration of God's infinite grace, love, and mercy, seeking man's redemption by directing him to the Word quick and powerful within him, and to the Lamb of God who tasted death for every man; and who bore in the agonizing hours of his death, the weight of the sins of a world lying in wickedness, that He might bring us to God; into a state of humble submission to His own Divine Light and Power, of which it is the privilege of every rational immortal being to receive "a measure and manifestation." What a consolation it is to know we are not left to depend upon external help, but in addition to the invaluable records of Holy Scripture, and the labor of gifted servants in this and past ages, we are visited from time to time from the Source of all-availing help, unlocking the spiritual treasures of the Kingdom, and placing man, by His own power, in a capacity to serve the Lord, who has thus revealed Himself.

Did not this Divine Helper touch the heart of the men of Athens, upon that memorable occasion when Paul met them; and in the exercise of his Gospel mission was instrumental in directing their attention, and bringing many to the true God, to the more excellent way by Jesus Christ. If this were not so his preaching would have been in vain. The Apostle found them in ignorance of their true relationship to their Creator, as responsible beings, whereof he says, "I perceive that in all things ye are too superstitious;" yet it is evident they had been reached by the Witness for God, and some among them prepared to receive the truth preached.

The Old Testament Scriptures abound with many evidences to show, there was no subject nearer, or more frequently presented to the minds of the inspired teachers and writers under the law, than that which pointed to a larger effusion of the Spirit, when the Old dispensation inscribed upon tables of stone, would end by the bringing in of the New; and their concurrent testimony in this direction affords one of the strongest proofs, next to the heart's own experimental acquaintance with the teachings of the Holy Spirit, that there is indeed a reality in the Gospel they foresaw; and that it is the Divine will so, to visit every soul, that it shall feel its need, and

be brought nearer,—to feed from day to day upon the Bread of Life. This surely is the purpose of the brighter effulgence of truth under the Gospel.

I have often thought the purest, most altered, unwavering examples of faith and devotion to truth, of which we have any record are to be found among those men in Hebrew history, who faithfully filled up their mission as leaders and teachers of that people who were mercifully followed, although forgetful of God's providences. That they should have so generally rejected the Savior in His personal appearance, when their history and teaching would have led to them whom their own prophets declared would come to reign as Lord and King, is truly humbling to contemplate.

I believe the Gospel, in the sense in which we have been endeavoring to define it, is as much a mystery, and as little understood now by all who have not learned it even Paul did, by receiving Christ inwardly revealed; as His coming in the flesh, to enlighten and die for a guilty world, was a mystery to the mass of mankind when He was manifested in the flesh, and was revealed only to those who were willing to receive Him. The story of Abraham is deeply interesting. To him was given in that remote age, a sense of the sight of the glory that should in after years be unfolded; that in him and his seed should be all the nations of the earth be blessed. He declares that the gospel was preached to Abraham, and he was a wonderful example of unquestioning faith, manifested in the midst of prevailing darkness and estrangement from the true God. Separated from his idolatrous kindred, the life he thereafter led accorded with the Divine purpose concerning mankind in raising up and preserving a people, through whom should come the promised Seed, who is Christ, who was of Abraham's lineage, concurring to the flesh.

It is evident a knowledge of the fulfiling of Christ in the flesh, was not an essential condition, or this knowledge we have been within the reach of all; but that as in this Gospel day, all did receive a measure of Holy Light, and as this was followed by souls were gathered to the blessed Shepherd and though I have stated the Gospel is a mystery to many, Why is it? it is not because it is withheld, for all are called to partake of promises, and such as come humbly will be rejected.

As the professed disciples of Christ countweigh the solemn responsibilities resting upon them individually in view of what has been done for us without us, even while we were sinners; and that in the loving kindness of God we are followed and instructed from day to day, and from hour to hour, should not be invited to serve the Master freely, in whatever way He may point out. Then would His church be adorned, and rejoice more as a household and family in the fullness of the blessings conferred; and under some sense of realization of Isaiah's prophecy, look with hope and rejoicing to that day, when "the earth shall be full of the knowledge of the Lord, as the waters cover the sea."

Philada., 4th mo. 1877.

Be not weary in doing what God bids you or in waiting for what God has promised you. Your work may be difficult, but persevere

The delay may seem long, but it will come in an end. Look to Jesus, rest on the promise, go on with the work, and in due season you will be at the rest if you faint not.

A Remarkable Story.

From the transactions of the Fourth National Prison Congress, held at New York, 1876.

A young Englishman, left an orphan by the death of both parents while still in his tender years, and finding little sympathy or encouragement on shore, became a sailor boy as soon as he had reached an age proper to be received on shipboard. Coming into Liverpool from one of his voyages, he committed a serious act in a state of intoxication, and was sentenced to transportation. His hard life in the battle of life had blighted him almost every man to such a degree that his hand was against every man, as he believed every man's hand to be against him.

This young man arrived in Australia a short time before Captain Machonochie commenced his interesting experiments on prison reform at Norfolk Island. Believing himself to be unjustly as well as cruelly treated by the keepers, he resolved to avenge himself on them by giving all the trouble he could. In his design he succeeded so well, that he was counted the worst convict ever sent out from the mother country, and received in a ten times more lashes than any prisoner had before; yet he bent not a hair's breadth before these terrible flagellations. No effect did they leave on him, that as a disciplinary punishment, he was at last sentenced to be chained to a rock off the harbor of Sidney, for two years. His chain was twenty feet long, and so savage had he become, that the person charged with giving him food, dared not present it with his hand, but reached it out to him from the end of a long pole. A hollow scooped out of the rock, large enough to hold a man, with a board covering, perforated to admit air, was his only bed. He became such an object of interest, that people would go out from Sidney in boats to look at him on his rock, as they would at some rare wild beast, and would often throw fruit, cakes and other things to him, as children do to animals in a menagerie. When Machonochie was put in charge of the penal colony of Norfolk Island, this man, before the expiration of two years, was sent to him, as all the worst Australian convicts were. As his first arrival there, the watch was first set to the task of subduing the untamed bullocks, a commission which he faintly gave back to him some portion of his original manhood; all traces of which had long since disappeared, under the cruelties to which he had been subjected; for he now felt that he had become of some use in the world, and was observed that he carefully avoided all harshness towards the dumb beasts; and the gentle, kindly and persuasive methods he employed with them were the admiration of the officers and men. This task done, other work was found for him; but he accomplished every thing at which he was set so speedily, that it was a little difficult to keep him employed. At length Machonochie thought him fit for establishing a signal station, and our young man was placed in charge of it, with a neat little cottage attached for his residence, and a small garden. He was now perfectly happy, equalizing vessels and cultivating his little

patch of soil; and under these humanizing and refining influences, he soon developed instead of the utter bestiality previously shown, not only manly but even generous qualities. His gratitude knew no bounds. The first potatoes, the first beans, the first fruit, the first of every thing growing in his garden, before he had so much as tasted them himself, went all ways to the table of his friend, his benefactor, his earthly saviour.

After awhile, Sir George Gipps, then governor-general of the Australasian colonies, paid a visit to the island, and was conducted over the settlement. The last place inspected was the signal station. As they were approaching it, Sir George, observing the prisoner, said, "Captain, what dapper, active little fellow have you up there?" Without answering the question, Machonochie said, "Do you remember the prisoner that was chained to the rock at Sidney; Sir George?" "Perfectly well," he replied, "That's the man," said Machonochie. Upon this, Sir George stopped short, exclaiming with amazement, "Bless my soul, Captain, what have you done to him?" "Nothing," was the quiet reply—"except to treat him as a human being, as a brother man."

A Swearer Alone with God.—A carrier in a large town in Yorkshire heard his cart enter one day in the yard swearing dreadfully at his horses. He was shocked to hear the terrible oaths that resounded through the yard. He went up to the young man, who was just setting off with his cart for Manchester, and kindly expostulated with him on the enormity of his sin, and then added: "But if thou wilt swear, stop till thou get through the turnpike on the moor, where none but God and thyself can hear."

The poor fellow cracked his whip and pursued his journey, but he could not get over his master's words. Some time after, his master observed him in the yard, and was very much surprised to see him so altered. There was a seriousness and quietness about him which he had never seen before, and he often seemed as if he had something to say that he could not get out. At length his master was so much struck with his manner, that he asked him if he wanted anything.

"Ah! master," said he, "do you know what you said to me about swearing? I was thunder-struck. I went on the road, and I got through the turnpike, and reached the moor; and there I thought that, though I was alone, yet God was with me; and I trembled to think how He had been with me, and had known all my sins and follies all my life long. My sins came to my remembrance, and I was afraid that He would strike me dead; and I thank God that I have been roused to seek after the salvation of my poor soul."

The master, as may be supposed, was overjoyed to hear the young man's confession; and it is gratifying to know that his subsequent conduct gave proof of his having ceased to be a slave to sin.

"A word spoken in due season, how good is it!"

The end shall crown the work,
Work on then, to the end,
Though oft the way is dark,
And clouds portend.
The work is ours to do,
Enough for our faint sight;
The end God knows. Press on!
The crown—is light.

"And he that watereth shall be watered also himself."—
Prov. xi. 25.

About thirty years ago there were living in a ruined cottage on the Welsh coast a very poor and aged couple—old Matthew and Hannah Edwards; their grandchildren had long since been married and gone to live elsewhere. Matthew was ninety years of age, and his faithful old helpmate was upwards of eighty. Both had become almost blind, through age; but he still followed his life-occupation of weaving fish baskets for himself and his neighbors, and was daily to be seen, when the tide was out, on his way to and from the *Woirs*, for the fish, which he sold to the neighboring gentry, when it was good enough to offer, the refuse supplying their own homely meal. They had also a little plot of potatoe ground around their cottage, where they grew potatoes and cabbages, and so they contrived to live. They were now too feeble to go any distance from home, but there was one house within their reach, about half-a-mile off, where the country folks said, "the strange English gentry" lived; and hither they from time to time brought their little sale of fish. It was soon discovered by the good mother that these poor people were very destitute; and, having a large family of young folks, she would often send one of them down the lane to old Hannah's with some milk or soup, or other little matters, which the poor people were very thankful to receive.

There was one of the daughters, a pretty, quiet girl of sixteen, on whom this little office most frequently devolved, and she became very fond of running over the fields and down the lane, thus to visit her old friends. On one occasion, after expressing much gratitude for the kindness shown, the old woman said there was one thing for which they very greatly longed, and which they had often asked the good Lord to be pleased to grant them before they died, namely, to hear once more a chapter from His own blessed book. It was many years since they had been able to walk to church, and nearly as long since they could see to read for themselves. Of course C. said she would be pleased to do so, and from that day her visits became more frequent, and often twice in the week might she be seen sitting reading to those poor eager-listening souls. It was simply from good nature that their young friend had complied with their request, for as yet she was ignorant of the true value of the precious treasure which she brought them, for which their grateful prayers ascended for God's blessing on her whom He had thus sent to bless them. C.'s attention was arrested, and her mind became much occupied with the things which were thus spoken to her; and now she began, in her own private retirement, to "seek the one thing needful." This was her starting point for eternity; and, as a soul never sparingly receives the grace of God itself without earnestly desiring and seeking the like blessing for those most dear, she soon communicated her new feelings and aim to her favorite sister, a few months older than herself, and together they set out for the better land.—Free Church of England Magazine.

Prohibition reigns in more than one-half of Texas. The *Temperance Tablet* says:—"It is truly encouraging to note the number of

counties voting local option. True, a great many have defeated it, but there are over one hundred counties in Texas, and from what we can learn, a large majority of those voted have been in favor of local option. In most counties where there is a majority of negro voters whomey gained the day, the negroes voting almost unanimously for it. Especially is this the case in Burlington, Red River, and many other counties."

THE FRIEND.

FIFTH MONTH 5, 1877.

It is a cause for mourning, that the efforts to prevent hostile collision between Russia and Turkey, have proved unsuccessfull; and that the former has issued a declaration of war. The professed object, is the protection of the Christians under the Turkish government from oppression and violence. These principally belong to the Greek Church, which is the established religion of Russia; and that power claims a right to interfere for the benefit of its fellow-professors. Judging from the steady and long continued encroachments of Russia on the territory of its feebler neighbors, there is reason to believe that other motives are mingled with the ostensible reasons for entering into this war. The Turkish government, while promising respect, and protection to all its subjects, has objected to such interference in its internal affairs, as an infringement on its rights as an independent nation. Its conduct hitherto would indicate a lack either of ability or of sufficient earnestness, to restrain the fanatical excesses of its Mohammedan subjects.

The passions of the people will, no doubt, be greatly stimulated by the feeling on both sides that they are fighting in the cause of religion; for it is a remarkable fact, that those wars which seem to be carried on most fully under the influence of the enemy of all righteousness, are claimed to be waged in support of the religion of the Prince of Peace, who commanded His disciples to return good for evil, and to give food and drink to their enemies, as the true children of our Heavenly Father; who causeth His sun to shine on the evil and on the good, and sendeth rain on the just and on the unjust. The precepts of the Koran do not breathe the benign spirit of the Gospel of Christ; but sanction resort to arms as a means of extending the power of Islamism in the earth. They promise future happiness as a reward to all who are killed when fighting in its cause against "infidels."

Both Russia and Turkey are largely in debt; and must depend on additional loans for the means to equip and pay the large armies which are confronting each other. Thus the responsibility of aiding in the work of slaughter is likely to be spread wider and wider, as capitalists are induced to advance the requisite funds to the contending parties. The papers state that already some large orders for arms and ammunition have been received by manufacturers in this country. We observe also, speculations as to the probable effect in raising the price of grain in America, and promoting the extension of American commerce. Such is the deceitfulness of the human heart, that hopes of business prosperity founded on such calculations may lead some to look with a degree of com-

placency on the horrible scenes transacting in foreign lands; or at least, may in measure blunt their feelings of sympathy with the sufferings of their fellow-beings. When we reflect that every dollar of gain from this source may be at the expense of a ten-fold loss to others; that the true Christian will feel more sorrow than joy at the prospect of pecuniary profit thus opened before him.

There is one source of comfort in these afflictive dispensations: The Lord ruleth among the children of men, He is able to make the wrath of man to praise Him; and the remainder of wrath, He will restrain.

SUMMARY OF EVENTS.

UNITED STATES.—On the 24th ult., at noon, the United States troops left the vicinity of the State House in New Orleans, and retired to Jefferson barracks, three miles distant. The Legislature of Louisiana has elected Judge Spofford, U. S. Senator, by an almost unanimous vote. The Republicans appear to have heartily united with the Democrats, and to desire that hereafter there should be but one political party in the State. The Louisiana Commission returned to Washington on the 24th inst., and presented their report to the President. They speak warmly of their reception by both parties in New Orleans, and seem satisfied with the result of their labors.

It is stated that there are in New Hampshire 125 Temperance Reform Societies, with a total membership of 65,000.

Another large order for the manufacture of arms for Turkey has been received in Providence, R. I.

On the 25th ult., the Board of Indian Commissioners, in session in Washington, called upon the President to ascertain his views on the Indian peace policy, inaugurated by President Grant. The President answered them that he knew no reason why the Indian policy of the late administration should not be continued.

Among the destructive fires of last week was that which destroyed the bridge at Cas Cob, on the New York, New Haven and Hartford Railroad, causing a loss of nearly \$100,000.

It has been found that a larger number of deputy-masters, assistant U. S. attorneys, &c., than are needed, are employed in some districts, and it is intended that the number shall be soon reduced.

The Darien Exploring Expedition returned to Panama on the 13th inst. Its commander, Wyse, expressed the conviction, from the surveys carried through, that the Inter-oceanic Canal will soon be made, and that through Colombian territory, if public support is given to the project.

During the year ending Third mo., 1st, 1877, 657,295 persons visited the Philadelphia Zoological Garden. The total receipts at the gates were \$151,060.63. Large sums were expended during the year in the enlargement of the buildings, and improvement of the grounds, and numerous additions were made to the collection of animals.

The New York canals will be opened on the 26th inst. Governor Nichols, of Louisiana, has issued a proclamation setting apart the 10th inst., as a day of thanksgiving for the deliverance of the people of the State from past political dangers, and of prayer for future blessings, "so that all the people of the State, forgetting past dissensions and bitterness, may unite in the fulfillment of a common and happy destiny."

A storm of heavy sleet and hail prevailed in northern Nebraska from the 26th to the 28th ult., followed by a snow fall in portions of Iowa and Illinois. From 2nd mo. 31 to 4th mo. 4th, 1877, 603 emigrants, 86 of whom were Americans by birth, sailed from New York for Sydney, Australia.

The Supreme Court of the United States has decided that the State of Virginia has the right to prohibit citizens of other States from placing oysters in the beds of water within her jurisdiction, while permitting her own people to do so.

Two hundred and fifty additional employes of the Bureau of Printing and Engraving, mostly women, have been absolutely necessary. This reduces the force to the number absolutely necessary.

The total number of interments in Philadelphia last week was 297, including 84 children under two years of age.

The *Market*, &c.—New York.—Superfine flour, \$7.75 a \$8.50; State, extra, \$8.40 a \$8.60; finer brands, 29

a \$13.00. No. 2 Chicago corn, 71 cts., Yellow 71½ cts., Oats, 54 a 68 cts. Philadelphia.—Am gold, 106½. United States 6's, 148½, 113½; do. cents, 110½; do. 4½ per cents, 108½. Cotton, 11 cts. for inland and New Orleans. Flour, \$7 \$12.00. Pennsylvania red wheat, \$2.15 a \$2.20; and white, \$2.25. Penna. rye, \$1.16. Yellow corn, 72 cts. Oats, 50 a 55 cts. Sales of 400 bush of 4½ a 7 cts. per lb., gross for extra; 5½ a 6 cts. for f good, and 4 a 5 cts. per lb., gross for common. E sold at 4½ a 7½ cts. per lb., gross. Hogs sold at 7 cts. per lb., net for common; 8½ a 8½ cts. lb., extra.

FOREIGN.—The long threatened declaration upon Turkey by Russia, was issued by the Emperor Alexander on the 24th ult., and a portion of the Russian forces immediately crossed the Pruth and entered the invasion of the Turkish territory. A stormy dispute of the 25th ult. says, that the Turkish Government protest against a declaration of war, pointing out the efforts of Turkey to improve position of the Christians and satisfy the demands of the Powers.

A telegram from Constantinople states that a bill which the Russian minister has introduced, has issued another manifesto which declares that Bosnia, Bulgarian and Herzegovinian insurrections and the Servian and Montenegro declaration of war were all instigated by Russia. As the Russian finances proclamations will be issued both to the Christian and Mussulman populations of Turkey ordered them to remain quiet and attempt nothing against others, as all who remain quietly in their homes will be molested. The Russian commanders have declared the Danube closed to navigation. Neutral vessels will leave as soon as closed.

Respecting the invasion of European Turkey, a part of the Russian army has invaded Asia Minor, but according to Constantinople reports, their advance has been successfully opposed. It is estimated that 120,000 Russian soldiers had crossed the Pruth by the close of the 4th mo. The Emperor of Russia has telegraphed to the Prince of Montenegro, "I am fully resolved to realize the sacred mission of Russia and to protect God will aid us."

In the House of Commons, on the night of the 2d ult., Shaw, a member for the County Cork, moved the appointment of a select committee to inquire into the nature, extent and grounds of the demand made by the Irish people for a restoration of the Irish Parliament. A heated debate the motion was rejected by a vote of 417 to 97. The Marquis of Hartington, with Fawcett and W. E. Forster, concurred with Government speakers in expressing the most unqualified opposition to home rule in Ireland.

The London press unanimously condemns the Russian manifesto. A proclamation has been issued by the British Government, stating that it is determined to maintain strict and impartial neutrality in the war between Russia and Turkey, and commanding its subjects to abstain from violating the laws relating thereto.

The total import of wheat into the United Kingdom during the fifteen months ending 31st mo. 31st, amount to 29,975,358 cwt., of which 21,291,162 cwt. were from the United States. Total value of wheat imports £22,085,097. During the same period the value of wheat flour into the United Kingdom was 7,469,957 cwt., of which 2,749,574 cwt. were received from the United States.

The latest intelligence from Mexico is to the effect that tranquility prevails throughout the country, peace and confidence being restored with the acknowledgment of Diaz.

FRIENDS' SELECT SCHOOLS.

A suitably qualified Friend is wanted as Principal of the Boys' Select School, at the opening of the term, the Ninth month. Application may be made to the following Friends:—Wm. S. Ekin, 20th Fifth St., Edward Marley, 127 South Fifth St., James Smiles, 415 Market St., George J. Sattergood, 413 Spruce St.

FRIENDS' ASYLUM FOR THE INSANE, New Franklin, (Twenty-third Ward,) Philadelphia. Physician and Superintendent—JOSHUA H. WORTHINGTON, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board Managers.

WILLIAM H. PILE, PRINTER,

PHILADELPHIA.

Ephesus.

For "The Friend."

T. Wood, in the interesting narrative of his researches at Ephesus, and his discovery of the long lost temple of Diana, says: "The ancient city of Ephesus was situated on the river Cayster, which falls into the Bay of La-Nuova, on the western coast of Asia Minor.

Of the origin and foundation of Ephesus we have no historical record. Stories were told which ascribed the settlement of the place to Trocius, the son of the Athenian king Erichon, while other legends spoke of the Egyptian Sesostris, as having carried his constituents into the Ephesian territory.

With other cities of Asia Minor, Ephesus fell into the hands of Croesus, the last of the kings of Lydia, and on the overthrow of Croesus by Cyrus, it passed under the heavier yoke of the Persian despot. Although from that time, during a period of at least five centuries, to the conquest by the Romans, the city underwent great changes of fortune, it never lost its grandeur and importance.

The Temple of Artemis (Diana), whose founder had become almost proverbial, tended chiefly to make Ephesus the most attractive and notable of all the cities of Asia Minor. Its magnificent harbor was filled with Greek and Phœnician merchantmen, and multitudes flocked from all parts to profit by its commerce, and to worship at the shrine of its tutelary goddess.

The City Port was fully four miles from the city, which has not, as has been supposed, needed far if at all from the ancient sea-board. This fact is proved by the extensive remains of the massive stone embankment on the north side of the river Cayster, which I succeeded in tracing, without difficulty, to a distance of about 400 yards of the present sea-board.

At the point where the river, changing its usual course, turns abruptly to the north, a canal was cut, leading direct to the City port, which was snugly ensconced behind the rocky hill near the western extremity of Mount Prion. The form of the port is clearly defined by the tall bullrushes which now grow nearly the whole area, leaving only a small patch of water on the south side near the centre, which is always clear and fresh, being probably supplied by one of the numerous springs which abound at Ephesus. The bullrushes grow to the height of fifteen feet, and a beautiful yellow iris marks the bound-

dary of the port during a certain season of the year. Wild fowl have here a safe refuge from the sportsman.

The city of Ephesus was built chiefly upon the slopes of two mountains, Prion and Coressus. The city wall, which is said to have been built by Lysimachus, can even now be traced for nearly its whole length, as in its tortuous windings it follows the lofty and irregular ridge of Mount Prion, which bounds the city on the south side, and thence runs down westward to within a few yards of the mountain stream which falls into the Cayster near the canal. Then crossing the extremity of Mount Prion, and returning eastward, it encloses the ancient fort, commonly but erroneously called St. Paul's Prison. From this point dipping down the precipitous side of the rocky steep on which the fort stands, it runs to the edge of the canal near the City Port, and here was the gate through which the city was entered from the sea.

The wall is again to be seen on the north side of the port at the eastern extremity, being continued northward for a considerable distance; then again turning eastward toward the Coressian gate and skirting the mountain called Coressus, at some distance up the side, till it reaches the Magnesian gates, from which it makes a circuit enclosing the large mound between these gates and Mount Prion. The remains of three other city gates, making in all six in number, may be seen distinctly in the mounds which mark their sites. One of them is near the western extremity of Mount Prion, and nearly opposite to the fort called St. Paul's Prison; a second is in the plain on the north side of the city, and is not far from the Scerapion, and a third is on Mount Coressus, where a path crosses it from east to west. No ruins of buildings remain on the eastern slope of Mount Coressus; but there appears to have been a large cemetery here, consisting chiefly of rock cut tombs, some bearing short inscriptions, which are now much weathered and almost illegible.

At the highest point of Mount Prion, 1300 feet above the sea, a large area has been cleared and levelled. Here, I suppose, were the quarters of the garrison needed for the defence of the wall on this side of the city. I here found several large cisterns sunk in the rock, while at the eastern extremity of the mountain I came across the remains of a large earthenware water-pipe at a high level.

The city wall, 10 feet 6 inches in thickness and measuring 36,000 feet in length, encloses an area equal to about 1027 acres. It is fortified by massive loop-holed towers, from 35 to 40 feet square, averaging about 100 feet apart, near to many of which are the remains of the stone steps which led up to the top of the walls and towers. These steps are six feet wide, and are slightly raised at the outer end, to serve the purpose of a balustrade. In suitable places, where the ground was favorable, were small sally-ports about four feet wide.

Near the eastern extremity of Mount Prion, where the wall is abruptly terminated by a precipice, may be seen some rock cut steps, leading up to the walls, which must have been used by the soldiery more than 2000 years ago.

Not a few substructures of the houses of ancient Ephesus still remain in terrace above terrace, upon the northern slope of Mount Prion. These were doubtless delightfully cool during the summer, but cold in winter.

The summit of Mount Prion commands a very beautiful and extensive view. The river Cayster, winding like a white ribbon through the plain, forms in its course numerous small peninsulas. The Selenian lakes; the village and castle on the hill at Ayaslorek; the bay of Scula-Nuova, (the ancient Neapolis); the mountainous island of Samos, and the still more mountainous coast beyond; the snow-capped Timolus to the north, and the ruined city, mapped out at the feet of the spectator; these, with countless other objects of interest, seen through the lustrous atmosphere of Asia Minor, make up a panorama of exquisite beauty. Ancient Ephesus is now completely deserted; but enough remains of the public buildings to convey to the visitor some idea of the former splendor and magnificence of the city.

During the generations which immediately followed the conquest of Lydia and the rest of Asia Minor by the Persian kings, the arts of Greece attained their highest perfection, and it was within this short period of little more than two centuries, that the great Temple of Diana was three times built upon the same site, and, as recent researches have found, each time on the same grand scale.

It is said that when Alexander the Great first visited Ephesus, he offered to complete at his own cost the temple then building, if the Ephesians would allow him to dedicate it in his own name to Artemis. His request, it is said, was refused in an answer which though it may have betrayed the fear of offending the conqueror, showed great tact, "It is not fitting that one god should build a temple to another god."

That Alexander succeeded better with the people of Priën, is proved by the dedicatory inscription of the temple of that city, found by R. Popplewell Pullan, and now placed with other remains of that temple, in the British Museum.

After the death of Alexander, B. C. 323, Ephesus was taken by Antigonus, who put a garrison here as in other cities of Asia Minor. Antigonus appears to have been far too much engaged in making conquests in Syria and Egypt, where his victories followed each other in rapid succession, to retain possession of the Ephesian territory. He neglected, therefore, the necessary precautions which he should have taken against the stratagems of equally ambitious generals, and the oligarchy which had been appointed to govern Ephesus, treacherously opened the gates to Lysimachus.

During the century between the years 323 and 223 B. C., Ephesus was subject to Antiochus, Lysimachus, Antiochus Soter, Antiochus Theos, and the Seleucidae. In the year 223 B. C., Antiochus the Great became king of Syria and Asia, and Ephesus paid tribute to him till his death, 187 B. C. Ephesus then fell successively into the hands of the kings of Pergamos, Eumenes, Attalus II. and Attalus III.

It was during the reign of Attalus II. that an engineer made the grievous mistake of narrowing the wide mouth of the river Cayster, by embanking it on the north side, and by building a mole on that side along the sea shore. These constructions it was thought, would increase the scour of the river near its mouth, but they had a contrary effect. In course of time the port was silted up, and to this circumstance the decline of Ephesus may in great part be traced.

At the present day, a few small huts near the mouth of the river shelter the fishermen and their families who are engaged in the preparation of Botago, a delicacy made from the roe of the gray mullet, a fish that abounds in the Cayster, and there attains an enormous size. * * * * *

With the decline of its commerce and the destruction of the temple, the importance of Ephesus was gradually lessened, and for many centuries we know little of its history. The city probably fell not infrequently into the hands of adventurers. Among these we hear of a Greek pirate, in the eleventh century. Two centuries later the Turks had possession of the city, and built a considerable town at Ayasalouh, where the great Mosque still stands, with many small mosques, baths and tombs."

When our author commenced his explorations, the site of the great temple was completely lost, and it cost him years of anxious toil and search to find the exact spot on which it had once stood. It appears that a spot of low marshy ground, near the Cayster, had been chosen for the edifice, as a partial protection against the destructive effects of earthquakes with which Asia Minor was frequently visited. When once the temple had been allowed to fall into ruins, this low location favored the rapid accumulation of debris and soil over its foundations, so that Wood found it hidden and deeply covered by cultivated fields.

He succeeded at length to the full extent of his wishes, and has been able to furnish accurate accounts of its dimensions and architecture.

The platform upon which the temple was raised was 418 feet one inch by 239 feet 4 1/2 inches, measured on the lowest step.

The temple itself was 163 feet 9 1/2 inches by 342 feet 6 1/2 inches, and was octastyle, having eight columns in front; and dipteral, having two ranks of columns all round the cella. This accords with the description of it by Vitruvius.

The columns of the peristyle were, as Pliny has described them, one hundred in number, twenty seven of which were the gifts of kings.

They were fully six feet in diameter at the base; and adopting the proportion given by Vitruvius for the improved Ionic order, that is 8 1/2 diameters in height independent of the base on which they were raised, they would be 55 feet 8 1/2 inches high, including the base. This nearly accords with Pliny's dimension

for the height of the columns, 60 feet Roman, the Roman foot being a little shorter than an English foot.

Plainness of Dress.

For "The Friend."

Probably there are few, who wish to be the self-denying followers of a meek and lowly Saviour, and will agree that the costume of the Christian should be plain and inexpensive; yet there are many who while admitting this, do not see that it ought to be in any degree peculiar, or distinguish members of the Society of Friends from those of other religious denominations.

The consistent members of our religious Society have, however, always insisted that Friends should be known as such by their dress; they believe that the Society has seen further than others in some particulars into the true spirit of the Gospel dispensation, and that it has some peculiar testimonies to bear to the world; such, for instance, as that in favor of a free Gospel ministry, conferred alike upon men and women, against war, the taking of oaths or judicial swearing, &c. Now, when a person appears in that which is recognized as the costume of a Friend, he bears a silent testimony in favor of these views, which all sober, intelligent people know are almost peculiar to our religious Society.

Is it not probable that thoughtful persons will thus be led sometimes to inquire into the ground on which Friends hold these views; and see whether they have not a substantial basis in the teachings of our great Redeemer and His apostles? There have, however, been persons who attributed so much importance to gravity of color or the presence of one or more unnecessary buttons on the dress, that they have scarcely been willing to extend the hand of christian fellowship to zealous, dedicated servants of the Lord, whose appearance in these respects did not fully come up to their own standard of what was proper for a plain Friend.

From these and all other errors and extremes, we may be preserved by coming day by day, and oftener than the returning day, to the footstool of mercy, patiently waiting upon Christ, and begging that He, by the immediate shining of his Divine Light, would show us clearly our duty in these and all other things. Thus, aided by Divine Grace, we may be enabled, in lowliness and humility of soul, to ascribe praises to Him who, in boundless, unmerited mercy, has called us out of darkness into His marvellous light. X.

Savannah.

For "The Friend."

Edward King's sketch of Savannah, and his brief notices of the State of which it is the principal seaport, have some interest and value. He remarks: "The transition from the brisk air and reddish uplands of Northern Georgia, to the sluggish atmosphere and sombre voluptuousness of the lowlands of the coast, is startling. One seems to have come upon another country, to have passed beyond seas, so great is the difference. The Savannah river, up which you sail, returning from Florida some radiant morning, seems to you to have no affinity with the Savannah which, far among the northern mountains, you saw born of the frolicsome streamlets forever leaping and roaring in the passes or over mighty falls. Here it is broad and deep, and strong, and near the

bluff on which the city stands, it is freighted with slips from European ports and from northern cities of our own coast. The nung oaks, the magnolias, the orange trees, the bays, the palmettos, the olives, the strawberries of arbor vitae, the Cape myrtles, oleanders, the pomegranates, the level, ponics, astonish the eyes which have led to consider a more northern foliage as Georgian. Very grand in their way were forests of pine, with their sombre aisles, the mournful whispers of the breeze stealing through them, but here is the charm of odoriferous, tropical South, which no one can explain. Yet it is not here that one must look for the greatest wealth of the State; for in the Georgia is perhaps the richest agricultural region in the commonwealth, and the hundreds of farms along the western bound are notable instances of thorough and profitable culture."

It was at Savannah that Gen. Oglethorpe the founder of Georgia, planted his colony, nearly a century and a half ago. Savannah soon grew to the proportions of a town, and was laid out with taste and judgment, the streets wide, and large squares at proper spaces. To this judicious arrangement, the town owes its present beauty. "No other American city has such wealth of foliage, such charming seclusion, such splendor, so united with all the conveniences and compactness of a large commercial centre." Yet up to 1734, Savannah was covered with a pine forest, in a clearing of the pine forest. The inhabitants locked themselves into their cabins at night, because alligators strolled through the town seeking their prey. Savannah is situated on a plain, only fifty feet above sea-level, and eleven miles from the mouth of the river. From the northern bank stretch away the vast inland rice fields of South Carolina, once under perfect cultivation, but now in great measure neglected, and serving mainly as the home for ignorant and indolent negroes. "The mode of to-day is simply the amplification of the old plan of Oglethorpe and the trustees. It is divided by many wide streets and lanes which intersect at right angles, and there are many large squares at regular distances. There is little noise of wheels or clatter of hoofs in the upper town; the streets are filled with a heavy black sand, over which carriages and dray alike go noiselessly; one wanders a kind of dream through the squares, so free in their dress of flowering shrubs and graceful trees; it is a city through which one moves, yet as tranquil and beautiful as a lake. The winter climate is delicious, the cold weather lasts hardly six weeks; many flowers bloom in the open air from November to April in February the jessamine and the peach-trees are radiant with blossoms; and a wholesome sea-breeze continually sweeps inland."

During the summer the atmosphere is insalubrious, and the city occasionally suffers from visitations of yellow fever.

"As we walked, day by day, through the streets, late in autumn, we were amazed at the masses of cotton bales piled every where. They lined the commercial avenues for hundreds and hundreds of rods; down by the water side they were heaped in mammoth piles, and the processions of drays seemed endless. The huge black ships swallowed up after bale; the clank of the hoisting crane was heard from morning till night."

the progress of Savannah since the war has been less remarkable than that of the whole State. Sherman's army, in its march to the sea, destroyed one hundred and ten miles of the railroad between Savannah and Augusta, yet such energy was shown by railroad management, that early in 1866 roads were so far reconstructed as to answer the public demand. The numerous steamships from Savannah to Liverpool, New York, Philadelphia and Boston, carry enormous quantities of cotton, and if the improvements at the mouth of the river be made, the commerce of the port would greatly increase. The entrance is one of the best on the southern coast, the bar having a depth of nineteen feet of water upon it at low tide, and a rise of seven feet on the tide; but the obstructions which were placed in the stream during the war ought to be removed. Savannah is now receiving more than 100,000 bales of cotton yearly, and at the rate which the production in the regions tributary to this great mart is increasing, will rank with New Orleans.

There is a constant drain of emigration in the poorer districts of Georgia, as from Alabama, and indeed from most of the cotton States. Hundreds of poor Georgians, unable to make a living from the worn out soil, under a new order of things, fly to Texas, yet Georgia certainly does not grow weaker. Her material progress is in the highest degree encouraging. Her valuation in 1858, counting the slaves as capital, was over \$600,000,000, the revolution decreased it to \$148,122,000 on a gold basis, in 1866. She grew in strength and prosperity thenceforward, and in 1872 returned a valuation in gold of \$213,808,000, a substantial increase of \$65,000,000 in six years. This was accomplished despite decrease in the number of laborers, for although the aggregate population had increased since the war, there were only 114,000 laborers reported in 1871, while in 1866 there were 139,988. In 1872 the number had further decreased, and it is estimated that in six years nearly 30,000 laborers have been lost to the State. But the improved methods of agriculture and the use of fertilizers, as well as the influence of an energetic spirit which pervades and distinguishes the Georgian above his neighbors of the other slave States, have endeavored to lessen the number of workers to do at few dared to predict as possible. It is stated that in six years and a half the increase in the total value of the property of the State has been about forty-four per cent. The population of Georgia in 1860, was 1,286,000, and in 1870, 1,200,609, viz: 655,477 white, and 545,132 colored.

In Savannah the negroes have no political voice, they are not represented in the City Council, and the registration law which is in force a few years since has been abolished. There are only 400 colored voters registered out of a population of 30,000.

Education in the city, and in the thickly settled county of Chatham surrounding it, is making far better progress than in the backcountry. In 1866 the Board of Education in Savannah was made a corporate body, and a set of excellent systems of schools for white children was inaugurated, to which have now been added several schools for the colored children. The Peabody Fund does its good work there as elsewhere. Twenty-five hun-

dred white children attend the schools; but only 400 or 500 out of the 30,000 negro children in Savannah enjoy similar advantages. There is still a good deal of absurd prejudice in Savannah against the colored race, and although the Board seems inclined to do its duty, the citizens do not urge any effective effort to raise the blacks out of their ignorance. Savannah is quite rich in private, educational, charitable and literary institutions, prominent among which are the Union Society, and the Female Asylum for orphans; the former on the site of the Orphan House which Whitfield established in 1740.

Letter of Samuel Fothergill.

[The sentiments and counsel contained in the following letter, it is believed may be usefully revived at the present time, and it is again inserted in our columns at the request of a valued Friend.—Eos.]

Samuel Fothergill to John Hustler.

Warrington, Fourth mo., 1771.

The contents of this respecting Cornelius Cayley, and the copy of his application to Friends of Leeds meeting, have been much in my thoughts. I have hitherto been a stranger to the person and his case. I read, some years ago, many of the journals of those exercised in endeavoring to promote the revival of Christianity, but there appeared to me so much of the nature of those things that the day of the Lord should come upon, so fully described—Isaiah ii. 10, to the end of the chapter, that I declined the search, in hopes that the winning power of Truth would separate the wheat from the chaff, in minds pure, upright, and sincere; and that the Power which prepared the eyes of the man blind from his birth, by spitting on the clay, and finishes his marvellous work by sending him to "the pool of Siloam," or to the Sent, for washing, night, in the same line, and by the efficiency of the word of his mouth—which is as a two-edged sword, and whose entrance giveth light and life—have led them into that which is within the veil, and impenetrable to the eyes which have only been anointed with the spittle on their earth; and for this my soul hath often been baptized in humble, fervent prayer.

The person under immediate notice claims, and hath my sympathy: I believe him joined to all the living, through the quickening virtue of the life-giving word, and I earnestly pray for his complete formation, as a vessel meet for the Master's use. Yet a secret and painful jealousy affects me, that patience hath not had its perfect work, to lead him into all the unutterable depths of the Lord's preparing day, nor all the idols cast to the moles and to the bats; my jealousy arises from the activity of distinguished self, which loves the splendid, pleasant picture; an easy purchase, in comparison of the deep-hidden pearl of substantial Truth. We sorrowfully know that we have amongst us traditional formalists, having a name only, by outward inheritance; yet there remains a worm Jacob, the feeble, yet faithful wrestler with God amongst us, whose life is hid with Christ in God, and who, through the virtue of the sacred unction, have not an absolute need of man's teaching, but are gathered in spirit into the Lord's mountain, where the Lord of Hosts makes unto all his people a feast of fat things, and where he destroys the face of the covering, and the veil that is spread over all nations. But the formalists amongst us are in

the same life, with all the family under the veil, and the face of the covering, and not having on the garment of needle work, wrought in a course of experience, have not a right to this feast on the Lord's mountain, but feed on perishable husks; and a superficial ministry, of the same birth, and moving on the same ground, feeds itself with the like food, fills its belly with the east wind, and empties its chilling qualities on the superficial dependents on human help.

The testimony given as a people, in various branches, hath been a stone of stumbling, and a rock of offence, to many, who have wished for our crown, without our cross, and have overlooked and despised the peculiarity of our testimony, or the Lord's testimony by and through us. The language, fashions, and customs of the world, though by many esteemed indifferent, are not so to us, but are a part of the growth, the underwood of the lofty Lebanon, which the day of the Lord is to come upon, as well as upon the tall cedars; and when that day comes, it will burn as an oven, indiscriminately, with prevailing heat, and leave them neither root nor branch. All who have entered into fellowship with us, through the baptism of Christ, the true door of entrance, have, not from imitation but clear conviction, found this compliance their indispensable duty. We might have many preachers break in upon us, were we at liberty to admit them upon the partial foundation of general speculative truths, without their coming to the unity of the Spirit, which unites faithfulness to the Lord's statutes and testimonies to us, and by us to the world. How far the person in question may have seen into this testimony I know not, but this I know, many of those called Methodists, their preachers especially, rather contemn than approve this peculiar dispensation, which, the longer I live, the more clearly I see to be from Heaven, against that spirit which rules in all carnality, whether notorious in obvious evil, more concealed in the walks of formality, or more refined and fallacious in the outward court of the temple.

I cannot well omit a passage in C. C.'s letter, expressing that "the life begins to send up fresh sap into my dead earth, and the blind in me begins to see, the deaf to hear, and the dumb to speak." I believe this is really the truth, and a strong description of an infantile state, a resurrection from being buried in a baptism of death, into a new life, and yet scarcely grown up into a capacity of preaching the everlasting gospel of salvation. The forty days' retreat into the desert, previous to the ministry of the Holy Jesus, seems to me not fully accomplished.

I feel much for C. C.; I love him; I wish to give him the right hand of fellowship in the Lord Jesus; his spirit is near my life; and oh that he may endure the Lord's preparing day! that he may come out of Egypt clear, and unmixt with any of those things which veil the beauty of the Lord's workmanship. I hope Friends will be tender towards him, yet, for his own sake, and that the testimony's firm and steady, for this will be beneficial to him, if he ever come in at the right door. I recommend Friends concerned, and this person, to a deep inward attention to the great Minister of the sanctuary, that in his counsel and wisdom all may move, and the precious unity of the one Eternal Spirit may be known to run to the uttermost skirts of their garments.

I am, thy affectionate friend, in deep travail

for Zion's beauty, that none that love her may fail of the salvation within her gates.

SAMUEL FOTHERGILL.

Cornelius Cayley, to whose case the foregoing letter relates, had addressed to Friends of Leeds, where he then resided, a letter setting forth his religious state and past experience, wherein he mentions, that for thirteen years he had preached whenever he could, "not having freedom to be in any particular connexion of people;" but, having been brought to a closer unity with the principles of Friends, he requested to be united with them in religious membership. Some visits were made to him by the Friends appointed, but after a few months he ceased to attend the meetings of Friends, and the case was therefore ended. S. Fothergill evidently had some fears that this individual was not yet clear of the activity of *self*. The views contained in his letter are deep, weighty and instructive; whilst his feelings and tenderness manifest that he was actuated by pure gospel love.

For "The Friend."

Random Notes of Travel in Europe.

(Continued from page 288.)

Ayr.—On our arrival here we found that an excursion train from Glasgow had accompanied us, and a numerous assemblage of cabs and omnibuses in waiting to take the passengers at once to the classic ground of Burns' Cottage, Alloway Kirk, and the monument.

Ayr is a quaint and pleasant old sea-side town, with a wide and cheerful High street, beginning with a few, one storied, thatched cottages, and expanding into something better as we proceeded. Ayr proper, stands on the left bank of the river, where it enters the Frith of Clyde, the "Twa' Briggs" being conspicuous features in the scene.

We expected to remain here over the morrow, and permitted a feeling of rest to come over us, which added much to the enjoyment of a scene like this. Later in the day, when the sun was sinking slowly, we too drove out on the old Maybole road, skirted by green fields, almost hidden by high stone walls, the bane of rural scenery, and ere we supposed we had gone a mile, though in reality twice that distance, our carriage stopped in front of a long, low, thatched and white-washed cottage, "the auld clay bigging"—the birth place of Burns! We entered the humble doorway around which he had played in childhood, and were ushered into the interior, consisting of two rooms, both rather small and dark. The best one had been turned into a kind of saleroom, and memorials of the place—paper-cutters and various other articles, &c., were here displayed; the other was filled with a motley group, the remnants of the excursion, who were making the most of the occasion.

And this was the lowly nest, from which sprang with such a joyous bound, the sky-lark whose music was destined to thrill the nation's heart; the poet

"Whose songs gushed from his heart
As rain from the clouds of summer,
Or tears from the eyelids start."

"Mighty events turn on a straw"—the crossing of a brook decides the conquest of a world. Had William Burns prospered upon his seven acres of nursery ground, the boy Robert had been sent to school, had struggled forward as so many weaker minds do, to some university, to come forth, not as a rustic wonder, but as

a regular trained intellectual workman, perhaps to change the whole course of British literature, for it lay in him to have done this!" On the other side it is easy to conceive that the long college training might have quenched much of the *originality* of his genius. Better to pour forth his lays as nature dictated; to mourn, as he listed, over his aptured mountain daisy, to charm the world with his sweet domestic picture of his Cotter's fireside; or to ride with Meg over the brig of Doon, whose "banks and braes" he found so fair, and sung so eloquently.

On emerging from the cottage I looked around for a memento of the place. No "Wild Rose of Alloway" presented itself, but a straw from the low cottage roof did—I drew it gently forth from its resting place, a single brown and withered wheat-stalk, and laid it carefully away. But our coachman, who had watched the operation, in an excess of zeal, seized on a large handful and brought it to me. If every traveller carried away as much, the inhabitants would soon be left without shelter.

The Glasgow excursionists were still idling about the monument, which is but a short distance from the cottage, and on a slope descending to the river. Various sounds indicated that the sandwiches, the gingerbread, and the bottled beer, were not quite disposed of. Evening drew on apace, and soon all returned to Ayr, leaving us alone with the old Kirk of Alloway, a small roofless structure, half covered with ivy, and surrounded by a place of graves, conspicuous among which is that of the poet's excellent father, William Burns. We looked through the open window, at the small interior, without endeavoring to people it with the uncanny sights and sounds which Tam saw and heard on that memorable evening—

"And when he breathes his master-ly
Of Alloway's witch-haunted wall,
All passions in our frames of clay,
Come thronging at his call,
Imagination's world of air,
And our own world, its gloom and glee,
Wit, pathos, poetry are there,
And death's sublimity."

By the way, we found that the fine tribute of Halleck, from which the above quotation is made—the most eloquent ever paid to the genius of the poet, is unknown in Scotland—at least we never found any who had ever heard of it.

From the kirk we passed on to

"The monument which tells to heaven
The homage of earth's proudest isle,
To that hard-peasant given."

Among other interesting objects, it contains a portrait of Burns, which is said to be excellent; the strong, manly features, and dark luminous eyes, are well rendered. A small grotto near by, holds the famous statues of Tam o' Shanter and Souter Johnny. The real name of the former was Douglas Graham, who lived on the Shanter farm, near Kirkoswald.

The chill evening air was making itself felt, but our driver was nowhere to be found. There was time, therefore, for the Auld brig o' Doon, which spans the river below the monument, a high, narrow, grey stone arch, so ancient looking, that Time himself might have been the architect. Leaning over the low parapet, and looking down into the river below, its stream seemed a fitting emblem of the poet's life; somewhat turbulent and passionate, in its course, but leaving freshness

and beauty behind it, though we see the la through a mist of unshed tears, as we remember the sorrows, the trials and temptation of his life:

"Then let his faults like swan's feet, be
Sunk in the wave."

Next morning again the sun rose unclouded, the air was deliciously soft and balmy, in-ving us to walk on the sea-shore. So leavy behind the many handsome villas which i-der the beach, we were soon among the-pled masses of sea weed which grew in p-fusion on the knolls, the receding tide m-visible. Before us, at a distance of two m-seemingly, was a high bluff rising from water's edge, crowned by the square tow-Crennan Castle, a ruined stronghold w-ence guarded the shore. J—becom-fatigued, returned to the hotel, but th- alone, the walk was too tempting to be g- up. The mouth of the Doon was not far aw- and lay between me and the castle, and I- it could be crossed was not yet apparent. reaching the river no bridge was in sight, a boat lay on the opposite shore. The gr- of small boys near it could not bring it ov- but informed me that the bridge was hal- mile above. Nothing loath to stroll al- "the banks and braes of bonny Doon," be-ful in summer verdure, I soon reach-bridge, and entered a low meadow divi-by a hedge. Large cattle, unlike those of highlands, were feeding in the distance, m- prospects of reaching Crennan dark-ominous clouds began to appear over Arr- Ailsa Crag became invisible, and Holy I- shrouded in mist, and I reluctantly retr- steps recrossed the bridge, and the r- was about to pour upon me as I found shel- beneath a great sycamore. Small boys ev- where abounding, but not always usef- ornamental, here proved of service. "Co- into the byre, na'ma," called a kind her- little one, who was standing within the sm- clean stable for cows. I was within a sh- distance of Burns' cottage, but decided not- disturb the impressions of yesterday, and return to Ayr by a new road, accompan- by my young friend, who seemed gratef- the few American scraps I gave him, in s- sver to his many inquiries. Around us lay t- hills and streams the poet loved and sung, b- their beauty was saddened by the thou- that he who was so fitted to enjoy the poet- the scene had passed away ere his life's no- and that the path we were treading would- echo no more to his footsteps.

Dumfries.—The country through which- now passed was full of interest. Our tr- making quite a long pause at Maclehine, I- met a pleasing young Scotch girl, govern- in the family of a son or grandson of Gav- Hamilton, the patron and friend of Bur- Maclehine is a small, pleasant looking tow- and was intimately associated with Bur- story. Then followed Auchinleck, Kirkecon- and Saughar on the Nith, with its ruin- fortalice of the Chrichtons and the Dou- and at length Dumfries was reached, fact- tiously designated by the poet as

"Maggie by the banks of Nith,
A dame with pride enuch,"

occupying a central site, in a rich hill-g- chaupaign. It owns a very quaint old h- street, and was once a royal burgh.

In the afternoon we walked to St. Mich- cemetery, where amid a dense accumul- of marble tombs, many of them those of t-

enants, we visited the small doric domed temple standing over a vault, and surrounded by shrubs and flowers, and to which usands before us have made a pilgrimage, remarked to the custodian that we were in time, but she replied, "Americans come all times,—they will go in: Why, ma'am, have had them come here as late as 9 o'clock night, and have had to get up and show in the Mausoleum by lamp-light—they will n, but then they always pay me well for

The sculptured representation of Coila, genius of Burns, throwing over him herrtle, and solliciting him to leave the plow, not appear to us a very happy conception. A simple name upon the slab at our feet quite enough,

"For what to them the sculptor's art,
His funeral columns, wreaths and urns?
Wear they not graven on the heart,
The name of Robert Burns?"

urning we visited the small house upon street which now bears his name, and which his residence and the place of his death. A house was occupied by his widow for 38 years, and was subsequently tenanted by his first son. It stands adjoining an Industrial school, the front of which is adorned by a lot of the poet. By courtesy of the occupants we entered and stood in the chamber where she closed a life, in which, as says his biographer, "virtue and passion had been at actual variance."

In a narrow steep street leading from the river side, we passed the small remaining remnant of the old Franciscan Priory, in which Bruce slew the Red Comyn, who had cherosely betrayed him to the English. A small shop stood in front, but an interior court and the old walls and doorways, the names of the small wynds, gave evidence enough that we were amid the scenes he tragely. Thus passed our last day in land, and we prepared to bid farewell to these abounding in poetic and historic interest.

DIRECTION.—In a former number of this series, in 24 column, page 297, "I forfeited his right to the solemn of Montrose," should read "forfeited his to us to the duke of Montrose."

While George Fox was a prisoner, in 1674, he came to him, as he relates, "A comp-prayer priest, and some people with him. He asked me 'If I was grown up to reason?' I told him, 'What I was, I was the grace of God.' He replied, 'It was a test and civil answer.' Then he urged the words of John, 'If we say that we have no we deceive ourselves, and the truth is not us.' He asked, 'What did I say to that?' I said with the same apostle, 'If we say we are not sinned, we make him a liar, and his d is not in us;' who came to destroy sin, to take away sin. So there is a time for people to see that they have sinned, and there time for them to see that they have sin; there is a time for them to confess their and to forsake it, and to know the blood Christ to cleanse from all sin." Then the st was asked, "Whether Adam was not et before he fell, and whether all God's ks were not perfect?" The priest said, er might be a perfection as Adam had, a falling from it." But I told him, "There perfection in Christ above Adam, and bed falling; and that it was the work of the isters of Christ to present every man per-

fect in Christ; for the perfecting of whom they have their gifts in Christ; therefore they that denied perfection, denied the work of the ministry, and the gifts which Christ gave for the perfecting of the saints." The priest said, "We must always be striving." I answered, "It was a sad and comfortless sort of striving, to strive with a belief we should never overcome." I told him that "Paul, who cried out of the body of death, did also "thank God, who gave him the victory through our Lord Jesus Christ." So there was a time of crying out for want of victory, and a time of praising God for the victory; and Paul said, "There is no condemnation to them that are in Christ Jesus."

STRENGTH FOR TO-DAY.

Strength for to-day is all that we need,
As there never will be a to-morrow;
For to-morrow will prove but another to-day,
With its measure of joy and sorrow.

Then why increase the trials of life
With such sad and grave persistence,
And watch and wait for a crowd of ills
That as yet has no existence?

Strength for to-day—that a precious boon
For the earnest hands that labor,
For the willing souls that minister
To the needy friend or neighbor.

Strength for to-day—that the weary hearts
In the battle of right quail not;
And the eyes bedimmed with bitter tears
In their search for light may fail not.

Strength for to-day—on the downhill track,
For the travellers near the valley,
That up, far up on the other side,
Ere long they may safely rally.

Strength for to-day—that our precious youth
May happily shun temptation,
And build from the rise to the set of sun
On a strong and sure foundation.

Strength for to-day in the house and home
To scatter kind words and loving deeds,
Still trusting in God completely.

Strength for to-day is all that we need,
As there never will be a to-morrow;
For to-morrow will prove but another to-day,
With its measure of joy and sorrow.

"My times are in thy hand."—Ps. xxxi. 15.

Have I a full and practical faith in God's particular providence? Do I commit all my ways to him, knowing that He can and will help and guide and direct me, according to my need? Is it my strength for duty, my comfort in affliction, my joy in sorrow, that all my times are in his hand, and that He is ordering all for my real and highest good? In all my ways do I acknowledge him? Do I feel, from day to day, that He is directing my steps?

If a person swallows any poison whatever, or has fallen into convulsions from having overloaded the stomach, an instantaneous and very sufficient remedy is a heaping teaspoonful of common salt, and as much ground mustard, stirred rapidly in a teacup of water, warm or cold, and swallowed instantly. It scarcely down before it begins to come up, bringing with it the remaining contents of the stomach; and lest there be any remnant of a poison however small, let the white of an egg, and sweet oil or lard—several spoonfuls—be swallowed immediately after vomiting; because these very common articles nullify a larger number of virulent poisons than any medicines in the shops.

The Turn-Stone.

For "The Friend."

Of this interesting little shore bird, Nuttall says that it is not only common to the whole Northern hemisphere, but extends its colonies even to Senegal and the Cape of Good Hope in the Southern half of the globe. Their favorite breeding places are the inclement regions of the North, to which they are in no haste to return, but linger along the coast of the temperate climates for several months. In New Jersey, according to Wilson, they arrive in the Fourth month, and there remain till the Sixth month, feeding on the spawn of the King Crab or Horse-Foot. Soon after this, they are found at their breeding grounds on Hudson Bay, and the shores of the Arctic Sea.

Its name is derived from its movements when feeding, at which time it runs along the shore picking up sand-hoppers, marine worms and other creatures; and turning over the stones for the purpose of getting at the small animals concealed below them. It is about the size of the American Robin. Its habits are thus graphically described by Thomas Edward, a Scotch Naturalist.

"The Turn-stone is a very interesting bird, from its peculiar form and singular habits. It is a strong, thick bird, with rather short, thick legs; long expanded toes; and full, broad breast. Its bill is in the form of an elongated cone, strong at the base, on the culmen rather flattened, and with a curve inclining upward toward the tip. The habits of the bird are singular, more particularly with respect to the method which it adopts to procure food—which is, as its name denotes, by turning over small stones in search of the insects beneath them, on which it feeds. When the object which it wishes to turn over is too large for the bill to do so, the breast is applied; and it would seem that the birds are willing to assist each other, just as masons or porters will do in turning over a stone or a bale of goods. I may here take the liberty of mentioning an incident concerning the Turn-stone which came under my own observation.

"Passing along the sea-shore to the west of Banff, I observed on the sands, at a considerable distance before me, two birds beside a large-looking object. Knowing by their appearance that they did not belong to the species which are usually met with in this quarter, I left the beach and proceeded along the adjoining links, an eminence of shingle intervening, until I concluded that I was almost opposite to the spot where the objects of my search were employed. Stooping down, and with my gun upon my back prepared for action, I managed to crawl through the bents and across the shingle for a considerable way. At length I came in sight of the two little workers, who were busily endeavoring to turn over a dead fish which was fully six times their size. I immediately recognized them as Turn-stones. Not wishing to disturb them, and anxious at the same time to witness their operations, I observed that a few paces nearer them there was a deep hollow among the shingle, which I contrived to creep into unobserved.

"I was now distant from them about ten yards, and had a distinct and unobstructed view of all their movements. In these there was evinced that extraordinary degree of sagacity and perseverance which comes under

the notice only of those who watch the habits of the lower creation with patience and assiduity, and which, when fully and accurately related, is not unprofitably discredited by individuals who, although fond of natural history, seem inclined to believe that every thing in regard to animals must necessarily be false, or at least the result of ignorance, unless it has been recorded in books which are considered authorities on the subject.

"But to return. Having got fairly settled down in my pebbly observatory, I turned my undivided attention to the birds before me. They were boldly pushing at the fish with their bills, and then with their breasts. Their endeavors, however, were in vain: the object remained immovable. On this they both went round to the opposite side, and began to scrape away the sand from beneath the fish. After removing a considerable quantity, they again came back to the spot which they had left, and went once more to work with their bills and breasts, but with as little apparent success as formerly. Nothing daunted, however, they ran round a second time to the other side, and re-commenced their trenching operations with a seeming determination not to be baffled in their object, which evidently was to undermine the dead animal before them, in order that it might be the more easily overturned.

"While they were thus employed, and after they had labored in this manner at both sides alternately for nearly half an hour, they were joined by another of their own species, which came flying with rapidity from the neighboring rocks. Its timely arrival was hailed with evident signs of joy. I was led to this conclusion from the gestures which they exhibited, and from a low but pleasant murmuring noise to which they gave utterance so soon as the new-comer made his appearance. Of their feelings he seemed to be perfectly aware, and he made his reply to them in a similar strain. Their mutual congratulations being over, they all three set to work; and after laboring vigorously for a few minutes in removing the sand, they came round to the other side, and putting their breasts simultaneously to the fish, they succeeded in raising it some inches from the sand, but were unable to turn it over. It went down again into its sandy bed, to the manifest disappointment of the three. Resting, however, for a space, and without leaving their respective positions, which were a little apart the one from the other, they resolved, it appears, to give the work another trial. Lowering themselves, with their breasts close to the sand, they managed to push their bills underneath the fish, which they made to rise to about the same height as before. Afterward, withdrawing their bills, but without losing the advantage which they had gained, they applied their breasts to the object. This they did with such force and to such purpose that at length it went over and rolled several yards down a slight declivity. It was followed to some distance by the birds themselves, before they could recover their bearing.

"They returned eagerly to the spot from whence they had dislodged the obstacle which had so long opposed them; and they gave unmistakable proof, by their rapid and continued movements, that they were enjoying an ample repast as the reward of their industrious and praiseworthy labor. I was so pleased, and even delighted, with the sagacity and perseverance which they had shown, that

I could have considered myself as guilty of a crime had I endeavored to take away the lives of these interesting beings at the very moment when they were exercising, in a manner so happily for themselves, the wonderful instincts implanted in them by their Creator. When they appeared to have done and to be satisfied, I arose from my place of concealment. On examining the fish, I found it to be a specimen of the common cod. It was nearly three feet and a half long, and it had been imbedded in the sand to the depth of about two inches."

For "The Friend"

Diary of Caleb Cresson.

By permission of one of the family, the following extracts are taken from this book, which has been recently printed for private circulation.

Caleb Cresson accompanied his cousin, Thomas Scattergood, on a religious visit to New England in 1791. In the course of this journey they came to Boston, and he was naturally interested in visiting the spot where some of his fellow professors in religion, had long before given up their lives in obedience to the requirements of duty—and thus hastened the downfall of an intolerant and persecuting spirit.

"7th mo. 25th.—Our friend Ebenezer Pope informed me that he had made it a point to be particular in his inquiry, in order to ascertain the place where our Friends William Robinson and Marmaduke Stevenson were put to death, and he thought he could fix the spot within a few rods. The histories of Friends which mention the transaction are not explicit on that head—neither is it very material—yet when one is at Boston it seems quite natural to make some inquiry about it, though the inhabitants now show rather an aversion to having the matter revived; and indeed, Christian charity would forbid our making the children answerable for the misconduct of their forefathers, whose deeds they condemn, both in word and conduct. However, there can be nothing criminal in endeavoring to fix the place where the tragedy was executed.

"Ebenezer Pope told me several circumstances tending to fix the spot, which he led me to, very nearly. Some of them, for my own satisfaction, I will set down here.

"He says, one of our historians mentions a boat, with some sober people, coming from Nantasket, to see the bloody business, who sat therein, while it was performed, in a little creek near the gallows. The entrance of this creek is still visible near Boston Neck, and the remaining ground towards the opposite shore, a little more than a quarter of a mile over, is still low, though it has been filled up considerably for building.

"He further says that old Friend Baguel told him of a conversation which he had with an old woman at Charleston, who informed him she was about 10 years old when the occurrence happened, and got leave of her parents to go and see the execution, and after crossing Penny Ferry, as it was then called, she ran along the beach until she came in view of the gallows—which, by the present situation of land and water, tends to fix the place somewhere near where our friend Pope supposed it to be.

"Add to this his account of a public Friend from England, who when here was concerned to make inquiry on the subject, and walking

out to the place, and leaning on the fence after a solemn pause, said, 'Here lie my Friends: I smell their bones.'

"Also, a sober neighbour of his, being in the spot during the late troubles, relating him (that is E. Pope,) as follows:—Running in his mind on the judgments which were hanging over the land, and being deeply thoughtful and pensive of the cause, was made, as a secret impulse, to stand still, and a voice it were run through his mind—'Here lie the innocent Quakers, and the very spot, or place seemed pointed out to him in a very particular manner.

"All these circumstances unite to render almost certain that somewhere near the place he showed me, the affecting tragedy was performed.

"Bishop tells us that when their lives were taken, they were denied burial, and their naked bodies cast into a hole, and not permitted to be covered; which was soon afterwards overflowed with water, which probably may have been occasioned by the rising of the tide over the low grounds already mentioned.

"I speak now of William Robinson; Marmaduke Stevenson, for as to Mary D and William Leddra, Fries is very permitted to take away an I bury their bodies.

"This Friend Pope also related a convention which lately passed between two of our neighbors—one of them grandson to Edw Rawson, who was Secretary to Governor Picot, who spake much in favour of the piety of the first settlers, and what godly people were, compared to the present generation. 'Say you so?' said his friend; 'I am a different mind—so far from thinking the virtuous, good people, I look upon them have been the veriest devils that ever existed in human shape, and to be plain with you your grandfather was no better than the rest of them.' 'Why, what do you mean, sir, said his neighbour. 'I mean as I say, that so far from being pious and godly, their cruelty and wickedness exceeded all examples since the days of the Reformation from Pope. Have you never read the history of the Quakers' sufferings in this country, sir?' 'No.' 'Then I will take care to furnish you with sight of it, and I am persuaded, from your rightness and candor, you will join with me in utterly condemning the principles and practices of those who first settled in this country, who, fleeing from persecution in their native land, became far before their persecutors in England in point of hard-heartedness and barbarity.' So he furnished him with Boss' History of the Sufferings of our Friends in New England.

"After some weeks he called upon me again, and asked if he had read it. He said, 'Yes.' He then queried, 'What was his opinion of their ancestors now?' 'Why, sir,' replied, 'I stand informed of what I never fore was acquainted with, and may acknowledge with the Queen of the South, that one-half had not been told me. So I am compelled to be of your mind, sir, and allow that they were not the men I apprehended them to be.'

"This was the substance of their conversation, being two Presbyterians, and it may reasonably be supposed that few of those now upon the stage have much knowledge of the proceedings of those early times against our innocent brethren and sisters, only for being their testimony to the Truth; for it has

hought doubt, been the earnest endeavour of writers and leaders amongst them, to dilute and suppress all accounts which had tendency to criminate and set in an honourable point of view the conduct of their fathers. But faithful and impartial history will still preserve the truth of those assertions which cast such a shade of injury upon the high professors of the Christian era in that day.

And something remarkable and memorable it will be, if in future time, in the very list of the country where the persecution died the hottest, that is, between Boston and Am. our Yearly Meeting for New England had been established, and a standard for the th, as held by us as a religious Society, be set.

And if the professors under our name were in the possession of what they hold up to world, and acted agreeably to the principles we maintain, no doubt there would be a hering from many of those sects, who are anating under their heavy task-masters, and ready to say, many seeking religious minds among them, at least, "Who will show us any?" sensibly feeling in the secret of their minds, a want, which nothing outward satisfy—a deficiency, which outward rship, service, and ceremonies cannot sup-

For, indeed, nothing can satisfy the im- ported part but that which is really Divine spiritual—agreeably to that Scripture simony, "God is a spirit, and they that worship him must worship Him in spirit and in truth," it is, all who approach before Him in an acceptable manner."

28th.—I was shown the place where these persecuted New England people, about the year 1692, put 19 persons, men and women, to death, for witchcraft, and pressed one other creature to death for the same pretended one, though it afterwards sufficiently appeared that there was very little (if any) just ground proceeding in this severe manner against m, and some of the foremost of their his- tians confessed in print that they were under strong delusion of Satan.

At the time they stopped this persecution were a great number more in confinement and under a-censuration, and one of their most priests or ministers among the rest, and so they dismissed the poor creatures or the law was repealed.

It was remarkable that none of our Friends were accused; but it was rather by some con- sidered as a judgment upon them for their policy in taking the lives of our brethren, Iliam Robinson, Marmaduke Stevenson, ry Dyer, and William Leddra, and the ere whipping, cutting off ears, banishment, & other barbarous treatment of very many of our dear Friends, a few years before.

And this was not the only indication of a hand of Heaven being against them, for native Indians, for a long course of years, they had stained their hands with the od of our innocent Friends, were, as it were, loose upon the people of the land, and many indred were murdered, and carried into captivity and tortured to death in cold blood.

Another remarkable circumstance which took place in this Government of Massachusetts Bay was, that their land would not produce wheat, whereas, at the first settling of it is said that grain grew well, and came to a good degree of perfection; but we observed

that they had almost wholly given over endeavouring to cultivate it, having been so often disappointed of having any increase, owing to a kind of blast that commonly took it after it had shot up into ear. Their chief grain is rye and Indian corn, though but poor, of which they make their bread mostly."

Ends of Four Great Warriors.—The four conquerors who occupy the most conspicuous places in the history of the world are Alexander, Hannibal, Caesar and Bonaparte.

Alexander, after having climbed the dizzy heights of his ambition, with his temples bound with chaplets dipped in the blood of millions, looked down upon a conquered world and wept that there was not another world for him to conquer—set a city on fire and died in a state of debauch.

Hannibal, after having, to the astonishment and consternation of Rome, passed the Alps, after having put to flight the armies of the mistress of the world, and stripped "three bushels of gold rings from the fingers of her slaughtered knights," and made her foundations quake, fled from his country, hated by those who once exultingly united his name with that of their God, and who called him Hani Baal. Hannibal died at last by poison administered with his own hand, unlamented and unwept, in a foreign land.

Caesar, after having conquered eight hundred cities—after dyeing his garments in the blood of more than one nation of his foes, after having pursued to death the only rival he had on earth,—was miserably assassinated by those he considered his nearest friends, and in that very place the attainment of which had been his greatest ambition.

Bonaparte, whose mandate kings and popes obeyed, after having filled the earth with the terror of his name—after having deluged Europe with tears and blood, and clothed the world with sackcloth—closed his days in lonely banishment, almost literally exiled from the world, yet, where he could sometimes see his country's banner waving over the departing vessels that did not, and could not, give him aid.

Thus these four great men, who seemed to stand the representatives of all those whom the world calls great—these four men, who each in turn made the earth tremble to its very centre by their simple tread, severally died—one by intoxication, as was supposed, by poison in his wine; one a suicide; one murdered by his friends; and one a lonely exile. How wretched is the end of all such earthly greatness!

Selected.

It is recorded of one of the reformers, that when he had acquitted himself in a public disputation with great credit to his Master's cause, a friend begged to see the notes which he had been observed to write, supposing that he had taken down the arguments of his opponents, and sketched the substance of his own reply. Greatly was he surprised to find that his notes consisted simply of these ejaculatory petitions: "More light, Lord—more light—more light!" And how was the true spirit of prayer compressed and illustrated in these short aspirations! Could they fail of success? "If any of you lack wisdom, let him ask of God, that giveth to all men liberally, and upbraideth not; and it shall be given him." (James i, 5.)

THE FRIEND.

FIFTH MONTH 12, 1877.

It is of great importance at all times, and never more so than in the present condition of what is called the religious world, that the individual members of the Society of Friends should seek to know for themselves and illustrate by example, what that life must be which is continually passed consistently with the high profession they make. We have drawn the eyes of other professors upon us by the known controversy within our borders respecting the continued maintenance, or the essential abandonment of some of the important doctrines and testimonies always characterizing Friends. The "London Press" sometime since used the following language, in reference to the Society in that country. "Even the most zealous lovers of simplicity and truth that have ever been, cannot now claim exemption from the charge of false doctrine, heresy and schism. Desiring union as much as most earnest men, they are so differing among themselves, that until they are one, they can hardly expect that their prayers will be answered for all the earth to be of one language when Divine things have to be spoken of. Loving simplicity in all things—dress, speech and social habits—they are nevertheless conforming to fashions which their forefathers deemed worldly, and renounced as sinful. Loving a pure doctrine, and believing in the power of silence and the direction of the indwelling Spirit, they are now given to speaking, and to obedience to spirits which have never been tried."

The consciousness that these things are known by others, and commented on to the disparagement of the truth and of our members as its exponents, ought to stir up a godly jealousy in all who love the original faith and character of Friends. How great is the responsibility resting on each one of us! How solemn the call so to go in and out before the people, that our every day life may commend the pure and spiritual religion we profess—to every man's conscience in the sight of God."

Not a few, dissatisfied with the ritualism and formalism that overborden the religious belief and modes of worship of many denominations, dwarfing the growth and vigor of vital religion, are inquiring what are the doctrines of the gospel, revealed by the founders of our Society, which enabled them to triumph over the cruel persecution of the formalists of their day; and what the testimonies springing from those doctrines, the faithful support of which has drawn upon Friends in every generation since, the dislike and contempt of worldlings? Let every one of us seriously put the query to himself, how clearly, if called on to answer this inquiry, he would be able to give a reason for the hope that is in him, and how far his conduct and conversation are fitted to illustrate the truth and practical value of the religion he professes.

It is they who are led by the Spirit of God, that are the sons of God. To be of this blessed number, then, watchfulness unto prayer—which implies reverent inwardness and steadfast self-denial—is absolutely indispensable. This strict, restricted course of life is very unpopular at the present time, being kept out of sight very generally by many professed believers in Christ, even those who claim to

he his ministers; who appear to have satisfied themselves that they can so far reconcile his cross-bearing religion and the spirit of the world, as to admit of at least partial compliance with its impure pleasures and fashions, and devotion to the pursuit of its riches and honors.

William Penn, speaking of Friends in his day, remarks, "They came forth low and despised and hated, as the primitive Christians did, and not by the help of worldly wisdom or power, as former reformations, in part, have done. But in all things, it may be said, this people were brought forth in the cross; in a contradiction to the ways, worship, fashions and customs of the world; yea against wind and tide, that so no flesh might glory before God." * * * "We held the Truth in the Spirit of it, and not in our own spirits, or after our own will and affections; they were bowed and broken into subjection, inasmuch that it was visible to them that knew us. We did not think ourselves at our own disposal, to go where we list, or to say or do what we list or when we list. Our liberty stood in the liberty of the Spirit of Truth, and no pleasure, no profit, no fear, no favor could draw us from this retired, strict and watchful frame. * * * Our words were few and savory, our looks composed and weighty, and our whole deportment very observable. True it is that this retired and strict sort of life from the liberty of the conversation of the world, exposed us to the censures of many as humorists, conceited and self-righteous persons. But it was our preservation from many snares, to which others were continually exposed, by the prevalence of the lust of the eye, the lust of the flesh, and the pride of life, that wanted no occasions or temptations to excite them abroad in the converse of the world."

"Behold the picture! Is it like? like whom?" Not the great body of those who profess to be the present representatives of those souls of the morning. Certainly not like those—however valuable about their christian attainments, or busy in ostensible good works—whose religion is obtained from the study of the bible, and not through conviction and conversion by the Holy Spirit, with their attendant baptisms and sore conflicts; whose faith therefore stands in the wisdom of men and not in the power of God. Such as these have not allowed the Light which is the life of men to reveal to them the depth of corruption that is natural to the human heart, and the consequent necessity of yielding unreserved obedience to "the law of the Spirit of Life in Christ Jesus," in order to be "set free from the law of sin and death;" and therefore they do not believe that the gate and the way leading to eternal life are so strait and narrow as to preclude any conformity to the ways or customs of the world, that have their origin from the evil propensities of man's heart, or which invite temptation to indulge the lust of the eye, the lust of the flesh, or the pride of life. The daily cross is an offence unto these, and they are altogether indisposed to be brought forth "in contradiction to the ways, worship, fashions and customs of this world."

Nor yet is the picture like those who in acquiescence with the opinions of others, adhere to the original faith of Friends, but neglect to show by their godly lives, a personal experience of those fruits of the Spirit, of which that faith, when truly held, is but a

part. Such as these may wrap their talent or talents in the napkin of a commendable outside appearance, while they proclaim their belief of the Lord being an austere man, by burying his money in the earth.

But He who watcheth over his church by night as well as by day, has continued to keep within the Society worthy witnesses of his truth in its purity and integrity, who can testify and who do prove, in life and conversation, that He and it change not. These too know that the truth must be held in the Spirit of it and "not in their own spirits, or after their will and affections" which must be bowed and brought into subjection; and that they "are not at their own disposal, to go where they list, or say or do what they list." Alas for the day! These also find, that the self-denying doctrine that they uphold, and the strict and circumscribed life they are bound to maintain, exposes them, in like manner, at this day, "to the censures of many—among their fellow professors,—as humorists, conceited and self-righteous persons." Let these then not be discomfited or discouraged, as "though some strange thing had happened to them." They are but participating in some of the same trials the founders of the Society had to endure from the unconverted and unsanctified, and are thus united to them not only in faith, but in the fellowship of suffering. As they keep "firm to Truth's life as well as Truth's principles," they will be upheld and preserved, as their worthy predecessors marvellously experienced; their reward will be sure, and in process of time others will be brought upon the stage of action, who will rise up and call them blessed.

SUMMARY OF EVENTS.

UNITED STATES.—The *Tadpole Blade* publishes reports from three hundred places in Ohio, Indiana, Illinois, Iowa, Michigan and Missouri, showing excellent prospects for the corn and wheat harvests. Wheat especially is in better condition than for several years.

The public debt statement, issued on the 1st inst., shows a reduction of \$4,345,593. The Treasury Department publishes a statement showing that the reduction of the public debt, from 3rd mo. 1st, 1859, to 4th mo. 30th, 1857, has amounted to \$455,104,642.

During the nine months ending 3d mo. 31st, the exports from the United States were \$70,055,782, and the imports \$34,854,930, excess of exports = \$35,200,852. The imports of specie exceed the exports \$5,381,397. It has been decided at a meeting of the committee on the extra session of Congress until 10th mo. 15th. It will be remembered that the extra session became necessary in consequence of the late Congress having failed to pass the needed appropriations for some parts of the public service.

The demand for postal cards increases monthly. The number of these cards issued during the 4th month was 20,729,000.

Crazy Horse's band of Indians, numbering 889 persons, surrendered at Camp Robinson, Nebraska, on the 6th inst. They gave up 2000 ponies and many American horses and mules. The arrival of this band makes a total of 1000 Northern Indians who have surrendered to General Crook at the agencies since the 2d mo. 3d, and it is said, away with the necessity for a military expedition during the summer.

The authorities at Washington have decided that work on the new post office in Philadelphia shall be pushed on more rapidly. It is expected that the new arrangements in Philadelphia last week numbered 301, including 85 children under two years of age.

The President has issued the order for the consolidation of the Pension Agencies throughout the country. By this order forty agencies are discontinued, leaving eighteen to do the work which has been distributed among fifty-eight offices. It is expected that the reduction will effect a saving to the government of \$150,000.

The Supreme Court of the United States has rendered a decision affirming the right of a State to tax railroads and the proceeds of mines.

The Secretary of the Treasury has issued regulations concerning the discharge of steamships at night, and the competency of inspectors (thereof, which form part of the regulations intended to remedy the alleged a at the New York Custom House.

The Markets, &c.—Philadelphia.—American 107; United States 6's, 1881, 114; do. 5 per cent 111; Cotton, 11; a 111 cts. per lb. for upland; New Orleans, 12 1/2; S. S. 12 1/2; Penney, 12 1/2; Amber, \$2.15 a \$2.20; amber, \$2.22 a \$2.25. 1 sylvania rice, \$1.07. Yellow corn, 70 a 72 cts. 49 a 55 cts. Sales of 2200 head cattle at 61 a 63 ct. lb. gross for extra; 5 1/2 a 6 cts. for fair to good; cts. per lb. gross for common. Sheep, 51 a 6 cts. lb. gross. Hogs, 7 1/2 a 8 1/2 cts. per lb. net.

Herzegovina, between the ages of 16 and 60, have summoned to join the Turkish army in those provinces.

An obstinate and sanguinary engagement occurred on the 29th ult. between the Turks and Russians in Kars, in Asia Minor; both sides suffered heavily the losses of the Turkish troops are supposed to be greater than those of the Russians.

The Porte has issued a circular declaring that, in conformity with Russia, it is betraying the interests of the country and the confidence of the Sultan's Government. The Porte henceforward considers Rumania as in the power of the enemy; therefore all Rumanian troops occupying the territory are in violation of the Sultan's authority.

The Porte has notified the representatives of the Powers that it has declared a blockade of the whole of the Russian coast of the Black Sea. A delay of 10 days would be granted vessels wishing to enter, and says those intending to leave the Black Sea. On the 7th inst. the operations of the hostile armies, not resulted in anything decisive or important.

Advices from Panama to 4th mo. 25th, indicate a virtual termination of the war in Columbia; the servative troops having been defeated in several engagements by the government forces, and the surrender of the State of Antioquia.

A dispatch from the Cape of Good Hope announces that the Transvaal Republic has been annexed to British Empire, despite the protest of President Kruger, and the British troops have entered the territory.

The past winter in Iceland was a mild one, but sheep being able to subsist in the open air, without shelter, till the middle of the 1st month. The harvest in the western part of the island was good, in the southern part the yield was a poor one, and people consequently suffered from lack of provision. The most northerly telegraph office in the world just been set up at a Norwegian fishing station named Gjesvor, a little above the 71st parallel of north latitude.

FRIENDS' SELECT SCHOOLS.

A suitably qualified Friend is wanted as Principal of the Boys' Select School, at the opening of the term the Ninth month. Application may be made to

Joseph S. Elkinton, 354 South Fifth St.
Edward Maris, 127 South Fifth St.
or to the Secretary of the Society, No. 82

George J. Scattergood, 413 Spruce St.

DIED, at her residence in Germantown, on the 3d mo. 1857, MARY S. JONES, widow of John J. in the 57th year of her age, a beloved member, many years an overseer of Frankford Monthly and a many-talented Particular Meeting. She retained her cheerful, and her mental faculties remained bright to the last. This dear Friend exemplified by her conduct and conversation, her attachment to the doctrines and testimonies of the Society of Friends, lively christian sympathy and interest toward every class, particularly the afflicted, characterized her life, and prompted by this she was watchful to protect the welfare and comfort of those within her influence during a suffering illness, and all applications to be relieved, if consistent with the will of God, and resignation and thoughtfulness for the comfort of attendants, were very instructive to all who witnessed them. The precious quiet experienced by those around her, evinced the sustaining presence of Him, who promised to be with his own to the end; leaving such a dear assurance that though she seemed to have mercy she was prepared to enter the everlasting home so longed for.

WILLIAM H. PILE, PRINTER,
No. 422 Walnut Street.

PHILADELPHIA.

For "The Friend"

Selections from the Life of Thomas Story.

After this I was at some other meetings; a little notice was taken of it by any of my relations or acquaintance till the time of the assizes at Carlisle, where some Friends being prisoners in the county gaol, for non-payment of tithes, others attended the assizes, as their station was, the better to obviate the occasion of troubles or hurt to any of the Society, and minister counsel or other help, as need might be; and these went to a meeting at about two miles from the city; and either I went also. During the time of the meeting I found an unusual load on my spirit, and hardness in my heart; inasmuch that I could hardly breathe under the oppression; nor could I say I had any sense of the comforts of the divine presence there, but that the bars were as thick brass, and the bars were as strong iron. But though I had no joyment in myself, yet I was sensible of the presence and goodness of the Lord were there, and many therein greatly comforted; and therefore did conclude my condition of mind as from some other cause, and not relating to the state of the meeting in general. After the meeting was over, one of them asked me how I did; I answered, indifferently. Then some and some others perceived my spirit was oppressed, and sympathized with me therein. I could not, all this time, perceive the particular matter which thus affected me,—for I knew not of anything I had said or done to bring it upon myself—till that evening, being turned to my father's house, very solitary, silent, and inward, there came in one Thomas God, an acquaintance of mine; who, after some compliments of civility—for at that time I had not quite declined the common modes of salutation—desired to speak with me apart; and then told me that he had a trial to come on next day, concerning certain causes of his in the town of Penrith, being the greatest part of all he had in the world; that one of the witnesses to his deeds of conyanage was dead; another of them gone into Ireland, and could not be had; but I, being the third, and having made the writings, he oped, through my evidence and credit, to join his just point against his unfair adversary; and desired me to be in readiness in the morning; for the trial was likely to come on very early.

As soon as he began this relation, the word of life began likewise to work in me in a very

powerful manner; and the hammer of the Lord I sensibly felt, and saw to be lifted up upon that hardness of heart, which for some time had been my state; and it began to be broken, softened, and dissolved; and the sense of the love of God in some degree to be renewed. Then I saw plainly that this was the hard thing I had to go through, and that now was the time of trial, wherein I must take up the cross of Christ, acknowledge his doctrine in that point fully and openly, according to the understanding given me, and to despise the shame and reproach, and other sufferings, which I well knew would ensue quickly; or I must forsake the Lord forever. For, denying his doctrine in the sense I had now plainly seen it, would be denying himself before men; and if I had then denied him, I could expect no less, but according to his word, to have been immediately, and for ever denied of him, and left under that hardness of heart and want of the enjoyment of his divine presence, wherewith I had been favored before, and all the dreadful consequences of a beginning so awful.

But according to the advances of the word and work of the Lord in me at that time, my heart inclined to him: as my acquaintance was speaking, and by the time he was done, I was furnished with a full resolution to give him a plain and direct answer; which was in this manner: "I am concerned it should fall out so; for I had a real respect for him, and saw his case to be very hard—I will appear if it please God, and testify what I know in the matter, and do what I can for you that way; but I cannot swear."

This was so great a surprise to him, both from the nature of his case and confidence he had of my ready compliance, he having had no suspicion of my present condition till that moment, that he broke into a passion, and with an oath, or curse, said, "What, you are not a Quaker, sure?" Though I had made confession in the truth so far, in that point, and the divine presence sensibly returned in me, yet, upon this I was again silent, till clear in my understanding what to answer in sincerity and truth. For as nobody before that time had called me a Quaker, so I had not assumed the appellation; which being given in reproach, was not grateful; though the thing in its proper sense most delightful.

Nor did I then see whether I had so much unity with all their tenets as might justify me in owning the name,—for in the unity of divine love and life only had I known them—till the power of that life of Him who forbid death all oaths and swearing, arising yet clearer and fuller in me, opened my understanding, cleared my way and enabled me therunto; and then I said, "I must confess the truth, I am a Quaker."

As this confession brought me still nearer to the Son of God, his love increasing yet more sensibly in me, so likewise it heightened the perplexity and disturbance of my friend,

whose case thereby became more desperate, in his own opinion. Upon which in an increase of heat, and expressions thereof from snoring so obvious a disappointment, as it then appeared to him, he threatened to have me fined by the court and proceeded against with the utmost rigor of the law, saying, "What! must I lose my estate by your groundless notions and whims?"

But the higher my enemy arose and raged in this well-meaning but mistaken man, who thus, without design, became the instrument of my trial, the fuller and more powerful still was the love of God; whose cause I had now espoused through his own aid and the power of an endless life from him made manifest in me. I replied in that calm of mind and resignation to the will of God, that the life of the Son of God enables to and teacheth, "You may do what you think proper that way, but I cannot comply with your request in this matter, whatever be the issue of it." And then he departed under great dissatisfaction, with all the threats and reproaches his enraged passions could suggest, under a view of so great a loss.

Immediately I retired to my chamber; for perceiving my grand enemy to be yet at work to introduce a slavish fear, and by that means subject my mind and bring me again into captivity and bondage, I was willing to be alone and free from all the interruptions of company, that I might more fully experience the arm of the Lord and his divine instructions and counsel in this great exercise.

The enemy being a crafty and subtle spirit, wrought upon my passions, not fully subjected, and artfully applied to my natural reason, my understanding not being fully illuminated, as his most suitable instrument. He urged the fine and imprisonment, and the hardships accompanying that condition, and how little help I could expect from my father and friends, who would be highly displeased with me, for so foolish and unaccountable a resolution, as they would think it; and also the scoffings, mockings, derisions, scorn, contempt, loss of friends and friendship in the world, with such other inconveniences, hardships, and ill-consequences, as the enemy could invent and suggest. During all this time, from about eight in the evening till midnight, the eye of my mind was fixed on the love of God, which still remained sensibly in me, and my soul cleaved thereto in great simplicity, humility, and trust therein, without any yielding to Satan and his reasonings on those subjects, where flesh and blood in its own strength is easily overcome by him. But about twelve at night the Lord put him to utter silence, with all his temptations, for that season, and the life of the Son of God alone remained in my soul; and then, from a sense of his wonderful work and redeeming arm, this saying of the apostle arose in me with power, "The law of the Spirit of life in Christ Jesus hath made me free from the law of sin and death."

Then the teachings of the Lord were plentiful and glorious; my understanding was further cleared, and his holy law of love and life settled in me; and I admitted into sweet rest with the Lord my Saviour, and given up in perfect resignation to His holy will, in whatsoever might relate to this great trial of my faith and obedience to the Lord. In the morning I went up toward the hall where the judges sat, expecting to be called as a witness in the case before mentioned; but before I reached the place, I saw my said acquaintance approaching me, with an air in his countenance denoting friendship and affection; and when met, he said, "I can tell you good news; my adversary has yielded the cause; we are agreed to my satisfaction."

Upon this I stood still in the street, and reviewing in my mind the work of the Lord in me the night before, as already related, this scripture came fresh into my remembrance, in the life of it, "It is God who worketh in you both to will and to do of his good pleasure." I was sensible it was the Lord's doing, and accounted it a great mercy and deliverance; though I was by this means exposed to the view and observation of all, the pity of many, as they judged of my case, and the scoffs and censures of the baser and more ignorant sort, which was for Christ's sake only; for none had any immortality to charge me with.

This happening at the time of the assizes, and people from all quarters being there, I quickly became the common subject of discourse and debate. Few could believe the report, and many came to see; and during the assizes would get together, talking and wondering; and when they happened to see me afar off in the streets, would come in crowds to gaze. Some would take off their hats, and pretend to show more than ordinary complaisance, saluting me as at other times; but I not making any returns of that kind, some would frown and goggle, and scoff, and grin, and run away in loud laughter, saying I was mad. Yet some others were struck with another passion; they turned pale, looked sorrowful, and returned weeping. And one who had been educated at an university, to show at once his temper, manners, and learning, after he had gazed upon me a while among the baser sort, cried out, as if he had then been surprised with the discovery of some new system, "He knows not a genius from a species!" when there was not any thing previous leading to such an expression. Yet he was mistaken in that; for I knew very well that dog is a genus, and cur, bull dog, and blood hound are distinct species of that genus; and at that time, saw the nature and way of these brute animals too much resembled in that giddy mob; though I said very little to any of them, but gave them my face to their fill of gazing. Some who, but a day or two before, durst not have discovered a dissembling look upon me, now insulted and triumphed; which put me in mind of a saying of Job, "But now they, who are younger than I, have me in derision; whose fathers I would have disdained to set with the dogs of my flock;" and likewise of some expressions in that little piece before inserted; which I did not think, at the time of writing it, would be so soon, if ever, fulfilled upon myself, viz: "They gazed upon me, they said I was mad, distracted, and became a fool; they lamented because my freedom came."

(To be continued.)

The Development of Ability.

It is a common idea that the ability to accomplish any undertaking must always exist, before the task can be safely or rightly attempted. The instances of failure, from the lack of the requisite qualities for success, are indeed sufficiently numerous to account for such a view. Yet it is one which is both erroneous in itself, and injurious in its influence. It overlooks the important principle, that *power grows in doing*. It is not merely that we cannot rightly estimate our abilities in any given direction until we test them, though that also is true; but that the very effort itself is the chief means of actually generating fresh power. He who, looking at some task that beckons him, and feeling overwhelmed by the qualifications it appears to demand, declares his inability to perform it, is probably correct. But if from this cause he shrink from attempting it, he commits a grave mistake; for this very power, the lack of which he now deplores, can only come by and through the effort which he declines to make. Thus, in spite of the apparent contradiction, we are under obligation to do many things for which we have not the present ability.

Physical power, which consists of strength and endurance, can only be attained in this way. Only by the ceaseless activity of the infant does he acquire the ability to use his limbs. No one can be fully fitted for a life of toilsome labor, or for the hardships and privations that attend the sailor, the soldier or the explorer, before he commences such a life. The needed power comes gradually, day by day. Every blow of the hammer generates new force for another blow. So in every exercise of skill, whether of occupation or amusement. The artist laments his inability to create his ideal, but if he persevere in effort the ability will come. The skater had at first no power to skate, the swimmer to swim, or the archer to hit his mark, but in the effort and the practice they have obtained it. Often great emergencies will reveal depths of power of which we had not dreamed, and endow us with strength, courage and firmness in the moment of trial, which forsake us utterly when the crisis is past.

Intellectual power has the same elastic quality. Task it, and it grows; make no demands upon it, and it shrivels up. Some persons, believing themselves incompetent to understand a scientific treatise or a thoughtful essay, to study a language, or to convey their own thoughts lucidly in writing, never undertake any of these things, and thus perpetuate their mental feebleness. If they would courageously and earnestly begin these dreaded tasks, bringing to bear upon them all the powers they do possess, instead of dwelling vainly upon those which they lack, they would be astonished to find how quickly difficulties would melt, and how sensibly their own mental force would increase. One of the chief delights of all intellectual labor is the conscious accession of new power; but this is an enjoyment none can know but the diligent and earnest toiler in these spheres. It is thus that all our truly great men have won their greatness. Statesmen, commanders, scholars, philanthropists, have all undertaken enterprises far beyond their abilities, and in their earnest prosecution have found the needed power. Others, seeing their efforts, have expected large results, and this, too, has had no small influence in producing them.

The moral force that builds a noble character also gains an increased momentum every time it is put forth. If our ideal is high, of moral nature will climb; if low, it will grow. Those who sit down passively, despairing ever of overcoming temptation, or disentangling themselves from the network of circumstances that seems to prevent them from following what is good and true, will fulfil their own gloomy forebodings, growing feebler to resist evil, and losing at last even the vision of good. But those who fix their aims far above their present possibilities, attempting greater purposes with faith and hope, putting forth without reserve all the moral strength they do possess, will find that strength ever increasing and filling them with fresh courage for renewed endeavors.

In one sense, indeed, the lack of power perform duty of any kind may be justly termed a crime. It speaks of past indolence and neglect. If the muscles have grown feeble and feeble, from want of exercise, it is no fault than a misfortune. If we cannot this clearly or listen appreciatively, because we have never taken the trouble to try, we are more worthy of blame than of sympathy. We have no strength to resist evil influence, or to cling to the right, it is the sad result of past self-indulgence. Let us, then, beware measuring our duty by our supposed ability and persuading ourselves that we are only required to do that for which we feel fully competent. Let us, rather, measure our ability by our duty, resolving that we can do what ever we ought to do, and undertaking it with resolution, courage, and full faith that whatever power we now lack will be developed proportion to our energy in meeting the exigencies of life and our faithfulness in pursuing truth, goodness and purity.—*Phila. Ledger.*

For "The Friend."

Preparation for Death.

After the first years of infancy, and when the powers of the mind have become so developed as to be able to grasp subjects a little beyond those relating to our mere animal existence, the idea of death will often be presented to the childish mind, but it is usual as that of something which may occur at some future time. In the great mercy and fatherly kindness of Him who watches over his rational creatures, and even numbers the hairs of their heads, He causes the tender visitations of His grace and good spirit to be felt by children, often at a very early age drawing their hearts to love and fear Him and showing them the dangers and temptations to wrong doing which beset them continually. If these visitations of Divine goodness and mercy are yielded to and obeyed increasing spiritual strength is given. Such will not be called upon wholly to relinquish all innocent enjoyments and amusements, but they will endeavor to keep a sense of the Divine fear upon their minds, and always remember that there is One who sees the inmost thoughts and recesses of their hearts.

This is the beginning of the great work of regeneration, and as such endeavor to keep close to and follow the teachings of that Grace which has been vouchsafed, they will be enabled to see their lost and undone condition and their need of an Omnipotent Saviour, who is "mighty to save and able to deliver to the very uttermost all who come unto God by Him." Abiding in this humble, contrite state

I endeavoring to wait upon the Source of light and truth, true living faith will be revealed as the inextinguishable gift of their Heavenly Father's love; not such a faith as we can by any means give ourselves or exercise by means of our own unassisted powers.

Though much sorrow and trial must usually be a part of the needful discipline to prepare us for a better and more enduring existence, let it not be imagined that the life of a Christian is therefore a sad and gloomy one; on the contrary, he may enjoy much happiness in the faithful performance of his relative and social duties, while he still keeps his affections dutifully fixed on things above. Then when the solemn event which leads to all sooner or later, arrives, the soul may have well grounded assurance, that though the boundless mercy of God in Christ Jesus, it shall be well with us, when we have been with this transitory state. Throughout the countless ages of eternity, it will be the happily joyful occupation of such to praise and magnify the wonders of redeeming love and mercy, and sing the praises of Him "that redeemed us, and washed us from our sins in his own blood, and hath made us kings and priests unto God and his Father." X.

Arsenic Eaters in Styria.

That there are persons who eat arsenic—it is, take it in doses, which in other cases is deadly—was asserted many years ago by Professor Schallgruber. They also formed the subject of an article by Tschudi, on arsenic eaters in Styria and Lower Austria; and the communications were much commented on in English scientific literature. In 1857, Dr. Sæfer, then professor in the Medico-Chirurgical School in Gratz, communicated to the Academy of Sciences in Vienna a case of poisoning with Scheele's green, with a number of original researches on the absorption and elimination of the preparations of arsenic andimony. He says: "At the request of the Imperial councillor, Dr. Von Vest, I took the public to institute some new observations on arsenic eaters, and was able to subject one experiment. Johann Wolfner, aged thirty, tall, but strongly built, a woodman, had, he said, taken arsenic for twelve years. On February 21, he came under my observation. He said that he had already eaten some arsenic that day. On the 22d he took, in my presence, a piece of arsenious acid weighing just a half grain. On the 23d he ate a piece weighing five and a half grains. While he was under observation, the man had a very good appetite, drank a large amount of alcoholic liquors, and went away on the 24th quite well. He is still alive, an Alpine shepherd, quite well and strong, and continues the use of arsenic. Fortunately, he could not be prevailed on to come here."

Professor Schäfer has related these facts in a communication on "Arsenic eaters in Styria," published in vol. xii. of the "Reports of the Imperial Academy of Sciences." The case is given in Hasselt-Honckel's "Giftlehre" (Brunswick, 1862), with several other cases; as on one of a director of arsenic works at Salzburg, who, at the age of seventeen, began to take three grains, and increased the quantity to seventeen grains daily, but in what time it is not stated. These facts, and the above-mentioned work of Dr. Schäfer, were made known in England, through a communication of Dr.

Roscoe, to the Philosophical Society in Manchester.

We give the following in the doctor's own words: "Two young English physicians, Dr. Craig MacLagan, of Edinburgh, and Dr. Rutter, of London, became interested in the subject; and while travelling on the Continent in 1864, they came to Styria, and desired to convince themselves of the fact by personal observation. They went to medical councillor Dr. Vest, who introduced them to Dr. Mæcher, of Stainz, and to myself, then residing in Ligest. I had often heard that there were arsenic eaters in Ligest, but had not yet convinced myself of the fact. I was, however, able to find two arsenic eaters, who consented to eat arsenic in the presence of the English doctors. On March 25, M. Schober ate nearly five grains of white arsenic. Flecker took, on March 26, a piece of arsenious acid weighing six grains, having on the previous day taken arsenic in the presence of several inhabitants of Ligest. The mouths of the arsenic eaters were examined by the English doctors to see whether they kept back the arsenic; they took away small pieces of the substance used, in order to ascertain that it really was arsenic.

"It is difficult to say definitely how far the practice of arsenic eating extends. I have convinced myself that there are many arsenic eaters in Upper and even in Middle Styria; a number of grooms, woodmen and hunters are known to me as arsenic eaters, and even women follow the practice. Many begin to use arsenic at the age of seventeen or eighteen, and continue the practice to a very advanced age. Most arsenic eaters conceal the fact, so that it is impossible to obtain certain statistics. The principal reason alleged for eating arsenic is that it protects from disease, as in the case of the man Flecker; it is also regarded as a means of producing a ruddy appearance; as a remedy against difficulty of breathing, and as an aid to the digestion of food that is digestible with difficulty. A poacher in Upper Styria told me that he gained courage through the use of arsenic. I have seen in Zeiring a still very strong charcoal burner, seventy years of age, who was said to have used arsenic for forty years. In the 'Giftlehre' above quoted, is related the case of a vigorous charcoal burner, eighty-one years old, who had long been accustomed to use arsenic. I have never observed arsenical cachexia in habitual arsenic eaters. A case, however, occurred in Ligest, in 1865, in the person of a leather dresser, who, when intoxicated, took too much, and had symptoms of acute poisoning. According to his account, he took a piece as large as a bean, but perfectly recovered, and later again used arsenic, but with more care. According to my observation, both white arsenic (arsenic acid) or Hutenrauch and yellow arsenic, or orpiment, are used in the dry state, either alone or strewed on bread. The dose is, of course, at first, very small, and is gradually increased. The greatest quantity that I have seen taken is fourteen grains. The man Schober, above mentioned, took seven and a half grains in my presence, on April 17, 1865. The intervals at which the arsenic is taken vary much—fourteen days, eight days, twice or thrice a week. All doubt as to the correctness of the statement that there are arsenic eaters ought to be forever removed by the existing proofs. J. F., aged fifty-five, a tailor, has taken arsenic, generally orpiment, since 1849. He was led to the practice by being obliged to go into a house

where fourteen persons had died of typhus, and which no one would venture to enter; he wished to protect himself against the disease by the use of arsenic. He began by taking a grain daily for three days. Although at first he did not feel quite well, he had no vomiting, no irritation of the stomach. He now takes about six grains of orpiment once a week; more when he has to undergo greater exertion, or when his digestion is impaired. He says that the arsenic expels gastric flatulencies. According to his statement, his father also took considerable quantities of arsenic. He also knows many people in the neighborhood of Ligest who take arsenic, many in larger doses than he uses, and he says that they all enjoy very good health. P. H., aged twenty-five, a servant, residing in Schwanberg, while serving as a herdsman, noticed that the other herdsman gave arsenic to the cattle and took it themselves. He also tried it and became accustomed to it. He takes, every eighth day, a piece on bread or bacon, and has always been fresh and healthy; when he endeavored to leave off arsenic eating he felt uncomfortable. In both these cases orpiment was generally used."—Once a Week.

Selected for "The Friend."

The Diligent Attendance of Meetings

A negligence of this important duty is almost sure to be succeeded by other omissions. Unless there is sufficient concern to press through considerable inconvenience, or to surmount some obstacles in our endeavors diligently to assemble together for the purpose of Divine worship, there is great danger of relaxing in this very essential act of dedication and devotion. Individuals who are unfaithful in this respect, as in any other, will find that their interest in Society will gradually diminish, that sublimity things will magnify in their view, and that things of the deepest interest to their eternal well-being, will as assuredly dwindle in their estimation. Then the world and the things of it, will be apt to take the place of their "first love," and to leave them weak and destitute of that sustaining virtue so necessary to strengthen them for their daily work, and to keep them alive in Christ, that they might be efficient members in His church.

It will not do to hold up the weaknesses of others as an excuse for our own unfaithfulness in this respect, as they cannot in the least palliate our remissness in the sight of Infinite Wisdom and Justice; neither are we excusable because we may see a devoting spirit in the fold. If right principles and order are in jeopardy from the faithless and designing, how much greater is the need for each one to retain his place as a pillar in the church, however diminutive in his own estimation, and to assist a suffering remnant by endeavoring to bear his share of the weight and responsibility. Before yielding to discouragements, and permitting the trials and afflictions of an agitated and troubled Society to discourage from the diligent attendance of meetings, both for worship and discipline, it might be well to remember, that the cause of Truth is not exclusively our own, to be abandoned at pleasure with impunity; but that it is entrusted to us by the righteous Judge, before whom we may shortly have to answer to the solemn mandate, "Give an account of thy stewardship, for thou mayest be no longer steward." Then, should we be destitute of the

oil of gladness which can alone be supplied by our blessed Redeemer, and which he dispenses to those who faithfully suffer for the Truth, and maintain a steady devotion to His cause, inexpressibly great indeed will be our dismay. In Society we must learn to bear hard things as good soldiers, and by no means suffer ourselves to be driven from our convictions of right by any influence whatever, remembering that the chastenings which the Almighty permits or dispenses, are needful for us, and indicate His parental care and tenderness. The sufferings which our early Friends patiently endured from various sources, tended no doubt to the preservation of that unity, harmony and love, so conspicuous amongst them; and those who shrunk from those afflictions, invariably experienced emptiness and want, from a decline of heavenly sustenance and virtue. The same results in this day, will as certainly follow the same causes. Individual faithfulness will produce a living and united people, while any who are allured away by the deceitfulness of a worldly spirit, or from any other cause fall back from their places in the church, will seriously wound themselves, ultimately to their own great grief, and to that of their concerned and well-wishing Friends.

The Storm-circled Ship.—"I should like to tell you some of my experience," said Capt. C., as the writer walked with him towards his home near one of the villages on the coast of Maine, from which he had been for some time absent on a voyage whence he had just returned. "We sailed from the Kennebec on the first of October, 1876. There had been several severe gales, and some of my friends thought it hardly safe to go, but after considerable prayer I concluded it was right to undertake the voyage. On the 19th of October we were about one hundred and fifty miles west of the Bahamas, and we encountered very disagreeable weather. For five or six days we seemed held by shifting currents, or some unknown power, in about the same place. We would think we had sailed thirty or forty miles, when on taking our observations we would find we were within three or four miles of our position the day before. This circumstance occurring repeatedly, proved a trial to my faith, and I said within my heart, 'Lord, why are we so hindered, and kept in this position?' Day after day we were held as if by an unseen force, until at length a change took place, and we went on our way. Reaching our port, they inquired, 'Where have you been through the gale?' 'What gale?' we asked. 'We have seen no gale.' We then learned that a terrible hurricane had swept through that region, and that all was desolation. We afterwards learned that this hurricane had swept around us, and had almost formed a circle around the place occupied by us during the storm. A hundred miles in one direction all was wreck and ruin, fifty miles in the opposite direction all was desolation; and while that storm was raging in all its fury, we were held in perfect safety, in quiet waters, and in continual anxiety to change our position and pursue our voyage. One day of ordinary sailing would have brought us into the track of the storm, and sent us to the bottom of the sea. We were anxious to sail on, but some unseen power held us where we were, and we escaped."

Such was the godly captain's story. "Oh

that men would praise the Lord for his goodness, and for his wonderful works to the children of men."—*The Christian.*

SET YOUR AFFECTION ON THINGS ABOVE.

Vain are all terrestrial pleasures,
Mixed with dross the purest gold,
Seek we then for heavenly treasures,
Treasures never growing old.
Let our best affections centre
On the things around the throne
There no thief can ever enter,
Moth and rust are there unknown.
Earthly joys no longer please us;
There would we renounce them all,
Seek our only rest in Jesus,
Him, our Lord and Master call;
Faith, our languid spirits cheering,
Points to higher worlds above,
Bids us look for his appearing,
Bids us triumph in his love.
Let our lights be always burning
And our joints be girded round,
Waiting for our Lord's returning,
Longing for the joyful sound;
Thus the christian's life adorning,
Never need we be afraid,
Should he come at night or morning,
Early dawn or evening shade.

GOD IN THE STORM.

"Did you hear the storm last night, my child,
As it burst o'er the midnight sky,
When the thunder rattled loud and wild
And the lightning flicker'd by?"
"I heard no tempest, mother mine—
I was buried in slumber sweet;
Dreaming I stood in the soft moonshine,
With flowers about my feet."
"Can it be, my child, that you did not hear
The roar of the tempest breath,
As it scattered the rent leaves far and near
In my an edifying treat?"
"No, mother: my happy sleep was full
Of gentle and holy things—
Shapes that were graceful and beautiful,
And the music of angels' wings."
"Yet the storm was loud, my darling child—
There was death on the hurrying blast;
And vapors dark overhead were piled,
As the hoarse wind bellowed past."
"I thought not of clouds, my mother dear,
When I rose from my nurse's knee;
You told me that God is for ever near,
So what danger could I see?"
"I taught you well, my sinless one!
Yet my own weak spirit quail'd,
As the midnight blast roll'd madly on,
And the moon's calm lustre fail'd."
"Were you wrong, then, mother, when you said
That God's eye turn'd not away,
But in darkness watch'd about my bed
As it did on my path by day?"
"I am rebuk'd" was the meek reply,
As the mother bent her knee,
"On the lip of babes may a lesson lie—
I have learnt one, child, from thee:
His wrath, which makes the sinner weep,
By a guilty conscience vex'd,
Does but deepen the sinless infant's sleep,
And rock it to a gentle rest.
And while thunders hoarsely peal around,
Sparking us to the worldling's ear,
The Lord in his mercy stills their sound,
When innocence is near:
And while his living fire appals
The guilty here below,
The shadow of the Saviour falls
On childhood's sleeping brow."

Parbo.

By affliction, God separates the sin which he hates from the soul which he loves.—*Mason.*

Smoking and the Moral Sense.

There are a great many men—gentlemen if you please—who would be hurt, if not offended, at being charged with dull moral perceptions, and an offensive indifference to the comfort and just rights of other people. As yet, I apprehend, all smokers are so; at least I have never met with an exception, so far as I remember.

I was crossing the British Channel one day with three English people, two of them ladies. These latter were hoping to escape sea sickness, and with that view were remaining on deck. We had not yet left the harbor of Dieppe, and I was standing near them; a man came along—a gentleman—with a cigar in his mouth. I said to him quietly that here were some ladies who were hoping to escape sea sickness, but I was sure that a whiff of his smoke would set them off. He begged pardon and immediately went away, while I was speaking in the same way to three or four other smokers; this was on the quarter-deck. By-and-by I again met the man to whom I had first spoken, and he alluded to the matter which led to a protracted conversation, in the course of which I found that he was really a gentleman of culture and refinement, in spite of the smoke. Among other things I said was the result of my experience and observation that smoking always blunted the moral sense. "What! of everybody?" said he. "Yes," I replied, "everybody—you!" He seemed hurt, not angry, and I immediately added: "You see how it is; those ladies have an undoubted right on this ship to fresh air; tobacco is intensely offensive to them, and yet without considering that—indeed, without even thinking of it—you went about among them with your cigar. Without blunting moral sense that could not have happened to you, for I am sure that you will among the last to deny that gentlemen ought always and everywhere to consult the comfort and happiness of others, and especially their rights." He paused for a moment and looked down upon the deck, then said: "You are certainly right. I did not even think that smoke was disagreeable to anybody. I did not think of the matter at all." "Yes," I replied, "there's where it is. A gentleman is never at liberty at any time or anywhere to disregard the comfort, the happiness, and especially the rights of other people. You will find that upon this matter—tobacco—persons who claim to be gentlemen, and indeed are gentlemen generally, are utterly oblivious of the rights of other people." *Neal Dow, in New York Witness.*

A very remarkable ecclesiastical transaction has been consummated, under the administration of Bishop Huntington. This is nothing less than the reception into the Protestant Episcopal Church of the German church of St. Joseph's, Rome, N. Y., formerly related to the Roman Catholic Church. The congregation had become dissatisfied with that connection, and, in some ignorance of the position of the Episcopal Church, applied to Bishop Huntington for admission thereto. This was two years ago. Bishop Huntington responded to the application by inviting its makers to a closer acquaintance with the doctrine and polity of his church, and by extending to them some instruction as to the pretensions and errors of Romanism. A few months since, rapidly did the course of their enlightenment

gress, they began to hold services after the order of the Episcopal Church, in the German language; a suitable rector was found for them; they were carefully indoctrinated in the scriptures; the paraphernalia of the Roman church were little by little removed; and final written engagements of conformity were used by the congregation, and the transfers completed.—*Episcopal Recorder.*

Accident in a Welsh Colliery.

The liveliest interest has been felt all over England and Wales in a story which illustrates with startling clearness the dangers that lurk in the bowels of the earth, and the reck and heroism which sometimes enable the dull, hard life of the miner. On Wednesday evening, the 11th of April, as the men were on the point of leaving work in the newydd Mine, near Pontypridd, the roar of rushing water was heard and the galleries and tunnels suddenly began to fill. The water broken through from an abandoned and del mine, and of course rose in the main flue and the lateral workings until it found level. Most of the men made their escape, when the roll was called fourteen were missing. An exploring party went down to look for them. They found all the galleries within a hundred yards of the bottom filled to the roof, but a knocking heard behind a wall of coal, indicated that some of the missing were imprisoned alive in a gallery which ended upward, its mouth being under water. The wall was a few yards thick. Volunteers attacked it with their picks; the prisoners looked from within; in a few hours they could hear one another's voices. But the moment a hole was broken through, the condensed air, kept under great pressure by the rushing water, burst out with a terrific explosion, and one of the imprisoned miners was blown into the opening as if he had been blown in a gun. He was taken out dead. Four others in the chamber with him were rescued injured. Knockings, however, were heard here on, and it appeared that other missing were in a similar, but still worse predicament—shut into a chamber of compressed

It is with the efforts to release this second party that the chief interest of the story lies.

The wall behind which they were confined was in a heading that was flooded, and no work could be done with the pick until the water had been pumped out. Divers first attempted the perilous feat of reaching the opening from the main shaft through half a mile of water, and it was afterward ascertained that one of the men within had tried to do the same in the same way. This, however, was impossible. It was not until Monday, the 14th day, that the volunteers were able to begin digging. The distance to be cut was 120 feet.

The work went on day and night with an eagerness that seemed like desperation, yet it was so slow! Cutting through the coal, in a gallery not more than three feet high, where the water, only kept down by constant pumping, threatened every moment to rise and engulf them, with trouble in gas and the danger of another explosion always before them, the rescue parties risked their lives in their hand whenever they cut into the mine, and their wives followed with sad eyes as they entered the shaft, hoping if they would come up alive. And the hope of saving their comrades, shut up so

long without food, was at best but a forlorn one. To reduce the danger from a sudden liberation of the air—danger not only of a violent explosion, but of a sudden rise of the water in the chamber as soon as the pressure should be relieved—air tight doors were constructed in the cutting, and an air pump was set in operation to establish an equilibrium on both sides of the wall. On the 18th, a week after the accident, voices were heard, and the working party were cheered by a faint cry: "Keep to the right side, you are nearly through." On the 19th the work had made such progress that an iron tube was forced eight feet through the barrier of coal, and an attempt was made, but without success, to introduce milk through it to the famishing prisoners. The miners rejoiced then that there were five of their comrades in the chamber, all alive, but two of them nearly exhausted.

On the night of the 19th there remained only eighteen inches to be cut away, and the excitement rose to fever heat. An enormous assemblage of people surrounded the mouth of the mine; physicians were in readiness; a temporary hospital was prepared, and a house near by was put in order for the sufferers, if haply they should be got out alive. The state of the work was discussed in Parliament, and bulletins were flashed at short intervals to the furthest ends of the kingdom. But just when it seemed that a few strokes of the pick might complete the labor, an eruption of gas took place, and the working party had to run for their lives. In time, however, the air was renewed and the work went on. At last, on the afternoon of Friday, the 20th, a hole was knocked in, and one of the cutting party entered the cavern. All was still; in their weak condition the agitation of the moment made the imprisoned men speechless. The rescuer felt about, and not finding any one, shouted, "Don't be afraid." The answer came, "All right; we are not afraid," and then a pair of rough arms were thrown about his neck. The first to be taken out was a boy named Hughes, and it is related that when the car came to the surface and the long suspense was over, the vast crowd of spectators did not cheer, nor use any of the ordinary means of showing enthusiasm; all seemed too serious for that.

Cases of life preserved without food for ten days, and even longer, are not rare, though the period of abstinence which these Welsh miners endured is considered the longest which man is capable of sustaining under ordinary conditions. They were able to drink the dirty water in the mine, and water, it is well known, has a great influence in retarding the effects of starvation. They obtained a little sustenance also by sneaking the grease that stuck to the bottom of their candle boxes, but they ate nothing during the whole ten days. Still they retained so much strength that when the iron pipe was pushed through the wall and the water began to rise in consequence of the escape of the air, they were able promptly to plug up the aperture; and one of the men even wished to walk when he was taken out, but the doctors refused to let him. There was only one of the five about whose recovery any doubt was expressed at the date of our last advices. There are still four men to be accounted for out of the fourteen who failed to make their escape when the waters broke through, and these are undoubtedly drowned.—*Little Paper.*

For "The Friend," Thomas Edward—a Scotch Naturalist.

The recently published life of Thomas Edward, is one of those admirable books which have come from time to time from the pen of Samuel Smiles, the author of "Self-Help," and other works. The person whose history is here delineated is still living; and it is pleasant to add, that through the public interest awakened by this volume, his outward wants have latterly been better supplied than for many years previously.

His parents were Scotch, but during the war with France, his father, who was a private in the militia, was ordered to Gosport, Portsmouth, where Thomas was born. When only about four months old he leaped from his mother's arms in the vain endeavor to catch some flies buzzing in the window. She clutched him by his long clothes, and saved him from falling to the ground. When asked in after years about the origin of his love for natural history, he said, "I suppose it must have originated in the same internal impulse which prompted me to catch those flies in the window."

At the close of the war the family returned to Scotland. Thomas began to walk at ten months old, and soon made friends with the cats and dogs, and other living animals that came in his way. On the removal of his father to Aberdeen, the little child found a rich field for exploration, both on land, and on the shores at low tide. He "used daily to play at these places, and brought home with him his 'venomous beasts,' as the neighbors called them. At first they consisted, for the most part, of tadpoles, beetles, snails, frogs, sticklebacks, and small green crabs (the young of the *Carcinus menas*); but as he grew older, he brought home horse leeches, asks (newts), young rats—a nest of young rats was a glorious prize—field-mice and house-mice, hedgehogs, moles, birds, and birds' nests of various kinds.

The fishes and birds were easily kept; but as there was no secure place for the puddocks, horse leeches, rats, and such-like, they usually made their escape into the adjoining houses, where they were by no means welcome guests. The neighbors complained of the venomous creatures which the young naturalist was continually bringing home. The horse leeches crawled up their legs and stuck to them, fetching blood; the puddocks and asks roamed about the floors; and the beetles, moles, and rats sought for holes wherever they could find them.

The boy was expostulated with. His mother threw out all his horse-leeches, crabs, birds, and birds' nests; and he was strictly forbidden to bring such things into the house again. But it was of no use. The next time that he went out to play he brought home as many of his 'beasts' as before. He was then threatened with corporal punishment; but that very night he brought in a nest of young rats. He was then flogged; but it did him no good. The disease, if it might be so called, was so firmly rooted in him as to be entirely beyond the power of outward appliances. And so it was found in the end.

As a punishment for his various misdoings, he was told one morning that he was to be confined to the house all day. It was a terrible punishment, at least to him. Only a portion of his clothes was given him, that he might not go out; and as a further precaution,

his mother tied him firmly to the table-leg with a thick wisp of thrums. She also tied his wrists together with a piece of cord. When she went out on family affairs, Tom's little sister was set to watch him. But he disengaged himself from his bonds almost as quickly as the Davenport brothers. With a mixture of promises and threats, he made his little sister come to his help; and the two together pushed the table close to the grate, when, putting the rope which confined his legs between the ribs, it soon burned asunder, and he was free. He next tried to find his clothes, but his mother had hidden them so securely. He found a coat of his elder brother's much too big for himself; nevertheless he put it on.

"His mother's feet were now heard on the stair. Tom hid himself at the back of the door, so that he might rush out as soon as she entered. The door was opened; his mother rushed in, screaming, and Tom ran away. The table to which the rope had been attached was on fire, and the house would soon have been in a blaze. In quenching the flames of the rope attached to the boy's leg, he had forgotten, in his hurry, to quench the burning of the rope still attached to the table. Hence the fire. But Tom was now at liberty. He soon got rid of his shackles, and sprang a glorious day out-of-doors. He had a warm homecoming at night; but the less said of that, the better.

"In fact, the boy was found to be thoroughly incorrigible. He was self-willed, determined, and stubborn. As he could not be kept at home, and would not go a message, but was always running after his 'beasts,' his father at last determined to take his clothes from him altogether; so, one morning when he went to work, he carried them with him. When the boy got up, and found that he had nothing to wear, he was in a state of great dismay. His mother, having pinned a bit of an old petticoat round his neck, said to him, 'I am sure you'll be a prisoner this day.' But no! his mother went down stairs for milk, leaving him in the house. He had tied a string round his middle, to render himself a little more fit for moving about. He followed his mother down stairs, and hid himself at the back of the entry door; and as soon as she had passed in, Tom bolted out, ran down the street, and immediately was at his old employment of hunting for crabs, horse-leeches, puddocks, and sticklebacks."

"The result of this exposure was to bring on a severe fever, in which for several weeks he hung as it were between life and death. At length the fever spent itself, leaving him utterly helpless. "One afternoon, as he was gradually getting better, he observed his mother sitting by his bedside. "Mother," said he, "where are my crabs and bandies that I brocht hame last night?" "Crabs and bandies!" said she; "ye're surely gaun gyte;" its three months sin ye were out!" This passed the boy's comprehension. "But where's a my things, mother?" "They're away!" The two bottoms of broken bottles we found in the entry, the day you fell ill, wera both throven out." "And the shrew-mouse ye had in the box?" "Galtou [the cat] took it." This set the boy a-ryring, and in that state he fell asleep, and did not waken till late next morning when he felt considerably better. He still, however, continued to make inquiries

after his beasts." He was then about four years old.

"On one occasion he got some boys to accompany him to a wood at Polmuir, about two miles from town, on a bird's-nesting expedition. While they were going through the wood, a little separated, one of them called out, 'A byke, a byke, 'steekin' on a tree, and made 'o' paper!' A byke was regarded as a glorious capture, not only for the sake of the honey, but because of the fun the boys had in skelpin' out the bees. Before they had quite reached the spot, one of the youngest boys yelled out, 'Oh! I'm stung, I'm stung!' He took to his feet, and they all followed. After they had run some distance, and there being no appearance of a foe, a halt was made, and they stood still to consider the state of affairs. But all that could be ascertained was, that the byke was on a tree, that it was made of paper, and that it had lots of yellow bees about it.

"This so excited Tom's curiosity that he at once proposed to go back and take down the paper byke. His proposal was met with a decided refusal; and on his insisting upon going back, all the other boys ran away home. Nothing daunted, however, he went back to that part of the wood where the byke had been seen. He found it, and was taking it from the under side of the branch to which it was attached, when a bee lighted upon one of his fingers and stung it severely. The pain was greater than from any sting that he had ever had before. He drew back, and sucked and blew the wound alternately, in order to relieve the pain.

"Then he thought, 'What can I do next? There the byke hung before him. It was still in his power to remove it—if he could. To leave it was impossible. Although he had nothing to defend himself from the attacks of the bees, nor any thing to put the byke into when he had taken it down, still he would not go without it. His bonnet could scarcely do. It was too little and too holey. His stockings would not do, because he wished to take the byke home whole. A thought struck him. There was his shirt! That would do. So he took off his jacket, and disrobed himself of his shirt. Approaching the tree very gently, though getting numerous stings by the way, he contrived to remove the byke from the branch to which it was hanging, and tucked it into his shirt. He tied the whole up into a sort of round knot, so as to keep all in that was in.

"It was now getting quite dark, and he hurried away with his prize. He got home in safety. He crept up the stair, and peeped in at the key-hole to see that the coast was clear. But no! he saw his father sitting in his chair. There was an old iron pot in a recess on one side of the stair, in which Tom used to keep his numerous 'things,' and there he deposited his prize until he could unpack it in the morning. He now entered the house as if nothing had happened. 'Late as usual, Tam,' said his father. No further notice was taken. Tom got his supper shortly after, and went to bed."

"The absence of his shirt attracted the notice of his brother, and led to inquiries, which resulted in the relation of his adventures. Before the old people went to bed, they put Tom's shirt into a big bowl, poured a quantity

of boiling water over it, and, after it was so they opened the shirt, and found—a was nest!

(To be continued.)

Seftel

1811. Henry Hull, accompanied by the Friends, came to pay a visit to our month. His communication was very instructive; particularly cautioning against self-activity; commending us to be as ready to receive a give counsel, and to wait reverently for gentle constrainings of the Spirit of Truth. He remarked also, that diffident minds, whom this caution least belonged, would the most disposed to take it to themselves and thus, he feared, might let in discouragement. He pathetically addressed the youth calling them into simplicity and early obedience, that they might obtain the inestimable ornament of a meek and quiet spirit. He supplicated sweetly for all, the absent as well as the present. I felt afresh contrited, as the language was sweetly raised, what sacrifice so acceptable as reverent bowdowness spirit! Our business being ended, a solemn pause ensued. In pure silence there is fulness. What a people should we be, if all did become fully under the harmonizing influence of that humbling Power, which brings over the thoughts into captivity!—*M. Cupp r.*

For "The Friend.

TRUST FUNDS.

A recent number of the *Christian Advocate* of New York, contains some strictures on the case of ex-mayor Lambert, of Brooklyn, who may furnish a seasonable caution to all who have the property of others under the care. We doubt not, that many are involved in great trouble, and oftentimes disgraced, the same way, as was this man—by borrowing trust funds in their hands, for their own use. It is a practice entirely indefensible, and he who resorts to it, is not fit to be placed in such a position as will give him the opportunity.

Lambert has published the following statement:

"Recent events with which my name has been associated, and the publicity given, has so utterly crushed me that I have been unable to present this simple statement undisturbed. I feel that it is due to myself, to those whose friendship and confidence I highly prize, and to this community, among whom I have so long dwelt, to make a frank statement. I became the executor of the estate of Rufus Crook, my brother-in-law, in March 1868, disposed of his interest in his business to his partner, and invested the proceeds with care, transferring all certificates of stock and the real estate to the name of Mrs. Crook, the sole legatee. I have acted as Mrs. Crook agent for a series of years. At times I have borrowed moneys and securities in my hand, not doubting for a moment my ability to return the same; but a series of adverse circumstances has prevented me from so doing, and hence the loss which has been sustained. There was my error. Misfortune has overtaken me in an unexpected manner; struggling hard against adverse circumstances, I have been compelled to succumb. I am deeply sensible that I have erred most grievously. I have been too sanguine. I have done what I could to repair the wrong. I surrender every thing in my possession to Mrs. Crook in order, as far as possible, to make up to

* *Gaun gyte*, becoming insane.

* *Byke*, a beehive nest.

loss sustained by my unfortunate manment of her affairs; and I can only ask the forgiveness of God and of those relatives whose property has been sacrificed, and of fellow citizens, whose confidence I have abused.

All that is left for me is to commence life anew; and my prayer is that I may live to repay the losses which my financial error caused.

EDWARD A. LAMBERT.

In this sad narrative the Advocate remarks:

No one can read this without sorrow. It contains some redeeming features. It is worth reading to have this man feel his shame, and show so much pride of character and of his ruin. It is worth something to have made the best restoration possible. It is worth something to the public morals to see him insist that he did not intend to steal, and to have some redeeming features to this and we would give it all the charity that will justify. But there are facts that never be justified. He says: 'At times I borrowed moneys and securities in my hands, doubting for a moment my ability to return same.'

But for this there could have been no such credit and shame. We do not wish to afflict him, but we do wish to emphasize this crime, and *had no right to loan that money to himself.* This was against him. Custom was against him. Prudence was against him. Honor was against him. He had no right to touch the life of any man, and so it was dishonest. He had no right to imperil the public confidence. He had no right to expose his own good name. He who pits him, we must not overlook the fact that he has betrayed his trust, committed himself to a course of fraud, and has robbed the helpless."

The United States Life Saving Service.

The sea and lake coast-line of the U. States exceeds ten thousand miles in length, a greater length than that of any other nation. It has, therefore, in this great extent, every variety of configuration, and presents every feature dangerous to the mariner. We have the round coast of Maine, the islands and capes of Massachusetts, the six hundred mile stretch of beach from Montauk to Cape Fear, the comparatively safe coasts of Florida and the Gulf of Mexico, and the bold, unbroken coast of the Pacific, with the coast line of the lakes, 2,000 miles in extent.

The coasts that present the most ghastly record of disaster are the shores of Long Island and New Jersey. The surf has swaled up and the sand entombed, hundreds of lives, and great treasure on those inhospitable shores.

For long years our National Government thought toward saving the lives of imperiled voyagers. Even the paramount duty of lighting the salient points of the coast was scarcely performed. But fifty-five light-houses were maintained in 1820. The fishery and wreckers along the coast often did it, risking their own lives in rescuing strangers and crews; but there was no preparatory preparation of life-saving apparatus.

The method of aiding stranded vessels by the establishment of buildings for the shelter of the shipwrecked and the preservation of boats and other apparatus, was first introduced by the Government in 1818. The

Humane Society of Massachusetts had put this method into practice as early as 1789, when a hut for the shelter of shipwrecked persons was erected on Lovell's Island, near Boston. The first life boat station was erected at Colossus in 1807.

In 1854 the Secretary of the Treasury was authorized to appoint superintendents for the coasts of Long Island and New Jersey, and a keeper for each of the stations that had been established. The result was a marked improvement in the efficiency of the service. It was not, however, until 1871 that the service began to be put upon its present footing, and not until 1874 that it was extended and completed as it at present stands.

The Life Saving Establishment now embraces eleven districts, with one hundred and eighty-two stations. There is a superintendent for each district, and an assistant superintendent for district No. 4, the coast of New Jersey. A keeper and a crew of six surfmen are employed at each station, the keeper having charge of the station during the whole year, and the crew being employed during the inclement season from November or December to April or May. A system of inspection is maintained by officers detailed from the Revenue Marine, and the whole service is under the charge of an officer of the Treasury Department. The stations are divided into the mess-room and the boat house. In the former the men do their cooking and spend their time when not on active duty. The attic story is fitted up with cots for a sleeping room. In case of a wreck, the crew try first to use the life boat, thus saving the time that would be consumed in getting the other apparatus into operation. Sometimes, however, the boat cannot be used, then the life car comes into service.

The life car is made of iron. It is boat shaped, and will float if by any cause it should become detached from the hawser. At each end are air chambers to give it buoyancy. It will hold five or six persons. Air is supplied only through a few small perforations, but as in transporting people from ship to shore by this means the problem of "rapid transit" is solved, it is to be presumed that no fault is found with the ventilation.

The hawser from which the car is slung is a four inch manilla rope. To get this to the vessel the mortar is used. A small, but strong line is attached to the shot, which is fired over the vessel, the line, of course, falling on deck. By means of this line the hauling, or "whip" line, a two and a half inch rope with its pulley carried on board. The hawser then comes next, and when it is made secure on the ship it is fastened at the shore end to the sand anchor. Once the hawser stretched and the car attached, it only remains to send the latter back and forth as rapidly as possible till the imperilled lives are on terra firma.

The crews of the life saving stations are expected to remain at their stations during the whole time of the inclement season. Every night the beach is patrolled, the men from the next adjacent stations meeting and then returning to their own house. The night is divided into three watches, and thus the whole stretch of the dangerous shore is three times visited between dark and day.

The cost of this service is inconceivable compared with the results attained. The total expenditures for the year ending June 30, 1876 were \$175,500. There were, during that time, 108 disasters to vessels within the dis-

tricts of the service. On board these vessels were 751 persons; and the value of vessels and cargoes was estimated at \$1,730,538. The number of lives saved was 729; and the value of property saved was \$847,184. In fifty eight of the disasters the life saving apparatus was actually used, rescuing 366 persons, who, without its use, would probably have perished.—*Christian Weekly.*

Judge Pierce, in reviewing the presentment of the Grand Jury of Philadelphia, recently, said:—

"The number of licensed taverns in Philadelphia are 5000; unlicensed taverns, about 2000. This gives one tavern to every one hundred inhabitants, or one tavern to every fifty of the adult inhabitants of the city. As these taverns are principally resorted to by men, this gives one tavern to every twenty-five male inhabitants of Philadelphia. Let us look at the fruits of this traffic. The arrests reported by the Mayor for 1876, were, for intoxication, 19,053; for intoxication and disorderly conduct, 5448; selling liquor without a license, 2; selling liquor on Sunday, 8; total, 24,511, or more than one half of the whole number of arrests for all causes, which were 44,919, or 4408 more than the arrests for all other causes whatever. The number of arrests for the sale of liquor without license, as reported by the Mayor, does not exhibit the whole number of arrests for this cause, as, by law, it is made the duty of the constables to return to court the number of licensed and unlicensed houses, and bills of indictment are then sent in by the District Attorney against the keepers of the unlicensed houses, who are required to come in and give bail. The Mayor, therefore, is not specially charged with this duty. About three hundred bills have been tried against the keepers of unlicensed houses during the present year.

To look at the fruits of the traffic; at least one-half of the police force of the city are employed day and night, say 600 patrolmen, at a cost of \$500,000; half of the expenses of the County Prison, \$50,000; the House of Correction, \$326,000; half of the expense of the Almshouse, \$250,000; other incidental expenses, such as proportion of pay of the police magistrates, jurors, Court officers, District Attorney's office, &c., &c., \$74,000. Total, \$1,200,000. This is a moderate estimate of what the traffic in liquor costs the city of Philadelphia in cash. Besides the direct expense to the city as a municipality, the cost to those who frequent and patronize these taverns is simply enormous. It is a moderate estimate that these seven thousand do an average business of three thousand dollars a year each, which gives us the enormous sum of twenty-one millions of dollars; and this worse than useless outlay of money is largely borne by the working classes. Is it a wonder that when hard times come there is so much suffering among that class of our citizens whose hard earnings are thus diverted from the savings institutions to indulgences which are destructive to both health and happiness? But this deplorable traffic comes freighted to us with greater burdens than those which affect material wealth. It brings in its train the broken health and squandered fortunes of thousands; the sighs and broken hearts of mothers, wives, sisters and children; ruined characters and desolated homes; widows and

orphans, whose bitter tears are doubly bitter when they remember the causes of their desolation. Is it not a wonder, then, that as citizens having regard to our material interests, as men having a sympathy with our fellow-men, and as Christians having regard to the highest moral interests of our fellow-beings, we are so supine in our efforts to relieve us of this great evil?"—*Lodge*.

THE FRIEND.

FIFTH MONTH 19, 1877.

It is a token of the Lord's goodness that He stirs up the nests of those whose affections and thoughts are too much engrossed with the pleasures and cares of this life; and who do not keep in mind the great object for which we were created. He often causes such to feel that all is vanity and vexation of spirit; destroys their satisfaction in the things they are most eagerly pursuing; and makes them sensible of their want of true peace, and soul-satisfying rest. This is to prepare them to seek something better, and to listen to the gracious invitation of the dear Redeemer, which is still extended to the sons and daughters of men: "Come unto me all ye that labor and are heavy-laden, and I will give you rest. Take my yoke upon you, and learn of me; for I am meek and lowly in heart; and ye shall find rest unto your souls."

There is no other way of obtaining true rest, but by yielding ourselves up entirely to the Divine will; and thus laying in the government of our lives on the shoulders of Christ. It is truly a precious experience, to be brought into that state of humble dependence on a Rock that is higher than ourselves, in which we can say of every thing that may befall us: "It is the Lord, let Him do what seemeth Him good;" and where our confidence in His overruling care and protection is such, that we can truly rest in the declaration, "All things work together for good, to them that love God."

How beautifully does the sweet Psalmist of Israel express this holy trust! "The Lord is my light and my salvation; whom shall I fear? The Lord is the strength of my life; of whom shall I be afraid?" "In the time of trouble He shall hide me in His pavilion; in the secret of His tabernacle shall He hide me; He shall set me up upon a rock." "Therefore will I offer in His tabernacle sacrifices of joy; I will sing, yea, I will sing praises unto the Lord!"

SUMMARY OF EVENTS.

UNITED STATES.—The Centennial Board of Finance has paid into the Treasury of the United States \$1,000,000 an amount of the appropriation made by the Government to the Centennial Exhibition. The remaining \$200,000 will be paid in a few days.

The State Department has been officially notified that the existing trade of Angola, heretofore closed to all but Portuguese vessels, will hereafter be open to all American and foreign vessels.

Two colored men from Mississippi and Alabama have been appointed to positions in the Treasury Department.

Secretary of War, Mcrary, has issued an order which discharges 2500 enlisted men of the army, between now and the 1st of 7th month, which will reduce the army to 25,000 men.

The Permanent Exhibition at Philadelphia, in the main building of the centennial grounds, was opened on the 10th inst., and was an occasion of great interest.

It is officially stated that more than 100,000 persons were present. On the 12th inst. the number of paid admissions exceeded 18,000.

The supplies for the subsistence of the 15,000 Indians now collected at the Red Cloud and Spotted Tail agencies, are insufficient, and the Assistant Commissioner of Indian Affairs makes an application from which it appears that the contractor to furnish flour for these agencies had failed to fulfil his contract. When his default was ascertained, measures were taken to purchase for immediate wants, and supplies of flour, corn, bacon and other articles have been made, which will provide for the full issue of the rations fixed by law. The agents, however, are unanimous in saying that this ration is insufficient, and recommend its increase. As Congress did not make an appropriation large enough for the ration fixed by treaty, and as the Indian Office is forbidden to exceed the appropriation, no increase can be made; and there is consequently much dissatisfaction among the Indians, and a disposition on the part of many of them to return to the war path.

Professor Riley of the National Entomological Commission, has submitted to the Governor of Kansas, a report of the result of three weeks examination of the locusts in that State and Texas. He thinks that there is not much danger of no danger from those insects in Kansas this year, the cold, rainy weather having been generally fatal to them. The examination has confirmed his previous belief that the locusts cannot thrive permanently out of their natural habitation. When the locusts' course has been fully ascertained, and the means for a determined effort to exterminate them will no longer interfere with the settlement of the western plains, which it visits at irregular intervals.

The State Department has replied to Turkey's formal declaration of her war with Russia, to the effect, that the United States in conformity with its uniform policy, will continue to occupy a strictly neutral position in the present European war. A similar reply will be made to the Russian notification.

Campbell and Thayer's oil works in Brooklyn, N. Y., were destroyed by fire on the 13th inst. Loss on buildings, an-ironery and stock, about \$400,000; origin supposed to be spontaneous combustion.

On the 12th month, 7355 emigrants arrived at the port of New York, of these 3911 came from the British Islands, 2184 from Germany, and the remainder from twenty-nine other countries.

New York city continues remarkably free from disease, the deaths last week numbering 440, and in Philadelphia for the same period the interments numbered 1000. The influenza has not been so prevalent as usual.

The Secretary of War has received from Drexel, Morgan & Co., of New York, a proposal to furnish supplies means at a rate of interest not exceeding 5 or 6 per cent., to pay the army from 7th mo. last until Congress shall pass the army appropriation bill. The Secretary declines the offer on the ground that the law does not authorize such a contract.

During the 4th month the exports of fresh beef from the United States amounted to \$416,829 lbs.

The Markets.—The following were the quotations on the 14th inst. *Philadelphia*.—American gold, 107; United States 65, 1851, 144; 113; do. 1867, 114; 114; do. 1870, 112; do. 41 per cent. 108. *Corn*, Maryland and New Orleans, 11; 1 1/2; do. Flour, \$7 a \$12.00 a barrel. *Pennsylvania red wheat*, \$2.15 a \$2.18; *Delaware amber*, \$2.20; *white wheat*, \$2.25. *Rye*, flour, \$1.05 a \$1.07. *Yellow corn*, 69 a 70 cents. *Oats*, 50 a 57 cents. *Cheese*, N. Y. factory, 14 a 15 cents; western, 14 a 14 1/2 cents. *Clayton seed*, 12 1/2 a 13 cents. *St. Louis*—No. 1 red fall wheat, \$2.08. *Mixed corn*, 52 cents. *Oats*, 45 a 47 cents. *Rye*, 81 cents. *Canadian barley*, 95 cents a \$1.05. *New York*.—Superfine flour, \$7 a \$7.70; four barrels, 88 a \$12.50. *Extra white Michigan wheat*, \$2.35. *Corn*, 52 1/2 cents. *Oats*, 43 1/2 cents. *Lard*, 91 cents.

The President of the United States has sent the Count De Constant Biron to meet the Emperor of France. The Emperor William, is highly appreciated as an indication of the continuance of a good understanding between France and Germany.

The feeling in England appears to be almost entirely in favor of Great Britain who seem to be involved in the war between Russia and Turkey. The preparations for transporting troops are going on throughout the island.

The Rumanian Government has taken such measures as indicate clearly its intention to take an active part in the war upon Turkey. On the 12th inst. the Rumanians attempted to force a passage of the Danube, but were defeated by the Turkish artillery.

In a few days the annual Holy Pilgrimage Caravan will leave Constantinople for Mecca, laden with costly pre-

sents for the Mohammedan shrines. The leader received instructions to proclaim in all the cities he passes through, that the Sultan has resolved to call the faithful to a holy war against infidel Russia, and promises to govern a pilgrimage himself if the war is successful.

A Russian battery, hitherto masked by a wind opened fire on the 10th inst. on the Turkish moor near Braziel; an hour after the commencement of attack, a shell struck a large three-masted ironclad sunk her, with her commander, Hissan Bey, and crew of 300 men.

The Russian insurrection against the Russian Government broken out in the Caucasus, and causes the Russian Government much anxiety, and threatens to increase.

An official Constantinople despatch says, the Russians having on the 11th inst. attacked, in great force, the vicinity of Batoum, an engagement ensued lasting 53 hours, and resulting in the complete defeat of the Russians, who lost 4000 men, while of the Turks was comparatively small. Turkish reinforcements continue arriving on a large scale.

The steamer *Ducat* of the Williams and Goulet Co., sailed from Liverpool on the 10th inst. for New York, the same night ran ashore on the north side Anglesey, North Wales. The passengers and crew all were rescued and landed safely, but the *Ducat* completely wrecked. The steamship *Ducat* and its cargo are heavily insured in London and Liverpool, the ship being valued at \$50,000.

A fire broke out in Liverpool on the 10th inst. in a field, it has been unanimously resolved in consequence of the continuous strike of shipwrights for an advance of wages, that there should be a general lock-out of ship-building workmen, commencing on the 19th inst. This resolution affects all the ship-building yards at Glasgow, Greenock, Port Glasgow and Dumbarton. The shipyard at Greenock, which has been partially burned, the damage amounting to \$400,000 in machinery.

Telegrams have been received in Liverpool and London, stating that the town of Iquique, in Peru, was struck by an earthquake on the 10th inst.

A letter telegraphed from Cairo says, it is believed Egyptian Government will be able to send 10,000 tons to Turkey. Turkish transports are expected from there to embark them.

The *Times* Berlin despatch says, in about a week northern part of the Danube, between the mouth of the Rhine and Rastchak, will probably be occupied by 60,000 Russian troops. Russian troops are expected to cross Danube simultaneously at several points, or they are to make the Turks believe such is their plan; the Turks are thus compelled to distribute their forces on a large area.

On the 21st inst. the Mexican Congress declared Diaz duly elected President of Mexico, and he solemnly inaugurated. After Diaz took the oath of office he declared that he would occupy the Presidency for one term only.

An official telegram from Japan states that the civil war now raging in that country, the Emperor has been victorious in every engagement.

Active operations in Buenos Ayres prepared by the Department report that great heat and drought prevailed there for weeks. It was feared that little crops in the upper provinces would be saved that much suffering would result. The streams small rivers were almost dried up, and in the provinces of Entre Rios, forest and meadow fires were raging a great extent.

FRIENDS' SELECT SCHOOLS.

A suitably qualified Friend is wanted as Principal of the Boys' Select School, at the opening of the term the Ninth month. Application may be made to

Joseph S. Elkinton, 233 South Fifth St.
Edward Mars, 127 South Fifth St.
James Smedley, 415 Market St.
George J. Scattergood, 413 Spruce St.

FRIENDS' ASYLUM FOR THE INSANE. *New Frankford*, (Twenty-third Ward,) Philadelphia. Physician and Superintendent.—JOSHUA H. WOLSTON, M. D.

Died, on the 11th of 11th mo., 1877, at his residence in Philadelphia, Mrs. GULLA A. WELLS, the wife and daughter of David and Sarah Dunbar, aged 234 years of her age. Though suddenly removed "works to rewards," her many thoughtful expressions lead to the comforting hope that her end was peace.

For "The Friend."

Random Notes of Travel in Europe.

(Continued from page 309.)

Carlisle, 8th mo. 1875.—As we sped along between Dumfries and Carlisle, we caught a glimpse of the Solway on our right, broad, shallow, and bordered with yellow sand; passed by Annan, reminding that Bruce was once master here: gave a glance at Gretna Green, and a few minutes later crossed the border and found ourselves in England.

"Blithely we saw the rising sun,

When he shone fair on Carlisle wall."

we crossed the broad green meadows which border the Eden, shadowed on the further side by the high square tower of the old castle, and the remnant of the city wall, half hidden by the towering trees which cluster round the base. The once famous Border town, an apple of discord between two kingdoms, is brought at last beneath the bit and riddle of railway companies, and we glided to the station, in a much more comfortable and less picturesque manner, than many who had entered from the north in former times, and were soon ensconced in the pleasant home of a beloved friend, where "marked with white as every day," during our stay at "Merrie Carlisle."

Those who expect to find an antique city, with curious buildings, "darkened by picturesque overhanging gables," where every one bespeaks a history, will be disappointed, for the streets are wide and clean, with scarcely a vestige interesting to the antiquary—if except the castle and cathedral, and the market square, with its old Cross, from which the Pretender was proclaimed during his short triumph in 1745, and where George Fox once stood, at an earlier day, and preached to the people.

"On the market day," he writes, "I went to the cross. The magistrates had both threatened and sent their sergeants. * * * Nevertheless I obeyed the Lord God, went upon the Cross and declared unto them that the will of the Lord was coming upon all their crafty ways and doings, and deceitful merchandise; that they should put away all cozening and cheating, and keep to yea and nay, and speak the truth one to another, so the truth and the power of God was set over them." Afterwards we followed his footsteps to the castle-yard, for he adds, "Then I went to the castle among the soldiers; who beat a

drum and called the garrison together. I preached the truth among them, directing them to the Lord Jesus Christ to be their teacher, and to the measure of his Spirit in themselves, by which they might be turned from darkness to light, and from the power of Satan unto God. "I warned them all, that they should do no violence to any man, but should show forth a christian life; telling them that he who was to be their teacher would be their condemner if they were disobedient to him. So I left them, having no opposition from any of them except the sergeants, who afterwards came to be convinced."

Bold words, these, to be preached to the soldiers in the very recesses of their stronghold! The undaunted preacher, whose searching doctrines were setting the city in an uproar, was afterwards immured for three months in the prison of the castle, among the vilest criminals, who, he tells us, became very loving towards him. It has been said of the castle where he was kept in durance vile, that within its walls may be read an epitome of English history—Roman, Saxon, Dane, Norman, for the handiwork of each is visible here. Wallace and Bruce attempted to scale its walls. Mary Stuart found here her first English prison, and here Cromwell came after the battle of Worcester. Within the thickness of the eastern wall are two cells, the outer one well lighted through a long loop hole, and it was with melancholy interest that we examined the rude carvings on the bricks, of men and birds and animals, with the arms and crests of the ancient families of the surrounding country. No doubt the labor had beguiled many a weary hour that would have hung heavy on the poor prisoners within. Most touching of all were the finger-marks, below the window bars, made by the Scotch captives when raising themselves up to look upon the hills of their native land. Years of such vain endeavor had worn them into the stone. The smaller cell was scarcely visible. A party entered with us, some one demanded a match, which was produced from the pocket of one of the strangers, and a temporary light illumined the dismal abode; but we saw nothing of particular interest therein. But what tragedies have these old places beheld! what sighs and groans have re-echoed unheeded here!

Within the interior of an outer wall, were found some years since, the skeletons of a woman and child, in a standing position, entirely walled in. The wall was restored after they were placed there, so that no suspicion could attach to the spot. Accident led to the discovery of the skeletons, but nothing was ever revealed in connection with their history.

Carlisle, 8th mo. 26th, 1876.—Once more we are domiciled beneath the roof of our dear _____, where nine days of last summer were spent so pleasantly, so that we now greet many places of interest as old friends. Now that we had some one to plan for us, and

better still accompany us, after an animated debate, it was concluded that the warm, bright summer afternoon, must be spent out doors, and we would revisit Corby. David Hume was so delighted with the rural charms of the latter, that he wrote on a pane of glass at his inn at Carlisle—

"Here Scotsmen's heads adorn the wall,
But Corby's walks atone for all!"

The estate belongs to Philip Howard, a descendant of "Belted Will" Howard, of Naworth, and extends sixteen miles around.

A few minutes by rail brought us to Wetheral Station, five miles east of Carlisle, and ascending the low hill near it, we entered the pretty village of Wetheral, and crossing the village green, adorned by its ancient cross on a round pedestal, caught glimpses of handsome houses interspersed with white-washed cottages, forming together a kind of architectural ribbon gardening. Such flower beds as surrounded mansion and cottage! Such superb Fuschias! what a wealth of yellows and blues and reds combined! The cottages were almost hidden among the creepers and climbing roses. No blighting summer sun scorches their beauty, nor is the cold of winter intense here, and many of the shrubs in consequence, attain to great age and size. Then entering upon a winding walk by the side of the river, which flows for miles away through these extensive grounds, we marked the warm tinge of the red sandstone, cropping out occasionally, amidst the green foliage of the old knotted oaks, where the tender young acorns were beginning to show themselves among the leaves. Finally we emerged at St. Constantine's cells a unique abode, hewn out of the solid rock forty feet above the river. There are three cavities seven yards in length, three in breadth, and three in height, each with a window looking upon the river. These dark, damp rooms, open upon a covered gallery, built upon a ledge in front of the cells, where we noticed the remains of a fire place. Here, it is said, lived for many years St. Constantine, the son of an early Scotch king, who flinging away ambition, and emptying his heart of the pride of his birth, devoted the remainder of his days to meditation and prayer. At a later period the monks of the adjacent Priory of Wetheral, the ruined gateway of which we had passed on our left, used them as places of retreat from their enemies. There are no places for steps, and they must therefore have been entered by a ladder, afterwards drawn into the caves, which were almost concealed by overhanging wood and ivy. The food of the inmates was probably drawn up in baskets. Since our last visit a sad accident had occurred here: a boy was searching for birds' eggs in the curiously twisted old oak tree which projects itself horizontally from the rock over the cells, when by a sudden careless movement he lost his hold and was precipitated into the river below, and instantly killed. On the opposite side of the Eden

is a stone statue of the hermit prince, habited as a monk, bare headed; with his crown at his feet, and a book in one hand, while with the other he points to the opposite cave. Graven on the pedestal is the motto "Excelsior!" At the ferry we were obliged to wait a few minutes for the boatman, an old acquaintance of last summer. Suddenly J— exclaimed, what is this? and picked up from between the rocks at his feet, a small black leather satchel; yes! the identical one our cousin — had handed to a woman at the station, and which he had found in the railway carriage after she left it. So she had lost it a second time! "What a care****" conscience forbade the addition of the last syllable: sundry recollections of lost parasols, &c., occurred vividly, and nipped the incipient reflection in the bud! We crossed the beautiful Eden, famous for its salmon fisheries, saw once more the ferryman's cottage with its white walls and thatched roof nestling among the shrubbery, at the foot of the hill, took a hasty glance at the broad paths leading away into the heart of noble woods, at the plain, square mansion of red freestone, with its Doric portico and parapet surmounted by the red lions, the family crest of the Howards, and emerged in Corby village, a counterpart of Wetheral, in order and beauty, except that Corby boasted a classical smithy, the entrance to which is a veritable Norman arch, with a bas-relief of Vulcan with his hammer, over the door; the whole a fancy of some former Howard, as the date declared. The interior was in keeping with the finished outside, the blacksmith himself excepted. On reaching the station we again had the pleasure of restoring the satchel to its rightful owner.

Seventh-day.—This morning being market and Fair-day, the streets presented a stirring scene. Many booths were erected in the square, the chief bustle centering around the market cross, as it had for centuries past. The statue of one of the former mayors of Carlisle looked kindly down upon the busy market-women, exhibiting their wares. A cluster of fine zeronthemons caught my eye, bright with their golden yellows ruby and white. A young girl near me asked their name. "Everlasting flowers," I replied, "Ah! manum may we all reach them some day," she remarked, with a sigh.

These English fairs present at times, a lively aspect. There was a great deal to sell and apparently not much time to be lost in the process, judging from the eager haste of the dealers. On the ground were great baskets of very fine plums and gooseberries, apples, cauliflower and cabbages, white beans, potatoes and peas were also in abundance in the market. The prices of meats and vegetables were never higher than with us, and generally lower than our average prices in Philadelphia. We missed many fruits common at home. Nowhere in England can tomatoes be grown, nor water-melons, nor the long catalogue of delicious melons and cantaloupes, which so abound with us, and fill our markets with their fragrance. Even cucumbers are very rare, being generally grown beneath glass. Cowper well describes the toil of growing them. Sweet potatoes, Lima-beans and sweet-corn, are also unknown. American canned tomatoes are, however, becoming common at the hotels, and are so much relished and so reasonable in price, that in time there will arise a great demand for them, which will

lead to the introduction of our favorite sweet-corn and other vegetables, preserved in the same manner. A few weeks later we bought in London fine canned peaches, put up in Wilmington, Delaware, which were selling at one shilling, English, per can, holding about a quart. Fresh strawberries were neither as cheap nor as abundant as with us, though much sweeter than ours, and really excellent. At the Fair among the booths appeared a motley display of tinware, sponges, queensware, iron implements, toys, calicoes—bleached and unbleached muslins are calicoes here—sun-bonnets, laces, &c.

Soon growing tired of the noisy trafficking, I took my way to Eden Bridge, and turning to the left, pursued a path to a distant meadow, where there appeared to be a great crowd of people, and an immense number of sheep. "What is all this?" I asked of an elderly woman near me. "This is Carl Sheep Fair," she replied. "It is held twice a year, and a fine place for it, is the Saucerries!" Yonder over the Brig on the sands is the great Cattle Fair, and there under the Sears is "issop olme well!" It was interesting to observe the great, noble-looking shepherd dogs, who were of course on active duty, as well as their masters, bringing in unruly members of the flock, who would break away for a time, in spite of every effort to the contrary, the sheep being in compact groups, at short distances from each other. They were fine fat animals, with quite long wool, and must have been shorn early in the season, if at all that year. As I looked at the scene before me, and then at the frowning castle walls, I thought how infinitely the peaceful, unromantic Present is to be preferred to the warlike clamor of the Past; now, all is quiet and security, then, violence and rapine ruled the land.

♦ ♦ ♦ ♦ ♦
For "The Friend"
Family and Brotherly Love.

Too often it is painfully evident that members of the same family do not live in perfect concord and unity, but that the spirit of selfishness has dominion among them, giving rise to jealousies and suspicions, if not actual dislike and hatred.

Taking a little wider circle, among Friends there is reason to fear that the Divine injunctions, "above all things have fervent charity among yourselves," and "let nothing be done through strife or vain glory; but in lowliness of mind let each esteem other better than themselves," are too much disregarded.

Against these sad evils there is an effectual remedy by coming under the discipline of the cross of Christ, and suffering Him to set up His pure kingdom of love and peace in their hearts. All such will love to draw near to their adorable Redeemer and wait patiently upon Him, so that they will be enabled both to love their friends as they ought, and also to love fervently, and trust in that merciful Saviour who has done so much for them.

Oh! how transcendently better would be

* Saucerries, willow plantations, a name not found in our English dictionaries, but obviously derived from the same root as that from which the word willows spring, i. e., the Anglo-Saxon word *salig*, a willow, which is analogous to *salix*, the Latin name now employed by botanists, to designate the genus to which the numerous species of willows belong. A similar name, *Sanelcillo*, little willows, is borne by a pleasant retreat on San Francisco Bay, California, and is of course of Spanish origin.

the state of things among us, if all who wish to be thought Friends had these important considerations always uppermost in their mind. We should then be so tender-spirited and united in the bonds of christian fellowship that it might be said of us, as it was of honorable predecessors in religious profession in early days, "See how these Quakers love one another." The blessed truth would then again prosper and grow among us, and it might once more in some degree be as high in the world, and be instrumental in promoting the cause of our Divine Redeemer, and causing His glorious, holy name, to be magnified among men.

♦ ♦ ♦ ♦ ♦
Word-Changes.

For "The Friend."

It is a matter of much interest to the student to trace the gradual change which is ever going on in living languages, by the introduction of new words, the dropping out of old and obsolete terms, and the use of other which are retained, in a more restricted or even different sense from that which they originally had. The interval which has elapsed since the translation into English of the version of the Bible now commonly used in English-speaking countries, is sufficiently long, to render somewhat obscure to the ordinary reader the meaning of some words in it, which were familiar enough when this translation was first published. The following illustrations of this are taken from the "Bible Word Book," prepared by William Swinton, with the design of pointing out those words which have changed their popular meaning, or are no longer in general use; but they are not a literally copied.

ADAMANT. "As an adamant harder the flint have I made thy forehead."—Ezek. iii. So also,

"Armed in adamant and gold."—Milton. This word has now taken the form *diamond*. *Adamant* is, however, nearer to original greek *adamas*, which means the unconquerable, in allusion to the exceeding hardness of this stone. We still retain the objective *adamantine*, meaning very hard.

ADMIRATION. "And I saw a woman drunken with the blood of the saints, and with the blood of the martyrs of Jesus; and when saw her I wondered with great admiration"—Rev. xvii. 6.

The primitive meaning of *admiration* wonder. It did not carry with it the sense of approval, which our modern usage does. "Wondered with great admiration" is equivalent to wondered with *great wonder*, which the literal translation. Milton uses this in all its kindred words in the same sense—

"The undaunted fiend what this might be admired
Admired, not feared."

That riches grow in hell."

ALL. "Without all contradiction."—Heb. vii. 7. "And with all lost thing of thy brother's, which he hath lost."—Deut. xxii. 1.

All, with a negative, without express, only implied as in *without*, was a Hebrew or Greek idiom for *any*, and was so used by English writers.

"The trade of monkey, which was without all devotion and understanding."—Latter's Sermons.

ALLOW. "Truly ye bear witness that ye allow the deeds of your fathers."—Luke xi. 4.
Allow has here the sense of approving or

raising,—that you approve the deeds of your fathers. In modern English it means merely to permit. However, *aloue* has the meaning of praise in its original root (Latin) *allaudare*, and that from "laus," praise.

"The less he is worthy, the more art thou therefore allowed of God, and the more art thou commended of Christ."—*Homilies against Ientention*.

"ALL TO." "And all-to brake his scull."—*Judges* ix. 53.

"All-to meant in old English, altogether, wholly.

"We be fallen into the dirt, and be all-to dirtied, even up to the ears."—*Lattimer's Remains*.

APPARENTLY. "With him will I speak unto to mouth, even apparently, and not in dark speeches."—*Numb.* xii. 8.

In modern usage, *apparently* means *seemingly*—that is, something that is in appearance; but in the seventeenth century it signified manifestly, clearly, openly.

BARBARIAN. "Therefore, if I know not the meaning of the voice, I shall be unto him that speaketh a barbarian."—*1 Cor.* xiv. 11.

The word here used in the original is in all other passages of the New Testament rendered by *barbarian*, and is in every instance used in its strictly classical sense of *foreigner*—one who speaks a language other than Greek, without any idea of *barbarism* in the modern sense, necessarily attaching to it.

BASE. "And base things of the world, and things which are despised, hath God chosen."—*1 Cor.* i. 28.

There has been a considerable degeneracy of meaning in the word *base*. In the Bible sense it means simply *low*, *humble*, not necessarily *worthless* or *wicked*.

BECAUSE. "And the multitude rebuked him, because they should hold their peace."—*Mark* xx. 31.

This would now mean, because they ought to hold their peace. But the meaning of the passage is, rebuked them to make them hold their peace; as expressed in *Mark* x. 48, "charged him that he should hold his peace."

Bacon uses the word in the same sense:—It is the care of some to contrive some false periods of business, because they may seem free of dispatch."

BESTEAD. "And they shall pass through, hardly bestead and hungry."—*Isa.* viii. 21. A word now obsolete. It means situated, from the Anglo-Saxon "stede," a place (as in *stead*, that is, in *place*; *homestead*, home *lace*). Hardly bestead, in the above passage, means, therefore, roughly situated, placed in difficulty.

"He who to outward sight is so ill bestead, hath latent in him much of admirable beauty and glory."—*Burrow*.

BOWELS. (Phil. i. 8.) The *bowels* were supposed by the old anatomists to be the seat of the affections, and hence the word came to signify *compassion*, *sympathy*.

London Yearly Meeting, 1815. Some tender notions were given, with respect to those benevolent associations, in which members of our Society are now so conspicuous. There was a fear in some minds, even while they rejoiced in the spreading of knowledge, the distribution of the Scriptures and the instruction of the poor, lest a danger might secretly lurk in the pleasure received from eloquent speeches and flowing language, at the public

meetings of these associations; especially lest our dear friends should thereby lose their relish for simplicity, and be gradually drawn from the love of silent waiting in our meetings for worship; that waiting, wherein they may know Jesus to be in the midst, teaching as man never taught; and by whom we have access to the Father. There was much worthy of observation in these remarks.—*Mary Copper*.

Literature in Iceland.

Dr. Kneeland found that many Icelandic words bear a strong resemblance to English. The following are a few selected from a long list of such words given by Mackenzie: *eyru*, one; *treir*, two; *thryr*, three; *fiourr*, four; *sear*, six; *aulta*, eight; *twolf*, twelve; *threttan*, thirteen; *fiorttan*, fourteen; *hundrad*, hundred; *thousand*, thousand. Common words in both languages are, *back*, *baue*, *bed*, *spade*; *burn*, *hill*; *blad*, *blade*; *blek*, *black*; *fader*, *father*; *faede*, *food*; *fi*, *money*; *finger*, *finger*; *fook*, *folks*; *hana*, *hen*; *hagl*, *hail*; *hvatir*, *laughter*; *hlaerp*, *leap*; *molli*, *mould*; *of*, *of*; *thif*, *thief*; *toft*, *turf*; and *twinn*, *twine*. These examples, he says, could be multiplied indefinitely, but there are enough to show how intimately connected are the Norse and English languages.

The present mental cultivation of the people is very high. Education is carried on at home by parents during the long winter evenings, under the supervision of the clergymen. The common people are well acquainted with their own and other national histories, ancient and modern; they know all about the early discovery of America by the Northmen, five centuries before Columbus, while very few of the people of the United States, until quite recently, had any knowledge of the matter.

To show the extent of the education of the people, and the unassuming character of Icelandic scholars, Dr. Kneeland says: "I will mention two incidents that occurred during our trip, one of which is alluded to in Bayard Taylor's recently published description of it."

"One of our guides, Geir by name, a poor, fatherless boy of seventeen, we knew spoke English very well, and when at a loss for a word or its meaning, would inquire what it was in Latin. He then surprised Mr. Taylor by the question, 'What do you think of Byron as a poet? Is not the song of the spirits, in 'Manfred,' considered very fine?' This lad spoke German about as fluently as he did English; he had read the ballads of Schiller, and his 'Robbers,' and wanted to know if Fanst, which he had heard was difficult to understand, was any thing like in style to Shakespeare, whose 'King Lear' he had read. What had of seventeen among us, with all our boasted advantages could stand by the side of this boy, who had never been out of Iceland?"

"A party of Englishmen who followed us had engaged with some difficulty guides to the Geysers, one of them a modest, sedate, worthy man, whose movements were not so rapid a character, nor his attentions so constant as they thought they ought to be; they scolded at him, which made him more reserved and inattentive, and finally they became so angry that they swore at him. He understood English perfectly well, and the moment he heard the oaths, he was so indignant that he turned round and left them to find their way with their other guide. On asking him why the man behaved so strange-

ly, he said that he was not in the habit of being spoken to in such an uncivil manner. He was one of the first historians of Iceland, and had offered his services to the strangers as a friend and not as a servant.

"The study of the classics is very general, and the traveller is, as we were, often surprised to find persons in humble life able to converse in Latin. As a type of an Icelandic scholar may be mentioned John Thorlakson, who, beside being the author of many original poems, translated Milton's 'Paradise Lost' into Eddic verse; he was poor and obliged to labor for a living; though a clergyman for two parishes, his whole income therefrom was only forty dollars a year, from which he had to pay an assistant. In his small dark room, with little hope that it would ever be published, this poor scholar executed his work, which for purity and beauty of language, and grandeur of imagery (for it is rather a paraphrase than a translation) would put to shame many publications done up in morocco, gilt, and tinted paper. He also translated Pope's 'Essay on Man,' and Klopstock's 'Messiah.' He died in 1819.

It has been stated that owing to the scattered population, public schools are out of the question in Iceland, the ordinary education of the people being secured by teaching at home during the long winters, seconded by the taste for reading which is universal. There is, however, a school at Reykjavik for the advanced education of a selected number of native youth; there is accommodation for about sixty, and the pupils are carried as far as in our high schools; the class rooms are well equipped, and special attention is paid to the modern languages, Latin, and mathematics. Being a government institution, no fees are charged, and only promising students are permitted to enjoy its advantages; those wishing to prepare themselves for the learned professions of the law, medicine and theology, pass on to enter the university of Copenhagen.

There are in the capital several modern printing presses, which do excellent work, both in the way of books and newspapers; of course in a country which is almost impassable for half the year, news cannot travel very fast, and the newspaper is not the record of the present, every-day world that it is with us; hence accurate information in regard to the recent terrible devastation by the volcanic eruption in the Vatna Jokal region was very slow in coming even to the capital, and still slower in getting across the ice-bound ocean to Europe. Several months of great suffering were passed before any helping hand could be extended from abroad for the unfortunate.

One of their most interesting features for popular education is the library in the upper story of the church at Reykjavik. It contains a few thousand volumes, most of them presents, in all languages, especially Danish, Icelandic and English. There are no old manuscripts of any great value, and few costly books, the library being for popular use, in payment of less than a dollar a year; the books are widely circulated, and the privilege is much prized by the people. There are many standard English and American works, especially in history, poetry, and fiction, with several publications of the American government. Complaints were loud at the capital that large numbers of books, sent by governments, business houses, and private individuals, are stopped in Copenhagen, and never

reach their destination in Iceland. There were very large contributions sent at the time of the millennial celebration, through the agency of the Smithsonian Institution, it was said; such as went by way of England most likely arrived; such as passed into Denmark probably were somewhat curtailed.

The Tobacco Waste.—William P. Vail, M. D., of Newark, in a recent deep and thoughtful article on the subject of tobacco, points out its intimate connection with the drink scourge, its injury to health, the filthiness of the tobacco habit, and its wastefulness. Referring to the enormous tobacco waste, he writes:—

"Many have not looked at this thing at all. Consider a few facts. The *North American Review* for 1862, p. 400, says: 'In 1851, the city of New York spent \$3,654,000 for cigars, and only \$3,102,500 for bread. Excess for cigars, over half a million dollars.' 'It is perfectly safe to say,' said the *New York Times*, 'that there is more spent in New York for cigars than for bread. The clever author of 'John Halifax,' in a capital book, 'A Woman's Thoughts about Women,' at page 215, tells of young men habitually spending thirty guineas (\$150) in cigars, who yet could not afford to get married. No wonder. There are clerks for cigars three dollars a day, some of whom have sisters who can hardly afford themselves the bare necessities of life. * * *

The national cost of tobacco must be something fearful. That it amounts to as much as the cost of alcohol is highly probable, for all who use the poison drink, with few exceptions, use the poison weed, and many who use the weed do not use the drink. Now, the cost of alcohol, as careful statistics prove, is six hundred million dollars—enough to wipe out our national debt, over which we groan, in less than four years. Add another \$600,000,000 of waste for tobacco, and what a frightful sum! How long can the nation struggle under such a burden? Need we wonder that times are hard? Since nations are but the sum total of the individuals who compose them, it follows that what impoverishes individuals impoverishes nations. Think of the dead loss to the nation of twelve hundred million dollars a year! Yes, a dead loss, and worse. Were the liquor and the tobacco, costing the nation so many millions—enough together to pay off our national debt in less than two years—flung into the ocean, it would be all the better for the men, and all the worse for the fishes. What a pity the people do not study political economy a little!"—*Selected.*

Humming-Bird's Nest.—Burrongs, in his charming little book, *Wife Robin*, says it is an event in one's life to find a humming-bird's nest. The event happened to me without any effort on my part. Looking up from a seat in the grove, I saw the ruby-throat drop down on its nest, like a shining emerald from the clouds; it did not pause upon the edge of the nest, but dropped immediately upon it. The nest was situated upon an oak twig, and was about the size of a black walnut, and from where I sat it looked more like an excrescence than a nest. It was situated in the fork of two twigs; it was firmly glued at the base to the lower, but was not fastened to the upper twig.

I waited for the tiny occupant to leave the nest, and then with the aid of a step-ladder

had no difficulty in looking into it. I found it contained two white eggs, about as large as medium-sized peas. Sometimes the male would drop upon the nest when the female left. I never disturbed them while they were sitting upon it; but often before I could get away, when I thought them out of sight, the male would suddenly appear, and greater demonstrations of anger I never saw manifested by any bird. He would ruffle up his tiny feathers, and seem nearly twice as large, and dash almost into my face, making a squeaking noise, scolding and threatening, until he had driven me quite a distance. He soon learned that I was very much afraid of him, so he turned tyrant, and often drove me from my seat in the grove when I had not been near his dwelling. I always submitted to the tiny tyrant, for what business had I to be prying into his domestic affairs? When the young were hatched they were not larger than humble bees, but in a week they had flown. I cut the twig off, and found the nest was composed of the same soft downy substance which I had noticed in the wood pewee's nest, but it was matted so closely together that it was almost as firm as the softer kinds of felt; it was a marvel of skill and beauty, and was completely covered externally with lichens.—*Mary Treat, in Harper's Magazine.*

HAVE FAITH AND TRUST.

Have faith and trust, ye waverers,

God's ways we may not see,

What may seem chaos in our view,

To Him is harmony;

And when deep anguish fills our hearts,

And tears fall from our eyes,

The ill that causes them may be

A blessing in disguise.

The noxious, poisonous weed which grows

Without a single charm,

May hold in its obnoxious stem

A medicinal herb;

And tempests that overwhelm us,

And fill us with dismay,

May render pure the fetid air

And drive disease away.

Then faint not when reverses come,

Have faith, and hope, and trust,

That all is ordered for the best—

That God is kind and just;

Dwell not on evils that may come,

Nor mourn o'er evils past,

But raise the precious hope that God

Will comfort send at last.

For "The Friend"

Sermons from the Life of Thomas Storr.

(Continued from page 314.)

The fool's pretended pity and instructions, who could not see and pity his own miserable case, or knew what himself said, was hardest to bear; yet all these things did not provoke or move me; for the grace and presence of the Lord was with me, and were my strength and preservation. My heart was surrounded with a rampart of invincible patience, and my soul filled with divine love. This usage gave me a much clearer view of the low, mean, miserable, brutish state of many men, and o, the greatest part of that mob, than ever I had before, or ever could have imagined. But I was more evilly used by some counsellors who came the circuit from London, among whom I had some business; especially — Dormer, who was afterwards a judge; they were kind, familiar, and without scold or taunting grin.

The business of the assizes being over, some

of my acquaintance, gentlemen both of town and country, who wished me well in my own sense, thinking I had been deluded, they usually called it, by the Quakers, consulted how to restore and reclaim me. Several were proposed, especially by a meeting and consultation of some of the clergy; who they imagined, might solve those doubts might be under, and but yet wavering, supposing those sentiments to be but lately embraced by me, and I not yet settled in them, though I did not think any of them knew what the true Quakers or their principles were.

The clergy generally shunned me, and quickly observed a particular enmity in the against me; though I had no more aversion to them as men than to others. But some of these others, my wellwishers abovesaid, supposing me melancholy, because reduced from my former airs and cheerfulness to silence and gravity, got together in a tavern, among my father with them, intending to have me among them, to drink a hearty glass; and try in their way whether they could raise my spirits into a more sociable temper and bring me off from such thoughts.

While they were contriving this scheme I was retired alone into my chamber, and favored with a sense of the good and some nourishing presence of the Lord; but after some time, a concern came upon me, which gave me to expect something was in agitation concerning me, and soon after an attorney-at-law, of my acquaintance, came from the company to me, and mentioned certain gentlemen who desired to see me at the tavern. I was not hasty to go, looking for the countenance of the Lord therein, neither did I refuse; but my father and some others being impatient to have me among them, came likewise to me. I arose from my seat when they came in, but did not move my hat to them as they did to me; upon which my father fell a weeping, and said I did not use to behave so to him. I treated him not to resent it as a fault, though I now thought fit to decline that ceremony, it was not in disobedience nor disrespect to him or them, for I honored him as much as ever, and desired he would please to think so, notwithstanding the exterior alteration. Most of the rest kept up another attack, hoping to bring me into the same at the tavern; but I through grace, saw their intents, and was aware; and I had not freedom in my mind to go among them. When we came there, the company all arose from their seats, and seeming generally glad, put on airs of pleasantness. In seating themselves again, they placed me in the midst of them, and then they put the glass round; and to relish it the more, they began a health to king William. But the secret presence of the Lord being with me, though hid from them, it affected them all in a way they did not expect; for scarcely had two of them drank, till their countenances changed, and all were silenced.

The glass, nevertheless, went forward till it came to me, and then I told them I wished both to them and the king well, and if I could drink to the health of any, I should more especially to the king's, but should drink no health any more, and so refused it. The glasses never went round; for several of them fell to weeping, and were much broken, and all of them were silenced for a time. When this was over, some of them said they believed I intended well in what I did, that they every

must be left to proceed in the way which thinks right in the sight of God; and so parted in solid friendship. It was the great grace of God which wrought this, and him, the Lord alone, did I impute it. The company dispersing, I returned to my chamber in divine peace and true tranquillity of mind; with which I was favored for many years.

I had not, all this while, conversed with my Friend about his principles, or read any of their books; nor did any of them come near for some time; for my father would not allow them to come to his house; yet some of them no longer sent me three small books which I took kindly, as well intended. But was favored of the Lord with something to give me understanding and support in time need, more excellent than books; for that book, which had been sealed as with seven seals, was now, in measure, opened by the powerful voice of the Lion of the royal tribe, a holy Lamb of God; even the book of the eternal law of God; the law of the Spirit of promise from the Father, by Christ the Son, the Redeemer of the world, and my delight was read day and night therein. By this I progressed more, in a short time, in the knowledge of God and the things of his holy kingdom, than if I could have read and understood all the written and printed books in the world. Therefore declined reading these till a more proper season; and then I looked into one of aforesaid books, a small tract concerning prayer; for it must be allowed, that the reading of good books, especially the Holy Scriptures, the chief of all, and upon which the truth the rest depends, is highly profitable and commendable.

(To be continued.)

For "The Friend."

Report of the Committee who have charge of the Boarding School at Westtown.

To the Yearly Meeting:—The Committee having charge of Westtown Boarding School report: That the summer session of 1876 opened at the usual time, with an attendance of 145 pupils, viz: 86 boys and 59 girls. The winter session opened with an attendance of 225 pupils, viz: 140 boys and 85 girls; making an average number for the two sessions, exclusive of day scholars, 185, which is 112 less than for the preceding year. During the summer term the health of the family was generally good, a few cases of measles forming the chief exception. During the winter, there is more than the usual amount of sickness, both the mumps and the scarlet fever having had their appearance early in the term; and former continuing to more or less extent during most of the session. The scarlet fever appeared about the middle of the term. It is cause for gratitude that this disease does not assume a malignant character in any case, and that, under the blessing of Divine Providence, and the care of attentive physicians and nurses, all the patients recovered with but little trace of the weaknesses which often follow that serious disease. Throughout the trying dispensation much sympathy was shown for the Superintendent and Matron and those immediately in charge, whose anxieties and labors have been much increased thereby. The regular routine of daily studies was somewhat interrupted by the prevailing sickness; but the order and discipline of the school have been generally well maintained;

and although the boys' school was very large during the winter, and their accommodations somewhat crowded, their deportment throughout the session, was, with but few exceptions, very commendable.

Meetings for worship on First and Fifth days, and Scripture recital on twice a week, have been continued as heretofore. There have been noticed among the pupils evidences of thoughtfulness and religious feeling, which have been encouraging, and we believe that real desires to promote this, a facility may be afforded, have been felt by those whose concern for the pupils extends beyond their mere intellectual training.

Visits to the School by sub-committees continue to be made at stated periods, and the several reports of these Committees indicate generally a commendable degree of thoroughness in the instruction given by the teachers, as well as careful application on the part of many of the pupils.

In consequence of the disadvantages arising from a want of a more complete system of classification, it was concluded last fall, after mature deliberation, to divide the schools into regular classes, in such manner, that all the pupils of each class, shall, so far as may be convenient, pursue the same studies and recite together in each study. For this purpose all the scholars, excepting those in the Introductory school, have been divided into eight classes in the Boys' Department, and into seven in the Girls'. The pupils will advance regularly with their classes from term to term, provided they manifest sufficient proficiency; and new scholars will be examined on entering, and will be assigned to such classes as they appear to be prepared for. Those who enter the lowest class of the First Department of either the Boys' or the Girls' school can complete the Course in three years as heretofore, and if they pass the several examinations creditably will be entitled to a Certificate.

This system will greatly facilitate the classifying of the School at the opening of each session, and, although it will be attended with disadvantages in some cases, more especially for the first few sessions, it is believed that the advantages will greatly preponderate. It is not intended to adhere rigidly to the system, but to allow a slight variation in those instances where such variation will be likely to be of benefit to the pupil, without producing a disadvantage to the school. The new classification was introduced at the opening of the winter term, and although it has not yet been fully carried out in some particulars, the trial thus far given it has been, in the main, satisfactory.

The fund for strictly educational purposes, given to the Institution a few years ago, has enabled the Committee to purchase during the past year some additional philosophical and chemical apparatus, and a number of valuable books of reference, charts, &c. There has also been purchased with the income of this fund, a collection of insects, arranged in cases, and consisting of several hundred specimens. The former meeting room having been divided into three apartments, the one on the north is now used for storing the philosophical apparatus, and exhibiting the objects illustrating Natural History, &c. This room has been neatly fitted up, and a new arrangement of its contents has been made, chiefly under the direction of one of the teachers. The

objects are now displayed in cases which are generally well lighted and easily accessible.

The several alterations in the building, mentioned in last year's Report, viz: the removal of the meeting room to the central part of the building, the changes consequent thereon, and the opening of a study room for the Girls, have proved satisfactory.

The subject of providing additional dwelling houses for our married teachers having been brought under consideration, it was concluded to erect two adjoining buildings for this purpose, on the north side of the lane, nearly opposite to those already there. These houses are now completed and ready for occupancy. They have cost about \$6,600. It is believed that the additional accommodations for teachers' families provided within the last few years, is likely to be a means of retaining the services of experienced teachers for a longer period in the Institution than might otherwise have been the case, and that the efficiency of the Boys' Department has already been thus promoted.

The expenditures for conducting the Institution during the year ending on the 5th instant, were as follows:

For Provisions,	\$13,856.82
“ Fuel, Gas and Laundry expenses,	5,517.41
“ Furniture and Miscellaneous Family expenses,	2,491.02
“ Salaries and Wages (exclusive of wages charged to the Laundry and Gas-accounts,)	16,279.64
“ Incidental expenses,	396.37
“ Repairs and Improvements, (exclusive of the payments on account of the cost of the two new dwellings for Teachers,)	3,406.93

Making together, \$41,948.19

The average cost of each pupil for the year, obtained from the above data, is \$226.75, which is \$8.89 more than that reported last year.

The charges for Board and Tuition, were	\$27,111.30
Profits on Books, Stationery and other merchandise,	429.43
Estimated Profits of the Farm,	3,148.82
Rent of Tenements,	147.00
Net Income from Grist and Saw Mills,	430.42
Income of the Fund for general purposes,	5,379.65
Income of the Fund (commenced in 1834) for increasing the Salaries of Teachers,	895.06
Yearly Meeting Appropriation,	3,000.00

Making the sum of \$40,551.68

And showing a balance against the Institution for the year of \$1,396.51.

Besides the above expenditures \$2,950 has been paid to our teachers during the past year out of the income of the two funds recently created for increasing the compensation of Teachers and for other strictly educational purposes. This sum, added to the total expenditures above stated, makes the average cost of each pupil for the year \$212.69.

The deficiency above shown of about \$1,400, for the year, and the payments so far made on account of the cost of the Teachers' dwellings, together with the increasing amount of unpaid accounts due the Committee for Board and Tuition and Incidentals, have made it

necessary to dispose of upwards of \$7,000 of the investments of the fund for general purposes during the year; and it will probably be requisite to reduce the amount of these invested funds during the present fiscal year also, unless some donations or bequests should be received to obviate this necessity. In the 6th month last, a number of accounts, amounting to \$335.38, were charged off to profit and loss as being uncollectible; and there are still a number of unpaid balances on our books, some of which, it is apprehended, will eventually be lost to the Institution. The cost of fencing and grading the public road, opened last summer from the Street Road to the New West Chester Road, amounting to \$461, has also been charged to profit and loss.

Of the \$3,496.33 charged to repairs and improvements in the foregoing statement, about \$1,200 was for the changes in the Meeting and Lecture Rooms, mentioned in our last report, and for relaying the slate roof on a large portion of the main building.

Keeping in mind the object for which this Seminary was established, to wit, "the religious guarded education of our youth," and solicitous that this object may be promoted by every right means, the Committee desires of parents and guardians and of all connected with the Institution, their hearty co-operation in the maintenance of all the rules established for its government; that, through a right discipline rightly administered, and seconded by the parents at home, there may be realized an harmonious labor for the best interests of the beloved youth. Without this harmony, children are often confused and made restive under restraint, and a discipline framed in love for their help and preservation. Our young friends and others who may visit the Institution are kindly asked for their co-operation. We would tenderly remind them of the power of their example, and ask that they may remember and respect the well known concern of their elders for the true welfare of this Institution.

In order to promote the quiet appropriate to the due observance of the first day of the week, by both the family at the School and that at the farm house, visits to the Institution on that day have long been discouraged; but as the printed regulations respecting such visits have been apparently lost sight of by some of latter time, the subject is now mentioned in order that increased care may be taken by parents and others in this particular.

Signed on behalf and by direction of the Committee.

SAMUEL MORRIS, Clerk.

Philadelphia, Fourth mo, 14th, 1877.

Faith in the Family.—One of the most intelligent women I had ever known, the Christian mother of a large family of children, used to say that the education of children, was eminently a work of faith. She never heard the tramping of her boys' feet in the house, or listened to their noisy shouting in their play, or watched their unconscious slumbers, without an inward, earnest prayer to God for wisdom to train them, and for the Spirit of the Highest to guide them. She mingled prayer with counsel and restraint; and the counsel was the wiser, and the restraint was the stronger for this alliance of the human and divine elements in her instruction and discipline. And at length, when her children had become men and women, accustomed to

the hard strife of the world, her name was the dearest one they could speak.

For "The Friend."

Thomas Edward—A Scotch Naturalist.

(Continued from page 318.)

Thomas was sent to school when between four and five years old, but there his invincible fondness for natural history continually brought him into difficulty. Sometimes he would be tempted to stay away from school in pursuit of his favorite studies among animated objects; and sometimes he disturbed the order of the room, by bringing with him young birds, leeches and other prizes which he had caught on his way from home. Finally, he entirely gave up the habit of carrying his "beasts" with him to school; yet, his well-known fondness for living things caused his expulsion from school, when about six years of age, under circumstances of aggravated injustice and hardship, which are thus related.

"One morning, when the boys were at their lessons and the master was at his desk, a sudden commotion occurred. The master gave a loud scream, and, jumping to his feet, he shook something from his arm, and suddenly put his foot upon it. Then, turning in Edward's direction, he exclaimed, 'This is some more of your work, Master Edward.' Not hearing what he said, Edward made no reply. Another boy was called forward, and both stooping down, they took up something and laid it on a sheet of paper. On rising, the boy was asked what it was. 'It's a Maggy Monny Feet,' he said. 'Is its bite dangerous? Is it poisonous?' The boy could not tell.

"Edward was then called to the floor. 'You've been at your old trade, Edward, I see; but I'll now take it out of you. I have warned you not to bring any of your infernal beasts here, and now I have just found one creeping up my arm and biting me. Hold up!' Edward here ventured to say that he had not brought the beast, that he had not brought anything for a long while past. 'What! a lie too?' said the master: 'A lie added to the crime makes it doubly criminal. Hold up, sir!' Tom held up his hand, and the master came down upon it very heavily with the taws, [a leather strap]. 'The other!' The other hand was then held up, and when Tom had got his two hot hands, the master exclaimed, 'That's for the lie, and this for the offense!' and then he proceeded to bring the taws heavily down upon his back. The boy, however, did not cry.

"Now, sir," said the master, when almost out of breath, "will you say now that you did not bring it?" "I did not; indeed, sir, I did not." "Well, then, take that," giving him a number of tremendous lashes along his back. "Well, now?" "I did not!" The master went on again: "It's your own fault," he said, "for not confessing your crime." "But I did not bring it," replied Edward. "I'll flog you until you confess." And then he repeated his lashes, upon his hands, his shoulders, and his back. Edward was a mere mite of a boy, so that the taws reached down to his legs, and smote him there. "Well, now," said the master, after he was reduced to his last effort, "did you bring it?" "No, sir, I did not."

"After resting for a while in his chair, Edward standing before him, he called to the boy whom he had first brought to his assistance, 'William, bring forward that thing'

The boy brought forward the paper, on which lay a bruised centipede. 'Now, then,' said the master, 'did you not bring that venomous beast here?' 'I did not, sir!' The whole school was now appealed to. 'Did any of you see Edward with any thing last week to-day or yesterday?' No answer. 'Did any of you see Edward with any thing last week or the week before?' Still no answer. Then, after a considerable pause, turning to Edward, he said, 'Get your slate. Go home, and your father to get you put on board a man-of-war, as that is the best school for all inclaimables such as you.' So saying, he pointed to the door. Tom got his slate and books, and hurried down stairs. And to Edward was expelled from his third and last school."

"When his parents examined his back, they found that his shirt was hard with clot blood, and still sticking to his skin. The wax adopted to soften the shirt and remove it from the skin. But while that was being done, the boy fell back and fainted away. When he came to, a large piece of linen covered with ointment was put upon his back. He never asked by his parents to return to school."

"He had now plenty of time for exercise into the country. He wandered up the hills and along the banks of the Don on both sides. He took long walks along shore—across the Aulden Links to the Auld Brig, and even to the mountains, which at Aberdeen approach pretty near to the coast.

"During one of his excursions on the hills of Torrie, near the commencement of the Grampians, while looking for blackberries and cranberries, Edward saw something like the flash of an eel gliding through among the heather. He rushed after it, and pounced down upon it with both hands, but the animal had escaped. He began to tear up the heather in order to get at it. His face streamed with perspiration. He rested for a time, and then began again. Still there was no animal, but a shadow of one.

"At this time another boy came up, and asked, 'What are ye doing there?' 'Naethin' [I've call that naethin? pointing to about ear-load of heather torn up. 'Have ye about any thing?' 'No.' 'What are ye looking for then?' 'For something like an eel.' 'An eel quoth the lad; 'do ye think ye'll find an eel among heather?' 'It's been an ailder, and it will ye have na' gotten it. The beast might have bitten ye to death.' 'No fear o' that said Edward.' 'How long is it sin' ye saw it?' 'Some minutes.' 'If that's the case, it may be some miles up the hills by this time. Whi way was it gann?' 'That way.' 'Well, so the lad, 'you see that heap o' stones up there try them, and if you do not find it there, ye may gang hame and come back again, a then ye'll just be as near finding it as ye are now.' 'Will ye help me?' asked Edward. 'Na, faith, I dinna want to be bitten to death.' And so saying, he went away.

"Edward then proceeded to the pile of stones which had been pointed out, to make a search for the animal. He took stone after stone off the heap, and still there was no eel. There were plenty of worms and insects, but these he did not want. A little beyond the stones lay a large piece of turf. He turned over, and there the creature was! He went down upon it in an instant, and had it in his hand! He looked at the beast. It was n-

eel. It was very like an ask, but it was or seven times longer.

"Having tightened his grip of the beast, it was trying to wriggle out of his hand, set out for home. He struck the Dec a title below where the Chain Bridge now stands, reaching the ford opposite Dec village, prepared to cross it. But the water being then deep at the time, he had to strip and wade across, carrying his clothes in one hand and the eel in the other. He had only one reliable hand, so that getting off and on his clothes, and wading the river breast-high, occupied some time.

"On reaching the top of Carmelite Street, he served his mother, Mrs. Kelmar, and some other women, standing together at the street. He rushed in among them with great ease, and, holding up his hand, exclaimed, 'e, mother, sic a bonnie beastie I've got!' On looking at the object he held in his hand, the concave of women speedily uttered. They flew in all directions. Edward's mother screamed, 'The Lord pre-vent! what the sorrow's that ye hae noo?' 'Oh, Meggy, Meggy,' said Mrs. Kelmar, 'it's snake! Dinna let him in! For any sakena let him in, or we'll a' be bitten!' The very door was then shut and bolted, and Tom's left out with the beast in his hand.

"Mrs. Kelmar's husband then made his appearance. 'What's this, Tam, that has caused such a flutter among the wives?' 'Only a bit beastie,' Kelmar started back. 'What's it not bitten you?' 'No!' 'Well,' he cried, 'the best thing you can do with it is take it to Dr. Ferguson as fast as you can, you can't be allowed to bring it in here.'

"Dr. Ferguson kept a druggist's shop at corner of Correction Wynd, near the head the Green. He had a number of creatures suspended in glass jars in his window. Boys looked in at these wonderful things. They were the admiration of the neighbors. Some of these extraordinary things had come in people's 'insides.' Tom had often been before with big bugs, piebald snails, dragon flies, and yellow padocks. So he went to Dr. Ferguson with his last new prize. He was by this time surrounded by a number of boys like himself. They kept, however, at a respectable distance. When he roved in their direction they made a general impede. At length he arrived at the doctor's door. When the doctor saw the wriggling thing that he was holding in his hand, ordered him out of the shop, and told him to wait in the middle of the street until he got a bottle ready for the reception of the animal. Tom waited until the bottle was ready, when he was told that when he had the snake in he must cork the bottle as early as possible. The adder was safely got and handed to the doctor, who gave Tom a penny for the treasure. Next day it appeared in the window, to the general admiration of the inhabitants."

"As Thomas was anxious to go to work, instead of school, where his experience had him so unpromising, his parents allowed him to go to a tobacco works, and afterwards to a grocery in the neighborhood. Of this, he says:

"It was a happy time for me while I remained there. It was situated in the centre of a beautiful valley, almost embowered among trees, and luxuriant hedges of hawthorn, with water-courses and shadowy trees between,

and large woods and plantations beyond. It teemed with nature and natural objects. The woods were easy of access during our meal hours. What lots of nests! What insects wild flowers, and plants, the like of which I had never seen before! Prominent among the birds was the sedge warbler, which lay concealed in the reedy copses, or by the margin of the mill-lades. Oh! how I wondered at the little thing! how it contrived to imitate almost all the other birds I had ever heard! and none to greater perfection than the chirrup of my old and special favorite, the sparrow."

"One day he saw a kingfisher—a great event in his life! What a beautiful bird! What a sparkling gem of nature! Resplendent in plumage and gorgeous in color—from the bright turquoise blue to the deepest green, and the darker shades of copper and gold. Edward was on a nesting excursion, with some little fellows like himself, along the braes of the Don, and at some distance above the Auld Brig, when he first saw this lustrous bird. 'I was greatly taken,' he says, 'with its extraordinary beauty, and much excited by seeing it dive into the stream. I thought it would drown itself, and that its feathers would eventually become so clogged with water that it would not be able to fly. Had this happened—which of course it did not—my intention was to have plunged in to the rescue, when, as a matter of course, I would have claimed the prize as my reward. Thus buoyed up, I wandered up and down the river after the bird until the shades of even came down and forced me to give up the pursuit.'"

(To be continued.)

The Society of Friends.

TO THE EDITOR OF THE DAILY NEWS.

Sir,—The two communications on "Quakerism" in your columns have interested many of the Friends. Will you permit me, as a member of their Society, to observe that both your correspondents are partly right and partly wrong in their statements? The "Old Member" may well remark that the assertion of your first correspondent, that the faith of the Society of Friends is "substantially unaltered," is too positive and unqualified. It is matter of notoriety that "Bar-lay's Apology," the once time-honoured exposition of the Society's doctrines, has long since been virtually and officially set aside by the refusal of the standing executive committee of the Society to reprint or re-issue it. Nor can any candid person deny the truth of the "Old Member's" assertion, that various modern ministers of the Society (approved by the "yearly meeting" during their lives and subsequently) have enunciated important doctrines not in accord with those of Barclay and other Early Friends. The same charge holds good as to practices. The Friends as a body (though not yet in a formally official capacity) support an active missionary organization with permanently established and paid ministers. As a body, again, they have abandoned the old "testimony" of their fathers against music. Pianos and songs are now to be heard in the homes of the Friends generally—of ministers, elders, and the flocks under them. The church "discipline" also is almost wholly lapsed. Formerly Friends were promptly "disowned" (excommunicated) for practices now of frequent indulgence. The dance, the theatre, the hunting party may be (and are) now attended by

some Friends without any inquiry or official comment. The "Old Member" is so far unimpeachable in his statement. But he, in his turn, has given a one-sided impression by his quotations, which tend to convey the impression that the Early Friends were a people "not to be charged with covetousness or love of the world," as good Isaac Pennington remarked. But Pennington's charity was so broad as even to cover manifest truth. Any one who will read the history of Pennsylvania carefully, will find that William Penn's life was grievously embittered, to the very last, by the selfish, grasping, and ungrateful conduct of the early Friends there, who, as a body, well deserved the satires levelled at their successors by Dr. Franklin and Sydney Smith. And one of the leading Friends in London swindled poor Penn out of thousands. Again, all through the last century whilst the Acta Sanctorum of the Friends ("Piety Promoted") shows the existence of a line of the saintliest men and women in the Society, the records of "disownments," many of them for scandalous immorality, also show that broad brims and drag breeches could cover a multitude of very gross sins.

The long and the short of the matter is that Friends, in every part of their history, have, like all other churches, had their wheat and tares growing together. But there has always been a good proportion of excellent "wheat," and there is just as much of this nowadays as in the time of Fox and Penn, probably more rather than less. For whilst the faith and practice of the Society have unquestionably altered in recent years, yet what may be termed the solid essence of Quakerism remains substantially preserved, as your first correspondent intimated. What is that essence? It is the great principle that God, as the universal Father, regards and visits all His human children individually, as well as collectively. It is that He holds each man responsible for himself and for what he does, or does not, do, to facilitate the development of God's spirit in each other man. Hence the somewhat special philanthropy of the Friends. They have felt that not so much for the sake of men, as of God in men, they were bound to do good to God's human dwelling places, and to guard them as such, as much as practicable, from injury, from war, from slavery, from intemperance, from oppression. "God in every man." That is the brief, essential, energising Quaker creed. Hence also the Friends generally have taken comparatively liberal and hopeful views of mankind, and trusted that millions of persons who never heard the history of the Cross may ultimately partake of the benefits of its mystery and power, through God their Father's mercy. The modern Friends attach more importance than at least the generality of their predecessors to what are sometimes spoken of as "the evangelical doctrines of the Cross." And they show an appreciable tendency also to place more reliance on the definite instructions of the Written Word, whilst still reverencing the inward impulses of the Spirit. And there are not wanting Friends who think that their predecessors did not improve upon surrounding churches, in absolutely and entirely rejecting the historic and visible monuments of the Incarnation contained in Christian baptism and the Eucharist. But, as a whole, and amid all changes, the Friends still cherish their grand old principle—"God in every man, as

the God and Father of that particular man, as well as of all other men in general."

Yours truly,
WILLIAM TALLACK,
London.

1812. The covering of inexpressible calm, which spread over many minds, after having borne their allotted portion of hidden exercise or active service for the promotion of righteousness among us, very far exceeded the eloquence of language to set forth, or the comprehension of the restless, unstayed mind. A stayedness of mind upon the object of worship is the solace of the soul.—*M. Capper.*

The Three Pillows.—"How are you to-day?" said a friend to a dying saint some years since. The dying man replied, "My head is resting very sweetly on three pillows—infinite power infinite love, and infinite wisdom."

THE FRIEND.

FIFTH MONTH 25, 1877.

We have received an article taken from the London "Daily News," sent for publication, we suppose, by the author, and which our readers will find in the present number.

We give it place in our columns, not because it contains anything not known before, nor that we can unite with its doctrine or with all the statements it contains; but as confirmation of the changes made and going on in the Society in England—as well as in this country—often noted in our journal, by the testimony of one mingling among the members in England, taking part in their deliberations and conclusions, and frank enough to acknowledge what he knows of their departures from the faith of the founders of the Society.

We do not suppose that the dancing, music, theatre-going, &c., are legitimate fruits of the reformed and newly adopted opinions; but that discarding the testimonies of Truth restraining conduct and conversation in other particulars, and breaking down the hedge that has heretofore been around the members, have opened the way and invited to disregard the emphatic disapproval of those corrupting indulgences which Friends have ever evoked, and this deplorable result will continue to be more and more general and difficult to arrest. Dr. Ash stated that the discipline was not enforced in cases of water-baptism and partaking of bread and wine as the Lord's supper, and that being the case, and the prevalence of music, &c., among ministers and elders, confirm the credibility of the assertion of Wm. Tallack, that the "church discipline is almost wholly lapsed."

We apprehend the charges made against the Early Friends, and the endorsement of Franklin's invectives against their successors in Pennsylvania, need little comment. Their history as a body of religious professors is too well known to admit of their high religious and moral standing being hurt by sarcasm. The statement that "God in every man" is the brief, essential "Quaker creed," betrays an ignorance or carelessness of definition not creditable in one attempting to enlighten the public on the essential character of the religion professed by the Society of which he is a member. Of the incarnate Word, that "only thing" born of the Virgin Mary alone, can it be properly said that God was in man, while

man receives only "a measure or manifestation" of the Holy Spirit. Wm. Penn speaking in this point says:

"They [Friends] never said that every divine illumination or manifestation of Christ in the hearts of men was whole God, Christ, or the Spirit, which might render them guilty of that gross and blasphemous absurdity, some would fasten upon them: but that God, who is light, or the Word, Christ, who is light, styled the second Adam, the Lord from Heaven, and the quickening Spirit, who is God over all, blessed forever, hath enlightened mankind with a measure of saving light; who said, I am the light of the world, and they that follow me shall not abide in darkness, but have the light of life. So that the illumination is from God, or Christ, the Divine Word; but not therefore that whole God or Christ is in every man, any more than the whole sun or air is in every house or chamber. There are no such harsh and unscriptural words in their writings. It is only a frightful perversion of some of their enemies, to bring an odium upon their holy faith. Yet in a sense the Scriptures say it; and that is their sense, in which only they say the same thing. I will walk in them and dwell in them. He that dwelleth with you shall be in you. I will not leave you comfortless, I will come to you. I in them and thou in me. Christ in us the hope of Glory. Unless Christ be in you, ye are reprobates." Works, vol. ii. p. 750.

SUMMARY OF EVENTS.

UNITED STATES.—The indications are that the Internal Revenue receipts for the present fiscal year ending 6th mo. 30th inst, will be fully equal to, if not exceeding the official estimate of \$120,000,000.

The steamer *Edgie*, which sailed from San Francisco on the 16th inst., for Hong Kong and Yokohama, took out \$1,950,000 in treasure, much of it on European account.

Forest fires along the upper Hudson, the vicinity of Lake Champlain, and various other places, have caused great destruction. Many mills and entire villages as well as great quantities of valuable timber, have been destroyed. In the Clinton county alone, the loss is estimated at \$750,000. Fires are also raging in the west on the side of the White Mts., in Coos Co. and Carrol Co. Destructive forest fires are burning at various places in the north and northwest.

A fire at St. Stephens, New Brunswick, on the night of the 14th inst., destroyed about half the business portion of the town, rendering many families homeless. Total estimated loss \$500,000.

The Mormons throughout Utah are reported to be arming and drilling to the alarm of the non-mormon settlers, especially in the northern and southern settlements. Governor Emory requests the Secretary of War that ten companies of United States infantry and two of cavalry, may be distributed at various posts in the territory.

The northern Cheyennes, 1400 in number, desire to go to the southern agency of Fort Reno, in the Indian Territory; the Commissioner of Indian Affairs will, it is understood, give the desired permission.

In accordance with the resolution of the reduction of the United States army, the discontinuance of the recruiting stations in New York, Boston, Chicago and Indianapolis, has been directed.

At a meeting of the officers of the great Pennsylvania coal companies, held in New York recently, a plan of cooperation was adopted: It being unanimously resolved to suspend work during next 6th or 7th mo.

A terrific hailstorm passed over Shaftsbury and the northern part of Bennington, Vt., on the 18th inst. It demolished windows and did great damage to vegetation. The hail-stones were of great size.

During 1876 there arrived in the United States 157, 140 immigrants; 31,222 came from Germany; 21,218 from England and Wales; 21,218 from the Canada; 16,579 from China; 14,506 from Ireland; 11,235 from Sweden and Norway; 6,577 from Russia; 6,225 from France; 6,642 from Austria; 4,883 from South and North Italy; 1624 from Denmark; 1572 from Switzer-

land, and the remainder from 46 other countries and provinces.

The United States Secretary of the Treasury says that he does not think it necessary to make a formal statement of what he intends to do under the Resolutions act. Whatever is done will be openly done, communicated first of all to the public. No step be taken until after the most careful consideration, with the sanction of the President.

The heat in Philadelphia and its vicinity has unprecedented for so early in the season; at 6 P. M. of the 20th inst., the mercury in the thermometer numbered 94°.

Number of interments in Philadelphia during week 352.

The Markets, &c.—The following were the quotations on the 21st inst. *Philadelphia*.—American gold, 10 United States 68; 11 1/2; 5.20; 3/4, 1865, 11 1/4. Pennsylvania family flour, \$9.25; do, do, \$9.50; do, do, \$9.75; higher grades, \$11.50. Rye flour, \$5.25. *Per*sylvania red wheat, \$1.90 a \$1.95; Penna. amber, \$2.06; white \$2.10 a \$2.15. Corn, 63 a 67 cts. O 50 a 55 cts.

FOREIGN.—A ministerial crisis has arisen in France in consequence of Minister Simon being more in sympathy with the Radical Republican party than satisfactory to President McMahon and the majority. Simon's colleagues, the ministry therefore all resign leaving President McMahon at liberty to form an entirely new ministry.

The American officers in the service of the Khedive of Egypt have refused to bear arms against Khativa; they will, however, be allowed to remain in Egypt. The Miridites, who have been engaged in a severe struggle with the Turks south of Montenegro, have a sanguinary battle, wherein an entire Turkish battalion was destroyed. It is expected that the Miridite will bring down a strong corps to co-operate with Montenegro.

The Turks have captured 200 Russian vessels on the Danube, containing over 130,000 hectolitres of wheat. The Turkish Sultan has determined on the admission of Christians into his army; a draft of 200,000 is to equally levied among Ottoman subjects, without distinction of religion.

About 10,000 men are already locked out from Clyde ship-yards, the number will probably be trebled in a few days by the discharge of the men who are completing contracts. The Clyde shipwrights have announced their willingness to submit their disputes regarding wages to arbitration.

FRIENDS' SELECT SCHOOLS.

A suitably qualified Friend is wanted as Principal of the Boys' Select School, at the opening of the term the Ninth month. Application may be made to Joseph S. Elkinton, 331 South Fifth St., Edward Maris, 127 South Fifth St., James Smedley, 415 M Market St., George J. Scattergood, 413 Spruce St.

FRIENDS' ASYLUM FOR THE INSANE.
Near Frankford, (Twenty-third Ward,) Philadelphia
Physician and Superintendent—JOSHUA H. WORREINGTON, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board Managers.

DIED, at the residence of his son, Wm. H. S. Wood New York, 4th mo. 9th, 1877, WILLIAM WOOD, in the 80th year of his age, an elder of New York Monthly Meeting. During a long life he exemplified his attachment to the Christian principles of the Society of Friends, by his consistent daily walk as well as by profession. He filled the position of Clerk of New York Yearly Meeting for many years. As an elder he was careful yet loving. He felt a deep interest in the welfare of the Freedmen and the Indians, and earned debt for the spiritual and educational advancement of the members of our religious Society. Though in late years he was not engaged in mercantile business, yet his knowledge of books, and the judicious distribution of them, led to extensive correspondence and occupation, and kept his mind bright and vigorous to the last. His death occurred after an illness of two hours. He was ready for the messenger, and committed himself to his Heavenly Father, he died as he lived, trusting in the Lord Jesus Christ alone for salvation.

The Black Mountains.

The summit of the Black Mountains is the highest point in the United States east of the Mississippi river, and the rugged range, clad in its garments of balsam and moss, glorious in its visions of apparently endless hills and peacefully shaped valleys, is the chief pride of the North Carolina mountaineer. Our party at Asheville late one bright morning, spending the Swannanoa to "Alexanders," a road halting point seven or eight miles from the mountain's foot, and then pushed on to Patton's, the collection of humble cabins nestled at the very base of the chain of peaks. As we approached Patton's, the long ridges of "Craggy" loomed up like ramparts to the westward, and the sun tinged the sky above in crimson and purple. The music from the ripples of the fork of the Swannanoa, which we were now ascending, drifted on the evening air; the kalmias, the azaleas, and the honeysuckles, sent forth their perfumes; the wood-choppers, their feet well protected against the rattlesnakes by stout boots, were rolling snapperward, and gave us hearty good evenings; the cow-bells tinkled musically, and in a corner of Patton's yard a mountain rill was clanging his hammer against his anvil, seemingly keeping time with the evening to which all nature was moved. The evening was still and warm, even in that elevated region.

It is twelve miles from Patton's to the summit of Mitchell's Peak, and the ascent, which is very arduous, is usually broken by a stop at the "Mountain House," four miles from the foot, and another at the point where the Government once maintained an observatory, on a rock 5678 feet high, and three miles from the topmost height (6470 feet), which rises suddenly from the range of rugged projections, covered with deadened tree trunks. At early dawn we were on our road to the Mountain House, at first through thickets, then along a creek bed, where the cautious mountain-horses walked with the greatest flexibility; now fording a creek twenty times in half an hour, now bending as we came to tree-trunks half fallen across the trail. After an hour and a half of this laborious climbing, during which we had ascended at least 1500 feet, and scrambling up the track a little water course, we came out upon the plateau on whose edge stands the Mountain House. The house is a small Swiss cottage,

once solidly built of stout beams, but now fast decaying. It stands but a few yards from the edge of the Balsam growth, where the vegetation changes and the atmosphere is rarer than below. It is 5460 feet above the sea level at the point in front of the Mountain House where one looks down into the valley, and sees the forest-clad ridges creeping below him for miles; notes the twin peaks of Craggy and their naked tops; then turns in wonder to the wood above him, and searches in vain for the peaks beyond. While at the windows of the Mountain House we seemed to be gazing from mid-air down upon the Blue Ridge. The illusion was perfect. Below us the mists were rising solemnly and slowly; peak after peak was unveiled; vast horizons dawned upon us; we seemed to have risen above the world. We turned from this view of the valleys, and entered the balsam thickets, pushing eagerly forward to Mount Mitchell, as the summit of the Black mountains is called.

And now we came into the region of the pink and scarlet rhododendrons. Wherever there was an opening in the trees the hill-side was aflame with them. Masses of their stout bushes hung along our path, and showered the fragile red blossoms upon us. The white mountain laurel, too, was abundant, but the scarlet banner usurped the greatest space. When we came to a narrow trail, where slippery rocks confronted us, and ragged balsam-trunks compelled us to clamber over dangerous crags, we found the way strewn with a crimson carpet after our horses had struggled through. Here, too, were masses of evergreen, and red pointed mosses, and the azaleas again along the border of the streamlets, and purple rosebay and the tall grasses in the clearing in whose midst nestled timidly tiny white blossoms and ground berries.

To climb Vesuvius is no more difficult than to scale the Black Mountain, for although one can reach the very top of the latter on horseback, he is in constant danger of breaking his limbs, and those of his horse, on the rough pathway. By the time we had reached Mount Mitchell and seated ourselves upon its rocks, our horses were as thoroughly enthusiastic as we were, and peered over the crags with genuine curiosity.

From Mount Mitchell we saw that we were upon a centre from whence radiated several mountain chains. To the south we could see even as far as the Cumberland line, and could readily discern our old friend the Smoky and the Bald mountain, while nearer in the same direction, we noted the Balsam range. Sweeping inward from the north-east coast were the long ridges of the Alleghenies; on the north the chain of the Black mountains culminated in a fantastic rock pile; while on the south the ridges of Craggy once more stood revealed.

To the east we could overlook the plains of North and South Carolina; on the north-east we saw Table Rock and the "Hawk Bill,"

twin mountains, piercing the clouds; while beyond them rose the abrupt Grandfather mountain, and the bluff of the Roan. On the south were the high peaks of the Alleghenies, the Pinnacles, Rocky Knob, Gray Beard, Bear Wallow, and Sugar Loaf.

Another hour and a half of climbing; then, dashing through a clearing, we suddenly saw above us a crag 200 feet high, with a stone-strewn path leading up it. Our horses sprang to their risky task; they rushed up the ascent—slipped, caught against the edges of the stones, snorted with fear, then laid back their ears and gave a final leap, and we were on Mitchell's high peak, utterly above Alleghenies, Blue Ridge or Mount Washington. In a few moments we were at Mitchell's grave.

Here we were above the rhododendrons, and only a gnarled and stunted growth sprang up. The trees were nearly all dead; those still alive seemed lonely and miserable. The rude grave of the explorer, with the four rough slabs placed around it, recalled the history of the man, and the origin of the peak's name.

The Rev. Dr. Elisha Mitchell, a native of Connecticut, graduate of Yale, and an eminent professor in the University of North Carolina, established the fact by measurements, made from 1835 to 1844, that this was the highest range east of the Rocky Mountains in the U. States. He grew very much to love the work of studying these heights, and spent weeks in wandering alone among them. The rough mountaineers learned to revere him, and he became as skilful a wood-man as any of them.

In June of 1857, after accomplishing some difficult surveys, and, as it is supposed, having ascended the pinnacle which now bears his name, he was descending into Yancey county, when, overtaken by night and a blinding storm, he strayed over a precipice on Sugar Camp Creek, and was discovered some days afterward, dead, at the bottom of a waterfall, his body perfectly preserved in the limpid pool. His friends, the mountaineers, who mourned his loss bitterly, buried him in Asheville; but a year later his remains were carried to the mountain top and there placed in a grave among the rocks he had loved so well.

Near the grave the Government has established a signal-house, where two brave men dare the storms which occur almost daily. The anger of the heavens as witnessed from this stony perch in mid-air, is frightful to contemplate, and many a day the lonely men have expected to see their only shelter hurled down into the ravines below.

The view from the topmost peak is similar, in most respects to that from lower Mount Mitchell; but the effect is more grand and imposing, and the mountains to the south and east seem to stand out in bolder relief. A tremulous mist from time to time hung about us; the clouds now and then shut the lower world from our vision, and we seemed stand-

ing on a narrow precipice toward whose edges we dared not venture.

As we descended, that afternoon, the pheasant strutted across our path; the cross-bill turned his head archly to look at us; the mountain boomer nervously skipped from tree to tree; the rocks seemed ablaze as we approached the rhododendron thickets; the brooks rippled musically, and the azalea's perfume was sweeter than ever before.

Each member of the party, dropping bridle-rein on his weary horse's neck as we came once more into the open space where stands the Mountain House, and looked down thousands of feet into the yawning valley; as the peace and silence and eternal grandeur of the scene ripened in his soul, involuntarily bared his head in reverence.—*Edward King, in "The Great South."*

Pray without Ceasing.—The gift of speech and the spirit of prayer are two very different things. A ready, fluent tongue that can pray at all times, and present with ability the wants that others propose for his adoption, may satisfy the ear of the untaught and the untried, but the Lord's people want the Spirit to lead them and teach them what to pray for; they want nearness and access to God through Christ; they want the "spirit of grace and supplication;" they want to present their heart's needs at the throne of grace, in unison with the mind and will of God, and this, not in studied phrases and well turned periods, but as moved by the Holy Ghost, for "if we ask anything according to His will, He heareth us," and this is an audience that is efficacious and secures a blessed result.

Many of God's people are covetous for the gift of prayer, and as they stammer out their needed wants they envy those who, they think, far exceed them in their well-expressed and truthful presentation of their requests before God, little thinking that their broken sentences, their sighs and groans, their trembling hopes of success, their earnest pleadings for help, their brief ejaculations for deliverance, are all so much Spirit-power, given by the Lord and recognized by Him as true prayer, that, sooner or later, will be answered; not, it may be, after the way and manner of the heart's desire, but in God's way, which includes His own glory and His child's good.

We hear much in our day of the "power of prayer," but prayer is powerful only as it runs in the channel of God's decrees. As these secret purposes are unknown to us, we are given divine leave to present our petitions to the Lord, and many precious promises are given, whereby the Lord's people are encouraged to call upon Him, to ask, to seek, to knock at a throne of grace for the blessings He designs to give, and to carry their hard cases to One who hears and can help. The Lord thus effects two gracious results. He will bring his children to "pray without ceasing," and He will bring them, by delays in answering, into a meek, humble, and submissive spirit; and when this is accomplished, the Lord oftentimes shows it was in His heart "to do it for them," by giving the blessing they desired of Him; so their language and experience testifies, "This is the confidence that we have in Him, that if we ask anything according to His will, He heareth us; and if we know that He hears us, whatsoever we ask, we know that we have the petitions that we desired of Him.—*The Episcopal Record.*

Random Notes of Travel in Europe.

(Continued from page 322.)

A Search for the Roman Wall.—The great wall built by the Roman Emperor Severus, to keep the restless Piets within bounds, crosses the Eden near Carlisle. Desiring to inspect the remains of this wonderful work, we crossed the meadows near Hislop Holme Well, but not finding any traces at this spot, we proceeded to the pretty village of Stanwix, which crowns the hill beyond. After winding down a green lane and over one or two small fields, by advice of sundry "wayfarer men" whose antiquarian knowledge had not been enlarged by reason of their opportunities, we at length met one whose advice was in keeping with our desires, and we passed through a gate into a grassy field. Here, of course, we expected to see remnants of a gigantic wall, ancient stones of immense size half buried in the soil. Nothing of the kind was visible; yet we were assured that we stood upon the very spot. Taking a sweeping glance across the field we noticed before us, two straight lines of grass rather greener and taller than the rest, and between them a faded growth of herbage as if starved upon a soil much encumbered by stones. Could this be the wall we sought? Undoubtedly it was all that remained of it, for had it not served as a quarry for ages, and been carted away to serve a hundred civil and pacific uses! We had at length the pleasure of walking upon the foundations of the veritable barrier, from which we could still look down on the north, into the shallow remains of the ancient moat or ditch. Imagination must needs plume herself for a strong flight, to battle with the dusky centuries between us and the far off past, when Roman soldiers, mailed and helmeted, guarded this extended citadel, for such it truly was, stretching from Bonness on the Solway, over hill and dale, to Wallsend on the Tyne, a distance of no less than 75 miles. Its breadth varied according to the nature of the ground, but was about eight or nine feet at the base, and this breadth was carried up to the height of fourteen feet. Upon this was erected a parapet, on the northern side, four feet high. The whole wall was thus, generally eighteen feet high, and composed on the outside of regularly shaped and well-dressed freestone, while the inside was of rubble or concrete like the massy walls of many castles.

At regular intervals of four miles, fortified camps or stations were erected, each containing from 600 to 1000 soldiers. These stations were generally close to the wall on the southern side, and appear to have formed almost a square from three to six acres in extent, surrounded by high, thick walls, provided with four gateways, and laid out in streets, barracks, temples, baths, &c., some of the buildings having massive and occasionally beautiful sculptured stones. Between the stations were castles about one mile apart, each with its gateway to the north, and as the number of gates was perhaps nearly one hundred, the wall could not have been a mere boundary-fence, but really an entrenched camp, extending entirely across the island. This view is strengthened by the fact that a vallum or earth-work runs nearly parallel with this stone wall, on the south side, at distances ranging from 60 or 80 yards, to almost half a mile, and which some antiquarians believe served the purpose of protection against surprise from

the south. Others assert that the vallum or ridge was only a great military road.

Though familiar from our school days with the story of the Roman wall, few of us have any intelligible idea of the vastness of the original work, or the state of the remains which they exist at the present day. A walk of the entire length of the wall, is the best method of becoming acquainted with its great extent and character, and no one can traverse it in sea to sea, without a feeling of enthusiasm. He contemplates this work of a people "of labor," says Sir W. Scott, "even at this tremor of their empire, comprehended this space, and were executed upon a scale of grandeur. * * Their fortifications, their aqueducts, their theatres, their fountains, all their public works bear the grave, solid, and majestic character of their language; we see our modern labors, like our modern tongues, seem but constructed out of their fragments."

The glimpse we had obtained in our walk over the grassy field near Stanwix, but served to whet the enthusiasm of Jan— for further investigation, and an excursion to Gilsland and Lanencost were determined upon, with the intention of taking Naworth on the way. So one fine day we found ourselves, with our kind friend, examining the tumuli near the station at the romantic little Spa of Gilsland, which is the resort of many who would drink the sulphur waters, and catch a glimpse of scenes rendered famous by Scott, and where also he found his wife. Near this station we saw some imperfect remains and part of the ruins of a mile-castle, also probably a part of the ancient vallum. Had we proceeded to Birdswood, two miles further, we could have found some of the best preserved remains of the entire series—a gateway with large blocks of stone and a portion of the wall, in some places seven feet high, and extending about 500 yards. But alas! no conveyance could be found—the only carriage being engaged—and we were obliged to content ourselves with the glimpses already noticed, and to wind our way to Naworth.

Naworth castle is well worthy of a visit. This was an old border fortress, where once reigned supreme the Lord Warden of the Western Marches, and now or late a seat of the Earl of Carlisle, whom we may remember as Lord Morpeth, when he visited America some years since, and deservedly a favorite here and at home. After walking a long distance through the Park, where cattle and sheep were grazing, and where in ancient times fallow-deer abounded, beneath the magnificent trees that bordered the drive or were scattered picturesquely over the domain, we reached the castle. It is now occupied by Charles Howard and his family, who is a descendant of the Duke of Norfolk.

Among the proprietors of Naworth in early days, none have been more famous than the renowned ancestor of the Earl of Carlisle, Lord William Howard, the "Beloved Will" of the North Country, whom Scott describes in his "Lay of the Last Minstrel."

"Costly his garb, his Flemish ruff
Fell o'er his doublet, shaped of buff
With satin slashed and lined;
Tawny his hood, and gold his spur,
His cloak was all of Poland fur—
His hose with silver twined;
His Bilboa blade by marchen felt
Hung in a broad and studded belt,
Hence in rule phrase the Borderers still
Call noble Howard, 'Beloved Will!'"

"Belted Will" was third son of the Duke of Norfolk, who was beheaded for an unfortunate attachment to Mary Queen of Scots, having been appointed guardian to three sisters, heiresses of the Dacres, he arranged a marriage of his three sons with these wealthy ladies, without permission from Queen Elizabeth, and thus incurred her wrath. The two above named is said to have married Bessie with the braid apron," when he was only fourteen years old. On his release from the Tower of London, where he had been imprisoned some years, he obtained possession of his wife's estates, and came into favor with King James, who, in 1605, appointed him warden of the West Marches.

Naworth stands on rising ground overhanging two deep dells, and surrounded by venerable trees. It consists of two large towers separated by other buildings enclosing a rectangular court. We entered the large hall and highly admired its fine proportions and curious details of the past; among which were a pair of moss-trooper's boots of great size, and suggestive of giant growth by reason of the abundance of beef and mutton obtained by their owner in nightly forays into England, when the moon was clouded. Our guide, the courteous house-keeper, informed us that 300 persons could be seated in the dining hall when its vitality assumed its grandest scale. The actual destruction of the castle by fire is recorded in an inscription above the fireplace of the hall, at one end of which appears portraits of Lord William and his lady Elizabeth, in armor and various heraldic bearings ornament the corbels. From the hall we entered the drawing room furnished plainly in modern style, and though efforts had been made to harmonize the ancient and the modern, the incongruity between the enormously thick walls and deep embrasures of the windows, with photographs and engravings and other modern appliances indicative of refinement, was still obtrusive. Winding our way through narrow passages and up winding stairways we reached, at length, the apartments of the heir of Border story, his chamber, oratory and library. His large Effios remain as he left them, mute evidences of the true character of the man. Camden, who visited him in 1657, describes him as a singular lover of venerable antiquities and learned details, characteristics that have descended unimpaired to his worthy posterity. The late Earl of Carlisle was well known as a man of letters, as well as the possessor of a wise and tolerant spirit. Our guide observing how eagerly the exteriors of the old books were scanned, observed to J—, "We never show them, sir! but I will let you see one." And unpeeling the glass doors, produced a huge folio, a unique manuscript work, displaying the genealogies of many royal personages, the whole with curious notes and colored illustrations and emblematings, the work of Belted Will himself.

It is said that once when employed in this very room, a servant came to tell him that a moss-trooper had just been captured, desiring to know what should be done with him. vexed at being disturbed, he answered peevishly, "hang him!" A few hours later, when he had concluded his labors, he ordered the prisoner to be brought before him for examination, but was told that his mandate had been obeyed, and that the moss-trooper was dead. The borders were a wild country in

those days, inhabited by a wilder race of men, and when plunderers were taken in the act, stern justice was speedily administered; but little reliance can be placed upon such stories of summary execution. The warden of the marches were, however, invested with despotic powers.

A narrow steep stairway led from the bed-chamber of "Belted Will" to the secret dungeons of the castle. The low wainscoted room appeared as though it might have been a pleasant one in its time, but the slumbers of a man who kept one hundred and fifty constantly under arms as a body-guard, and whose dungeons were filled with prisoners, could not, we imagine, have been otherwise than uneasy at times. The oratory adjoining had been refitted and was gorgeous, for Lord William and his brother the Earl of Arundel, espoused the Catholic faith, to which some of their descendants, at this day, adhere.

Observing our great interest in this shadowy glance at mediæval life, our guide asked, half apologetically, "Would you like to see the kitchen?" "Very much," was the reply, so, without more ado, we were shown through what I would call a state kitchen, judging from the brilliancy of the culinary armory—the weapons being meat hooks of immense size, intermingled with huge knives and forks, platters and trenchers, and every thing else needed in this department. On emerging, the house-keeper pointed to a flight of steps on one side of the court, saying, "There stood the Princess Louise and the Marquis of Lorne, when their photographs were taken! They made us a visit after their marriage, and they came very privately, ma'am, no one was at the station to meet them." The Marquis of Lorne is a nephew of the wife of Charles Howard.

The sun was low in the west as we wandered away from Naworth through the park. We still hoped there might be time for a glimpse at Lanercost: so we plodded rather warmly along, regretting the lengthening shadows, and reached a small public house, the Abbey Bridge Inn, standing just beyond the park gate, where the pleasing information that we could have tea *very soon*, induced two of the party to sit down at once, and await its advent.

Where is the Priory? I mentally inquired; evidently nowhere in sight, but this antique bridge over the Irthing and that old road beyond must lead some-where, and seized with the spirit of exploration and adventure, characteristic of the American pioneer, one member of the party walked onward upon the level road, bordered by well-trimmed hedges, until an old gateway, a mass of sombre, monkish-looking ruins, surrounding a wide space carpeted by velvet grass, upon which stood an ancient cross, presented to view. And this was all I saw, "only this and nothing more!" But the sun would go down at the appointed moment, and I reluctantly retraced my steps, leaving unnoticed tower, chapel and chancel, and the old tomb of Sir Roland Vaux of Trieman.

The long but interesting day did not close as early as we anticipated, for hour after hour we lingered at the station, near Naworth Lodge gate, ere the welcome sound of the long-delayed train was heard, and midnight found us on the streets of Carlisle.

He that walketh uprightly walketh surely.

Word-Changes.

For "The Friend."

(Continued from page 323.)

BRAVERY. "In that day the Lord will take away the *bravery* of their tinkling ornaments."—*Isaiah* iii. 18.

The meaning of bravery in the above passage is finery, splendid show, which was its ordinary significance at the time of our translation. In this sense the word is now obsolete. Milton speaks of a ship

"With all her *bravery* on and tackle trim,
Sails filled, and streamers waving."

BY-AND-BY. "Give me *by-and-by* the charger the head of John the Baptist."—*Mark* vi. 25.

The Greek word here translated by *by-and-by*, signifies *immediately or presently*, and this was precisely the meaning of *by-and-by* at the time our translation of the Bible was made. The expression, now denoting a future more or less remote from the present, then had the force of the *immediate* future. It is so used in Fox's Book of Martyrs. "And some counselled the archbishop to burn me *by-and-by*, and some others counselled him to throw me in the sea."

CARRIAGE. "And David left his *carriage* in the hand of the keeper of the *carriage*."—*1 Sam.* xvii. 22.

In the nineteenth century the meaning of *carriage* is that which carries; in the seventeenth century it meant that which is carried, that is, *baggage*. David left his *carriage*, signifies, therefore, that David left his *baggage*.

CHARITY. "And now abideth faith, hope, *charity*, these three; but the greatest of these is *charity*."—*1 Cor.* xiii. 13.

The Greek word here rendered by *charity* means *love*, and this was the meaning of *charity* when our translation was made. The change of meaning which the word has undergone is a process of contraction, *charity*, which originally meant love, being now limited to certain manifestations of it, as in alms-giving, forbearance towards the frailties of others, &c. In the earlier translation of the Bible made by Wycliffe, the passage rendered in our version "neither death nor life * * * shall separate us from the love of God," is translated the "charity of God." Tyndale translates the passage first quoted, "Now abideth faith, hope and love, even these three; but the chief of these is love."

CORN. "His disciples plucked the ears of corn, and did eat, rubbing them in their hands."—*Luke* vi. 1.

In America, the word *corn* is restricted to the Maize, or Indian corn; but as used in the Bible it meant wheat or barley, especially the former.

CUNNING. "So the number of them, with their brethren, that were instructed in the songs of the Lord, even all that were *cunning*, was two hundred four-score and eight."—*1 Chron.* xxv. 7.

The original sense of *cunning* was *knowing*, hence *skilled*: *Isa.* iii. 3, "*cunning* artificer;" *xl.* 20, "*cunning* workman." This is the significance in the above passage. "All that were *cunning*" means all that were *knowing or skilled*, that is, "in the songs of the Lord." The word has since degenerated, so as to mean skilled in a *crooked* way. *Cunning* is originally the same as *cunning*, that is being able; and *cunning* is related to *kenning* or *knowing*, which gives us the primary and pure signification of the term.

Cautious. The word *curious* occurs in several

passages in the Bible—which speaks of the "curious girdle" of the ephod; of "curious works," meaning works of skill. In these places, *curious* is used in its original sense, namely wrought with care and art (Latin "cura," care). The "curious girdle" was a richly embroidered belt."

DAYSMAN. "Neither is there any *daysman* betwixt us, that might lay his hand on both."—*Job* ix. 33.

The word *daysman* is now obsolete. It meant an arbiter or umpire. The literal meaning of *daysman* seems to be one who appoints a day on which to hear and decide between contending parties.

DEAL. The word *deal* literally means a part, and a great *deal* means simply a great part. In the seventeenth century a wider use was made of this word than is now allowable. Thus we read in *Leviticus* of the tenth *deal*, meaning the tenth part, or *tithe*.

DESIRE. "He [Lehoreau] reigned in Jerusalem eight years, and departed without being desired."—*2 Chron.* xxi. 20.

To *desire* means now to look forward to with longing; but at the time of our translation it signified, also, to look back upon with regret. This is its sense in the above passage; departed without being *desired*, that is, without being *regretted*. So Jeremy Taylor says in one of his sermons, "She shall be pleasant while she lives, and *desired* when she dies."

DISCOVER. "The voice of the Lord * * * discovereth the forests."—*Psa.* xxxix. 9. *Discover* is here used in its literal sense, — to uncover, to lay bare.

EAT. "The oxen likewise and the young asses that eat the ground shall eat clean provender."—*Isa.* xxx. 24.

Eat here means to *plough*, derived from the Latin *arare*. This use is now wholly obsolete, but it occurs in several places in the Bible, and in old English writers. Thus Chaucer says:

"I have . . . a large field to ear,
And weak are the oxen in my ploughing."

"Yet there are five years in which there shall neither be *earing* [ploughing] nor harvest."—*Gen.* xiv. 6.

Benefit of Trials.

If the Lord is pleased to sanctify the infirmities to which our present mortal frame is subject, we shall have cause to praise him at last, no less for the bitter than the sweet. I am convinced in my judgment, that a cross or a pinch, somehow or other, is so necessary to us, that we cannot go on well for a considerable time without one. We are surrounded with snares, and if not quickened by trials, are very prone to sink into formality or carelessness. It is a shame it should be so, but so it is, that a long course of prosperity always makes us drowsy. Trials therefore are medicines, which our gracious and wise Physician prescribes because we need them; and He proportions the frequency and weight of them to what the case requires. Many of his people are sharply exercised by poverty, which is a continual trial every day, and all the year round. They who have comfortable firesides, and a competence for this world often suffer by sickness. But any and all of these crosses are mercies, if the Lord works by them to prevent us from cleaving to the world, from backsliding in heart, or life, and to keep us nearer to himself. Let us trust our Physician and He will surely do us good. And let us

thank him for all his prescriptions, for without them our soul's sickness would quickly grow upon us.—*John Newton.*

THE HEAVENLY LAND.

Selected.

There is a land of pure delight,
Where saints immortal reign;
Infinite day excludes the night,
And pleasures banish pain.

There everlasting spring abides,
And never-withering flowers;
Death, like a narrow sea, divides
This heavenly land from ours.

Sweet fields beyond the swelling flood,
Stand dressed in living green;
So to the Jews old Canaan stood,
While Jordan rolled between.

But timorous mortals start and shrink
To cross this narrow sea,
And linger shivering on the brink,
And fear to launch away.

O, could we make our doubts remove,
These gloomy doubts that rise,
And see the Canaan that we love
With unobscured eyes,—

Could we but climb where Moses stood,
And view the landscape o'er,
Not Jordan's stream, nor death's cold flood,
Should fright us from the shore.

—Isaac Watts.

HEREAFTER.

Selected.

"What I do thou knowest not now but thou shalt know hereafter."—*St. John* xiii. 7.

Christian, when the storm-clouds gather
Dark and wild upon thy way,
And thy faithless heart is longing
For the glorious light of day;
Though thou canst not pierce the shadows
That around thy footsteps lie,
If in faith thou journey forward,
They will vanish by and by.

Though the bitter cup of sorrow
To thy lips be often pressed,
Yet as each succeeding morrow
Brings thee nearer to thy rest;
Though thou may not see the fountains
Whence these streams of Marah flow,
Never let thy courage fail thee;
For "thou shalt hereafter know."

If thy curious mind would fathom
That which God alone may know;
If thy troubled heart would query
Why the ways of God are so;
Why the losses and the crosses,
Which around thy pathway lie,
Be content to meekly bear them
In the hope, that by and by,

When shall dawn the glorious morning
Of the bright eternal day,
When the mist, and cloud, and darkness
That envelop thee, pass away;
Thou shalt see the perfect beauty
Of the place of life and love,
In its fullness emanating
From the Father's throne above.

See and know the glad fruition,
From the labors and the tears
Spent within the Master's vineyard,
Through the weary lapse of years;
Then press on the path of duty,
Though thou may not see below,
Why uncertainties surround thee,
Yet "thou shalt hereafter know."

Oh, how many precious moments are wasted in softness and self-indulgence, in frivolous pursuits, in idle conversation, in vague and aimless revelry, which, if rightly improved, might tell upon the world's destiny and the Redeemer's glory.—*Charles.*

Thomas Edward—A Scotch Naturalist.

(Continued from page 227.)

At the age of eleven years Thomas was bound apprentice to a shoemaker named Beg. His master was a skilful workman, but a drunken fellow, with low, pugilistic tastes, who had no sympathy with his apprentice love of animals.

"One afternoon, when Edward had finished his work, and was waiting for the return of his master in order to go to dinner, he was sitting with a sparrow on his knee. It was young sparrow which he had trained and taught to do a number of little tricks. It was his pet, and he loved it dearly. While he was putting his sparrow through its movement the master entered. He was three parts drunk. On looking at the bird on Edward's knee, he advanced, and struck Edward such a blow that it laid him flat on the floor. The bird had fluttered to the ground, and was trampled on.

"When Edward was about to rise, he saw that Beg was going to kick him. Raising up his arm to ward off the blow, Beg's foot came in contact with it, and, losing his balance, he reeled, staggered against the wall and fell backward. He gathered himself together and got up. If angry before, he was furious now. Edward, seeing that he was again about to resume his brutality, called out that he would shout for help, and that he wouldn't be struck again without a cause. 'Without a cause, you idle blackguard! sitting playing instead of doing my work!'—had no work; it was done three hours ago and I was waiting to go to my dinner.' 'It's not near dinner-time yet.' 'It's four o'clock.' 'I didn't know it was so late; well, you may go.'

"Tom seized the opportunity of picking up his poor and innocent bird from the floor. He found it was still breathing. He put it tenderly in his bosom, and hastened homeward. His mother was not surprised at his lateness, which was very usual, in consequence of the irregularity of his master's hours. 'But what's the matter wi' ye?' she said; 'your face is bleedin', and ye ha'e been greetin'.' 'Look,' said he, taking the harmless and now lifeless bird from his breast and holding it up, 'that would gar ony body greet and his tears fell on the mangled body of a little pet.' 'I wouldn't have cared so mune for myself,' he said, 'if he had only spare my bird.' Then he told his mother all that had happened, and he added that if Beg struck him again without a cause he would certainly run away. She strongly remonstrated against this; because, being bound apprentice for six years, he must serve on his time, come what would.

"On returning to the shoe-maker's shop the afternoon, Edward was met at the door by his master, who first shook him, and then searched him; but, finding there was nothing about him, he was allowed to go to his seat. And thus three years passed. The boy learned and something of his trade. The man worn on from bad to worse. In his drunken fits he often abused and thrashed his apprentice. At last the climax came. One day Edward brought three young moles to the shop. The moles were safely ensconced in his bonnet. When Beg found the moles, he killed them at once, knocked down Edward with a last seized him by the neck and breast, dragged

to the door, and with a horrible imprecation threw him into the street. Edward was good deal hurt; but he went home, determined from that day he would never again give under such a brute.

"Begg called at his mother's next day, and ordered the boy to return to his work. Edward refused. Begg then invoked the terrors of the law. "He would compel Edward to fulfil his apprenticeship. He would prosecute his father, and his two sureties, and make them pay the penalty for breaking the boy's indenture." This threat gave Edward's mother a terrible fright, especially when her boy insisted that he would not go back. The family were left in fear and commotion for some time. But at last, as nothing further was heard of the threatened prosecution, they dismissed it from their minds."

Thomas afterward obtained employment at his trade, in which he became a skillful workman; and which he continued to follow through life, though he never felt much interest in it, save as the means of obtaining support for himself and his numerous family. The Aberdeen militia having been called out in 1831, when Thomas was about eighteen years old, he enlisted. "The company to which Edward belonged was drilling one day on the links. It was a bright, sunny afternoon. The company was marching along near the lower end of the links, when a large brown butterfly flitted past. Edward saw it in an instant. He had never seen the like of that butterfly before! Without thinking for a moment of what he was doing, he flew after it—among the benches and sand hillocks, grasping after it with his hand.

"A very hunter did he rush.

"Upon the prey: with leaps and springs

He followed on from brake to bush."

"The butterfly eluded him; it flew away before him. Again he rushed after it, losing his bonnet in the hunt. He was nearing the spot where it had alighted. He would catch it now, when suddenly he was gripped by the neck! He looked round, and saw it was the corporal of his company, with four militiamen behind him.

"On crossing the links, the prisoner and his escort encountered one of the officers of the regiment, accompanied by a group of ladies. Where are you going with that boy?" said the officer, addressing the corporal. "To the hard-house!" "What! more insubordination!" "Yes." "This is most dreadful; what has he done?" "He broke the ranks during drill, and though Sergeant Forbes called him back, he ran away after what he calls a butterfly."

"There was a short silence, after which the ladies were observed tittering and laughing. "What did you say, corporal?" "He ran out of the ranks after a butterfly." "What! ran away from his exercise for the sake of an insect! Most extraordinary. Is he mad, corporal?" "Well, the sergeant thinks so; and that's the reason why I have got four men to help me to take him; but I don't think that he's mad." "He must be drunk, then?" "No, no," said the sergeant; "he doesn't think he's drunk either." "He must be either mad or drunk: did he ever behave like that before?" "No, not to my knowledge."

"At the intercession of the ladies, he was given his offence against military discipline, and allowed to return to the ranks.

"At the age of twenty-three he met with a young woman whom he loved and married. He brought to his house at Banff, where he

had removed a few years before. This gave him a happy home. His wife was bright and cheerful, and was always ready to welcome him from his wanderings. They were very poor; but mutual affection makes up for much. Perhaps they occasionally felt the bitterness of poverty; for Edward's earnings did not yet amount to more than about nine shillings and sixpence a week. His intense love of nature was a compensation to him for many difficulties. To use his own language, "Everything created or formed by the hand or the will of the Omnipotent, has such a fascinating charm for me, and sends such a thrill of pleasure through my whole frame, that to describe my feelings is utterly impossible."

"Edward proceeded to make a collection of natural objects early in the spring of 1838. He was then twenty-four years old, and had been married about a year. He had, a short time before, bought an old gun for four and sixpence; but it was so rickety that he had to tie the barrel to the stock with a piece of thick twine. He carried his powder in a horn, and measured out his charges with a bowl of a tobacco-pipe. His shot was contained in a brown-paper bag. A few insect bottles of middling size, some boxes for containing moths and butterflies, and a botanical book for putting his plants in, constituted his equipment.

"As he did not cease shoe-making until nine at night, nearly all his researches were made after that hour. He had to be back to his work in the morning at six. His wages were so small that he could not venture to abridge his working hours. It was indispensably necessary for him to husband carefully both his time and his money, so as to make the most of the one and the best of the other. And, in order the better to accomplish this, he resolved never to spend a moment idly, nor a penny uselessly.

"On returning home from his work at night, his usual course was to equip himself with his insect boxes and bottles, his botanical book, and his gun; and to set out with his supper in his hand or stowed away in his pocket. The nearest spring furnished him with sufficient drink. So long as it was light, he scoured the country, looking for moths or beetles, or plants, or birds, or any living thing that came in his way.

"When it became so dark that he could no longer observe, he dropped down by the side of a bank, or a bush, or a tree, whichever came handiest, and there he dozed or slept until the light returned. Then he got up, and again began his observations, which he continued until the time arrived when he had to return to his daily labor. It was no unusual circumstance for him—when he had wandered too far, and come upon some more than usually attractive spot—to strip himself of his gear, gun and all, which he would hide in some hole; and, thus lightened of every thing except his specimens, take to his heels, and run at the top of his speed, in order to be at his work at the proper time.

"He went out in fine starlit nights, in moonlight nights, and in cold and drizzling nights. Weather never daunted him. When it rained, he would look out for a hole in a bank, and thrust himself into it, feet foremost. He kept his head and his gun out, watching and waiting for any casualties that might happen. He knew of two such holes, both in sand-banks and both in woods, which he occasion-

ally frequented. They were foxes' or badgers' dens. If any of these gentry were inside when he took up his position, they did not venture to disturb him. If they were out, they did the same, except on one occasion, when a badger endeavored to dislodge him, showing his teeth. He was obliged to shoot it. He could often have shot deers and hares, which came close up to where he was; but they were forbidden animals, and he resisted the temptation. He shot owls and polecats from his ambuscades. Numbers of moths came dancing about him, and many of these he secured and boxed, sending them to their long sleep with a little drop of chloroform. When it rained heavily, he drew in his head and his gun, and slept until the first streaks of light appeared on the horizon; and then he came out of his hole and proceeded with his operations."

(To be continued.)

Rebecca Bevan.

8th vol.

Rebecca Bevan, who died on the ninth of the Eleventh month, 1817, at the age of thirty-four, was the daughter of Jasper and Anne Capper, of Stoke Newington, from whom she received a guarded and religious education; and there is reason to believe, that their care in this respect was blessed to her. In very early life, her mind was favoured with serious impressions; for it appears, from some memorandums of her own, made when about eleven years of age, that she then "felt earnest desires that she might live in the fear of the Lord, and be strengthened to overcome every thing that would hinder her eternal salvation." She was, in her youthful days, no stranger to close conflict of mind, in which a sense of her own remissness was deeply felt, and the tear of sorrow often shed, from a feeling of great unworthiness. Being preserved in this acceptable state, her own inclinations became much subjected to the power of Truth, and she resisted, in great degree, those temptations to which the youthful mind is exposed: a portion of heavenly light shone upon her path, by which she was enabled rightly to seek, and to find Him whom her soul loved.

When about the age of twenty one, she was united in marriage to Paul Bevan, and became a member of Tottenham monthly meeting. Not very long after this event, she was humbled under an apprehension that it would be right for her to bear public testimony to the Lord's goodness; and, under this impression, it was her earnest petition that she might clearly know the divine will concerning her, and not seek relief from any outward source. After some years of close inward exercise, she yielded to the divine manifestation, and was permitted to enjoy the reward of a quiet and peaceful mind therein.

The following memorandum is descriptive of her character, and instructively marks the self-examination which she was concerned to maintain.

1811.—Tenth month, 27. "Returned home on the 16th, and the following day, after attending the marriage of M. M. (and there, for once, endeavouring to do in simplicity, what was required of me, in which I found peace,) was surprised with the information, that, during my absence, the monthly meeting had acknowledged me as a minister. The friends appointed to inform me, did it in a tender manner; and my first emotion on hearing it, was a desire to kneel down, and earnestly pray

for that preservation in true humility, of which I felt more than ever the need. But recollecting, that He to whom the prayer was offered, can accept the sincere breathing of the heart, as well as the more public petition, I contented myself with turning to Him in secret, and I think felt my strength renewed by so doing. But have I dwelt in his fear, or in a disposition to be dedicated to his service since that time? No: I have again let in lukewarmness and indolence, both in and out of meetings; and I am afraid I shall never be fit to be admitted of the number of his redeemed. The opinion of my friends, though their unity is very pleasant, cannot alter the real state of things between my soul and its Maker; and I much fear, that it is possible to be thought well of by our fellow-pilgrims, and yet to be weighed in the balance and found wanting."

In the exercise of her gift, it was her great concern that she might not move without clear impressions of divine requiring, nor exceed the limits which Truth sets to its openings. Her communications were neither long nor frequent; but attended with weight and solemnity. She possessed a considerable share of mental endowments; and, being cautious in decision, her judgment was sound and discriminating. She was, from early life, of a tender conscience, and remarkable for a strict adherence to truth. One of the principal characteristics of her mind was sincerity, accompanied with Christian humility. She was exemplary in the discharge of the social and relative duties of life; and, as a mother, it was her continued care that her offspring might be preserved from the evils of the world, and, by an early obedience to the teachings of the Spirit of Christ, be enabled to bear his cross.

Having, with her husband and family, removed for a short time to London, they returned, about the latter end of the year 1816, to Tottenham. From this time she felt herself gradually weaning from the world; her mind being strongly impressed with the apprehension that her continuance here would be but of short duration. In the sixth month, 1817, she wrote as follows: "Since my return to this meeting, my state of mind has been much as of late years; mostly attended with great want of earnestness in spiritual things; but now and then, for a short time, aroused to greater diligence; and a desire has been much impressed on my mind, that if, at the close of time, I should be favoured with the least sense of acceptance, no one may, in future, sink under discouragement; for I think it impossible that any should feel more destitute of good, and even of living desires after it, than I do at times felt."

The illness which preceded her dissolution was both protracted and severe. In its progress she endured much excruciating pain; yet, when relieved from the acuteness of these paroxysms, she was able to converse, with much calmness, upon her situation and approaching end. In the early part of her confinement, she said to one who was with her: "I am afraid that I am not prepared; if I was prepared, I think I could go." Upon its being intimated to her, that her patience under suffering was an evidence of her being, in a great degree, prepared, she replied, emphatically, "But if a little is wanting!" At one time, when in great pain, she said: "I feel now as if I could trust in the mercy of the Lord in Christ Jesus;" and, at another time,

spoke thus: "I am sure, if there is a door open, and I, such an imperfect creature, so full of carelessness, so continually off the guard! can rightly go, I can never enough wonder at the merciful kindness of the Master who profess to serve." On another occasion, after expressing her comfort in the prospect of being released, she added, "I have no ground in myself; it will be all of mercy that these tears will be changed into tears of joy. I wish that all who ask about my death may know that I had not a rag of my own to clothe myself with; but that, if I make a good end, it is entirely and purely through the mercy of Him with whom we have to do. It was many days before I could lay hold on the least degree of that; but I hope these sufferings are graciously intended as purifications."

About this time, when under great bodily suffering, as her husband was supporting her on the bed, she supplicated thus: "O, merciful Father! send, I beseech thee, and say, it is enough. Or, if it be thy will that these sufferings be protracted for days to come, be pleased to give the balm of patience. And for this, my dearest earthly friend, enable him to bear this affliction, and any future trials that may be allotted. Thou knowest that I have often asked for him thy guidance and direction through the wilderness of this world; but, for the present day, send us help from thy sanctuary, and strengthen us out of Zion." Shortly afterwards she said: "The Lord has been pleased to grant me a little quiet since the morning. It is a sign that he is near, and what can be a greater comfort." And to a near relation: "Ah, my dear, I feel for thee; but what I feel for myself, is inexpressible thankfulness that the end may be near." Upon being asked how she felt, she replied emphatically, "Animated with the prospect of the change!" And in the evening of the next day she remarked, that it seemed as if she was longing to hear praises uttered. After, this, however, she was permitted to experience seasons of deep depression, and privation of the sensible enjoyment of good, and expressed herself as almost destitute of inward comfort. Yet He who had thus far preserved, did not forsake her, and she was again enabled to look with confidence towards Him.

There being at this time no indication of the immediate approach of death, she manifested much earnestness to be endued with patience; saying that it was what she stood in need of, and that nothing could be done but to pray for it, and that the Everlasting Arm might be underneath her to the end; and hoped that she might adopt the language, "All the days of my appointed time will I wait." But her pain increasing, she said to her sister: "Oh! my dear sister, thou dost not know how much I suffer many ways. Oh! when the end comes, what a glorious change it will be to me." One of her medical attendants remarking that her sufferings had been great, she said: "They have; but if they work out that far more exceeding and eternal weight of glory, I shall not regret them." And being in much pain, she uttered this short prayer: O, heavenly Father! if it please thee, hasten the time; but, more than all, enable me to say, 'Thy will be done.'

For the last few days of her life, the disorder under which she had labored made more rapid advances; yet she was preserved in great calmness of spirit; and, on the day before her death, in the prospect of being

soon released, she was heard, in a feeble voice to say, "What a comfort, inexpressible!"

Thus He who had been graciously pleased to guide her by his counsel, in the morning her day, and to carry forward the work of purification, condescended to support her presence in the hour of suffering; as there is cause reverently to believe, that I granted her an admission, through our Lord and Saviour Jesus Christ, into the joys of life salvation.—*Pity Promoted.*

For "The Friend

At the fourteenth annual meeting of the Friends' Association of Philadelphia and vicinity, for the relief of Colored Freedmen held in Arch street meeting house, Philadelphia, the 16th of Fourth month, 1877.

The annual report of the Executive Board and that of the Treasurer were read, presenting an encouraging view of their labors during the past year. Nineteen schools have been conducted under the auspices of the Association, 2 in Virginia and 17 in North Carolina. Thirty-six teachers have been employed, of whom 10 were colored and generally our former pupils. The greatest number of pupils attending have been: 2568 the week day and 1539 at the First-day schools. The money contributions during the year amounted to \$13,359 20, and from the origin of the Association to \$326,623 7. There has also been received during the year from the School fund of North Carolina, \$823.90; from that of Virginia, \$250; and from the Freedmen, for tuition and books, and account of land purchases, \$857.70. A liberal distribution of Bibles and other religious reading has been continued.

Upon nomination of the Committee appointed last year, the following Friends were appointed to the several offices named:

President, Marmaduke C. Cope.

Secretary, John B. Garrett.

Treasurer, Richard Calbury.

Executive Board, Benjamin Coates, Anthony M. Kimber, Philip C. Garrett, Elliston S. Morris, James E. Rhoads, Francis R. Cope, Richard Wood, John B. Wood, Joshua Baily, William K. Walton, Edward M. W. Tar, William G. Rhoads, Robert B. Hain, Thomas K. Brown, Asa S. Wing, Reuben Haines, George W. Emlen, George M. Warner, Thomas P. Cope, Jr., and Marmaduke Kimber.

Benjamin J. Crew, Colman L. Nichols, James Bromley, Richard Calbury, Charles Willis and Reuben Haines were appointed nominate to our next annual meeting, Friends to fill the several offices of the Association during the succeeding year.

John B. Garrett, *Secretary*.

Treasurer's Report.

To the Friends' Association of Philadelphia and its vicinity, for the Relief of Colored Freedmen.

Contributions for the year, . . .	\$13,359.
School funds of North Carolina and Virginia, . . .	2,073.
Receipts from Property, . . .	270.
Books sold, . . .	526.
Tuition fees, . . .	83.
Sandries, . . .	98.
Appropriation from Land Fund, . . .	416.

Total Receipts, . . . \$16,827.

Payments.

efficiency at last report, \$673.78
 physical Relief, 864.69
 salaries, support and travelling
 expenses of teachers,
 printing reports and
 Freedmen's Friend, office
 expenses, &c., &c., 11,764.51

Total expenditure, \$13,302.98

Leaving a balance on hand, \$3,524.69
 of which \$1,000 belongs to a special fund for
 "Sick and Crippled Freedmen."
 Note.—Balance on hand for general purposes
 as above Report 4th mo. 15th, \$2,524.69
 of this amount there has been ex-
 pended in payment of salaries,
 travelling expenses, &c., since that
 date, 1,831.60

Leaving a Balance, 693.09
 received since 4th mo. 15th, from
 contributions, State aid, &c., 373.48

Balance 5th mo. 8th, 1877, \$1,066.57

How to Protect Horses against Sunstroke.—
 The horse receives sunstroke not through the
 top or poll of the head, as is popularly sup-
 posed, but through the orbits of the eyes and
 the side of the back.

Horses overdriven on a hot day die often
 of spinal paralysis or pulmonary congestion
 and apoplexy caused by the sun's rays heat-
 ing the body and blood to a great degree. The
 hood or bonnet in common use is quite faulty
 in construction. It does not shield the eyes
 at all. The horse's eyes should be shielded
 from the sun's rays just as a man whose eyes
 are inflamed, protects them with a green
 asteroidean shade. For twenty-five cents or
 less you can protect your horse's head better
 than all hoods or bonnets for sale at the har-
 ness-makers. Get an old straw hat, minus the
 crown, with a broad brim, or a thin piece of
 hoop stick, and make a hoop about a foot in
 diameter, cover this with a piece of green
 cloth, an old green baize or flannel—green
 absorbs the hot, red, and yellow rays of the
 sun—then, with a few bits of copper wire,
 attach it to the headstall or blinders in such
 a way that it will stand three or four inches
 above the horse's forehead, and project at
 least three inches over his eyes. Your horse
 will stand the hottest sun, so far as his head
 is concerned; and if you wish to prevent his
 body and blood from getting over-heated, cover
 his back from his shoulders to tail with a loose
 blanket of thin cotton or linen cloth, of yellow
 or green color. During the hot season many
 a horse could be saved by this simple process.

On the hot sands of the desert under a burning
 sun, Arabs protect their camels in a simi-
 lar way. Car and cart horses should be pro-
 tected, and the blanket frequently wet, and
 they will bear the fatigue and heat of a long
 drive much better for it. Black and bay
 horses suffer more from the sun's heat than
 white horses, because the dark color absorbs
 nearly all the hot rays of the sun.—*Selected.*

Augustine was so careful not to speak evil
 of the absent, and not to encourage others in
 doing so, that he had the following distich
 engraven on his table:

"Far from this table be that worthless guest
 Who wounds another's fame, though but in jest."

For "The Friend."

Report of the Book Committee.

To the Meeting for Sufferings:—The Book
 Committee report: That during the year
 ending Third month 31st, 1877, 1771 volumes
 and 528 pamphlets have been sold; and 3,265
 volumes and 67,000 pamphlets have been
 given away; making the total number dis-
 tributed 5,036 volumes, and 67,528 pamphlets;
 which is 1,229 volumes, and 65,331 pamphlets
 more than in the previous year. The esti-
 mated cost of those given away was \$1,493.11.

To keep up the supply of books, there has
 been paid by the Treasurer of the Yearly
 Meeting, for paper, printing, binding and
 stereotyping, and books purchased, including
 the cost of printing the extracts from the
 minutes of our last Yearly Meeting, \$3,686.11;
 and for incidental expenses, \$142.11, making
 together, \$3,828.22. There has been received
 for books sold, \$711.89. The balance, \$3,116.
 33, has been paid as follows: from the
 General fund, \$1,972; from the income of Hannah
 Sanson's legacy, \$769.47; from that of Jesse
 George, \$319.86; and from the fund of Mary
 Ann Lloyd, \$55. The salary of the agent has
 also been paid by the Treasurer as heretofore.

The cost of the stock on hand is as follows:
 Stereotype plates, \$9,861.15; books, pam-
 phlets, &c., \$5,987.02; making together, \$15,
 \$18.17; which is an increase of \$1,451.96 over
 the amount reported last year.

There were printed during the year, 750
 copies of No Cross No Crown; 250 Letters
 of Isaac Penington; referred to in the report
 of last year; 250 Phipps' Original and
 Present State of Man; 250 Penn's Rise, Progress
 and Key; 1,000 Biographical Sketch of Wil-
 liam Penn in English; 500 ditto in German;
 500 ditto in French; 250 ditto in Spanish;
 1000 Life of John Roberts; 250 Letters of
 John Barclay; 250 Evans' Concise Account
 of Friends; 250 Barclay's Catechism; 500
 Bevans' View of the Christian Religion; 250
 Journal of George Fox; 6000 Epistle of the
 Yearly Meeting; 80,000 Appeal for the Ob-
 servance of the First-Day of the Week, in
 English, and 20,000 in German; 10,000 The-
 atical Amusements and Horse Racing; and
 500 Mary Brook on Silent Waiting.

In addition to these there were purchased
 100 Life of John Roberts; 100 Dymond on
 War; 40 John Woolman, in German; 100
 Penn's Rise, Progress and Key; 55 No Cross
 No Crown, and 45 Barclay's Apology, in
 French.

During the year, there have been added to
 our sets of stereotype plates, The Letters of
 Isaac Penington; Epistle of the Yearly Meet-
 ing of 1876; Appeal for the Observance of
 the First-Day of the Week; Mary Brook
 on Silent Waiting; Biographical Sketch of Wil-
 liam Penn; Life of John Roberts; Bevans'
 View of the Christian Religion; and Life of
 Richard Jordan. In addition to these, the
 stereotype plates of "Friends in the Seven-
 teenth Century," have been presented to the
 Yearly Meeting by the author. The cost of
 translating the Biographical Sketch of Wil-
 liam Penn into the German, French and
 Spanish languages, was also defrayed by an
 interested Friend.

Of the publications gratuitously disposed
 of 418 volumes and 145 pamphlets were given
 to Reading Rooms and Libraries of various
 kinds; including Monthly and Preparative
 Meeting Libraries of Friends, and the books
 furnished to boarding houses for the use of

the guests; 479 volumes and 49 pamphlets in
 German, French and Spanish were given to
 persons speaking those languages, who were
 visitors to our city during last summer; 62,000
 pamphlets, consisting principally of the Appeal
 for the Observance of the First-Day of the
 Week, and the tract on Theatrical Amuse-
 ments and Horse Racing, were donated to
 the Philadelphia Tract and Mission Society;
 558 volumes and 1,071 pamphlets were sent
 to Friends in the Western States; 455 vol-
 umes and 97 pamphlets were distributed in
 the Southern States, principally among the
 Colored People; and 1,055 volumes and 3,638
 pamphlets were given for distribution in
 various parts of the United States, England,
 Italy and South America.

Interesting evidences have reached us of
 the help and comfort which some have de-
 rived from the works so distributed. One
 person writing from Texas, and speaking of
 a copy of Barclay's Apology which had been
 given him, says: "It has recalled me to things
 once of momentous interest to me, but un-
 happily lost in the cares of life. It has been
 of great pleasure and profit to me, and I feel
 certain that thou must have surely been
 prompted by the Divine Spirit, when thou
 gavest it to me."

Another, after thanking the Book Com-
 mittee for the books sent, refers to the pre-
 vious possession of the religious publications
 of another Society, and says: "They are of
 little account, compared to the writings of
 Fox, Barclay, Penington and others. With
 these come deeper and more intense longings
 for a larger measure of the Holy Spirit. Being
 as yet but a babe in the experience of His
 blessed presence, I feel deeply the necessity,
 that the work of Christ in baptizing with
 the Holy Spirit and fire, and thoroughly purging
 His floor, go forward to the glory of His
 grace, and the manifestation of His power."

A colored teacher in Savannah, Georgia,
 the principal of a large public school there,
 to whom a few books had been sent, remarks:
 "The three first propositions of Barclay's
 Apology have satisfied me as to the merits of
 the book. I say honestly, that I would not
 now part with them under any consideration.
 For I have never seen anything which so
 nearly accords with my views on the subject
 of a spiritual religion, or the immediate pre-
 sence of God's Spirit with His church. And
 oh, if our people would realize this truth, how
 it would stimulate our piety!"

Several other expressions of thankfulness
 and appreciation have been received, both
 from white and colored people; so that we
 believe there is cause for encouragement to
 those who are endeavoring in this way to pro-
 mote the spread of truth and righteousness in
 the earth.

JOSEPH WALTON, Clerk.

Philadelphia, Fourth mo. 6th, 1877.

Published by request.

The Free Baths of Alaska street will be re-
 opened Sixth month first.

During last summer nearly 13,000 persons,
 of both sexes, availed themselves of the benefit
 and refreshment they offer to all comers.

Subscriptions for the maintenance of the
 Baths, and for providing the attendants neces-
 sary to their orderly and efficient use, may
 be made to J. SHIPLEY NEWLIN, 337 Market
 street.

The Sceptic.—"If we are to live after death, why don't we have some certain knowledge of it?" said a sk-ptic. "Why don't you have some knowledge of *this* world before you come into it?" was the caustic reply.

THE FRIEND.

SIXTH MONTH 2, 1877.

The remark is not infrequently made by some who appear desirous to have all the distinguishing features of Quakerism removed from our religious Society, that all that is wanted is for men to be christians. In one sense this may be true, but in another it is far from being correct. All sincere disciples of Christ should acknowledge him as their common Master, and one another as brethren. But men may be christians who have but little knowledge of the doctrines of the Gospel, and in whom the Life which is the Light of men, has so partially illuminated the understanding, that the errors arising from education and association have not been discerned; nor they been brought to see and forsake much that is inconsistent with the simplicity and purity of undefiled religion, but which they may have always considered essentially connected with its requirements.

The discoveries of divine truth are often very gradual, and their application to conduct and worship may be but dimly perceived or not deeply felt, even where there is an honest desire to do right; the saying of Christ to his disciples when personally with them, being applicable to many sincere christians in the present day. "I have yet many things to say unto you, but ye cannot bear them now."

It is one of the blessed characteristics of the Gospel of Christ, and a striking evidence of its divine origin, that it meets the necessities of men of all classes and in all conditions of life. Wherever it is so accepted and obeyed as to be known as the power of God unto salvation, its effects are always of the same character, notwithstanding the great dissimilarity in the mental development, in the outward circumstances, or the religious profession of its votaries. That is, the fruits of the Spirit, so far as they are matured, are always love, joy, peace, longsuffering, goodness, faith, meekness, temperance. But as in individuals there is great difference in spiritual knowledge and religious experience, in some being developed slowly and feebly, in others more rapidly, more clearly and more perfectly, thus yielding sometimes thirty, sometimes sixty, and sometimes an hundred fold; so it is in bodies of christian professors organized for the support and propagation of their respective understanding of the truths of the Gospel, as set forth in the "creeds" they have adopted. The "creeds" of all christian denominations may embrace the great fundamental doctrines of christianity, while the societies themselves differ widely in the interpretation and practical application of those doctrines, both as to individual duty and modes of worship. However divine charity will dictate in the hearts of the members of these several divisions of the visible church, love towards all others who love the Lord Jesus in sincerity, it does not call upon them to sacrifice their conscientious convictions of

what the religion they profess enjoins, in order to conform to the principles or practices of others, or to harmonize one with another, however they may recognize the christianity in each.

Friends have always stood pre-eminent in the belief of the in-shining, instruction and guidance of the Holy Spirit in every man and in the necessity of obedience to its secret revelations, in order to obtain that knowledge of the true God and Jesus Christ whom He has sent, which is life eternal; to ascertain His holy will concerning individual duty, and to be made partakers of the salvation purchased by Christ, on the terms which He has laid down. It is in accordance with this doctrine and faithfulness thereto, that they have been constrained to reject the many forms and ceremonies, the will-worship and man-made ministry of most other professors, and to bear testimony against many things, by others deemed harmless if not praiseworthy. Hence some other professors have questioned their claim to be called christians, on account of what they designate their peculiarities, while worldlings have despised and derided them.

The position in the visible church occupied by Friends is an advanced one, and the banner given them to display because of the Truth, may not be struck or lowered to meet or accommodate the views and practices of those—christians though they may be—who have not yet seen so distinctly into the spirituality and strict requirements of the religion of Christ, as to be willing to give up all conformity to the spirit of the world, and discard the rites and ordinances that have been introduced into the "church" in the will and by the contrivance of men. Those who do so, not only injure their own religious condition and standing, but they betray the cause of Him who has been pleased to raise up the Society for his own purposes.

Samuel Fothergill thus expresses himself. "The testimony given to us as a people, in various branches, hath been a stone of stumbling and rock of offence to many, who have wished for our crown *without our cross*, and have overlooked or despised the peculiarity of our testimony; or rather *the Lord's testimony through us*. The language, fashions and customs of the world, though by many deemed indifferent, *are not so to us*; but they are a part of the growth of that lofty Lebanon, which the day of the Lord is to come upon, as well as on the cedars; and when that day comes, it will burn as an oven with prevailing heat, and leave them neither root nor branch. All who have entered into fellowship with us by the *baptism of Christ*, which is the right door of entrance, have found it to be their duty to attend to these testimonies, not from imitation, but from conviction of their propriety. We might have many preachers break in upon us, *ere we at liberty to admit them upon the bottom of general speculative truth*, without their coming to the unity of the Spirit."

SUMMARY OF EVENTS.

UNITED STATES.—A terrible accident occurred at the launch of the steamship Saratoga, from Roach's shipyard at Chester, on the morning of the 22d ult. The vessel started from its blocking somewhat sooner than was expected, killing seven men and severely injuring three others. The disaster was not discovered until the vessel had reached the water. It was the fortieth launch at the yard, and the first at which any accident happened.

Four inches of snow fell in Berkshire Co., Mass., on the morning of the 24th. Serious damage to the crops there, is feared.

The Cheyenne Indians, at Camp Robinson, N. 1350 in number, will be transferred, at their own request, to the Indian Territory.

The total amount of silver issued since 4th mo. 20, 1876, is \$31,738,490. The fractional currency outstanding at this date is \$20,075,807. One million of fractional currency will be retired during the present month.

The estimated value of fresh beef, exported from Philadelphia during the past week is \$59,914. To exports \$711,331.

It is stated that 395 American Locomotives, worth \$5,490,640 have been exported in seven years, and most of them were taken from Philadelphia.

The Youngstown rolling mill, at Youngstown, O., was destroyed by fire on the night of the 26th. The loss is said to be about \$100,000; and 300 men thrown out of employment.

The number of interments in Philadelphia last week was 335. Of these 177 were adults and 158 children 70 being under one year of age.

The Markets, &c.—The following were the quotations for western rice: American gold, 10; United States 9's, 1881, 115; 5/20's, 1865, 111; Oct 113 1/2; etc. per lb. for uplands and New Orleans Petroleum, standard white at 14 1/2 for export, a 19 a 20 cts. per gallon for home use. Pennsylvania flour at \$8.85 for wheat; choice, \$9.00; and high grade at \$10 a \$11. Good is sold; sales at \$16.87 1/2 for western red; \$1.80 for 18 1/2 for Penna. southern do.; \$1.87 a \$1.90 for amber, and \$1.95 a for white. Corn, 62 a 64 cts. Oats, 48 a 51 cts. Receipts of beef cattle 3000 head. Sales at 4 1/2 to 7 1/2 cts. per lb. gross, as to quality. Sheep sold at 4 to 5 1/2 cts. per pound. Hogs, 6 1/2 to 7 cts.

Population of Cienfuegos.—The number of persons enumerated in Cienfuegos in Madrid during the week end 5th mo. 10th, shows an increase of 41,391. Repece from various parts of India show that the general condition is unimproved; official reports from Bombay say that the increase of the numbers on the relief work is 20,433.

A meeting was held at New Castle on the 21st ult. concerning the votes of the Northumberland colliers, as whether the matters in dispute with their employers referred to arbitration. There was an overwhelming majority in favor of continuing the strike.

The question is being discussed in Vienna whether it is not advisable to incorporate Bosnia, Herzegovina and Servia into one State, under an Austrian Archduke.

Seven hundred Jews, deprived of a livelihood by the closing of the Dumbé, destitute, homeless and almost starving, in Widdin, have taken refuge under the walls of the fortress, in fear of a bombardment.

The 53th anniversary of Queen Victoria's birthday, occurred on the 24th ult. It was observed as a general holiday throughout the Dominion of Canada.

There were seventy deaths from small pox in London last week.

In consequence of a strike of the Northumberland colliers, 12,000 men, it is said, are out of employment.

FRIENDS' SELECT SCHOOLS.

A suitably qualified Friend is wanted as Principal of the Boys' Select School, at the opening of the term the Ninth month. Application may be made to—Joseph S. Elkinton, 331 South Fifth St.

Edward Maris, 127 South Fifth St. James Smedley, 415 Market St. George J. Scattergood, 413 Spruce St.

FRIENDS' ASYLUM FOR THE INSANE.

New York, (Twenty-third Ward), Philadelphia Physician and Superintendent—JESUAH H. WOODINGTON, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board Managers.

DEED, in Germantown, 5th mo. 5th, 1877, at the residence of his sister, Sarah A. Matlack, DANIEL MATLACK, in the sixty-ninth year of his age, a member of Philadelphia Monthly Meeting.

—, at West Chester, Pa., on the 7th ult. SAMUEL R. KIRK, aged nearly 89 years, a member of Birmingham Monthly Meeting of Friends.

WILLIAM H. PILE, PRINTER,

No. 422 Walnut Street.

For "The Friend"

A Summer in Norway.

By JOHN DEAN CATON.

We have been interested in the notes of a visit to Norway, published under this title. It is a chatty, unpretentious book, but gives me ideas of that country which are new. A few extracts may be acceptable to our readers. Hammerfest, it must be borne in mind, is out latitude 71° north, and in the summer several months has continual daylight. One of the troubles J. D. Caton frequently alludes to being the annoyance and difficulty of sleeping under such circumstances. He says:—

"Our course soon changed to the south, and we quickly threaded our way among a maze of islands and through the crooked channels, where a stranger would have become inextricably confused and lost. The bay was beautiful; the sun shone brightly, the air was soft and sweet and bracing. The deer-ducks were constantly flying across our course, and small herds of reindeer were seen on the sides of the mountains, or in the intervals near the water's edge. Fishing huts were ten passed, and the fishermen in their boats were frequently met with, and there only checked the appearance of a bear or a stately elk, to fill up the picture of animated nature. The scenery this day was finer than any we had before met, and we spent the day upon a deck enjoying it to the full * * * The lands, however, which we this day passed were not all mountains. The views were diversified with lower lands and tamer scenery. In quite a number the surface was comparatively low and level and covered with trees and shrubbery, almost out of keeping with the usual scenery in arctic Norway.

In the afternoon we reached the head of Ten Fjord, and made our final landing at Bøsekop. This has, by some, been called the den of Lapland, and is certainly the most beautifully located of any place we saw in the mark. The shipping is accommodated at a small dock, adjoining which are two small warehouses. From this point the bluff rises out one foot in eight to the altitude of about a hundred feet, where occurs a narrow table land then another more gentle ascent, of less height to the level country stretching away inland. Further south there is more space between the water and the bluff, along which runs a street or road, bordered by peasants' cottages or fishermen's cabins.

The broad hill side was covered with a rich carpet of green-grass, which presented a cheerful prospect. An evergreen forest crowned the heights beyond, and we seemed all at once to have entered upon a scene of rich vegetation, quite in contrast with the barrenness or stunted growth we had everywhere previously met.

The hotel is a large two-story wooden house, built in the manner before described, and newly painted white, and standing as it does on that first high table, commands a view of the great bay in front for ten miles or more, and is a conspicuous object, which may be seen at a great distance from the southern part of the bay, but is hidden by a high promontory from the northern approach. There was no carriage there to take us up the hill, so we had to make the ascent on foot. It was a hard task for the invalid and was a work of time. Frequent rests upon the soft grass lightened the labor much, and so we reached the house, where we found comfortable rooms—comfortable for those who desire to be satisfied and pleased with what is clean, though very plain, and really provides for one's physical nature as well as if luxuries were thrown in; for here, certainly, there was not the least appearance of luxury. But the people were obliging and desirous to please, and this is a seasoning which makes palatable very plain fare indeed. Those who are always quarreling with their bread and butter, are not likely to have a pleasant journey.

After taking possession of our new quarters, and seeing all things made comfortable, I sallied out to explore, and soon found myself at the top of the second table. It was a luxury to find myself walking on a carpet of rich, green grass, and what was still more pleasing, I found among the grass quite a variety of wild flowers, and during a short walk I gathered a pretty arctic bouquet. This was cheering news, and I hastened to the house to communicate it, and to present the evidence that if nature frowns upon these bleak regions with stern vigor, she smiles as well at times. Of course all must be enthusiastic over arctic flowers, and a regular excursion in search of them was planned for the next day.

A single day showed a wonderful development of flowers, and indeed all vegetation. Ten flowers were found now where one was met the day before, and many new varieties which were not then observed, so that we had no trouble in making a fine collection.

On the top of the upper table an extensive peat-bog was found, though apparently of limited depth. Several excavations showed where peat, though of an inferior quality, had been taken for fuel, and drains were cut through it in various directions. Many cows were pasturing upon it, though the grass seemed coarser and less abundant than beyond it. The most abundant vegetation found on the peat-bog was a low, shrubby vine, on which a yellow berry grows, about the size of

a mulberry, which is called *multebær*, and is extensively used in that country in the form of sauce. It is also made into preserves when fresh, and thus kept, and it is even exported in barrels. I confess it was not agreeable to my palate. It lacked flavor, and had an insipid taste. With longer use I might, no doubt, become fond of it. On our first arrival at Bøsekop scarcely one of these vines was in bloom; yet in two days after the ground was white with the flowers all over the peat-bed.

The deposit of peat I found very common on the rocky islands and in places where I should not have thought of looking for it. I found it often spread out in thin sheets, not more than one or two inches thick, on the steep sides of the otherwise naked rock, hundreds of feet up the declivity, where one would suppose it would be washed off by the first heavy rain. Geologists may, no doubt, readily explain how it got there, and how it is retained, but I confess it is to me a profound mystery. Of course it was poor and unfit for fuel of any considerable value; but still it was a true peat and would make a fire when nothing better could be found.

Still back of the peat-bog, and on the highest elevation, stood the Lutheran church, a good-sized, commodious structure, painted white, except the steeple, which was black. Nearly all the Lutheran churches in Norway are of one style of architecture. They have high, steep roofs, with tall, slender spires, and with a closed porch in front, and then an ante-room, the roof of which is still higher, which is attached to the main building under the spire. To the opposite or back end of the church is attached a small structure. Around this church are quite a number of neat and comfortable dwellings. The country back was covered with a pine forest, the trees were not large, but were abundant. Deciduous trees were met with farther south and down the bluff, but they were scarcely more than shrubs. So far as I went in the interior the country was pretty level; but the soil was light and not very productive. In several places the forest had been cleared away and snug farmsteads established; but not sufficient to show that, even in that favored spot, agriculture was prosperous. At the most thrifty looking place I saw, the farmer was a blacksmith as well, and it is quite probable that his thrift was owing as much to this as to that occupation. The old plows lying around outside his shop, and apparently abandoned for use, showed some curious designs, while others resembled our own very much.

I did not extend my rambles into the valley, or rather the bottoms of the Aften river; but obtained a pretty extensive view of the valley, which had the appearance of a prosperous agricultural country, with fine farms and houses, which was refreshing to look upon in the arctic regions. This rich valley extends far back into the country, and relieves the general sterility of the land."

An Epistle of True Christian Love, to all Friends, called or reputed Quakers, who profess the True Light.

Dear and well-beloved Friends, brethren and sisters, both old and young, whom I truly love in the Lord; even with that ancient love which has lived in my heart from the beginning. I bless the worthy name and power of the Lord our most gracious God, who hath hitherto helped me and many others, his faithful servants and ministers, in his blessed work and service. And my soul's breathing and supplication to Him, the Father and Fountain of mercies, is, that his divine grace, love, and peace, with all spiritual blessings in Christ Jesus, may be for ever continued unto you, and multiplied among you.

And, my dear friends and brethren, not knowing how soon my days here may come to a period, I having now been for a long time deeply concerned in the Lord's work and service, in his gospel ministry and harvest; it being above 52 years since I was first called forth to bear public testimony for his blessed truth, and dispensation of his Holy Spirit and new covenant; the Lord having prolonged my days much beyond my former expectations, because not only of the deep sufferings and severe persecutions, which I early underwent, but also the divers afflictions and exercises since. I am therefore now the more concerned to communicate to you, my dear friends, what is laid upon me; even in the love of my heavenly Father, and for the help and advantage of future ages, of such as shall hereafter sincerely seek the Lord, and the exaltation of truth and righteousness in the earth.

Upon the 22d of the 7th month, 1705, the power of the Lord came upon me with great weight, to my great comfort and refreshment, in a special manner opening many weighty matters afresh, of the state and condition of his peculiar people, commonly called Quakers; as, how we came truly to quake and tremble at the word of God in the beginning, and the real causes thereof, both under the powerful ministration of the law and judgments of God by his light, discovering the nature and exceeding sinfulness of sin; and also under the dispensation of the gospel, in order to work out our salvation, with fear and trembling; (the light of the Word ministering both law and gospel); when we knew our God so to prepare our hearts, by working in us both to will and to do; being also sensible we could not thus work without some inward sense and feeling of the word and power of God, and his Christ, working in us, true willingness, also faith, and ability. As there is a trembling of heart, and bowing of soul under the sense of judgment and mercy, there must be a giving up to serve the Lord with fear, and rejoice with trembling; the same being required even of the kings and judges of the earth, under the dispensation of the Son of God, (Psal. 2.)

Now let it enter the hearts and considerations of all who are concerned, or in outward communion among us, both young and old, male and female, what it is to be a true Quaker and trembler; to tremble at the word of God; to tremble at his judgments; to tremble at his presence; seeing that to "this man will I look, saith the Lord, even to him that is poor, and of a contrite spirit, and trembleth at my word." Isa. lxxvi. 2. The Lord has a tender regard to them, and care over them, who are thus exercised in the inward sense of the word of life.

Yea, "Thus saith the High and Lofty One,

that inhabiteth eternity, whose name is Holy: I dwell in the high and holy place, with him also that is of a contrite and humble spirit, to revive the spirit of the humble, and to revive the heart of the contrite ones." Isaiah lvii. 15. Oh! this contrite and humble spirit, is too much wanting, where the Word of life and power is not inwardly received nor regarded; where persons are lifted up, and exalted in their own wills and spirits, above the inward sense and feeling of this Word, which would tender their hearts, and bow their spirits unto a true contrition and godly sorrow; where they can frequently resort to the solemn assemblies of the Lord's people, come and go as whole, and up in their spirits and fleshly minds and conceits, without any true remorse, brokenness, trembling or contrition of heart or spirit, before the Lord, or at his presence. Surely a bitter cup of trembling will be given to such at last, if they repent not.

How many were there among us in early days, who came under those dispensations of the law and the gospel, under the sense of judgment and mercy, and trembled at the word; and freely submitted to judgment, that they might find mercy with God in Christ, who, in the midst of judgment remembered mercy, that He might be feared.

But how many now are there under an outward profession of Christ, and pretensions of religion, who never came under those dispensations, so as to be truly humbled, mortified or crucified unto the world, yet termed or reputed Quakers; when in reality they are not such as tremble at the word or presence of God, or because of his judgments; and yet there is as much loftiness of man in them to be laid low, and as much earth in them to be shaken, as ever was in any of us, at first, when we knew the glory of the Lord, that is, his power, to arise to shake terribly the earth, and to bring down the lofty looks, and lay low the pride and loftiness of man. Isa. ii. 11.

Wherefore I am sensible that quaking and trembling at the word and presence of the Lord God, as in the beginning, are as necessary to be reminded in the ministry and preaching, in these days of ease and liberty, as ever, to humble them who have not repented of their iniquities; being guilty of both manifest evils, and secret sins.

All the negligent and slothful, all the lukewarm and indifferent persons in religion, have need to repent; all contentions, quarrelsomeness, and disobedient persons, have need to repent and reform in their behaviors and conversations. All unjust, covetous, earthly-minded oppressors, and injurious persons, and all carnal liberties, and drunkards, have great need to repent, and be deeply humbled under the mighty hand of the Lord God. All proud, self-willed, self-exalted and unclean persons, with all whisperers, back-biters, and sowers of discord, have great cause to seek repentance, and to fear, dread, and tremble at the judgments and presence of the Lord God; and in order thereto, such have need to be alarmed and awakened out of all their carnal security, fleshly ease, and false rest, unto repentance. If the Lord please to give them a place and hearts to repent before they die, a terrible shaking, a deep sorrow, mourning and lamentation, must fall on such, before they come into a true rejoicing in the Lord, with trembling; for there must be a terrible shaking, before a joyful trembling.

Such as are careless and at ease in the outward truth's profession, and such as are inclined from their first love and simplicity to revive the spirit of the humble, who is in Christ, and unstable-minded ones, are apt to affect high strains, sudden and light flights, sounds and tones, more than so matter; and then get into elevations and exaltations, more than into humility, or weig sense of life, and to imitate a sort of singing which is neither with the Spirit nor with understanding, as in the primitive churches of Christ; whereby too many, who are inexperienced in the work of God and Christ's ministry, are apt to be puffed up for one, against another, as those carnal ones among the Corinthians were, and to be exalted in self-conceits and imaginations, to value themselves above others, and far better than they are; and such will judge of ministry and ministers by a partial affection, and not by sound judgment or divine sense; so they are apt and ready to mistake an affection and forced births; the Divine power, and son of the free woman, which is very pernicious, as tending to a kind of idolatrous bowing to that as the power, which is not the power of God, but a kind of likeness of things in heaven. Whereas the real work of the gospel ministry is foundational work, 'tis edifying-work in a sound judgment, in a sound mind, in a clear understanding, and tending to bring people to be sound in the true and living faith, in the name and power of Christ Jesus; even in that available and effectual faith, which worketh by love, so that this foundation-work of Christ's ministry tends to settle people's minds in humility in self-denial, in the holy fear of the Lord, the true light, upon the sure foundation that is laid in Zion, Christ the spiritual rock, upon which the true church is and shall be built, and must stand for ever.

(To be concluded.)

For "The Friend"

Thomas Edward—A Scotch Naturalist.

(Continued from page 233.)

The ruined castle of the Boyne, about five miles west of Banff, was one of Edward's favorite night haunts. The ruins occupy a level summit of a precipitous bank forming the eastern side of a ravine, through which the little river Boyne flows. One of the vaults level with the ground, is used as a shelter place for cattle. Here Edward often to be dark during rain, or while the night was so dark to observe. The cattle soon got used to him. When the weather was dry, and the animals fed or slept outside, Edward had to vault to himself. On such occasions he was visited by rats, rabbits, owls, weasels, polecats, and other animals.

One night, as he was lying upon a stone, dozing or sleeping, he was awakened by something pat-patting against his legs. He thought it must be a rabbit or a rat, as he knew that they were about the place. He only moved his legs a little, so as to drive the creature away. But the animal would not go. He raised himself up, and away it went; but the night was so dark that he did not see what the animal was. Down he went again to try and get a sleep; but before a few minutes had elapsed, he felt the same pat-patting; and this occasion it was higher up his body. I now swept his hand across his breast as I thrust the intruder off. The animal shrieked as it fell to the ground. Edward knew it was a polecat. It was a polecat.

He shifted his position a little, so as to be opposite the door-way, where he could see his antagonist betwixt him and the sky. He also moved upon his side in order to have more room to act. He had in one of his breast-pockets a water-hen which he had shot that evening; and he had no doubt that this was a bait which attracted the polecat. He stroked up his coat to his chin, so as to prevent the bird from being carried away by force. He was now ready for whatever might happen. Edward must tell the rest of the story in his own words:

"Well, just as I hoped and expected, in about twenty minutes I observed the fellow entering the vault, looking straight in my direction. He was very cautious at first. He halted, and looked behind him. He turned a half, and looked out. I could easily have shot him now, but that would have spoiled my sport; besides, I never wasted my powder and shot upon any thing that I could take in my hands. Having stood for a few seconds, he slowly advanced, keeping his nose to the ground. On he came. He put his feet on my legs, and stared me full in the face for about a minute. I wondered what he would do next—whether he would come nearer or go away. When satisfied with his look at my face, he dropped his feet and ran to the vault. I was a good deal disappointed, and I feared that my look had frightened him. By no means. I was soon relieved by hearing the well-known and ominous squeak squeak of the tribe. It occurred to me that I was about to be assaulted by a legion of polecats, and that it might be best to beat retreat.

"I was just in the act of rising, when I saw my adversary once more make his appearance at the entrance. He seemed to be alone. I leaped quietly down again to my former position, and waited his attack. After a rather slow and protracted march, in the course of which he several times turned his head toward the door—a manoeuvre which I did not at all like—he at last approached me. He at once leaped upon me, and looked back toward the entrance. I lifted my head, and he looked full in my face. Then he leaped down, and ran to the entrance once more, and gave a weak. No answer. He returned, and leaped upon me again. He was now in a better position than before, but not sufficiently far up my purpose. Down went his nose, and, up he crawled over my body toward the end in my breast-pocket. His head was low down, so that I couldn't seize him.

"I lay as still as death; but, being forced to breathe, the movement of my chest made me breathe raise his head, and at that moment he gripped him by the throat. I sprang instantly to my feet, and held on. But I actually thought that he would have torn my hands to pieces with his claws. I endeavored to get him turned round, so as to get my hand on the back of his neck. Even then, I had enough to do to hold him fast. How he screamed and yelled! What an unearthly noise in the dead of night! The vault rung with his howlings. And, then, what an awful crouch he emitted during his struggles! The very jackaws in the upper stories of the store began to caw. Still I kept my hold, but I could not prevent his yelling at the top of his voice. Although I gripped and squeezed with all my might and main, I could not choke him.

"Then I bethought me of another way of dealing with the brute. I had in my pocket about an ounce of chloroform, which I used for capturing insects. I took the bottle out, undid the cork, and thrust the ounce of chloroform down the fumart's throat. It acted as a sleeping draught; he gradually lessened his struggles. Then I laid him down upon a stone, and, pressing the iron heel of my boot upon his neck, I dislocated his spine, and he struggled no more. I was quite exhausted when the struggle was over. The fight must have lasted nearly two hours. It was the most terrible encounter that I ever had with an animal of his class. My hands were very much bitten and scratched, and they long continued inflamed and sore. But the prey I had captured was well worth the struggle. It was a large and powerful animal—a male; and I desired to have him as a match for a female which I had captured some time before. He was all the more valuable, as I succeeded in taking him without the slightest injury to his skin."

"The persevering determination which T. Edward showed in the pursuit of knowledge, and of objects of his collections, is well illustrated in his account of the capture of a species of bird that was new to him. He says:

"I once had a desperate hunt after a little stint (*Tringa minuta*). Returning home one evening along the links,* I heard a strange cry coming as it seemed, from the shore. I listened for some time, as I knew it was the season (September) for many of our migratory species to visit us. Never having heard the cry before, I was speedily on the beach. But it was growing dark, and I had not cut's eyes. The sound, too, ceased so soon as I had gained the beach. After groping about for some time, I thought I espied a rather large flock of birds at some distance along the shore. I approached cautiously, and found that I was correct; the flock consisting chiefly of ringed plovers, dunlins, and sanderlings. From the latter circumstance, and from the fact that the cry was that of a sandpiper, I was pretty sure that a stranger was among them. Although I could see well enough that the birds were on the wet sand between me and the water, I could not make them out distinctly. Once or twice I thought I could distinguish one considerably smaller than the others, but I soon felt that I had been mistaken. I was now in a state of great excitement. Every limb shook like an aspen leaf, or a cork's tail on a windy day. What was I to do? True, I might have fired at them, but the odds were greatly against my being successful.

"It was now fairly dark, and the birds had retired to rest on a ridge of rocks which intervenes between the sands and the links. Instead of returning home, as any one else would have done, I laid myself down in a hollow till morning to wait their first appearance, in the hope of attaining my object. It proved a wet and windy night; but daylight brought with it a fine morning. With it also came two gunners from Banff, striding along the beach on a shooting excursion. This vexed me to the very heart. The birds were not yet astir, but I knew they would rise at the approach of the men, who would doubtless attempt to shoot them. Just as I anticipated, up went the birds; crack! crack! went

the shots; and down fell several birds. Rising from my stony couch, I rushed at once to the spot to see the victims, and I found them all to consist of sanderlings, dunlins, and one ringed plover. The gunners were strangers to me, but I ventured to ask them to abstain from firing until I had satisfied myself about the bird I sought; but they seemed unable to understand why one bird could be of more interest than another, and they told me that, as there were plenty of them, I could fire away and take my chance. I declined to shoot with them, but eagerly watched each time they fired; and if a bird fell, I went and examined it; but I did not meet with the one I sought. The men at last got tired and went away.

"It was now my turn; but, unhappily, the birds, from being so often fired at, had become extremely shy, so that to get near them for my purpose was all but impossible. By perseverance, however, I at length made out one, as I thought, a good deal smaller than the others. I succeeded in creeping a little nearer. They rose; I fired, and down fell four. I rushed, breathless, hoping to pick up the bird in which I took such interest. But, alas! no. It was not there. Away went the remaining birds to the sea; then, turning, they rounded a point or headland called Blackpots, and disappeared from view. From this, and from their not returning, I knew that they had gone to the sands at White-hills, about three miles distant, to which place I proceeded. But no sooner had I reached there, than back they flew in the direction from which they had come. Back I went also, and found them at the old place.

"Just as I reached them, away they flew once more, and, of course, away I went likewise. In this way we continued nearly the whole day—they flying to and fro, I following them. Toward evening my strength began to fail, and feeling quite exhausted, I gave up the chase, and once more took up my abode among the shingle, in the hope that they might again return there for the night. Just as I wished and expected, and while it was yet light, they came and alighted about thirty yards from where I lay. Away went fatigue, hunger, and thoughts of home! In fact, the sight of this object of my day and night's solitude made me a new creature. Off went the messengers of death. Two of the birds fell; the rest fled once more to the sea. I followed, but had not proceeded far when I observed one falter. Leaving its companions, it bent its course toward where I stood, and suddenly dropped almost at my feet. As I picked up the little thing, I could not but feel thankful that my patience and perseverance had at last been crowned with success. It was the first little stint I had ever shot, and the only one I have ever seen in this neighborhood."

(To be continued.)

The Patient Elephant.—An elephant in Calcutta had a disease in his eyes. For three days he had been completely blind. His owner, an engineer officer, asked the doctor if he could do anything to relieve the poor animal. The doctor said he would try the nitrate of silver, which was a remedy commonly applied to similar diseases in the human eye. The large animal was ordered to lie down, and at first, on the application of the remedy, raised a most extraordinary roar at the acute pain which it occasioned. The

* Links, sandy, flat ground, sometimes covered with grass, lying along the sea-shore.

effect, however, was wonderful. The eye was in a manner restored, and the animal could partially see. The next day when he was brought, and heard the doctor's voice, he lay down of himself, placed his enormous head on one side, curled up his trunk, drew in his breath just like a man about to endure an operation, gave a sigh of relief when it was over, and then, by trunk and gesture, evidently wished to express his gratitude.—*Lute Paper.*

803 cont.

Religious Society, unless it keeps close to the leadings and guidance of the Spirit of Christ, is liable to be drawn out to look at what is going on in the world, thus being off the pure inward watch, and leaving its place of safety and impregnable defence, it, in a very subtle and almost imperceptible manner, becomes more or less affected or influenced by the elements which compose and agitate civil society. Our blessed Redeemer knowing how susceptible we are of wrong impressions, cautions his disciples, "Take heed how ye hear." If human wisdom and judgment are suffered to take the lead, we soon approve of, and are ensnared by plans and projects which have been devised to sustain and perfect the Temple which the Lord in his wisdom and goodness has decreed, shall have no other foundation than the Rock of ages—the immediate and renewed revelation of his own holy Arm. O the loss which our poor Society is continually subjecting itself to in not duly estimating the unspeakable privilege of being permitted to draw near to the fountain of Light and life, and earnestly seeking instruction from Him, the Captain of salvation, that hence we might be put into a capacity of bringing glory to his ever worthy name, and receiving in ourselves the indubitable evidence that we have sincerely endeavored to honor him with our whole substance.—*Jonathan Evans.*

Useless Treasure.—A rich nobleman was once showing a friend a great collection of precious stones, whose value was almost beyond counting. There were diamonds, and pearls, and rubies, and gems from almost every country on the globe, which had been gathered by their possessor with the greatest labor and expense. "And yet," he remarked, "they yield me no income."

His friend replied that he had two stones which cost him about two florins each, yet they yielded him an income of two hundred florins a year.

In much surprise the nobleman desired to see the wonderful stones; when the man led him down to his mill, and pointed to the two toiling gray millstones. They were laboriously crushing the grain into snowy flour for the use of hundreds who depended on its work for their daily bread. Those two dull homely stones did more good in the world, and yielded a larger income, than all the nobleman's jewels. So it is with idle treasure every where.—*Phrenological Journal.*

When Satan whispers ugly things, and would fright my soul from prayer, sometimes on my knees, "with teary face," like the poor Indian, bending low, I seek relief; and though many a time no form of words presents, there seems a spiritual intercession, and a calm succeeds; not always immediately.—*Mary Cupper.*

PENITENCE.

Selected.

Show me myself, O Holy Lord;
Help me to look within,
I will not turn me from the sight
Of all my sin,

Just as it is in Thy pure eyes,
Would I behold my heart—
Bring every hidden spot to light,
Nor shrink the smart;

Open to Thy most searching view,
Each secret thought lies bare;—
Help me to read the record twice,
This is my prayer!

Words that should never pass my lips,
Thoughts that should have no place,
Tempers unchecked, allowed their sway,
These, Lord, I trace.

I promised at Thine altar, Lord,
To fight these foes within,
Yet here Thy Spirit doth record
Unconquered sin!

Saviour! my eyes are blind with tears—
Such bitter, burning tears—
Are these the dregs of sin, retained
So many years?

Not mine the purity of heart
That shall at last see God;
Not mine the following in the steps
The Saviour trod;

Not mine the life I thought to live
When first I took His name;
Mine but the right to weep and grieve
Over my shame!

Yet Lord! I thank Thee for the sight
Thou hast vouchsafed to me,
And humbled to the dust, I shrink
Closer to Thee;

Unworthy, faithless, as it is,
Oh, let my spirit hide
Its weakness and its penitence
In Thy dear side!

And if Thy love will not disown
So frail a heart as mine,
Chasten and cleanse it as Thou wilt,
But keep it Thine!

—N. Y. Observer.

For "The Friend."

Word-Changes.

(Concluded from page 332.)

FLOOD. "Your fathers dwell on the other side of the flood in old time."—*Josh.* xxiv. 2.

In olden times the word *flood* was applied to any stream, not merely to an overflow.

"With these came they, who from the bord'ring flood Of old Ephraim," &c.—*Milton.*

FOLD. "And there shall be one fold and one shepherd."—*John* x. 16. The true rendering of the Greek word is *flock*, not *fold*—"there shall be one flock and one shepherd."—*GOSPEED.* This, wherever it occurs in the Bible, should be written *goodspeed*, as it is in *Gen.* xxiv. 12.

GRACIOUS. "A gracious woman retaineth honor."—*Prov.* xi. 16. In the Bible, *gracious* is sometimes used in the passive sense of *filled* with grace, now generally used in the active sense of *imparting* grace or favor.

His, when we should now use *its*, occurs frequently in the Bible; indeed, *its* does not occur at all in the authorized version, and very sparingly in old writers generally. *His* was the common possessive both of *hit* (it) and of *he*, in Anglo-Saxon.

JOR. "Till heaven and earth pass, one jot or one tittle shall in no wise pass from the law, till all be fulfilled."—*Matt.* v. 18.

Jot is from the Greek name (*jota*) of the

Hebrew letter *jod*, the smallest letter of the Hebrew alphabet, and therefore the most likely to be omitted or overlooked. A *j* was a little curved hook by which some of the Hebrew letters were distinguished.

LEASING. "How long will ye love van, and seek after leasing?"—*Ps.* iv. 2. *Leas* means *lying*, a *falsehood*, from the Anglo-Sax adjective *leas*, *false*. The word is now solete but was in common use in the seventeenth century.

"And all that famed is, as *leavings*, tales and lies."—*Spenser.*

MEAT. With us, *meat* has a much more limited meaning than it had originally. It now means *flesh* meat exclusively; but in early English it has the sense of *victuals* generally. It is noteworthy that in the *meat*-offer spoken of in Deuteronomy there was *not* but flour and oil. The original sense of *meat* is preserved in the phrase "grace before *meat*," that is, before food, or eating.

MINISTER. "And he closed the book; and he gave it again to the minister, and he down."—*Luke* iv. 20.

The general meaning of *minister* is office-servant. But in modern times the term is confined to an officer of the church or a servant of the State. In the seventeenth century it had neither of these meanings, but was used solely to denote the humbler sense of minister as an attendant or servant. In *Josh.* i. 13 Joshua is called Moses' *minister*, while in *Exod.* xxii. 11, the same Hebrew word is translated *servant*. "The wives be *ministers* to their husbands, the children to their parents, and be short, the younger to their elder."—*Mol.* *Utopia.*

NEESING. "By his *neesings* a light did shine."—*Job* xli. 18. *Neesing* is the older form of the word now written *sneezing*.

NEPHEW. "If any widow have children *nephees*, let them learn first to show piety home, and to requite their parents."—*1 Th.* v. 4. In our present use the word *nephees* confined to the son of a brother or of a sister, but formerly it denoted a grandson or other lineal descendant.

"The warts, black moles, spots and freckles of fathers, not appearing at all upon the children's skin, begin afterwards to put forth and show themselves in their *nephees*, to wit the children of their sons and daughters."—*Holland's Plutarch.*

OR. "Before the mountains were brought forth, or even thou hadst formed the earth, is the world."—*Ps.* xc. 2. *Or* in this place is a Saxon *ere* (before), and means *ere*, which is used in place of it in *Ecclesiasticks*. "He know all things ere ever they were created."—*St. Basil.*—*Queen Elizabeth.*

PEEP. "And when they shall say unto you, seek unto them that have familiar spirits, and unto wizards that *peep*, and that mutter, should not a people seek unto their God?"—*Isa.* viii. 19.

The ordinary meaning associated with the word *peep*, is a meaning connected with sight, but *peep* as employed in the above passages a different word, and is now obsolete. The primary signification is to cry like a young bird; afterwards the word was used to denote the shrill whistling sound made by wizards that *peep* and mutter.

"As touching the manner of worshiping, and adoring flashes of lightning, all nations with one accord and conformity do it with

kind of whistling or chirping with the lips."—*Holland's Pliny*.

PREVENT. "I prevented the dawning of the morning."—*Ps. cxix. 147*. The modern sense of the word *prevent* is to hinder. The literal meaning is to come before, to anticipate. This is the signification in the Psalm. "Strawberries watered will prevent and come early."—*Bacon*.

SHROUD. "Behold, the Assyrian was a cedar in Lebanon with fair branches, and with a shadowing shroud."—*Ezek. xxxi. 3*. *Shroud* is obsolete in the sense in which it is here used, of cover, shelter. In an old English lyric poem occur the following lines, in which the word is used with the same meaning as in *Ezekiel*.

"Where like a mounting cedar he should bear
His plumed top aloft into the air;
And let these shrubs sit underneath his shrouds,
Whilst in his arms he doth embrace the clouds."

SILLY, in modern usage has acquired an opprobrious sense which it had not originally; it is derived from an Anglo-Saxon word meaning happy, and its meaning in early English literature is simple, harmless, guileless. The old writers speak, for example, of *silly* sheep, that is harmless sheep; *silly* women, that is a simple, guileless woman.

SINCERE. "As new-born babes desire the sincere milk of the word, that ye may grow thereby."—*1 Pet. ii. 2*.

Sincere is derived from *sine cera*, literally without wax, that is, the pure, clear honey. Hence the primitive meaning of the word is pure, unadulterated, and this is the sense of the word in the above passage. A similar use of *sincere* was common in the literature of the seventeenth century. "But the good, *sincere*, and true nard is known by the lightness, red color, sweet smell, and the taste especially."—*Holland's Pliny*. "There is no *sincere* acid in any animal juice."—*Arbuthnot*.

TALE. "There shall no straw be given you, yet shall ye deliver the tale of bricks."—*Ex. v. 18*. The *tale* is what we could call the tally, the number told off or counted; hence in general a full number. Milton says:

"And every shepherd tells his tale,
Under the hawthorn in the dale."

This does not mean that every shepherd relates his story, but tells or counts his tally, that is counts the number of his sheep. Dryden uses it in the same sense:—

"She takes the tale [count] of all the lambs."

WO WORTH. "How ye, *wo worth* the day."—*Ezek. xxx. 2*. This is an old English idiom, now obsolete. *Wo worth*, means *wo* to be to. *Worth* has no connection with the modern noun *worth*, being derived from the Saxon verb *weorthan*, to be.

To Friends in New Jersey, in America.
Swardmore, the 4th of First mo., 1676.

My dear Friends in New Jersey, and you that go to New Jersey, my desire is that you may all be kept in the fear of God, and that you may have the Lord in your eye, in all your undertakings; for many eyes of other governments or colonies will be upon you; yea, the Indians, to see how you order your lives and conversations. And therefore let your lives, and words, and conversations be as becomes the Gospel, that you may adorn the Truth, and honor the Lord in all your undertakings: let that only be in your eye, and then you will have the Lord's blessing and increase, both in basket and field and

storehouse; and at your lyings down you will feel Him; and your goings forth and comings in. So that you may answer the Light and the Truth in all people, both by your godly lives and conversations; serving the Lord and being valiant for His Truth, with a joyful heart upon the earth, and the glorious Name in whom you have salvation.

And keep up your meetings for worship, and your men and women's meetings for the affairs of Truth, both monthly and quarterly; and after you are settled, you may join together and build a meeting house. And do not strive about outward things; but dwell in the love of God, for that will unite you together, and make you kind and gentle one towards another; and to seek one another's good and welfare; and to be helpful one to another. And let temperance, and patience, and kindness, and brotherly love be exercised among you, so that you may abound in virtue and true humility; living in peace, showing forth the nature of Christianity, that you may all live as a family, and the church of God, holding Christ your heavenly Head, and having Him to exercise his offices among you, and in you. And therefore be not over eager after outward things, but keep above them in the Lord's power and seed, Christ Jesus, that is over all; in whom you have all life, election, and salvation.

And write over yearly from your meetings how you are settled, and how your affairs go on in the Truth, and how your men and women's meetings are settled. And my desires are, that we may hear that you are a good savor to God in those countries; so that the Lord may crown all your actions with His glory. So with my love to all.

GEORGE FOX.

Assyrian Antiquities.

The cases of Assyrian, Babylonian and Aramaean antiquities collected by the late George Smith during his last archeological expedition to the East, which was brought to a fatal end at Aleppo on the 19th of August, are now in course of examination with a view to their being duly registered, ticketed and exhibited to the public gaze. The task is naturally in the hands of G. Smith's successor, William St. Chad Boscawen. The objects are some thousands in number, including at the first glance, not a few of considerable interest and importance. The bulk are of the class known as contract tablets—small baked clay slabs, written on both sides, and recording acts of bargain and sale, duly attested by witnesses, and being very precise dates. Sometimes they are done in duplicate, a second copy of the cuneiform or arrowhead inscription being found inside on splitting the slab. The exact dates upon them are of the utmost importance in settling the chronology, and the ever-growing store of proper names, including those of buyers, sellers and witnesses, is of great philological value. The number of contract tablets already recognized among the new treasures is about 3,000. Of these no fewer than 1,800 were found together and must have formed part of the archives of a single great firm of Babylonian bankers, whose transactions extended over more than a century, since the dates of their vouchers and securities range through the reigns of Nabopolassar, Nebuchadnezzar, Belshazzar, &c., down to those of Cyrus, Darius, Hystaspes and Nihilimabel, who revolted against him. Of more

strictly so-called historical tablets about a score have already turned up.—*British Friend*.

For "The Friend."

Report of the Committee for the Civilization and Improvement of the Indians.

To the Yearly Meeting:—The Committee for the civilization and improvement of the Indians report: The condition of the Boarding School at Tunesassa continues to be satisfactory. It has been attended by an average of 29 scholars during the year, most of whom, as heretofore, were girls.

In a recent letter to the Committee the Superintendent remarks, that under the care of the efficient teacher it "has been all we could reasonably expect." All of the children read and spell, 23 write, 21 study arithmetic, 18 geography, 6 grammar and philosophy, and 20 write letters to their parents or others once a month. Meetings for worship have been regularly held twice a week, and a portion of the Holy Scriptures is daily read in the family with the children collected. The children are also collected every evening for the purpose of hearing read religious or other instructive matter. On these occasions their behavior has generally been commendable, and we feel encouraged on learning that a marked improvement is observable in the general department of the larger girls out of school.

Our friends Aaron P. and Eunice Dewees continue acceptably at the head of the Institution. In the Fourth month last, Louisa Smith succeeded Eliza A. Cheyne as teacher, as referred to in our last Report, and was accompanied on her journey to Tunesassa by Mary Millhouse, also from Iowa, who was about to enter upon the duties of assistant matron.

The latter was in poor health at the time of her arrival, and after an illness of a few days was removed by death, on the 29th of the Fourth month. Under feelings of sympathy for the family at the Boarding School our friend Thomazine Valentine shortly afterwards proceeded thither where she remained for several weeks to the comfort and help of our Friends there. Sina A. Hall, of Barnesville, Ohio, was appointed to fill the vacancy thus occurring, whose services at the Institution began in the Sixth month last. During the last few years, owing to the increased size of the family, the need of an additional helper in the household department has been frequently felt, to meet which, the services of Elizabeth Burgess, a Friend from Painesville, Ohio, have lately been obtained.

While under the fostering influence of the caretakers at the Boarding School, the children not only acquire a valuable amount of school learning, as well as receive instruction in house-keeping, &c., but serious impressions, as we believe, at times made upon their minds, which we trust will not be entirely lost, when they are exposed to the evil example and influences with which they are often surrounded in their own homes. In the report of a Committee who paid a visit to the Institution during the past year, they observe in reference to the children, that their "proper department in the school room and in the family gives reason to hope, that the care bestowed upon them while there, will not be unavailing. In some of the gatherings with the family and children we were favored with an evidence of Heavenly good, which was re-

freshing to our spirits, and should have an animating effect upon those who are concerned to labor for the best welfare of this people."

It is cheering to know from time to time of instances in which the sanctifying power of Divine Grace has been observed in those who have once been under the care of Friends as pupils at the Boarding School; and it may be proper here to refer to the character and recent death of a valuable young woman, a sister of the one alluded to in our Report of last year, who after acquiring an education had been engaged for several years as a teacher among her own people. During her last illness, which was of some months' continuance, her expressions indicated an humble submission to the will of her Heavenly Father, a tender solicitude for the eternal welfare of those by whom she was surrounded, and a peaceful trust that through the love and mercy of her Saviour all in the end would be well. A letter written by her surviving sister, also a seriously minded woman, says, "Her disease was such that she wanted to be kept very quiet, and let nothing excite her, though she dearly loved to have the Quakers see her, and talk with her. She thought a great deal of the Quakers. She seemed to be aware of her situation, and used to say, 'God has arranged these sicknesses and sufferings for our special benefit. He doth not afflict willingly, but to show to us His hand dealing, and to draw us nearer to Him, while we yet stay; to rid ourselves of sin, and to be the better prepared for a home in the mansions above. Look up and pray to our Heavenly Father, Christ Jesus our Lord, He will remove all darkness, and point out our way clear.'"

While the labors of the Friends at Tunesassa are mostly confined to the care of the Boarding School, and the farm; yet opportunities are often improved for visiting the Indians in their own homes upon the Reservation; and it is the desire of the Committee to encourage the exercise of their influence in this way.

Within the past few months, Sarah T. Smith, a Friend from Pennsylv. Ohio, has been recommended by the Committee, and appointed by the Superintendent of Public Schools on the Reservation as teacher of the school located about a mile distant from Friends' property, and arrangements made by which she will board in the family.

By an examination of our Treasurer's account, it appears that there was due him, 3d mo. 1st last, a balance of \$566.04. During the year then closed he had received interest on investments, including one-third of the proceeds of the Estate of John Parrish, \$1,387.26; profits on the sale of city six per cent. loan, \$31.50; which with credits from sales of real estate, and oak timber removed from the land, \$463.35; rent of saw and grist mill, \$25; and apparent gain on the farm account, \$51.21; make together, \$1,958.32. The expenditures have been, for family expenses, \$1,371.15; salaries and travelling expenses of the Friends engaged in the Institution, \$989.43; books, &c., for the school, \$29.35, and for repairs, improvements, &c., \$47.65; making a total of \$2,447.98, and showing a deficiency in the operations of the year of \$489.66. There are securities on hand amounting at their par value to \$14,136.66, which is \$690 less than the amount reported a year ago.

During the last few years portions of the tract at Tunesassa have been sold, and there

remains a balance payable to the Committee in instalments during several successive years of \$2,291 on this account. The number of acres sold are reported last year to be 275, but owing to the failure of one of the purchasers to fulfil his engagements, the total amount thus disposed of is 225 acres. Within two years past the invested funds have been diminished \$1,100; and as the reimbursement of the Treasurer, and the prosecution of the concern as at present conducted will result in a further encroachment upon our principal, the subject is mentioned for the consideration of the Yearly Meeting.

The construction of two important lines of railroad through a considerable portion of the Allegheny Reservation a number of years ago, and the erection of shops and other buildings connected therewith have been followed by the settling of an increasing population of whites upon this Reservation, which in various ways, continues to exert a demoralizing effect upon the Indians. Under feelings of sympathy with them in the various temptations to which they are now exposed, and the difficulties in which they have become involved, the Committee addressed a letter of friendship and counsel to the Indians on both the Allegheny and Cattaraugus Reservations, which was presented to them in the Ninth month last, by some of our number appointed for the purpose. In the report of this sub-committee, after alluding to causes of discouragement which were met with on the Allegheny Reservation, they state that "in all the interviews, feelings of satisfaction were expressed at the continued interest taken by Friends in their improvement and welfare, of which the advice thus communicated to them was a fresh evidence; and in some of the interviews a degree of solemnity was experienced, under which we hope, profitable impressions were made; and we believe the letter and visit have renewed and strengthened the feelings which the Indians have long entertained towards Friends."

By direction and on behalf of the Committee.

GEORGE J. SCATTERGOOD, Clerk.

Philadelphia, Fourth mo. 13th, 1877.

How Kid Gloves are Made.—Gloves have been in use from very early times, being mentioned by such ancient writers as Homer and Xenophon. During the middle ages they were worn by certain officials as a mark of dignity. But as civilization advanced they gradually became common to all classes of the community; and the growing demand is such, that the price of skins have advanced fifty per cent. in the last fifteen years.

The term "kid," however, is a mere technicality, as the quantity consumed annually of leather bearing this name, is largely in excess of what could be supplied from the skins of the young goats that are annually slaughtered, lamb and other thin skins being extensively used. The value of the kid glove manufactured in France is estimated at \$10,000,000, and there are large quantities made in Italy, Germany and England, and a comparatively small amount in this country, at Gloversville, New York city, and in this city.

As the sewing of a single pair of ladies' kid gloves requires five thousand stitches, for which the continental manufacturers pay about ten cents, it can readily be seen that this industry cannot be carried on extensively

in this country. The seams are sewed with perfect regularity by placing the edges to be united in the jaws of a vice, which terminates in fine brass teeth like those of a comb, but only one-twelfth of an inch long, the stitch being held by a knot to prevent ripping, which used to be a frequent source of trouble. It is necessary that the animal should be killed young, because as soon as it begins to feed its herbage its skin is impaired for this purpose. Eggs are very extensively used in preparing the skins; it is estimated that 60,000,000 an annually used in England and France alone. In coloring the kids dye is applied to the outer skin with a brush by hand; if the skin were immersed the inner portion would also receive the dye and stain the hand.

France excels all in the variety and richness of her colors, which is attributed to her atmosphere and water—producing 200 different shades.—*Phila. Ledger.*

For "The Friend."

George Fox, to the Churches,

On the Necessity of Women's Meetings.

Some that professed Truth, and had made a great show thereof, being gone from the simplicity of the Gospel, into jangling, division and a spirit of separation, endeavored to discourage Friends, especially the women, from their godly care and watchfulness in the church over one another in the Truth, opposing their meetings, which in the power of the Lord were set up for that service. Wherefore I was moved of the Lord to write the following epistle, and send it among Friends, for the discovering of that spirit by which those opposers were acted, its way and work by which it wrought and to warn Friends of it, that they might not be betrayed by it. "All my dear Friends, After stating how these opposers were gone from the peaceable spirit of Jesus, he says: "Some of this spirit have said to me, 'Thou see no service for women's meetings.' My answer is, and hath been to such, if they be blind and without sight, they should not oppose others; for none impose anything upon them. God never received the blind for a sacrifice, neither can his people. But Christ has enlightened all; and to as many as receive him, he gives 'power to become the sons of God.' Such as are heirs of his power, and of his gospel, which brings life and immortality to light, can see over him that has darkened those; and all such keep the order of the gospel, the power of God, and their meetings therein which preserves them in life and immortality. These see the great service of men's and women's meetings, in the order of the gospel the power of God; for they are meet-helpers in this power; it is the authority of their meetings. I say, all you that be against men's and women's meetings, who say, 'you see no service for the women's meetings;' and oppose them; you are therein out of the power of God, and his spirit you live not in. For God saw a service for the assemblies of the women in the time of the law, about those things that appertain to his worship and service, and to the holy things of his tabernacle; and they in his spirit see now their service in the Gospel, many things in these meetings being more proper for the women than the men; and they in the power and wisdom of God, may inform the men of such things as are not proper for them; and the men may inform the women of such things as are not proper for them, as meet helps to each other. * * * Therefore all

on that feel the power of God, and your service for God in them, both men and women, keep your meetings in the power of God, the authority of them, as they were settled in it; hence you will be preserved both over this spirit and all opposers them, and over the spirit of the world that opposes your other meetings; for it is all one in the ground, and would bring you into bondage. * * * Stand up for our liberty in the Gospel, and in the faith, which Christ Jesus hath been the author of, if you lose it, and let another spirit get over you, you will not soon regain it. I knew Satan could bestir himself in his instruments, when men's and women's meetings came to be set up in the power, light, and truth, and the heirs of the Gospel to take their possession of it in every country and city, therein to walk, watch over one another, and take care of God's glory and honor, and his precious truth, and to see that all walk in the truth as he comes the Gospel, and to see that nothing was lacking; and so whatsoever was decent, modest, virtuous, lovely, comely, righteous, and of good report to follow after, and to admonish and exhort all that were not faithful, and to rebuke all that did evil. I knew this would give such check to all loose speakers, talkers, and walkers, that there would be an opposition to such meetings. But heed it not: truth will come over them all, and is over them all, and hath must have the victory." How hardened must any be to revoke this order in their own will. S. C.

Orleans Co., N. Y.

For "The Friend."

Agriculture, &c., in Georgia.

In journeying through the Southern States, the author of "The Great South" gives us an impression of things as they fell under his observation. We extract a few passages. "It is not without some little bitterness that a Georgia journalist recently writes: 'A Georgia farmer uses a Northern axe-head and axe to cut up the hickory growing within sight of his door, plows his fields with a Northern plow; digs his cotton with a New England hoe; sows his cotton upon a Boston gin; hoops it with Pennsylvania iron; hauls it to market in a Concord wagon, while the little grain that he raises is cut and prepared for sale with yankee implements. We find the Georgia housewife cooking with an Albany stove; and even the food, especially the luxuries, are imported from the North. Georgia's fair daughters are clothed in yankee muslins and decked in Massachusetts ribbons and Rhode Island jewelry.'"

Throughout the cotton States this statement holds true. In the interior cotton districts of Georgia, there is often a great deal of pecuniary distress, because the condition of the market or the failure of the crop presses sorely on those who have given no care to raise any thing for self-support, and who have staked their all on cotton. Diversified industry would make of Georgia in twenty years, a second New York; for even in her present ill-organized condition, she actually makes great progress. The creation of manufacturing centres like Columbus, Macon, Albany, Thomaston, Augusta, Marietta, Athens and Dalton is encouraging, but much remains to be done. Only about five millions of dollars are invested in the manufacture of cotton and woollen goods in the State as yet, and the grand water power of the Chattahoochee still remains but little employed. Agriculture still

must, therefore, be the main stay of the commonwealth, and the prospect is, on the whole, encouraging.

The present cash value of the farms in Georgia is considerably more than one hundred millions of dollars, and might be doubled by something like systematic and thorough cultivation. The number of small farms is steadily increasing, and the negroes have acquired a good deal of land which, in the cotton sections, they recklessly devote entirely to the staple, with an improvidence and carelessness of the future which is bewildering to the foresighted observer. They are fond of the same pleasures which their late masters give themselves so freely—hunting, fishing and lounging; pastimes which the superb forests, the noble streams, the charming climate, minister to very strongly. In the lower part of the State, in the piney woods and swamps, the inhabitants are indolent, uneducated, complaining and shiftless. They are all of the same stamp as the old woman who explained to a hungry and thirsty traveller that they could not give him any milk, 'because the dog was dead!' Applying his perceptive powers to this singular remark, he discovered that the dog had been went to drive up the cows to be milked at eventide, and that since his death it had not occurred to any of the family to go themselves in search of the kine. People who have plenty of cattle, and might raise the finest beef and mutton, rarely see milk or butter, and wear out their systems with indigestible pork and poor whiskey. Their indolence, ignorance, and remoteness from any well-ordered farming regions, are the excuses for this class of the inhabitants, who are commonly called 'crackers.' These are the sallow and lean people who always feel 'tollable,' but who never feel well; a people of dry fibre and coarse existence, yet not devoid of wit and good sense. The Georgia 'cracker' is eminently shiftless; he seems to fancy that he was born with his hands in his pockets, his back curved, and his slouch hat crowded over his eyes, and does his best to maintain this attitude forever. * * *

Columbus, on the border of Alabama, separated from that State by the Chattahoochee river, which gives it an outlet to the Gulf through Florida, is a lively thriving town, which must one day rival Lowell or Manchester, N. H., because its water power is exceptionally fine. The river, some distance above the city, flows through a rugged and beautiful ravine, where the best building stone is to be had. It is said by competent authorities that along the stream, within two miles of the city, there are sixty sites, each large enough for the establishment of a capacious factory. Columbus impressed me more favorably than any other manufacturing town I had seen in the far South. It lies right at the centre of the cotton belt, is pierced by six important railways, receives about 130,000 bales of cotton yearly, and in the mills of the Columbus Manufacturing and Eagle and Phoenix Companies, employs hundreds of woman and children. The streets are wide and cheery, the shops and stores quite fine; the residences pretty; the little town of Girard, across the river, built by the mill proprietors as a home for their operatives, is charming; there is an aspect of life, and energy, and content in the place, strongly contrasted with the dead and stagnant towns of which I had seen so many. True, there were hosts of idle negroes roost-

ing in shady places about the square, and under the porticoes, but they are found everywhere in the South. The managers of the cotton mills will not employ them in their establishments. When I asked one of the superintendents why not, he smiled quaintly and said: 'Put a negro in one of those rooms with a hundred looms and the noise would put him to sleep.' * * *

The Columbus manufacturers say that a bale of cotton can be manufactured there twenty-two dollars cheaper than in or near Boston, and that their labor is thirty per cent. cheaper, while they are never subject to obstructions from ice. The operatives in the mills were, King thought, evidently saving money, and their houses and gardens were models of neatness and comfort.

Macon is picturesquely perched on a hill, around which a densely wooded country stretches away in all directions. The Ocklawaha river winds between broken and romantic banks, not far from the town; and near it are many Indian mounds and the site of a venerable fort, used during the wars with the Cherokees. The cotton factories, large iron foundries and the railway activity of Macon, give it even a more sprightly appearance than Columbus; but the latter has 15,000 population, while Macon has but 10,000. * * *

The labor question is the important one for Georgia and all the other cotton States to settle. The negro, after he discovers what he loses by allowing himself to be intimidated or talked out of his vote, will learn to respect it, and use it intelligently. The negroes of the State are possessed of no small neatness and power of development, and, wherever there are educational facilities for it, they speedily improve them. The special need of the race is good teachers raised from its own ranks, and the creation of the university at Atlanta for the colored population, was one of the most beneficent works of the American Missionary Society. * * *

The Georgia University at Athens, frequented of course exclusively by whites, is an excellent institution. It was endowed by the Legislature in 1788, but did not begin its sessions until 1801, since which time it has been noted among Southern literary institutions. * * *

The Atlantic coast of Georgia, seen from the deck of an ocean steamer, seems low and uninteresting, but a nearer approach shows luxuriant vegetation and enviable richness of soil. On Cumberland island and all the neighboring islands, the orange grows luxuriantly, and with a return to careful and thorough culture, the sea-island cotton crop there, could be made of immense value. * * *

Sustaining Grace Promised.—God did not take up the three Hebrews out of the furnace of fire, but He came down and walked with them in it. He did not remove Daniel from the den of lions; He sent His angel to close the mouths of the beasts. He did not answer the prayer of Paul to remove the thorn in the flesh, but He gave him a sufficiency of grace to sustain him. * * *

Instructive counsel was given, relative to the care which should be exercised over servants of every denomination; that nothing may exist in our families that can in any way harm them; and that, as much as in us lies, we may encourage them in that which is good.—*M. Copper.*

THE FRIEND.

SIXTH MONTH 9, 1877.

If all those who profess a belief in the Christian religion, were, in their every-day life, living witnesses of its heart-changing, purifying effects; what a powerful influence for good would be excited thereby! Many seeing the good works of these, would glorify our Father who is in Heaven.

But it is too sadly true, that some who take upon them the name of Christ, do not depart from iniquity. Those who know them intimately, find the old root of selfishness still alive and flourishing; and that the conduct of such professors is often governed by impure motives, by their success in business, their ease, pleasures, or self-indulgence, and that such cannot, with sincerity, adopt the language of the blessed Saviour, "My meat is to do the will of Him who sent me, and to finish His work."

These lukewarm professors are not only in great danger of failing to obtain the end for which we were created, but they incur a serious responsibility for the evil influence which they exert on others. When the Lord's Holy Spirit is striving with individuals to bring them to repentance and amendment of life; and they are made sensible that they must surrender their own will, and patiently bear the yoke of Christ; and these look round on such members of the professing church, and find the same untrammelled self-h principles in operation, that they are called on to nail to the cross; how stumbling is the effect! How apt will such individuals be to conclude that the strict and self-denying life they have been called to lead, is surely not of Divine requiring; and that their strong impressions were only the effect of a heated imagination! Thus a stumbling block may be cast before others, and the heavy responsibility be incurred of those who offend one of these "little ones."

In the mercy of our Heavenly Father, we believe however, that every one who has attained to years of understanding has been favored with such a manifestation of Divine Grace, as to leave them without excuse, and that however painful the example of others may have been, it cannot be pleaded before the eye of Infinite purity and justice in extension of known disobedience to His holy will. Unreserved obedience to the visitations of the Lord's Holy Spirit is the only path of safety; and we believe it greatly concerns those who have been made sensible of the operations of the refining Hand upon them, to study to be quiet, and stealthily attend to the work which He who has begotten it in their hearts, is able and willing to carry on there, without unholily regarding the conduct or influence of others.

SUMMARY OF EVENTS.

UNITED STATES.—The steamship City of Brussels, which left New York 4th mo 21st, arrived at Liverpool on the 29th of 5th mo, making a passage of 39 days. Two days after leaving N. York she broke her shaft, and the remainder of the voyage was made under sail. Principal in her cargo was a quantity of fresh meats, for the preservation of which, provision had been made for ten days only; but which proved valuable as food for the passengers.

Accounts of the damage done by the great earthquake

wave along the Pacific coast of South America, state that the towns of Iquique, Arica, Antofagasta, Taubedo-Moro, Pabellon and Ilo, are almost destroyed. Great damage was done at other points along the coasts of Chili and Peru. The Sandwich Islands were also swept by the same wave. Great damage to property, and some loss of life, are reported.

The Department of Agriculture reports that during the last twelve months four millions of swine have perished in this country through disease. The pecuniary loss is estimated at more than \$200,000,000. One fifth of the loss was in the State of Illinois, next in order come the states of Missouri, Iowa, Indiana, Florida, Alabama, Mississippi and Louisiana. A scientific investigation by the government into the cause of these losses, has been requested by many correspondents of the department.

The drought in California during the winter and spring, has had a disastrous effect upon the agricultural interests of that State. The San Francisco *Bulletin* states that a lot of 10,000 sheep were offered a few days since, in one of the southern counties, for five cents a head! There was neither grass nor water, and the sheep were not strong enough to drive any distance. There have been many instances the present year, where owners of large herds of cattle, and flocks of sheep, and flocks of any one who would carry them over until the next season or until grass should come.

In Alabama also the drought is severe—no rain has fallen for several weeks, and the corn and cotton crops are suffering.

The gross value of the Canadian Fisheries, for 1876, was \$1,214,000.

Lieutenant Lawton left Red Cloud agency on the 28th ult. in charge of 972 northern Cheyennes and Arapahoes, who are on their way to their new home in the Indian Territory. They are not expected to reach their destination for sixty days.

The first steam engine manufactured in Florida, is now in operation in Atlantic county in that State.

The public debt statement for Fifth month shows a reduction of \$6,951,274. About \$2,000,000 of this is said to be accounted for by the fact that large sums due to the navy, and for necessary expenses of other departments are unpaid, because not provided for by the appropriation.

The contract for supplying postal cards to the government for the next four years, has been awarded to the American Phototype Company of N. York, at 60.56-109 per thousand. The cards will be similar in style and color to those now in use.

The Pacific Mail Steamship San Francisco, bound from San Francisco to San Francisco, was wrecked on the 16th ult. between Panama and Acapulco; she struck an unknown rock and sunk in less than an hour. The passengers were all saved. The cargo was valued at \$750,000, which with the ship and all the baggage of the passengers is a total loss. It is suggested a probability that the reef on which this vessel struck, was the same upon which the barkentine ship, bound on the Pacific coast, as the captain's log shows that he had repeatedly passed over the same place.

The marine disasters during the 5th month to vessels belonging to, or bound to or from United States ports, numbered 45. The value of the vessels lost, exclusive of their cargo, being estimated at \$1,750,000.

The mean temperature of the Fifth month is given as 61 degrees, the highest on the 18th, 99°; lowest on the 24, 41 degrees. From the 16th to the 21st, the temperature was unusually high—yet the mean is below the average for the past seven years. The number of days on which rain fell 9; total rainfall 1.10 inches, which is much less than is usual for this month. On the nights of the 21st and 25th, there were brilliant displays of the northern aurora. Both displays were quite extensive and powerful in their electrical effects on telegraph lines.

The number of deaths in Philadelphia last week was 271—114 were adults, and 127 children—58.5 mg under one year of age.

The Markets.—The following were the quotations on the 2nd inst. *Philadelphia*, 1877—American gold, 105½; United States \$6, 1881, 115½; 520's, 1865, 110. Flour firm. Sales of Wisconsin extra family at 88; Minnesota do. do., medium and fair at 85.50; choice and fancy, at 87.25. Rye, 60.25. Barley, 59.00. Corn, 59.10; do. do., 59.10 for fancy; and high grade 59.50; Ohio do. do., good, at 59. One bushel paid at 59.25. When in good demand at an advance. Western amber \$1.80, a 81.25, and Penna. southern amber at 82.05, and red at 21.90 a 21.95. Corn continues rather quiet, and prices are unsettled. Sales of Pennsylvania, southern and western yellow at 60 a 61 cts. Oats, 45 a 50 cts.

Average price during the week for prime timothy h, \$1.10 to \$1.20 per 100 pounds. Straw, 60 a 75 cts., 100 pounds.

During the 4th mo. 1877, there were exported 1,401,628 yards of cotton goods of the value of \$1,055,930; and other manufactures of cotton \$144,539—\$1,200,469. Of this 43 per cent, was shipped to the United Kingdom and British possessions.

FOREIGN.—Ex-President Grant arrived in Liverpool on the 28th ult, where a cordial reception was given him.

J. Lathrop Motley, the American historian, died London on the 29th ult. He was a member of a select body of cotton spinners of Oldham have had a meeting at which they decided to call a meeting of the whole trade, to consider the advisability of working on short time, in view of the present depression of the trade.

A special dispatch from Vienna to the *Times* says: "The Palace Clique at Constantinople seems to have renounced all idea of siding. The formation of a council of war is a sign that it has resorted its position in the place. This measure will probably prevent the Sultan's going to the army. The first step the council of war has been to obtain an authorization from the Sultan for the formation of a Hungarian Legion."

It is probable that Russia will only recognize the dependence of Rumania provisionally, so as not to place herself in antagonism with the others Power who are inclined to defer recognition to the close of the war.

The most moderate view taken of the Serbian preparations is, that they are intended to support a declaration of independence to be issued as soon as the Russians cross the Danube.

On the Danube the Russians have at last occupied the chief positions, and their lines extend from Galatz to Kalaft. But the formidable river bars their way, and until the stream returns to its normal summer level it will be perilous, if not impossible to take an army across. The army is said to number 210,000, exclusive of Rumanians or reserves, who amount to 60,000 men.

The 50th anniversary of the elevation of the Pope the Episcopate, was celebrated at Rome on the 31st inst.

The King of Abyssinia has accepted the condition proposed by the British and French, as a precedent to a treaty between Egypt and Abyssinia.

Sophia Frederica Matilda, Queen of Holland, died on the 31st inst, aged 59.

At the banquet of the French Agricultural Society, M. Drouyn de L'Huys, announced that the American Minister, W. H. Hunt, had been elected a member of the Agricultural Society of France in the United States.

WESTTOWN BOARDING SCHOOL.

A State Meeting of the GENERAL COMMITTEE is to be held at WESTTOWN on Fourth-day, the 20th inst. at 9 A. M.

THE COMMITTEE ON ADMISSIONS meet the same day at 7 A. M., and the COMMITTEE ON INSTRUCTION the preceding evening, at 7 o'clock.

THE VISITING COMMITTEE meet at the SCHOOL, Seventh-day evening, the 16th inst.

For the accommodation of the committee, convocations will be at the *Street Road Station* on Seventh a 9th days, the 16th and 19th inst., to meet the train that leave Philadelphia at 2.30 and 4.45 P. M.

Philad., 6th mo, 5th, 1877.

DIED, on the 12th of Sixth mo, 1877, MARGARET BRADSHAW, a member of Block Creek Meeting, Southampton Co., Virginia. Both in health and during long illness, she gave evidence of being a follower of the Lord Jesus, and of her trust in Him. She often spoke of her departure with calmness and without fear, on the evening of the 31st instant. JOHN CARTER, a beloved member and elder of the Monthly Meeting of Friends of Philadelphia, in the 77th year of his age, during his long illness he frequently expressed a entire resignation to the Divine will, and showed a bright example of christian cheerfulness. A few days before his departure, being asked if he felt nearly ready to go to his Father, whom he had so long loved, he replied, "Oh yes, I have been favored with a lively saving faith in Him, which is far better than ever being else, and I fully believe that nothing shall ever be able to separate me from the love of God in Christ Jesus."

PHILADELPHIA.

For "The Friend,"

Thomas Edward—A Scotch Naturalist.

(Continued from page 373.)

Among Thomas Edward's collections was a large variety of insects. "He had these boxed down in boxes in the usual manner, numbered them separately. When he had obtained the proper names of the insects, his intention was to prepare a catalogue. He knew that there were sheets of figures sold for that and similar purposes, but he could not afford to buy them. He accordingly got a lot of old almanacs and multiplication tables, and cut out the numbers. It was a long and tedious process, but at length he completed it.

"When the insects were fixed and numbered, Edward removed the cases into his parlor preparatory to glazing them. He piled them one upon the other, with their faces upward, in order to keep out the dust. There were twenty boxes, containing in all one hundred and sixteen insects. After obtaining the necessary glass, he went into the parlor to fetch out the cases. On lifting up the first case, he found that it had been entirely stripped of its contents. He was greatly horrified. He tried the others. They were all empty! They contained nothing but pins which had held the insects, with here and there a head, a leg, or a wing. A more complete work of destruction had never been witnessed. It had probably been perpetrated by rats or mice.

"His wife, on seeing the empty cases, asked him what he was to do next. 'Weal,' said he, 'it's an awful disappointment; but I think the best thing will be to set to work and fill them up again.' To accumulate these nine hundred and sixteen insects had cost him six years' labor! And they had all been destroyed in a few days, perhaps in a single night!

"Edward duly carried out his purpose. He went moth-hunting as before; he hunted the woods and the fields, the old buildings and the grave-yards, until, in about four more years, he had made another collection of insects; although there were several specimens contained in the former collection that he could never again meet with.

"Edward had now been observing and collecting for about eight years. His accumulations of natural objects had therefore become considerable. By the year 1845, he had prepared nearly two thousand specimens of liv-

ing creatures found in the neighborhood of Banff. About half the number consisted of quadrupeds, birds, reptiles, fishes, crustacea, star-fish, zoophytes, corals, sponges, and other objects. He had also collected an immense number of plants. Some of the specimens were in bottles, but the greater number were in cases with glass fronts. He could not afford to have the cases made by a joiner; so he made the whole of them himself, with the aid of his shoe-maker's knife, a saw, and a hammer.

"In order to make the smaller cases, he bought boxes from the merchants; and in breaking them up, he usually got as many nails as would serve to nail the new cases together. To make the larger cases, he bought wood from the carpenters. He papered the insides, painted the outsides, and glazed the whole of the cases himself. The thirty cases containing his shells were partitioned off each species having a compartment for itself. This was a difficult piece of work, but he got through it successfully. There were about three hundred cases in all."

There was a fair held twice a year at Banff, when the young lads and lasses came in from the country to be hired, and the farmers and their wives came to hire them. On two of these occasions, in 1845 and 1846, Edward exhibited his collection with some success, and was encouraged thereby to remove it to Aberdeen, as a larger city, and there open a permanent exhibition. But this venture proved financially unsuccessful; and he was compelled to sell the labor of years of exposure and earnest labor to obtain the means of paying the debts* he had incurred; and then to fall back upon his old friend—shoemaking—to support his family. The distress of mind which he felt, when he found himself going deeper and deeper in debt, and that there was no hope of the public patronage being sufficient to pay his expenses, for a time almost unsettled his reason. One afternoon he received a letter from his former employer at Banff, telling him that if he did not return immediately to his work, he would be under the necessity of giving his employment to another.

"The afternoon was far advanced. His dinner, which had been brought to him an hour before, still lay untouched. He was pacing up and down the apartment, pondering over his miserable position, when his father entered. Edward was looking so agitated that the old man inquired what ailed him? He said he was going out, and went toward the door, fearing lest his wife or any of his children might appear. His father stepped between him and the door, remonstrating with him, and saying that he was not fit to go out in such a state. But a woman entering attracted his father's attention, and Edward was thus allowed to slip away unobserved.

"Edward rushed down Union Street, on his way to the sands. At first he thought of

going to the Dee at the Craigling; but he thought him that it would be better to go to the sea-shore, where it might be thought his death was accidental. From the time of his leaving the shop in Union Street until about four hours after, when he recovered his senses, his memory remained almost a complete blank. He had a vague idea of crossing the links, and seeing some soldiers at the foot of the Broad-hill. But beyond that he remembered next to nothing. Unlike a dream, of which one remembers some confused ideas, this blank in his mental life was never filled up, and the purpose for which he wandered along the sands left little further impression upon his memory. He remembered, however, the following circumstances:

"He had thrown off his hat, coat and waistcoat before rushing into the sea, when a flock of sanderlings lighted upon the sands near him. They attracted his attention. They were running to and fro, some piping their low, shrill whistle, while others were probing the wet sand with their bills as the waves receded. But among them was another bird, larger and darker, and apparently of different habits from the others. Desirous of knowing something of the nature of this bird, he approached the sanderlings. They rose and flew away. He followed them. They lighted again, and again he observed the birds as before. Away they went, and he after them. At length he was stopped at Doon mouth. When he recovered his consciousness, he was watching the flock of birds flying away to the farther side of the river. He had forgotten all his miseries in his intense love of nature. His ruling passion saved him.

"How long the chase lasted he never could tell. It must have occupied him more than an hour. He found himself divested of his hat, coat, and vest; and he went back to look for them. He had no further desire to carry out the purpose for which he had descended to the sea. His only thought was about the strange bird among the sanderlings: 'What could it be? Perhaps the bird had been his Providence. He tried to think so.'

After his return to Banff, he settled into his old habits, working at his trade, observing birds and animals, and making collections of objects of natural history. He himself explained the secret by which he was able to accomplish so much, when he said to an inquirer, it was "By never losing a single minute, nor any part of a minute, that I could be by any means improve;" and again to a fellow workman, "I squeezed the pith and substance out of every moment to make the most of it; and paxed and drew every farthing out like a piece of india-rubber, until I could neither wax nor draw it any more."

He commenced publishing his observations in the local newspaper, and gradually became known to scientific people as a most accurate observer of the habits of animals, as well as a successful collector. The following account

of the crows on the Scottish coast, is from his pen.

"They are to be found on certain parts of our coast all the year round. Our keepers destroy them whenever the opportunity occurs. I wonder that our fishermen do not destroy them also, as they feed upon a certain crustacean (*Carcinus menas*) which is often used for bait. One would think that the crab's shell would be proof against the crow; but no. He goes aloft with the crab, and lets it fall upon a stone or a rock chosen for the purpose. If it does not break, he seizes it again, goes up higher, lets it fall, and repeats his operation again and again until his object is accomplished. When a convenient stone is once met with, the birds resort to it for a long time. I myself know a pretty high rock that has been used by successive generations of crows for about twenty years.

"Besides being fond of crabs, these carrion crows are fond of fish, and though they are good fishers themselves, they seldom lose an opportunity of assailing the heron when he has made a successful dive. They rush at him immediately, and endeavor to seize his food from him. Early in the summer of 1845, I while loitering about the hills of Boyndie, I observed a heron flying heavily along, as if from the sea—that rich and inexhaustible magazine of nature—and pursued by a carrion crow, followed at some distance by two magpies. They had not proceeded far when two hooded crows made their appearance, and quickly joined their black associate. The heron had by this time got into an open space between two woods, and it would appear that his enemies intended to keep him there until he had satisfied their demands. During the whole time that the affray lasted, or nearly half an hour, they did not suffer him to proceed above a few yards in any way, either backward or forward, his principal movements being in ascending or descending alternately, in order to avoid the assaults of his pursuers. Having chosen their battle-ground, I crept behind a whin-bush, from whence I had an uninterrupted view of the whole affair.

"The maneuvering of the crows with the heron was most admirable. Indeed, their whole mode of procedure had something in it very remarkable. So well did each seem to understand his position, that the one never interfered with the other's point of attack. One, rising higher than the heron, descended upon him like a dart, aiming the blow in general at his head; another at the same time pecked at him sideways and from before; while the third assailed him from beneath and behind. The third crow, which pecked at him from behind, seized hold of the heron's feet, which, being extended at full length backward, formed a very tempting and prominent object for the crow to fix on. This movement had the effect, each time, of turning the heron over, which was the signal for a general outburst of exultation among the three black rogues, manifested by their louder cawings and whimsical gesticulations—no doubt laughing (if crows can laugh) at seeing their opponent turning topsy-turvy in the air, which, from his unwieldy proportions, was rather a comical sight.

"During one of his somers-aunts, the heron disgorged something, but, unfortunately for him, it was not observed by any of the crows. When it fell to the ground, the magpies, which were still chattering about, fell upon it and

devoured it. Finding no relief from what he had dropped, and being still hard pressed, he again disgorged what appeared to be a small fish. This was noticed by one of the hooded crows, who speedily descended, picked it up, and made off with it, leaving his two companions to fight the battle out. The heron, having now got rid of one of his pursuers, determined to fly away in spite of all opposition. But his remaining assailants, either disappointed at the retreat of their comrade, or irritated at the length of the struggle, recommenced their attack with renewed vigor. So artfully did they manage, that they kept the heron completely at bay, and baffled all his endeavors to get away. Wearing at last of the contest, he once more dropped something, which, from its length, seemed to be an eel. On its being observed by his opponents, they quickly followed it. In their descent, they fell a fighting with each other. The consequence was that the eel, falling to the ground, was set upon by the magpies. The crows gave up fighting, descended to the ground, and assailed the magpies. The latter were soon repulsed. Then the crows seized hold of the eel with their bills, and kept pulling at it until eventually it broke in two. Each kept hold of its portion, when they shortly rose up and flew away among the trees. In the meantime, the heron was observed winging his way in the distance; sick at heart, because he had been plundered by thieves, and robbed of the food which he had intended for his family."

(To be concluded.)

An Epistle of True Christian Love, to all Friends, called or reputed Quakers, who profess the True Light.

(Concluded from page 288.)

This ministry of Christ, and his everlasting gospel, whose work is both convincing, converting and edifying, we received in the beginning by degrees, by little and little; it grew in us as we grew in the seed of life eternal, as the Lord was pleased to open the same gradually unto us, and in us. We durst not strive to run into others' gifts; nor to lift up ourselves above our elders in Christ; or to make ourselves equal in the ministry with them, but to keep within our own measures and gifts. And our exercise therein towards others, was in a holy care, and in much fear, and also trembling inwardly; yea, and outwardly many times, that we might not exceed, stretch or strain beyond our own measures, or attainments; or strive to show ourselves equal to those before us in Christ, and more largely gifted in the ministry than we. But every one was careful to keep within the bounds of our own proper gifts and attainments; and herein, under this care, the Lord helped us; blessed us with his power and presence; and gave us increase and success in his blessed work; to our inward comfort and great encouragement; blessed be his glorious name and power for ever.

We knew it to be our concern diligently to wait, and singly attend upon the Lord our God, in humility and fear, that we might have a true sense of the state and condition of meetings, where the Lord ordered us; and that He would open to us a ministry and testimonies, suitable to the states and conditions of the hearers, so that we might perceive and feel where people were prepared and quick of hearing, and where dull of hearing; a door of entrance being opened in the first, as well as a door of utterance towards them; but the

latter being dull of hearing, things were had to be uttered unto them, especially of the mysteries of Christ's kingdom and gospel.

There must be a shaking of the earth, at the heavens also, before people come to a right and clear understanding in the mysteries of Christ's kingdom; and to serve the Lord of God with grace, with reverence and god fear, wherein that kingdom that cannot be shaken, must be received. The false faith, the false hope, the false rests, the false peace, the false joy, must all be shaken and removed, as well as the heavy earthly part in men, ever they come to stability in Christ Jesus and his kingdom, that cannot be shaken or removed.

"Tremble, O earth," O ye inhabitants of the earth, "at the presence of the God Jacob and Israel;" and all ye heavens, (which must be removed) false rests, false peace at joy, set up and formed in the imagination of earthly minds and wills of fallen man and woman, be ye removed, that Christ may be received and exalted, and his kingdom know and set up. The piercing, discerning Word pierceth through dark hearts, minds ardent, to bring men to know their inward states and conditions, secret thoughts, desires and intentions; and this word discovers ar smites, not only at evils manifestly gross; as drunkenness, lewdness, &c., but also at spiritual wickedness in high places; and will work a thorough work of sanctification and salvation in them who in meekness receive and obey the same word.

And, dear friends and brethren, our God being a God of love and peace, a God of order and not of strife or confusion; let his love and peace dwell in your hearts, and therein mix your unity, that love may grow and abound among you; and do all things and service you are called unto, in love; even in the tender peaceable life and spirit of our Lord Jesus Christ; according to those apostolical exhortations: "Let nothing be done through strife or vainglory; but in lowliness of mind, let each esteem others better than themselves, and "Do all things without murmurings and disputings."—Phil. ii. 3, 14. And, "If an man seem to be contentious; we have no such custom, neither the churches of God."—1 Cor. 11. For we know very well, that truth's testimony is against all turbulent, forward, contentious spirits; and such ought not to bear sway, rule, or sit as judges or instructors about truth's affairs, order or discipline in the church; but true judgment and power of God to rule and be set over all.

And seeing truth's testimony, in all the parts and branches thereof, ought, in the testimony of God, to be observed and kept, certainly the payment of just debts in due time, the due performance of covenants, and promises thereof, is no small branch of that testimony, but concerns the very practice of truth, and true religion; and the contrary, namely, refusing the payment of just debts, breaking promise or delaying payment, to the injury and oppression of creditors; this is directly contrary to truth's testimony, and a violation thereof and condemnable in the sight of God and man, as well as covetousness, oppression, extortion, defrauding and over-reaching others.

How can such be esteemed true Christian who are corrupt in their morals? Or, how should they be entrusted with the true and durable riches, who are not just in the manner of this world? Covetousness, which

platory; hastening to be rich; and an eager pursuit after the riches of this world, have led on the ruin of many. Thereby they have been into many hurtful lusts, which drown us in perdition. Therefore stand clear, and keep clear out of all these evils, and all occasions of reproach and scandal, and stand for truth's holy testimony in all things. O! all ye careful so to live in truth and righteousness, as you may leave a good report behind you when you die.

And for the honor of his our testimony, and good reputation of the blessed truth, proposed by us, it greatly concerns all ministers, elders, and overseers in the churches of Christ, not us, to be blameless in their conversations, agreeably to our holy profession. The elders and judges, which Moses set over the people of "Israel, to judge even in the small matters, were required to be able men, such as feared God, men of truth, hating covetousness."—Exod. 18. As "He that ruleth over men must be just, ruling in the fear of God;" Christ's ministers, elders, and overseers in his church, must be "blameless, not greedy, filthy lucre, not covetous," &c. Moreover, that is "A bishop, or overseer, must have a good report of them that are without, lest he fall into reproach, and the snare of the devil." As the holy apostle Paul does more fully set forth the state and qualifications of each; see 1 Tim. iii. 2, 3, 4, 5, 6; and so doth the apostle Peter, 1 Pet. v. 2, 3, 4, 5; see also 1 Cor. xiii. 7, 17.

'Tis the life of Christ Jesus which must each in his ministers and servants; 'tis a righteous, innocent, and unblameable conversation must preach; 'tis such ministers who are therein, who are met to make full proof of their ministry, by witnessing against all that is contrary thereunto. What authority have any to preach against covetousness, vice, immorality and injustice, who are guilty ereof themselves? Surely no divine authority, life or power, when they are conscious to themselves, as being guilty therein. 'Tis truth and righteousness must come over us, and work through all, and prevail; and the Lamb must have the victory; in whose meekness and innocency do you all live and dwell.

And, I beseech all Friends, young and old, in the Lord's sake, and the honor of his glorious name and holy truth, and as holy examples, be diligent and careful in keeping your meetings, which are intended entirely for the worship of the living God, observing the times and seasons thereof.

And as the Lord's power and wisdom have been, and are the authority of your meetings, concerned in the church's affairs; namely, both those of the faithful men, and those of the faithful women; do you all humbly wait to feel the same, and be in subjection to the most blessed power, in the holy spirit of Almighty God; that his holy power and power may sanctify and overshadow all your assemblies, to his praise, and your great consolation, in our Lord Jesus Christ. O! all wait for his wisdom and counsel, who is the Wonderful, counsellor, and keep in his love one toward another; wherein is unity, concord I perceive; and his glory will shine over all among you in all your solemn meetings to his praise, and our great comfort, who hath gathered and settled our meetings, both those of men and women, for his service, in the exercise of true love and charity, and real practice of true

pure religion which the Lord our God hath revealed and called us unto, and appeared to exalt in this day, of his great love and grace extended to us his people, wherein He is making up his jewels; that his Zion, his church, may become the perfection of beauty, and the praise of the whole earth; "for out of Zion, the perfection of beauty hath God shined," and will shine; and glory and dominion be unto our God, and to the Lamb on the Throne, forever and ever.

Let God arise, and his enemies be scattered; let the Lord reign, that the earth may rejoice; let Zion's King reign in righteousness, and prosper. Amen, Amen.—George Whitehead.

For "The Friend."

Ascent of Mount Washington by Rail, and View from its Summit.

We have had permission to copy from the note book of a friend, the following interesting account of his ascent of Mt. Washington and view from its summit, in the summer of 1874.

About 70 passengers were at the station, ready for the ascent, to most of whom this was probably their first trip on this unique railway; and much interest was evinced in the place and surroundings, as if each one felt something important or serious was on hand.

While waiting, a man came down the middle rail on a slide-board, a contrivance like a sled, fitting the rail, and controlled by lever-brakes. With this machine workmen and messengers slip down from the summit in six minutes. One passage is said to have been made in 58 seconds, which being at the rate of 180 miles an hour, the statement had better be accepted at a discount, or with a mental suggestion that perhaps some mistake was made in the timing.

The car moved up to the platform, pushed by the 'Cloud,' which was to take us up, very tall, but not long locomotive, with a very forward pitch to it, so that it could only stand straight when it stood on a slant, and the seats of the car were so that we sloped backwards when we were on a level. We crowded in, in great haste—American fashion—to get the best seats. There were seats for 44, and those that were left out took the car that immediately followed, as only one car goes to an engine.

The engine started with the clatter, clatter of its safety ratchet, and the puff, puff, of its steam; and we commenced rising. Some of the passengers were a little anxious, and therefore only about half prepared for enjoyment; others guessed that it was all right, and that they might as well enjoy it; some reflected that as hundreds of trips had been made in safety, there was hope for this; and probably some were entirely easy, belonging to the class who through ignorance have no fears. Whatever may have been the various hopes and fears, our 'Cloud' went on puffing and pulling, and we went on rising and rising.

Now we were overlooking the station, saw down the valley of the Ammonoosuck, saw the Fabyan House, saw far past it, farther and farther, as still we went on rising. Here we passed workmen cutting wood for fuel: here we went through a little settlement where they probably lived; then we overlooked both men and village.

Now we looked up the road before us and saw what seemed the top of the hill, but found

in a few minutes it was but a change to an easier grade. Now looking out the windows, we saw our road sloping steeply below us,—saw that we were leaving lower things lower and lower, and that still we went on rising and rising.

Then we came to a water station, and half the men got out, and half of them dropped down to look under the car, only to get up no wiser than before: then we looked at the engine and thought what a great contrivance it was: then we looked around till the conductor said 'all aboard,' and then we all went back to our seats.

Now the engine went on puffing and puffing again, and we went on too: saw the roads below go into threads; saw the houses go into spots; saw tall trees go into scrubs. Now we rose and went up the hill of our car and looked at the road above us; then we went down the hill and looked out the lower door at the road below us. Now we talked to each other of the things we saw; and now in the profoundest admiration the human mind can express, we kept silence, as in this most wondrous ride we still kept on rising and rising.

Then we came to another water tank, and some of us again got out, looked at the engine, looked at the water tank, looked at the water pipe, and looked at the scenery, and then got in again.

Now the engine went to puffing and puffing again, and we went to looking and looking again; saw the bluffs which erst were mountains above us, become little hills below us; saw that the points which seemed like the top, only gave us a view of points higher and higher up; saw the peaks as they lowered around us, open up new valleys and peaks beyond them; and saw that still we went on rising and rising.

Now we were on the high trestle work of 'Jacob's Ladder,' down which we looked and saw what a fearful place it was. Now we were past the tall trees, past the scrub trees, past all soil for them to grow in; rocks, only rocks; rocks below us, rocks on either side, nothing but rocks above us; and still we went on rising and rising.

Now we commenced the last curve and passed the memorial of poor Lizzie Bourne; we were ascending the last grade, our horizon was fast becoming the whole circle, and we were there. And what a relief it was to get there, at the end of that ride of an hour and a half; at the end of that rail of three miles in length, at the top of that three thousand six hundred and twenty-five feet of grade; at the height of six thousand two hundred and eighty-five feet above the sea. Hearts that had beat with anxiety, beat slower; backs that had grown weary with suspense, were relieved; nerves that were stretched by excitement, were relaxed; minds that were taxed to grasp the changing scenes were eased.

And what did we see when we were there? It was a prospect magnificent indeed, such as this country nowhere else affords east of the Mississippi.

There was the Glen House at our feet, reposing on its beautiful lawn of green; and off beyond lay the valley of Androscooggin; and still farther Umbagog Lake. Sweeping around was Sebago Lake in the sunlight; and then Lake Ossipee, and then Kearsarge Mountain, with lesser mountains intervening, and next Ellis River Valley stretching to the

Valley of the Saco, with Conway and its pretty pond.

Now Lake Winnipisogee is seen hiding behind the distant hills, which more than half conceal it; and then Mount Crawford, and Mount Webster, and next the Notch; and here is Mount Willard—big among the hills, but little among the giants—just peeping its head up high enough for us to see it; and then Mount Lafayette, peering high among its peers.

Passing on we reach the Ammonoosuck again; then rest on Israel River, as it winds its way to the beautiful valley of the Connecticut, and here we come to those great mountains, older far, ages on ages, than the poor mortal statesmen whose names they bear; and, reaching our place of beginning, we have thus encircled this glorious panorama.

We did not see all these details and comprehend them at once; they required hours of our sojourn. We made a general survey on arrival, from the plank walks and from out upon the rocks, and then went in for dinner and for rest.

The house is well kept and provided, and steam pipes warm all the rooms, chambers and halls, so that a visit on the mountain may be made in comfort.

In the afternoon we studied the scenery section by section. The day was very fine, not absolutely clear, but said to be much more so than the average. We should have been glad to have seen Portland and the ocean, but contented ourselves with what we did see.

Last week the weather was cold, 28° in the morning, but this week it was milder. One observation I made of the thermometer at the eud of the house was 116°, but that was in the sun; the air was 44° to 50° morning and evening, and both pleasantly warm and pleasantly cool through the day. Sounds seem more distinct at this elevation. We heard conversations at a distance much more distinctly than at lower levels. The air is fine and pleasant, but we had no particular sensation of rarefaction.

The appearance of the signal service observers argues well for the healthfulness of their location, as heartier looking men are seldom seen. They said their winter was 83 to 9 months long, and they have had the mercury as low as 43° below zero. They go down once or twice a week in winter, on the rail track, when available, and using snow shoes when necessary. Sometimes a friend or adventurous visitor comes up to see them, and is received with a welcome.

The rocks of the summit are hard and peculiarly sharp on the flat surfaces, owing to the softer parts having yielded to the elements, leaving the harder in relief. We saw no pebbles or rounded stones on the mountains.

About the house is a large plank platform, and also around the observatory, with a connecting footway, all greatly to the convenience of visitors and their shoes, as going out upon the rocks may be nearly avoided.

The old Tip Top House is left standing with its sides of piled up stones, capped with the peaked frame roof, tied on with chains anchored in the rocks. The house does not seem to be used at present, it doubtless was a welcome haven to weary pilgrims up this hill of difficulty, and to sojourners on this delectable mountain, in years that are past; but it is not sought after now, when bed and board can be had in so superior a successor. All the build-

ings on the mountain are anchored with rods or chains; else they would be in danger of precipitate and precipitous flight, when the wind blows at 100 miles an hour.

The afternoon wore away as we occupied ourselves with our magnificent sight-seeing from the different positions around the summit, until the sun approached the western horizon. There were some clouds above it, and just enough intervening to diminish its brightness to a ball of red light of an exactly defined circle upon which we could steadily gaze. We commenced particularly watching this beautiful feature of our mountain feast about an hour before its disappearance. Slowly it came down its pathway—slowly, steady, surely.

The visitors came out from the house to enjoy the views and the changing colors of the clouds lit up by the gorgeous rays on the under side. As the great orb approached the top of the mountain behind which it was setting, it was a time of mental excitement, though so calm and beautiful a scene. Quietly, at length, it gently touched the ridge, but yet so distinctly that we knew when it touched to a second. Slowly it descended, but oh! so surely. It was going down as if melting behind the mountain,—fading away as if we never again might see it—descending like the last, gentle ebbing of a closing life,—passing away like a spirit departing forevermore. A bright gleam of light was the last we saw, and in an instant it was gone.

A large number of travellers came up in the evening by the train, also by the stage from the Glen House, filling up the house pretty well. After supper the guests mostly watched the rising of the moon, as it slowly but steadily and grandly came up from behind a ridge. The air was not clear, but the moon was distinctly defined, and of a bright red, and made a beautiful scene; but a cloud soon shut it out from view.

Sympathy with Children.

Selected.

There can be no doubt that the most effectual way of securing the confidence and love of children, and of acquiring an ascendancy over them, is by sympathizing with them in their child-like hopes and fears, and joys and sorrows—in their ideas, their fancies, and even in their caprices, in all cases where duty is not concerned. Indeed, the more child like, that is, the more peculiar to the children themselves, the feelings are that we enter into with them, the closer is the bond of kindness and affection that is formed.

But the sympathy which we thus express with them, in order to be effectual, must be sincere and genuine, and not pretended. We must renew our own childish ideas and imaginations, and become for the moment, in feeling, one with them, so that the interest which we express in what they are saying or doing may be real, and not merely assumed. They seem to have a natural instinct to distinguish between an honest and actual sharing of their thoughts and emotions, and all mere concession and pretense, however adroitly it may be disguised.

Sympathizing with children in their own pleasures and enjoyments, however childish they may seem to us when we do not regard them, as it were, with children's eyes, is, perhaps, the most powerful of all the means at our command for gaining a powerful ascend-

ency over them. This will lead us not to interfere with their own plans and ideas, but be willing that they should be happy in the own way. In respect to their duties, too, connected, for example, with their studies, their serious employments, and their compliance with directions of any kind emanating from superior authority, of course their will must be under absolute subjection to that of those who are older and wiser than they. But in all such things they must bring their thoughts and actions into accord with ours. In the things they must come to us, not we to them. But in every thing that relates to their child-like pleasures and joys, their modes of recreation and amusement, their playful explorations of the mysteries of things, and the various novelties around them in the strange world into which they find themselves ushered—in all these things we must not attempt to bring them to us, but must go to them. In this, their own sphere, the more perfectly they are at liberty, the better; and if we join them in it at all, we must do so by bringing our ideas and wishes into accord with theirs.

There is a certain sense in which we should feel a sympathy with children in the wrong that they do. It would seem paradoxical to say that in any sense there should be sympathy with sin, and yet there is a sense in which this is true, though perhaps, strictly speaking, it is sympathy with the trial and temptation which led to the sin, rather than with the act of transgression itself. It is certain that the most successful efforts that have been made by philanthropists for reaching the hearts and reforming the conduct of criminals and malefactors have been prompted by a feeling of compassion for them, not merely for the sorrows and sufferings which they have brought upon themselves by their wrong doing, but for the mental conflicts which the endured, the fierce impulses of appetite an passion under the onset of which their feeble moral sense, never really brought into a condition of health and vigor, was overborne.

This principle is eminently true in its application to children. They need the influence of a kind and considerate sympathy, when they have done wrong, more, perhaps than at any other time; and the effects of this proper manifestation of this sympathy on the part of the mother will, perhaps, be greater and more salutary in this case than in any other. Of course the sympathy must be of the right kind, and must be expressed in the right way, so as not to allow the tenderness or compassion for the wrong-doer to be mistaken for approval or justification of the wrong.

The mother may sympathize with her boy in his troubles, appreciate fully the force of the circumstances which led him into the wrong, and help to soothe and calm his agitation, and place herself closely to him in respect to his suffering, without committing herself at all in regard to the original cause of it; and then, at a subsequent time, when the tumult of his soul has subsided, she can if she thinks best, far more easily and effectually lead him to see wherein he was wrong.—*Jacob Abbott.*

Weakness of Old Age.—Men of age object too much, consult too long, and adventure too little, repent too soon, and seldom drive business home to the full period, but content themselves with a mediocrity of success.—*Lord Bacon.*

For "The Friend."

Employment of Time.

Passing down the stream of time, day follows day, week follows week, month follows month and even year succeeds to year, with rapidity almost beyond our comprehension. We spend our years as a tale that is told. The daily changes to which we are subjected seem so small, that we are in danger of perceiving their final importance. But if we compare our situation to-day, with the surroundings of a year ago, the difference is ever clearly seen. If we go back five or ten years further, the change will be still more strongly marked. In the language of Young:

"To-day is so like yesterday, it cheats;
We take the lying sister for the same.
Life glides away, Lorenzo! like a brook;
For ever changing, unperceived the change."

And in the retrospect of the years that are past, cannot many of us realize that objects and pursuits which have occupied much of our time and attention, were not of such importance but that we might have been far more profitably employed? Not that the end as well as body does not need rest and relaxation from the every-day duties of life. But a danger lies in allowing ourselves to be much absorbed in those things which are not essential to the great objects of life; or in that we may become too eager to acquire means of gratifying ourselves and those we love, in those things which perish with using. The last of these tends to engender that fulness which Agar prayed might be given him, lest he should be tempted to deny and say, "who is the Lord?"

How many that we have known during our lives, have already been called to their final reckoning! Neither age, nor sex, nor length, has been spared by the undeniable messenger; the companions of our school-days, those whom we have loved in the social circle, those with whom we have had business relations, and those whom we have honored the church. Some have lingered on beds languishing, and some have been suddenly and unexpectedly cut down! The places that we know them among us, shall know them more again forever. As these recollections are brought before the mind, we must be members indeed, if we are not made to realize the awful uncertainty of our own conical existence in this life.

Well, if we are made sensible that we have spent the precious time allotted us, or misdirected our energies, we may be encouraged remembering that we have a compassionate High Priest, who is "touched with a feeling of our infirmities," having been "in all points tempted like as we are, yet without sin," and the apostle James says, "If any of you lack wisdom, let him ask of God, that giveth all men liberally, and upbraideth not; and shall be given him." The avenues of usefulness are many, by which, keeping always in mind the cultivation of the vineyards of our own hearts first, we may be made helpful to our fellow men, and instrumental in promoting the spread of the kingdom of our blessed Lord and Saviour Jesus Christ. Speaking a word in the season, visiting the sick and afflicted, either in person or by letter, aiding the poor, distributing the Scriptures of Truth, and other religious and moral publications, are some of the ways of an acknowledgment of Him before men. And may not some who have had talents bestowed upon

them, find profit and satisfaction in contributing from time to time, to the columns of this Journal?

Philadelphia, 6th mo. 11th, 1877.

Soletd.

HYMN OF THE DUNKEES.

KLOSTER KEDAR, EPHRAATA, PENNSYLVANIA, 1738.

Wake, sisters, wake! the day-star shines;
Above Ephrata's eastern pines
The dawn is breaking, cool and calm.
Wake, sisters, wake to prayer and psalm!

Praised be the Lord for shade and light,
For toil by day, for rest by night!
Praised be his name who deigns to bless
Our Kedar of the wilderness!

Our refuge when the spoiler's hand
Was heavy on our native land;
And freedom, to her children due,
The wolf and vulture only knew.

We praised him when to prison led,
We owned him when the stake blazed red;
We knew, whatever might befall,
His love and power were over all.

He heard our prayers, with outstretched arm;
He led us forth from cruel harm;
Still, whoso'er our steps were bent,
His cloud and fire before us went.

The watch of faith and prayer he set;
We kept it then, we keep it yet;
At midnight, crow of cock or noon,
He cometh sure, he cometh soon.

He comes to chasten, not destroy,
To purge the earth from sin's alloy.
At last, at last, shall all confess
His mercy as his righteousness.

The dead shall live, the sick be whole,
The scarlet sin be white as wool;
No discord mar below, above,
The music of eternal love!

Sound, welcome trumpet, the last alarm!
Lord God of hosts, make bare thine arm,
Fulfill this our long desire,
Make sweet and clean the world with fire!

Sweep, fluting bosom, sweep from sight
The lies of time; be swift to smite,
Sharp sword of God, all idols down,
Genevan creed and Roman crown.

Quake, earth, through all thy zones, till all
The lines of pride and priestcraft fall;
And lift thou up in place of them
The gates of pearl, Jerusalem!

Lo! rising from baptismal flame,
Transfigured, glorions, yet the same,
Within the heavenly cities bound
Our Kloster Kedar shall be found.

He cometh soon! at dawn or noon,
Or set of sun, he cometh soon,
Our prayers shall meet him on his way;
Wake, sisters, wake! arise and pray!

* J. G. Whittier, in *Atlantic Monthly*.

Material for Paper.—Now that paper has been introduced for houses and car wheels, boxes and furniture and dress, and legitimately employed to an extent which almost defies computation, it has become a serious question how the demand can be met. After exhausting rags and experimenting with straw and poplar wood one of our Philadelphia firms has reached out to San Francisco and commenced to gather and manufacture the desert palm—*quercus tracois*; and some fifty thousand pounds of this, converted to a pulp, has just been received here. There is a tract of not less than forty thousand square miles, occupying the Mohave Desert, from Tehachapi to the Colorado, which has forests of this tree; and it is found in other regions and in all the

alkali districts where the annual rainfall does not exceed a few inches. The tree averages about fifteen feet in height, and the whole body is fibrous and suitable for pulp. Machinery has been erected for pulping; and the pulp is manufactured there and shipped hither by the Central and Union Pacific Roads. If its applicability equals the expectations based on experiment, a very fine white paper will soon be furnished at a low price, and the consumption of paper now checked by cost and inferior qualities, will become greater than ever. Then it may be that other uses will be found for it; and that the paper trade, great as it has grown to be, will grow still more rapidly than it has ever done. The palm seems to meet a want which has not been satisfied by many experiments.—*North American*.

Sol. ed.

Hints for the Sick Room.

When a woman thinks of making deliberate choice of the profession of a sick-nurse, she can, of course, take into careful consideration if her character and temperament are or are not suited for so arduous and trying an avocation. If she is a person of excitable nature, and possessed of but little self-control, she can be wisely counseled to give up the idea of a life for which she is so thoroughly unfit; but no peculiarities of character or temperament can exempt a woman from being called upon by the plain voice of duty, at one time or other of her life, to take her stand by the bedside of one dear to her, and soothe as best she may a many a weary hour of restlessness and pain.

Very few, indeed, are the women who escape this rule—most have to take upon themselves the burden of attendance in a sick-room—and perhaps there are few subjects upon which the generality of women are so well-intentioned, and yet so ignorant. With the very best and kindest meaning in the world, attention bestowed upon a suffering person may be productive of more discomfort than comfort to the patient, and endless annoyance to the physician, just because the zealous, but alas! untrained and undisciplined volunteer does everything the wrong way.

Again, from a mistaken and unreal idea of true delicacy and refinement, many women shrink from ever seeing or learning anything about suffering or sorrow; and so, when the inevitable fate brings the sights and sounds of pain, the dreadful realities of death, cruelly home to them, they are paralyzed by terror, and useless, nay, worse than useless to those most dear to them. Let all true women train themselves to possess self-control, calmness, and patient courage; let them strive to acquire a certain amount of knowledge of the cares and duties of the sick-room; let them not shrink from hearing the details of this or that form of suffering and disease, and gladly and readily offer help (when they rightly and safely can) outside the bounds of their own immediate home circle.

Taking it for granted that there are many who will gladly take a few plain and practical hints on this subject, I shall condense the result of a somewhat long and wide experience into a short space.

And, first: It is of things which of themselves appear trifling, and even insignificant, that the comfort of a sick-room is made or marred. For instance, an energetic and ami-

ably-intentioned person places a cold pillow beneath the shoulders of a patient suffering from pneumonia, that is, inflammation of the lungs; a fit of coughing, perhaps a restless night, is the result. Five minutes' warming of the pillow at the fire would have prevented all this mischief, and even conduced to sleep.

Dress, again, is a matter of great importance in a sick-room. The best is plain black—for the simple reason that no stain shows upon it—an old silk is most economical, but silk rustles, and is therefore objectionable. Black luster is very serviceable—not made long enough to trail, upset chairs, and get under the doctor's feet; and not having hanging sleeves, but fitting close and neat at the wrist. A habit of moving quietly about the room, and yet not treading "on tip toe" and making every board in the floor creak its loudest, is also very advisable; and nothing can be better by way of foot-gear than those soft, warm felt boots now so common; they both keep the nurse's feet from becoming cold, and make the least possible sound in moving about. Of course the manner of speaking in a sick-room is all-important. Oh, the horror of that dreadful *whisper*, which penetrates to the inmost recesses of the room, and wakes the sleeping patient as surely as the banging of a door!

In some of the most severe diseases, such as cholera and diphtheria, the patient is often *intensely* conscious of all that is passing around him. The wish to know everything that is said and done is extreme, and nothing excites a patient so much as anything like whispering and mystery. The natural voice only so much lowered as to be perfectly distinct, is, then, the proper tone for a sick-room. If silence is needed, let it be complete, and no whispering permitted either in the room, or, worse still, outside the door.

And now I must say a few words on a most important subject. In any case where operative surgery is necessary, it cannot be too strongly insisted upon that no one shall remain present whose calmness and self-control are not a certainty. I remember well a delicate and difficult operation having to be performed—not a painful one, but where success mainly depended on the perfect stillness of the patient. Scarcely had the first slight incision been made, when the room resounded with the moans and cries, not of the sufferer, but the friend who had kindly come to support her through the ordeal! With many a sob, and choke, and gurgle, the friend was assisted from the room, and then all went well enough; but great delay, and much increase of nervousness on the part of the patient, naturally resulted.

One of the many very eminent surgeons of whom America can boast once told me that on the occasion of performing a most formidable operation, in which promptitude was a vital necessity, he saw, at a moment when seconds were precious, a friend, who had insisted on remaining present, suddenly turn deadly pale, and fall fainting on the floor, in unaccountably close proximity to the chloroformed patient. Dr. B.—stooped down, and quietly rolled the insensible individual into a corner of the room, where he enjoyed undisturbed repose until such time as some one had time to bring him to.

Thus it may be seen that any one who is in the least nervous, and cannot be certain of his own powers of self-command, acts with truer kindness in remaining absent from such scenes, than by becoming an added source of

anxiety, where there is so much already of the gravest character. If, however, a woman has the moral courage to face such trials calmly, and without flurry—if she can do simply what she is told, and *nothing more*—wholly dismiss herself from her own mind, concentrating all her attention on the patient, she may be of untold help and comfort. On the other hand, a sick-nurse who asks the doctor endless questions—who presumes in her ignorance to criticise his treatment—who is spasmodic in her sympathy, and ejaculatory in her lamentations, is pestilent in a sick room, and should, if possible, be got rid of at any cost.

There is, however, one kind of nervousness which I do not think meets with sufficient consideration, and that is the unconquerable fear which you will find some people have of any disease that is infectious. Now, I think this sort of fear is far more constitutional than mental, and it appears to me most uncharitable to speak of those who are thus nervous by temperament as "so frightened," &c. If any one has a great dread of infection, he is far better away from the chance of it. If I heard a person express a great and overpowering dread of small-pox, cholera, fever, or diphtheria, I should do all in my power to prevent that person going near any case of the kind, because I should be morally certain of the result. As a rule, I believe that those who are perfectly fearless are comparatively safe; and there is no truer test of perfect freedom from nervous dread than the fact of being able to sleep at once, quietly and naturally, and without the mind being obliged to dwell upon the work of the day. The best cholera nurse I ever saw used to tell me that she often sat down in the corner of a room, on the floor, and "slept right off" for half an hour at a time, either day or night, just as such opportunity presented itself. But of course there are exceptions to all rules; and one of the most devoted and the most fearless in attendance on the sick, during a terrible epidemic, died just when the worst of the battle seemed over.

When active personal care of a sick person is undertaken, the finger-nails should be kept very short. I have seen a long nail tear open a blister, and expose a raw surface, causing great pain. For the same reason, all removable rings should be taken off; and any ornaments that hang loose and make a jingling noise are best dispensed with, as they irritate and annoy a sensitive patient.

It seems to me that this very unpretending paper will be hardly complete without a few words as to the diet that is best for any one acting as sick-nurse in a long and trying case.

One great point is, to let no silly notions of sentiment prevent you making a practice of taking substantial and regular meals; and when you have to sit up all night, be sure and have food at hand, and never go more than three hours without eating. Now, I am going to say what I know many will highly disapprove of, and it is this: when you are nursing a long and anxious case, and you want to be able to "stay" to the end, *avoid all stimulants*. There is nothing you can do such hard work upon, there is nothing that will support you in long-continued watching and fatigue, like good, well-made coffee. Stimulants only give a temporary excitement, that passes itself off as strength. They injure that clearness of thought, that perfect quietude and recollectiveness which are so essential to the

good sick-nurse; and they tend more to anything else to a miserable breaking down afterward.—*Chambers's Journal.*

For "The Friend"

James Emlen.

Conspicuous, among other Christian attainments of this dear departed Friend, was *Christian courtesy*. How much would it add to the sum of human happiness if it were more generally observed. Some, without perhaps being conscious of it themselves, have insensibly drifted into a sort of hostile feeling towards all with whom they are obliged to have intercourse. We go into their presence feeling as though we scarcely know how to address them without receiving a rebuff of some shape; every word or observation almost has to be watched and carefully weighed before being uttered, lest an inadvertent expression should be misconstrued, a meaning applied not intended, and the innocent author turned into a subject of ridicule. How very opposite to this, was social intercourse with the beloved Friend whose name stands at the head of this article. How gentle was his manners, how careful not to hurt the wine of the oil in any. Cheerful yet watchful—a true Christian dignity marking his demeanor to such a degree that we met him with pleasure, and parted from him with regret.

* * * "Affectionate in look,
And tender in address, as well becomes
A messenger of grace to guilty man;
Of manners sweet, as virtue always wears."

And what he attained to, is still within the reach of all. The Power that made him what he was, is as able and willing to work in or through us of the present day, as it was the Friend who frequently thought upon the theme, accompanied by the desire, that fit above the attainment of any earthly object should be our earnest endeavor to obtain the ornament of a meek and quiet spirit, which is in the sight of God of great price, and to fulfil the further exhortation of the apostle Peter, "Finally, be ye all of one mind, having compassion one of another, love as brethren be pitiful, be courteous."

Solicited

Midnight off the Coast of Norway.

The sun was still hanging in the heavens and very slowly descending toward the horizon, but passing to the north much more rapidly. I held my watch as the minute hand slowly passed the dots upon the dial, and approached the point which should denote the close of the present day and mark the beginning of another. Slower and slower the sun seemed to move, until finally he looked as though hung in heaven at a stationary point, when he appeared to rest before commencing his ascending course on a new day's journey. For two minutes or more he paused, and was unable to detect any movement in his course. In that space the last minute of the day was passed. Slowly the sun began to ascend the heavens, and apparently with a accelerated motion, giving his light to cheer the new born day. He shone just as brightly as his lowest point as before or after. He gave a sickly light at best, which lacked the fervor of the light he gives in lower latitudes. He stopped in his descending course when about one-sixth the distance from the zenith to the horizon remained to reach the water of the ocean.

For a stranger to such scenes to watch that prime moment was full of intense excitement, and I scarcely heard the shouts of triumph by the ladies, whose ambition was to catch a fish at the moment of midnight, and within a minute of that moment all three were hauling in their lines, and it became a struggle who should land the struggling victim first, all shouting in joyous exultation at the exciting sport. I was too absorbed with the natural phenomenon to enter into the spirit of their contest. For the time, at least, the enthusiasm of the sportsman was lost, inspired by nature's wondrous works so strangely related before me. As the sun travelled on his journey he gradually lost his unwonted interest, and I again thought of the fishing which was actively going on around me.

Soon all were pretty thoroughly wet, and a cool breeze coming in from the north began to make us feel chilly, so the lines were taken in and we set our faces for home, [they were at Hammersteijn,] which we reached before one o'clock.

The score was twenty-one codfish, and the merchant complained that the fish were obstinate and would not bite, and he felt he had given us the worth of our money; but as a charge was but one dollar, I confess I was quite satisfied with the investment.

You may suppose it was now time to get to bed, and so should we have thought, no doubt, had it been dark, but as it was full daylight all the time, and as the people in the hotel were still up and active, we ordered one of our fish cooked at once, and our friend dined to dinner with us.

The quicker a fish is cooked after it leaves the water the better it is, and as these were fresh and well cooked and the excursion the cool bracing air upon the water had given us good appetites, we enjoyed this midnight dinner most charmingly. By three o'clock we got to bed, and with the aid of blankets to darken the room got a good sound sleep for several hours.

For "The Friend."

History of the United States of America, including some important facts, mostly omitted in the smaller histories, designed for general reading and for Academies. By Josiah W. Leeds, Philada., J. B. Lippincott & Co. 1877. pp. 468.

This history is a work of much merit, and it is to be hoped, have a wide circulation. It is unlike any historical compend that has been published, for it is a survey of the whole field of our annals, from the standpoint of Christian doctrine, which inculcates peace, truth and goodwill to man. In narrating the wars in which our country has been engaged, it is very careful not to foster a warlike spirit; it treats of the Indians as becomes a Christian philanthropist; it advocates the cause of temperance; it gives a fair sketch of the anti-slavery agitation; it speaks boldly and calmly of the errors of our national policy, long subservient to the ambition of the South; and it does not shrink from condemning the course of the southern leaders whose termination to risk all rather than endanger their supremacy in the Union, plunged the country into civil war.

The need of a book of this kind has long been felt by all who conscientiously believe in Christianity to be the gospel of peace, and to cannot do anything to counteract its pre-

cepts. We have no hesitation in recommending it to the notice of our Friends, and in urging them to adopt it generally as a school-book and as a reading book for our young people.

What can there be so essentially important, as the true knowledge of our faithful Creator, and of Jesus Christ whom He has sent to reveal the way of eternal salvation? How can rational beings with immortal souls live carelessly, unconcerned, as it were, upon a subject so important? Cherish the living spark, the good seed in thy heart, and thou wilt find growing fruit to the praise of the good Husbandman, and thy own unspeakable peace.—*Mary Capper.*

For "The Friend."

Preservation of Wheat.

The scriptural account of the Egyptians being fed for seven years by Joseph, during the famine, is illustrated by the habits of the people to this day. In a recent lecture given in London on Morocco, it was stated that in all parts of the country they adopt a peculiar and very effective plan for preserving cereals by digging great holes in the ground which they seal up hermetically with lime and other material, and wheat thus garnered will remain in order for twenty and even thirty years.

THE FRIEND.

SIXTH MONTH 16, 1877.

Although most of the several States of the Union have made and continue to make commendable efforts for the diffusion of literary education among all classes of their citizens, yet the percentage of those who can neither read nor write is large, more especially in the Southern section of our country. According to the census of 1870 there were then not far from five millions of the population, over ten years of age who could not read, and a much larger portion that could not write. This ignorance is not unusually accompanied by a low tone of morals, and the two give rise to no little anxiety as to the means of subsistence and the course of life that may be pursued by the class in which they most abound. Political economists and statesmen often find their knowledge at fault when attempting to adapt their theories and their laws to the low condition, the wants and the demands of this uneducated, restless and complaining part of the community. It is, however, a wise policy to persist in the effort to change and elevate their condition, by providing the means for enlightening their uneducated minds through common school education, provided it combines the inculcation of sound moral principles with literary culture.

Reflecting on this subject as presented by the statistics given in our last census, we were forcibly impressed with the inexpressibly pitiable condition in which those millions of our fellow citizens who cannot read would be, if the opinion that the Holy Scriptures are the primary rule of faith and practice, were true. Of course this vast multitude of our fellow creatures, though living in what we call a christian country, are altogether dependent on others for whatever little knowledge they may obtain of the contents of the

bible. They cannot detect or refute the un-sound doctrines that may be taught, nor the impositions that may be practiced upon them by those who may undertake to convey to them the letter of the Scriptures; nor can they often long remember whatever lessons they may listen to. Were they dependent on this outward, and as thus taught, fallible criterion of right and wrong, how continually would they be at a loss to decide what course of conduct they were bound to pursue, and incur the danger of being led astray by their instructors; and how few would be likely to escape the fearful consequences.

But He whose tender mercies are over all his works, has not left even the humblest and most ignorant of his rational creatures to incur the dangers of this fearful dilemma. He has not made it necessary, however profitable—to have a knowledge of the words of Scripture; but, knowing the value of an immortal soul, He has bestowed a measure of his own Holy Spirit on every one that cometh into the world; a light, a guide and a helper, sufficient, if diligently sought and obeyed, to conduct safely through all the mazes of temptation and trial, and to preserve from the assaults of the evil one. Under this dispensation every one is left without excuse. Whatever the circumstances that may surround, though shut out from a knowledge of the sacred truths revealed to and recorded by holy men of old, there is an ever present witness for God in the secret of the soul, which, if not silenced by persistent, wilful disobedience, may be consulted, and the right way discovered, the duty of the hour be made plain, and the guilt of sin escaped. Man is not left dependent on his fellow man, to teach him to know the will of the Lord, but from the least to the greatest, from the poorest and meanest to the highest and most cultivated, all may attain sufficient knowledge of the path they are required to walk in to be made partakers of that salvation which has been purchased by Jesus Christ. This in no wise derogates from the inestimable value of the Holy Scriptures, given as they were by inspiration, and are profitable for doctrine, for reproof, for correction, for instruction in righteousness, that the *will of God* may be perfect, thoroughly furnished unto all good works. But it restricts them to the place and service they claim for themselves, subordinate to the Grace of God which brings salvation. Nor does it lessen the obligation resting on all who have the proper means and opportunity, to extend the blessing of possessing these invaluable writings to all, and striving, by literary culture, to prepare those to whom they come, to profit by their possession, by being able to read them for themselves.

This doctrine of the Grace of God having appeared unto all men, teaching them to live soberly, righteously and godly in the present world, has always been a fundamental doctrine in the belief of Friends. The enlightening, transforming agency of this unspeakable gift is as essential for the salvation of the learned, of those who have a complete literal knowledge of the Scriptures, as it is for that of the ignorant and unlearned. Without it, however extensive and correct our knowledge of the truths revealed to prophets and apostles may be, and however ready we may be to adopt and adapt the letter to ourselves or others, the soul cannot attain to that knowledge which is eternal life, nor rise out of the condemnation pronounced on the carnal nature.

The advance in intellectual development and scientific attainment, made in modern time among the learned in the things of this world, the interest awakened in biblical criticism and exegesis, and the imagined aptitude of the means in vogue, for imparting a saving knowledge of Scripture, together with the popularity of a practical application of those means, all tend to draw off the attention from the absolute need of seeking for and experiencing the perceptible teaching and renovation by the Holy Spirit, and indispose to that humble silent waiting before the omniscient Searcher of the heart, indispensable to witnessing his grace to lead out of all error and into divine truth. Dependence on intellectual ability and high mental culture is well calculated to lead astray and land in error; when the religion of Christ is concerned; for as Calvin says, "By this natural wisdom, as a veil before our eyes, we are hindered from attaining the mysteries of God, which are not revealed but unto babes and little ones."

Very applicable to many of the high professors of this day are the words addressed by our Saviour to the Jews: "Search— or more properly translated—Ye search the Scriptures, for in them ye think ye have eternal life, and they are they which testify of me; and ye will not come to me that ye might have life." He alone is the life and light of men, and by Him only can the soul be vivified with divine life, be made to partake of salvation, and enabled "through patience and comfort of the Scriptures," to have hope. He, and not the Scriptures, is the living bread that cometh down from heaven, of which if a man eat he shall live forever. We must come to Him in the secret of the soul, as He is pleased to reveal himself, and not expect to find eternal life by merely reading his blessed declarations, and the testimony given in the New Testament concerning him; for these can make us wise unto salvation only by that living faith in him, of which He is the author, and which He only can impart to the soul.

SUMMARY OF EVENTS.

UNITED STATES.—New York and Pennsylvania, some time ago, appointed a joint commission to revise the boundary lines between the two States, in their true location and replacing the monuments, and marking it, wherever they are displaced or missing. This commission met, and determined that each State should appoint a surveyor to go over the whole line, and report what work is necessary for a proper marking of the boundary. The commission has also determined to ask the United States Survey to make an astronomical determination of four points, on the line of the forty-second parallel of north latitude, which is the interstate boundary west of the Delaware river. These points having been ascertained, it will not be difficult for the surveyors to run a parallel between them.

The forest fire that has done so much mischief in the western part of the State of Michigan, continue, and have destroyed a large amount of property. Navigation is rendered dangerous on Lake Huron, by the smoke. Immense bush-fires are reported at Manitowish Island, Canada, and along the north shore of Lake Superior.

The town of Mount Carmel, Ill., was visited on the afternoon of the 14th inst., by a tornado, which portended largely of the character of a cyclone. It struck the town at the south end, and passed almost due north, destroying everything in its course. Some seventy families are homeless, and 22 dead bodies were taken from the rains. The loss of property is estimated at \$200,000.

A large water spout burst near Belle Creve, in Elkhorn valley, Nebraska, flooding the country for miles, and doing considerable damage.

Very heavy rains have fallen in Western Missouri and Kansas, during the past few days, and railroad travel in various directions is interrupted. In Western

Tennessee also, heavy rains and floods are reported. The loss to the lumber interests in Memphis is estimated at \$300,000. The Missouri river, at Kansas city, has risen to the highest point since 1844.

A "water spout" fell near Clinton, Iowa, on the afternoon of the 5th inst., destroying houses, and sweeping away fields of grain in an area of several miles.

The French steamer *Amerique*, stranded at Southport, N. C., on the 7th of 14 months, was launched from the dry dock at Red Hook, New York, where she had been repaired, on the morning of the 4th inst. She sails for Havre on the 23d.

The commander of the U. S. steamer *Lackawanna*, now at Annapolis, has been ordered by the Secretary of the Navy, to search for the rock on which the San Francisco was struck. When the rock's locality is ascertained, it will be marked by a buoy, and notice given of its position.

A surveying party who have been measuring the principal elevations in Connecticut, have found that the highest land is Mount Braze, in the extreme north-western corner, which is 2306 feet high; next came Bear Mountain, 2250 feet; Back Mountain, 2150 feet, and Bald Peak, 1996 feet, all in Salisbury.

One of the assistants of the Geological Survey of Pennsylvania, reports an immense gas vein has been struck in a well about 53 miles S. W. of Olean. The gas comes from a depth of 1700 feet, and is contained about 25 feet thick, and about 40 feet over the producing (third) sand of the Bradford oil region in McKean county.

The Post Office Department is in receipt of a notification from the Internal Bureau at Berne, that Persia has applied for admission into the Postal Union. It is thought likely that all the civilized governments of the world, will directly participate in the advantages of the Postal Union before the expiration of the present year. The department authorizes a direct Bradway mail to be despatched by the schooner *Joseph E. Ridgway*, sailing from New York for Para on the 12th inst.

The daily requisition on the Third Assistant Postmaster-General, for postage stamps, in small envelopes, show a steady increase. This is considered in Washington indicative of a revival of business throughout the country.

On the 2nd proximo, 217 new money order offices will be established in different parts of the country; Pennsylvania, 18; N. Jersey, 18.

The Freedmen's Bank proposed in Washington, has been offered at public sale—the bidding was slow and it was not disposed of. The value of the entire property is said to be \$250,000, the highest bid \$110,000.

Reports from 241 points in Ohio, Indiana, Illinois and Kentucky on the state of the wheat and fruit crops, are as follows: 172 indicate a good crop of wheat, 31 a fair crop, and 1 light; if any; 47 report a good crop of fruit, 74 fair, and 90 a light crop, if any.

The number of immigrants in Philadelphia for the week ending at noon on the 9th inst., was 328—an increase of 57 over the previous week. Of these 216 were natives of the U. States, and 88 were of foreign birth.

The Markets.—The following are the quotations on the 9th inst.: American gold, 105½. United States sixes, 1881, registered, 110½; do. coupons, 115; do. 5 per cents, reg. and con. 111½; do. 4½, 1880, 107½. Cotton, 11½ 12½ cts. per lb. for upland and New Orleans. Flour, Wisconsin extra family, good, \$8 a \$8.25; Minnesota extra family, fair and good, at \$8.50 a \$8.75; do. choice, \$9 a \$9.25; Pennsylvania, do. choice, \$9 a \$9.25; do. good, \$9 a \$9.12½; do. do. choice, \$9.25; do. do., low grade, \$8.50; do. fair and good, \$9; Lancaster Co. do. fair, \$8.75; do. do. good, \$9; Michigan, choice, \$9, and high grade \$10 a \$11. **Rye flour** sells at \$4.50 a \$4.75. **Pennsylvania red wheat**, \$1.35 a \$2; do. do. choice, \$1.45; do. do. choice, \$1.50 a \$1.55; Pennsylvania white at \$1.98 a \$2.05. **Corn**, Penna. yellow, 59 a 60 cts.; western high mixed at 58 a 59 cts. **Oats**, 47 a 50 cts. **Prime Timothy hay** sells at \$1.10 a \$1.25 per 100 lbs.; mixed at \$1 a \$1.15; **straw** at 60 a 75 cts.

REBURN.—As a train load of excursionists were crossing the river Avon, near Beth, on the 16th inst., the bridge fell, precipitating the train about 20 feet into the river. It is said there were near 200 people on the bridge when it fell. Twenty dead bodies have been recovered, and several are still missing.

The West Lancaster colliers, numbering several thousands, are said to be on strike, and have been out for nearly 60 days from small coal in London during the past week.

It is stated in an official communication that the Suez canal, up to the close of last year, cost the Egyptian Government, in addition to the shares sold to the English Government, over \$71,000,000, about half of this

sum being interest. This includes the cost of the iron water canal from Cairo to Ismailia, and from that port to Suez. This enterprise so useful to many nations, and especially to England, was one of the first caused by the present financial embarrassments of Egypt. It appears from a statement showing the navigation through the canal from 12th mo. 1st, 1857, to 12th mo. 31st, 1858, that the entire number of vessels was 6,375. Of these, 4,493 were commercial steamers, 1,107 postal steamers. The total number of passengers was 537,693.

The exhaustion of the *Cleopatra* Needle for Loma has been completed. Eighteen inches of the apex gone, and the corners are somewhat damaged, but of use it is in fair condition.

Advices from China report the plague at Bagdad have decreased to 24 weekly.

The Madras, India, famine has brought a early misfortune in its train. There are scarcely any leeches to be had, the tanks from which they are generally obtained, having all run dry.

Advices from China report the continuance of a terrible famine in Shantung and Chihli, with no probable means of averting the death of hundreds of thousands from starvation. Famine and a resulting pestilence rage also in Corea.

A bill introducing a new system of public instruction in Prussia, which is to remodel the famous instruction law from the beginning of this century, has just been completed by a special commission. By the new the classical tendency of liberal instruction will somewhat modified, while regarding elementary instruction, advantage has been derived from American experience of the free school system.

The New South Wales Intercolonial Exhibition proved, what few of the kind have resulted in, a financial success. Among the prizes awarded was one to National Institute, Philadelphia, for operating table pumps.

WESTTOWN BOARDING SCHOOL.

A Stated Meeting of the General Committee will be held at Westtown on Fourth-day, the 20th inst. at 9 A. M.

THE COMMITTEE ON ADMISSIONS meet the same at 7½ A. M.; and the COMMITTEE ON INSTRUCTION the same at 7 o'clock.

THE VISITING COMMITTEE meet at the School, Seventh-day evening, the 16th inst.

For the accommodation of the committee, convocations will be at the *Street Road Station* on Seventh; Third days, the 16th and 19th inst., to meet the trustees at the Philadelphia and 2:30 and 4:45 P. M. Philad., 6th mo. 5th, 1877.

FRIENDS' ASYLUM FOR THE INSANE

Near Frankford, (Twenty-third Ward,) Philadelphia Physician and Superintendent—JOSUAH H. WOODBURN, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board Managers.

DIED, on the 21st of First month, 1877, RACHEL wife of Isaac N. Vail, and daughter of Israel C. Catherine Wilson, a member of Stillwater Monthly and Barnesville Particular and Monthly Meetings, aged 70 years. She endured a protracted illness which Christian resignation, uttering from time to time very comfortable expressions. At one time she said "Do not grieve for me, but rather rejoice that I gett'ng nearer home." "It is an eternity I have eternity of joy for this short time of suffering."

On the 28th of Fourth month, 1877, at his residence, near Barnesville, Belmont Co., Ohio, DEWE BERRY, in the 56th year of his age, a member of Stillwater Particular and Monthly Meetings. Although removal of this dear Friend was sudden, we sorrow as those without hope.

In Cincinnati, Ohio, while on a visit the DEBORAH WIFE of G. S. COMSTOCK, formerly, in the 3rd year of her age. Her residence was in Milton, Indiana and she was a member of Milford Monthly Meeting Friends held in or near that place. She was firmly attached to the ancient doctrines and testimonies of Society, and the summons though sudden, we trust not find her unprepared for the solemn change.

Random Notes of Travel in Europe.

(Continued from page 231.)

Derwentwater, Windermere and Searthmore. From Carlisle we went by rail to Keswick, which is reached in a few hours, and were in the heart of the Lake District, the Switzerland of England. Beautiful as a poet's dream I found it, lovely enough to excuse all the epodes of the Lake poets, who have sung every waterfall, rill, and mountain around. Indeed, the whole district seems like an illustrated edition of Wordsworth bound in green covers with Wordsworth, and one would think he had written too much, were it not for the wise philosophy which pervades his pages. We may appropriately recall his eulogy of Channing: "The great poet of our time, Wordsworth, one of the few who are to live, is gone to common life, to the feelings of a universal nature, to the obscure and neglected portions of society for beautiful and cheering themes. Nor ought it to be said that he has shed over these the charms of his genius as if in themselves, they had nothing and so lovely. The distinction of genius is discern more of truth than common minds discern under disguises and humble forms, the everlasting beauty. This is the prerogative of Wordsworth, to discern and reveal in the ordinary walks of life, in the common man's heart. The grand truth which pervades his poetry is, that the beautiful is not confined to the new, the rare, the distant, the airy and modes of life open only to the few, but that it is poured forth profusely on the common earth and sky, that it gleams on the lowliest flower, that it lights up the humblest sphere, that the sweetest affections dwell in lowly hearts; that there is a sacredness, dignity and loveliness in lives which few see; that even in the absence of all intellectual culture, the domestic relations can furnish nourishment that disinterestedness which is the element of all greatness, and without which intellectual power is a splendid demerit."

We spent the afternoon and night at Keswick, made the circuit of Derwentwater, asked ourselves

"How does the water come down at Lodore,
With its rush and its roar?"

well described by Sonthey, and endeavored to solve the problem by going there to see; and found a dry bed of rocks—a very Petra

of stony walls and barrenness. We could only imagine how the scene might appear

"When copious rains have magnified the stream,
Into a loud and white robed waterfall."

On our drive around Derwentwater we called at the Bowlder Stone, which is simply a mighty rock that some convulsion, ages since, hurled from the mountain mass above, and rolled to the valley where it reposes in majesty, the wonder of tourists. A long ladder placed against its side, enables the adventurous to ascend and gain a more extended view of the rough scene around, where clumps of heather and rocky masses compete for supremacy.

Returned from Derwentwater, we visited Greta Hall, for some years the residence of Southey, a commodious house overlooking a lovely scene, of which he wrote in its less pleasing winter aspects,

"I stood at the window beholding
Mountain and lake and vale, the valley disrobed of its verdure;
Derwent retaining yet from eve a ghostly reflection,
Where his expanded beard, then still and smooth as a mirror,
Under the woods reposed."

The next morning took the coach for Ambleside, near Windermere, a short journey of seventeen miles, through a region where "Lakes and mountains around us gleamed misty and wide," the latter generally invisible because of the cloud canopy enveloping them. Skiddaw rose remote, and more near, "the dark brow of the mighty Helvellyn," while black tarns lay in the shadow of the overhanging hills. We had quite a number on the coach, among others a Cumberland woman, who was revisiting her native valleys after a prolonged absence in London. Her joy on recognizing the old familiar places was overflowing, and I believe we all sympathized with her. We passed through quiet, sequestered valleys almost the whole distance. Small farm-houses, long and low, and generally of two stories, with the barn attached to one end, were the most common, and always built of the grey stone abounding in the district. The general characteristic of loneliness pervading the scene, was tempered by a tender softness of detail, which rendered it one of uncommon beauty. The hill-sides were clothed with grass to the summits—not fabled and turned to a dull brown by a scorching sun, but bright and fresh as it is with us in our first summer month. Sheep in great numbers, were grazing in the small fields, divided by low stone fences; scarcely was there a field or valley that did not boast its tiny rivulet or "beck," and low arched stone bridge and rustic railing. A few years since many of these small farms were owned by "statesmen" (estatesmen), whose ancestors had dwelt thereon for many generations, a proud and independent race of men, whose frugal habits enabled them to live comfortably on their small farms. They often joined the trade of weaver to that of farmer, so that the short winter days were

usefully employed. But the introduction of manufactured clothing, and a more luxurious style of living, in other respects, led to the final sacrifice of their small domains, which became absorbed into the larger estates surrounding them. These larger farms are now usually let on lease for various terms. Draining the heavy lands has been much attended to, with highly beneficial results, for here the rains are so abundant that the evaporation from the surface of the soil can never keep it in a dry state, if the subsoil is retentive of moisture. Many of the new farming implements are now used in the Dales where the tenants have sufficient capital to purchase them. The climate is said to be mild and moist in the valleys—but a great deal of snow accumulates in winter—consequently the sheep are of a hardy kind fit for the mountain pastures; but are brought down to the valleys at the approach of the cold season and kept in the enclosed grounds until spring. The climate being so favorable to pasturage, a great many cattle are reared. In many of the small fields we saw them standing deep in the long grass, but we were told that there are but few horses. The barren hill-sides are occasionally covered with fine plantations of oak, ash, elm, beech, sycamore, Scotch fir and larch, the last of which thrives the best. The combined efforts of nature and of man, have made this Lake region, therefore, the loveliest part of England.

As we passed rapidly over the fine smooth road, an expectant movement among our little company outside announced that we were approaching Grasmere, and our coachman pointed out where Rydal stood, hidden among the trees, and to a small group of strangers standing in one corner of the village graveyard. "Those people are standing by the graves of Wordsworth and Hartley Coleridge," said one of our companions, "they lie just there!" Hartley Coleridge! he had always seemed rather like a myth, to me—a meteoric light which gave one a flash of brilliance as he passed on his erratic course, his brief life ending all too soon for the completeness of his fame.

But this lesser star in the constellation of the Lake Poets, beside his other works, has written sonnets which are esteemed among the finest in our language—one is entitled, *The first sound to the Human ear*.

"What was't awakened first the untired ear
Of that sle man who was all human kind?
Was it the gladtime welcome of the wind,
Singing the leaves that never yet were sore?
The four mellifluous streams which flowed so near
Their inling murmurs all in one combined?
The note of bird unnam'd? the startled hind
Bursting the brake, in wonder not in fear,
Of her new lord? Or did the holy ground
Send forth mysterious melody to greet
The gracious presence of immaculate feet?
Did viewless seraphs nestle all around
Making sweet music out of air as sweet?
Or his own voice awake him with its sound?"

Grasmere will, I think, bear away the palm for loveliness, from any other place we have

yet seen among the lakes. For this it is indebted, in a measure, to the beauty of its houses and cottages. These may be only as blots upon the landscape, when tall, and angular, and disproportioned, but at Grasmere their gabled and latticed fronts, their numerous chimneys and slate-slab porticoes, covered with climbing roses and creeping vines, the stone, too, is of such soft colors—grey and brown hues predominating—while they are placed on knolls and in dells, on banks, and at the foot of rocks, seemingly bound together by old groves of sycamore, and ash, and oak, and orchards, and gardens, all combine to render them in perfect keeping with the natural charms.

Ambleside, one mile from Windermere, lying under Wan-fell, and surrounded by mountains on all sides but one, is full of interest. At a short distance behind the Salvation Inn, where we were installed for the night, is Stock Gill Force, in a copsewood, through which we wandered late in the afternoon. Like Lodore, this was also dry, but we were compensated by a walk through a rambling street which appeared to be the oldest in the town, and a climb to the top of the terraced hill overlooking it, and covered with handsome modern villas, enough to have called forth, probably, from Wordsworth, had he been living, severe animadversions on the intrusion of strangers into this primitive domain of his. Once, it is said, he was roused to unusual indignation, at seeing some children playing not far from his own boundaries. "Whose children are those yonder?" he demanded angrily, "those boys have no business to be where they are!" He was told it was the Prince of Wales and his little brothers.

Next morning we took the steamer for Newby Bridge, thus sailing the length of Windermere. Its margin is occupied by genteel round edifices, exuberantly wooded, with many villas and cottages, gleaming amid the trees, while numerous islands diversify its surface.

By rail we were borne to Ulverstone, a quaint old-fashioned market town, where we expected to find a conveyance to Swarthmore Hall. After considerable delay a small, low phaeton was found, and what was also of some consequence, a very obliging driver, who assured us that he was quite used to going out to the meeting-house near the hall, and that he took an old Quaker gentleman to meeting there every week. A short drive of a mile brought us to a retired road, bordered by a straggling hedge; the numerous broken places in the latter enabled us to catch glimpses of rather sterile looking small fields, which, from their barren appearance, may have been reclaimed from a moor. We were on the estate of Swarthmore, and it needed but a glance to assure us that the ancient Elizabethan building before us, at the end of the road, was the Hall. The latter part of the way, a low stone wall superseded the hedge on either side, partially enclosing a flower-garden. Dilapidated we expected to find it, but we found more of neglect than we anticipated. The principal rooms still possessed their rich oak panelling, but the floor, and indeed every apartment was in great disorder, and the absence of neatness, added greatly to the dreary effect upon our spirits. Passing along a hall on the second story, our guide, who appeared to be mistress of the mansion, stopped at a broken place in the oaken floor:

"Here! don't you want a piece of the old hall," she inquired; and stooping down, suited the action to the word by breaking off a decayed portion of the floor and placing it in our hands. The desk of George Fox was shown to us, and the room in which the meetings were held; and the window from which he preached to the assembled crowds below him, on the lawn. Here we may imagine him,

"Hoary error smiting,
In the awful strength of Truth,"

warring against a corrupt church, and planting that goodly seed whence has sprung a varied growth of Christian reforms, and which being in itself but a revival of primitive Christianity, will continue to bear excellent fruit to the end of time.

Swarthmore has some fine old trees around it, and various outbuildings which indicate that it was once the abode of a family of ample resources. From the upper windows may be seen an extended prospect of Morecambe Bay, the mountains around Conistone, and rich inland scenes, of wood and river. Swarthmore was once included within the domain of the Monks of Furness Abbey, who owned the country for many miles around.

Before visiting the Hall, we drove to the meeting-house, a small, neat building, kept with the utmost nicety, where we saw the famous bible given by George Fox to Friends, along with the meeting-house. It was formerly chained to the desk, but is now kept even more securely, perhaps to protect it from relic hunters. What simple pathos in the concluding paragraph of his will, in relation to this property: "It is all the land and house I have in England, and it is given up to the Lord, for it is his, for His service and for His children's."

[We take from the "Extracts" the following minute of the exercise in the Yearly Meeting of Philadelphia, at the time of reading the replies to the Queries sent up from the Quarterly Meetings.]

During the serious consideration of the state of Society, as set forth in the answers to the Queries, the minds of many Friends were deeply affected with the deficiencies reported; especially in relation to the regular attendance of all our meetings, both for worship and discipline. Did the members duly appreciate their privileges and mercies, together with their continual dependance on the great Giver of every spiritual and temporal gift, they surely could not, health permitting, absent themselves, when the opportunity is offered, from assembling with their friends to wait upon the Father of spirits; to wrestle after His blessing who knoweth the thoughts of our hearts; and to seek for ability to worship Him who is a Spirit, in spirit and in truth. It would, on the contrary, be the earnest desire of every one not to neglect the assembling of themselves together, but to present their bodies, especially on these occasions, a living sacrifice, holy, acceptable unto God, which is our reasonable service.

So likewise, did we love our Father in heaven as we are called to do, with all our hearts; and appreciate as we should, the price paid for us by his dear Son, we should not only be faithful in assembling with our Friends to worship Him, but this Divine love would, in a measure, leaven our spirits towards all, and especially towards those of the same

household of faith; and we would realize man and more what is written that, "He that loveth God, loveth his brother also." A "How good and how pleasant it is for brethren to dwell together in unity! It is like precious ointment upon the head," that go down to the skirts of the garments.

While a commendable diligence is reported respecting the reading of the Holy Scriptures by parents and heads of families, and also, encouraging those under their care to the performance of this duty, acknowledged deficiencies are presented in the answers to the Queries, in relation to other important Christian testimonies, which we as a religious society, from the beginning, have been called to maintain before the world. Whatever may be the real motive for compromising the testimonies of the gospel to plainness of speech and apparel, there can be no doubt of its being connected with a nearer conformity to the ways and customs of the world into which their disregard leads, contrary to the plain injunction of the apostle: "Be ye conformed to this world." We would affectionately urge upon parents serious consideration of the responsibility that attaches to their position and influence, with regard to setting a good example themselves, joined with a prayerful solicitude for their dear children in the particulars; and then as delegated Shepherds in watching over their respective flocks, that their offspring may be trained in that plainness and simplicity becoming our religious profession, as well as in the nurture and admonition of the Lord.

Our members are tenderly advised and cautioned against a growing tendency in the present day to conform to the ways and customs of the world, in relation to the expensive coffin, habiliments and floral decorations bestowed upon the perishable body upon the occasion of its burial. The desire was expressed, that in reference to the two first named departures from simplicity on these solemn occasions, we may let our moderation be more fully known to all men; and that other practice intended or calculated to draw solemn thoughts of death and the grave, may be withstood by all our members.

The meeting has been brought under renewed exercise, in relation to the violation of our Christian testimony against a man-made and paid ministry. It is the prerogative of the blessed Head of the Church to disperse to whomsoever He will, those gifts which He designs to be exercised for its edification. The system of hiring ministry, presuming to place Divine prerogative under the arbitrary control of fallible men, who permit any of their own sex, who comply with their prescribed forms, to assume the sacred office while women and others, however elected of the Lord to the work of the ministry are prohibited engaging in it. The necessity to seek for a renewed Divine qualification each time of engaging in the solemn work of preaching or praying is not recognized, and the right is assumed of demanding a pecuniary compensation for exercising the duties of an office.

It is our earnest desire that all our members may be incited to watchfulness against lowering, or in any way balking this important testimony, and where any are so unguarded as to give ground for uneasiness on this count, that they be admonished in the restoring love of the gospel, that they may

ought to a sense of their error, and to content more consistent with our high profession. We believe the day loudly calls for increased individual watchfulness and faithfulness; and for every one of us to set the light in the candlestick; that so we may, separately and collectively, become more and more inward and spiritually-minded people and be designed to be, to the Lord's use.

For "The Friend."

Thomas Edward—A Scotch Naturalist.

(Concluded from page 345.)

In his later years our naturalist devoted much of his time to the study of the zoötes, crustacea, fishes and other marine productions, and in this he showed the same assiduity and skill that had made his labors in other directions successful.

He had considerable difficulty to encounter proceeding with this branch of scientific work. He had no dredge of any sort. He no boat, nor could he obtain the loan of one.

How, then, did he proceed? He gathered rather all the old pots, pans, pails, and kettles which he could procure in his neighborhood. He filled these with straw, grass, bits of clothes, or bits of blankets. A coat and undershirt cut down were found very useful. These were Edward's sea-traps. Having put a gash in it at the bottom of the trap to let it drain, and attached a rope to the upper part, he lowered his traps into the deeper rock-pools along the coast. Some of them he threw into the sea from the point of the rock, attaching the rope to a stone, or to the strong algae.

When the traps were drawn up, Edward landed from them small fishes, crustaceans, mussels (with or without shells), star-fishes, sponges, and the smaller kinds of sea-weeds. To sink them to a shallow pool and shook the contents; and when he had picked what he thought might be useful, he kept the traps again and set them in their places. He usually visited his sea-traps a month; but in winter he visited them frequently, as he rarely took any thing that time of the year.

Edward visited the rocky shore for many miles east and west of Banff. He turned over loose stones, turned up the algae, peeped beneath the corners and shelves of the projecting rocks. He went to the pools, and often to the pleasure of seeing the inhabitants taking in their native element. If he observed something that he wanted, he would take a dive at it, though the water might get to his head and shoulders. Sometimes he was in bodily; but that did not matter much he secured his object.

Knowing from observation that many marine objects are cast on shore at the rising each tide, especially when the weather is rainy, Edward walked along the margin of the incoming wave, ready to pick up any thing it might be driven ashore. Sometimes he could observe some object in the water—a shrimp or some unusual kind—which desired to capture. He followed it into the sea with a piece of gauze tied on a small pop; and fished for it until he had caught it. He discovered many new objects in this way. It is almost incredible what may be got along the sea margin by carefully searching the incoming wave. This, however, required wearied assiduity. Edward discovered many

of his rarest insects among those driven ashore by the wind. It was thus that he obtained most of his rare crustaceans. He himself had no doubt that, had his health been prolonged, he would have discovered many more.

Besides these methods for collecting marine objects, he found that tangle roots were a special hiding-place for many species that were beyond the power of the dredge, and that never entered the traps set by him along the shore. They were not, however, beyond the power of the elements. But for the tempest, that tears them from the rocks and dashes them on shore, such objects would never have been found. Whenever a storm occurred in the Moray Firth, Edward immediately went out, collected the tangle which had been driven in, cut off as many roots as he could carry with him, and carefully examined them at home.

He was also greatly helped by the fishes themselves, as well as by the fishermen. It is true that he had no dredge and no boat. But big fish were themselves the best of all dredgers. They fed far out at sea, at a depth where the dredge could scarcely reach. The fishermen caught them, and brought them into port, full of what they had swallowed. Edward therefore endeavored to obtain the contents of their stomachs. For this purpose he sent some of his daughters to the neighboring fishing villages. They went to Mac-hull and Whitehills twice a week, and to the Banff fishermen daily. The object of their visits was to search the fishermen's lines, to bring away the sea-weed and all the stuff that was attached to them, and to secure as many of the fish stomachs as they could find. One of his daughters was sent to Gardston owa, where she lived with a friend. From thence she sent home her collection of fish stomachs twice a week by the carrier. All this rubbish (as most people call it) was carefully examined by Edward. From these searchings he obtained most of his rarest crustaceans. 'It is quite wonderful,' he says, 'what is to be got in this way. Indeed, no one would believe it who has not made the experiment.'

'Take, for instance, the cod's bill of fire. 'It is to the stomach of this species,' says Edward, 'that I am most indebted for many of the rarest of the testaceous and crustacean specimens that I possess. I will only mention what I have myself seen: crabs and lobsters of almost every description (except *Homarus vulgaris*, which I have never yet obtained from the prickly stone crab *Lithobolus naevus*) up to the hard pecten (*Cancer pinnatus*), and the larger the better. Shells of every sort, particularly *Fusus antiquus* and *Buccinum undatum*; no matter whether inhabited by their original possessor, or by a hermit in the form of a pagurus, it is no obstacle to the voracious cod. Shrimps, fishes, sea-meas (*Aphrodita aculeata*), sea-urchins, with now and then a star-fish; "dead men's paps," as they are called here (*Alyginaria*), and actinias—no matter what they may be attached to, whether a shell or a stone, provided these are not themselves fixtures—all are gulped by this most voracious fish. The eggs, capsules, or purses of the dogfish (*Squalium*) and the skate, with the roe and the ova of other species, particularly when deposited on sea-weed; the algae and the zoöphytes also walk down the cod's gullet, so that nothing may be lost. As for the *Holothuridae*, or sea-cucumbers, few, if any, of them escape.

Now and then fragments of the meduse are swallowed; feathers, with the remains of seaweed; and, on one occasion, the skeleton of a partridge, with the wings, feet, legs, and head adhering. Pieces of pewter and of cloth occasionally; and once a cluster of beech-nuts, with part of a domestic fowl. As for fish—why, the fish does not swim that the cod, when hungry, will not attack, and, if successful, swallow. In short, nothing seems to come amiss. But this outline of the cod's bill of fare does not include all that the animal preys upon and devours. It is enough, however, to show its epicurean propensities.'

T. Edward and his wife brought up a family of eleven children respectably and virtuously. He educated them much better than he himself had been educated. They were all well clad and well shod. "Both parents must have felt hope and joy in the future lives of their children. This is one of the greatest comforts of the poor—to see their family growing up in knowledge, virtue, industry, well-being, and well-doing. We might say much of Edward's eldest daughter, who has not only helped to keep her parents, but to maintain her brother at school and college. It is families such as these that maintain the character and constitute the glory of their country."

Samuel Smiles' account of his friend concludes with the following paragraph:

"After abandoning photography as a means of subsistence, he returned to his old trade. 'As a last and only remaining resource,' he said, in June, 1875, 'I betook myself to my old and time-honored friend—a friend of fifty years' standing, who has never yet forsaken me, nor refused help to my body when weary, nor rest to my limbs when tired—my well-worn cobbler's stool. And here I am still on the old boards, doing what little I can, with the aid of my well worn kit, to maintain myself and my family; with the certainty that instead of my getting the better of the lapstone and leather, they will very soon get the better of me. And although I am now like a beast tethered to his pasturage, with a portion of my faculties somewhat impaired, I can still appreciate and admire as much as ever the beauties and wonders of nature, as exhibited in the incomparable works of our adorable Creator."

For Tract-writers and Readers.

There are thousands upon thousands in England and America who so read of, and believe in Christ, as to become religious, but not truly *zealously*; believers but not saints.

Their religion is something they bring to God; not that which springs from Him by His Spirit dwelling in their hearts.

Christ out of them, and for them, is so written, and preached up to them, and believe in by them, that Christ *with* them, and *in* them, is not known.

A Christ that saves is everywhere spoken of; the Christ that crucifies, but occasionally. The letter of the Scriptures is made everything; the Holy Spirit little or nothing. He is admitted in theory, but little or not at all known in reality.

The religion of preachers and people is more the fruit of the letter of Scripture, enlightening, in some measure, the understanding, than the Spirit, the Blessed Spirit, convincing of sin and giving a new heart.

A faith of man which says, "If I believe I shall be saved," is prevalent, almost universal,

amongst professors; while the faith which is of the operation of God, and a fruit of the Spirit, is rarely seen, and seldom felt.

The former, which fills the understanding and engages the heart with dogmas, opinions, doctrines, forms and ceremonies, is everywhere to be met with: the latter, which unites the heart to God, makes one with Christ in spirit, brings a love which is unutterable, and a peace which passeth understanding, is scarcely anywhere to be found.

This genuine Christianity faints and droops, while infidelity sneers and Popery revives.

But who are principally accountable to the most blessed God for this state of things?

The answer is: Half-hearted, unfaithful, unappointed, man-made ministers on the one hand; religious scribes and tract writers and distributors on the other.

The former, by so preaching and living as to make people "godly" without the real possession of God, who is alone the salvation of his people. The latter, by so writing that a faith which is of man is taken to be that which is of God by the Spirit, leading men imperceptibly into the possession of a Christianity springing chiefly from a cultivated understanding, in the place of a New divine Heart and right spirit, the gift of God, in, and by, Christ Jesus our Lord.

He that hath ears to hear let him hear.

Blessed be the Lord God Almighty, and blessed be His Holy Name for ever.

—Bath, England.

Bats and Insects.—In the winter of 1875-76 a large number of dead, and, for the most part, hollow trees in the Thier Garten of Berlin were felled and cut up for firewood. As a consequence of this measure, many thousands of bats, hibernating in these natural retreats, and awaiting the return of spring to renew their energetic campaign against insect vermin, were necessarily destroyed. It is needless to point out here the great utility of these harmless little creatures: any one possessed of the slightest smattering of natural history must be well acquainted with the fact. The question to be considered is, how such a need less destruction of useful animal life may be fully avoided. Numerous observations have been shown that bats in a state of hibernation can endure any degree of cold without injury; but that if once disturbed while in this state they are extremely susceptible to change of temperature and but rarely survive the disturbing intrusion on their sleep.

Baron Nolde writes to a German contemporary, suggesting that such trees as form the resting place of bats should be felled only in the warm months of the year, while their inhabitants are in a state of activity, and able to seek fresh shelter for themselves. The only objection in this place he can anticipate is that labor is more easily and cheaply secured in the winter than in the summer months. But, granting this, it by no means follows that felling such trees in winter is in the long run the cheaper plan. The importance of the bat in the economy of nature has not been properly recognized. He cites the case of a forest belonging to the Crown in illustration of this point. Well-grown oak trees being required for naval purposes, a notice was issued that none should be felled until the receipt of special orders. Long after the trees had arrived at maturity, the notice remained unrevoked, and they were suffered to run on to a state of decay.

This being reported to the higher authorities, orders came to cut down the trees for firewood. The work was undertaken in the depth of winter; thousands upon thousands of hibernating bats died from disturbance and exposure and the ultimate result was the total destruction of the whole forest, for in the second year after their extermination the damage done by caterpillars—which up to this time had never been specially remarkable—attained such an enormous development as to render the felling of the whole plantation the only practicable course to be pursued.—*London Farmer.*

THY KINGDOM COME.

Speed thy servants, Saviour, speed them!

Thou art Lord of winds and waves;

They were bound, but Thou hast freed them;

Now they go to free the slaves:

Be Thou with them!

'Tis Thine arm alone that saves.

Friends and home and all forsaking,

Lord! they go at Thy command;

As their stay Thy promise taking,

While they traverse sea and land:

O be with them!

Lead them safely by the hand!

Speed them through the mighty ocean,

In the dark and stormy day,

When the waves in wild commotion

Fill all others with dismay:

Be Thou with them!

Drive their terrors far away.

When they reach the land of strangers,

And the prospect dark appears,

Nothing seen but toils and dangers,

Nothing felt but doubts and fears;

Be Thou with them, O Lord!

Hear their sighs, and count their tears.

When they think of home, now dearer

Than it ever seemed before,

Bring the promised glory nearer;

Let them see that peaceful shore,

Where Thy people

Rest from toil, and weep no more!

When no fruit appears to cheer them,

And they seem to toil in vain,

Then in mercy, Lord, draw near them,

Then their sinking hopes sustain:

Thou supported

Let their zeal revive again!

In the midst of opposition,

Let them trust, O Lord, in Thee;

When success attends their mission,

Let thy servants humbler be:

Never leave them,

Till Thy face in Heaven they see;

There to reap, in joy forever,

Fruit that grows from seed here sown;

Thou to preserve Thy own,

And with triumph

Sing a Saviour's grace alone!

Thomas Kelly.

A new Fruit Tree for California.—The Japanese persimmon tree is being introduced by the horticulturists of California. The fruit differs somewhat from the persimmon of the Southern States, as it ripens without frost and is free from the acrid taste when green which characterizes them. The tree is highly ornamental, a prolific bearer, hardy as the pear, and ripens its fruit early. The fruit is solid and can be shipped across the continent. The season is from October to January, when fine fruits are scarce. The fruit is of a bright yellow, orange or vermilion color, and is unsurpassed for the table, being thought by some to be equal to the peach or strawberry. When dried it is equal to figs, and is exten-

sively used for preserving in China. The wood of the Japanese persimmon is valuable for manufacturing, it being a species of ebony.—*Virginia (Nex.) Enterprise.*

A Summer in Norway.

NORWEGIAN FAMILY.

While staying at the town of Tromsø, J. C. Eaton took a trip into the country, which thus describes:

"I looked around after I had concluded interview with the Lapp, and found the other of the party attending the reception of lady Lapp, who was seated at the foot of a bunch of alders a little way off. I joined party, and discovered that, like other third ladies, she had an eye to the main chance; indeed she was driving a thriving trade in manufacture and sale of a coarse thread from the sinews of the deer, such as they use manufacturing the skins into shoes and garments.

She first stripped the tendon, when in moist condition, into finer fibres like flax, & then from these she drew out a thread of a size and length she pleased. This she twists as she drew it out, with great dexterity, rolling it on her cheek with her hand. This she would make for you, single, double, quadruple; but for the latter there was little demand. As the value of the article was much enhanced by seeing it made, it had taken some time to supply the demand. The price was half a mark, or say eleven cents of money, for a thread two yards long—a rope price, no doubt, it sold in quantities, but the small trade she was doing, cheap enough. She had other trinkets, such as the marble required, and, on the whole, made a fair morning's work.

At last we adjourned to the cabin of a Norwegian settler, as we would say in our western country. To reach this we had to go nearly half a mile, through boggy ground and alder bushes, to the creek, which we had to cross in a boat, for the tide had come up, and the water was deep where two hours before could have stepped across on the stones.

At the mouth of the creek the valley was broad, affording many acres of level ground but it narrowed rapidly toward the mountains, whence the stream issued. The house was situated on a bed of peat, of unknown depth, which occupied a considerable part of the valley. Ditches had been cut near the house to render it sufficiently dry for a dwelling place and a small garden. A nice crop of grass was growing beyond the peat-bank and on it grasses peculiar to such location.

The house was a log-cabin, almost the exact counterpart of the log-cabins found on the western frontier. It had two rooms, separated by a little hall, in each of which was a stove instead of a fireplace. One of these rooms had been cleaned up for our reception, & looked quite inviting. In this were two chairs, some stools and a table, besides a loom, which a girl was weaving a piece of coarse cloth for domestic use. The loom was similar to that which I used to see in my boyhood farmers' houses at the east, but which are now almost entirely banished from the land. Another girl was carding the wool into rolls spinning it on a small wheel, the cards were the same as those common many years ago in this country for carding tow and cotton, & the machinery had rendered such excellent

utensils unnecessary, and the wheel was nearly the same as our mothers used for spinning flax. All these were tried by each one of the party in turn, but of course with universal failure; but the native girls were expert, and evidently enjoyed the economies bestowed upon their skill.

We had brought a good lunch with us, which was supplemented by some bowls of sour milk or bonny-clabber. This was a most acceptable relish to the Norwegians of the party, but it did not seem to suit our palates. It is all in use no doubt. This is a favorite, and may be said to be a national dish in Norway.

I have lost the name of this family, which I regret. Close by was a small log blacksmith's shop, or rather cutlery, where the old gentleman of the establishment cunningly fabricated sheath-knives.

Now, every male Norwegian and Lapp above six years old, must be furnished with a sheath knife, suspended from a belt and hanging over his left hip. This universal personal appendage they call *Folk-knif*. This at first impresses the stranger that he is in dangerous companionship, and that a bloody fray may occur every hour of the day. But nothing could be further from the truth. They are really a very peaceable and amiable people. During all my travels in Norway, I saw scarcely an approach to a personal, much less a sanguinary, use of this formidable looking knife. It is carried in place of the pocket-knife with us, and is used only for the purposes to which the pocket-knife is applied. Besides, it is considered ornamental, and is worn for show as well. Indeed, without it the Norwegian of either high or low degree, would consider himself only partly dressed. Hence these knives are made of various grades of finish and ornamentation, with corresponding prices. A good serviceable knife, such as will satisfy the ambition of the fisherman, may be bought for two marks (say forty-five cents), while if one is disposed to be extravagant, he can gratify his taste to almost any extent in the purchase of a knife.

Now, it was the business of that old gentleman to make these knives, and he had a good assortment on hand, and drove a thriving business that day. The one I got cost me two dollars, and was one of his best. * * This was one of the pleasantest as well as most instructive excursions I made during our stay at Tromsø.

I have already remarked that Tromsø is the capital, or, I should rather say, the metropolis, of Finnmark, which is but another term for Norwegian Lapland, and is the largest city both in population and commerce within the Arctic Circle. It is on the east side of an island—the terminal (o) in the name of a place indicates in the Norwegian language an island or on an island, and so conveniently saves much explanation. It is very pleasantly situated, the lower part upon undulating ground high above the water, while back streets of the city are on the side-hill, or lead to steep eminences which afford some very beautiful prospects. There are uninclosed grass-plats about the city and in its vicinity, upon which sheep and other stock may be seen grazing. There are many nice gardens in cultivation, which give it a cheering aspect, while, as in almost every place in Norway, a great profusion of pot flowers may be seen in the windows of the houses.

The following is principally taken from the Memoir of Philip and Rachel Price, by their son, Eli K. Price, of Philadelphia, published a few years ago.

"The plain and simple memoirs of Philip and Rachel Price will readily and harmoniously blend in the narrative. United early in life, they lived together in cordial affection and harmony of views for more than half a century. Born and educated in the Society of Friends, and both at an early age brought under that Divine influence which alone can constitute them truly its members, they devoted their protracted lives faithfully to the duties which its discipline, its testimonies, and its faith enjoin. The one successively an overseer and elder, and the other a minister of the Gospel, they were never called to move under diverse views, and were only separated by the calls of duty leading to visits to distant places, when the sacrifice was made from the united sense of a religious obligation. These separations were felt to be privations in proportion to the intensity of their affection, but in a like degree was the sacrifice a source of consolatory reflection, when their minds were brought to the test of the inquiry whether they had fulfilled the Divine injunction laid upon them. In the performance of the services required they were often separated in person, but in harmony of feeling, devotion to duty, love for each other and for their Maker, there was ever unity in mind and spirit.

"Philip Price was born the 8th day of the first month, 1764, and was the fifth in the line of lineal descent from Philip Price, who came into Pennsylvania with the Welsh settlers, who in 1682 took up Merion, Haverford, and Radnor townships, and increasing afterwards settled the townships of New-town, Goslen, and Uwchlan, (1 Proud's His. 221.) The name was continued to him through but a single male representative in each generation from the first settler. His father, Philip Price, of Darby, died 9th mo. 17th, 1811. His mother, Hannah Bonsall, of Kingessing, was of English descent, and of a family of the first settlers in that place. They were both members of the Society of Friends in good esteem, the latter an elder, lived together in close harmony half a century, and extended to their children the guarded education recommended by the discipline of their religious society.

"Rachel Price, born the 18th day of 4th month, 1763, was a daughter of William Kirk, of East Nantmeal, Chester county, the tenth child of Alphonso Kirk, who came from the North of Ireland, and settled in Centre, New Castle county, in 1682, (1 Proud, 218,) and of Sybilla Davis, who was of a family of early Welsh settlers. They were also members and held in esteem in the religious Society of Friends, and their children received from them the religious care customary in that Society.

"The parents of neither were wealthy, and as a grazer in Kingessing, Philip Price in the same season suffering the loss of his stock of fat cattle by the British, and afterwards of his poor cattle by the American army, during the revolutionary war.

"William Kirk, removing from his father's residence near Wilmington, prior to the middle of last century, was a pioneer in a new settlement, and encountered the usual hardships and perils of those who first penetrate the wilderness, to fell the forest and reclaim

the earth for cultivation. At an early period of this settlement, when the clearing was small and the crops in proportion, a severe winter came on, with a heavy snow three or four feet deep, and drifting, made the roads almost impassable. It found them destitute of provision. The father rode all day to procure a supply, but returned at night exhausted and sick, without any success. The feelings of the wife and mother were roused to make another effort to avert starvation. She set off next morning and beating her way through the snows on horseback, reached George Ashbridge's mill, near Milltown, near Westtown School, a distance of about 18 miles. She offered her web of homespun and next year's crop in pledge for meal; frankly confessing that they were without food and without money. The miller—honored be his name, as yet it is in Chester county and the city of Philadelphia in the third and fourth generations—took only her word, and furnished her the meal, and offered to supply the family until the next harvest. The husband in her absence had appeased the sharpest cravings of their children's hunger by the risings of the kneading bowl, and at night they found respite in sleep. But the sleepless husband watched in deepest anxiety and sympathy for her return all the night long, during which the heroic wife had battled with the snows. She reached their cabin in the morning, with the precious store for relief, and the husband and wife, overcome with joy and gratitude, fell into each other's arms and wept,—much to the astonishment of her young brother, a lad of ten or twelve years of age, at such a manifestation of rejoicing,—who, sensibly, hastened to make a pot of *ovush* for breakfast. This relief from the extremity of peril, our mother often told us with a like emotion, her father never could relate without shedding tears; and with tears the narrative is now written, and will often so be read by the descendants of William Kirk. It is due to truth, however, to say that the courageous woman was the first wife, Mary Buckingham, and Rachel Price was a daughter of the second wife of her father.

"An amusing substitute for the mail occurred between the families. William Kirk took with him to the new settlement a dog from his father's house. It occurred that the dog got his feelings hurt and travelled off to his old home, whence, upon the like offence being taken upon a like show of disrespect, he travelled back again. Observing this infirmity of temper, or perhaps a proper self-respect and dignity, it was practiced upon so as to make him the bearer of letters to and fro, inclosed in a bladder tied round his neck, so as not to be wet in swimming the Brandywine. The letter adjusted, the provocation to a departure was administered, and the excited temper sped the post dog, unconscious of the calculated purpose of which he was the victim, a distance of thirty miles, at the end of which he was welcomed by food and caresses. This incident may not be destitute of instruction to others than the canine race against suffering their infirmities to be played upon for the advantage of those more cunning than themselves."

"Philip Price was carefully educated according to the custom of Friends in plainness of speech and apparel, which he kept to in obedience to their desires, until about the 18th year of his age, when a circumstance occur-

red which he regretted, and which caused him strong compunctions. He was invited to join a pretty large company of young persons, male and female, some of them older than himself, who were going down to Shrewsbury, N. J., to attend a youth's meeting. His parents discouraged his going, on account of his youth and the company not being thought suitable, but he persisted in his designs; and unknown to them procured a new coat, had it made in the fashionable style of the day, put it on and joined the company, not however without feeling strong convictions for the course he was pursuing. Some months after his return from this visit, he went with some of the same company to London Grove Quarterly Meeting. When near the close of the meeting for business, that worthy friend Jacob Lindley, was led in a powerful manner to address an individual state, who he felt was in danger of being drawn off from that pure state of innocency and self denial which leads to peace and happiness; he cautioned, counselled, and encouraged to faithfulness, in yielding to the impressions then felt, and the reward would be sure. P. P. sat in the back part of the house in deep contrition; when the women's meeting closed, his companions urged him to go out with them, that their company was waiting, &c.; he let them pass by, and retained his seat under very tender impressions, resolving that if the Divine hand would be with him, and His arm round about to direct and strengthen, he would give up in obedience to the heavenly call and invitation of Divine love to his soul. He let all his companions go, and returned to his home under precious feelings which he kept to himself. Quietly abiding under the operation of these impressions, he felt it right after a time to take up the cross, and again resume his plain dress, to which he kept during a long, useful and consistent life. Thus commenced, in a ministration that made one as a spiritual father, the instrument of arresting an erring son, a friendship, that made them in after life, affectionate co-laborers in the services of the church, and in the cause of humanity."

The Principle of Accommodation.

Whoever has anything to do with machinery knows the indispensability of oil to keep it in running order. Without it, wheels and pistons rub, crack, work slowly and irregularly, and at length utterly refuse to move. Yet, however massive and powerful the obdurate iron may be, however firmly it may resist all attempts of force to stir it, it yields at once to the gentle and mollifying influence of the drop of oil, and returns with alacrity and speed to its accustomed work.

Something like this may be seen in all the machinery of social life. It needs the oil of accommodation to keep it running smoothly and pleasantly. There may be firmness and force, solidity and strength, but if there be not also the spirit of gentle courtesy and goodwill, social intercourse will be a rough collision, producing jarring and grating sounds, and society itself will utterly fail of accomplishing her true ends. This is frequently undergone as among the minor virtues. If a man be honest and upright, giving every one their rights and asking no favors, minding his own business and interfering with no one, it is supposed that his debts to society are paid and that no more should be expected from him. It is even affirmed that the principle which

bids us accommodate our words and actions to the condition or habits or opinions of those around us, has in it the danger of imparting a false appearance or deceptive coloring to our real sentiments. If we are constantly on our guard lest we give offence, and anxiously striving to please, we shall be tempted to practice some degree of insincerity to conceal what would be likely to meet with disapproval or to profess more than we really feel.

It is, however, rather in the manner than the matter of our intercourse that the true spirit of accommodation consists. No insincere profession or weak suppression of our opinions, or even deceptive silence, can take refuge under the name of accommodation. What we shall say or do must ever be guided by the higher law of truth; but how we shall speak or act may fairly be decided by kindness, sympathy and good will. As a general thing, it will be found that it is not the truth which offends, but the imperious, overbearing or dogmatic way in which it is uttered. "Speaking the truth in love" is a high art, in which we have as yet made but small attainment.

There are, however, countless other ways in which this principle of accommodation serves to oil the wheels of society, and keeps them running smoothly; ways where no question of truth or sincerity comes in to complicate our course. It is chiefly in the little things that occur hourly in every one's life that it is needed. Who has not felt the difference between an orderly, good-humored crowd and one all elbows and push? What customer does not appreciate respectful and polite demeanor in the salesman? And what salesman does not feel grateful if the customer be careful not to give needless trouble? So, in every relation of life, and in every moment of intercourse, a little pains to please, a little effort to avoid giving pain, a little tact to steer clear of unpleasant topics, a little insight into others' feelings, a little tenderness of touch in dealing with them, will do so much to make life happier and better that it seems strange they are not universally adopted.

There are some who think that "giving up" one's own whims or ways or desires is a sign of weakness. They pride themselves on being strong, firm and unyielding; thus they dwell in a continual state of friction with their neighbors, disputing over trifles and poisoning their own and others' happiness for fear of being deemed soft and irresolute. Yet pliancy and strength go hand in hand in the finest natures. Those who are as firm as a rock where principle or truth is concerned, are of ten most yielding and facile in minor matters. Courtesy and kindness can be practised by all, and none who appreciate their value to humanity will ever desire to be exempted from their faithful observance.—*Ledyer.*

The private, as well as the more public devotion to which I was witness, wrought much consideration and deep inward thoughtfulness, especially as respected participating in what is termed the sacrament, or the Lord's supper, as it came in usual course to be administered by my brother. It had been, on former occasions, a solemn ceremony of peculiar comfort to my longing soul; and I had much conflict and prayer that I might be satisfied whether the outward and visible sign was important to salvation. With reverence, deep humility and fear, I received the bread and

wine. I sought no human counsel, but the satisfactory, abiding instruction on my own mind was, that the inward and spiritual grace of which this was only the visible sign, must be something of a higher nature, not dependent upon uncertain means. The best teachers were pleased to calm and quiet my mind on this important subject, and I a more repeated the ceremony.—*M. Capper.*

For "The Friend."

It cannot be denied that the state of the church now, as has perhaps ever been the case, calls for mourning, deep and well. And even suffering with its Holy Head. But this so far from being an occasion of alarm or even of discouragement, should but incite to increased diligence in the way and work of the Lord, remembering what He himself said "It is enough for the servant to be as his master," &c., and, as He has suffered for us in the flesh, it is but in accordance with the commendation of the apostle to seek to arm "ourselves with the same mind;" and resignedly, in our measure, drink of the cup He drank of, and be baptized with the baptism He was baptized with; striving, in the ability which He bestows upon His dependent, obedient little ones, to fill up our measure of the cup of suffering for His body's sake, which is the church. As this is the case, we believe, that He who looketh on the heart, and who knoweth the sighs and cries and integrity thereof, will in His own time arise for the help and deliverance of these; and will proclaim seasons of release wherein His heart felt, soothing, sustaining presence shall prompt the acknowledgment, "Hitherto the Lord hath helped." Thus confirming the faith of these in His almighty, ever-present, life-giving power, He will no less "give beauty for ashes, the oil of joy for mourning, and the garment of praise for the spirit of heaviness." Then also will the promise be fulfilled, "The lame man shall leap as an hart, and the tongue of the dumb sing: for in the wilderness shall waters break out, and streams in the desert." To the praise of His grace who worketh in us mightily, as the heart is brought into a state of humble, passive, child-like obedience to His ever blessed will.

Then notwithstanding such a day of peculiar trial and close proving, wherein in reference to a too greatly lapsed church and people, the plaintive language of the Most High may solemnly come home and plead with us: "I remember thee, the kindness of thy youth, the love of thine espousals, when thou wentest after me in the wilderness, in a land that was not sown." A day wherein many are running to and fro, and crying, "Lo here, or lo there," and knowledge is increased; but at the same time when jealous feelings and fears at times find place with some for the ark of the testimony, because of the evident want of a more saving knowledge unto salvation, even that deep inward acquaintance with the birth of Christ in the heart, and with life and power from Him—that life which is the light of men, and that power of God and wisdom of God which is Christ revealed in the soul—being too greatly wanting among us. I say notwithstanding this, how precious is the declaration and assurance, "The foundation of God standeth sure, having this seal, the Lord knoweth them that are his." We believe also that the God of all grace is calling sons and daughters to this living founda-

tion by ennobling their souls with His love, and through the strivings of His Spirit in the secret of the heart, is awaking their minds to the importance, above every thing else, of buying the pearl of great price by yielding themselves wholly to the cross of their dear Redeemer, who so patiently endured the same, despising the shame, for them. This cross faithfully taken up and worn, crucifies to the world, and tends to anoint and make single the eye to see with clearness what His will concerning them is, and which likewise gives strength to fulfil it, so that a building on the foundation of the Prophets and Apostles, Jesus Christ himself being the chief cornerstone, is seen amongst us to the glory of His power. He can work and who shall let it.

This hopeful prospect should so animate the hearts of cast down ones, that with increased dedication and fervency they should pray to the Lord of the harvest that He would strengthen the hands that hang down through weakness, and confirm the hearts of these to run the way of His commandments with enlarged hearts; and also that He would, in condescending heavenly mercy, call, qualify, equip, and send forth more laborers into His harvest.

These feelings should be deepened and increased from our present state of strippedness and mourning on account of the removal from works to rewards of those, worthy of honor, who as standard and burden-bearers, are held in affectionate remembrance for the service done in their generation in endeavoring effectually to turn the battle to the gate. He who prepareth the heart to pray with acceptance before Him, is no less a God that inclineth His ear to hear; and will not turn away from the out-pouring, pleading entreaty of His faithful, dependent children. He knoweth the stripped condition of His church; and will, as we in faith and patience reverently beseech Him to help us, cause the mountains to flow down at His presence, and the little hills to rejoice on every side; and will give sheaves of increase to His wrestling, trusting heritage. His is the power, and to Him belongeth the praise and the glory forever.

The Climate of Iceland.

As soon as the sun rises in the northern hemisphere, and the air gradually becomes warmer, loud crackings in the ice announce its breaking up, and its commencing movements, which are hastened by the fierce storms from the south which then prevail. Carried south by the polar current, they reach Iceland in the beginning of spring; the larger and more detached masses moving slowly over an immense extent, meeting more obstacles from the land toward the south, arrest the masses to the north until the pressure is so great that they precipitate themselves on the north coast of Iceland with terrible force. For a short time the passage between Greenland and Iceland is obstructed, and the latter is then blocked in the northward also, and sometimes with such a depression of temperature, that the detached ice is again frozen into a solid sheet.

Here Iceland performs its first important office in the physics and meteorology of the globe; it arrests the destructive mass of polar ice, and allows the establishment of the currents in their normal direction, receiving and moderating the intense cold and the conse-

quent storms. As soon as the obstruction is complete, the waters from the north press upon the accumulated ice, while those from the south, arrested at the northwest point of the island, undermine and cut away the opposing ice, and soon hollow out a passage, through which the accumulated waters from the north rush with violence, carrying with them the ice which blocked Iceland; thence the masses are floated south by the currents, tides and winds, and gradually melt in the warm water. Those which are below Långanus do not participate in the movement, and here the ice remains for a longer period.

This is the usual course of the ice, which begins to move in spring, with successive arrivals to the end of summer, when the thaw ceases, and is seen no more until the next spring; but occasionally, as in 1873-74, a considerable movement occurs in the winter.

If we consider the immense extent of the icy mass thus put in motion, we readily understand the great climatic changes which must result. On the 14th and 15th of April, 1874, occurred from this cause, the most violent storm remembered in the island, extending over a distance of more than 1000 miles from north to south, and probably within a few degrees of the north pole.

The coldness of their winter depends mainly on the formation of the Greenland ice; when the large masses are arrested by Iceland their summers are cold, and those of northern Europe warm; when they float off to the south, the season is mild in Iceland, as the gulf stream gets further north, and the summer of England and northern Europe is cold. The average temperature at Reykjavik is about that of Moscow, in summer ranging from 53° to 75° F., and in winter 29°; average for the year 29°; at Akureysi, in the north, in summer 45°; in winter 20°; and for the year 32°; but in the north the temperature may rise to 75°, and fall to 20° below zero.

The geographical position of Iceland is, therefore, very important, as, with Jan Meyen and Spitzbergen, it forms a natural barrier against the desolation of northern Europe by the ice from the arctic regions; should Iceland disappear beneath the waters, Norway would have the cold of Greenland, the north of England would become frozen, and Greenland would be green again. There is geological evidence that Iceland was uplifted toward the end of the glacial epoch of northern Europe, and this would explain the traces of a milder climate, as indicated by plant and animal life in Greenland before the advent of man. Indeed from some cause not well determined, we have reason to believe that Greenland has been green, and that Iceland possessed forests, even within the historic period; the complete disappearance of the Norse colonies in Greenland in the fifteenth century, and the repeated allusions in the Icelandic Sagas to a vegetation now unknown there, seems to show that the climate has become more severe than when the Norsemen sought there a shelter from the persecutions of Harold, the Fair-haired, a contemporary of King Alfred of England. It is almost certain that the climate has undergone a great change, even during the historic period, caused doubtless by the accumulation of the polar ice, and the consequent increase of the snowy mountains, and with them a diminution of temperature. According to their sagas, grain formerly grew in Iceland, and trees of considerable size;

their trunks are found imbedded in the morasses; and houses and even ships in comparatively modern times, are said to have been built of native timber. There have probably been several alternating epochs of cold and heat, corresponding to the varying amount and extent of the ice in the different glacial epochs which modern geology has indicated in northern Europe.

The snowy mountains of Jökuls are seen in clear weather, many miles at sea; though compared with the alps they are insignificant, the highest being only five thousand feet high, yet, as they rise almost from the level of the sea, their masses seem stupendous. Their production depends on the same causes as the glaciers of the alps, from the snow and the condensed fogs; the outlines are generally rounded, the surface of the underlying trachitic rock having been subjected to the eroding and polishing forces of the ice during the glacial period. They have the slow irresistible march of all such great bodies of ice, gradually invading the plains and dooming large tracts of land to sterility, removable only by some great geological change. It must be remembered that many of these jökuls are slumbering volcanoes, the ever-present heat from which melts the lower strata of snow, sometimes deluging the valleys and pasture lands with immense floods of water and fragments of ice; the streams which pour from these jökuls constitute the short, furious and ice cold rivers which the traveller has so often to ford.—*Dr. Kneeland.*

Serialized.

When the affairs of the morning were transacted, it was almost her invariable practice to retire about noon, with the bible or some other religious book, where a portion of her time was spent alone; from which retirement she often returned with evident tokens that her eyes had been bathed in tears.

She was remarkably well acquainted with the Holy Scriptures as also with the writings and characters of our ancient worthy friends, together with those of her own time; frequently expressing, "The many advantages she reaped from often conversing with the dead and absent;" endeavoring to cultivate the same disposition in her family, by often calling them together in the winter evenings, and requiring one of her children to read audibly in the bible or some other religious book; repeatedly observing to them, "The benefit which attended preserving the characters of those faithful ministers and elders in the church, whose pious lives and happy dissolution, if held up to the view of posterity, might be a means of kindling the same holy zeal, and resolution to tread in their footsteps."—*Account of Ellen Evans, in Piety Promoted.*

The idea that Chinese printing is all done from blocks is erroneous. Notwithstanding the multifarious wood-signs which go to make up a Chinese book, millions of pages have been printed in the best style during several years past with metallic movable type. Composition used to be, it is true, a very laborious task. Five or six thousand different wood-signs (*types*) entering, for example, into such a volume as the Bible, the compositor's task in former days involved a great deal of pedestrian labor, in addition to memory and skill. About twenty years ago, how-

ever, an intelligent missionary printer, by a careful enumeration of the different words, signs, and calculation of their respective proportions in the language, invented a polygonal type-case, with larger and smaller nests, so compact that the compositor now is as stationary as if he were manipulating the letters of the alphabet. The Bible Societies of America, England, and Scotland, besides private individuals, issue every year a very voluminous literature in this way.—*Printers' Gazette.*

Impure Literature and Crime.—Thomas Chambers, speaking at the anniversary meeting of the Christian Colportage Association for England, said the spread of education had awakened an appetite for literature that was highly useful or highly detrimental, according to the class of books supplied. The new power was not a mere unmitigated benefit, and its development needed to be watched. In spite of all efforts to supply useful reading, vicious and unwholesome publications would find readers, and therefore the work of this society was of importance in disseminating the better class of reading in those quarters in which the harm was being done. Harshly a boy or criminal of any kind was tried at the Central Criminal Court, whose position was not more or less due to the influence of bad literature. Given the taste for reading, and reading of some kind there would be; but while streams of literature flowed in every direction over the land, it was necessary that the supply of wholesome publications should be conveyed to those who needed it.—*City Press.*

Another has been added to the uses to which paper may be applied. Captain Frederic Warren recently invented a method of preventing ships' bottoms from fouling, which consists in the application of a coating of brown paper. It has been proved by experiment that none of the lower forms of animal life will attach themselves to ships' bottoms if covered with this material. The experimental trials have been completely successful. It has, however, often been observed that no sooner is one great improvement discovered than it is superseded by another, and in this case, according to a recent report which appeared in the *Times* newspaper, brown paper in its present application will soon be displaced. It has been discovered that by simply subjecting, for a considerable period, iron or steel to the action of superheated steam, it becomes coated with a species of oxide which the file will not touch, and which is absolutely impervious to rust or the action of the atmosphere, and it is believed that it will also repel the attacks of sea water and molluscs.—*Paper Trades' Journal.*

A New Orleans newspaper notices the curious fact that different weathers and climates prevail on the two banks of the Mississippi River. A frost on one side seldom passes to the other, and while the right bank may be flooded with copious rains the left may be suffering from severe drought. The west bank regularly produces heavier sugar crops than the east bank, and the difference is constantly increasing. During the last year the west bank produced 56,350 hogsheads of sugar, against 34,901 on the east bank, showing that the former was 61 per centum more productive than the latter.

THE FRIEND.

SIXTH MONTH 23, 1877.

SUMMARY OF EVENTS.

UNITED STATES.—The ship *Western Empire*, drawing 21 feet 6 inches, went to sea through the South-west Pass of the Mississippi, lately. She is the heaviest draft vessel that ever left New Orleans. Her cargo, consisting of 6227 bales of cotton, is the largest that has left that port since the war, and it is said to have the greatest number of pounds to the registered ton ever sent from any American port.

The total amount of one and two dollar notes in circulation is shown by the books of the Treasury Department to be \$51,404,511. The amount of such notes in the Treasury, and reserved for use, is \$10,183,387. The amount in the Bureau of Engraving and Printing, prepared or nearly ready for delivery, is \$9,749,372.

The Secretary of the Treasury has directed the Treasurer to resume the issue of one and two dollar notes under certain limitations. Hereafter the Treasury will send notes of these denominations to Sub-Treasurers and National banks upon requisition, and will pay them out at the cash-room of the Treasury in sums not exceeding ten dollars at one time and to one individual. The various Sub-Treasurers will pay these notes out under like limitation.

Oats have been very general in Alabama, and have been of great good to the crops. Oats are comparatively a failure, the wheat crop promises remarkably well, also corn and cotton.

The Indian Office is advised by Inspector Kemble of the arrival of the Ponca Indians at their new reservation in the Indian Territory, after a hard march from Nebraska. The Indians are apparently satisfied with their new country.

A telegram from Winnipeg reports that Sitting Bull, with 2500 Indians, is between Mount Mountain and Fort Walsh, and intends to settle in Canadian territory. His trophies include the complete outfit of Custer's party. He justifies his hostilities on the ground of the violation of the Black Hills treaty.

The exportation of fruit from the United States to Europe, is largely on the increase, during the past year \$2,500,000 worth was sent, against \$600,000 during the preceding year.

The Chief of the Bureau of Statistics has received information from Glasgow, stating that the importation of American fresh meat into that city has greatly checked the previous steady increase in the slaughter of cattle. Last year 58,921 oxen, 175,950 sheep, 43,015 hogs, and 174 calves were slaughtered, being a decrease of about 1500 cattle, 25,900 sheep and 9000 hogs, as contrasted with 1875.

During the 5th month, 7,294,765 pounds of fresh beef, valued at \$699,076, were exported to Great Britain and Ireland; 5,069,700 pounds were shipped from New York, and 2,227,500 pounds from Philadelphia.

Several delegations from different parts of the South have visited President Hayes lately, requesting executive recognition in favor of various applicants for official positions in their section of the country. They have all been treated with the utmost courtesy, and listened to patiently.

The general tenor of the views of the President, as expressed in his communications that have visited him from the south, has been to the effect that his aim is to place the best men possible in public positions, looking to the general welfare of the whole people and the material interests of the States and communities in which they are to hold office. The delegations have all, without exception, assured the President of the hearty appreciation on the part of their respective sections of the policy which they understand is guiding the administration in so far as it relates to control of office in the Southern States.

The blackberry industry in Georgia, North Carolina and other Southern States, is about to open. The little town of Salem, N. C., containing only about 2000 inhabitants, has raised during these years over 3,000,000 pounds of blackberries, for which nearly half a million dollars was received. This was equal to over 9000 bales of cotton at ten cents a pound.

The *Galveston News* thinks the next census will show a larger increase in population and production in Texas than in any other State, and doubtless double the returns for 1870, when the population was only 818,570.

Woolen manufacturers in Rhode Island report more encouraging prospects than at any time in the last three years. Nearly all the mills are working on advance orders.

Iowa has 29,222 miles of railroad track. The value of railroad property in the State is \$22,421.24, a decrease of \$124,000 since 1876.

By recent forest fires in Michigan, over 1,500,000 of standing pine and other logs have been destroyed. Advertisers from Lompac, in Santa Barbara county, California, report that many square miles in that vicinity have been burned over. The grass and grain crops have been consumed, and many cattle have been overtaken by the flames and destroyed. The forests in the mountains west of Los Angeles are also burning, and many dwellings have been consumed.

Information has been received at the State Department, from the United States consul at Callao, giving an account of the loss of the ship *Sumera*, of Bath, M. in the earthquake wave of the 9th of 5th mo. last. It states that the ocean rose sixty feet, landed the *Sumera* ashore on the rocks, and carried her out again, while she sank almost immediately. Her crew had barely time to escape with their lives.

Interments in Philadelphia for the past week 305.
The Markets.—The following were the quotations on the 19th inst. Cotton, 11½ to 12 cts. Flour, \$5,75 to \$9,25 per bbl; the latter for Minnesota choice. Wheat, Penna. red, \$2; Penna. amber, \$2.03; white, \$2.21. Corn, 5½ to 60 cts. Oats, 4½ to 5 cts. Cheese, 4 to 4½ cts, as to quality. Beef cattle, sales of 3700 head for export, at 10 cts. per lb. Sheep, sales of 1700 head, from 4 to 5½ cts. per lb. Hogs, 4300 head, at from 7½ to 8 cts.

FOREIGN.—The Fishery Commission, appointed under the Treaty of Washington, began its sessions Halifax on the 19th inst. The proceedings are secret. It is understood that the claim for compensation for the loss of fisheries, filed by Great Britain, amounts \$20,000,000.

The Newfoundland seal fishery for the season resulted in a catch of 412,000 seals.

In the British House of Commons, on the night of the 12th inst., a motion for the abolition of capital punishment was rejected by a vote of 155 to 50.

The 18th inst. the Northumberland coaleries have resumed work.

A telegram from Malta says accounts from Tripoli and Barbary state that an area of a hundred miles has been devastated by locusts. The crops are entirely destroyed and famine is believed to be imminent. Several distress already prevail.

The railway bridge over the Meuse, at Rotterdam, by which direct railway communication between Antwerp and Rotterdam has been established, was formally opened on the 28th of last month. It cost near a million of dollars.

The International Convention held upon the question remaining work on the St. Gotthard tunnel announced that 2,000,000 are still required to complete the undertaking. Of this amount they propose that Germany contribute \$2,000,000, Italy \$2,000,000, Switzerland \$1,600,000, and the Company \$2,400,000.

An Amsterdam dispatch says the biennial election of half of the members of the second chamber, to replace those retiring by rotation, has resulted in the return of all liberals.

A telegram from Constantinople says the Porte refuses the request of England to neutralize the Suez Canal.

The *Standard's* Erzeroum correspondent writes that sickness, especially typhus, causes greater gains in the Turkish provinces than the reforms are doing at present. During the last six months at least 10,000 men have died in hospital.

The Russians in Rumania and neighborhood are estimated at 200,000, including 27,000 cavalry.

The Commander in Chief of the Ottoman army has ordered that every Roumanian soldier taken prisoner should be put to death.

Before leaving Belgrade, Prince Milan was reminded that any attempt on the part of Serbia to resume hostilities would be immediately followed by Austrian occupation.

The steamer *China*, which arrived at San Francisco lately from Panama, brought advices confirmatory to those from the *Alvarez*, that reinforcements are being instantly landed Indian officers there. Alvarez was aided by about one thousand Indian soldiers. After its occupation by the *Lerdists*, Acapulco was bombarded by the Diaz gun-boats, and the bombardment was in progress on the 5th inst., but little damage had been done.

For "The Friend"

Selections from the Life of Thomas Story.

(Continued from page 323.)

Sometime after I had parted with these books, observed a cloud come over my mind, and an unusual concern; and therein the two sacraments, commonly so termed, came afresh to my mind, and divers scriptures and arguments, pro and con; and then I was apprehensive the doctor was preparing something that sort to discourse me upon. I began search out some scriptures in defence of my own sentiments on those subjects; but as I proceeded in that work, I became more uneasy and clouded, upon which I laid aside the scriptures and sat still, looking toward the Lord for counsel. I considered the doctor as a man of great learning, religious in his way, an ancient preacher and writer too, famous in his time, and a throne among his brethren; and that he might advance such subtleties as could not readily confute, nor would confute to, as knowing them erroneous, though might not be suddenly furnished with arguments to demonstrate their fallacy; and so might receive hurt.

Then it was clear in my understanding, that as he was in his own will and strength, though with a good intent, searching the letter, and depending on that and his own wisdom, acquisitions and subtilty, leaning to his own spirit and understanding, I must define that way, and trust in the spirit of Christ, the divine Author of the Holy Scriptures.

This caution was presented in the life and virtue of truth, and I rested satisfied therein and searched no further on that occasion.

When I went to his house he entered into discourse on those subjects; and had such passages of scripture folded down as he pursued to use: when I observed it I was concerned that my sight of him in my own chamber at Carlisle, and of his work, some days before, was right, and my mind was strengthened thereby.

But before he began to move on the subject, he dismissed every one out of the room, so that himself and I remained alone.

The first thing he said, was in a calm manner, to admonish me to be very cautious how I espoused the errors of the Quakers; for he had heard of late, and with concern, that I had been among them, or seemed to incline that way. I answered that I had not been much among them, nor seen any of their books but those I had sent him; and knew not of any errors they held. "Yes," said he, "they deny the ordinances of Christ, the two sacraments, baptism, and the Lord's Supper;" and then opened his book at one of his down-folded leaves, where he read thus: "Unto the church of God which is at Corinth, to them which are sanctified in Christ Jesus, called to be saints." 1 Cor. i. 2. And at another folded-down part, he read thus: "For I have received of the Lord that which also I delivered unto you, that the Lord Jesus, the same night in which he was betrayed, took bread and when he had given thanks, he brake it and said, Take, eat; this is my body which is broken for you: This do in remembrance of me."

"After the same manner also he took the cup, when he had supped, saying, This is the New Testament in my blood, this do ye, as often as ye drink it, in remembrance of me: for as often as ye eat this bread, and drink this cup, ye do show the Lord's death till he come."

Upon these scriptures he raised this argument, that though the Corinthians, at that time, were sanctified in Christ, and called to be saints, yet they still needed this ordinance, and were to continue in it, according to the apostle's doctrine, till the coming of Christ at the end of the world; and he did not think the Quakers more holy or perfect than the Corinthians at that time; and consequently that no state in this life can render that ordinance needless to them, or overgrow it. To this I replied, That though some of those Corinthians had obeyed the call of God, and were at that time sanctified in Christ; yet others of them had not obeyed the call, but were remaining in gross sins and pollutions. But as they had been heathens, and convinced by the ministry of that apostle, as appears by the beginning of the second and fifteenth chapters of that epistle, he had first of all preached to them Christ's coming in the flesh among the Jews, his life, miracles, and doctrines, death for our sins, and resurrection from the dead, as saving truths; but does not so much as mention this supposed ordinance among them.

But, considering their weak and carnal state, and incapacity then to reach the knowledge of divine mysteries, the apostle had, in their initiation into the Christian religion, related to them the sayings of Christ on that subject; and they had been in the practice, or rather abuse of it, till the time of writing that epistle. Yet if the words of that epistle

in that place, be carefully and impartially observed, without prepossession or prejudice, and compared with other scriptures, it will appear that there is not any positive command for it at all, much less is it made a standing ordinance; but left to the option and discretion of his disciples, to whom it was first mentioned, how often they should do it, and consequently, also, how long they should continue it; as appears by the same text now adduced, viz: "This do as often as ye do it in remembrance of me."

But to set this matter in a clearer light, it is well known that at the time of the redemption of the Jews from their Egyptian slavery, the passover, with the Paschal lamb, was instituted as a standing ordinance in commemoration of it, until Christ the Lamb of God, and antitype of that figure, should come. But as Israel, offending the Lord, was afterwards sent into captivity under the Babylonians, they could not in that state, and under that government, celebrate it in form; and therefore they invented another way to keep that great deliverance in memory, which was this:

The father or chief of the family at the proper time of the Paschal supper, took bread and blessed it, saying, "Blessed be thou, O Lord our God, who gives us the fruit of the earth," then dividing it among the company; in like manner also, he took the cup, and blessing it, said, "Blessed be thou, O Lord, who gives us the fruit of the vine;" this they did in a solemn manner, remembering their Egyptian slavery and deliverance, lamenting their present state, acknowledging their sins, and the justice of God in their punishment, and hopes of his mercy from his former kind dealings and gracious promises.

The Jews being thus initiated into this practice, upon so solemn an occasion as the Lord's being pleased to remember them with redemption a second time, the succeeding generations continued it, as incident to the passover, until the Lord Christ, the antitype, as well of the Paschal lamb, as of the bread and wine, did come; who, when he appeared, was declared by John the Baptist to be "The Lamb of God which taketh away the sin of the world;" and he declared himself to be the "bread of life;" the living bread which came down from heaven; proclaiming also, and that very emphatically, that his "flesh is meat indeed, and his blood is drink indeed;" that "except they ate his flesh, and drank his blood, they had no life in them."

And all this was meant of the Spirit of Christ, and not of his flesh; "it is the Spirit that quickeneth, the flesh profiteth nothing."

The time drawing near when the Lamb of God was to be slain, and offered as a sacrifice, declaring the mercy of God the father, who sent him in love to the whole world, he then said to his disciples, "with desire I have desired to eat this passover with you before I suffer." And at the time of it, as father and

chief of his flock and family, he celebrated the passover in form, with this difference only, that whereas the Jews, until that time in the celebration of it had looked back to the type and outward deliverance from Egypt, the Lord now directs them to himself, as the anti-type of all figures; and tells them he would not eat any more thereof until it should be fulfilled in his father's kingdom; nor drink of the fruit of the vine until that day "when he should drink it new in his father's kingdom with them." Which eating and drinking in the kingdom of God cannot relate to material bread and wine, which can only be exhibited as symbols of the outward body of Christ, and the blood of that holy body; which to be eaten and drank in a natural sense, profiteth nothing; but to the all-quickening virtue and power of his Holy Spirit which is all in all, and the true feeling of the commonwealth of the whole Israel of God. Therefore this passover, or any part or relative to it, whether bread, wine, or any other matter in it, could be of no further use or obligation to the disciples of Christ, than till they should experience in themselves his divine and spiritual appearance and coming in them; and him to be the same to their souls or minds which natural food and drink is to the body; its support, strength, nourishment and means of duration.

This coming of Christ, as such, can mean no other than his being made manifest in a spiritual administration: for, as he is that eternal Spirit of Truth and Word, wisdom and power of God, it is not strictly proper to say of him, in that sense, that he shall come or go anywhere, but to be made manifest; for, as such, he ever was, is, and will be, omnipresent, and never absent from any place or time.

His coming then must intend his powerful manifestation where he already is, and not a locomotive coming from where he is, to any other place where he was not before: "For the heaven of heavens cannot contain him." 2 Chron. 10. 6.

Seeing then that this was only the passover, and the terms of the application of it to himself not institutive of any new command or ordinance, but a liberty to do or not to do it, at discretion, "this do ye as oft as ye drink it in remembrance of me," laid no obligation upon them to do it any more at all; it being ended by the manifestation of its antitype; and in the nature of the thing, could be of no further obligation or reasonable use, when Christ himself was witnessed in them, to be that eternal, never-failing, divine substance.

But the apostle Paul, whose concern for the Jews, and zeal for the conversion of the Gentiles to whom in an especial manner he was sent, engaged him "to become all things to all men," that by all means he might gain some," recommended to the Corinthians the practice of the passover, with the new application of it to Christ, at the time of their first believing in him by that apostle's ministry, that being yet carnally minded, they might have an outward communion, till the true communion should be made known; which their state, at that time, could not bear; as, in point of prudence only, he practiced some other legal rites at some times; which in his doctrine, he condemned at other times, where the state of the people was able to bear it.

It is much more likely, considering the end and nature of the gospel, and its excellency

above the law, and all legal and typical rites, as substances exceed shadows, that the apostle observing how much some of the Corinthians had abused the passover in practice, and their very carnal state under it, was rather, by that epistle endeavoring to supersede it, and bring them off to the living substance, where he saith to such among them as were already sanctified, and to whom he inscribed his epistle, "I speak as to wise men, judge ye what I say: the cup of blessing, which we bless, is not the communion of the blood of Christ? For we, being many are one bread and one body; for we are all partakers of that one bread."

It is plain, therefore, that the communion of the sanctified and wise in Corinth, stood not in the bread which perisheth, nor in the wine of the grape, which some of the Corinthians were carnally abusing, but in the quickening Spirit and power of Christ, the true living, life-giving, and life-preserving bread; which daily comes from heaven, into all the sanctified and saved of the Lord.

This is that Spirit that quickens and preserves to life eternal; the flesh profiteth nothing; and since it is so, much less does any symbol of the flesh profit; but the divine substance only. This is that substance of which the apostle draws the comparison; "we being many are one bread."

For as wheat consists of many particular grains, each containing a distinct principle of life after its kind, and all of the same nature; which being broken and rightly prepared and ordered by the good husbandman, become one bread: even so is the church of Christ. Every member in his natural state, being alienated from the life of God, through the ignorance and darkness that was in him, and separated also one from another as without a proper medium and condition of union, but being ordered and prepared by the Father of mercies through Christ his eternal Word, they become one body and one spirit, the church; which is his body; the fulness of him who filleth all in all.

The substance of this was what I said to the doctor, though I have in this place expatiated somewhat further on the subject, and generally applied the scriptures; to which he made little other reply, than by telling me in a very calm and familiar manner, that as he had always believed it to be an ordinance of Christ, he had solemnly used it as such, and found comfort in it.

To which I returned, That I did not doubt but that he might have some satisfaction in it, since he believed it a remaining ordinance, and did it under that apprehension. Whosoever in his heart believes anything to be a standing duty in the church of Christ, which ever had any countenance in it by practice, and performs it faithfully, according to his belief and understanding, may find a satisfaction in it.

But since God in mercy is pleased to afford the living substance, without the use of those means which are supposed to lead to an end already attained, they can be no more a duty to such, and that is the real ease among the true Quakers who love and fear the Lord sincerely.

(To be continued.)

"If thou faint in the day of adversity thy strength is small."

Some Account of the Menonites in Lancaster Co., Pa.

Many of the readers of "The Friend" may not be aware that there is a large settlement of these interesting people in Lancaster Co., Pa., whose ancestors emigrated from Germany through the encouragement given them by Wm. Penn, about the year 1683.

The writer recently, in the prosecution of a religious concern to hold some meeting among them, had the opportunity of becoming somewhat acquainted with them and the ways. They are a very simple-hearted and interesting people, very frugal in their habit and manner of living, and entertain many sentiments much in accordance with the views of Friends. We were received kindly by them and encouraged freely to pursue our prospect. We found the name and character of William Penn was held in high esteem by them. He spoke of him to us at several different times and expressed their sense of the obligation they were under to him for their being possessed of, and settled in that exceedingly fertile and productive region of Pennsylvania. They said he never deceived their fathers, but all that he promised to them was strictly fulfilled. They related to us the tradition that when they landed, Wm. Penn sent some of their leading men out into Pennsylvania to see for themselves and select land to settle on. They went as far as the lowlands of the Brandywine, but becoming discouraged returned and informed him they had not found land that they had been given to expect, &c. that met their views as desirable to settle on. He replied, you did not go far enough, you should have gone to the Pequa and Conestoga creeks. They accordingly did so, and found land that suited them, and upon which they settled. We were shown one of the original deeds, with a large seal of beeswax suspended to it, and encased in a tin box about the size of an ordinary blacking box.

They are mostly thrifty farmers, and some of them, we should judge, are possessed of abundance of this world's goods, having fit and well cultivated farms, noble barns and comfortable houses. They are industrious in their habits, and may be said to be good liveries. They are very similar to other evangelized societies of Christians in the fundamental doctrines they hold. They believe it right to practice water baptism as a ceremony of initiation into the society, not by immersion but by pouring water upon the head. They do not lay as much stress upon it as some other societies, not considering it as a saving ordinance. They also practice the ceremony of bread and wine in commemoration of the Lord's supper, and also the washing of feet. This latter they practice twice in the year. They however agree with Friends in their testimony against oaths and wars, though in the case of the latter we understood they will pay the fine in lieu of personal service, but not to hire substitutes. They also hold a verified testimony against a paid ministry, of one which depends on a scholastic training for its qualifications; believing it to be the prerogative of the great Head of the Church to call and qualify for that service; but with regard to the manifestation of His will to individuals in the matter, or in other words, the call to the ministry, their manner of proceeding was very curious and interesting to us. In each congregation or district, which comprises mostly a section of some miles in ex-

ent, in which there are several meeting-houses in which they meet on alternate First days, here are generally, we understood, about three ministers, and when a vacancy occurs by death or otherwise, the members of the congregation are at liberty to select from the men members one whom they, after serious and prayerful consideration, apprehend to be fitted for the service. They each write on a slip of paper, and hand it in to their minister. If all the congregation thus fix upon the same name, which has, we understood, happened in one or two instances, he is considered then to be chosen. If, however, there are several thus elected, as is generally the case, the bishop and ministers of the diocese (which consists of several such congregations) convene together and assemble the candidates and have a corresponding number of books viz: one for each candidate, mostly a bible or hymn book with them. They then retire with the books into a room by themselves, and one of them, out of sight of the others, puts a slip of paper with a mark on in one of the books, he then turns away, and the others who have not seen which book the slip is in, step forward and mix them up. The candidates being called, and a prayer offered similar to that used when Matthias was chosen (see 1st chap. of Acts), they then step forward one by one and take a book, and whoever draws the one with the slip in is to be the minister. They consider that thus the Divine Will in the matter is made known. In the exercise of their ministry they differ from Friends; they believe that they are to preach at stated times, so that one or the other of them must preach every meeting day. They arrange the matter previously among themselves, and he that is so fixed on to speak is expected by private prayer to seek for Divine aid to enable him to perform the service. In their meetings they first sing a hymn, then the minister preaches and after that he prays: all the assembly kneeling; then another hymn is sung and the meeting closes. We understood that sometimes they had what they call a silent prayer, in which all the assembly kneel and remain in that posture some time. The meetings which they kindly appointed for us were mostly very large. The usual hour for gathering is 9 o'clock in the morning, though in some places they collect by half past eight. We informed some of their leading men of the way in which we held our meetings, and they kindly informed the assembly before we went in, and thus the way was prepared for us. The meeting-houses are very plain. We might almost take them for houses of our own Society, excepting that there was a sort of pulpit for the ministers to occupy. The men sat on one side of the house and the women on the other. The women took off their bonnets (which consist of a black silk hood with a large cape) and left them in an ante-room, and entered the meeting room with a neat, plain cap of thick muslin on the head, and took their seats. The young and old dressed much alike. The men did so generally wear what we call the plain coat, but quite a number of them, young and old, did so, and wore a broad brimmed hat, and looked for the most part like old-fashioned Friends. It was exceedingly interesting to us to see young men and young women dressed so plainly, and manifesting so much humility in their conversation and manners. We handed out among them, from

place to place, a number of copies of the Tract entitled, "Account of Friends," also of Barclay's Apology, and Penn's "No Cross No Crown," which were gladly received, especially the latter, as emanating from the hand of William Penn. Many of them speak that form of the German language called the Pennsylvania Dutch, though the more intelligent advocate the discontinuance of its use, and the adoption of the English. We received much kindness from them, had several very interesting visits in their families as we passed along from place to place, and felt much at home in thus mingling with them. Many of them we believe to be sincerely desirous of serving the Lord faithfully, according to the light and grace received. Some of the young particularly, seemed anxious to hear and know about our views, and we felt much nearness to many of them. In conversing with some of their ministers it seemed evident they deeply felt the responsibility of their position and were anxious to look to their Father in Heaven for help. The visit was deeply interesting and instructive to us, impressing upon our minds the language of the apostle: "Of a truth I perceive that God is no respecter of persons," &c. A large body of the same society have recently come over from Russia and are settled in Kansas. S.

For "The Friend."

Edward Barrough.

The life of this Boanerges and veteran in the Lamb's army is of peculiar interest to us because of the early age at which he was sent forth by the Spirit of the Lord to preach the everlasting gospel; the power with which he spoke tending so to break up not only the fallow ground, but the stony hearts of the many thousands who heard and received his ministry, and were turned thereby to the Lord Jesus Christ; and also the undaunted zeal with which he labored in the cause of Truth, together with his dying testimonies when called to put off the shackles of mortality, which was in the 28th year of his age.

Would that the diligence in business in doing the Lord's work, and the fervency of spirit which dwelt in and actuated this young man, together with the power from on high which attended his labors, might have more place with us all, the younger and the elder, that so a true hearted and chosen Jeshurun might come up in our day, verifying the prediction of E. B. that "that spirit which hath lived, and acted, and ruled in me, shall yet break forth in thousands." May the Lord of the harvest hasten it in His own way and time.

The following is abstracted from an account of this youthful and fearless David when contending against the Goliath's—the exalted and opposing spirit of the world—which it was his lot to have to wrestle and combat with.

Edward Barrough was born of honest parents, in the year 1635; and was in his childhood ripe in knowledge, and did far exceed many of his years. Gray hairs were upon him when but a youth, and he was inclinable to the best things and the best way of worship as practised by the best men. His natural disposition was bold and manly, dexterous and fervent, and what he took in hand, he did with his might. Loving, courteous, merciful, and easy to be entreated; he delighted also in reading the Holy Scriptures.

When it pleased God to visit his people in the north of England, this servant of Christ was early called, viz., in the year 1652, when about seventeen years of age. He was sent forth by the Spirit of the Lord to preach the everlasting gospel, repentance, conversion, salvation, and remission of sins, in the name and power of the Lord Jesus Christ, the Saviour of mankind; and was an able minister of the glad tidings of salvation. His ministry was made effectual by the mighty power of God, in turning many thousands from darkness to light; for as he began early, so he labored much in the heat of the day, breaking up rough places, and untilled ground, and often walked as it were among briars and thorns, which scratched, pricked, and tore with great opposition. But he broke through them all, not regarding the trials and sufferings he met with, for the good of souls.

His industry in the Lord's work was very great, he seldom having many hours repose, making his Master's work his *whole business*, not taking so much liberty as to spend one week to himself, about any outward occasion, in ten years; and it was his grief if any opportunity was missed in doing good. He was a man of no great learning, which men so much admire; yet he had the tongue of the learned, having had experience of the work of God in many conditions, so that he could speak a word in due season, to the understandings and consciences of all men with whom he had converse, for his words administered grace to the hearer.

At the age of nineteen, in the year 1654, he went up to London, and was one of the first who preached in that city, and great opposition he met with there; but God made his ministry effectual to the conversion of hundreds. He continued about London very much between eight and nine years, speaking of the things of the kingdom of God. His heart was much drawn towards London, and he often said when sufferings came for the gospel's sake, "I can freely go to that city, (i. e. London), and lay down my life for a testimony of that truth which I have declared through the power and spirit of God."

In the year 1662, visiting Friends in the city of Bristol, he took his leave, and said to many, "I am going up to the city of London to suffer among Friends in that place." A little after his return to the said city, he was taken from a meeting of the people called Quakers by soldiers under the command of Sir Richard Brown, mayor, and committed to Newgate by him, not for evil doing, but for testifying to the name of the Lord Jesus, and for the worship of God. There he lay in prison with six or seven score more of Friends upon the same account, many of them being shut up among felons in nasty places; and for want of prison-room they grew weak, sickened, and died, among whom this young man was one; his sickness increasing upon him daily, though in much patience he was carried through all.

He was in prayer often, both day and night, saying at one time, "I have had a testimony of the Lord's love to me from my youth, and my heart hath been given up to do his will. I have preached the gospel freely in this city, and have often given up my life for the gospel's sake. Lord, rip open my heart, and see if it be not right before thee." Another time he said, "There lies no iniquity at my door; but the presence of the Lord is with me, and

his life I feel justifies me." Afterwards he said to the Lord, "Thou hast loved me always, and I have loved thee from my cradle, and from my youth unto this day, and have served thee faithfully in my generation."

He spoke to Friends that were about him to live in love and peace, and love one another; and said, "The Lord takes the righteous from the evil to come;" and prayed for his enemies and persecutors, and said, "Lord, forgive Richard Brown, who imprisoned me." Again he said, "Though this body of clay must turn to dust, yet I have this testimony, that I have served God in my generation; and that spirit which hath lived, and acted, and ruled in me, shall yet break forth in thousands." In the morning before he departed, being sensible of his death, he said, "Now my soul and spirit is centred in its own being with God, and this form of person must return from whence it was taken." And after a little season, he gave up the ghost, as a martyr for the word of God, and testimony of Jesus.

He was born in 1635, began to preach 1652, and died 1662, of whose written labors there is a volume printed, containing almost nine hundred pages in folio.

A Carpet Pest.—Housekeepers, says the Rochester Express, may be interested in learning that an insect called the Anthrenus scrophularia, which devours and ruins carpets, has appeared in such numbers in Schenectady that the carpets all over that city have had to be taken up and cleaned. In Utica it has caused serious alarm. Carpets are not, however, its only food, as it infests wearing apparel hanging in closets or laid away in drawers. Unlike moths, it is said to prey upon cotton fabrics. It is a very common and destructive European insect, but has not until recently been detected in the United States. Its peculiar forte is the eating of carpets, and hence the familiar name, "carpet bug," which it has won. It belongs to the family known as the *Dermestidae*, which comprises several of our most injurious depredators on animal substances, and is entirely different in appearance and habits from the well-known carpet moth. It conceals itself beneath the borders of carpets nailed to the floor, and eats away those portions. Occasionally it gets in the cracks of the floor, following which, it cuts across entire breadths of carpets, leaving a line which seems to have been cut by the scissors. It destroys new as well as old carpets, and, if allowed to breed and multiply, may reduce us to bare floors soon. Professor J. A. Lintner, State Entomologist, describes these interesting *Anthrenus scrophularia* as a small ovate object, about one-tenth of an inch in length, thickly clothed with numerous short bristle-like hairs, and terminating in a pencil of these forming a tail. It is exceedingly active in its motions and glides away very rapidly. Like the house fly it disappears in winter, and eats only during the summer months. He said: "I captured several of the larvae and fed them upon pieces of carpets in order to rear them. In September they had evidently matured and assumed their quiescent pupa state within the skin of the larvae, first reared by a split along the back for the escape of the perfect insect. At this stage I was led by a study of its character to refer it, in all probability, to the genus *Anthrenus*. Last week I had the great gratification of obtain-

ing from the pupae the first example of the perfect insect. It was a very minute beetle, approximately one-tenth of an inch in length, but beautifully marked in a prettily arranged combination of red, white and brown. I had, beyond doubt, referred it to its proper genus. The detection of this insect adds to our fauna another species of the dreaded genus of *Anthrenus*, perhaps to equal in its destructive agency the well-known museum pest, the *I. varius*, formerly known as *A. muscorum*, the obtrusive guest of all our collections of natural history, whose ravages it seems impossible fully to guard against and so exceedingly difficult to control." This pest, which is called the buffalo moth, is committing ravages in New Jersey.—*Late Paper.*

EXTRACTS.

Selected.

"In your patience possess ye your souls,"

Be still, my soul!—the Lord is on thy side;
Bear patiently the cross of grief and pain;
Leave to thy God to order and provide—

In every change be faithful still remain.
Be still, my soul!—thy best thy Heavenly Friend
Through thorny ways leads to a joyful end.

Be still my soul!—thy God doth undertake
To guide the future, as he has the past;
Thy hope, thy confidence, let nothing shake.

All now mysterious shall be bright at last.
Be still my soul!—the waves and winds still know
His voice who ruled them while he dwelt below.

Be still my soul!—when dearest friends depart,
And all is darkened in the vale of tears,
Then shall that better know His love, His heart,
Who comes to soothe thy sorrow and thy fears.
Be still, my soul!—thy Jesus can repay
From His own fullness all He takes away.

Be still, my soul!—the hour is hastening on
When we shall be for ever with the Lord—
When disappointment, grief and fear are gone,
Sorrow forgot, Love's purest joys restored,
Be still, my soul!—when change and tears are past
All safe and blessed we shall meet at last.

Be still, my soul!—begin the song of praise
On earth, believing, to thy Lord on high;
Acknowledge Him in all thy words and ways,
So shall He view thee with a well-pleased eye.
Be still, my soul!—the Sun is life divine,
Through passing clouds shall but more brightly shine.

Selected.

Fiction in Public Libraries.

By William Kete, *Friends' Free Library, Germantown, Pa.*

Libraries are to our youth the first step in advance from their schools; these cannot formally developed minds, ready, in maturity of intellect, to grapple with the duties of life in all their intricacy and multiplicity of presentation. They serve rather for the gathering together of material out of which well-directed after-efforts will build up the mind to those systematically true proportions which fit it for its every-day social relations.

Our public schools are the places whence the children of our day are to gather the materials to be thus utilized, and the public are realizing the necessity of making them, as nearly as possible, fully fitted for the needs of education. The progress in that direction is encouraging, and we may safely assert that much of what remains to be done will in the near future be accomplished. We are yet greatly deficient in educational knowledge and experience, but a realization of our wants is forcing itself upon us, and we will meet the problem.

But the community that realizes the need

of universal education, and meets the want with well-appointed public schools, cannot long rest satisfied without supplementing these with the means of carrying on the good work thus begun. Public libraries are springing up in most places where these schools exist, showing the appreciation of this necessity.

How we, who have the dispensing of knowledge to young minds just coming from the guiding hand of the teacher and thrown upon their own judgment in the future development of their intellects, are to meet their wants, is a question the seriousness of which, I fear, is too much overlooked. Are we to throw open to them all the literature of the day, and let the good and the bad, the profitable and the pernicious, pass unguarded into their inexperienced hands?

Or should we not, as good citizens, step forward and supplement the teacher's labor by guiding the half-formed intellect into such readings as shall tend to make the coming man a good citizen in the community?

The latter is undoubtedly our duty; and whether it lays additional burdens upon us yea or nay, we will prove derelict to what is required of us as public officers if we do not accept the situation and earnestly bend our selves to the labor.

While our schools take forward the exceptionally few into higher educational proficiency, the most of our children leave them with little else than a very rudimentary education. The wants of the family early claim them as "bread-winners," and thus withdraw too many just as they are approaching a proficiency which would lead them gladly to seek further stores of knowledge. The free public library offers to these the only hope of future culture, while their unformed judgment greatly needs our fostering care. It is for this class I plead. Not having been trained for careful study, they naturally turn to books for amusement rather than information, and novels seem to them the source whence amusement is the most easily obtained, and if they can obtain them they will readily and eagerly peruse them. But what will be the result? Life, to the most of them, must be a scene of earnest labor to secure a comfortable subsistence for their wants. Do novels teach them contentment with their lowly but honest occupations? The factory girl, as she tends her loom or her spinning jenny, turns over in her thoughts the fortunes of the heroine of the last novel she has read, raised by impossible suppositions incidents from humble life to princely fortune, and she pines for a lover to so lift her into notoriety. Her mind is filled with false ideas of life, and she is prepared easily to be beguiled into an improper marriage, or to become the victim of some pretentious scoundrel. The boy reads of equally false deeds of daring—fortunes made by unjust dealings, glossed over so as to half conceal their iniquity—and his bewildered mind is unfitted for the hard duties of life, only by patient grappling with which he can reach that position which will lead him to competence and respectability. A dashing life on the frontier, or one of adventure in distant countries, is, to his mind, rather to be sought, than patient industry in the lot in which Providence has placed him.

These influences may not drive the youth of either sex as far as above hinted, but they do mislead them as to the every-day occur-

ness of life, and if indulged in destroy much of their happiness. I could tell of one young woman of my acquaintance, of fine education, who gratified a vitiated taste for novel-reading till her reason was overthrown, and she was, in consequence, been for several years an inmate of an insane asylum. Indeed, Peville in the "Dictionnaire de Médecine et de Chirurgie Pratique," vol. 1, tells of a boy ten years of age who became insane from reading romances. Instances could be furnished by the records of such institutions in too sad frequency; but we need not seek them. Have we the moral right to expose the young to such dangers?

George Ticknor, when he so earnestly labored with Edward Everett and others for the establishment of the Boston Library, strongly appreciated that the want of the youthful mind was instructive reading, not the "poor trash" of novels that so much abounds. See his letters to Everett in the second volume of Ticknor's Life.)

But I will be met with the assertion that young persons will not read unless tempted to do so by these exciting volumes. I can say that eight years of experience in the care of a library from which novels are strictly excluded enables me to state that such views are erroneous. If unprofitable books are detested them, they can be induced to accept better, and can be turned to useful reading by a title care on the part of the librarian. Applications for novels of some character are of most daily occurrence at our desk, but on examining they are not in the library the applicant is usually willing to be guided in the choice of a book. And here lies the secret of our management. We must be willing to make the guidance of such readers into our hands till a better taste is formed. I know this is a different thing from simply handing the book asked for and letting the responsibility of the case rest on the reader: that is easily done. But I have come to believe I can help form a character for good that might otherwise be led into evil, and have cheerfully accepted the position. Popular works on natural history I find a help in the desired direction, and I rely also much on travels for entering wedges, opening the way, frequently into early, to history, science, and general literature. Many of our less educated applicants take at first to works of quite a juvenile character, from which we lead them to more solid reading as we can.

We hear that such and such works of fiction are classical and may be safely read by educated minds as recreation. As the world contains so much that is better, I can readily dispense with these books. But it is in the wants and dangers of the youthful mind justifying me into the rank of readers that we as librarians, are most deeply interested; and I could earnestly bring home the question whether we are justified in misleading the records of ours by a neglect of our duties.

I can and do appreciate the situation of those who have charge of municipal libraries, I do not know how to avoid the circulation of such their better judgment is against. I could be very careful how I cast censure on these; but, while realizing their duties, I could still say to them: As much as possible on the feet of seekers after knowledge into the paths.—*American Library Journal*.

Never judge harshly of a repentant sinner.

[We have received a printed copy of the following document, which we lay before our readers in order that they may be kept informed of the progress of events in our religious Society. A note from a Friend accompanying it states there were about sixty Friends, including five recommended ministers, in the Conference that issued the Address, and that they felt the solemnity of the occasion and the seriousness of the step they felt bound to take.—Ems.]

An Action of a Conference of Friends.

"Blow the trumpet in Zion, sanctify a fast, call a solemn assembly."—Joel ii. 15.

"And those that shall be of these shall build the old waste places; thou shalt raise up the foundations of many generations; and thou shalt be called, the repairer of the breach, the restorer of paths to dwell in."—Isaiah lviii. 12.

At a Conference of the religious Society of Friends, members of Bear Creek Quarterly Meeting, Iowa, held 5th mo. 29, 1877, it was agreed that Zimri Horner serve as clerk.

The Conference then proceeded to consider the cause for which it met, to wit:

The present and sorrowful condition of our beloved and once favored Society, by relapsing into doctrines, forms and practices, which we believe are inconsistent with our principles and profession and detrimental to the religious growth and prosperity of the Society.

A synopsis of which is here appended, to wit:

1. The prevalent practice of endeavoring to induce an undue dependence upon outward means, thereby drawing away from the spirituality of the Gospel, and to settle down at ease in a literal knowledge and belief of the truths of the Holy Scriptures.

2. To set individuals at work in the will and wisdom of the natural man, to comprehend and explain the sacred truths of religion, to bring them down to the level of his unassisted reason, and make them easy to the flesh, so as to avoid the mortifying experience of becoming fools for Christ's sake, and taking up the daily cross to the wisdom, the friendship, the honor and the fashions of the world.

3. The running into great activity in religious and benevolent undertakings, showing an untimely zeal by taking up one particular truth, and carrying that to an extreme, to the exclusion of other important truths.

4. A tendency to undervalue the writings of ancient Friends, and to promulgate sentiments repugnant to our christian faith, and to the spiritual nature and universality of the Gospel, as set forth by them, particularly by Robert Barclay in his able and excellent apology for the true christian divinity, a work which has been frequently published and spread by our Society as a correct exposition of its doctrines, and which we would recommend to the careful and serious perusal of all seekers after truth the world over.

5. The introduction into meetings for worship, of much formality in the way of reading and singing, and in the character of the ministry and of prayer; while great pretensions are claimed to the life, light, leadings and guidings of Him that can not lead His people astray; yet, at the same time, bearing unmistakable evidence that it is the product of the intellect and imagination rather than proceeding from the immediate inspiration of the true Shepherd of the sheep, and is calculated to lead to the conclusion that a person may be ranked with

the true believers in Christ, without wearing His yoke, and undergoing the humiliating baptisms which He appoints for His truly dependent and obedient followers.

6. The manner in which general meetings are carried on, leaders being selected to conduct the exercises, who many times point out and dictate the services, also the introduction of the mourners' bench, and the manner of conversation, the disorder, confusion, and the exciting scenes attending many of them, wherein the young and the inexperienced are urged to give expression to their over wrought feelings in a manner inconsistent with our principles.

The present is a time of deep trial within our borders, the enemy of truth and of the soul's salvation has so far prevailed by his various stratagems, imitations, and superficial religion, as to greatly mar the beauty and peace of Zion, introducing confusion and the spirit of the world into the very bosom of the Society, causing our meetings for worship, instead of being held in the name and power of Christ, to be well nigh rendered opportunities for the bold, popular, and designing preachers to lead astray the people from the true fold.

These and many other declensions, both in doctrine and in practice, might be brought to view, with which we have no unity, being at variance and repugnant to our christian principles.

Now, if it be true that the church of Christ, redeemed by his most precious blood to live to Him, be baptized by one spirit into one body, and do eat of the same bread, and drink of the same cup, and should be perfectly joined together, in the same mind and in the same judgment, walk by the same rule, mind and speak the same thing, see with the same eye, hear with the same ear, speak with the same mouth, live by the same breath, and be led and guided by the same spirit; from whence then is this dissent, contrariety, and disagreement about the doctrines and practices in the Society of Friends?

Seeing the lamentable condition of our church, by innovations of the nondescript body now in the seat of church power, we unhesitatingly declare our belief that the time has fully come when all those who are desirous of seeing the waste places built up, and former paths restored, should put shoulder to shoulder, rally to first principles, and labor harmoniously together in the great work. Although so great a departure from the principles and primitive grounds which first distinguished our religious Society, has taken place, we believe that the testimony of truth, as set forth in Barclay's Apology, and in the writings of George Fox, William Penn, and others, will not be permitted to be frittered away, until they can no longer be distinguished, and they utterly fall to the ground.

Truth is truth, and must and will prevail eventually, although its servants and votaries may suffer long in its defence; the cause, we believe, is the Lord's, and he, doubtless, will vindicate His truth in due time.

A remnant, we reverently and thankfully believe, is still preserved, in whose eyes this cause remains to be precious, having the Anointing for their teacher, and the Lamb for their light, being clothed with the Holy Spirit, and being possessed of an understanding of the times, whose cry shall not only be heard, "Spare thy people, O Lord, and give not thine

heritage to reproach!" but who shall have a knowledge of what Israel ought to do.

Those must continue to bear a faithful, clear and unmistakable testimony to the living practical leadership and government of Christ in His church, who is head over all things, with whom is no variability, neither shadow of turning.

Much loss is sustained by the unity and fellowship of the church being broken; but it cannot prevail as it once did, while its members are propagating adverse doctrines, and invalidating its ancient principles and testimonies, which others feel bound to maintain.

The sanctuary we conceive to be shamefully defiled by the introduction of principles which are undermining the church, and supplanting its faith, and, by superficial means, preventing judgment from being rendered against the transgressors.

We think well of reviving at this time the injunction of the Lord, through the prophet Isaiah, to the house of Judah, "Cry aloud, spare not, lift up thy voice like a trumpet, and show my people their transgressions, and the house of Jacob their sins."

We believe the time has now fully come when it is incumbent upon us to disclaim the appointment of all the officers imposed upon us by the non-descript body now in the seat of church government, and replace them by those in unity with the doctrine, and in favor of supporting the ancient principles and testimonies of our Society.

Seeing the walls of our Zion are much broken down, we solemnly appeal to the wisdom and judgment of all sound Friends to whom this may come, to seriously examine and solemnly consider the things herein so briefly brought to view.

And endeavor to know of the Great Master Builder the appointed time for repairing the breach, and be willing, at his call, to execute His commands.

And each M-nthly Meeting is left at liberty to carry out the decision of this conference in a manner as best suits their circumstances.

The Clerk is directed to furnish the Monthly Meetings with a suitable extract from the proceedings of this conference.

David Mills, Benjamin Smith, and J. W. Bowles, were appointed to assist the Clerk in preparing the minutes for distribution.

After freely discussing, in brotherly love, the various subjects which claimed our attention, and listening to much pertinent counsel and advice, and expressions of sympathy toward those who had so far deviated from our ancient principles as to make this step incumbent upon us, and to references made to the strong evidences felt of the approbation of Him of whose songs the interrogation was made, how shall we sing them in a strange land? the conference, under feelings of gratitude to the Great Head of the church for the manifestations of His Holy Canopy so abundantly spread over this day, then adjourned.

Signed on behalf and by direction of the conference.

ZAMRI HORNOR, Clerk.

The Alligator Business.—Between 17,000 and 20,000 alligator skins are tanned yearly, which are consumed by boot and shoe manufacturers in every portion of the United States, as well as exported to London and Hamburg.

The alligators formerly came almost entirely from Louisiana, and New Orleans was the great centre of business. The Florida swamps and morasses are now the harvest fields, and Jacksonville, in that State, the great depot. The alligators often attain a length of eighteen to twenty feet, and frequently live to a very old age. The hides are stripped off, and the belly and sides, the only portions fit for use, are packed in barrels, in strong brine, and shipped to the northern tanner, who keeps them under treatment for from six to eight months, when they are ready to be cut up. So far the leather has been mainly used in the manufacture of boots and shoes, but handsome slippers are also made of it.—*Lat. Paper.*

Philip Price.

For "The Friend."

The following fragments of correspondence indicate the exercised state of mind of a youth yet considerably in his minority, which followed the interesting event narrated in the article published last week relative to P. and R. Price.

Dear Friend,—I received thy letter this afternoon, and shall endeavour to answer according to ability,—feeling much lower towards thee at this time, and should have been glad to see thee at the meeting. As thou seems anxious to hear how we come on, I shall let thee know a little how it is with me in that respect. As I feel my mind much drawn from the follies and vanities of the world, which I have too much given way to, to my hurt, I find at this time that I cannot keep company with any one on the account that thou mentions. This is very much in the cross of the natural will, but I find I cannot witness true peace without yielding obedience to that forming Hand which has drawn me much from the world and worldly things, so that all prospects of entering into business or settling as thou mentions, have vanished at this time. But if way should open more clearly to enter into that business, I will let thee know, as I would as soon enter into partnership with thee as any one else. * * * I do not expect to come down to the meeting. I desire thy welfare, and that thou wouldst give up thy time more and more to serve Him for whose glory we are all created; so that when these fading things shall be no more, we shall receive an admittance into the Arms of Everlasting peace and rest. What will all the world be to us if we end not well at last? I believe there is no time like giving up in our youth, whilst health and strength of body are afforded us; that so we may be as lights to the world, that others seeing our good works, may glorify God, who is worthy for ever. Though I meet with discouragements sometimes, and believe myself to be as it were the hindmost of the flock, yet I feel a desire that all my companions, as well as myself, may come to see ourselves as we truly are.

I remain thy loving friend,
PHILIP PRICE.

"Kingsess, the 16th of 1 mo. 1783.

My dear Son,—I received thine, which was a comfort to me, and I have esteemed it a great blessing that thou art one amongst the number who are made willing to stand for the testimony of truth, and my desires are that thou mayest be more and more established, and that thou mayest not run too fast, nor loiter behind thy true guide: for what we are is by mercy

and not any merit of our own. I believe it good for us often to examine ourselves, and can truly say that thy preservation, with that of thy brothers and sisters, is more near a dear to me, than all other earthly blessing and that it is a great comfort to thy father and me, that thy mind has been thus far touched with that, that if strictly abided, will lead out of great trouble and conflict this present world, and when time here shall be no more, crown with that which neither this fading world, nor the enjoyments there can ever give. And I may further say that I hope for thy example thy brothers and sisters may be willing to take up the cross.

From thy mother,
HANNAH PRICE.

TO PHILIP PRICE, JR.

"Philadelphia, 2 mo. 5th, 1783.
Esteemed Friend,—Since I last saw thee thy father's house, thou hast been the object of near care and sympathy, being confirmed in the persuasion that He whose mercy over all His works, hath in infinite loving kindness cast the mantle of redeeming love over thee. And oh, saith my spirit, thy neither heights nor depths, things present nor those that yet await thee, may ever be able to separate from this enjoyment of the love of Christ and the sweet incomes of His living presence. It is only by bowing to that blessed Root and abiding in the Living Vine that we are fitted to receive Divine instruction, bearing with patience and resignating the truly necessary preparation, even that pruning Hand. Thus is the mind enlightened and an enlargement experienced into the mysteries of the Heavenly Kingdom, and we not only discover clearly His gracious work concerning us, but as we keep a single eye to Him, neither attempting to go forward, nor in the moments of proving and desertion when the winter season is wisely permitted seeking succor and nourishment short of that living eternal substance, we shall be favoured with the further discoveries of light and truth and be enabled to withstand the unwearied enemy, however various his transformation and mysterious his workings. That thou art I may fervently and diligently labor after this necessary and right experience, is the ardent desire of

Thy real friend,

HANNAH CATHRAL.

TO PHILIP PRICE, JR."

"Kingsess, 5 mo. 1783.
Dear Friend,—I have been at home about a week; since which I attended Concor Quarterly Meeting, greatly to my satisfaction and peace of mind. I feel a near sympathy with thee, my dear friend, under thy present trying dispensation, which I have wishe might be sanctified to thy further refinement and that we may endeavor for contentment under every allotment, which the Lord Infinite Wisdom is pleased to place us in. His Holy Hand is underneath His dependent children, to preserve and lead them in paths they have not seen, and will not suffer thee to be tried beyond what thou art able to bear but will arise in His own good time for thy deliverance. I write from a small degree of experience, being as it were, left alone; but He, who knows the sincerity of my heart, has been pleased again to favor me at times with a glimpse of His living presence; which I cause of humble thankfulness. In Him, there

re, let us put our trust, who is able to deliver; and into whose Divine Protection I remain and thee, with desires for thy, as well as my establishment in the ever blessed Truth, with that love which united us in the paths of self denial,

I remain thy assured friend,
PHILIP PRICE, Jr."

For "The Friend."

Western North Carolina.

The following notice of the mountain districts of North Carolina, is taken from "The Great South."

"The great counties of Haywood, Jackson, Macon, Cherokee, Buncombe, Henderson, Madison and Yancey, contain the principal portion of the mountain scenery of western North Carolina. The mighty transverse ridges of the Nantahala, Covec, Balsam, and Black mountains, run across these counties on the Smoky range to the Blue Ridge, and the traveller wandering from county seat to county seat, must constantly climb lofty heights, pass through rugged gorges, and descend into deep valleys.

Western North Carolina is not only exceedingly fertile, but abounds in the richer minerals, and needs but the magic wand of the capitalist waved over it to become one of the richest sections of the Union. Occupying one-third of the entire area of the State, and possessing more than a quarter of a million of inhabitants, its present prospects are by no means disagreeable; but its prominent citizens of all walks in life, are anxious for immigration and development of the rich stores of gold, iron, copper, mica and other minerals yet buried in the hills.

Let no one fancy that this mountain region is undesirable as an agricultural country; here are few richer, or better adapted to European immigration. The staple productions of Haywood county are corn, wheat, rye, oats and hay; all vegetables grow abundantly, and the whole country is admirably fitted for grazing. The level bottom lands on Pigeon river and its numerous tributaries are under fine cultivation; the uplands and the slopes produce rich wheat; the ash, the sugar maple, the hickory and the oak are abundant, and white pine is rafted down the Pigeon river in large quantities yearly.

But the exceptional fertility of most of the ranges throughout all the counties mentioned is the great pride of the section. The sides and tops of the mountains are, in many cases, covered with a thick, vegetable mould, in which grow flourishing trees and rank grasses, five thousand feet above the sea level one finds grasses and weeds that remind him of the lower region swamps. Cattle are kept in excellent condition all winter on the "evergreen" growing along the sides of the higher ranges. Winter and summer, before the ravages of the war thinned out their stocks, the farmers kept many cattle on the mountains feeding entirely on the grasses. In the spring the herds instinctively seek the young grasses springing up on the slopes, but with the coming of winter they return to the tops to find the evergreen. The balsam tree can easily be banished, for, after being felled for a few months, it will burn easily, and in its stead fill spring up thick coats of evergreen. On one of the mountain farms corn yields one hundred bushels to the acre, and wheat, oats, rye and barley, flourish proportionately. In

the "dead-ends," where the large timber has been girdled and left to die, and the undergrowth has been carefully cleared, timothy and orchard grass will grow as high as wheat.

The native grape, too, flourishes on all the hill-sides, within certain thermal lines established by observation of the elder mountaineers; and varieties of grapes can be selected, and so planted as to ripen at different periods of the autumn. The negro population is not numerous in Western North Carolina; wherever the black man is found, however, he is industrious, faithful and usually quite prosperous."

Thing and Thieving.—Whately having in a sermon warmly recommended his hearers to put in a purse by itself a certain portion for every pound of profits of their worldly trades for works of piety, he observed, if they do so, that instead of secret grudging when objects of charity were presented, they would look for them and rejoice to find them. A neighboring clergyman hearing him, and being deeply affected with what he so forcibly recommended, went to him after the sermon was ended, and asked what proportion of his income he ought in conscience to give. "As to that," said he, "I am not to prescribe to others; but I will tell you what has been my own practice. You know, sir, some years ago, I was often beholding to you for the loan of ten pounds at a time.

The truth is, I could not bring the year about, though my receipts were not dispicable, and I was not at all conscious of any unnecessary expenses. At length I enquired of my family what relief was given to the poor; and not being satisfied, I instantly resolved to lay aside every tenth shilling of all my receipts for charitable uses; and the Lord has made me so to thrive, since I adopted this method, that now, if you have occasion, I can lend you ten times as much as I have formerly been forced to borrow."—*Moral and Religious Anecdotes.*

A New Route to China.—Professor Vordenkiold, an eminent Swedish scientist, claims to have made a very valuable discovery. He sailed from Hammerfest in the beginning of August, and after an eventful voyage succeeded in demonstrating the correctness of his theory in regard to an open way to the Arctic Sea. He reports having encountered no obstacles, and considers the way now quite open from Europe to China via the northern passage and the valley of the Yen-sei River, by which steam communication is obtained across Siberia and almost to the frontiers of China. An immense unmeasured area of extremely fertile and valuable soil was found in this region, all of which is accessible for immediate cultivation. The commercial value and the important results to flow from this demonstration of the feasibility of a northeastern passage to Siberia and China, can hardly be foreseen or overestimated. Vordenkiold, whose letter is unfortunately brief, writes that he has also obtained results of great interest to science. Dredging and scientific observations were constantly carried on during the entire voyage. Large collections have been made, to the previously obtained collections from this heretofore unknown region. One of the unexpectedly favorable phenomena of the passage, the Professor reports, was that the water was uni-

formly found to be surprisingly warm.—*Late Paper.*

THE FRIEND.

SIXTH MONTH 30, 1877.

True religion shows its effects no where more beneficently than in the domestic circle. Whatever may be the profession that is made of the truths of its doctrines, it is the practical exemplification of it in every day life, and especially in the home and family, that most forcibly illustrates its benign character, and most impressively commends it to others. These considerations should induce us constantly to endeavor so to act in the smaller as well as in the more important concerns of life, as to fulfil the injunction of our Saviour, "Let your light so shine before men, that they may see your good works and glorify your Father which is in heaven." The perplexities and cares of daily life furnish many occasions for the exercise of Christian virtues and graces, and often bring alarmingly to the view of the sincere, earnest seeker after the right way of the Lord, the consideration of his own frailty, and how liable he is, unless constantly living in a state of watchfulness, and the endeavor humbly to seek for Divine assistance, to be overcome by sudden temptation or the more insidious snares of his soul's enemy. When, however, this state of mind is attained, and the corresponding fruits of the spirit are brought forth, such become indeed preachers of righteousness in their lives and conversation, and their example and influence administer consolation, reproof or instruction to others. These are the salt of the earth, exerting a seasoning and sweetening effect upon the community, and we believe tend powerfully to draw down upon it the blessings and favors of the Preserver of men.

At this season of the year when some of our members may be exposed to new and perhaps unfavorable influences in their temporary absence from home in quest of health; it may be proper to extend a caution to increase watchfulness, so that even under adverse circumstances they may strive to be enabled to exemplify their profession by a walk and conversation consistent therewith; and to leave upon the minds of critical observers the conviction that they are in truth the self-denying followers of a crucified Saviour.

In the recent removal from the church militant of deeply exercised members, we have no doubt the minds of many have been turned towards the youth with feelings of affectionate solicitude, that through their unreserved obedience to the requirements of Divine Grace, their soul's salvation may also be wrought out with fear and trembling, and a succession of upright, devoted men and women, be raised up to maintain unflinchingly those doctrines and testimonies which Friends have been called upon to uphold before the world. In the reduced condition of many meetings, the loss of qualified members is deeply felt, and has not been owing to the unwillingness of some of this class in former years to yield their necks to the yoke of Christ, that there is not at the present time a greater number of dedicated members prepared to fill

the vacant places among us, and to receive those gifts which we believe it is intended should be occupied for the edification of the church. Notwithstanding the discouragements which abound, we believe that there are not a few among the rising generation who are sincerely concerned in their measure for the promotion of the cause of Truth, and desirous that the doctrines and testimonies of the Society in their original purity may prevail in the earth. May the number of these be increased, and through their faithfulness and that of others, may the animating prospect which our late valued friend William Evans had, a few years before his death, as expressed in the following extract from his Journal, be more and more fulfilled to the comfort of the church in this place, and the welfare of the whole body, viz.:

"In contemplating the trials and overturnings to which our religious Society has been subjected for many years in this country, I was made to believe a few days since, that the gracious Shepherd was still near to us, and that the time was not very far off, when He would go through his flock, and renew the visitations of his love to the younger members. That he would bestow gifts upon them, to be occupied in his church; and prepare and send forth servants to proclaim and spread the doctrines of the gospel, and his blessed cause, from sea to sea, and from the river to the ends of the earth. Hereby the beauty and strength, and influence of our Society in this Yearly Meeting, and in this city, will be restored; and a body of solid and deeply exercised men and women, it appeared to me, would be again raised up as standard bearers and watchmen upon the walls of Zion. May the Lord hasten it in his time and way; and enable us to continue to bear patiently the sufferings that remain for us to endure; and for our own sakes, and for one another, whatever they may be."

SUMMARY OF EVENTS.

UNITED STATES.—Despatches from Portland, Oregon, confirm the report of an engagement of Colonel Perry's command, consisting of two companies, with the Nez Percé Indians at White Bird Canon, Idaho. A serious outbreak was feared, as the Indians were retaliating abuses committed by the white settlers who had intruded upon their section of country, which they desired to enjoy unmolested.

The President has sent a circular to all the prominent Federal officials throughout the country, informing them that no officer of the Government should be required or permitted to take part in political organizations or election campaigns, and that no assessments for political purposes on officers or subordinates should be levied.

The Commissioners of the Freedmen's Bank have enough money on hand for a dividend of ten per cent. to its depositors. They will declare no dividend at present, however, because the expense of paying it would be greater to a large number of the depositors than the amount received by them. It is believed by the Commissioners that the bank will finally pay fifty per cent. of its indebtedness.

President Hayes's visit to Rhode Island will be a strictly temperate one, for it has been decided to have no liquor of any kind at the Governor's headquarters in Providence during the time of the army remains, and there will be none at any of the collations or dinners given to the President.

At a recent Cabinet meeting it was decided that good faith and the laws now in force demand the payment of the four per cent. bonds, principal and interest, in gold.

Hayden & Hollingsworth, at Wilmington, Del., are now shipping a number of cars for Rio Janeiro, for the Dom Pedro II. Railway, and narrow gauge cars for another road in Brazil.

A fire which broke out in the old town of Marle-

head, Mass., on the morning of the 25th, swept away nearly the entire business portion of the town, including all the large shoe manufactories but three, the Eastern Railroad depot, and over forty dwellings. Seventy-two buildings in all were consumed. The loss is estimated at \$254,000.

A terrific storm of rain and wind raged on the morning of the 25th, throughout Iowa and portions of Missouri and Michigan. It reached Chicago soon after 1 o'clock in the afternoon, and travelled eastward through Indiana and Ohio, breaking up Cincinnati as it passed. Ever where in its path trees and telegraph poles were levelled, and bridges and buildings demolished. An express train was blown from the track in Illinois, and several persons injured.

Interments in Philadelphia during the week ending 23d inst., were 281, being 24 less than last week, and 45 less than for the corresponding week last year.

THE MARKETS.—The following are the quotations on the 26th inst. Cotton, 12½ cts. Flour, \$6.75 to \$9.00, the latter for Minnesota choice. Wheat, Penna. red, \$1.95 to \$2.00; Penna. amber, \$2.02 to \$2.05; white, \$2.00 to \$2.10. Corn, 57 to 65 cts. as to grade. Oats, 44 to 54 cts. Beef, tallow, sales of 3550 head, at \$7 1/2 to 8 cts. per lb. according to quality. Sheep, 9000 head sold at from 47 to 57 cts. per lb. at 75 cts. Hogs, sales of 3900 head, at from 7 to 7 1/2 cts.

FOREIGN.—On the afternoon of the 20th inst., a fire broke out in a boiler shop at St. Johns, N. B., while a strong north-westerly wind was blowing, and in a short space of time hundreds of houses and stores were destroyed, together with all the property therein, including the new Post-office, valued at \$200,000. The total loss of property is estimated at over \$2,000,000, and at least fifteen thousand inhabitants are rendered homeless and destitute, little of their household effects being saved; nearly five hundred acres were burned over, and a number of persons perished in the flames.

Applications for the relief of the sufferers, and up to the morning of the 26th, \$200,000 had been contributed.

The first of a line of steamers to run between London and Boston, via Newcastle, England, and Antwerp, will sail from the first named place on the 5th of Seventh month.

In China, the famine in the northern provinces continues; there are serious floods at Canton, and the prospects of the silk crop have been greatly injured by sudden cold weather.

In Cuba the insurgents are not averse to negotiating for peace, provided autonomy with sufficient foreign guarantees be conceded. Intelligent Cubans and some Spaniards knowing the dangers surrounding entire independence, would prefer annexation to the United States. The state of the island is no better than it was last year at the same season; the only visible advantage gained during the whole winter campaign was less burning of plantations. The treasury is exhausted; last year at this date gold sold at 215; it now stands at 227.

Very few Cubans have taken advantage of the amnesty decree, as they have no confidence in it. The state of affairs in the island is languid, prostrate and disheartening.

The case before the Fisheries Commission for 1876, shows that the fatal accident during the year in mines coming within the scope of the Mines Regulation act were 830, and the deaths occasioned thereby reached 353. The number of persons employed in and about the mines was 514,532; and it is stated, that on the average there was during the year one fatal accident among every 1450 persons employed, and one death by accident among every 551 persons employed. For each fatal accident 177,500 tons of mineral were obtained.

The battle on the 10th inst., near Dellidaba, resulted disastrously for the Turks. The engagement lasted six hours; the Turks lost 1000 killed and wounded, and 1000 prisoners, and were forced finally to fall back to Dellidaba.

The passage of the Danube by the Russians began early on the 22d, when a few large loads of Cossacks were sent across the river from Galatz to Giatcha, the barges being towed by two small steamers. Although the passage of the Danube is now at this point, it has not been received, it would appear that the Russians met with a stubborn resistance, a hand-to-hand conflict taking place at their first landing.

WESTTOWN BOARDING SCHOOL.

A well qualified teacher of the Latin and Greek Languages, will be wanted at the opening of the next session, 10th mo. 29th. Apply to Joseph Passmore, Goshenville, Chester Co., Pa. John E. Carter, 624 South 24th St., Philadelphia. or Wm. Evans, 252 South Front St., " "

CORRECTION.—In the poetical selection entitled "Penitence," which appeared in No. 43, the word "in" in the third line of the third stanza, should have been *truce*.

WESTTOWN BOARDING SCHOOL.

A suitably qualified Friend is wanted as Governor at the opening of the next session.

Application may be made to William Biddle, No. 220 S. Fourth St., Philadelphia. Clarkson Sheppard, Greenwich, N. J. Joseph Passmore, Goshenville, Penna. Geo. J. Scattergood, 413 Spruce St., Philadelphia.

FRIENDS' SELECT SCHOOL FOR BOYS.

A suitably qualified man or woman Friend is wanted as assistant teacher in this school, to enter upon duty the first of Ninth month next.

Proving application may be made to either of the undersigned,

Thomas Lippincott, 229 Franklin St.
Richard Cadbury, 123 Chestnut St.
Ephraim Smith, 110 Pine St.
Edward Maris, 127 South Fifth St.

FRIENDS' ASYLUM FOR THE INSANE.

Near Frankford, (Twenty-third Ward.) *Medical* Physician and Superintendent—JOSHUA H. WOODINGTON, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board Managers.

DEED, on the 9th inst., at the residence of his son, William, in West Chester, Pa., JOSEPH SCATTERGOOD, in the 69th year of his age, a member and elder of the Monthly Meeting of Friends of Philadelphia. Possessed of more than ordinary mental ability, with naturally a strong will, he manifested in his youth the ordinary heedlessness and proneness to self-gratification, including the wearing of the Summer attire long to moonhood, under the visitation of Divine Conviction he felt the necessity of ceasing to yield to his carnal inclinations, and to allow the yoke of Christ to be laid upon him. He was now brought under some conflict spirit, during which he passed through humiliating exercises, but submitting to the baptism of repentance and knowing the renewing of the Holy Ghost, it became his primary object to take up his daily cross, and follow his Master in the regeneration. In this school he early became fitted for usefulness in the church, and as he advanced in years, and in religious experience and stability, he was called upon to occupy several important stations when brought to a dying bed, and highly valued for his uprightness and firmness in the maintenance of the christian doctrines and testimonies for which Friends have ever been called to stand witness before the world. During his last illness he remarked on one occasion, "I am a firm believer in the immortality of the soul. It is an awful thing to die, and a devoted minister when brought to a dying bed, said, "The invisible world, how awful! I feel it to be so." At another time, in reply to a remark that it was believed he had not now to seek for a better country, he said, "I trust not, but it is not by any works of righteousness which I have done, but through mercy only and on account of the precious blood of Christ." He occupied an unprofitable servant, in the servant at all." He occasionally observed in reference to his sufferings, which were great, that they were of the body only, and at other times, "I feel nothing in my way." In this state of health and resignation, he survived the approach of death with entire calmness, and his family and friends were his consolers, believing that his precious and godly spirit has been gathered to the just of all generations.

A Testimony Issued by a Conference of Friends, held at Sugar Grove, Hendricks county, Indiana, 6th month 5th, 1877.

At a conference of members of Western Yearly Meeting of Friends, held at Sugar Grove, in Hendricks county, State of Indiana, on the above date, to take into consideration the state of our Society and the embarrassed and tried condition of a considerable number of our members on account of the departure of many Friends from what has heretofore been the teaching and practice of it.

On thus assembling for this important purpose we were brought humbly to crave the assistance of Him who alone can rightly direct us in the discharge of this service; and fervent have been our petitions that we may be favored to find a "cess" to the hearts of those for whom we are brought into deep and feeling exercise.

The promotion of the cause of our Holy Redeemer should be at all times the paramount consideration with all His professed followers; and the advancement of His kingdom upon the earth should be our prayerful individual and collective concern.

We can not doubt that it was in the ordering of the Holy Head of the Church that our forefathers, in religious profession, were separated from the world, and from the various sects of professing christendom, and led to ascertain those views of the purity and spirituality of the Gospel dispensation by which they were distinguished.

We are renewedly called upon by the Head of the Church to abide in humility and watchfulness unto prayer, that the enemy of the church and of man be not suffered to come in and destroy our goodly heritage.

In taking a review of the situation of our Society, the questions are forced upon us, what is the character of the fruit produced by the changes that have lately been introduced into it? Do the evidences accompanying it indicate a more strict conformity to the self-denying principle and requirement of the Gospel, so as to improve our branch of the visible church, and so lead, or invite, other portions of it out of the formalities and will-worship that have so long obstructed the spread and power of spiritual religion? Does it bring its converts more than formerly under the yoke and cross of Christ, and does it tend to thrust back the spirit of the world from

the place it has usurped in the Christian church?

It is sorrowfully evident that the peace, harmony, unity and fellowship which are indispensable to our prosperity and usefulness as a branch of the militant church have been lessened and seriously interrupted by introducing many innovations on the former teaching of the ministry, the practice in church government, and in the exercise of the discipline.

Thus when we meet for the solemn purpose of worshipping Him, in spirit and in truth, who knows the secrets of every heart, instead of coming before Him in that humble prostration of soul and abasement of self, there to wait before the Lord to feel the arising of the Holy Spirit, qualifying for such service as the Master calls for, whether in silent adoration, thanksgiving and praise, or in vocal exercise before the congregation; many times in the present day, before the people are near all collected and seated, some one appears in vocal exercise, either in prayer, in exhortation, in reading a portion of Scripture and commenting upon it, or in singing; and many of these exercises we believe have little or none of that divine unction and baptising power that attends a living Gospel ministry.

Our early Friends believed in and taught the necessity of waiting for a renewed qualification for every act of service in the militant church. And especially in the exercise of the ministry were they careful to wait for the moving of the Holy Spirit to reveal the subject of the message to be delivered to the people; and they claimed that no one was qualified to officiate as a minister of the Gospel, however great his literary attainments and theological training may have been, unless he "is called of God, as was Aaron." Yet we highly esteem a liberal education, and, if sanctified to the Master's use, it is a blessing to the church. But we testify against the assertion that "we must have an educated ministry and the subject of the discourse well matured to gain the attention of the people."

On this subject William Penn says: "Surely we ought to speak none of our own words or take thought what we shall say in our testimony and ministry in the name of the Lord to the souls of the people, for then, of all times and of all other occasions, should it be fulfilled in us, 'for it is not you that speak, but the spirit of my Father that speaketh in you.'"

We believe that the practice of reading in meetings for divine worship, even in the Holy Scriptures, is lowering the standard of spiritual Christianity, as ever held by Friends; and if the requisitions of our Discipline on the subject of music, singing, &c., was heeded it would prevent the study and practice thereof amongst our members, which advice is strictly in accordance with the teaching of early Friends, who, with all sound Friends to the present day, believe that congregational singing,

music, &c., in meetings for worship has no foundation in Scripture nor any ground in true Christianity.

Also, the introduction of the altar or mourners' bench, so-called, into our religious meetings, and the minister calling on the congregation to demonstrate their love for Jesus, their desire for salvation, &c., by rising to their feet or by coming to the anxious seat to be prayed for, some praying, some exhorting and others singing, all at the same time.

In the early rise of our religious Society the ministers and active members thereof fully acknowledged the headship of Christ in His church, and without His direction and assistance they dared not to move in any act of service for the promotion of His kingdom in the earth. Now it is a common practice for ministers to frequently call upon individuals or a class of persons for a certain specified service, as prayer, or singing, or for their religious experience; and even if the individual called upon may have had no intimation that such service was required, or perhaps their thoughts had not even been in the line of the service called for, this is not accepted as a reason for non-compliance, but a prompt obedience is demanded, and perhaps the severest censure administered. We can not reconcile these things with a profession of spiritual worship under the promptings of Him who "callest His own sheep by name and leadeth them out."

When priest Stephens asked George Fox why Christ cried out upon the cross, "My God, My God, why hast thou forsaken me?" and why He said, "If it be possible let this cup pass from me, yet not my will but thine be done?" George told him "at that time the sins of all mankind were upon Him, and their iniquities and transgressions with which He was wounded, which He was to bear and to be an offering for, as He was man, but died not, as He was God." Now we hear it asserted by ministers that the Deity, or Godhead, was crucified and died, and other teaching of a similar character, at variance with the teaching of our forefathers in the Truth, and which, we believe, can not be reconciled with sound Scripture doctrine.

We find from the records left us that George Fox and his associates taught the people the necessity of giving heed to the manifestation of Light or the grace of God in the heart, and the teacher there as the only sure guide to salvation. But in the present day some of our ministers teach us that there is no grace or light in man to teach or guide him until he is converted. This grace is not ours by nature—it is the gift of God.

The practice now adopted of receiving large accessions to our membership of persons who do not conform to the requisitions of our Discipline, nor manifest to the world that they are that humble, self-denying, cross-bearing people that we believe all true followers of Christ should be; thereby settling them down

at ease to their hurt, and disqualifying the Society from filling that mission in the earth which our Heavenly Father designed we should, by holding up a standard of Christianity in its purity, holy, unfeigned, without spot or blemish. And any one Monthly Meeting receiving persons into membership who live in the limits of another, contrary to our former practice, tends to weaken the confidence and destroy the harmony and unity that is essential to be maintained if we are enabled to carry on the work of the Lord successfully.

We are settled in the conviction that the establishment of the Discipline for the government of our members, and the organization of our men's and women's meetings for the transaction of the affairs of the church separately, was in the ordering of Divine wisdom owned by the great Head of the Church, and has been a blessing to us as a people; and that any declension or departure therefrom will weaken and damage us as a religious society, and injure the cause of truth.

With all these facts before us we are deeply impressed with the conviction that any continued departure from the usage of our religious Society, in the particulars to which we have here briefly adverted, as well as the requirement and advice of our Discipline in regard to plainness of dress and address, oaths, and that of wearing mourning habits, and extravagant expenses of funerals, together with others not alluded to, can not fail to be productive of serious consequences; and on account of the sorrowful effects resulting therefrom, we feel bound to bear a faithful testimony against all such deviations from our primitive doctrines and practices as being out of the truth.

We believe that George Fox and his coadjutors simply revived Christianity in its primitive purity, freed from the encumbrance of rites and ceremonies with which it had been so much enveloped during the apostasy through the dark ages; and as they lived up to the principles of Christianity as clearly set forth in the Holy Scriptures, they felt it to be their bounden duty to depart from every appearance of evil; and all the testimonies and peculiarities which they maintained before a frowning world as so great a sacrifice, were the natural fruit or outgrowth of living up to the precepts of our Saviour; and that we, their successors, cannot drop one of these testimonies without giving evidence of a declension from the true principles of Christianity. But, ah! the love of the world, its riches, honors, maxims, ex-tombs and pleasures, a love of ease, and an unwillingness to bear the cross, and so humble ourselves and follow the lowly Jesus through deep baptisms and sufferings, are preventing many from coming to the Redeemer and entering into the Holy of Holies, where we can have union and sweet communion with the Father, Son and Holy Spirit—a privilege designed for the whole human family, through the goodness and unmerited mercy of our Heavenly Father in giving his only Begotten Son a sacrifice for the sins of the whole world. He who was betrayed by a kiss in the garden, was buffeted, was spit upon, and was reviled, who submitted to the ignominious death of the cross that He might redeem fallen man “by the shedding of His blood without the gates of Jerusalem, a propitiatory sacrifice for the sins of the whole world; thereby opening a way whereby lost

man may return with acceptance to the Father,” whom we own as our Lord, and crucified, risen, and now glorified Redeemer, who is seated at the right hand of the Father interceding for us.

Let us all beware of resting on a bare acknowledgment of even the most sound and consistent principles, ever remembering that a profession of the truth will add to our condemnation if we are not endeavoring to live in conformity with it. It is only as we submit to the heart changing and sanctifying power of the Holy Spirit that we can show forth in our life and conversation the blessed effects of the doctrines we profess, even the fruit of the Spirit, which is “love, joy, peace, long suffering, gentleness, goodness, faith, meekness, temperance.” Without these the most correct belief will be but as “sounding brass or a tinkling cymbal.”

Our blessed Lord has declared, “Not every one that saith unto me Lord, Lord, shall enter into the kingdom of heaven, but he that doeth the will of my Father which is in heaven.” Thus daily seeking to the Lord for strength and wisdom, we may be enabled to overcome the wicked one, and, doing the will of God from the heart, we may experience preservation from evil, and be prepared to stand with acceptance before the Son of Man.

On behalf of the Conference,

ALBERT MAXWELL, Clerk.

For “The Friend.”

Mineral Treasures of Missouri.

The following notices of the iron, coal and lead which abound in Missouri, is abridged from the account given in the “Great South.”

The celebrated iron mountain is situated 81 miles southwest of St. Louis, on the Arkansas branch of the Iron Mountain Railroad. The “mountain,” which rises rather abruptly from a beautiful valley, landlocked, and filled with fertile fields, was originally rather more than 200 feet high, and its base covers an area of 500 acres. The mountain is composed almost exclusively of rich specular oxide of iron, and the ore was at first pronounced too rich to work. When Edward King visited it in 1874, more than 1000 men were at work in the deep cuts and along the sides of the mountain mass, and this force mined ore enough daily to load 125 cars, carrying 10 tons each, beside supplying two large furnaces established at the base of the hill. King supposed that a century of hammering at the sides of the hill would not bring it down to a level with the valley. The surface ore is so intermingled with the earth adjacent, that he found a number of stout Swedes working it very much as gold is worked for, and obtaining tons which in more careless days, had been thrown away.

The whole region round about is rich in mines and minerals. A few miles below Iron Mountain rises Pilot Knob, a stately peak, towering above the Ozark range, which surrounds it in every direction, and from this region great quantities of ore are extracted. It is not improbable that Iron county, in which lie Shepherd, Arcadia and Boggy mountains, and the Knob, contains, as the inhabitants assert, more iron than any other equal area known to exist elsewhere.

But this is not all. For many miles along the Missouri River iron crops out from the bold bluffs, and it is estimated that it can be

easily mined and placed in barges, for less than a dollar per ton.

The stores of coal match those of iron. It was long ago estimated that Missouri had an area of 26,000 square miles of coal beds between the mouth of the Des Moines river and the Indian Territory; and along all the roads in northern Missouri, and beside the Missouri Pacific Railroad, extensive coal veins have been discovered.

The abundance of lead has been known One hundred and fifty years ago Renault a La Motte hunted in the Ozark hills for gold but found only lead, and to this time La Motte's mine is still called by his name. The annual production of lead is steadily increasing. As early as 1819 the yearly yield of the lead mines in the State was about 3,000,000 pounds; in 1870 the annual production was nearly 14,000,000 pounds; and in 1872 it had risen to more than 20,000,000 pounds.

The iron industry of Missouri is of course only in its infancy, but iron works and rolling mills, some of large capacity, are springing into existence. One of these new establishments, the Venable iron works at Cardo, cloth, employs 1200 men in the blast furnace and rolling mills, spread over 17 acres of ground, with \$600,000 worth of machinery and it is able to turn out 45,000 tons of road iron in a year.

Bread on the Waters.—A benevolent young lady was requested to assist two poor women who were said to be in great distress. She went, and found two maiden females, advanced in life, dwelling in a small cellar. One was afflicted with a slow consumption; and the other was obliged to spend her whole time in waiting upon her; so that neither of the could earn anything and their distress was very great. The young visitor found the one in want of all things but confidence in God and hope in His mercy; and as a follower of Him who went about doing good, she took effectual means to provide for the wants these afflicted sisters.

In one of her visits to this abode of misery she learned that the poor women had on themselves had the pleasure of relieving the poor. Once they were rich—once they had visited the destitute, fed the hungry, and supported the sick; but in the war between the country and Great Britain, they lost their father—were deprived of their property—the general disorder of the times; and all young ladies were obliged, with their mother to keep a boarding house for their maintenance. Some of their boarders were soldiers; and one of them a young man from Connecticut, never having received his pay was unable to discharge the bill for his board. Who thus poor he was taken ill; and for five or six weeks these ladies waited upon him with all the kindness which a mother or sister could have done. “They cast their bread upon the waters.” But who was this soldier? and who was the young lady who went on this errand of mercy to the cellar? The soldier having fought his country's battles laid aside his armor, and slept in the tomb. A son of his was married to the young lady. Yes, it was the good pleasure of God, that the wife of the son of the sick soldier should comfort those who comforted him. The aged females were long assisted by the soldier's son. After many days the bread which they cast upon the waters was returned to them. They had pit

the poor, and the Lord was pleased, according to his gracious promise, to repay me with interest. — *Moral and Religious meditations.*

For "The Friend,"
John Audland.

It seems from the following account concerning John Audland, that in his childhood he was ripe and quick of understanding; and the Lord inclined his heart towards himself, and he delighted in reading the Holy Scriptures, and in being obedient to that grace which they so magnificently direct people unto, and which when received and heeded leads to all truth.

Being convinced through the ministry of George Fox, and thereby brought into that joyful sorrow for sin which worketh repentance to salvation not to be repented of, he was permitted to have the spiritual eye so pointed as to see his fallen and lost condition as it really was in the Divine sight, and like the Patriarch, in silence and astonishment to abhor himself, and to repent in dust and ashes. Yea, so great was the transforming work of the Lord in and upon him, that he was stripped of all his earthly wisdom, and became self-abased and as "a fool" in the sight of men, until the command of the Lord came, as in the case of Joshua, "Take away the filthy garments from him," and clothe him with change of raiment."

This is the invariable way of the great Hastener and Purifier in the humiliating discipline of self-denial and the cross, and of bringing many sons and daughters unto glory. He humbles before He builds up; He mortifies and purges and proves before He gives out of joy or the garment of praise: He brings into a state of desolation and death ere He grants the resurrection which is unto life. Thus fulfilling what is written: "New wine must be put into new bottles;" and "Except corn of wheat fall into the ground and die, a chaffinch alone; but if it die, it bringeth forth much fruit." Of similar import is the testimony of George Fox concerning himself—"which is well worthy the serious consideration of all: "When all my hopes in all men were gone, so that I had *nothing outwardly to help me*, nor could tell what to do, then, oh, then, I heard a voice which said, "There is, even Christ Jesus, that can speak to thy condition;" and when I heard it, my heart did leap for joy."

John Audland's earnest Christian desire for the restoration and salvation of immortal souls led him to forget himself and the frail basket or earthen vessel through which the heavenly anointing oil flowed, or in which the treasure of the grace of God was, and being pressed out of measure, above strength, in order that he might bring others to Christ, his frail tabernacle sank under the conflict of increasing exercise of spirit; but not until he could rejoice "that in simplicity and godly sincerity, but with fleshly wisdom, but by the grace of God, he had had his conversation in the world" unto His praise and glory who died for him, who called him by His grace, and who, in infinite mercy, preserved him green and fresh in His fear unto the end of the race.

He died at about thirty four years of age. The subjoined testimonial is extracted from an account of his life:

"John Audland was born in the county of

Westmoreland, England, about the year 1630. When he was a child, he was ripe and quick of understanding. About the eighteenth year of his age, the Lord inclined his heart towards himself, and he delighted in reading the scriptures; and having a large knowledge and memory, could discourse of things relating to religion, and became an eminent preacher, not only amongst the most strict sort of professors, but sometimes also at chapels, and public parish places of worship, where great multitudes of people would flock after him.

This John Audland was one of those before mentioned, who was convinced the first time that he heard George Fox at Firbank chapel, and received him into his house. Seeing the emptiness of his own high-falloon notions and profession in religion, he sat down in silence and astonishment, like Job, for many days; and great was the work of the Lord upon him, being stripped of his earthly wisdom, and in that state he mourned and wept bitterly, for he saw where he had been, and that it was the Lord alone that could help him.

In great compassion the Lord revealed his saving health and arm of power, by which he raised him up, and filled him with wisdom and strength for the performance of that work in which he would concern him, in gathering home the outcasts of Israel, and the dispersed of Jacob; and sent him forth to preach redemption, in the name of the Lord Jesus Christ, to the poor, and deliverance to the captive, and the day of vengeance upon the wicked. Leaving all his outward concerns, he went forth, and the dread, wisdom, and majesty of the Lord was with him, and many hundreds were turned to the Lord through him, as an instrument in God's hand. Bristol, and several counties in the west of England, were witnesses of the power and efficacy of his ministry, who with John Camm, was to the first of those called Quakers who went to that city, preaching Christ Jesus the light of the world. He was often concerned in disputations, and the Lord furnished him with matter, so that he stopped the mouths of gain-sayers; his testimony was large and free, affecting almost to all sorts of people, and he had a word in season to all conditions; but notwithstanding he was young and strong, yet that service much spent him several years before he died.

He had been several times in prison for his testimony's sake, as at Newcastle, and at Bristol; and often in great perils, sore beatings, and cruel mockings, both of the rabble, and also of the bitter-spirited professors, but through all, the Lord preserved him faithful. He growing weak by a lingering distemper of a cough and consumption, would often say in his sickness, "Ah! those great meetings in the orchard at Bristol, I may not forget. I would so gladly have spread my net over all, and have gathered all, that I forgot myself, never considering the inability of my body. But it is well, my reward is with me, and I am content to give up and be with the Lord, for that my soul values above all things."

Near his death, friends visiting him, the Lord did wonderfully open his mouth in exhortation, to their great refreshment and joy as if he had been without sense of sickness. He had a tender regard to his dear wife; "But in this," said he, "my will is in true subjection, submitting to the will of the Lord, whether life or death." He desired his wife to give him up freely to the disposing hand of the

Lord; and the Lord strengthened her freely to recommend him into his hands, which made him easy.

He was often, in the time of his sickness, exceedingly filled with the high praises of God, being overcome in the sense of God's love, joy, and everlasting peace. When he grew weaker, he would be helped up upon his knees, and upon his bed fervently supplicated the Lord, in the behalf of his whole heritage, that they might be preserved in the truth, out of the evil of the world; and that his gospel might spread, and be published, to the gathering of all that appertain to Israel. So was he sweetly taken away in the joy of the Lord, on the 22d of the First month, in the year 1664.

He was convinced in 1652, and died 1664, being aged about thirty-four years."

On Education.

There is a common but mistaken impression that, however much education, especially in its higher branches, may prepare the way for literary or scientific pursuits, for professional life, statesmanship or kindred occupations, it will not greatly aid in the faithful and capable discharge of the more simple and ordinary employments of life. There are some who even go so far as to assert, that beyond a certain limit, intellectual instruction actually impedes effort and deteriorates the quality of manual or mechanical labor. This is, indeed, a grave charge, and could it be proven, it would throw serious doubt upon the wisdom of our advanced public school system; but we apprehend that a thorough investigation would show it to be groundless.

It is a well established fact that when any one thing has been thoroughly learned, the next thing will be acquired more easily. He who has mastered one trade will find less difficulty in mastering another; he who has acquired one language finds each succeeding one less troublesome to learn. It may be said that this is only true within certain lines of labor, and that head-work and hand-work must not overstep these lines if they would attain the best success. This is not quite so. The mind is dependent on the health and vigor of the body for its power to work; and, on the other hand, manual skill and dexterity are largely dependent on the degree of mental force and the intelligence which guides it. Besides this, there are certain kinds of learning which make all others more easy. Whatever enables us to think consecutively, or to form conceptions quickly, will facilitate every operation in life, whether mental or physical. Thus, mathematics, languages, and sciences, though seemingly far enough away from the duties of the farm, the workshop or the store, do actually, through their discipline, make it easier to become a good farmer, mechanic or business man. They give the power to see quickly all the points at issue, to concentrate their energies upon each in its order, to calculate the kind and amount of force requisite to accomplish the object in view and thus to economize both time and power.

There is, perhaps, nothing of greater value to the laborer in any sphere, than just this capacity, and nothing which is more needed to improve the quality of our labor. Who that has undertaken the task of teaching any handicraft has not been struck by the difference of aptitude in the learners? One boy will listen stolidly, hardly-seeming to compre-

hend, and will handle the tools clumsily and with misdirected force; another hears accurately, sees at a glance what is required, and goes straight to the point. Both may have equal physical power, and equally good intentions, yet one learns, with ease and celerity, in a week, what the other, with far more painful effort, scarcely acquires in a month. Something of this difference may, of course, be traced to what is called "mother wit;" but much of it comes from the habit of thinking, reasoning and comparing, which mental studies center. This quickens all the faculties, and empowers them to act more promptly. When the brain is healthfully vitalized by mental discipline the eye is enabled to see more accurately, the ear to hear more correctly, the hand to work more effectively. Thanks to our multiform machines, there is comparatively little work left for human hands to do that does not require mental energy to guide it; and thus, other things being equal, he will be the best and most valuable workman in any branch of labor, whose brain is most thoroughly active, and who has been trained most carefully to use and to control his intellectual powers.

If education thus increases the value of an individual to the community, it equally increases his personal happiness. There are fewer keener gratifications than the consciousness of learning quickly, progressing rapidly, or working effectively. Let us, then, once more rejoice in the educational privileges which are so freely offered to the rising generation, and renew our faith in their imperishable influence.—*Philada. Ledger.*

Selected.

Some weighty counsel was given, recommending that they who speak in these meetings should be careful only to speak from necessity. The meeting broke up under a cover of solemnity; and my heart's desire is, that we may study to dwell in the stillness, wherein self is abased, and the power of Truth exalted.

I believe some of us are tempted to think, that unless we appear to take some active part in Truth's service, we may be looked upon by others, and perhaps by ourselves, as useless, lifeless members; but far otherwise is my judgment at this time. The humble, patient traveller, who bears the burden of the word, until the right time comes for deliverance, (when the message will be accompanied by a measure of power and authority,) assuredly works essentially for the general good.—*M. Capper at Yearly Meeting, 1794.*

A Station Indicator.—The Boston Herald says an invention, which will meet a want long felt by the general travelling public, has just been patented by an enterprising young German of that city, in the form of an indicator for steam cars, by which the various stations to be stopped at can be placarded. Travellers by railroads frequently are at a loss to understand the names of places as called out by the brakemen on the cars. By the invention in question all this annoyance is obviated. The indicator consists of tablets, about eighteen by six inches, bearing the names of the different stations the train may run to in its trip, each tablet arranged in the order of stopping. They are mounted on a sliding hinge made of thick wire, and fold up something like a book, and are held in place by a lever, which is the

key of the whole arrangement. Connected with that part of the lever nearest the tablets are two flat pieces of metal, each a little over an inch in length, one an eighth of an inch inside the other, and both extending in the form of an angle instead of running perpendicular to one another. Directly above this, with the lever, is connected the cord, which runs through a tube the length of the car, and is so connected on the rear as to be worked from the platform if necessary. By pulling the cord after a train starts from a station the name of the next stopping place appears.—*Late Paper.*

Sol. eted.

"THE FAMILY IN HEAVEN AND EARTH."
Eph. iii. 15.

"Tis but one family,—the sound is balm,
A seraph whisper to the wounded heart,
It hushes the storm of sorrow to a calm,
And draws the venom from the avenger's dart.

"Tis but one family,—the accents come
Like light from heaven to break the night of woe,
The hammer-cry to call the spirit home,
The shout of victory o'er a fallen foe.

Death cannot separate—is memory dead?
Has thought too vanished, and has love grown chill?
Has every relic and memento fled?
And are the living only with us still?

No! in our hearts the lost we mourn remain,
Objects of love and ever-fresh delight;
And fancy leads them in her fairy train,
In half seen transports past the mourner's sight.

Yes! in ten thousand ways, or far or near,
The call'd by love, by meditation brought,
In heavenly visions yet they haunt us here,
The sad companions of our sweetest thought.

Death never separates: the golden wires
That ever tremble to their names before,
Will vibrate still tho' every form expires,
And thus we love, we look upon no more.

No more indeed in sorrow and in pain:
But even memory's nest ere long will cease,
For we shall join the land of love again
In endless bands and in eternal peace.

—*Edmeston.*

Oregon, according to an official report just made to the Legislature of that State, has a total population of 116,000, of whom 16,000 are Chinese and Indians. At the date of admission into the Union the State had only 40,000 inhabitants. It has since nearly trebled. But the original Oregon included Washington Territory, which has become quite a flourishing colony, so that the progress of that portion of our national domain has really not been as slow as is generally believed. Oregon was settled chiefly by Missouri, Kentucky and Arkansas emigrants, and has preserved much of the character of those elements in its social forms, its agriculture and its conservative tone in politics. But since 1860 a new spirit appears to have been developed in the State, perhaps by railroad building and the cultivation of commerce. The State contributes a large part of the breadstuffs export of our Pacific coast that is generally accredited to California on account of the city of San Francisco being the shipping point. Indian was formerly interfered with the progress of settlement, but of late there appears to be no trouble of that kind. The true capacity of the State to sustain a large population cannot be known from any of the published reports, as in most cases the arable lands are found by practical experiment by the hardy pioneers, and the valuable mineral deposits come up

slowly to notice in the same way.—*Late Paper.*

A Victory of Peace.

Long ago Milton, in his ode "to the Lord General Cromwell," sung:

Peace hath her victories
No less renowned than War.

It is such a victory that Great Britain is gaining in her East Indian Empire. For a time immemorial, the failure of rains has been followed by failure of the crops and by famine. Famine has been aggravated by the scantiness of means of communication. Railroads there were not; and the water-courses were low from the same absence of rains that caused the famine. To carry food to any great distance by carts through a famine-stricken region was impossible. All the food that the team could carry would be consumed by the draft animals and the driver. The results were deplorable beyond expression. In the Orissa District, in the famine of 1866, a million and a half perished. In Bengal, during 1874, four million people were fed by the government for four months. And it is reported that at the present time 40 per cent. of the area of Bombay, and 60 per cent. of Madras are deserted, parched with drought.

The British Government, while administering as far as possible present relief to the distressed, is also most wisely and humanely endeavoring to apply remedies that shall greatly mitigate or prevent the same calamities in future.

A few years ago there were no railroads in India. There are now 9,415 miles, costing £105,790,929. The construction of these roads has furnished employment to vast bodies of natives who would otherwise have starved and also affords the means of conveying the abundant crops of one region to the famishing people of another.

Of equal importance are the works designed for irrigation. The chief dependence of the people of India is rice; this crop requires great body of water for its successful cultivation. Without an abundance of water it is total failure. The government is repairing tanks, constructed long ago by former rulers of India, and is also building new tanks. Some of these are of great magnitude. One of the ancient tanks or artificial lakes has an area of thirty-five square miles; another (but in the seventeenth century) is thirty miles in circumference. Many of these ancient works had fallen into neglect, but have been repaired by the government. Steam engines are used to raise the water when needed, and pipes and trenches serve to distribute it over vast areas, thus rescuing millions from the danger of famine, and at the same time adding immensely to the revenues of the government.

India has been conquered by the sword of Great Britain once and again. But this peaceful and beneficent conquest, making the government known by the blessings it confers, at once the most economical, the most humane, and the most enduring form of victory. To change a parched, famine-stricken district into a district smiling with plenty, and teeming with millions of happy and grateful citizens, is a victory unspeakably more grand than to wrest by force a principality, and to rule by fear and by the sword over millions of reluctant subjects.

Philip Price.

For "The Friend."

Farming was the business of Philip Price. After his marriage, he remained three years with his father in Kingessing, then four years on a farm in East Nantmeal, Chester Co., and in 1791, bought the plantation lying between West Chester and the Brandywine at this time, like much of the surrounding country, it was in a low condition, exhausted, washed into gullies, and partly overgrown with poverty grass, briars, and alder bushes. Writing to Judge Peters, of Philadelphia, in 1796, he said, "In the spring of the year of 1792, I fenced off a piece of about four acres (to fatten my cattle), being part of a large field that was much reduced, washed into deep gullies in many parts, and which had been totally neglected for many years. The appearance was so disagreeable that I put no value on it when I purchased the place, though the field contained 50 acres." *Mem. of Phila. Agril. Soc. pt. 2.* "The highest efforts of agricultural improvement in this neighborhood at the time of the purchase were those of a few meadows under artificial irrigation. Philip Price was in communication with Judge Peters, Dr. Mease, and others, who had begun to take a lively interest in the advancement of agriculture, and his acquaintance and observation extended to the best practical farmers and farms in the country. He commenced on his newly purchased place a course of improvement in manuring, the sowing of red clover and other grasses, and in the rotation of crops, that rapidly took effect, and rewarded his skill and labor. Lime was obtained from the 'Valley,' gypsum or plaster from tide water, and freely administered; the stable manure was protected by shelter, and applied without loss of strength before the autumnal seeding of wheat. Judge Peters, in publishing the communications of Philip Price, and others, on the advantages of plaster of Paris, says, 'I have heard of none who have been more remarkably successful in the plaster system than Mr. West and Mr. Price. They have brought old worn-out lands to an astonishing degree of fertility and profit, by combining the plaster with other manures.'" *Ib.* 34.

"The best rotation of crops, that resulted from experience, was to break up the soil late in the fall or early in the spring, and to plant the field with Indian corn, pumpkins, and potatoes—the former intermixed, the latter manured; the second year to sow with barley or oats, and after the removal of this crop, to plough the stubble, manure and sow with wheat in the fall, upon which was sown the clover and timothy, to come into use for pasture after the wheat harvest of the next summer, and to be mowed and pastured with the use of gypsum for several successive years, until the field came in rotation for a like repetition of crops. This process of careful husbandry transformed the exhausted hills of the Brandywine into their present fertile and beautiful appearance, and made them a garden spot of the world. And the worthless old worn-out 'fifty acre field,' its proprietor lived to see worth more than a hundred dollars an acre, in common with the residue of the plantation. To have been a pioneer in a process so beneficent and of apparently magical results, would be felt as no small honor to those who repose their happiness in popular favor and applause. To Philip Price it was simply a source of benevolent satisfaction, in contem-

plating the good he had aided in accomplishing, of which his eye took a wide survey, from the porch of his mansion.

"The results of the experiments of P. Price in the use of plaster, as communicated in 1796, in answer to the queries of Judge Peters, were that on a high loamy soil it operated better than on low-lying clay ground; one to one and a half bushels per acre are sufficient, repeated yearly while in clover; the effect is good, with or without recent ploughing; is without liability to leave the soil exhausted, as from the effect of a stimulus, where the product is returned in manure; that it is most beneficially applied to Indian corn and red clover,—but usefully to other grasses and grain crops; and may be used advantageously with or without other manuring and with most striking effect, if not immediately preceded by other manure. The best time to strew it is at the first harrowing of Indian corn, and on clover, with a small quantity soon after it comes up, to be repeated as soon as vegetation takes place in the spring, thus giving a stimulus when most needed. The effect is most visible on a poor soil,—eight acres sowed plentifully with it, without other manure, in five years became, says P. Price, 'worth ten times what it was before I plastered it, the face of the soil being entirely changed, and is admired by all who have hitherto known it;' but though now (1852) in a high state of cultivation, the same article is annually used with decided advantage, on the same farm."

The compiler of these notes, from some years' experience, can add his testimony to what was said years ago, as to the advantage of applying plaster, even on what is considered good land. It is thought the best time to apply it is during a most atmosphere, before or after a rain, mixed in the proportion of one bushel of plaster with half a bushel of commonest coarse sand, and sown at that rate per acre. The salt acts as a manure in this quantity, in addition to being an absorbent of dampness from the atmosphere, thus assisting the plaster to dissolve and be taken up by vegetation.

For "The Friend."

Annual Report of the Committee in charge of Friends' Free Reading Room and Library of Germantown.

In presenting their Report for the past year, the Committee in charge of the Library feel that there is cause for encouragement in the continued evidences of appreciation that have attended it since its establishment.

A particularly pleasing feature of our Reading Room is the number of operatives that avail themselves of its advantages, and in the purchase of books we are desirous of consulting the taste of this class of readers.

In this connection we might remark, that in order to keep the Library as complete in the various departments of literature as possible, there is on the Librarian's table a book in which the title of any work that is desired may be entered, with such comments as would enable the Committee to judge of its character, and if after examination it is deemed suitable, it will be purchased. The growing interest manifesting itself throughout the country in public libraries is a proof of mental progress on the part of the people which is very gratifying, and is, perhaps, a natural

out-growth of our system of public school education. Therefore, in view of the influence that public libraries have in training the minds of our people, we feel that it is an important subject for the consideration of those in charge of such institutions, whether a decided stand should not be taken against the so general introduction of works of fiction, and when we remember that a large percentage of the readers of this class of literature is among the young, and that its tendency is to destroy a relish for sound and more improving reading, we can hardly appreciate the injury which may thus be unconsciously done.

The Committee are glad to be able to state that although the cases are open and their contents fully accessible, the percentage of loss is exceedingly small.

In conclusion, we feel that our thanks are due to those whose voluntary contributions have enabled us to bring the Library to its present flourishing condition. It is open, free of charge, to all of both sexes who are properly recommended, and we are convinced must materially affect the literary advancement of our town's people.

It gives us pleasure to record the continued valuable services of our Librarian and his assistant, who are ever ready to welcome either the transient or the regular reader.

For details of the working of the Library for the past year we refer to the following: *Librarian's Report.*

The Librarian presents the following Report:

During the past summer, the attendance at the Library and Reading Room was perceptibly interfered with by the Centennial Exhibition drawing to it some of those who have commonly resorted to our Room at that time. So many of our citizens were occupied in visiting the halls of that wonderful collection, that we could not expect other than a falling off of the attendance here. The statistics offered below will, however, show that our visitors have returned in quite gratifying numbers to the use of our Room and Books. We could but note how many applications were made for information on questions induced by objects observed at West Philadelphia, showing the advantage of having so well selected a library in our midst, as tending to lead readers into habits of thought and study.

Through the kindness of our Representative at Congress, and the public authorities at Washington, several volumes of scientific value have been placed on our shelves. These, and the purchases made during the past year, have added 287 volumes to our collection, making the number of books belonging to the Library 7,638. A few of these were purchased to replace worn out books, mostly children's. Young readers are necessarily more destructive in their use of books than older persons, yet we are glad to say that their care of the volumes they take out is greater than we could have anticipated. Indeed they form one of our most interesting classes of applicants, and under the liberality extended to them in the use of the Library, their numbers are increasing. While it is an interesting problem how these youthful readers may be led from childish, to better and more instructive works, we feel encouraged in the belief that ours is a safe way to accomplish so desirable an object.

The number of new applicants recorded

during the past year was 367. Of these, 182 were males and 185 females. There are over 1,000 names of readers on our register, most of whom are taking out books at this time; though some are not doing so, we yet look for a renewal of the use of the Library on the part of many of these. Our rule is to erase the accounts of those who by long absence lead us to suppose they will not return.

There are 7 books which appear to have been lost during the year, yet we hope to recover most of them. Of the 27 volumes recorded last year as lost, we recovered all but 12. Our losses arise, mostly, from persons who have books out, moving away and neglecting to bring them back before so doing. A monthly examination is made of our record, and parties delaying the proper return of books on time are notified by a printed postal card. We attribute the smallness of our loss, in part, to our care in this respect.

One of the pleasing sights in our reading department is the number of persons with pencil and paper taking notes on subjects in which they are interested. We frequently have acknowledgments from them of the advantage they have derived from our Library in that way, and are often called on for help in these researches. Such studious visitors, we think, are increasing in number as the value of our collection for such purposes becomes more generally known.

The weekly average of visitors for the last month was 465; the largest number in one week, 555. During the time of the Centennial Exhibition the average was about 275 per week. On Seventh-days we often have as many as 125 or 130 visitors. The number record-d for the year was 15,283.

When we consider that in most of our large Municipal Libraries the reading of fiction averages at least seventy-five per cent. of all the volumes furnished, our success in conducting a smaller library with the entire exclusion of such literature is a gratifying and encouraging circumstance.

In conclusion, let me congratulate you on the successful working of our Library and Reading Room during the past year.

Respectfully,

WILLIAM KITE, *Librarian.*

Germanatown, 31 month 1st, 1877.

For "The Friend"

The removal quite recently of several upright pillars of the church, appears to give rise to the plaintive and impressive language of the prophet, "The fathers, where are they? and the prophets, do they live forever?" There is much in the inquiry. "And the prophets, do they live forever?" We have so long been accustomed to looking to and depending upon such for aid, counsel and reproof, that when they are removed, the poor human mind is apt to recoil upon itself and settle into a state of despondency, exclaiming in the bitterness of sorrow, Who shall show us any good? These are very natural feelings, but are they proper to indulge in? Some years since, the writer was walking in a retired place on the outskirts of a neighboring village, and was struck with the number of fine, straight young trees that appeared rather suddenly to have sprung up; on inquiry, it appeared that a large, old spreading tree, had been recently cut down and taken away. The young symmetrical trees were there before, but from the overshadowing presence

of the greater one, had not been perceived, nor could they grow and thrive properly until that was removed. Is it not so in the spiritual world? the fathers having served their day and generation through many a winter's blast and scorching summer sun, have been, through Divine mercy, safely gathered, we humbly trust, to their everlasting rest. It is believed there are not a few now within the limits of Philadelphia Yearly Meeting, who have been quietly preparing for usefulness, and who as they keep their places, with the eye of the mind turned attentively inward to the pointings of truth and yield obedience thereto, will be enabled to fill up the broken ranks, and as faithful standard bearers in their day, hand down, unimpaired, to future generations, the precious testimonies given to us as a people, to bear before the world.

The following passages from the journal of John Fothergill, being pertinent to this subject, it is thought might with profit be revived at this time.

"Another thing is fresh in my remembrance which I am not easy without mentioning. There was in our meeting, an ancient and truly valuable minister; and when I was about sixteen or seventeen years of age, I was often affected with discouraging reasons in myself; how we should do, and what would become of us when he died? under this anxious thoughtfulness I was induced to consider, how and by what means he was made so valuable and serviceable. That it was through his faithfulness, his waiting to feel after and adhering to that manifestation of divine power and life from Almighty God, whereof he declared, that his Holy Spirit, to which he labored to turn and gather people's minds, appeared in all; and as hereby he was made truly serviceable, so that heavenly living principle was well able to help, feed, fit and preserve all who truly sought to know and be subject to it, and make them truly serviceable also. This consideration instructed and encouraged me, to look to the Lord and beyond outward instruments. I have reason to believe, the like thoughts affected some others of our youth in that meeting also to advantage.

The said minister was taken away by death in about one year after, and the heavenly and merciful springings of divine life, so owned and relieved many of us, in our humble hungerings after it, though much silent in our meetings, that there soon appeared a lively and truly religious growth among us; and in little more than two years after the aforesaid Friend's decease, there were five of us engaged by the Truth to open our mouths in the ministry of the gospel to the satisfaction and comfort of the meeting. So that instead of a decay and a declension, about which I had been distressed with fear, our meeting increased in number and true godliness."

The Bermudas.

The following notice of the appearance and history of the occupation of these islands is taken from a recent work entitled "The Cruise of the Challenger."

"As we approached the Bermudas, which are mere specks on the chart of the wide Atlantic, one is immediately struck with their somewhat dull and sombre aspect; the land nowhere rising to a greater height than 200 feet (where the lighthouse is situated), and by far the

greater part not being more than from 25 to 50 feet above the sea-level. We have to fly the night, and for a portion of the next day were engaged sounding and dredging round the reefs in a depth of 400 fathoms on a coral reef bottom; the results were, as is usually the case in the proximity of coral reefs, extremely poor, the coral sand *débris* being apparently unfavorable to the development of animal life.

"On its conclusion, we closed on the land and as we stopped off St. George's for the pilot to navigate the vessel through the intricate and dangerous narrows between the reefs, it was indeed a pretty sight. Seemingly nothing could have been more romantic than the little harbour stretched out before us; the variety and beauty of the islets scattered about; the clearness of the water; the number of boats and small vessels cruising between the islands, sailing from one cedar-grove to another, made up as charming a picture a could well be imagined.

"Proceeding on, as we near the shore, the white houses of Hamilton are seen peeping out from amongst the dark green foliage; then Clarence Hill, the official residence of the naval Commander-in-Chief, is in sight, overlooking a pretty little bay and landing-place with the dark cedars and other trees coming close down to the water's edge; Mount Langton, a charming spot, the residence of the Governor, has been passed, and in a short time we anchor in Grassy Bay. Nature is looking beautiful, and the temperature is genial and pleasant. These islands, situated as they are between the parallels of 32° and 33° north latitude, are about equally distant from the West Indies and the coast of North America, consequently the climate is a neat between the two, partaking neither of the extreme heat of the one nor the excessive cold of the other."

"These islands are said to have been visited nearly 400 years ago by a Spaniard named Juan Bermudez, and on their discovery being reported to Spain, they were described as the most remote of all the islands yet found in the world. From this date many years seemed to have elapsed without anything being recorded about them, except an occasional wreck, or stories of the old buccaners, who were said to hold court here after some of their successful raids on the Spanish Main, and tradition even now informs us of untold wealth being buried about amongst the islands. Perhaps the earliest authentic account is that given by one of the crew of the *Sea Adventure*, a vessel that was wrecked off the coast in 1609.

It appears this vessel had been fitted out in England to convey the newly appointed Governor, Sir Thomas Gates, together with Admiral Sir George Somers and other officials, to the recently formed colony of Virginia; meeting with a dreadful storm and suffering great privations, their vessel was run on shore, and became a complete wreck. The islands were found to be uninhabited, although there were evident traces of earlier visitors, for hogs were found to be very numerous, having probably been set adrift by them. Fish and turtle were also abundant; and, finding the climate so pleasant and the land so productive, a year passed before any attempt was made to get away; by which time they had managed to build a small vessel, and in May 1610, they set sail for their original destination.

"On reaching Virginia, they found the

blously so badly off for the necessaries of life that Sir George Somers and a party of volunteers started for Bermuda to obtain supplies; and during this trip Sir George died, near the mouth of the present town of St. George, where there is a monument erected to his memory. "From reports reaching England about this time (1612), a chartered company was formed, colonization commenced, and soon after the first party of settlers arrived, under the charge of Richard More as Governor. From this date Bermuda became a British colony, with representative government and a legislative assembly.

"As time passed on, its importance as a naval and military station became apparent, and large sums of money were expended on fortifications and improvements. Of late years the islands have become well known as the site of extensive convict establishments; and these, like all the other outlying penal settlements, have been broken up, and the convicts sent back to our own shores again.

"At the present time the imports and exports are but small; and although possessing what a fine climate, its agricultural produce is limited (perhaps from a dearth of labor), for only about one-tenth of its area is cultivated, and this is only in isolated patches, where root-crop and early crops of vegetables are produced for the American markets."

The Happy Man.—The Happy man was born in the city of Regeneration, in the parish of Repentance unto Life; he was educated at the school of Obedience, and lives on the plain of Perseverance. He works at the trade of diligence, notwithstanding he has a large estate in the country of Christian Contentment; and many times does jobs of self-denial. He wears the plain garments of humility; and as a better suit to put on when he goes to court, called the robe of Christ's righteousness. He often walks in the valley of Self-basement, and sometimes climbs the mountain of Spiritual Mindfulness. He breakfasts every morning upon spiritual prayer, and sups every evening upon the same. He has not to eat which the world knows not of, and his drink is the sincere milk of the word, and happy he lives, and happy he dies.—*Extract.*

Japanese Husbandry.

Deep cultivation of the soil has become a kind of proverb with our modern writers on agriculture; and the principle of the system is, at least, fully admitted on all hands, the only objection occasionally raised against it being that it requires a large supply of manure. At the most enthusiastic admirer of the system can hardly conceive how universally and to what perfection it is carried on in Japan.

The Japanese husbandman has come to treat his field as a plastic material, to be turned to account in any way or form he pleases, just as a tailor may cut out of a piece of cloth cloaks, coats, trousers and vests, and occasionally makes the one out of the other. To-day we find a plot of ground covered with wheat crop; in eight days the wheat is sowed, and one-half of the field is transformed to a swamp, thoroughly saturated with water, in which the farmer, sinking up to his knees, is busy planting rice, whilst the other half is a broad and dry plot, raised two or two and a half feet above the rice swamp, and ready to receive cotton or sweet potatoes, or

buckwheat. It often happens also that a square plot in the centre is turned into a dry bed, surrounded by a broad rice swamp; and as the water must cover the surface of the latter only slightly, the levelling must have been effected with great care, and with the use of instruments.

The whole of this work has been done by the farmer and his small family in a very short time. That it could be accomplished in so short a time is a proof of the great depth of the loose arable soil, even after a harvest; and that the farmer could venture to do so without troubling himself about the next crop, is a sign of the abounding wealth of the soil in mineral constituents. It is only when great depth of the loose arable soil is combined with a plentiful store of mineral constituents that deep tillage of the ground can be truly resorted to. The description here given is not a mere fiction or creation of the imagination, but a faithful statement of facts, such as I have had occasion to witness by the hundred. Considering that rice requires, at least, from 1 to 1½ feet of cultivated soil, and adding to this half the height of the raised bed, viz: 1 to 1½ feet, this gives a cultivated depth of arable soil of from 2 to 3 feet.

The introduction and constant progress of the system of deep tillage have been powerfully assisted in Japan by the practice pursued from time immemorial of growing all crops in drills. With the advantage of this method we have also long been familiar. Among the favorable features presented by the cultivation of root crops, our books of agriculture always place in a prominent rank the fact that it enables the farmer to deepen the arable soil of his land. All our gardeners, at least, have long adopted it.

*The Japanese husbandman never breaks up a plot of land unless he possesses a small stock of manure, which he may invest in the ground; and even then he only cultivates this new plot to the extent his supply of manure will permit. This rational proceeding shows the deepest insight into the nature of the system of agriculture to be pursued with a reasonable prospect of securing a constant succession of remunerative crops. No other illustration can so clearly show the difference between our way of viewing the matter and the Japanese. We cut down the trees on a forest plot, sell the timber, grub up, plough and till the ground, and then proceed to dispose of the productive power of the new soil, in three cereal crops, obtained without the least supply of manure; or we may possibly assist in accelerating the exhaustion of the ground by a small dose of guano. All that this course of proceeding is calculated to accomplish is, that we have now to distribute the manure, hitherto produced on our estate, over a somewhat more extended surface than formerly. When the Japanese husbandman breaks up a plot of ground, he finds a virgin soil, the productive power of which he has not the least intention of impairing. He, therefore, from the very outset, takes care to establish a proper balance between crop and manure, expenditure, and income, maintaining thus intact the productive power of the ground, which is all that can reasonably be attempted by any rational husbandman.—*Pen and Plow.**

"God is a spirit; and they that worship Him must worship Him in spirit and in truth."—John iv. 24.

THE FRIEND.

SEVENTH MONTH 7, 1877.

The Sixth month's number of "The British Friend" contains a long account of the late London Yearly Meeting. The discussions on different subjects are represented by the reported remarks made by the respective members who took part in them, and we doubt not present fairly the tone of feeling and sentiment that prevailed in the meeting.

The epistolary intercourse between London Yearly Meeting and other bodies of Friends, is large, embracing as it does beside that in Ireland, those on the continent of Europe and in South Wales, and all those in America, except Ohio and Philadelphia. From these communications were received, and replies thereto directed to be sent either by the Yearly Meeting or the Meeting for Sufferings.

Some embarrassment appears to have been felt for want of sufficient information from all the Quarterly Meetings, of the state of their subordinate meetings and members; there being but two queries requiring replies, and they throwing but little light on the main points of interest.

No propositions for further changes in the discipline or practices of Friends were brought forward, and several Friends expressed their earnest desire that the meetings for worship held under the control of members, should be conducted as they ever had been before the introduction of scripture reading and singing, while others thought advantage had been derived from the latter.

Meetings of ministry and oversight had been consulted throughout the Yearly Meeting, and regularly held, superseding the former meetings of ministers and elders.

A proposition brought up from Durham Quarterly Meeting to a previous Yearly Meeting was taken into consideration. Its object was to call the attention of the meeting to the great advantage that would result from the distinguishing principles of Friends being taught in their schools, and by parents to their off-spring; enumerating the following heads as the most important:

"First, The doctrine of the immediate guidance of the Holy Spirit.

"Second, That in Meetings for Worship we sit down in silence, without any pre-arranged service, and without any outward aid, but in dependence on the great Head of the Church, believing that in so doing we are better able to worship God in spirit and in truth.

"Third, The freedom of Gospel Ministry, and that God calls and qualifies women as well as men for the service.

"Fourth, That there is no priestly caste amongst us, all believers being privileged to belong to the Royal Priesthood under Christ, our ever living High Priest and Intercessor.

"Fifth, The non-essentiality of the Sacraments, so-called.

"Sixth, The un-Christian character of war, and the unlawfulness of oaths under the Christian dispensation.

"Seventh, The importance of Christian simplicity and non-conformity to the world."

There was a large expression of differing sentiments on this subject, some opposing it on the ground that if the meeting sanctioned

it, it would be looked on as a creed, and others desiring that it might be recommended to the observance of the subordinate meetings. The minute made states that a large expression of sentiment had taken place on the subject, which it was concluded to recommend to the Quarterly and other meetings.

The number of members reported was 14,441, being 188 more than last year.

The editor of the "British Friend," speaking of the meeting, says, "It was remarkably harmonious, interesting and instructive—harmonious inasmuch as those who took part in the various discussions expressed themselves calmly as usual, without controverting the opinions of others, interesting and instructive from the important character of the subjects brought under consideration."

We apprehend few are left willing to plead for the doctrines and testimonies of the gospel, as originally held and promulgated by Friends, in contradistinction from other religious professors, and that the concern of those few is but little heeded.

In our last number we laid before our readers an Address put forth by a Conference of Friends held at Bear Creek, within the limits of Iowa Yearly Meeting. In this number will be found another document of the same character emanating from a Conference of Friends held at Sugar Grove, within the limits of Western Yearly Meeting.

Without coming to any conclusion relative to the course pursued by these bodies—unacquainted as we are with all the circumstances connected with their movements, we may rejoice at finding there is a remnant preserved in the different Yearly Meetings in the west, which is not ashamed to avow its adherence to the doctrines and testimonies of the gospel, as ever held by Friends, and to testify publicly against the fearful heresy that has carried away so many within the pale of the Society from its original faith. Earnestly do we desire that, carefully discarding all party spirit, Friends in the different Yearly Meetings may act in the meekness of wisdom, looking with unwavering faith to Him who when He putteth forth his own sheep, goeth before them, and as they follow him will preserve them from doing any thing that will mar his work or the extension of his kingdom.

SUMMARY OF EVENTS.

UNITED STATES.—A final settlement has been made by the Secretary of the Treasury, of the \$1,500,000 loan to the Centennial Exhibition, allowing the claim of the Board of Finance for \$20,000, which they paid to customs officials before Congress had made an appropriation for that purpose.

A few other accounts were also allowed, and an payment of the balance—about \$30,000—the President and Treasurer received a receipt from the Secretary of the Treasury for \$1,500,000. This money is paid into the Independent Treasury account of the Treasury Department.

By connecting the New Mexico and Arizona telegraph systems near Santa Fe, New Mexico, recently, the only continuous southern line across the continent was formed. The next step proposed is to connect the military line of Texas with that of Arizona and New Mexico, by running 250 miles of wire down the Rio Grande from Mesilla to Fort Stockton.

The Russian Minister informs our State Department, in a note dated the 26th ult., that his Government has issued an order giving vessels sailing under neutral flags the right, during the present war with Turkey, to engage in the coasting trade between the Russian ports in the Black Sea, and the Sea of Azov.

The statement of the exports and imports for the eleven months ending 5th mo. 31st, shows that the total value

of merchandise exported for the period named was nearly five hundred and sixty million dollars, an increase of one hundred and sixty-five millions as compared with the corresponding period of the preceding year. The imports for the same eleven months were nearly four hundred and three million dollars, a falling off compared with the corresponding months of last year of nearly twenty-four millions.

The exports of gold and silver for the eleven months were forty-nine millions, and the imports thirty-nine millions.

The total of merchandise and specie exported during the eleven months exceeded the merchandise and specie imported 166,372,003 dollars, an increase of thirty-three millions over the same months of last year.

It is estimated that California and Oregon will have about 425,000 tons of wheat to export this year.

The San Francisco *Alta* publishes a copy of a petition of the Legislature of Sonora to Queen Victoria asking of British protectore over the Islands. The petition is dated 4th mo. 31. The *Alta* is informed that a petition was at the same time sent to the United States asking its influence in favor of a British protectore, or that it work for a joint protectore over the Islands. The town of Pinar, and the village of Erichillon, in Chester county, Pa., were devastated on First-day afternoon, the 1st inst., by a violent storm. At Parkersburg eleven houses were demolished, and one man was killed and another severely injured. At Erichillon twenty dwellings and a new seminary building were destroyed, a woman was killed and five persons were injured, two perished fatally.

Another hurricane swept through Central Indiana and Ohio on the night of the 30th ult., doing great damage to the crops and other property, and causing some loss of life.

Heavy rains fell at Biddleford, Me., on the 1st inst., which rained in three hours, making the streets impassable.

A severe hail storm, lasting forty minutes, broke all the glass in skylights and green-houses, and ruined vegetation, in Chatham, Ont., on the 1st inst. Some of the stones were three inches in circumference. On the same day a violent storm of rain and hail struck Watery, Connecticut. All the skylights and nearly all the panes of glass in the city were broken, the heaviest stones being "as large as bull-brants." The garden crops were almost entirely ruined. The streets and roads were badly "washed" by the heavy rain. Lightning struck the agitator and caper shops of the Liberty Oil Works, in Lawrenceville, near Pittsburg, and set on fire the saw-logs and machinery, with 2000 empty barrels and about 3000 barrels of crude oil were destroyed. Loss \$30,000.

The railroad companies over the United States are very generally reducing the wages of their employees, from 10 to 12 per cent. In a few instances this is resisted, but is mostly quietly acquiesced in. The New York Tribune having announced its co-compositors and proof-readers its intention to strike down their wages, was met by an immediate strike on their part; within two days new men were procured to fill all the positions.

The monthly mean of the barometer and thermometer, during last month in Philadelphia, was respectively 30 inches and 72°. Rain-fall for the month 5.22 inches. The lightning storm of 21st was quite severe, doing much damage in and about the city. One meteorite was observed at 10.50 p. m., on the 14th ult., which starting from a point 75 degrees above the eastern horizon, moved towards the northeast, leaving a train for 10 degrees behind it of blue color. Reports from the surrounding districts show that the weather during the month was generally favorable for the growing, and ripening of the cereal crops, and large yields are expected. Reports from the peach growing sections remain favorable.

The Markets.—The following were the quotations on the 30th ult. Cotton, 12a to 12½ cts. Wheat; Penna. red, \$2.10 to \$2.15; Penna. amber, \$2.20 to \$2.25; Penna. white, \$2.15 to \$2.20; Rye, \$1.75 to \$1.80, the latter for Minnesota choice. High grades at \$1.00 to \$1.10. Rye at from 75 to 85 cts. Corn dull and lower, 57 to 62 cts. Oats, 44 to 50 cts. Cheese, 7½ to 9½ cts. Spring chickens, 15 to 17 cts.

FOREIGN.—A public meeting was held in St. John, N. B., on the 27th ult., the mayor presiding, at which resolutions were adopted, regarding the proposed improvement of the streets, placing restrictions upon the erection of wooden or brick faced buildings, the raising of a loan to rebuild the city, admission of building material free of duty for six months. The insurance representatives in St. John have signed an agreement not to erect buildings on wooden, brick faced or shingle-roofed buildings hereafter erected.

Reports of the condition of the crops in Canada, published in the Toronto *Globe*, indicate a yield of wheat considerably below the average. An excellent crop of fall wheat is expected, but not so favorable a chance to place before the harvest. Spring wheat is a little less favorably spoken of. Barley and oats will yield less than usual. Peas, rye and potatoes are doing well, but the latter need rain.

Advices from Acapulco to the 16th ult., announce the capture by the Diaz gun-boats, after a bombardment of several days, Alvarez, the Liberal commander, surrendered 250 men.

During the past two months, according to a despatch to the New Orleans Board of Health, there have been 185 deaths from yellow fever in the military hospital one hundred miles from Havana. It is the only place of which the number of deaths of the equator—where the fever has appeared this season is about 100.

The number of wolves in Russia is estimated at 200,000, and their annual consumption of flesh is 25 cwts per head. Last year they devoured 161 human beings and it is estimated that, in one way or another, the cost the country \$10,000,000. Hunting has declined since the emancipation of the serfs, and the wolves have increased.

The Russian left is in force near Hersova, and their troops between Kalrash and Ismail, some 30,000 have by this time passed from the northern to the southern bank of the Danube, and driven the Turks what they call their second line of defence at Kustend and the Roman walls.

The Russian cordon has crossed the Danube at Simniz, and it is supposed that the Turkish line will soon be threatened by at least 150,000 men.

WESTTOWN BOARDING SCHOOL.

A well qualified teacher of the Latin and Greek languages, will be wanted at the opening of the next session, 10th mo. 29th. Apply to Joseph Sheppard, 205 North 4th St., Chester Co., Pa. John E. Carter, 624 South 24th St., Philadelphia. or Wm. Evans, 212 3/4 Front St.

WESTTOWN BOARDING SCHOOL.

A suitably qualified Friend is wanted as Governor at the opening of the next session.

Application may be made to
Wm. Evans, 212 3/4 Front St.,
Clarkson Sheppard, Greenwash, N. J.,
Joseph Passmore, G. Shenwick, Penna.,
G. J. Sattergood, 413 Spruce St., Pa. A. A.

FRIENDS' SELECT SCHOOL FOR BOYS.

A suitably qualified man or woman Friend is wanted as assistant teacher in this school, to enter upon duty the first of Ninth month next.

Prompt application may be made to either of the undersigned,

Thomas Lippincott, 220 Franklin St.
Richard Calvert, 125 Chestnut St.
Ephraim Smith, 1110 Pine St.
E. Ward Lewis, 127 South Fifth St.

FRIENDS' ASYLUM FOR THE INSANE.

Near Frankfort, (Twenty-third Ward), Philadelphia. Physician in Superintending—JOSHUA H. WORTHINGTON, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board Managers.

DIED, at his residence in East Bradford, Chester Co., Pa., on the 16th ult., ENOCH WORTH, Sen., in the 74th year of his age, a valuable elder of Bradford Monthly Meeting. This dear Friend having in early years submitted in great sincerity to the restraining power of Truth, was through a long life eminently conspicuous for meekness and humility—so much so, that no doubt the thought of any laudatory notice of his private worth had been very trying to his sensitive mind; yet we believe it due to the great care he had so much at heart, to say, his example of watchfulness, purity of life and conversation, and consistency character with the profession he made before the world is worthy of imitation; that as he followed the dear Redeemer, he would be inclined to follow him. And the work of righteousness shall be peace, and the effect of righteousness quietness and assurance forever. "Blessed are the meek, for they shall inherit the earth." Blessed are the pure in heart, for they shall see God.

PHILADELPHIA.

For "The Friend."

Mary Harris.

In the memoir handed down to us of Mary Harris, there are some stirring records of especial application and instruction to our dear young Friends to whom this may come. It appears that she was a young and beautiful maiden, and had a love early raised in her to the blessed Truth; yet notwithstanding this she was so settled down under a mere profession hereof, as still to live in the customs and fashions of a world, which the apostle John has declared, "lieth in wickedness." Another testimony on this point from the dear Saviour himself is no less cogent: "No man can serve two masters; * * ye cannot serve God and mammon," or the world.

Oh! that our beloved young Friends could see the emptiness, the unsatisfying nature, the vanity and vexation, the remorse and anguish of spirit ever attendant, sooner or later, upon indulgence in "the lust of the flesh, the lust of the eye, and the pride of life which are not of the Father but of the world!" How many, we are persuaded, have been kept back from following the wooings and leadings of the Lord's holy, preserving Spirit, and from that "Peace" with Him "which passeth all understanding," from also the "hundred fold" promised in this life, by these tempting baits and false pleasures of our cruel enemy who seeks to captivate us by such alluring, sin-leading idols; and in any and every way he can, to lead to bewilder and dazzle to blind.

How interesting is the relation given of I. H., that though she for a time withstood the visitations of a Saviour's love, and hardened her heart against His reproofs, yet being brought low by the chastening hand, and disease settling upon her, she became as a brand plucked from the burning, even to the experience of the little child's state, which is so acceptable and precious to Him who has said, "Suffer little children to come unto me and forbid them not, for of such is the kingdom of God." And, "Except ye be converted and become as little children, ye shall in no wise enter into the kingdom of heaven."

She was a living monument of mercy. The Lord rent the veil which is ever upon the heart until it shall turn to Him, and drew her into nearer conformity with His blessed will; whereby also we "are changed into the same image from glory to glory, even as by the

Spirit of the Lord." She declared from the bed of sickness and of death, after her eyes were opened and light arose out of obscurity, that "the Lord hath made these bones bare for my rebellion; because I would not submit to His precious truth." And soon after this charged those around her, "Oh! do not thus stand out, it will cost you dear, if ever you find mercy." Ah! what significance in that word "if!" May none presume upon a mercy unauthorized, or trust to any more "convenient season," that leaves out alike the fearful uncertainty of this mortal life, with, likewise, the strivings of the Redeemer's Spirit, over which we have no control; and that fails to recognize the solemnly preceptive language: "Behold now is the accepted time; behold now is the day of salvation."

The memoir, as selected from, is as follows:

"Mary Harris, of London, a maid, young and beautiful, went often with her relations to the meetings of the people called Quakers, and had a love raised in her to the blessed truth, and to them who held it in a pure conscience; yet still lived in the customs and fashions of this evil world. But the same love of God that had begotten tenderness in her heart, and love to truth, followed her, and would not suffer her to sit down in the world without trouble. The Lord visited her with great weakness, so that she grew ill, and fell into a consumption for about three years; and being often visited by Josiah Coale, and put in mind to consider, whether the hand of the Lord was not upon her for her unfaithfulness and disobedience, she did consider the matter, and the Lord sent it home upon her heart, and she cried to him for mercy; and applied her heart to the Lord, and his faithful messengers, saying, 'I have hardened my heart at many precious meetings, when the Lord hath smitten me; and I have seen plainly, that the Lord would have gathered me; but I said in my heart, if I receive this, if I give up to this, I must be a Quaker, and I cannot be a Quaker. Then would I take my heart from attending upon the ministrations of truth, and then my heart became more hard. What shall I do,' said she, 'that now I may receive the faithful sayings of the servants of the Lord?' Oh! that my heart were open; but it is shut and hard: when shall I find mercy in this state?"

She remained so for some time, and grew weaker and weaker in body; and on the first day she took her bed she was much under the righteous judgments of the Lord, and felt his word in her heart as fire. But the Lord in judgment remembered mercy, and having brought her very low, he showed her the child's state, which she with great delight desired; and indeed she became as a little child, fit for the kingdom of heaven. Then did the Lord rend the veil, and showed her his glory, and the preciousness of his pure truth, and the light shined out of darkness, and in it she saw light,

and received the knowledge of God; and her heart was filled with joy and praises to the Lord, saying, 'I am well; I feel no pain. I am full; my cup runs over. I am filled as it were with marrow and fatness. I have seen his glory, and tasted his precious truth. How pure is God's everlasting truth? Nothing so pure; and they who indeed receive it, are made pure by it. Praised be the Lord who hath made me partaker of it, and placed me among his people. Oh! blessed God, who hath given me cause to sing aloud of thy praise.' Many precious words she spoke to several persons who came to visit her, to their several conditions, showing to some, who lived in pleasure, her hands, saying, 'See here, the Lord hath made these bones bare for my rebellion; because I would not submit to his precious truth. He hath brought me to the dust, and I must lay down this body as a sacrifice. Oh! do not you stand out, it will cost you dear, if ever you find mercy.' Then she would sing praises to the Lord, and exhorted all speedily to embrace truth, and warned others professing truth, from following the fashions of the world, crying to the Lord to wash her thoroughly. Some would say to her, 'It may be thou mayest recover.' 'No, no,' she replied, 'I must lay down this body for my rebellion. In my vain life, if any had said I should recover, it would for a little time seem to refresh me; and if they had said surely I could not live long, it would cast me down; but now I long for death. I must lay down this body; for,' said she, 'when I received God's everlasting truth, I received the sentence of death;' and this she was positive in all along.

More sensible expressions she uttered, which I omit for brevity. About half an hour before her departure, she was taken with a great trembling, and seemed to be somewhat troubled; when one near her said, "What is the matter? art thou in any doubt concerning the truth of which thou art made partaker?" She replied, "No, no; that is God's pure everlasting truth, which the people of God, called Quakers, are made partakers of, and for which they suffer; that is everlasting, and that is the true spirit, and their God is my God; and although I see it not now as I have seen it, yet I bring in my testimony, that is the truth that shall abide forever; that is pure, and nothing that is defiled shall be sheltered under it. That is the truth which enlighteneth every man coming into the world: the little seed in me is become great, great! Blessed be God who hath placed me among his people, and I possess what they possess; and when the faithful die as I die, my portion will be their portion; and my cup is full, it runs over and over." Then she breathed a little thicker for about the space of a quarter of an hour; and so without groan or sigh, or the least motion, she shut her eyes and slept. Glory to God for ever.

She died in the year 1668."

For "The Friend,"

Physical Features of Iceland.

Dr. Kneeland thus describes some of the characteristics of this remarkable island:—"According to Pajkull, a Swedish geologist who has travelled extensively in Iceland within the last ten years, the form of the country, as it now exists, its rent and uneven surface, are due to the action of glaciers. The basaltic rocks show numerous marks of glacial action; where a deep valley or fiord is seen, there was once a continuous layer of rock, afterward carried away by the ice; lava, which once must have moved in horizontal strata of uniform thickness, now appears in hills and undulations, often overlaid by a thick soil; the erosion of the glacier has done this, and very extensively.

The rocky fissures, or fiords, which extend from the rocky coast far into the interior, are characteristic of Iceland, as well as of Norwegian scenery. Originating perhaps in the fissures of the primary upheaval, extending far beneath the water, they have since been greatly modified by the action of glaciers, the sea, the rains and the frosts; they are very narrow in proportion to their length, and resemble rivers with high perpendicular rocky walls. Bare of vegetation, lifeless and still, except from the roar of the wind, the torrent and the sea, they are inexpressibly grand and gloomy. Yet these rocky wastes, so desolate when viewed from the ocean, are the favorite dwelling-places of the Icelander; here he finds an inexhaustible supply of fish, a plenty of drift wood for domestic uses; an occasional stranded whale, and a comparatively quiet harbor; the lateral valleys, also the effect of erosion by ice, are apt to be fertile, communicating with grassy meadows well suited for his cattle. In the neighborhood of these fiords, therefore, we find the thickest settled portions of the country. It was from one of these fiords, the Breda on the western coast, about one hundred miles north of the capital, that Erik the Red sailed in 984, for the discovery of Greenland.

This structure of the coast, extending as it does far into the interior, facilitates communication by water, but renders travelling by land difficult and often dangerous; the steepness of the ascent and descent; the sudden transition from the heat of the valley to the snow, rain, and wind of the heights; the passage of the narrow bridle-paths along the almost perpendicular sides of precipices whose bases are washed by the sea hundreds of feet below, unite to make travelling outside of the capital, without a guide, rather a perilous undertaking.

Between the two snowy chains which traverse the country from south-west to north-east, lies the "desert of Iceland." It is a lonely and desolate region, torn by earthquakes, overwhelmed by lava streams, as far as known consisting mainly of tracts of volcanic sand, destitute of water, and without vegetation.

"This desert, an elevated plateau, extending across the island, and about one hundred miles from south to north, is rarely visited by travellers, and by the natives only in the summer, when the women form their tent villages on its borders, while they gather the Iceland moss. There must, however, be fertile districts in it, and the reports well authenticated of herds of reindeer issuing from it, and of wild-looking men having horses shod with

horn, prove that it is not entirely unsuited for human habitation.

Reindeer were introduced from Norway about 1770; there are considerable herds of the animal, especially in the mountain deserts of the northeast; they feed upon the moss, and are pursued with difficulty as there is no food for horses in their haunts; they are hunted for their flesh, skin and horns; they are not domesticated, as the country is too rough for their use in sledges. Yet with all its dreariness and cold, and barrenness and poverty, and isolation, the people are extremely fond of their country, and say that 'Iceland is the fairest land that the sun shines upon.' Of them it may be said with Goldsmith:

'The shudd'ring tenant of the frigid zone
Bodily proclaims that happiest spot his own;
Extols the treasures of his stormy seas,
And his long nights of revelry and ease.'

Running up from these fiords are numerous rivers, generally short, furious, and cold, the result of the melting of the glaciers; none more than one hundred miles long, they are not navigable for any great continuous extent, and oppose formidable barriers to the traveller in whatever direction he may go; twenty to thirty of these, with their tributaries, he will find in the course of the day, shallow, cold, and clear; bridges there are none, and very few boats, so that difficulty and danger, both to horse and rider, attend their crossing, whether by fording or swimming; we encountered none reaching above the horse's belly. From the broken nature of the country, they form several fine waterfalls, one of the prettiest of which is made by the river Oxera falling over the precipices in the crater-like depressions at Thingvall, where the principal ceremonies of the millennial celebration took place. This fall is about eighty feet high, and visible for many miles, its snowy whiteness being remarkably contrasted against the black lava rocks over which it flows. * * * Another beautiful fall is the Skogafoss, two hundred feet high, on the south coast, about eighty miles from the capital.

The lakes of Iceland, from the broken nature of the country, are few; all are situated in the midst of the most desolate scenery, and their sides and bottoms are rough with the lava blocks from the surrounding volcanoes. The largest is Thingvall lake, along which we journeyed for many hours, and near which was formerly held the meetings of the Althing during the independent age of the island. This lake is clear, cold, very deep, abounding in fish, and visited by innumerable waterfowl; it is about twelve miles long and five wide, receives the river Oxera, and it is said, communicates with the sea. It is situated in a magnificent basin in the lava rocks, and the contrast between the black ruggedness of the rim and the clear green waters of its expanse, with the great many-hued hills in the distance casting their shadows, and the fleecy clouds mirrored in its surface, make a scene of singular weird-like beauty."

Dr. Kneeland observes that the northern coast of Iceland, which he and his party could not reach on account of the ice in the north-west, though a little colder, is really the most desirable part of the island for human residence. The soil is deeper, the vegetation more luxuriant and reaching farther up the mountains, which are freer from snow than in the south and west of the island. The

fiords are also, it is stated, more accessible and better stocked with fish. Husavik is described as a considerable trading town, a where Gardar landed, and passed a winter 864, ten years before the permanent settlement on the west coast, whose thousand anniversary was celebrated in 1874.

Selected for "The Friend."

A Twofold Danger.

About a year before George Fox's decease he speaks of having a concern upon his spirit with respect to a twofold danger that attends some who professed the truth.

"One," he says, "was of young people running into the fashions of the world; or the other was of old people's going into earth," under the pressure of which exercise he wrote an epistle, which he addressed "To all that profess the truth of God.

"My desires," he says, "are, that you walk humbly in it: for when the Lord called me forth, he let me see that young people grew together in vanity, and the fashions of the world, and old people went downwards into the earth, raking it together. And now, Friends, I see too many young people that profess the truth, grow up into the fashions of the world, and too many parents indulge them. And amongst the elder, some are declining downwards, and raking after the earth. Therefore take heed that you are not making your graves while you are alive outwardly, and loading yourselves with thick clay." (Hall ii. 6.) For, if you have not power over your earthly spirit, and that which leadeth into vanity mind, and the fashions of the world, and into the earth; though you have often had the rain fall upon your fields, you will but bring forth thistles, briars, and thorns, which are for the fire," &c.

Correcting Faults.

In the education of youth, it is not the wisest plan continually to bring faults to light, discussing and reprehending them. The will be far more easily checked by cherishing the antagonistic virtues. If habits of truthfulness, integrity, purity and industry are carefully cultivated by the parent, there will be but little need of holding up for reprehension sins like lying, theft and profanity. The mind soon learns to tolerate what it dwells upon, and vice often presented, even for condemnation, grows at length familiar, and loses its most revolting features. Certainly offences must be dealt with, and by no means ignored or slurred over. When they occur their true character and effects must be disclosed without either extenuation or exaggeration, and the offender led to see that he has forfeited the respect and regard of the innocent and virtuous. But such experiences though not to be shunned when they come cannot be relied upon as the chief antidote to wrong doing. The daily cultivation of positive good is the very best means of averting evil.

Not only in the family and school, but in all the other scenes of life, does this truth hold good. To cultivate habits of industry and independence will do far more towards reforming the idle and improvident than to bear censure upon them, however much it may be merited. To instil a sense of justice and integrity, is a much greater safeguard against dishonesty than the firmest locks and bars. To inspire the heart with ambition for

orthy objects, and to infuse the desire for improvement, are better correctives of abusing amusements and vicious company than all the homilies that could be pronounced against them. The earnest promulgation of the solid truth is worth more than the violent denunciation of twenty errors. The employer who, instead of finding fault, scolding, and wakening in those who serve him feelings of resentment and ill-temper, encourages and stimulates them by kind notice and liberal praise when merited, is training them to habits of fidelity and industry that no stern rebukes and harsh severity could ever induce. There is cheerfulness attending this positive method of doing good that is specially attractive and inspiring. Fear, rebuke and condemnation are depressing in their influence, while hope, encouragement and sympathy excite the faculties to renewed exertion, and animate the heart to noble endeavors. It is true that it requires patience, watchfulness, self-control, rethought, and, above all, faith in human nature. It is far easier to censure the wrong than to cultivate the right. To do the latter needs a hopeful, earnest, cheerful spirit, not easily depressed or daunted, and able to infuse its own nature into the hearts of others. It needs a charity that makes allowance for faults and shortcomings, an untrusting energy that will never yield to despair, a love that will melt all coldness. The results will more than reward the truly benevolent heart in the final goal accomplished. The impetus thus given to moral energy will never spend itself; the fire of worthy ambition thus aroused and quickened will never be extinguished; the positive virtues thus established will never be overthrown.—*Philada. Ledger.*

For "The Friend."

Climbing the Mountain.

In company with a friend, I had been climbing the steep roads, and winding among the ravines of the mountains which border the great plains of the West, and gradually increase in height till they culminate in the snowy range of the Rocky Mountains, some of whose peaks are over 14,000 feet above the ocean level. Our pedestrian excursion had probably impressed us with a sense of the exertion necessary to reach any considerable elevation. We had gone about eight miles, and ascended perhaps 2000 feet; when we came to a point commanding a widely extended view of the plains, bounded only by the horizon some sixty miles distant. Between this apparently unlimited expanse and ourselves, lay the hills p which we had so laboriously struggled. In comparison with the grand total of the landscape spread before us, they seemed to wind into insignificance; and my companion made a passing remark to that effect. It was sufficient, however, to suggest a train of reflection on the resemblance of our traveling experience to that which awaits us in our journey through life.

That which is immediately present to us necessarily claims a large share of our thoughts and efforts, and is liable to assume an undue importance in our eyes. We are keenly sensitive to the hardships, labors and trials we are passing through; and though reason may tell us they are only the common lot of mortals, shared in by the great bulk of the human family; yet this does not prevent them from greatly absorbing our attention. Indeed, we often feel, even if we do not make the asser-

tion, or fully admit it to ourselves, that our lot is peculiarly hard.

As time rolls on; and advancing years, and the wisdom gained by experience increase our capacity for calm and thoughtful judgment; we are sometimes led to look back over the path we have travelled, and to trace the footsteps by which we have reached the point where we now stand. The difficulties we have encountered, when thus viewed, shrink into comparative littleness. As our thoughts turn to the boundless realms of eternity, all else seems of little importance, except as it has a bearing on our progress towards that blissful state, where "the weary are at rest."

Then be not dismayed, tho' who art sincerely desirous to walk in the footsteps of the flock of Christ's companions, at any difficulty or trial that may be met. If thou faithfully journey on in the road towards Zion, the time will come; when, looking back, all these things will seem to thee as light as vanity compared with the eternal weight of glory which awaits thee. W.

Harmonic Telegraphy.—The following account of the principles on which this remarkable improvement in transmitting telegraphic messages is based is taken from the *Milwaukee Sentinel*.

To assist in comprehending what this principle is, it may be well to state a few fundamental truths of the science of sound. Sound consists of certain waves which are passed along in the air, and which are called "aerial vibrations." The rate of vibration establishes the character of the sound, or its "pitch." Suppose a steel rod to be set in motion at the rate, say, of 175 vibrations to the second. It will give forth a low, bass tone. Increase the rate steadily, and the sound will go up the scale from one note to another. Every object has its key-note. If the reader will wet his finger and then rub it along the edge of a tumbler, the glass will give out a certain musical note. Let him then take a plate and play the scale. When he sounds the other notes, the glass will be dumb, but when he sounds the particular note which the glass emitted, supposing the sound to be loud enough, the glass will respond with the same note. So every object has a note to which it is faithful, rejecting all others, and responding to it alone. This fact is the basis of Gray's system of harmonic telegraphy.

First as to the transmitter. A steel bar is filed down to a certain pitch, that is, to a certain number of vibrations per second, like a tuning fork. This is placed between two electric magnets, like those used in ordinary telegraph instruments. One of these is stronger than the other. Of course the stronger magnet will attract the steel bar, and would retain it in a stationary condition, but for a contrivance to prevent that result. This consists of a spring on either side of the steel bar. When the bar touches the coil, the spring touches a wire, which shuts off the current, and the attraction of the coil for the bar instantly ceases. The bar then flies to the other magnet, where the process is repeated, and so it continues to vibrate between the two, the rate of vibration being uniformly that to which it is "tuned." This instrument is operated on by a small local battery. There is also a main battery of, say, fifty cells. This battery sends a constant current over the line to the receiving office without producing any other effect than

that which is produced by a current passing through a circuit in the Morse system. But if the battery is connected with the vibrator, the current is cut up into pulsations of the steel bar, and in that form reaches the receiving office. For this purpose an ordinary Morse key is used. When the key is closed, the main line is connected with the vibrator, and the vibrations are sent over the wire. When the key is opened, the vibrator has no effect upon the current that is passing over the main line. The effect at the receiving office is this: When the key is closed, the receiving bar vibrates at the same rate as the sending bar, and emits a corresponding tone. When the key is open the pulsations are not communicated, and the receiving bar is silent. It will be easily seen how the manipulation of the Morse key at the sending office can be made to produce the effect of dots and dashes at the receiving office.

In one experiment there were eight of these instruments, each having its own battery, but all connected with one wire. Over this wire the vibrations of all these eight transmitters were sent at once in a promiscuous jumble. The question will immediately suggest itself, how was the confusion of sounds interpreted? How were the eight messages separated each from the others at the other end of the wire? The answer to this is found in the principle of the science of sound which was stated at the beginning of this article. Each of the bars in the transmitting instruments is tuned to a separate tone, or rate of vibration. So on each of the receiving instruments there is a bar tuned to correspond with one of the bars at the other end. Each of these bars is placed on a sounding box, which is also tuned to correspond with it, the object being to increase the sound, so as to make it intelligible to the receiving operator. As the jargon of sounds or pulsations passes over the wire, each receiver picks out and repeats the tone to which it is tuned, and is silent as to the others. Thus the sound is sifted and distributed. It is as if eight persons were talking in a room. To one person standing in the middle and listening to all, the noise would be quite unintelligible, but if each of the talkers addressed himself to a single listener, the latter might be able to understand.

Selected.

The importance of daily learning the lesson of dwelling in our own hearts with Christ, the seed, that we may be taught of Him, who declared Himself to be meek and lowly of heart, was brought before me, and opened to the meeting. It is only while we are thus kept with Him, that we can sympathize with others, and travail with the Seed for his arising into dominion; and being made sensible of our own frailties, and the meekness and gentleness of Christ abounding in us, the rough Esau nature will be more and more subdued, and the peace of God which is substantial happiness, will be enjoyed in ourselves, and with those of like experience in whose society we mingle. We shall be in a state to receive warning of any temptation that awaits us, and immediately to put up our prayers for preservation, looking to the blessed Saviour for his aid; and He will deliver us. What harmony and sweet enjoyment prevail among the people, who are brought into such a case! —*Journal of William Evans.*

Canine Sagacity.

The following well-known story is a strong example of the great intelligence which may be developed in a dog by careful training:

A fashionably-dressed English gentleman was one day crossing one of the bridges over the Seine at Paris, when he felt something knock against his legs, and, looking down, he found that a small poodle-dog had rubbed against him, and covered his boots with mud. He was, of course, much annoyed, but when he got to the other side of the bridge, he had the boots cleaned at a stand for the purpose, and thought no more about the matter.

Some days after this occurrence, however, he had occasion again to cross that bridge, and the same little incident occurred. Thinking this somewhat odd, he resolved to watch where the little dog went to; and, leaning against the side of the bridge, he followed with his eye the movements of his dirty little friend. He saw him rub against the feet of one gentleman after another, till he had exhausted all the mud off his once white skin, then rush off down the bank of the river, and there roll himself in the mud collected at the side. Having thus got a new supply of dirt, the little animal ran up to the bridge again, and proceeded to transfer it to the boots of the passers-by, as before.

Having watched his movements for some time, the gentleman noticed that on one occasion, instead of running down to the river, he went off to the proprietor of the stand for cleaning boots, at the other end of the bridge, who received him very cordially. The truth then for the first time dawned on him, that the little animal belonged to the man who cleaned the boots, and was trained by him to perform these mischievous deeds for the purpose of bringing in custom.

Being very fond of dogs, the Englishman resolved to purchase this clever little fellow, and bring him back to England with him. When, however, he went to the dog's master, that person at first denied any connection with him, and only admitted the ownership when he was perfectly satisfied that his interrogator had no connection with the police.

For some time also he refused to part with the little poodle, saying that no money could pay him for the loss of his dog, who really made his living for him. Tempted, however, by a very high price, he at last consented to sell the dog, and the gentleman, a few days afterward, brought him over to England, travelling via Boulogne to Folkstone. His residence in England was some thirty or forty miles from Folkstone, and to this place he brought his little purchase. He had not been many days in his new home, however, when the little French poodle suddenly disappeared. Search was made for him every where, but to no effect. His new master offered a reward for him, but with the same result, and he had at last made up his mind that the little fellow had been either poisoned or stolen, when one morning, about six weeks after his mysterious disappearance, the gentleman received a letter from a friend in Paris telling him that his dog was back again there, and at his old trade of soiling boots in the interest of his former master.

The little fellow, not liking the dullness of a country life, had resolved to return to his former home, and had made his way to Folkstone; there, as the gentleman afterward ascertained, he had got on board a steamer

going to Boulogne, and from Boulogne had found his way back to Paris.—*Chambers' Journal.*

HYMN.

Selected.

Leave God to order all thy ways,
And hope in Him, whate'er betide;
Thou'lt find him in the evil days
An all-sufficient strength and guide.
Who trusts in God's unchanging love,
Builds on the rock that naught can move.

What can these anxious cares avail—
These never-ceasing moans and sighs?
What can it help us to bewail
Each painful moment as it flies?
Our cross and trials do but press
The heavier for our bitterness.

Only thy restless heart keep still,
And wait in cheerful hope, content
To take whate'er his gracious will,
His all-discerning love hath sent;
Nor doubt our inmost wants are known
To Him who chose us for his own.

He knows when joyful hours are best;
He sends them as he sees it meet;
When thou hast borne thy fiery test,
And now art freed from all deceit,
He comes to thee all unaware,
And makes thee own his loving care.

Nor, in the heat of pain and strife,
Think God hath cast thee off unheard;
Nor that the man whose prosperous life
Thou enviest is of him preferred;
Time passes, and much change doth bring,
And sets a bound to every thing.

All are alike before his face:
'Tis easy to our God most high
To make the rich man poor and base,
To give the poor man wealth and joy.
True winners still of him are wrought,
Who setleth up and brings to naught.

Sing, pray, and swear not by his ways,
But do thine own part faithfully;
Trust his rich promises of grace,
So shall it be fulfilled to thee:
God never yet forsook at need
The soul that trusted him indeed.

—Geo. Newmark.

Attar of Rose in Turkey.—I was always under the impression that the attar of rose was made in large quantities in Persia, as well as in Turkey, for I remember purchasing it in Bushire, many years ago, under the idea that it was a product of that country; but my host informed me that I was mistaken, and that the district south of Balkan was the only part of the world where it has yet been produced. The whole house was redolent with the scent of rose; but although the aroma is very penetrative in consequence of the subtle character of the essential oil, it is not at all overpowering, even when the nose is applied to an unstoppered bottle of the fluid. My host opened a cupboard which contained 30 large glass bottles of the attar, and told me that I was looking at £12,000 worth of oil! The flowers which produce it have the appearance of our common dog-rose, and are of the varieties known as *Rosa Damascena*, *R. Semper-virens*, and *R. Moschata*. The last-named affords the chief ingredient of the attar. The natives themselves know very little about the varieties, and are only concerned with the profits they can make out of the oil. The plant is cultivated by the farmers in every village of the district, and requires a sandy soil on sloping ground, exposed to the rays of the sun. The greatest care is bestowed upon its cultivation and the harvesting of the crop. Laying down a rose garden may be done in

either spring or autumn, upon ground which has been well cleaned and plowed. Very severe cold will kill the plants, and those of the whole district were destroyed in this way in the year 1870. Hoar-frost, foggy and misty weather, are also injurious to the crops, and a hot temperature during the process of cultivation interferes with the yield of oil; but the best commences in May, and lasts for about 20 days. The farmer counts the buds on his plants, and calculates the number which will probably blossom daily, which he makes a divisor for the whole, and thus gets at the number of days his harvest will last. The flowers should be gathered before the morning dew is off them, and then immediately distilled. Herein lies the difficulty, because it is impossible to judge, even approximately of the rapidity with which all the buds will blossom; consequently, unless a very large staff is kept, so as to pick all the blossoms a heavy crop in the short space of time that is available, and unless a large number of alembics are ready to distil them, a great portion of the crop, if there is a rapid blossoming, may be wasted. The yield of attar varies greatly, but on an average it takes 4,000 pounds of rose-blossoms to make one pound of oil. The best quality of attar varies in price from 17 to 18 piastres the miscal, 15s. 4d. to 16s. 10d. per ounce; while inferior qualities realize from 14 to 15 piastres the miscal. Manufacturers frequently adulterate the attar with a fluid which they produce from certain kinds of grasses. An English acre produces from 4,000 pounds to 6,000 pounds of blossoms in fair years, and 3 pounds of blossoms produce about 1½ drachem of oil, which, on an average, may be said to be worth in the wholesale market about shillings.—*Baker's Turkey.*

The Life of a Million.—The Registrar-General has published a very interesting supplement to the thirty-fifth annual report, in which he estimates the march of an English generation through life. He starts with the assumption that 1,000,000 children are born, and of these that 511,745 would be boys, and 488,255 would be girls. 141,387 of the boys and 121,795 of the girls will probably die before they are five years old. The million is thus reduced to 736,818. The next five years their deaths are few, and they are fewest of all in the third five years, that is between the ages ten and fifteen. This full growth of childhood seems to be the healthiest period in the whole life of a generation, but somewhat more so for boys than for girls. Then follow five years of somewhat more liability to disease and death. This liability is still further increased in the next five years by consumption and other ailments incident to the period when growth has ceased. But in this whole twenty years, through childhood and youth, the million loses but 102,773 of its number, and an army of young men and women in almost equal proportions, and 634,045 in total strength crosses the dividing line of the first quarter of a century. About 62,952 die between twenty-five and thirty-five; the number is increased to 66,078 between thirty-five and forty-five; but between forty-five and fifty-five the number of deaths rises to 81,800; and from fifty-five to sixty-five 112,086 will have passed away. The number who set out over the next reach of ten years is 309,029. Of these only 161,124 reach their seventy-fifth year. This

ment rapidly diminishes, and at eighty-five only 38,565 remain. Another ten years and here are on the field only 2,153 people of enervable age, of whom nearly nine out of ten will pass away without reaching the centurion's fame. The number which will probably cross the threshold of a second century is 23, but none of these reach 119; for the last of the million will probably come to his grave in his 108th year.—*London Paper.*

For "The Friend"

Philip and Rachel Price.

"Honor thy father and thy mother."

In the years 1800 and 1801, John Hall, an English minister, was a frequent inmate in the family of P. and R. Price, and his cheerful temper and pleasant humor made his company as acceptable to the children, as were his religious experience and instructive conversation grateful to their parents. At considerable sacrifice in leaving a young and numerous family, P. Price accompanied him in his visits to the meetings of Friends in the eastern part of Pennsylvania, as far as Muncy, Adawissa, &c., into the State of Delaware, and part of New Jersey. These occasions of absence are spoken of as seasons of trial, but the end rewarded with the feeling of peace resulting from the discharge of apprehended duty. He writes, "I do not know that I ever left home with my mind under more embarrassments, but have since been favored to get into a more quiet and resigned state of mind, and I believe I never experienced a time wherein I felt a greater necessity of putting my trust in that Power which is able to carry us through every trying dispensation we may meet with." "Dear John has been much favored, being more enlarged than I have known him at any time before. The number of Friends (in Delaware) is generally small at each meeting, but many other people attend, to whom the call seems much to be extended." From New York, 4th mo. 15, 1802, John Hall wrote, "I expect by this time you had heard of my coming to this place under a prospect of embarking for my native land, and can now inform thee, that through humble attention to the pointings of the great Shepherd of Israel, I have been favored to see the right time to leave this country; I think in as clear a point of view as I did to come here, which I esteem a great favor, among many others I have been made a partaker of. Though my trials have been many, and in depths often, yet I have no cause to complain, but in humility of heart set up my Ebenezer, and say, Hitherto the Lord hath helped me. It felt solemn to my mind in parting with thee and thy beloved wife, to whom I have felt my mind nearly united in the dear bonds of gospel fellowship, and though we are parted one from another, yet are often present in spirit and in epistles written on the fleshy tablets of the heart, by the blessed lead of the Church. As He and His Father are one, even so we are one in the Covenant of Life, being made partakers of the same spiritual bread. My leaving the city (of Philadelphia) was a solemn time to me, and I received in being favored with so many united and concurring testimonies from my dear friends in that place, that I left them in the light time; and their prayers for my preservation were as marrow to my bones. There is a precious remnant in your parts to whom I feel my mind nearly united: May the Lord

preserve them as in the hollow of His holy hand."

In the retrospect of his American travels and service, John Hall wrote from "Broughton, 11th mo. 16, 1803—Beloved friend (Philip Price)—Although about eighteen months have passed over since I conversed with thee through the medium of my pen, yet I can assure thee that my love and affectionate regard for thee, thy dear Rachel, and beloved children, is not the least abated or worn out; for I can tell thee that by my fireside, and when in my bed, my mind frequently takes its flight over the great Atlantic Ocean, to visit many of my dear Friends; and thy habitation often has a large share. I often call to mind the many pleasant days and nights I spent with you and your beloved children. It was truly a place of rest to the sole of my foot, because I found the Son of Peace to be there. May you, my dear friends, be so far preserved as still to be in the abodes of peace. This will make amends for all. I believe you have your trials and exercises, as well as others for the Truth's sake, and happy are they who continue with the Master in his afflictions. I believe the same promise that was formerly made to his disciples will be your reward,—'ye are they who have continued with me in my tribulations, and I appoint unto you a kingdom.'

For "The Friend,"

Across Africa."

"Across Africa," is the title of a book recently issued from the press of Harper Bros., New York. Its author, Verney Lovett Cameron, an officer of the British navy, is believed to be the first European who has succeeded in crossing the continent of Africa. This was recently performed by a journey to the west, from Bagamoyo, on the Zanzibar coast, through the southern, central portion of the continent, till he reached the great Lake of Tanganyika. Thence his course was north-westerly to a large river near the centre of this part of Africa, which he believed to be the same as the Congo, emptying into the Atlantic a thousand miles further west. Leaving this river he proceeded in a general south-westerly direction reaching the Atlantic coast at Benguela. The distance travelled was about 2500 miles, through an almost unknown region, inhabited by savages and wild beasts. The forests, jungles, and almost impassable swamps met with on the route, were often of a character to appal this stout-hearted explorer. He was several times attacked by a fever accompanied with a new and strange delirium, but through these difficulties our author successfully struggled for a period of three years and five months. He was accompanied at the beginning of the expedition by Dr. Dillon, Lieut. Murphy and Robert Moffat, the latter a nephew of Dr. Livingstone. Dr. Dillon and Robert Moffat both died of the fever, and Lieut. Murphy returned to the east coast upon the receipt of information that the remains of Dr. Livingstone had been obtained, leaving V. L. Cameron to pursue the journey alone.

The primary object of the expedition was to search for and relieve Dr. Livingstone, but it was also intended that it should take a part in the suppression of the inhuman traffic in slaves, the cruelties and atrocities of which the author found many opportunities of witnessing, and which he became convinced could

be effectually attacked at its source in the interior of Africa only, believing that all attempts at its suppression on the coast would be futile.

It is proposed to lay before the readers of "The Friend," some extracts from his narrative, showing the peculiarities of this country and its inhabitants, and the desolation and destruction caused by the slave trade which is largely carried on between the different tribes of the natives.

After many vexatious delays in getting his caravan together at Kikoka, a small village a few miles from the coast, he started on his journey on the 28th of 31 mo. 1873. He remarks: "For two hours and a half we marched across a lovely country of rolling grass-land interspersed with belts of timber, and every here and there small knolls crowned with clumps of trees and shrubs. Away on our right lay the chain of small hills where Rosako and its neighboring robber villages were situated, along the route which Stanley followed on his journey for the relief of Dr. Livingstone.

"We camped on the top of a small knoll, the huts of the men being so arranged as to form a fence, while in the centre the tents were pitched and a large hut erected for stores and guard-room. Before sunset the donkeys were picketed inside the boma, and the entrance closed as a defense both against wild beasts and robbers.

"The men divided themselves into small kambis or messes, numbering from three to seven each, for the purposes of cooking and building their huts.

"Each kambi selects one man for duty as cook, while the remainder busy themselves in building, and by this subdivision of labor a camp is formed in a wonderfully short space of time wherever grass and suitable wood are plentiful.

"One man cuts the ridge-pole and undertakes the general superintendence, while others prepare forked uprights and small sticks for rafters, provide bark to bind the structure together, and grass for thatch and bedding. Every bit of grass is carefully rooted out from the inside to prevent the stubs injuring the mats. A thick layer of cut grass is also spread on the ground to form a sort of mattress and on this mats are laid. Some of the more luxurious build small kitandas, or bed places, to raise them above the damp ground."

After proceeding about 50 miles inland he remarks: "I was much astonished at the total absence of cattle, as we noticed no tsetsé (the African fly), and the country seemed admirably adapted for grazing, being well watered, and provided with trees to afford shade during the heat of the day. Every plot under cultivation had in it a miniature hut, under which offerings were placed to propitiate the evil spirits lest they should injure the growing crops. Several graves of chiefs, bestrewed with broken earthenware, were pointed out to me. They also had huts erected over them, with a small tree, usually of the cactus species, serving the purpose of a centre-post."

"On this march we first met with baobabs trees, which may be termed the elephants or hippopotami of the vegetable kingdom; their smallest twigs being two or three inches in circumference, and their forms of the most grotesque ugliness. This is, however, toned down by their beautiful white flowers and the

tender green of their foliage." "Frequent under-crops of sandstone and quartz were noticeable, and crystalline pebbles were plentiful, and the soil which was in some places of a reddish hue, was at other points a pure white silvery sand, both being covered with a considerable layer of vegetable mold. Many beautiful flowers gladdened our eyes on the march, among which were tiger lilies, convolvuli, primulas of a deep yellow, and another having somewhat the appearance of a foxglove opened back."

After traversing a considerable extent of rough country, about 80 miles from the sea, he describes the scenery as so delightful that they scarcely thought of fatigue. He says: "All the hills were exceedingly rocky, being composed mostly of granite, but in some instances of nearly pure quartz, but they were thickly clothed with trees wherever the inequalities of the surface allowed sufficient soil to accumulate. The greater number of the trees being acacias in full bloom, their red, white, and yellow blossoms, and those of other flowering trees stood out in masses of gorgeous color.

(To be continued.)

For "The Friend"

"A History of the United States of America, &c., by Josiah W. Leeds." Phila., 1877.

A notice of the merits of this work has already appeared in the columns of "The Friend;" but it has been thought that some extracts showing more fully its general scope and the manner in which important subjects have been treated, would be acceptable to some of the readers of this journal. In the preface the author thus alludes to the motives which led to its preparation.

"The writer of the following pages recalls the fact that when he was a grammar-school student in the 'City of Brotherly Love,' it was the practice of the pupils in the upper most class, in lieu of other regular exercises, to rehearse the wars of their country. For this purpose each boy was furnished by the principal with a memorandum book, and required to transcribe briefly the battles of the Revolution, and of the War of 1812. The review of these notes occurred so frequently, that, while we became very proficient concerning the battles fought by our forefathers, we remained extremely ignorant as to matters relative to the Indians (save that they were barbarous savages), the slaves, and other items of intrinsic interest bearing upon our country's welfare.

"This persistent indoctrination of warlike ideas resulted in producing an intensely partisan feeling, so that the very name of 'British,' or 'Mexican,' became a hateful sound to our patriotic apprehensions. Indeed, our principal concern appeared to be, to learn how much greater was the battle-loss in killed and wounded on the part of the British, than was that of the Americans. It is not using too forcible an expression to say, that there was begotten in our youthful minds something of the malignant sentiment of murderers.

"The moral loss occasioned by a state of warfare, together with its exceeding expensiveness, we had no conception of. To supply, in a measure, this lack of information, and to promote the knowledge of those things in the past and present history of our country which tend to its peace, prosperity and true renewal, are the purposes of this work. The rule of

political action recommended, may be concisely expressed by that vigorous Anglo-Saxon word—STRAIGHTFORWARDNESS."

We take the following in reference to the development of slavery.

"Somewhat has been said, in the preceding chapters, of the traffic in negro slaves, as carried on by the Spanish and Portuguese. It was in the summer of 1619, while Yeardley was governor, that the curse of slavery was fastened upon the 'Old Dominion,' and it was in a Dutch man-of-war that the first installment of twenty negroes was brought, and landed at Jamestown, to be sold to the planters. For many years it was almost entirely the Dutch, who were concerned in bringing them to the Virginia market. Nevertheless, their introduction was not by any means rapid, for at the end of thirty years after the first importation, the proportion of negroes to whites in the colony, was but one in fifty."

"Among the nations called Christian, of a few centuries ago, there was a strange discrimination entertained as to what was fair and what was really wrong in the infliction of a state of servitude. For instance, the strangers and the heathens of old time were mentioned as having been made slaves of by the Israelites, a course sanctioned by the law of Moses; and thus it was agreed that when Christians came in contact with such 'heathens and strangers' as the negroes, the Moors, and the Indians, the proper course to take with them was to place them in a condition of bondage."

"The fact of the Africans being heathen, had been esteemed a sufficient reason why they should be held as slaves; but when, during Berkeley's administration (1607), the question was raised in the assembly of Virginia, as to whether those negroes who had become Christians could any longer be held to servitude, a law was promptly enacted that their freedom was not to be secured by any change of religion. It was also declared that if slaves be killed by extreme correction, the act should not be rated as a great crime."

"The first complete slave law for South Carolina was enacted in 1712, there being at that time about 6090 whites and 10,000 negroes in the province. It set forth that as the plantations and estates of the province could not be properly managed and tilled without the labor of negroes and other slaves, and as these latter were a wild and barbarous people, not qualified to be governed by the same laws and practices as the whites, therefore, in order for the good regulation of the province and the security of its inhabitants, it was enacted that all negroes, Indians and mulattoes, who could not prove that they were freemen, be made and declared slaves.

"It was also ordered by this code that any person finding a slave abroad without a pass, must chastise him, or else be liable to a penalty for the omission. All crimes committed by a slave, from thievery to murder, were punishable by death, but a lesser punishment could be substituted. If the owner of a runaway slave neglected to whip, cut off the ear, or brand the culprit with a hot iron, then the owner was to forfeit his claim to the slave. The leader of a company which captured a runaway, received several pounds compensation; and if any person whilst engaged in such service should be wounded or disabled, the public had to pay the damages. If a slave was to die while being punished, no penalty was to be inflicted, unless bloody-mindedness

could be proved; then the murderer incurred a forfeit of fifty pounds."

Among the subjects which are frequently passed over with but little remark by historians, are the numerous instances in which the occurrence of wars with the Indians has resulted from the unprovoked aggressions of the whites; the happy results which have followed the treatment of the Indians with common honesty and fairness; and the lasting impressions for good which have flowed from the exercise towards them of the Christian virtues. We are glad to see that in this work bearing on these points have been brought to light, and the lessons which they teach clearly presented for the consideration of the reader.

In reference to the character and labors of David Zeisberger among the Delawares, the author remarks.

"For his success at the battle of La George, the Indian agent Johnson received the honor of knighthood; whilst among the French, the name of the Marquis of Montcalm was heralded with many plaudits. Nevertheless, it is said of men, 'Ye shall know them by their fruits'; and again, 'A good tree cannot bring forth evil fruit.' Whether the work of the French and the English leaders in stimulating the worst passions of the Indians, was work for a Christian to do, or for Christian people to applaud, the reader can determine for himself. He beholds the evil fruit—revenge and rapine, the devouring flames, and the hideous deeds of slaughter—and must readily decide whether such things as these have any part in the religion of the Christian, and whether glory such as this is of a so acceptable in the sight of God.

"Now while Johnson and Montcalm were thus teaching the red men lessons of life a death such as Christ and his Apostles never taught, a greater hero than English knight or French marquis, was laboring zealously, patiently, lovingly, in the path of Eliot a Brainard, striving to instruct the Indians a far more excellent way. The name of the worthy was David Zeisberger, a Moravian.

The massacre of the "Moravian" Indians in Eastern Ohio in 1782, is thus commented on.

"The Indians, to the number of nine being now at the mercy of the Americans, they were readily made prisoners, and council was held to decide upon their fate. It was promptly determined that they should be put to death; though some further debated as to whether it would be preferable to set fire to the two large houses in which the captives were kept, and burn them alive or whether to tomahawk and scalp them, that the militia might carry back with some trophies of the campaign. The latter plan had the preference. The Christians being informed of their doom, began to sing, a to pray, and to comfort one another. The night went by, and when the morning broke the militia selected two buildings which they called 'slaughter-houses,' in which they carried out their awful purpose: the men a boys were butchered in one—the women a babes in the other. There were in all 29 men, 27 women and 34 children, who thus perished at the massacre of Gnadenhütten, the 'Tents of Grace!' Which were Christ's soldiers? who were the conquerors? and with whom was the glory?"

The views of the writer in reference to w

thus expressed in treating some of the unsuccessful negotiations which preceded the outbreak of the Revolution.

"When, in 1764, Franklin, the philosopher and statesman, proceeded to England as the accredited agent of Pennsylvania—and shortly afterward as agent also for others of the colonies—he was destined to exert a marked influence upon the future of those portions of the dominions of Britain which he represented, being examined before the House of Commons, whose members desired a definite statement of the pending difficulties, the directness and freedom of his testimony were largely instrumental in procuring the repeal of the noxious Stamp Act.

"By addresses published in the papers of London, giving calm and lucid expositions of the effect of English legislation upon the commercial industries of the colonies, he endeavored to work a change in the tone of feeling toward America. He instanced the fact that if American merchants wished to obtain commodities direct from a Mediterranean port, these must be carried a long voyage out of the way, in order that the cargo might be first landed and re-shipped in London, and that a few favored merchants there might reap their commissions. And although iron was found everywhere in America, and nails and steel were greatly in demand, he showed how a very few manufacturers had obtained a act of parliament, totally prohibiting the erection of slitting-mills or steel-furnaces in the colonies. And in the same manner even hat-makers of England had prevailed to obtain an act in their favor; restraining the business in the colonies in order to oblige the Americans to send the beaver-skins to Britain, and buy back the made-up hats, increased in price with double charge of transportation.

"These, and many other cogent reasons why the laws of trade and of administration for the colonies, should be altered, were presented by Franklin to the notice of the public and the rulers of England during the ten years that he remained in that country. And when, in the autumn of 1774, news arrived of the assembling of an American Congress for the purpose of action, he was unwearied in his efforts, by private conversations, by published articles and by letters to states-men, to induce the Government to change its measures, giving it his belief that notwithstanding the attachment of the colonies to the mother country, it was a continuance in the same arbitrary course that alienate them entirely.

"Being urged by Dr. Fothergill and David Barclay, prominent members of the Society of Friends, in London, he prepared a careful statement of a plan of reconciliation. William Pitt (Lord Chatham) had himself prepared another and somewhat similar plan, and after several consultations with Franklin, it was submitted to parliament, but was by that body stily rejected. Yet Franklin's private interviews with the ministers of state and influential citizens did not cease; while Fothergill, Barclay and others, frankly condemning the injustice of their own countrymen, were remitting in endeavors to secure a compromise and avoid the effusion of blood. Nevertheless, their efforts proved unavailing; and Franklin, departing from England in the spring of 1775, arrived in America only to find that war had been actually begun.

"It is well worth while, at this momentous epoch in our country's history, for the student

calmly to ask himself: What more could America have done, to prevent war, than she did do? And, since England, without doubt, was clearly guilty of oppression, as well as of injudicious and unjust methods of government, were not the colonies justified in resisting their oppressors? Now, if we answer the latter question in accordance with the international practice of the last fifteen centuries, we may promptly say that the colonies were justified in making war to secure their political rights; but on the other hand, if we are to answer it according to the Gospel rule, as well as the Christian practice of the first three centuries of our era, we must as certainly say that our ancestors had no right to make war upon the plea that they were unjustly taxed and treated. For, the methods of protest and prayer, of appeal and patient endurance of wrong, still remained open, and such sort alone are the weapons which the Christian may use to battle against tyranny. 'The weapons of our warfare are not carnal, but mighty through God to the pulling down of strongholds.'

In concluding a sketch of the late civil war the writer observes.

"No more that a mere outline of the War of the Rebellion has been given. There were numerous cavalry raids, hundreds of battles and skirmishes, and many encounters upon the rivers and ocean, of which no mention can here be made. Neither has anything been said of the work of the Sanitary Commission; of the employment of colored soldiers in the army; of the conscription, and the disturbances in Northern cities in opposition to it; of the great riot in New York and the massacre of negroes; of the terrible privations and sufferings of the Union prisoners confined in the warehouses and prison-pens of the South, and, in a less degree, of the sufferings of Confederates at the North, together with a hundred other of the dire consequences of the war. A few statistics will merely be adduced for the purpose of comparison, that we may see whether the whole country would not have been a great gainer if it had adopted the plan of compensated emancipation, and extirpated the evil of slavery at a money price far greater even than the thousand million of dollars which it was proposed should be paid.

"The whole number of men enrolled in the Northern army was about 2,650,000. It is estimated that 300,000 men of each army perished in battle, or by disease in camps and hospitals; and that the number crippled, or permanently disabled by disease, amounted altogether to 400,000. This would make a total of 1,000,000 men as the actual loss to the country.

"The money cost of the war, to both sides, is estimated at \$6,000,000,000. In order to meet the yearly interest on the National Debt, which was increased from 60 millions in 1890, to 2600 millions in 1865, the people were taxed to an extent to which the taxation by the British crown, in the preceding century, bore no comparison. Stamps were required on deeds, leases, receipts, checks and many other documents, beside on a great variety of manufactured goods. A moiety of the debt incurred for, and the loss sustained by, the war, would have paid for all the slaves; would have provided all the illiterate whites and blacks of the South with the requisite facilities for obtaining an education; would have built half-a-dozen railways from the Atlantic to the

Pacific, and would have paid for the completion of as many water-ways connecting the streams of the Mississippi valley with those of the Atlantic slope and the Great Lakes. In brief, had wise and peaceful counsels prevailed, we might have been a really united people, and thus the fearful record of loss in men and money, in social and political morality, would not be now what we know too well that it is."

THE FRIEND.

SEVENTH MONTH 14, 1877.

"No man liveth to himself." This declaration of the Apostle is demonstrably true, whether applied to the righteous or to the wicked. We cannot so shut ourselves out from intercourse with our fellow beings, but that our influence either for good or for evil, will more or less affect some with whom we are brought into contact. The governing principle of our lives and conduct, cannot be altogether circumscribed within ourselves. Its power will be manifested by the fruit it brings forth in us, and the heaven of its influence will reach to others who may be brought where they behold or are obliged to feel the course of life produced. Consciously or unconsciously, therefore, we may be affecting the eternal interests of some of our fellow candidates for a happy eternity.

How strikingly do we sometimes see this exemplified in the family circle. Some one of a family that has been comparatively little restrained by the yoke which Christ lays upon the evil indulgence of the natural propensities—the lust of the flesh, the lust of the eye and the pride of life—overcome by the pleadings of Divine Grace, yields to the heavenly restraints, takes up the daily cross and follows Christ in the regeneration. Soon the influence of the life of righteousness is felt in some measure throughout the whole band. It may be that the others are not willing to make the sacrifices which they see have been called for to prove the sincerity of the covenant made between the soul of the one that has given up to love and serve the omnipotent Saviour, and which, or others similar, they feel they will have to make if they resign all conformity to the world, and become the self-denying disciple of a crucified Redeemer; but the humble, consistent life in their midst, is felt to be loud preaching, and however they may persist in gratifying their natural aversion to walking in the strait and narrow way that alone leadeth unto eternal blessedness, yet the power of the good example, testified to at times by the witness for God in the secret of their souls, has a restraining influence, and often predisposes to listen, as in the cool of the day, to the still small voice querying, Where art thou? Thus, in many instances, the faithfulness of one, has been a means, under the providence of Him who is ever watching over the workmanship of his hand for good, of stimulating others to bring glory to their Father who is in heaven, by entering and abiding in the highway of holiness.

On the other hand, where a family, whether from the force of education, and the preservative effect of proper association, or it may be from a sense in the individual members of the restraints of religion, has been kept, in some good measure, as "a garden enclosed," and a

well-grounded hope was entertained by those whose greatest joy it is to see the children "walking in the Truth," that the seed of the kingdom would there take root, grow up and bear much fruit, if one of the parents, or one of the children—though more especially the former—begin to show laxity or indifference in maintaining the restraining, crucifying principles and practices of the gospel, the power of God unto salvation, how soon does the example set give currency to compliance with the spirit of the world within the household, and, unless mercifully preserved by the powerful visitations of the Holy Spirit, how almost invariably do other members of the family—especially the poor children, who naturally look to their parents for direction and example—slide into the ways and maxims of the unregenerate, copy after the fashions, the follies and the amusements of the gay multitude that walk in the broad way, apparently forgetting that it leads to darkness and to death. It is true that each one is accountable to the Judge of quick and dead, and each one must work out his own soul's salvation with fear and trembling, but nevertheless, "No man liveth to himself," and the influence of our example imposes a fearful responsibility upon each one of us, and brings home the importance of the obligation, "Whether we eat or whether we drink or what-soever we do, do all to the glory of God."

SUMMARY OF EVENTS.

UNITED STATES.—The Life-saving Service fulfils the purpose expressed by its name, as is shown by the report of its operations last year. Out of 1253 lives imperilled by shipwreck only 29 were lost, and a very large proportion of property was also recovered. This does not represent all the work of our Government at the protection of travellers by sea from the dangers of our coast. The Signal Service, with its cautions to vessels not to leave port because of a coming storm, probably saves as many lives. The work in both services is well done, and it is gratifying to learn that the recent improvement in the apparatus for throwing a shot into wrecks is likely to make the Life Saving Service still more efficient.

The steamer *Florence*, Captain Tyson, of Polaris fame, commander, will sail from New London on the 20th inst., as the advance of the proposed polar-occurring scheme of Arctic exploration inaugurated by Captain Howgate. All the funds are in hand, and everything necessary to its success has been provided with great care by Captain Howgate.

A Washington despatch says the President will soon direct the issuing of orders to withdraw all the United States troops from the South except such as may be necessary for garrison duty. The troops so withdrawn will be either transferred to service in the West or be sent to the Rio Grande.

The credentials of General Mata, from Mexico, have been presented to the Cabinet for consideration. The Government is not inimical to the recognition of Diaz, and the question of the border troubles will not be affected, as the President and Secretary of State will entertain no respect for them.

The diplomatic difficulty between the United States and Venezuela has been amicably settled. The Venezuelan Government has formally withdrawn its note of 1st mo. 25th, which caused the departure of Minister Russell from Caracas, and such questions as remain will be discussed in a friendly manner.

One of the industries which has suffered most from the California drought has been bee culture. This has been carried on very successfully of late in the southern part of the State; but so complete has been the destruction of bee feeding plants that it is doubtful whether the business will pay again for a long time.

Mason, Ga., has an ice factory that manufactures 10,000 pounds of ice daily, at a cost to consumers of one cent per pound.

In accordance with a recent decision of the Supreme Court of the United States, the Government officers in charge of public work will make their contracts and have the work performed upon the ten-hour basis. All

employers who desire to make eight hours a day's work, will be paid for the eight hours only.

The State Department is informed that the steamer *Northcote*, constructed for the navigation of the Saskatchewan river, started from Cedar Lake, above the Grand Rapids, at its mouth, on the 4th of 5th mo., ascended the stream to Fort and some 100 miles returned to the mouth within thirty days. The success of the trip is considered as favorable to the development of trade in that section, and likely to be of benefit to the railroads of Northern Minnesota.

During the past week storms of unusual severity have visited many sections of the United States, causing great destruction of property and some loss of life. The village of Pensaukee and Couillardville, in Oconto county, Wis., were devastated by a tornado on First-day night. In Pensaukee, the Gardner Hotel, a school-house and twenty-eight dwellings were demolished; six persons were killed and ten injured. In Couillardville, seventeen houses and barns were damaged. The total loss on property is estimated at \$300,000.

An anticipated change of channel in the Missouri river, above Omaha, took place on First-day morning. Through the "cut-off," which is six hundred feet wide, a large volume of water was passing, and the levee on the Omaha side was in danger of being overtopped. At Abol, Massachusetts, situated on a hill 250 feet above the main village, geyse water last First-day afternoon, under the pressure of a volume of water which had just been emptied into it. The torrent rushed down to the village, half a mile distant, and into Beaver Brook, which it swelled. Several mill dams were carried away, the roads were badly washed out, and considerable damage was done to property along the stream. The reservoir was built by contract, and accepted by the town authorities on the 7th.

The debt statement for the Sixth month shows a decrease in the public debt for the month, of nearly three and one quarter million dollars, and for the fiscal year of \$2,483,124. This is over one million dollars more than the reduction made the preceding fiscal year, and fully six millions in excess of the amount required to pay the sinking fund. The coin balance, after deducting coin certificates, accrued debt and interest is \$17,183,403, of this amount \$2,968,102 is subsidiary silver coins, which, being deducted, leave the actual gold balance, against which the public debt is held, at \$14,215,301, which with the same period last year the gold balance shows an increase of about twelve millions of dollars. The currency balance is nearly sixteen millions, of which about one half is held for the redemption of fractional currency. The reduction in legal tenders for the month was \$1,818,248, and for the year more than ten millions. The reduction in fractional currency for the month was \$803,793, and for the year over fourteen millions. The amount of fractional currency reported by the Commission to have been lost—eight million dollars—has not been deducted from the amount outstanding, which is now reported to be less than twenty and one-half millions. During the year there has been made in the amount necessary to pay the annual interest on the public debt as a result of the funding operation, a reduction of \$1,943,625.

The aggregate revenue receipts for the fiscal year were \$271,325,677, which were made up as follows. From customs, \$130,439,419; internal revenue, \$118,438,278; miscellaneous, \$22,857,980.

Compared with last year, this shows a falling off in revenue of over \$16,000,000. The receipts from customs fell over \$17,500,000, and the internal revenue receipts increased about \$2,000,000. The ordinary expenditures were \$146,454,432, which is nearly \$12,000,000 less than the expenditures for the preceding year. Of these figures do not include interest on the public debt.

The number of deaths in Philadelphia for the week ending 7th mo. 7th, was 403, being less than for the preceding week, and 215 less than for the corresponding week of 1876. Of the 403, 238 were under five years of age.

On 26th, etc.—The following were the quotations on the 10th inst. Cotton, 12 1/2 cts. Flour, \$4 75 a \$9 25, the latter being for Minnesota choice. Bran, \$18 a \$19 per ton. Wheat, do and lower; Penna red, \$2 00; amber, \$2 10; white, \$2 15; new Delaware and Maryland, \$1 75 a \$1 85. Rye, 75 a 80 cts. Corn foreign, 75 a 85 cts. a 20 a 25 cts. a 25 cts. the latter for fancy. Cheese, 1 a 1 1/2 cts., the latter for N. York factory choice. Beef cattle, sales of 3500 head at from 3 1/4 cts. as to quality. Sheep, sales of 8900 head at from 31 a 51 cts. Lambs, 7 a 8 cts. Hogs, 3700 head, at from 61 to 71 cts.

FOREIGN.—It is mentioned as a notable fact that the

first translation of the Bible into the Russian vernacular, approved by the Czar as head of the Greek Church and by the Church itself, has been completed on within the present year.

Greece has 101 journals and periodical publication or one for each 114,334 inhabitants. The number of political journals is 82, of which 36 appear at Athens.

In the British House of Commons, recently, Stafford Northcote, Chancellor of the Exchequer, reply to a question, said the object in sending to Mediterranean fleet to Besika Bay was that it is a useful, and a convenient station. The position is well-stationed at the Suez Canal. The fleet at Besika Bay numbers seven iron-clads and one frigate.

The *Standard* prints the following: "Portugal having consented to act with England in suppressing the slave trade on the Mozambique coast, a British cruiser has been ordered thither. She will carry a Portuguese official, visit all the haunts of the slavers, and be empowered to search suspicious vessels, even when carrying the Portuguese flag."

Accounts from the Bombay famine districts are daily growing better. Rain is plentiful, and the sowing crops is beginning. The position in Madras is still very grave. Over a million persons are on the relief works or gratuitously fed.

Delegates bearing a protest from the late Government of the Transvaal Republic against British annexation had an interview lately with Lord Cairnryan, who informed them that it was impossible to reverse the effect of annexation, but he would hear any representation from them relative to the administration of the Province, with pleasure.

The French crops are reported to be good, especially in Central France; around Blois, the harvest promise to be better than for the last six years.

WESTWOWN BOARDING SCHOOL.

A well qualified teacher of the Latin and Greek languages, will be wanted at the opening of the next session, 10th mo. 29th. Apply to

Joseph Passmore, Goshenville, Chester Co., Pa.
John E. Carter, 624 South 24th St., Philadelphia.
or Wm. Evans, 252 South Front St.

WESTTOWN BOARDING SCHOOL.

A suitably qualified Friend is wanted as Governor at the opening of the next session.

Application may be made to
William Biddle, No. 220 S. Fourth St., Philadelphia.
Clarkson Sheppard, Greenwich, N. J.
Joseph Passmore, Goshenville, Penna.
Geo. J. Scattergood, 413 Spruce St., Philadelphia.

FRIENDS' ASYLUM FOR THE INSANE.

Near Frankford, (Twenty-third Ward,) Philadelphia.

Physician and Superintendent—JUSTUS H. WOODBURY, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board Managers.

DIED, on the 20th of 5th mo. 1877, ESTHER, wife Eliza Brackin, at their residence, Concord, Bismarck county, Ohio, in the 74th year of her age, a member of the Central Particular and Short Creek Monthly Meetings. This dear Friend was firmly attached to the doctrine and testimonies of our religions Society as held by its Friends. For several years she suffered much bodily affliction, yet whenever of ability to do so, and of when her feeble frame seemed unequal to the exertion of her love for her fellow-creatures, she attended Divine worship, desiring her family to lay aside hindering things of time, and be faithful in the performance of this important duty. Her last illness a lingering, suffering one, which she endured with patience, being very grateful for the kind attention of friends; yet she often earnestly desired to be released from this mortal bondage. She thought she had an evidence she was prepared for the solemn change. A comforting hope and assurance is felt that in man she has been permitted to exchange the trials of this life for a never ending eternity of rest and peace.

For "The Friend."

"Across Africa."

(Continued from page 382.)

On the 26th of 4th month, 1873, the expedition started from Simbo for the much dreaded Makata swamp, a large level plain lying between the Usagara Mountains and those at Simlaweni. This swamp offered no particular difficulties in the dry season, but became converted by the rains into a vast expanse of mud, with two or three troublesome grasses on the western side.

"Two hours' marching through pleasant wooded country, with red sandy soil, gave us our first introduction to the Makata, which soon appeared in its worst form.

"The foot prints of elephants, giraffes and felines had formed numerous holes in the yellow mud, some being at least knee deep and full of water, and many of our donkeys were trapped in them. But they managed to bring their loads into camp in safety, although the hard nearly been strangled by its driver, he made a running noise round its neck and attempted to drag it out of a hole by main force."

"Five hours in heavy rain were occupied in getting over five miles of this road, and during that time we had often to lend a hand in loading and unloading the poor donkeys, sides preventing the men from straggling, and seeing they all wished to halt in the middle of the mud.

"This would have been a fatal mistake, were there any bushes with which to build fires, or to provide fuel for the camp-fires; and a night's exposure to the rain and cold, with no dry sleeping place, must have crippled most of them. So I continued on the march until 3 P. M., when we arrived at the site of an old camp, a comparatively dry spot, where we found fuel and materials for hut-building."

"During the passage of this swamp they crossed several streams, among which was the Makata River, about 40 yards wide and 8 or 9 feet in depth. Here one of the party became thoroughly wet, and neglecting to take proper care of himself, was soon afterwards attacked with fever, which delayed the progress of the expedition for several days.

"In pursuing their journey to the westward they passed several large villages, one of which, Rehenneko, is situated near the 37th meridian east of Greenwich. This "proved

to be a large and populous village, and I was soon surrounded by a wondering crowd, the people being all well-dressed, after the fashion of the slaves at Zanzibar. They wore also a very peculiar necklace, consisting of a disk of coiled brass wire projecting horizontally from the neck, and sometimes as much as two feet in diameter."

"During the 5th month, Robert Moffat died from the effects of the climate. "The expedition," says V. L. Cameron, "then consisted of Dillon, Murphy, and myself, Issa (our store-keeper), thirty-five ashari soldiers, servants and donkey drivers, (including Bombay who was supposed to command them), one hundred and ninety-two pagazi, or native laborers and carriers, six servants, cooks, and gun-bearers, and three boys. We had also twenty-two donkeys and three dogs, and several of the men had with them women and slaves, so that, numerically we were an imposing force."

"At one point beyond the Makata swamp, the road wound through a rocky gorge, and up the steep side of the mountain, rendered more difficult by numerous torrent beds channeled in the solid granite, and which were worn quite smooth and polished, and made slippery by the draining-down of water. Before some of our donkeys would cross the worst of these, it was necessary to blindfold them." In some places "the hills, covered to their summits with acacias, looked, as Burton justly observes, much like umbrellas in a crowd. In the valleys where water is plentiful, the inparamsi reared its lofty head." This is one of the "noblest specimens of arboreal beauty in the world, having a towering shaft some fifteen feet in diameter and a hundred and forty feet high, with bark of a tender yellowish green, crowned with a spreading head of dark foliage. Unfortunately, these magnificent trees are often sacrificed to serve no more important purpose than the making of a single door, the wood being soft and easily fashioned; and since it rots rapidly unless well seasoned, the work of destruction is constantly proceeding."

"At one of the villages on the route, Cameron witnessed a curious custom, said to be universal in this part of Africa. A woman rushed into camp and tied a knot in a turban of one of his men, thus placing herself under his protection, in order to be revenged upon her husband, who had beaten her for not cooking some fish properly. The husband came and claimed her; but before she was restored to him he was compelled to pay a ransom of a bullock and three goats, and to promise, in the presence of his chief, that he would never again ill-treat her. "A slave can also obtain a change of masters by breaking a bow or spear belonging to the man whom he selects as his new owner, or by tying a knot in any portion of his clothing; and the original owner can not redeem him except by paying his full value, and he is invariably obliged to promise not to use him harshly."

"At a distance of about 200 miles from the coast, he entered the country of the Wagogo, a people "who are easily distinguished from the other tribes by the custom of piercing their ears and enlarging the lobes to a monstrous extent, wearing in them pieces of wood, ear-rings of brass wire, gourd snuff-boxes, and a variety of miscellaneous articles. The lobes are often so enormous as to descend to the shoulders, and in old age frequently become broken or torn." Small copper and brass bracelets are much worn, "but it is in the adornment of their heads that the Wagogo principally exercise their inventive powers, and nothing is too absurd or hideous to please them."

"In one of the villages of this people our author noticed many of the inhabitants suffering from small pox "which at times sweeps like a devouring fire throughout large portions of Africa."

"Magomba, the head chief of this country, who was chief when the explorer, Burton, passed through it in 1857, was still in power, and was reported by his subjects to be of fabulous age. His grandchildren were gray, and Cameron had no doubt that his age was considerably over a century. "Another instance of the extraordinary longevity of the African races was noticed by Dr. Livingstone at Makazembe. He found there, in 1871 or 1872, a man named Pemberch, who had children upward of thirty years of age when Dr. Lacerda Almeida visited that place in 1796. And this Pemberch was still living, according to the Arabs, in 1874, and must then have been at least a hundred and thirty years old.

"Witchcraft is one of the curses and banes of the whole country, every illness being attributed to sorcery or evil spirits; and of course the wizard is resorted to in the hope of obtaining deliverance from the malign influence supposed to be exerted. By means of playing alternately upon the hopes and fears of their credulous dupes, the workers of magic for a time realize a comfortable livelihood; but at last a day of retribution arrives. The magician is suspected or denounced by a rival of having caused the illness of some great person; and unless he can save himself by flight, or turn the tide of popular opinion against his accuser, he is seized and lashed to a stout post, around which a circle of fire is kindled." Often while suffering these tortures, the magicians seem possessed by a sort of mania to uphold their reputation, and boast of crimes they pretend to have caused. In many cases they have faith, to a great extent, in their own powers, and certainly are thoroughly believed in and feared, by their dupes.

"Beyond the country of the Wagogo the expedition entered the Mgunia Mkali (or hot field) which was just becoming cleared when Burton and Speke traversed it. "Now, however, things are much changed for the better, the Wakimbes, driven by wars from their

former homes, having attacked the jungle. Water has been found in many places, large spaces have been cleared and brought into cultivation, and, under the dominion of man, some of the most fertile and peaceful spots in Africa are now scattered in the midst of what was formerly virgin forest, affording shelter only to wild beasts."

A few days journey brought them to Jula Singa (the rock of soft grass). The road towards it was across a clearing extending as far as the eye could reach, and which boasted of many herds of cattle, populous stockaded villages, and much cultivation. "The fields were divided by ditches and banks, and in one place we saw some rude attempts at irrigation. To cultivate these fields must require a considerable amount of perseverance and industry, the ground being neatly hoed into large ridges." "The villages I visited were remarkably clean, and the huts wonderfully well built, considering the means and materials at disposal. Indeed, except in the matter of 'book learning,' these people can not be considered as occupying a low place in the scale of civilization."

(To be continued.)

For "The Friend."

Francis Howgill.

Francis Howgill was born in England about the year 1618. He was one of that band of primitive worthies, who for the world of God and for the testimony of Jesus Christ, endured a great fight of afflictions; not counting, with the apostle Paul, his life dear unto himself, so that he might finish his course with joy, and the ministry which he had received of the Lord Jesus, to testify the gospel of the grace of God.

He was intimately associated with his dear friend, Edward Burrough, in the great work which fell to their lot of turning people from darkness to light, and from the power of Satan unto God. These, like David and Jonathan, strengthened each other's hands in the truth and in the Lord; and went forth hand and heart together proclaiming, in the spirit of their Master, "liberty to the captives, and the opening of the prison to them that are bound; to proclaim the acceptable year of the Lord," &c.

But notwithstanding the release thus procured by them from *spiritual* captivity, Francis Howgill was suffered to pass months and years in prison; and at last was even punished for his unwavering obedience to the law of Christ, and not for evil doing. He was endowed with much resignation and christian patience; and bore his long imprisonments for the cause of Truth so dear unto him, in a manner which elicited the admiration and procured him the love and esteem of the jailer and his family, and that of many others. While suffering incarceration, which was much his lot, such was the confidence reposed in, and the respect paid to him, that many persons resorted to him for counsel in their difficulties, and referred their differences to his arbitration.

The oppressor so held his body bound, that his constitution gave way under it; and declining health came on about the year 1668, towards the close of which he was taken ill. His sickness increasing, dissolution at length drew nigh; but his faculties were preserved clear, and he was often engaged in fervent supplication. About two days before his de-

parture he said: "As for me, I am not at all afraid of death." Indeed, he had often been heard to say during his sickness, that he was content to die—that he was ready; and that he praised God for the sweet enjoyments and refreshments he had received on that, his prison-house bed, whereon he lay; freely forgiving all who had any part in his restraint.

A few hours before he ceased to breathe, some friends who lived at a distance coming to visit him, he inquired of the welfare of all of them; praying fervently, with many heavenly expressions, that the Lord, by his mighty power, might preserve them out of all such things as would pollute or defile them. Something he was heard to say shortly afterwards; but his weakness being extreme, but little could be gathered, except a few words, which seem prophetic of a time when persecution would cease. A little while after, regaining some strength, he said, "I have sought the way of the Lord from a child, and lived innocently among men; and if any inquire concerning my latter end, let them know that I die in the faith which I have lived in, and suffered for."

After a few words of prayer to his Father in heaven, he spoke no more; but entered into his blissful and everlasting rest, in the fiftieth year of his age, having been a prisoner for the testimony of Jesus, nearly five years.

Such was the life and death of Francis Howgill. And such the religion he professed and lived. A religion that enabled him and thousands more to stand their ground in a day of no ordinary proving and close trial. It was a *true and real* and vital religion which went to the ground and root of matters; and, aiming at a thorough cleansing as well as a thorough changing of the heart, it deterred not those who adopted it from a full surrender of themselves to the Saviour's one saving baptism of fire and the Holy Ghost, neither from the spirit-searching operation of that living "word of God which is quick and powerful, and sharper than any two-edged sword," and is a discerner of the thoughts and intents of the heart;" but brought with it a willingness to become martyrs for His name and cause who had so enamoured their souls of His goodness and unfailing grace and mercy.

The subjoined is a portion of an epistle of this good man, which he terms "the unchangeable testament, and will, and counsel of Francis Howgill, left to his daughter, Abigail Howgill," and which with solemn fervor, he enjoins her to observe, saying, it is the chief thing he has to bestow upon her. It will conclude this little account, viz: "Seek the kingdom of God, and the righteousness thereof; it is not far from thee, *it is within*; it consists of life and power, and it stands in righteousness, truth, equity, justice, mercy, long suffering, patience, love, light, and holiness. This is the being and centre thereof; therefore seek not to here! or to there! *without thee*, in this or that outward observation, for many seek there and never find it; but seek, and thou shalt find; wait, and thou shalt receive.

If thou inquire in what must I seek, and what must I wait in, and how must I seek? I inform thee, thou must silence all thy own thoughts, and thou must turn thy mind to that which is pure, holy, and good *within thyself*," &c.

Take heed unto that, [viz: the holy life, or enlightened conscience *within*] and it will show thee the evil motions and thoughts, and as thou

lovest it, it will subdue them, and press thee for the time to come, out of evil; though thou be born into the world a reasonable creature, yet, thou must be born again and be made a new creature, or else thou canst not enter into God's kingdom." [Here a child might have queried, How is this? and heavenly birth to be produced? The parent proceeds:]

"Thou must know the seed of the kingdom in thyself; of which thou must be born a formed again, into God's image. I have to thee that God hath sown it in thee; a germ of it, a portion of it, a measure of light a truth, of righteousness and holiness. *Keep in thy mind to that*, and love it, and thou will feel the Heavenly Father working in thee and creating thee to life, through Jesus Christ who hath enlightened thee, and thou will feel the power of the Lord strengthening thee, thy little faith and obedience, and making thee to grow in the immortal seed of his kingdom, and to out-grow and over grow all evil so that thou wilt daily die to that evil a have no pleasure in it; but in the Lord, a in his goodness and virtue shed abroad in a heart, which thou wilt taste and feel with and have joy and comfort therein."

Again reverting to the same subject, "G is a Spirit," he says, "a pure spirit of light, and power. He it is that searcheth the heart, and shows thee when thou dost evil, thinkest evil, or speakest evil; and sheweth unto men and women their thoughts. That which shows the evil is good, and that which shows a lie is truth. *Thus is within, take heed to it*. This is called God's Spirit in the Scriptures; believe in it, love it, and it will quicken thy heart to good, and it will subject the evil. Here is thy teacher near thee; love it, then act contrary to it, it will condemn thee. This Spirit never errs; but leads out all error into truth."

Francis Howgill labored in the gospel sixteen years; there is a volume of his works printed in about 740 pages in folio.

Confused Manners.

It is one of the lessons of every-day life that we should all strive to learn how to express by every pleasant, graceful and attractive way, the real kindness we feel, not only those whose esteem we value, but to every one with whom we come in contact. There is nothing in occupation or circumstances prevent this. Neither wealth, nor birth, nor education has any monopoly of true politeness. Every one, however poor or busy, young, can cultivate a gentle, pleasing and cordial manner, that shall fully express in the intercourse of daily life the genial impulses and warm emotions of the heart.

Good-will and benevolence will develop more fully by being thus continually manifested, than by any other means. Every feeling increased by expression, diminished by repression. The blunt, rude tone, the disrespectful manner, the omission of those gentle amenities of life that smooth away so many rough places, do actually, in time blunt and dull the finer parts of our nature, check the generous emotion, drive back the sympathy, and crush the affections that are thus denied their natural outlets. On the other hand, the courtesies of life, while gladdening those whom they are extended, return to enrich the heart of the giver. He who remembers the rights of others, and hastens gracefully to a

rd them, who freely concedes the veneration due to age, and the respect and honor to one human being to another, who sees every opportunity of shedding small rays of sunshine over the lives of those around him, will himself reap the harvest he sows—a larger heart, more expanded benevolence and richer affections.

We would not here descant upon the world-policy of courteous manners, nor urge it as a motive for their cultivation, yet it is pleasant to discover that right doing has its own reflex action, not only on the character, but also on the immediate personal interests of men. This is certainly the case in all business intercourse. Other things being equal, courteous and affable always have the preference over the blunt and rude. Whether it is the selection of the store at which we deal, the employer whom we will serve, the workman we will engage, or the road we will travel, this element will largely influence our choice. In the instructions which a general manager of a leading railway has issued to his subordinates, he says: "Treat people as you appreciate and were willing to acknowledge their custom. Try to accommodate and please. In short, act as any good business man would toward his customers, don't treat people as if you were conferring a favor on them by letting them ride. Rather, seek to make the line popular, because its success is dependent on the good will of the people. You need not be ashamed to let people understand that you acknowledge this." Such orders fully recognize the policy of pleasing manners and their necessity to ensure success. To be really worthy and enduring, politeness must be based on kindly feeling. An old proverb says, "If the staff be crooked, the shadow cannot be straight." So, our hearts are cold and hard, they will not cast the shadow of kindly deeds and gentle manners. Yet they act and re-act upon each other, and the effort to correct the shadow may induce us to reform the substance.—*Atlanta, Laeger.*

For "The Friend."

Observations on the Rise of the Society of Friends, and the character and labors of George Fox.

At the present time when in many places within the limits of our own Society, it seems necessary again to contend for those doctrines and practices which Friends in the beginning were called upon to support, and which faithful members have ever since felt bound to maintain, it may be useful to review the circumstances attending that remarkable manifestation of Divine life, in which the Society had its origin, and the steps by which its doctrines were gradually unfolded to the mind of George Fox, and accepted by the generation in which he lived. The following observations on these subjects, and sketch of the early life and ministry of George Fox, have been taken with his view from the recently published work entitled, "Friends in the Seventeenth Century."

During the eventful period which elapsed between the enforcement of the Reformation by Henry VIII., and the inauguration of the Commonwealth under Cromwell, "men had become accustomed to think upon and discuss the points of religious belief, on which there long had been differences of opinion; and as the state of the professing church, as well as that of the nation at large, had been through-

out such as to demand the attention of those who had capacity to think and to act, very many within different classes of society, took deep interest in the subjects brought into dispute; which thus acquired a dignity and importance previously withheld from them.

"Nevertheless, there were certain great and fundamental truths or principles of the gospel, underlying the whole system of Christianity, which though they may have been admitted in theory or written creeds, had long been very much lost sight of, denied or perverted, in the self-seeking teaching of the overbearing clergy, and the heated and blinding controversies of sects or parties, struggling for liberty or power. Although the doctrine of the influence of the Holy Spirit was thus admitted, his indwelling with men, or that 'The Grace of God which bringeth salvation had appeared unto all men, teaching them' how to become partakers of the salvation purchased by Christ, was unacknowledged or denied.

"It was claimed by the Church,—said to be organized in accordance with the Divine will, that to it belonged exclusively all the authority and right which a commission from Christ could convey,—that it was collectively inspired by the Holy Spirit, and its individual members participated in the influence of that Spirit through the external 'means of grace' possessed and administered by the Church; as baptism, the eucharist, preaching, praying, and instruction in the Scriptures.

"The Bible was received as the complete and final revelation of the Divine will, in relation to every thing connected with the salvation of the soul, and consequently was considered the primary rule of faith and practice; but the authoritative interpretation of the text, was virtually claimed and made binding by the 'Church;' or in other words, by the 'clergy;' who, as a body, were not disposed to give any exegesis that would curtail their power, or otherwise injuriously affect their interest. The Headship of Christ in the church, and that equality among believers set forth in his declaration, 'One is your master, even Christ, and all ye are brethren,' were generally disallowed or perverted, by denying the bestowal of spiritual gifts on any but such as had undergone a prescribed course of study, and been ordained by men. These formed a distinct class, with peculiar titles, power, and privileges; exercising their ministerial functions as a profession, and claiming the right to demand pecuniary compensation for their services. That Christ's Kingdom is not of this world, and therefore his disciples are forbidden to fight, though so clearly set forth in his teaching, and so fully confirmed by the whole spirit of the gospel, was altogether ignored; and consequently the constitution and working of the predominant church, were complicated with the character and action of the political government, and none appeared to comprehend its organization and the execution of its duties, without connection with and dependence on the Legislature or the administration of the State, and without holding that as these were often brought into collision with opponents, Christians were therefore warranted in engaging in war.

"But He who watches over his Church by night as well as by day, as He had preserved witnesses to the truth throughout the ages of almost universal darkness, so was He now at work in the hearts of individuals, preparing

them to detect and reject the many errors in doctrine, and the many rites and ceremonies by which man in his own will and wisdom, had overlaid and obscured the truth, and to turn away from them; also from those who claimed to be ministers of Christ, while their lives bore witness that they knew not what it was to be subjected to his heart-changing baptism, or to cease from serving the spirit of the world. Thus there were those in different portions of the professing Church, who were longing after a more spiritual religion than could be found while it maintained such a mechanical routine of ceremony, between the worshipper and the Father of Spirits; who were seeking a more full exemplification of the transforming power and purity of the gospel, and were earnestly looking for a clearer light to shine upon the path of the just.

"That light came not by any sudden outburst of religious illumination within any one of the various sections into which the visible Church was divided; but by the insuing of the Day Spring from on high, in the hearts of different members attached to them, who were hungering and thirsting after righteousness, and waiting to be taught the way of the Lord more perfectly. The work had been and was going on secretly and with slow progress, hidden in the hearts of many, like seed in the warm earth, awaiting the time and the means by which it would be more powerfully quickened, and enabled to push forth the blade, form the ear and perfect the full corn in the ear.

"George Fox was born in Drayton-in-the-Clay, in Leicestershire, in the year 1624, about one year before the death of King James I. He was the son of Christopher and Mary Fox, the maiden name of the latter being Lago, said to be of the stock of the martyrs. They were members of the Episcopal Church, and were highly esteemed for their piety; the father being called by his neighbors 'Righteous Christ,' on account of his honesty and uprightness.

"George Fox was remarkable, when a child, for his gravity and sedateness, and he states that when but eleven years of age, he 'knew pureness and righteousness;' and that 'The Lord taught [him] to be faithful in all things, and to act faithfully in two ways; viz., inwardly to God, and outwardly to man, and to keep to yea and nay in all things.'

"Seeing the seriousness of his youthful character, his relatives at first thought to have him educated for becoming a priest; but that being abandoned, he was placed with a shoemaker, who also dealt in cattle and wool; and in the latter George was employed. It does not appear that he received any further school education than enabled him to read and write and cast accounts, with facility. Conscientiously just and exact in all his dealings, it became a common saying among those who knew him, that 'If George says verily—a word he often used—there is no altering him.'

"When about nineteen years of age [1642], being at a fair, he was much grieved by two of his acquaintances, who were professors of religion, with whom he had gone to an inn, for some refreshment—drinking healths, and urging him to join them therein. He refused, and left them. That night he was sleepless, being brought under great exercise of mind; and having cried fervently unto the Lord, he states, He said unto me, 'Thou seest how

young people go together into vanity, and old people into the earth; thou must forsake all, young and old, keep out of all, and be as a stranger unto all.' This appears to have been the beginning of 'The various exercises, trials and troubles,' through which the Lord led him, in order, as he observes, 'To prepare and fit him for the work, unto which He had appointed him.'

(To be continued.)

Aztec Ruins.—The ancient ruins which are scattered all over this country are some of the strangest unwritten pages of history. Our fertile valleys have been densely inhabited and highly cultivated by an enlightened race of people centuries ago, while the ruins of the houses, corrals, towns, fortifications, ditches, pottery, ware, drawings, non-interpretable writings, &c., go to show there have been many arts cultivated in those days which are now entirely lost to the human race. Their houses have been built of most every kind of rock, from small boulders to the finest sandstone. Some of the finest of these ruins, and the most perfect, are located fifteen miles up the Animas River, or about thirty-five miles below Animas City, in a large valley fifteen miles long by seven wide, on the west side of the river. This valley has been covered with buildings of every size, the two largest ones being 300 x 6,000 feet, and about 300 feet apart. They are built of small sandstone laid in adobe mud, the outside walls being 4 feet and the inside walls from 12 to 3 feet. In the lower story port holes a foot square have been built for defence. There are rooms now left and walls for about four stories high still standing. About the second story, on the west side, there has been a balcony along the entire length of the building. No signs of a door are visible in the outer walls, and the ingress must have been from the top, in the inside there being passages from room to room. Most of them are small, from 8 x 10 to 12 x 14 feet, the doors being 2 x 4 feet. The arches over the doors and port-holes are made of small cedar poles two inches wide, placed across, on which the masonry is placed. The sleepers supporting the floors are of cedar, about 8 inches through and from 20 to 50 feet long and about 3 feet apart. A layer of small round poles is then placed across the sleepers, then a layer of thinly split cedar sticks, then about three inches of dirt, then a layer of cedar bark, then another layer of dirt, then a carpet of some kind of coarse grass, which forms the floors. The rooms that have been protected from exposure are whitewashed, and are ornamented by drawings and writings. In one of these rooms the impression of a hand dipped in whitewash, on a joist, is as plain as if it had been done only a few days ago. In another room there are drawings of tarantulas, centipedes, horses and men. One room in the eastern portion is quite a curiosity, it being perfectly round and must have been used for a hall. It is about twenty feet across. In some of these rooms have been found human bones, bones of sheep, corn-cobs, goods, raw hides, and all colors and varieties of pottery ware. These two large buildings are exactly the same in every respect. Portions of the building plainly show that it has been destroyed by fire, the timbers being burned off and the roofs caving in, leaving the lower rooms entirely protected. The rock these buildings have been built of must have

been brought a long way, as nothing to compare with it can be found within twenty miles. All the timber used is cedar, and has at least been brought twenty-five miles. Old ditches and roads are to be seen in every direction.

In conversation with the Navajoes in regard to these ruins, they say their forefathers came there five old men's ages ago (500 years) and these ruins were here, and the same then as now, and that they have no record of it whatever.—*Late Paper.*

For "The Friend"

More than twenty years since, the following lines were published in "The Friend," but not in the present form. From their beauty, simplicity and applicability to recent removals, it has been thought the republication of them in their present corrected form would be acceptable to many readers.

TO THE MEMORY OF GEORGE DILLWYN.

Fully ripe, like the ear for the reaper,
He met the pale messenger's word;
Oh! sweet is the sleep of the sleeper,
That rests in the name of the Lord!

He slumbers at length with his fathers,
Secure from the tempests of time;
For the storm that on earth often gathers,
Is unknown in the heavenly clime.

They have placed the cold earth on his ashes;
They have given him up to the tomb;
But the light of his virtues still flashes,
The pathway of truth to illumine.

He is dead—but his memory still liveth;
He is gone—his example is here;
And the lustre and fragrance it giveth
Shall linger for many a year.

He stood in the midst of his weakness,
With the snows of long years on his head;
And sublime with a patriarch's meekness,
The Gospel of Jesus he spread.

The path of the faithful he noted—
In the way of the humble he trod—
And his life was with ardor devoted,
To the cause of religion and God.

Like the sun of a mid-summer even,
When unclouded it sinks in the west;
His departure was brightened from Heaven,
With a cheering assurance of rest.

Calm and soft and serene, was the slumber,
Preluding his glorious rise,
And free from all cares that enumber
The moment he winged to the skies.

Oh! there's joy in the grief of the weeper,
Whose loss may above be restored;
And sweet is the sleep of the sleeper,
That rests in the name of the Lord.

In the evening, when gathered to read the Scriptures, during our silent waiting on God, a feeling of awful seriousness spread over us, and tendered our spirits so that we all wept; and in brokenness, it was acknowledged, that there surely is encouragement to believe, and, under all trials, humbly to trust in the Lord.—*M. Capper.*

* Although our late beloved friend E. W., was not called to the public ministrations of the "Word," many will recall the sweet earnest tones of voice, in which he was frequently led to labor in private. Whenever sickness, suffering or sorrow prevailed, there his heart seemed to go in true sympathy, and when necessity required, stopped not with words, but rested only in the performance of deeds of actual benevolence; and yet with all, so humble a view did he take of his own attainments, as to say to the writer, in entire sincerity, "He sometimes refrained from social visiting, fearing lest his spirit might be a burden to his friends."

May we who are left, follow him as he followed his Divine Master.

Random Notes of Travel in Europe.

(Continued from page 384.)

Leaving Ulverstone, a few seemingly stone miles by rail were passed over, and we stood within the precincts of Furness Abbey. The grand and stately ruin owes much of its beauty to the warm rich color, the light reddish brown, of the sandstone of which it is built. Comparisons are instituted between Fort and Furness, and the question raised which is the more beautiful, the cool gray, the former, varied in shading as it is, or the magnificent brown cloisters where the monks of Furness ruled the country side miles away. The peaceful noon-day quiet was undisturbed as we explored nave and chancel, and Abbots' house and refectory, all were silent. The vesper-bell no longer resounds over the vale of Nightshade, for this was the name it bore in olden time, calling the monks to evening prayer. No more are solemn councils held to consider the last edict from Rome, and its relation to the affairs of this once wealthy abbey. Immense masses of ivy, with tree-like stems, climb its walls, and so quiet a secluded is the scene, that did we not know that human passions and human needs are the same at all times and in ever clime, we might believe that peace only had here abounded. As it is, we thank the old fathers, upon whose dust we are treading, for the care with which they preserved the learning of their day, and pass from their memorials silently away.

This celebrated abbey was founded under the patronage of Stephen, afterwards king of England, in 1127, and 410 years from its establishment was surrendered to Henry VII. This took place one year after Henry had decided to suppress and confiscate the small monasteries by a bill of Parliament. The bill stuck long in the lower house, when the king commanded the commons to attend him and on walking out of his chamber he took turn or two among them, and looking angrily on them said, "I hear that my bill will not pass; but I will have it pass, or I will have some of your heads," and without other rhetoric returned to his chamber. The bill was passed and all given him as he desired. Three hundred and seventy-six monasteries were confiscated, and all their estates, real and personal, given to the king and his heirs. The larger establishments soon followed, upon some of which strong pressure was brought to bear, to induce submission. The ostensible motive leading to the suppression of religious houses in England, was "the desire to increase, advance and exalt the true doctrine of virtue in the church."

The abandoned Abbey of Furness soon passed into the hands of the Preston family, and a curious tale is told of the manner in which they became the owners. Sir Thomas Curwen, knight, in Henry VIII. time, an excellent archer, went up with his men to shoot with the king at the dissolution of the monasteries, when the king said to him "Curwen, why doth thee beg none of these abbeyes? I would gratify thee some way. Quoth the other, "Thank you," and afterwards said he "would desire of him the Abbey of Furness, nigh unto him, for twenty or years," says the king, "Take it forever. Quoth the other, "It is long enough, for you set them up again in that time." But as appeared at length that they were not likely to be re-established, this Sir Thomas Curwen

ent one Preston, his son-in-law, to renew the case for him, who renewed it in his own name, apologizing to Curwen, by remarking, "You may have it as long as you live, and I think I may as well have it with your daughter as with any other." Thus by the overbearing will of one "bold bad man," were these nurseries of love and superstition swept from the land.

From Furness to Silverdale and Carnforth, our route lay over the yellow wrinkled sands of Morecombe Bay, in which many a traveller had been overwhelmed by the treacherous slide, but now safely traversed on the firm embankled rail. Remaining over First day with a valued friend, I attended the meeting at Yealand. Why the not very euphonious names of Yealand Conyers, Yealand Redmayne and Yealand Storrs, should occur in the nomenclature of this district, we did not learn. Perhaps the name of Yealand was that of an ancient family or estate, and handed down from immemorial days, and retained with a pertinacity as pleasing to every lover of antiquity as it is peculiarly English. The meeting at Yealand was larger than at Carlisle, where we last attended, and we traversed five miles of country before reaching it. The surroundings impressed me as peculiarly primitive and rural, and the interest was thereby greatly enhanced. Our road lay through quiet villages, one of which possessed an ancient Hall, now much dilapidated. Low stone walls, covered by ivy and flowering shrubs, bordered the secluded roadside, while the wind and the flying clouds above indicated that the sea was not distant.

In the afternoon we walked with our friends across the open fields to Arnside Tower, a remnant of the sea-side defences of early days:

"Not for my Lady's bow
Built I this lofty tower,
Still looking seaward,"

but to repel the invasions of the plundering Dane or Scot, was it erected. We entered, and found the ground-floor a rendezvous for cattle. A dilapidated stairway led to the upper story, which the children of the party ascended with their elders. "I think sister," remarked little Edward, "I like this old staircase better than a proper one." "How can *thou* say that, Edward," replied the elder small sister, reprovingly. "Ah! but I do," repeated the little boy, stoutly. "I like it much better than a proper one!" Emerging from the dense shrubbery surrounding the pleasant home of our friends, we found ourselves upon the old shores of Morecombe bay, and looking down upon the sands below the cliffs at our feet. These cliffs were perforated by caves, in which it may be smugglers had once found convenient places of deposit. Among the shrubbery of the grounds above grew a British Hypericum, whose large yellow petals and long and abounding stamens, rendered it a peculiarly beautiful and showy ornament. Though many of the more common English plants have become acclimated in the northern United States, there are others, some of which are interesting to the forist, that will not endure our cold winters, and have therefore never found a lodgment among us. Among the latter may be named the Daisy, so dear to the English lover of mossy turf and star-studded borders.

On Second-day morning we bade farewell to the very kind friends at Silverdale, and proceeded to Settle, an ancient town backed by high rounded hills and a fine exposure of

limestone, extending for a distance in perpendicular bluffs. At the foot of the Scars was an intermitting spring which ebbs and flows alternately, and in which we were much interested. A heavy rain prevented more extended exploration of the antiquities of this little city, except that of the venerable shambles, a relic of the past. Even Giggleswick School, established by Edward VI., was not visited, much to our regret. Ample compensation for these disappointments was found within doors. Let no one imagine he falls estimates the ties of kindred until he leaves home and country to find them renewed on a foreign shore. How delightful to scan the features of a beloved face, and trace resemblances to other dear forms and features well remembered, though far distant. Such was one of the pleasures reserved for us at the ancient town of Settle, and then bidding adieu were borne direct to London in an American railway car.

Though our railway car has some advantages over the English carriage, the latter may at times prove a preferable mode of conveyance. In the latter, one may sometimes enjoy the privilege of being alone, and a privilege it is, when weary of travel, to find oneself occasionally entirely free from the restraint publicity always throws around us, for to glance at the country on either side at will, to sit, to stand, to lie down as one may desire, are all practicable at such seasons.

London, 8th month.—A week of almost continued rain, did not prevent the completion of arrangements for the Continent, and we found ourselves one afternoon at the London station with tickets for Harwich, the seaport from which the steamer crosses to Rotterdam. Among the numerous passengers waiting was a German baroness, with her attendants, who had much ado to get their numerous trunks arranged in a small pyramid in the centre of the room. A few hours after nightfall, brought us to Harwich; our only fellow passengers in the railway carriage being an English minister, on his way to Norway, and a young Jewish girl. The latter seemed glad of companionship, and amply repaid the courtesy shown her, by her knowledge of the language on our arrival at Rotterdam. The passage across was uneventful to ourselves, but full of uncomfortable interest to some others, who, notwithstanding the sea was placid as a summer mill-pond, thought themselves, or found themselves very ill indeed. With all her forethought our baroness found that no stateroom had been reserved for herself, whereat her party was in great consternation; but finally she was accommodated in some remote corner, and a degree of quiet reigned after the storm.

Holland.—In the morning a long, low, level line of green announced the coast of Holland. We sped along through shallow yellow water, indicating by its color that probably more land might be added to the area of the small kingdom, should a slight upheaval take place. And this is the country "Heroes, kings, had died for," thronging with memories of such men as William of Orange, Maurice of Nassau, and Philip Van Artevelde. In truth, it seemed scarcely worthy of them.

We soon landed and made a tour through the city. Rotterdam at first sight, impresses one as a bright, pleasant looking city. The houses are very high and narrow, with the gable end facing the street, generally painted

in light delicate shades. Many of them lean slightly forward over the street, or are tilted towards one side; indeed very few of them are quite perpendicular. Built on piles, as they all are, a little sinking of earth causes this defect. At the station we found a motley crowd of well dressed, orderly people, among them chatting by a window, some stout, elderly country women, with very high crowned caps, a marvel of lace, and starch, and snowy whiteness. From their temples extended horizontally, curious gilt, spiral horns, which gave the wearers a remarkable appearance. It is necessary to be informed that they are worn as ornaments, the effect produced *not* being that intended, but this inconsistent result is not confined to the peasant women of Friesland, as observation everywhere will show.

At Rotterdam the tide rises from ten to twelve feet, so that the city need not suffer from stagnant water in her many canals. These are crossed by numerous draw-bridges and where the channel is too wide a ferry is established. Great square-fronted boats were dragging their slow length along these canals, a happy family frequently occupying one, and apparently enjoying the aquatic establishment. Ships enter the larger water-ways, so that this renowned city presents a curious medley of steep-shaped gables, trees, shipping and water.

In the afternoon we left the city of Erasmus, whose bronze statue adorns a wide bridge called the Grote Markt, near the centre of the town, and entered the train for Amsterdam. "Hier weagert ge Rookt worden" (no smoking allowed), greeted the eye immediately on entering the carriages. How much self denial obedience to this command must cost, can be told only by a Hollander, who above most other things, loves to contemplate the present and the future through a mist of smoke of his own raising. Amsterdam is in many respects an amplification of Rotterdam; the same lofty step-shaped gables of various colors, and the numerous leaning towers may be seen, while the same amphibious proclivities are manifested by her people. One cannot help wondering how they keep the children out of the water, but whether after the Chinese manner, they are attached to a float, we cannot say. It is probable that some such device is employed, and that life with them is thus emphatically a voyage from the beginning. As usual we were assailed by many cab drivers, and a high quarrel in very low Dutch was carried on among them, in their efforts to capture us, but having secured the proper vehicle we were allowed to proceed in peace, with the echoes of their discordant language ringing in our ears. Some knowledge of low Dutch is not without its advantages, as was impressed upon an American traveller who having wandered away from the station was unable to find his way back until his fortunate remembrance of the word Spoorweg (Railway), which he had seen above the door of the station, proved the clue, the repetition of which, to those he met in the street, showed him the road to the point he had unguardedly left.

Amsterdam extends over seven miles of country, and its fine wide streets, handsome dwellings bordering the wide canals spanned by stately bridges, its bustling population and extensive commerce, impress the stranger with the belief that this is "no mean city." The people have a wonderfully contented aspect, as if life went well with them, and not

a bergar was to be seen among them. The market places abounded in fine fruit and vegetables, and buyers and vendors were well and comfortably clad. The King's palace is a rather imposing building but needs space around, it and has a somewhat dilapidated aspect. Here Louis Bonaparte resided whilst King of Holland. It stands upon 13,659 piles driven 70 feet into the ground and has stood for more than 200 years. The entire city is founded upon piles, which gave occasion to Erasmus to say that he had reached a city, whose inhabitants like crows, lived on the tops of trees. The upper stratum is entirely bog and loose sand, and no structure can be raised thereon, and houses have actually sunk into the mud when the piles have broken or decayed. The various small canals that intersect the city divide it into nearly 100 islands, and were it not for the skillful management of sluices and dykes, Amsterdam might at any moment be entirely submerged. All things considered it is one of the most wonderful capitals in Europe.

For "The Friend,"

Philip and Rachel Price,
WESTTOWN BOARDING SCHOOL.

The following testimony to the usefulness of Westtown Boarding School, from the pen of one who has filled various public offices of trust and confidence and has also had large experience in important business transactions extending through a long period of years, as an eminent member of the legal profession in Philadelphia, is encouraging to those who have had and who continue to have a care and exercise for the welfare of that interesting institution. In conversing quite recently with another individual beyond middle age, who has also arrived at some eminence in his profession and what is of far more importance retaining throughout a very successful business career,—integrity of character; and who, although afterwards a student at other seminaries of learning of greater note in the world than "Westtown," said, that it was there, that the foundation of his scholastic acquirements was laid; the reception of good principles was not mentioned by him, but there is little doubt that to the moral training there received, and the attention afterwards to the voice of Truth in the heart, were also to be attributed his success and standing in life.

Some years since, an attempt was made to have a bill passed by the Legislature of Pennsylvania to tax the school property. Dr. Wilmer Worthington, of West Chester, (a Presbyterian,) was at that time a member of the Senate. On learning that such a bill had been, or was likely to be reported in the lower House, he went to the member representing the district and said to him in substance, "he had learned that such a bill was likely to be or had been originated, and that it ought not to pass; that whilst other institutions of a similar character throughout the State had been frequently at the seat of government asking for pecuniary aid, Westtown Boarding School had educated several thousand pupils, many of whom were now useful men and women, and had never asked the State for one dollar; and desired him "to kill the bill in the House," for said he, "if you do not, I will kill it in the Senate—I am determined it shall not become a law." It was defeated.

Both teachers and pupils may indeed feel thankful for such a "garden enclosed." No

doubt there are up and down in the land many lambs bleating for such a fold. Sometime since, the writer was addressed by an individual, who had received his education in the Society, but had lost his right of membership by marrying out, and who, then and now, justly occupies a high judicial position in the State, with the inquiry as to whether his children could be received there, saying there was such a flood of folly and extravagance in the world, that he should greatly prefer having them educated under such restraints as were there maintained, &c. This institution has always, and yet continues to be a place of deserved interest to the members of Philadelphia Yearly Meeting, and it may be justly added, of concern, to its rightly exercised members. How very important, that it should be maintained in its original purity and simplicity, that all who are charged with conducting it, may feel the importance of setting a consistent example in these particulars; there can be no doubt whatever, that if the door is once opened to the introduction of modern liberties in regard to dress, address, &c., other innovations will soon follow, and evils of which are sorrowfully apparent in other places, the hedge that has long and still surrounds it will be broken down, strangers will come in, the comely order and beauty that now prevails will be destroyed, our strength gone, and our house left unto us desolate. The testimony referred to is as follows.

"Towards the close of the last century, the Yearly Meeting of the Society of Friends, held in Philadelphia, had come to the resolution of establishing a Boarding School at Westtown for the better and guarded education of the youth of the Society. In the year 1795, Philip Price was appointed one of the committee, which had charge of the construction, opening, and supervision of the institution. In this capacity he continued to devote much of his time from his first appointment until the year 1818, when Philip and Rachel Price were appointed the Superintendents, in which offices they remained until 1830, making a connected service of thirty five years for the welfare of the school. There were educated successively all their ten children, commencing with the day of its opening in 1799; and to those children owed nearly all they received of an education beyond the primary instruction of the country schools. The course of studies then did not extend to the languages, but it was so much more and better than that prevalent in the country as to be an invaluable blessing to them and to the large numbers who have also been educated there, numbering generally about 200 of both sexes at a time, through now over half a century.*

The value of the instruction derived at this seminary has been of incalculable service to the Society of Friends, putting them generally in advance of others in otherwise equal circumstances, for intelligence, respectability of character and power of usefulness. And though the immediate benefit be exclusively to members of the Society, the remote advantages have been widely diffusive through many of the States of the Union, not only from the number of educated citizens sent forth to mix as active members of the community, but by multiplying good teachers to spread largely the benefits of education. How

* Now, 1877, over three quarters of a century.

much the Society of Friends have thus been the benefactors of the country it would be difficult to over estimate, and it is a stream of beneficence that flows in perpetuity.

It was during the superintendency of Philip and Rachel Price, that some of the local improvements of the property were commenced that have been since greatly advanced in the laying out of walks and planting trees, now become groves of ample size for shade and scenery; in keeping with the beautiful and varied landscapes that surround this quiet retreat of learning. But it was the moral and religious government of the household, composed of teachers, caretakers, assistants, and pupils, in which their usefulness was chiefly conspicuous. It was in consonance with the views of the Society and with their own character, mild, considerate, and paternal. All found there the best comfort and solace in their separation from parents and home—affectionate and sympathizing protectors and friends; and departing thence, they carried with them into the world an affectionate remembrance to be retained through life. It thus occurred, from their long superintendency of Westtown and afterwards of their own school at West Chester, that few persons have become the object of affectionate attachment and personal regard to so many individuals."

Faith and Charity.

The following interesting narrative is taken from an article which was published in the editorial columns of the *New York Tribune* of 7 mo. 3d.

"Here is a little story which came to us the other day, and which, if it is not news, either political or marketable, has the merit, which news rarely claims, of being absolutely true. Near a neighboring city there is a little house, an asylum for children founded by one or two good women, and kept up from day to day by voluntary contributions. It is a rule with these women never to ask for help in their work from anybody except that One who has promised to care for the fatherless child. Business men are apt to look upon this system of faith and prayer and charity as an insecure sort of capital; yet it is a curious fact that two of the largest orphan asylums in the country are supported in this way, and have increased until thousands of helpless little ones have been sheltered and fed and clothed in them, during years in which the shrewdest business men have seen their fortunes wrecked.

A winter or two ago the director of this little home issued a statement of her receipts and expenditures, for the satisfaction of those who had given help to it during the year. It fell into the hands of a wealthy man living some miles away from the home, who glanced over it and threw it aside. No help was asked, and it did not occur to him to offer any. A month or two later, one bitter night, the manager found herself absolutely without a morsel of food to give the children for breakfast. There was not even flour nor bread in the house. Institutions of a similar kind have their settled funds from which to draw, or friends to whom to appeal. These women had no money, and but the one friend to whom to turn. The night was stormy, it was late, the children would waken hungry; their hearts almost failed them. But they went to their friend. Before they rose from their knees a carriage drove to the door, from which when

they went out the coachman—without a word—began to unpack meat, bread, provisions of every kind. Bundles of clothing followed. At last a lady held out an envelope in which was a bank note for a substantial sum, and the carriage drove away through the snow without a word being spoken.

All this was mysterious enough. But the explanation was simple. The banker was at the library fire, thinking how glad he was to be indoors, when his daughter came in and said, how cold it was outside and how warm and cozy she had been in her own chamber, and how it had set her to thinking of people who were cold and hungry, and that she thought she could sleep better if she could make some one who needed help as warm and happy as herself. The father was a practical man. He remembered the little home for children, but told her to-morrow would be time enough to look it up. The daughter insisted that to-night was the time. The water began to come into her eyes. So the father gave up, and put the note in the envelope as his contribution to the foolish adventure.

We do not tell this story as an appeal for his asylum, for it does not ask for help. But here are children who are orphans, and hungry children, and children who need help in soul and body, and mothers praying God for help for them every where. They are close to our readers, wherever they may be, and now is the time to help them, not to-morrow.

For "The Friend."

This is a day in which there is much excitement and commotion among Friends in many parts of the United States; and there is to be seen the evidence of a spirit being at work, even among some of those who profess to be followers of Christ, that has a tendency to draw away the minds of many of the dear young Friends from Him who told his disciples that "Ye are not of the world, even as I am not of the world," and also said "Ye cannot serve God and Mammon." And bearing less some of those who make a high profession (but are not in possession of the Truth) may have a harmful influence over some honest hearts that are not firmly established, we wish to encourage all who sometimes feel this worldly spirit warring against the True Spirit to be very careful and be not deceived; though the great deceiver "be transformed into an angel of Light," yet ever remember that the faith which was once delivered to the saints, is built upon a more sure foundation than the high airy notions of the natural man.

Feeling of a surety that our forefathers in the truth, Fox, Barclay, Penn, Pennington, and others, built upon that eternal Rock, Jesus Christ, and knew the revelation of Him to their souls by his holy Spirit, and as we cannot find a any of their writings that they taught the people to go into any large gatherings that were gotten up only for amusement and enjoyment of the natural mind, we are therefore often made to wonder why it is, that some who claim to be reviving ancient Quakerism, are running into many things that the early Quakers had to come out of. So that we may be sure there is a counterfeit in some places; and as Christ said "the tree is known by its fruits," "A good tree bringeth forth good fruit and a corrupt tree bringeth forth evil fruit," and by looking at these things in that light as well as in that which "lighteneth every man that cometh into the world," we can

very readily see which is the genuine fruit of the Spirit and which is not; and we trust that all who are trying to hold up genuine Quakerism may stand unflinchingly in the day of battle.

J. E. P.

Kansas, 7 mo. 4, 1877.

How Counterfeit Notes are Destroyed.—This interesting series of operations has lately been carried on at what is known as the "macerating house," a large brick building south of the Treasury Department. The counterfeit notes and stamps were brought down in large chests, which were opened by a committee of superintendence, the packages broken, the paper examined in detail, and then thrown into the hopper, which conveyed it to the macerating cylinder. The notes were of all denominations and kinds, and amounted in fictitious value to \$850,000.

When all the paper had been consigned to the macerating cylinder a heavy man-hole door was screwed on and locked with three complicated padlocks, having each a different key, one kept by a member of the committee from the Secretary of the Treasury's office, another by a member from the Treasurer's office, and the third by a member from the Register's office. The cylinder cannot therefore be opened unless by all three gentlemen together. It may not prove uninteresting to follow the reduction of the paper. The macerating cylinder is twelve feet long and five feet in diameter, weighing 4,800 pounds; its inner periphery is studded with knives, which cut the paper into pieces, and it is rotated on its axis by a steam engine of sixty horse power. After the man-hole door is locked a powerful alkali is added, through the cylinder, consisting of six pounds of soda ash to every hundred pounds of paper to be macerated; hot lime-water is run in to distribute the soda ash properly through the mass, the stop-cock is then closed, the steam is turned on and the cylinder rapidly rotated.

The macerating process usually takes from thirty-six to forty-eight hours, when the pulp is drawn out of the cylinder into a large bin and shovelled thence into the buckets on an endless apron which carries it upstairs and empties it into a large circular iron vat filled with water, in which a spindle armed with buckets is rapidly rotated. These buckets empty the water above the pulp, which falls to the bottom as fast as it comes into the vat. In this way a stream of clear water enters the vat continually and leaves it charged with alkali, until the pulp is perfectly cleansed. The pulp when thoroughly cleansed is removed from the vat, dried and held by the government, for sale to the paper manufacturers. The alkali used in the process is for the purpose of neutralizing the acids used in the inks with which the notes are printed.—*Washington Chronicle.*

On the Holy Scriptures: How they were used by Early Friends.—To a remark of an opponent that "they (Quakers) will not make the due use of them, (the Scriptures), because a Bible is not to be seen in all their meetings," R. Barclay replies, "We meet not to read the Scripture, but to wait on the Lord, and be taught of him, and receive from his Spirit what he pleaseth to administer, either in ourselves, or through the mouths of his servants; and we meet to worship God, whose worship

is to be performed 'in Spirit and in Truth,' and not in external reading."—*Truth Cleared.*

"We do indeed read, heartily, singly, as in God's sight, own the Scriptures,—the Scriptures written by the prophets and holy men of God, under the law, the Scriptures written by the evangelists and apostles in the time of the gospel: and we read them with delight and joy, and would draw no man from a right reading of them, to the benefit of his soul, but only from giving their own judgment on them, without the Spirit of God, lest in so doing, they wrest them to their own destruction. This is that which the Lord hath drawn us from, and which we know it would also be profitable to others to be drawn from too; to wit, from imagining and guessing the meaning of the Scriptures, and interpreting them without the opening of that Spirit, from which they were given forth; for they who do so, feed that part with a gathered knowledge, which should be furnished, die and perish, that another thing might come to live in them, and they in it."—*Pennington's Works.*

American Beef in England.—The exportation of fresh beef to England is a comparatively new trade. It averages at present one hundred and fifty carcasses a day, representing a money value of \$11,000 and \$12,000, is rapidly growing, and surpasses the sanguine expectations of those who first initiated the movement. The markets of London, Manchester, Birmingham and Sheffield are now regularly supplied with American meat at 8d. (about 16c.) per lb., while English beef costs from 10d. to one shilling. Practically the supply is inexhaustible. At present only the very choicest Ohio, Indiana, Kentucky and Missouri cattle are used for export, but we can draw to almost any extent on the prairies of the West and the plains of Texas. The possibilities of the district between the Mississippi and the Rocky Mountains as a grazing and stock raising country can hardly be computed, while the actual cost of raising cattle is almost nominal, the only expense during nine months of the year being the outlay of herding and an annual branding.

Arrangements are now being perfected to largely increase this branch of our export trade. So far the pioneers in the movement had much to contend with in the way of high charges and imperfect accommodation—naturally incidental to the establishment of a new industry. A healthy competition is likely to decrease the cost of transportation and enlarge the volume of exports. New outlets for American beef will be found at all the great centres of European population, within twelve hours of Continental seaports by rail. Boats are in the future to be built with a special view of accommodating this growing trade, which promises to be a source of great wealth to the country.—*Late Paper.*

Here and there, through the gloom of this vast howling wilderness, a patch of green reveals the drooping eye, and cheers the desert scene; here and there, amidst the straw and stubble in this great field, the earth, a few single ears are to be discovered raising their heads; and is just sufficient to show what the glory of the crop and of the harvest would have been, had it escaped the destroyer's hand, and not been trampled down by the wild beasts.—*John Barclay.*

THE FRIEND.

SEVENTH MONTH 21, 1877.

The qualification to be useful in strengthening the good in others, is not at our command, and we believe it is most likely to be dispensed to those who are sensible of their own weakness and inability, without Divine help, to do that which is pleasing in His sight. It is in this state of humility and consciousness, that in us, as men, dwelleth no good thing, that we are able to enter into sympathy with our fellow creatures, and to feel with and for them, in their various exercises and trials, and thus become prepared, when the Sun of righteousness arises upon our souls, to extend to them a word of needed counsel, or a portion of that comfort whereby we ourselves are comforted of God. To those who are called to minister in the congregations of the people, periods of stripping in which all dependence upon former attainments and self-confidence are removed, are especially useful. Our late friend Samuel Bettle, who had large experience in the spiritual warfare, was heard to say, that he had so frequently undergone an humbling dispensation previously to entering upon his ministerial services, that he should very much fear he was mistaken in proceeding upon any new engagement, without passing through such a preparatory experience.

The apostle John, in writing upon this experimental knowledge, said: "That which we have seen, that which we have heard, that which our hands have handled of the good word of life, that declare we unto you;" and it was under the sense that this knowledge could be received only through suffering, that Paul wrote, "Most gladly, therefore, will I rather glory in my infirmities, that the power of Christ may rest upon me. Therefore I take pleasure in infirmities, in reproaches, in necessities, in persecutions, in distresses for Christ's sake, for when I am weak, then am I strong."

May those who are deeply exercised in regard to the condition of the church, not grow weary of suffering, but be willing in their measure to fill up that which may remain, for the body's sake, both as individuals and in their collective capacity.

For those members of our Yearly Meetings who are bowed down under a sense of the opposition which is now made among them, to those truths which the Society has ever professed, every Friend must, we think, deeply sympathize, and desire that they may be willing to bear the trials through which they are passing, until a way is clearly made by the Head of the Church for their relief. We believe there is no cause of discouragement for these; but that through their faithfulness it may please Him who has promised that He will not leave his followers, and who can work by many or by few, again to exalt the standard which has been given to this people to display because of the Truth, and make them as a rallying point to others.

SUMMARY OF EVENTS.

UNITED STATES.—The warm season of 1877 appears likely to become known in history as the stormy summer. During the Sixth month there fell in some of the central States, from six to ten inches of rain on an average. Some of the storms that were most profuse in rainfall, were the shortest, one inch and a quarter of

rain having fallen in little over an hour. These short storms were almost uniformly accompanied with violent thunder and vivid flashes of lightning, as well as by winds of tremendous force and velocity. Throughout the whole belt of the central United States, there has been the present summer, an unusual prevalence of violent and destructive wind storms. These have sometimes taken the form of hurricanes, winds sweeping with tremendous velocity and violence over large strips of territory, and sometimes the shape of whirlwinds, when the destruction, though narrowed in its path, has been still more violent in its effects.

In the annual report of the internal commerce of the United States, it is stated that the value of the railroads of the United States is about twenty-three times the value of the shipping engaged in our foreign commerce, and that the value of our internal commerce is twenty-five times that of our foreign commerce; that 87 per cent. of the grain shipped from the west to the sea board during the same year was transported on rail lines, and that over 90 per cent. of the entire internal commerce of the country is on railroads. Although the total amount of the contributions of the Government, up to the close of 1876, in aid of railroad construction amounted to \$144,000,000, this sum is only 3 per cent. of the entire cost of the railroad system of the United States.

The manufacture of flour barrels from paper is a growing industry. They are made of straw paper pulp which is subjected to powerful hydraulic pressure, until reduced to the desired thickness. They are constructed entirely by machinery, and the halves are cut so true that any pieces of the same size will readily fit together. The advantages of these barrels over wooden ones, are lightness, cheapness, durability, and the prevention of flour sitting out while in transit.

A telescope 15 feet in length, with 11 inch object glass, has just been completed by a Boston firm, who manufactured it especially for the Portuguese Government. The cost of the instrument is about \$2000. 1732 pounds of dust gathered from the roof of the mint in this city, contained \$850 worth of gold and silver.

The best scholar in the class which was recently graduated at the University of Vermont, was a colored student, who was a slave 12 years ago.

Seven men perished from the fatal radiation of the fumes of burning anthracite coal in the Brookville Coal Company's mines near Wheatland, Pa., on the 12th inst. The coal from the mines is hauled out by a locomotive, and anthracite had been substituted for the soft coal mostly used in the engine. Besides those sufficed, the following were married: Joseph and Lucinda H. It is stated there are in the United States, 10,000 drinking saloons, and 500,000 habitual drunkards, of whom 50,000 die yearly.

News has been received from Ecuador of showers of volcanic ashes and great floods, supposed to be the result of an eruption at Cotacapi. The days and nights of volcanic ashes fell along the coast, and on the morning of the 26th inst., a frightful noise was heard at Latacunga, which was immediately followed by a tremendous flood in the rivers Catiche, San Felipe and Yanayaca. Much valuable property was destroyed, and many human beings and cattle drowned.

The number of letters, postal cards and newspapers, received and dispatched from the United States Post office during the six months of the present year, aggregates 61,440,542, being an increase of over 11 per cent. of the same period last year. Much gratification is felt by the authorities in Washington, at the sale of the four per cent. bonds. The proceeds of the sale of these bonds of business on the 14th inst. amounted to \$42,695,900. The number of investments in the city of Philadelphia for the week ending at noon on the 14th, was 441, an increase of 38 over the previous week; and a decrease of 413 from the same period last year. The number of letters produced last year a cotton crop amounting to \$250,000,000, and a corn crop worth \$1,583,000,000. Of a total agricultural product of \$1,400,000,000, the corn crop forms the largest item, being largely more than double the value of the crop which used to be called the King of American commerce.

The Markets, &c.—The following were the quotations on the 14th inst.: American gold, 105 1/2; U. S. silver, 1881, 111 1/2; new five per cent 111 1/2; 5-20s, 104 1/2; 107, 106, 1867, 109 1/2; do. 1868, 112 1/2. Cotton—sales of 285 bales molding upland at 12 1/2 cts., and New Orleans at 12 1/2 cts. Seeds of all kinds were dull—Timothy sold in a small way at 82. The flour market presented a somewhat unsettled appearance, including spring wheat flour at 47 1/2; Minnesota extra at 59 1/2; do. 59, Penna. do. do., at \$25 1/2; \$29.50; 100 lbs. Ohio do. do.

on secret terms, and other high grades at \$39.50 a 111 1/2; 6000 bushels of wheat sold at \$1.64 a \$1.68 per cwt number, and \$2 for hay. For the week there were sold 180 loads of odd, at prices ranging from \$1.10 mixed to \$1.40 for prime Timothy. Straw, 60 to 7 cts. per 100 lbs.

FOOTWEAR.—The Bank of England has in its vault upwards of one hundred million of its cancelled note. Eighteen thousand boxes are required to contain them. Their original value was \$3,000,000,000.

Signor Parnetti was engaged for the last few years in analyzing the dust and debris of the streets of Florence and Paris. His investigations of the composition of the horse paths, proves that the dust contains 35 per cent. of iron given by the shoes of the horses to the stones. In the dust from the causeways this eminent chemist finds from 30 to 40 per cent. of good glue. He contemplates placing his discoveries at the disposal of a limited company, with a view of establishing blast furnaces on the banks of the Thames, to recover the iron thus lost, and a large glue works, which, it is thought, will produce more glue from the waste material than will supply all London for every purpose.

The report of the Berlin University for the present year shows an attendance of 2,257 students, a decrease of 253 on the past year. The University Library contains but 60,000. The royal library of 70,000 volumes is that chiefly used by the students.

The amount received from indirect taxes in France the first six months of 1877, exceeded the estimate by \$5,000,000.

The latest accounts from the famine districts of Madras are somewhat gloomy. The rainfall has been slight over portions of the affected area. The number of natives on the public works and receiving gratuitous relief, have increased. There has been great mortality from disease, especially among children. The situation in Mysore is also critical. In Bombay the prospects are more cheering.

RECEIPTS.

Received from Edward Maris, M. D., City, \$2, vol. 51; from Thomas S. Pike, N. J., \$2.10, vol. 51; from Enoch Carter, Kansas, per Charles Rhoads, \$2.10 vol. 51.

WESTTOWN BOARDING SCHOOL.

A well qualified teacher of the Latin and Greek languages, will be wanted at the opening of the next session, 10th mo. 29th. Apply to Joseph Passmore, Goshensville, Chester Co., Pa. John E. Carter, 924 South 21st St., Philada. or Wm. Evans, 232 South Front St.,

FRIENDS' ASYLUM FOR THE INSANE.

Near Frankford, (Twenty-third Ward), Philadelphia. Physician and Superintendent—JOSHUA H. WORTHINGTON, M. D.

MARRIED, on the 17th of 5th mo. 1877, at Friends Meeting, Medford, N. J., JOSEPH H. HAINES to ANNA WILLS, daughter of Henry W. Wills.

—, on the 24th of 5th mo. 1877, at Friends Meeting, Smithfield, Ohio, CLAYTON HAYES, of Medford, N. J., to LYDIA B. MCGREW, daughter of the late James W. McGrew, of the former place.

DIED, on the 18th of 4th mo. 1877, LYDIA ANN, wife of Lewis Embree, in the 54th year of her age, a member of Bradford Monthly and Particular Meeting. This dear friend was of a meek and gentle spirit, and favored, through Divine mercy, to say, I see my way clear to a better world. We doubt not she has entered one of those mansions prepared for the righteous of all generations.

—, on the 17th of 5th mo. 1877, at his late residence in Germantown, M. B. ERBEN, of HARTFORD, in the 61st year of his age, a member of the Monthly Meeting of Friends of Philadelphia, for the Western District.

—, at his residence in Sewickley Township, Westmoreland Co., Pa., on the 7th of Sixth month, 1877, in the 77th year of his age, ISAAC PRICKS, a member of the Monthly Meeting of Friends of Philadelphia, Ohio. During the illness which terminated his life, he was preserved in a sweet frame of mind, signifying his willingness to depart; having a blessed assurance that through adorable mercy he would be permitted to enter into the heavenly mansions of rest and peace.

—, at her residence in Germantown, 6th mo. 23d, 1877, ELEANOR LEE, in the 92d year of her age, a member of Frankford Monthly Meeting.

PHILADELPHIA.

For "The Friend."

Observations on the Rise of the Society of Friends,
and the character and labors of George Fox.

(Continued from page 288.)

"Believing it required of him, he left home the Seventh month of 1643 and tarrying a shorter or longer time at different places, but not forming intimate acquaintance with any, he arrived in London, where he had an uncle residing, who was a Baptist. Here, as elsewhere, he was a close observer of the doctrines and practices of different professors, but they corresponded not with the standard he saw held up in the Scriptures, and learning that his relatives were uneasy at his prolonged absence from home, he returned into Leicestershire, where he remained for a time. Continuing under great sorrow and exercise of mind, not only on account of the sense given him of his own condition, as a fallen child of Adam, and his entire inability by any means at his own command to extricate himself therefrom, and also of the superficiality of the religion of those with whom he was brought into contact—many of whom, though they made much profession, appeared to know little or nothing of that transforming Grace, which, as it is obeyed, makes man a new creature—he passed some years without coming to that full settlement and peace which his soul longed for.

At this time the Episcopal Church was yet a power, and to remove his doubts and receive instruction in the way of righteousness, he often resorted to priests who had acquired high character; but, he says, "I found no comfort in them." He, however, became noted among many of different religious denominations, as a young man of remarkable experience and discerning of spirits. Although his conflicts were many, and his sorrow, at times, great, yet he was favored, through the Light of Christ shining in his soul, with many revelations respecting subjects connected with the spirituality of the gospel of Christ, and the many corruptions that had crept into and marred the professing church, but which were accepted by the people as being all right. Thus he saw, that although the members of the different denominations claimed to be believers, yet that none were true believers but those who were born of God, and had passed from death unto life; also, that 'being bred at Oxford or Cambridge was not enough to fit and qualify men to be ministers of Christ.' That Christ, as the Head of his own church,

could alone call and qualify those whom He ordains to preach the gospel of life and salvation; He first, by the transforming operation of his Grace, and the baptisms of the Holy Ghost and fire, making them practically acquainted with the gospel, as the power of God unto salvation, and thus fitting them to receive the gift. That 'God who made the world, did not dwell in temples made with hands.' As these things were so at variance with the opinions formed by his education, and generally believed, they at first almost staggered him, but he soon became convinced they were incontrovertible truths which he was bound to maintain.

"His firm belief in the deity and atonement of Christ is fully set forth in his reply to a question put to him by the priest of Drayton. He says, this priest asked me, 'Why Christ cried out upon the cross, "My God, my God, why hast thou forsaken me?" And why, He said, "If it be possible, let this cup pass from me; yet not my will, but thine be done?" I told him; at that time the sins of all mankind were upon him, and their iniquities and transgressions, with which he was wounded; which He was to bear and to be an offering for, as He was man, but did not as he was God; so in that He died for all men, tasting death for every man, He was an offering for the sins of the whole world. This I spoke, being at that time, in a measure, sensible of Christ's sufferings.' [1645.]

"As George Fox was the first and the principal instrument made use of by the Head of the Church, in gathering and founding the Society of Friends, it seems right to give a more detailed account of his religious exercises, and the gradual unfolding to his understanding, by the same Spirit that dictated the Scriptures, of the doctrines and testimonies of the gospel as believed in and held by Friends, than can be expected of others, in this account of the rise of the Society. The following passages are therefore taken from his journal:

"1646. 'Though I had great openings, yet great trouble and temptations came many times upon me, so that when it was day I wished for night, and when it was night I wished for day; and by reason of the openings I had in my troubles, I could say as David said, "Day unto day uttereth speech, and night unto night showeth knowledge." When I had openings they answered one another, and answered the Scriptures; for I had great openings of the Scriptures; and when I was in troubles, one trouble also answered to another.'

"1647. 'I fasted much, walked abroad in solitary places many days, and often took my Bible and sat in hollow trees and lonesome places till night came on; and frequently in the night walked mournfully about by myself; for I was a man of sorrows in the time of the first workings of the Lord in me.

"During all this time I was never joined

in profession of religion with any, but gave up myself to the Lord, having forsaken all evil company, taken leave of father and mother, and all other relations, and travelled up and down as a stranger in the earth, which way the Lord inclined my heart; tarrying sometimes more, sometimes less in a place: for I durst not stay long in a place, being afraid both of professor and profane, lest, being a tender young man, I should be hurt by conversing much with either. For which reason I kept much as a stranger, seeking heavenly wisdom and getting knowledge from the Lord; and was brought off from outward things, to rely on the Lord alone. Though my exercises and troubles were very great, yet were they not so continual, but that I had some intermissions, and was sometimes brought into such an heavenly joy, that I thought I had been in Abraham's bosom. As I cannot declare the misery I was in, it was so great and heavy upon me, so neither can I set forth the mercies of God unto me in all my misery. O the everlasting love of God to my soul, when I was in great distress! when my troubles and torments were great, then was his love exceeding great.'

"But as I had forsaken the priests, so I left the separate preachers also, and those called the most experienced, for I saw there was none among them all that could speak to my condition. And when all my hopes in them and in all men were gone, so that I had nothing outwardly, to help me, nor could tell what to do, then, O then, I heard a voice which said, "There is one, even Christ Jesus, that can speak to thy condition." When I heard it, my heart did leap for joy. Then the Lord let me see why there was none upon the earth that could speak to my condition, namely, that I might give him all the glory.'

"My desires after the Lord grew stronger, and zeal in the pure knowledge of God, and of Christ alone, without the help of any man, book, or writing. For though I read the Scriptures that spake of Christ and of God, yet I knew Him not but by revelation, as He who hath the key did open, and as the Father of life drew me to his Son by his Spirit. Then the Lord gently led me along, and let me see his love, which was endless and eternal, surpassing all the knowledge that men have in the natural state, or can get by history or books.'

"One day, when I had been walking solitary abroad, and was come home, I was taken up in the love of God, so that I could not but admire the greatness of His love; and while I was in that condition, it was opened unto me by the eternal light and power, and I therein clearly saw, That all was done and to be done in and by Christ; and how He conquers and destroys this tempter the devil, and all his works, and is atop of him; and that all these troubles were good for me, and

temptations for the trial of my faith, which Christ had given me. The Lord opened me, that I saw through all these troubles and temptations. My living faith was raised, that I saw all was done by Christ the life, and my belief was in him.

"As the Light appeared, all appeared that is out of the Light; darkness, death, temptations, the unrighteous, the ungodly; all was manifest and seen in the Light. After this, a pure fire appeared in me; then I saw how I sat as a roofer's fire, and as the faller's soap. Then the spiritual discerning came into me; by which I discerned my own thoughts, groans, and sighs; and what it was that veiled me, and what it was that opened me. That which could not abide in the patience, nor endure the fire, in the Light I found to be the groans of the flesh, that could not give up to the will of God; which had so veiled me, that I could not be patient in all trials, troubles, anguish, and perplexities; could not give up self to die by the cross, the power of God, that the living and quickened might follow Him, and that that which would cloud and veil from the presence of Christ, that which the sword of the Spirit cuts down, and which must die, might be kept alive. I discerned the groans of the Spirit, which opened me, and made intercession to God: in which Spirit is the true waiting upon God, for the redemption of the body, and of the whole creation. By this true Spirit, in which the true sighing is, I saw over the false sighings and groanings."

"The Lord God opened to me by his invisible power, how 'Every man was enlightened by the divine light of Christ.' I saw it shine through all, and that they that believed in it came out of condemnation to the Light of life, and became the children of it; but they that hated it, and did not believe in it, were condemned by it, though they made a profession of Christ. This I saw in the pure openings of the Light without the help of any man; neither did I then know where to find it in the Scriptures; though afterwards, searching the Scriptures, I found it. For I saw in that Light and Spirit which were before the Scriptures were given forth, and which led the holy men of God to give them forth, that all must come to that Spirit, if they would know God or Christ, or the Scriptures aright, which they that gave them forth were led and taught by."

"These exercises and openings appear to have been experienced by George Fox, when between the twentieth and twenty-fourth years of his age. Having been thus prepared by the baptism of the Holy Ghost and fire, and received a call from his divine Master to enter upon the work of the ministry, his first recorded appearance as a preacher of the Gospel, was in 1647, at Duckfield and Manchester; where, he says, 'Some were convinced, who received the Lord's teaching, by which they were confirmed and stood their ground.'"

(To be continued.)

If my small experience has taught me anything in this best of schools, the Divine Teacher instructs in stillness, and leads gently along; the docile learner scarcely perceives the progressive steps of attainment.—*Mary Capper.*

For "The Friend."

"Across Africa."

(Continued from page 286.)

"The appearance of a new moon during this halt caused us some trouble. To celebrate the event according to Mohammedan custom our askari commenced firing their rifles, and would not desist when I desired them to do so. One man to whom I had individually spoken discharged his rifle in spite of my orders, upon which I had him disarmed, and promised punishment on the morrow. Another then suggested that I had better punish them all, as it was their custom and they intended to follow it; and him I also disarmed. This custom of firing on the occasion of the new moon was not only a waste of ammunition but was also very dangerous, as the men never looked in what direction their rifles were pointed, but sent the bullets whizzing about the camp, I therefore determined to put a check upon the practice."

"The halt being long, I went, with my dog Leo as a companion, to look around, and noticed some well-constructed fences and pit falls for game. One of these pit falls had been cleverly placed in a slight gap in a fence, which I thought was merely a weak spot. Fortunately for me, Leo jumped on the covering just as I was about to step on it, and exposed the trap by falling through, thus saving me from a tumble. The pit was so deep that it was with difficulty I managed to pull the unfortunate dog out. After our rest, we toiled on through alternating tracts of jungle and prairie; the grass had been burned in many places, leaving miles of country blackened and charred, while the gritty ashes filled our mouths, ears and throats. Sunset came upon us, and yet we had found no water; and not until nearly 8 P. M. did we find a pool of liquid mud, with which we were obliged to be content. Shortly after moving onward the next morning, some tolerably clear water lying in a cavity in a bed of granite gladdened our eyes. Directly we sighted it, the men threw down their loads, and in a moment men, dogs, and donkeys were all slaking their thirst at one and the same time."

It required about five months for the caravan to reach Unyanyembe, a large and friendly Arab settlement about 400 miles from the coast. Cameron considered this the end of the first stage of his journey across Africa. He was delayed here more than two months by the frequent and numerous desertions of his pagazi (porters) and by the severe and almost constant attacks of fevers to which the three white men of the party were subject. One of the peculiarities of this fever is to produce partial or total blindness, which rendered it necessary for Dr. Dillon to turn back from this point, but he died before reaching the coast. Whilst here they heard of the death of Dr. Livingstone, and his body returning before their departure, Lieut. Murphy considered that the great object of the expedition had been completed, resigned his commission and returned home. This left V. L. Cameron to proceed alone on his perilous journey with no other companions than the natives he hired to assist him; and it frequently happened that through their ignorance or treachery he was far worse off with their assistance than without it. Speaking of Arab hospitality he says:

"In answer to our formal announcement of arrival we received a letter the following

morning from Said ibn Salim, the governor inviting us to breakfast with him, and stating that he had a house at our disposal during our stay at Unyanyembe. We at once proceeded to his residence at Kwiwarah, and were welcomed most warmly, and found prepared for a capital breakfast of curried fowl, wheat cake, butter, milk, coffee, and tea. To this meal we did such ample justice that I fancy we must have rather astonished our host. Our appetites being appeased, the governor, accompanied by many other Arabs, who had gathered together to welcome us, conducted us to the house in Kwiwarah, and when we had been shown over the premises, left us to make ourselves comfortable at home. The house—which had previously been lent to Livingstone and Stanley—was a large and substantial building of mud bricks, with a lat roof.

"In the afternoon Said ibn Salim called to acquaint us that on the morrow we should pay visits to the principal Arabs, and that the most convenient arrangement would be for us to commence the day by breakfasting with him. A harder day's work than we anticipated was in store for us; and had we known what making calls upon all the Arabs involved, we should not have so readily undertaken it, although the customs of a country must be observed.

"We began with a sumptuous breakfast with Said ibn Salim, after which he conducted us with much state and ceremony, to pay the promised round of visits to the local magnates. According to usage, we were expected to eat and drink at every house we entered; but though doing our utmost to show appreciation of the kind intentions of our hosts, our capacities were but limited, and I am afraid we were scarcely equal to partaking of the proffered hospitality to the extent they would have wished. The Arabs at Unyanyembe live in great comfort, having large and well-built houses, with gardens and fields, in which they cultivate wheat, onions, cucumbers, and fruits introduced from the coast. They maintain constant communication with Zanzibar in peaceful times, and thus obtain supplies of coffee, tea, sugar, soap, candles, curry-powder and various luxuries.

Two days after our round of visiting and entertainment, I was attacked by fever, Dillon and Murphy quickly followed suit. Indeed during our stay here we passed the greater part of our time down with fever. The pagazi engaged for the journey to Unyanyembe having taken their departure after payment, those whom we had hired by the month apparently thought this a favorable opportunity for going on a strike, and demanding two months' pay in advance. As long as possible I resisted, but ultimately agreed to advance one month's wages. They would have deserted en masse had I not yielded to some extent, and some fifty or sixty deserted after obtaining this partial compliance to their demands. Although the more respectable Arabs show us great kindness and rendered much assistance, I am compelled to add that many of the smaller traders threw every possible obstacle in our way, tempting our men to desert, and even carrying them off against their will. Several attempts were made at starting from Unyanyembe, but were unsuccessful, owing to the pagazi I engaged so constantly deserting. They were always paid in advance, or being engaged, according to custom, and at last it almost amounted to paying a man, feed

ing him a few days, and then seeing his face more."

During their stay at Unyanenbe they were all sick with the fever; at one time, reporting which Dr. Dillon afterwards wrote, "On about (none of us know the date correctly) Aug. 13th, we were all taken sick. I felt determined not to be sick. 'I will eat dinner; I'll not go to bed.' I did manage some dinner; but shakes enough came on, and I had to turn in. For the next four or five days our diet was water or milk. The servants knew not what to do. We got up when we liked, and walked on. We knew that we felt giddy, and that our legs would scarcely support us. I used to pay Cameron visits and he came to me to make complaints. I told Murphy I was sorry I could not get away sooner to call on him; but I had the king of ganda stopping with me and I must be civil to him as we would shortly be in his country. Murphy pretty well dozed off his fever, but I ever went to sleep from beginning to end. We all got well on the same day, about, I suppose, the fifth (of the fever) and laughed heartily at each other's confidences. The Arabs sent every day to know how we were, and called themselves, bringing sweet limes, pomegranates, or custard apples."

Some of the symptoms of the fever are thus described: "A slight headache is felt, the patient feels that he must lie down though he does not feel ill. The next morning he ainks or tries to walk across the room; he finds that he must allow his body to go wherever his foot chooses to place itself, and a very eccentric course the poor body has to take sometimes in consequence. Drink! drink! Drink! cold water, milk, tea—any thing. Bail out of a bu-keet, or drink it out of the mouth of a tea pot." "Out of forty-five days I had one fever of eight days, one of seven, one of five, one of four, and now just getting well of a violent headache which lasted five days."

Two weeks later he writes: "Since I last wrote I have been quite blind of both eyes, and very bad indeed with fever; so I have been helpless. The above is sufficient to show how constantly we were ill, and of this the men took advantage to absent themselves, cannot speak too highly of the behavior of the upper classes of the Arabs towards us. When we were ill, they called or sent daily to inquire for us, and limes, tamarands and their fruits were constantly sent us, besides fresh presents as a bullock, a goat, a dozen owls, or a basket of eggs. In our intervals of convalescence we used to return their calls, and were always warmly received."

(To be continued.)

John Woolman.

For "The Friend."

We as individuals, and as members of a religious Society, appointed to take higher ground than other professors in that all-important attainment, even to be "built up, an abidance of God, through the Spirit," are duly called to let our moderation be known of all men in all things; to be a plain, self-denying, cross-bearing, God-serving people; to be such as were declared unto the children of Israel from the mount Sinai: "Now therefore, if ye will obey my voice indeed, and keep my covenant, then ye shall be a peculiar treasure unto me." "And ye shall be unto me a kingdom of priests, and a holy nation." Or, as represented at a later

day by the apostle Peter: "Ye are a chosen generation, a royal priesthood, an holy nation, a peculiar people; that ye should show forth the praises of him who hath called you out of darkness into his marvellous light." Well, what will sooner make "peculiar" in an ever-changing world like this, than swimming against its current; not being conformed to its spirit, nor following its customs and fashions; acknowledging Christ in privacy of life and conversation before men as those who believe and feel God present; and thus endeavoring to walk in the light of the Lamb, as, according to Holy Scripture, the nations of them that are saved must do. William Penn, in writing of the Friends in his day, declares: "It was visible to them that know us, that we did not think ourselves at our own disposal, to go where we list, or say or do what we list, or when we list. Our liberty stood in the liberty of the spirit of truth; and no pleasure, no profit, no fear, no favor could draw us from this retired, strict, and watchful frame."

These requisitions may seem hard to flesh and blood, or to the unrenewed mind and heart of men; but wherein can abatements be made? How many portions of Holy Scripture, alike applicable to all time, agree with and confirm what the apostle Paul so solemnly represents: "If ye live after the flesh, ye shall lie; but if ye through the Spirit do mortify the deeds of the body, ye shall live. For," he continues, "as many as are led by the Spirit of God, they are the sons of God." Well, is not this indwelling Spirit of the Saviour, by which we are to be "led," the same Spirit of truth or Comforter, which the dear Son and Sent of the Father declared to His disciples, "Shall testify of me;" "shall bring all things to your remembrance whatsoever I have said unto you;" "Shall be in you;" "Shall teach you all things;" "will guide you into all truth;" and "shall abide with you forever."

Upon which it may queried, what more can we ask or can be done for us, than is embraced in this new covenant of light and life of which Christ Jesus is the ever adorable Mediator? Is it not the glorious fulfilment and realization of the promise: "Thy teachers shall not be removed into a corner any more, but thine eyes shall see thy teachers; and thine ears shall hear a voice behind thee, saying, 'This is the way, walk ye in it, when ye turn to the right hand, and when ye turn to the left.'" As also that: "Thus saith the Lord, thy Redeemer, the Holy One of Israel; I am the Lord thy God which teacheth thee to profit, which leadeth thee by the way that thou shouldst go." &c. What more, we repeat, can be asked, after all that has been done for us, than submissive wills, and contrite obedient hearts, on our parts, that we may indeed become "sons of God," not only by creation and purchase, but by adoption—being born again, not of corruptible seed, but incorruptible, by the word of God, which liveth and abideth forever?"

These thoughts have arisen in consideration of the world-renouncing, heaven-seeking example of John Woolman, who was one of "a chosen generation," afore alluded to; one of "a peculiar people," because of his lowly walk in obedience to the cross of Christ; and at the same time one "zealous of good works," being remarkably careful to keep in true humility; to avoid luxury and superfluities; and in all things to make the standard of Truth manifested to him, the measure of his obedience.

He records, "I was born at Northampton, in Burlington county, West Jersey, in the year 1729; and before I was seven years old I began to be acquainted with the operations of Divine love. Through the care of my parents, he continues, I was taught to read nearly as soon as I was capable of it; and as I went from school one seventh-day, I remember while my companions went to play by the way, I went forward out of sight, and sitting down, I read the twenty-second chapter of the Revelations: "He showed me a pure river of water of life, clear as crystal, proceeding out of the throne of God and of the Lamb, &c.; and in reading it, my mind was drawn to seek after that pure habitation, which, I then believed, God had prepared for his servants. The place where I sat, and the sweetness that attended my mind, remain fresh in my memory."

This, and the like gracious visitations, had such an effect upon me, that when boys used ill language, it troubled me; and through the continued mercies of God, I was preserved from it."

After some acquaintance with the Holy Scriptures, he writes: "From what I read and heard, I believed there had been in past ages, people who walked in uprightness before God, in a degree exceeding any that I knew or heard of, now living; and the apprehension of there being less steadiness and firmness amongst people in this age than in past ages, often troubled me while I was a child."

Having attained the age of sixteen years, J. W. began to love wanton company; and perceived a plant in him which produced many wild grapes. Yet his merciful Father forsook him not utterly, but at times, through his grace, he was brought seriously to consider his ways; and the sight of his backslidings affected him with sorrow; but for want of rightly attending to the proofs of instruction, vanity, as he represents, was added to vanity, and repentance to repentance. "Upon the whole," he says, "my mind was more and more alienated from the Truth, and I hastened toward destruction. While I meditate on the gulf toward which I travelled, and reflect on my youthful disobedience, for these things I weep, mine eye runneth down with water."

Advancing in age, the temptations of the world and deviations from the narrow way increased upon him. He writes at this period, "I knew that I was going from the flock of Christ, and had no resolution to return; hence serious reflections were uneasy to me, and youthful vanities and diversions my greatest pleasure. Running in this road I found many like myself; and we associated in that which is the reverse to true friendship."

"But in this swift race," he tells us, "it pleased God to visit me with sickness, so that I doubted of recovering; and then did darkness, horror and amazement, with full force, seize me, even when my pain and distress of body were very great. I thought it would have been better for me never to have had a being, than to see the day I now saw. I was filled with confusion; and in great affliction, both of mind and body, I lay and bewailed myself. I had not confidence to lift up my cries to God, whom I had thus offended; but in a deep sense of my great folly, I was humbled before him; and at length, that word which is as a fire and a hammer, broke and dissolved my rebellious heart, and then my

cries were put up in contrition; and in the multitude of his mercies I found inward relief, and felt a close engagement, that if he was pleased to restore my health, I might walk humbly before him."

Though as acknowledged by him, J. W. subsequently experienced some relapses into his former state of folly, yet from this period, as appears from the journal of his life, he was blessed with renewed visitations, and enabled more effectually to pray to his Father in heaven against those temptations which at times closely beset, so as more steadily to gain that victory over the world, the flesh, and the devil, which the Saviour's grace is not only vouchsafed to accomplish, but is *sufficient* for the need of each one of us, being made perfect in weakness. He says: "I sought deserts and lonely places, and there with tears did confess my sins to God, and humbly craved help of him. I may say with reverence, he was near me in my troubles, and in those times of humiliation opened my ear to discipline. I was now led to look seriously at the means by which I was drawn from the pure truth, and learned this, that if I would live in the life which the faithful servants of God lived in, I must not go into company as heretofore in my own will; but all the *cravings of sense must be governed by a Divine principle.*"

"As I lived under the cross, and simply followed the openings of Truth, my mind, from day to day, was more enlightened; my former acquaintance were left to judge of me as they would, for I found it safest for me to live in private, and to keep these things sealed up in my own breast. While I silently pondered at that change wrought in me, I find no language equal to describe it, nor any means to convey to another a clear idea of it. I looked upon the works of God in this visible creation, and an awfulness covered me; my heart was tender and often contrite, and universal love to my fellow-creatures increased in me: this will be understood by such who have trodden in the same path."

Thus digging deep and carefully laying the foundation of the spiritual building upon Christ Jesus the unchangeable eternal Rock, J. W. was, through "the washing of regeneration and renewing of the Holy Ghost," given to experience the rearing of "an habitation of God through the Spirit," to the praise and glory of Him with whom there is mercy and plenteous redemption; so that his heart could, about five years before his peaceful death, give utterance to the following:—"The Lord, who was the guide of my youth, hath in tender mercies helped me hitherto; he hath healed me of wounds, he hath helped me out of grievous entanglements; he remains to be the strength of my life; to whom I desire to devote myself in time, and in eternity."

On the bed of death he uttered the following remarkable prayer:—"O Lord God, the amazing horrors of darkness were gathered around me and covered me all over, and I saw no way to go forth. I felt the depth and extent of the misery of my fellow-creatures separated from the Divine harmony, and it was heavier than I could bear, and I was crushed down under it. I lifted up my hand, I stretched out my arm, but there was none to help me. I looked round about and was amazed. In the depths of misery, O Lord! I remembered that thou art omnipotent, that I had called thee Father, and I felt that I

loved thee, and I was made quiet in thy will, and I waited for deliverance from thee. Thou hast pity upon me when no man could help me. I saw that meekness under suffering was showed to us in the most affecting example of thy Son, and thou taught me to follow him, and I said, thy will, O Father, be done."

John Woolman died at York, England, the 7th of the Tenth month, 1772.

(To be concluded.)

The Philadelphia Mint.

From the *Philadelphia Inquirer* we extract the following interesting account of the working of the Mint.

The double eagles are turned out from this cutting machine at the rate of 245 each minute. In the machines used for cutting strips for dimes and smaller change, 550 are cut every minute. The planchets, or the round pieces made ready for stamping, are sent to the superintendent of the stamping room, and the strips from which they are cut are bundled up and melted over again.

The most important addition that has lately been made to the working force of the mint is a huge press, called the Ajax, which is one of the two largest coining machines in existence.

It was built in this city for the special purpose of coining double eagles and trade dollars. It is a press of new design and of great beauty. It gives a pressure upon each "planchet" of one hundred tons, and turns out the completed coin fast enough, though not so rapidly as the smaller machines used for smaller coin. They give less pressure. The small machines put ten tons weight upon dimes, five cent pieces and cents, and the quarters and half dollars pass under forty tons pressure.

In reply to the question "How can you be certain of the proper weight to each piece,"

"That is a matter hard to accomplish," the chief clerk said, "and we are allowed a small margin for variation by act of Congress. In the manufacture of most coins we are allowed less than one thousandth part for variation. But we keep within the limit. When the planchets come in here they are weighed in bulk, and the keeper of the room where they are cut, must, of course, make up the amount of metal with which he is charged by the weight of these and of his punctured strips. The planchets are passed to the weighers who sit before the scales and test each piece. Those whose weight is correct are passed to the coining press, those that are too light are sent back to be melted over, and those too heavy are filed down.

"We never lose anything; the dust that falls into the buckskin aprons of the weighers is thrown upon the floor and is gathered up at the annual sweeping. We have just finished cleaning up, and not a dollar is missing. Our sweepings have brought us \$22,000. We swept the roof of the mint and the roof of this church just west of us for deposits that had lodged upon it from the smoke stack. The wall in the cellar, into which the water flows from the roof, was cleaned out, and the deposits gained, with those in the crucibles, ground up for assay, were added to the sweepings. Stealing has never been known in the mint. The superintendent of every room is dependent upon his men, who give no bail, and over whom no special watch is made. They are all honest. Two hundred and fifty persons are employed here. But when the evening's accounts are

settled nothing is ever missing except the few grains of wastage."

The year's product of all kinds of coin stated to have been as follows, viz: Gold 494,020 pieces, valued at \$9,803,564.00 Silver 36,145,200 pieces, valued at \$11,449,935.00.

Base (cents and five cent pieces) 4,196,550 pieces, valued at \$62,165.00. Total 40,855,720, valued at \$21,310,664.00.

"Is all this work done for the government?" "No. Government owns all the metal that is coined into pieces of less than half a dollar, others are coined mostly for private parties. There is no charge for coining gold. For trade dollars the government makes a charge of \$1.25 for each hundred pieces. We have had a great deal of business in making trade dollars. Trade dollars are not a legal tender. They are an article of merchandise, and their demand upon us is governed by the state of the foreign trade. Just now it is heavy. Trade dollars were designed originally to give our coin a place in the markets of China, India and Japan. For two hundred years these countries have been the pool into which the silver product of the world has been poured. The statements are that they are not yet supplied half as well as Western nations. They use silver in the arts more generally than we do, and what silver goes to the East never returns. When it gets to Calcutta the India Mint coins it into rupees. We never melt rupees here. Mexican dollars have been the favorite in those countries, and our merchant demanded a coin of equal intrinsic value. Our trade dollar contains 420 grains, an excess of 7½ grains over the standard American dollar. The trade dollar now has a footing in Asia.

The working capacity of the Philadelphia Mint was never so large as now. The great demand for subsidiary coin by the government kept the machines at work fourteen hours a day during a great part of last year. It is stated that the establishment is now fully equal to any demand that may be made upon it. Another heavy year's work is expected.

Reflections.

Seventh mo. 5th, 1877.

We gather to the country "meeting" place. The house is not an ancient structure with high backed benches, broad gallery form and many divisioned partition, suggestive of the worthies of early provincial times, but is, nevertheless, substantial and commodious; with friendly plainness and neatness throughout, a legacy of zeal and excellence of our own fathers just passed, almost as a complete body, from our midst. The grounds are ample, with the long comfortable shedding, and the requisite enclosed grave-yard; the turf that greens this receptacle of the dead, fresh and soft by the plentiful showers from the great Creator. Birds of the air send forth their glad and varied notes of music, sufficient indeed to charm the listening ear, from the beautiful shade-trees planted by the hands of the fore-thoughted generation alluded to: while the balmy breezes blow and murmur through the leaves with a song of their own, delightful to the senses. All nature and this handiwork of God is perfect in its kind. Man alone is lacking; and is this because of his free-agency? because he will not choose or accept wisdom?

We enter the place of worship, and where are the worshippers? Long benches stand

waiting occupancy; few, if any, even halted with attendants; some, especially those of the "fore-part," designed for the more aged assistant members or the officers of the meeting, entirely vacant. Yet a little band are here, even of those who make no appearance. "Friends," and who are not in membership. What brings this class, and many of the apparently nominal members, is a question that often arises, (tenderly acceptable though their company be,) seeing there is seldom any other manifestation of concern for the welfare of the immortal part. Whether or not it be the call in the secret of the heart to pliness partly yielded to, and much stifled with such a language as this (to Him who is a alone God and loves only the sacrifice of an individual heart.) "will not this presenting of the body be sufficient till the end draws near, when I will give my whole attention to these things." I say, whether or not it be this, is not ours to judge, but is a state to deprecate and to beware of, and to lend a helping hand to, by an example of daily faithfulness, or as otherwise abilitated by Divine grace and authority.

May the stripped number of true worshippers and burden-bearers, whose hearts on these occasions as well as at other times do bow to their heavenly Father under the sense of their responsibility, not be discouraged because of their individual feebleness; but with a lively sense of their accountability, and of time so transitory, diligently apply themselves to the precious instructions supplied according to the need of every one, that thus, spiritually enriched, they "grow up into him in all things, which is the head, even Christ." Let one waste time and their Master's "goods" through a disconsolate looking at the one or two talents which they may deem themselves entrusted with, but humbly fulfilling that diligent spirits will find to do, they will now an increase of treasure, and in the end experience the blessed answer of acceptance.

An Explanation of some Mining Accidents.—The Virginia City (Nevada) *Enterprise* says: A review of the recent disastrous discharges of exploders in the Sutro Tunnel, some interesting experiments have been instituted by Mr. Sutro with a view of ascertaining the cause, and more especially to determine whether the electricity of the body might not have, in this high altitude, something to do with it.

Electric exploders made by different persons were placed in a strong wooden box, which again was placed in another box in Mr. Sutro's parlor. This room is covered with a heavy Brussels carpet, walking over which uses the human body to be speedily charged with electricity. Mr. Hancock, the chief experimenter, assisted in the experiments, and held the wires, while Mr. Sutro walked round the room two or three times with slippers, sliding his feet gently over the carpet. After doing this he approached the end of one of the wires with his fore finger, and instantly a loud report was heard, the exploder having been exploded.

The first experiment was with one of the San Francisco Giant Powder Company's exploders. Then one of the Electric Construction Company's was tried, without effecting a discharge. Next, one of Geo. M. Mowary's, of North Adams, Mass., was used, which did not go off on the first trial, but did on the second with a very loud report. After

this another of the giant exploders was tried, which went off by the time Mr. Sutro's forefinger had reached within two or three inches from the end of the wire.

Instructions were is-sued to the miners for handling them hereafter, and a sheet iron plate was placed in the floor of the exploder house, to which is connected a wire reaching into the water flowing from the tunnel. The men in handling exploders now stand on this iron plate, and have instructions to wet their boots before entering, and to put on india rubber gloves before touching the exploders. —*Late Paper.*

MY CHILDHOOD'S HOME.

The sunbeams rest with a tender light
On the place of my childhood's home,
And smile thro' the waving boughs as bright,
As in other days they shone.
The croaklet's music is sounding still,
From the bough where the violets grew,
It wakes in my heart the olden thrill,
The spring of my lifetime knew.

But the hand of the stranger trains the vine
That clings by the lattice now,
And decked for other eyes than mine
Is the fragrant lilac bough.
The oriole builds his swinging nest,
In the spot he has chosen long,
But I watch no more the flaming breast
Swell forth with its tide of song.

The pictures throng on memory's walls,
O, hues of my early years,—
Lovel' voices speak, then the silence falls,
And mine eyes are dimmed with tears.
O, orchard blooms that have drifted down
On forms that are passed away,
O, path by familiar footsteps worn,
Ye sadden the heart to-day.

Here on the porch the moonlight fell,
Thro' the peace of the summer night;
The evening star o'er yon sunset hill,
I've watched till it sunk from sight;
Here is the room where the dear home band
By the winter fireside met,
Oh! 't needeth not th' enchanter's wand
For my vision to get it yet.

And here—tread low—for the hand of Time
Is pressed on the heart-strings now,
The quivering chords with an anguished chime
Give forth but a sound of woe,
That gathers strength as the years roll on,
And the seasons go and come,
For here, the soul of our sainted one,
Went up to her Father's home.

Aye, sacred still unto every thought,
Each spot that her presence blest;
Ah! mother, dear, there are changes wrought
In our old loved valley nest.
Can the spirit look from its glorious height
On the struggling children here,
Who may only walk by faith, not sight,
And who miss thy guide and cheer?

We have passed beyond that roof tree's shade;
Life's noonday of toil is o'er,
But as thou taught us still we strive
To cherish its wayside flowers;
And though at times our hearts may yearn
For some beautiful moment o'er,
And unto the dear old homestead turn,
With longing intense and sore,

Yet we feel that a wiser Hand than ours,
Hath guided and plann'd our way,
Poured blessings down in th' richest showers,
And taken but to repay;
And we mourn no more the vanished past,
But treasure it sweet and pure,
To be held as a gracious memory, fast,
While reason and time endure.

As a wise child maketh a happy father, so
A wise father maketh a happy child.

The Wonders of the Southern Seas.

Selected.

In a lecture to workmen, at Glasgow, Sir Wyville Thomson described some of the strange things he saw during the voyage of the Challenger. He said the 16 or 17 families who reside on the island of Tristan d'Acunha, which is about half way between the Cape of Good Hope and Cape Horn, have suffered so much from violent gales, that they never build their cottages of blocks of stone—a sort of soft volcanic tufa—of four or five feet square, in order to enable them to withstand these storms. The wind was sometimes so violent that these blocks, when being brought down from the quarry, were lifted bodily by the wind. As there was no mortar on the island, all the stones were dorettailed into each other, and it was curious to see the people building these cottages. Very frequently wrecks occurred on the island, and a number of large spars were picked up on the shore as the remains of lost vessels. They got two or three of these spars, and laying them up against the wall at a low angle, had them carefully greased, and, by a method which was known to have been used in Assyria and ancient Egypt, they gradually moved on rollers and slid up these blocks to the top of the wall, when they were fixed in their places. Tristan d'Acunha is one of a little group of three islands, one of which is called Nightingale Island. It was covered with tussock grass seven, eight, or nine feet in height; and from the top of these tussocks, grass sprang about an inch and a half in height. The tussock grass became matted so as to form a very dense jungle, through which it was difficult to crush. Long avenues ran between the tussocks, covered with slippery wet clay, and on the ground were multitudes of penguins. These birds had millions of nests under the long grass. It was impossible to pass a single yard along these avenues without crushing the young birds or the nests, while the old penguins all around made the most frightful din, and jagged the legs of the traveller, their long sharp beaks drawing blood at every stroke.

These penguins were a most extraordinary sight. They were perfectly tame, in the first place, because they did not know any reason for fear from proximity to man; and, secondly, because they had really no means of escape. They stood from 12 to 23 feet in height. Their nests were little flat clay erections, about two inches in height. The bird laid one, sometimes two eggs, and to hatch them it sat on the nest upright. It was a singular sight to see the birds sitting on their eggs in the space between the tussocks. Some six or eight acres were covered with them. At certain times, perhaps, a thousand of these penguins would come out from the various lanes and walk down to the sea. Whenever they got to the water they threw themselves down and squatted into it. The moment they were in the water they acted just as if they were fishes. The gray groove in their backs was occasionally seen above the surface, but it was scarcely possible to imagine they were birds—they looked just like gray mullets. Having fished for a while, they returned to their nests by a regular path, which was beaten as flat as a sheep walk. The whole was carried out by a regular system, the birds going to the sea by one path and returning by another. Sometimes they would stand and have a talk for a while, apparently a regular chattering going

on; then all of a sudden they would stand at attention, and each proceed to its particular nest.

In September, 1874, the expedition visited Arru, and the lecturer went on shore at a curious town called Dobbo, where the woods in the neighborhood are filled with flocks of the great bird of paradise—an exquisitely beautiful creature, the hunting of which is the principal occupation of the inhabitants of Arru. This bird has a most magnificent plume of feathers, of a delicate yellow color, coming out from under the wings, and falling over the back like a jet of water. The breast was a brilliant emerald green, and the body a beautiful yellow. These birds were much admired by the semi-savage tribes, and fetched large prices. They were about the size of a small pigeon, and had a voice not very unlike the jackdaw—in fact, they were allied to the crows. They were restless, peculiar birds, and flew about the branches of great trees. They were constantly chattering, but being much hunted they were very wary, and it was difficult to get them shot. The natives had a peculiar way of killing them. They went up into the boughs of a tree which the birds were known to frequent, and, collecting a number of the branches, they concealed themselves so that they could scarcely be seen; then, when a flock came, they picked off the birds with arrows with blunt heads. These arrows were of course quite noiseless. The bird was simply paralysed and fell, and in that way the natives sometimes got a large number of the flock.

Of the people of New Guinea, the lecturer said the men were all perfectly black, and had their hair dressed in the height of the fashion of New Guinea. It stood far out from the head, and was finely and delicately frizzled, and dressed in a peculiar way into an irregular mop, into which they had stuck six or eight feathers about one and a half or two feet long. These were made up of several feathers—perhaps a black one and then a white one, and so on. Besides that, a great number of them wore a wreath of hibiscus bloom, of the brightest scarlet, on the hair. Many of them had a couple of boar's teeth through their noses. They had also a band worked in some way over their bodies, and into it, just at the shoulder, was stuck a branch of plant, which had a narrow leaf of a pale green color, mottled with white. These leaves were from one and a half to two feet long, and were so placed behind the shoulder as to give the appearance of a wing. They had also generally a large breast-plate hung round their neck, and it was ornamented with a scarlet color. Otherwise they had no clothes whatever, anything in the way of covering being simply for the purpose of ornament.

At Marion Island, in the neighborhood of Kerguelan Island, the naturalist found the albatrosses sitting on their nests. They wanted to get a number of the eggs of these birds, and when they landed and went among them the birds remained quietly on their nests. When the members of the expedition went nearer to them they began to clatter with their beaks, and now and then gave a squall. They never offered to rise, and the only way to get the eggs was to get a stick, put it under the neck of the albatross, and shove off the bird, which fell sprawling on the ground beside the nest. The egg was then abstracted, and the bird gradually gath-

ered itself up and sat down upon the nest again, as if the eggs were still there. It looked, indeed, a very stupid bird. It was, however, totally different when it got into the air. It had considerable difficulty in rising. It moved along a little way, and made several attempts before it succeeded. If it could get to a rising hummock where it could throw itself off it was all right, as it got the air under the wings, and then it began to rise. The moment it soared into the air it was a perfectly different creature. The wings could not be seen to move as they soared about in the most graceful and beautiful curves. On coming down near its nest it made an attempt once or twice, and ultimately, as if losing all control of itself, tumbled down head foremost, and it was some time before it could gather itself together again and get its wings all right. In the Island of Marion there were also the penguins, and mixing with these penguins was another little bird, something like the fan-tailed pigeon. These went always in pairs, and fed upon the eggs of the penguin. When they were bent on feeding, one would go on each side of the penguin sitting on its egg, and while one engaged the large bird's attention and caused it to rise off the nest to give it a peck as if for its impertinence, the other one tilted out the egg, and it was off and away before the penguin, which seemed rather a slow bird, realized the loss it had sustained.

For "The Friend."

On the Inconsistency of Christians with Christianity.

Under the above caption, Hannah More, writing on the subject of sudden conversions, forcibly raises a warning voice against much reliance being placed on any symptoms of change in an individual unless a radical change of the heart and life underlie the whole, as a "transformed" interior mutation of the whole man. The consistent, godly life and conversation, wrought through submission to the thoroughly cleansing baptism of Christ, and obedience to the power of His Holy Spirit revealed in the soul, is what is needed; because the inward cleansing, or purity of heart and thought in the sight of the Omnipotent, is that alone which can produce purity of life and conduct in His sight or in the sight of our fellow men. "None can convert themselves, neither purify themselves. The whole work from its beginning to the end consists in our faithfully co-operating with the heaven of the kingdom within us—the saving grace of the Lord Jesus; fully appreciating the testimony of our holy Head through His prophet: "Not by might, nor by power, but by my Spirit, saith the Lord of hosts."

That this conversion, for the most part, is a gradual work, is clearly set forth in the words of the Saviour: "First the blade, then the ear; after that the full corn in the ear." And that it was considered a progressive transformation by the apostle Paul, is proved by his speaking of the renewing of the inward man "day by day." And again to the Philippians he writes: "Work out your salvation with fear and trembling," &c. Does not "work out" signify continuous labor? And does not other language of Paul, viz., "Patient waiting for Christ," and "Patient continuance in well-doing," represent that the work of salvation is not, as H. More sets forth, "so slight, so

rapid," so smooth and easily obtained salvation?

While no one should be discouraged, knowing that the Saviour died for all, and that I loves and enlightens all, bestowing a portion of His Holy Spirit upon all, in order that "whosoever will" may come unto Him to drink of living water so as never to thirst yet, at the same time, it is of the utmost importance that we yield ourselves to His discipline; that we co-operate with His grace that we walk worthy of the vocation wherewith we are called; that we bow to Christ yoke and allow Him so to work in us, as that the fruit of righteousness, which is peace, may be wrought; and we, through power from on high, become washed, sanctified, and justified in the name of the Lord Jesus, and by the Spirit of our God unto new creatures in Him. The subjoined essay of H. M.'s is suggestively to these ends, viz:

"Better men than many who now rejoice themselves good, entertained doubts of their own state, and could not rest till they came to something like decision on this momentous question. Is then that sober inquiry, which was in them the truest mark of prudence, not to be treated as a needless scrupulosity, if not as an evidence of an unsound mind? Are the doctrines of the gospel on which they bestowed so much thought and labor unworthy of yours? Is that which was to them so serious a concern as to demand a combination of their best faculties and their most fervent endeavors, become so easy as to be comprehended at a glance, and adopted in a moment. Are the difficulties, which cost them so much reflection, prayer, and self denial, miraculously removed, and made smooth for you? Are things so altered, that while they worked on their salvation with fear and trembling, you are secure of an easy, indolent, almost unelicited salvation? Are corrupt human nature and the requisitions of the gospel now so suddenly accommodated to each other? Are sin and safety grown so congruous? Is it become so natural to fallen creatures to be reconciled to God and goodness, without that long and serious process which was once thought so indispensable to its accomplishment? Is that superinduced principle which the most acute nation in the world accounts 'foolishness,' and the most perverse people 'stumbling-block,' become to you so easy of apprehension, so accessible to your reach, so facilitated to your corruptions, so certain of attainment, as to supersede the labor of examination, as to be acquired without the trouble of pursuit? If to you the end is made sure, with the utter ignorance of the way and a general neglect of the means; if you find that path clear which they found intricate; if you obtain, without seeking, that assurance, by the bare promise of which they were supported; if all this be really your happy case, it must have been achieved by some power which has not been before revealed, by some miracle which neither the Old nor the New Testament has either recorded or predicted.

You would do well, then, to enquire whether there has been any change effected in the requisitions of Christianity, any deductions made in its demands, any facilities introduced into its scheme, any revelations by which the old impediments have been removed, and a shorter cut to heaven cleared out? Consult some real Christians of your

quittance; enquire if they, despising and forsaking the good old way, found repentance, ardon, holiness, victory over the world, and ceptance with God, so slight, so rapid, yet certain a thing? Ask if they became christians by chance or by inheritance, if they were renewed in the spirit of their minds, if the mere form of baptism? Inquire if their entrance into a religious life cost them sacrifice, if their attainments were accidental, if they maintained the ground obtained without effort, if they improved it without prayer, if they were established in it without Divine assistance?

The truth is, the persons in question either do not think the defect of faith a fundamental error, or they suppose they believe where they do not. When this last is the case, they are satisfied in their mistake; for people do not seek to extricate themselves from a doubt which they do not feel entangled. It is, however, practical unbelief, which quenches the vital flame of virtue."

For "The Friend."

Philip and Rachel Price.

In the 7th month, 1801, Rachel Price joined Sarah Newlin in a visit to the meetings and families of Friends in the Southern Quarter, Delaware and the Eastern Shore of Maryland. Discouragement attended her outset. In a letter to her husband, she says, "My mind was very much tried and borne down with the prospect of being so long separated from thee and our dear children, and remained until I came to Duck Creek Meeting, where I felt almost ready to shrink and turn about backwards, when this language was lovingly presented to my mind—'Thy Maker shall be thy husband—which proved a real consolation to my poor lost mind. Oh, may it be thy greatest concern to endeavor to keep low, and experience my own will brought into abjection, and thereby experience His divine presence to be near, for verily without Him I can do nothing as we ought to do, and I trust thou find Him to be thy support and stay in my absence, and may His holy arm be round about and preserve our tender offering from harm.'" And of later date, "The thought of being detained so long from home seemed almost more than my nature could bear, * yet I believe that there is no cause of dismay, as the service seems to be owned by the Master." "My dear children, you may be ready to conclude that my love for you is not very great, or I could not leave you so long; but let me tell you that I never felt the tenderness of nature more forcibly, than since my absence from you. How often has my mind been raised in secret supplication to the Father and Fountain of all our blessings, that He may be pleased to preserve you as in the hollow of His Divine hand; yea, oftener than He returning morning." And again—"Although I feel very much tried at times on account of my being so long separated from my endeared connexions, whom I feel increasingly dear to me in my absence, yet am I favoured to experience my mind so strengthened and supported through the various dispensations I have had to pass through, as to induce me to believe that I am in my place in this giving up. Although we feel ourselves poor weak beings, to be thus engaged and often have to do down unto snifering, as I believe, with the peed, which lies low and oppressed in many minds, yet we find a little remnant in every

place, which our hearts can unite with and encourage. Although weakness is often our portion, yet blessed be that Holy Arm of Power which we have found to be near for our help in the needful time of trial."

She received in response from her husband this encouragement:—"Although thy company thou knows would be very desirable at home, I hope thou wilt be favoured to be easy about us until thy mind is at full liberty to return with peace. I have been so far much preserved in the patience, beyond what I expected, and I hope I shall be favoured so to continue until the right time for thee to return." * *

"Let us be content to drink the cup that is allotted us, if we are persuaded it is the will of the Great Master, however trying, as the alone way to peace of mind. I hope thou art faithfully given up to do thy part of the work, not looking too much at thy own littleness, remembering that from those that had not great offerings to make, a turtle dove or young pigeons were accepted." Similar encouragement is repeated in later letters. "Having set thy hand to the work it will not do to look back, otherwise thou wilt lose the reward which I believe those are favored to experience who are faithfully given up to do in true sincerity of heart. The work in which you are engaged, I have no doubt, is great and arduous, and thou art often looking to thy own weakness and inability, but I trust that He that has required this at your hands will preserve and carry you through every trial and discouraging prospect. * * Then, I trust, thy peace will flow as a river, and His living presence be felt to dispel the gloomy clouds which have often gathered and been ready to break over thy head, and overwhelm us in the deep." Further letters acknowledged the kindness of Friends visited, and that the service of the travellers "was all to pretty good satisfaction," strength being mercifully given to relieve their minds."

Sarah Newlin returned home apparently well, but with the seeds of disease in her system, as on the day after her arrival she was attacked with bilious fever. P. and R. Price hastened to her, found her in a sweet and submissive state of mind; she declared her work was done, and after severe bodily suffering, within a week of her return, departed this life.

The Cedar Mines of New Jersey.—Among the productions of Cape May County are the "cedar mines"—swamps in which are buried large trees of the white cedar, *cupressus thyoides* of the botanists. These mines contain trees buried to a depth of varying from three to ten feet, the one across the other, and there is abundant evidence that they are the growth of different successive forests. In these very swamps forests of the same trees are now growing. The miners thrust an iron rod into the soft mud, over which often the water lies. In striking a buried tree the workman will by several soundings, tell how it lies, which is its root end, and how thick it is. He then manages to get a chip of the tree, and by its smell determines at once whether it is worth the labor of mining, that is, whether the tree be a *windfall* or a *breakdown*. If a breakdown, it is so because it was decayed when standing; if a windfall, the tree fell while sound, and has been preserved by the anti-septic nature of the peat marsh in which it is buried. The soft earth is then removed.

This makes a pit in the swamp. Into this the water soon flows, and fills it up. The saw is now introduced, and at regular intervals a cut is made through the tree, when the log floats to the surface. The log of a sound tree will turn over when it floats up, the lower side thus becoming uppermost. Trees are sometimes obtained which will yield 10,000 shingles, worth \$20 per thousand. A layer of such trees is found covered by another layer, and these again by another, and even a third, while living trees may still be growing over all.—*Late Paper.*

THE FRIEND.

SEVENTH MONTH 28, 1877.

The serious disturbances of the public peace which have occurred latterly in several places in our country, in connection with the men employed on railroad trains, have naturally given rise to thoughtfulness on the part of the reflecting portion of the community, not only respecting the grave consequences which have followed and may yet ensue in regard to the temporal prosperity of the nation, but also as indicating the low standard of morality, and indeed the entire absence of religious restraint which exists in a large element of our population. The provocation to riotous attacks on the property of the railroad companies by the striking employes would seem to have been of the most insignificant character; and the facts developed since indicate that the burning of property and plunder of provisions and goods from the railroad trains was largely done by people who had no connection with the service of the companies.

These outbreaks of lawless wickedness but too plainly prove, that hidden under the surface of civil society the fires of ungenerous passion are constantly smouldering, ready to burst forth into lurid flame whenever the bars and bolts of the strong arm of the law are momentarily withdrawn; and that the scripture declaration is still true, that "the heart is deceitful above all things, and desperately wicked: who can know it?" Our Lord, who is styled "the Prince of the kings of the earth," has commanded His followers to pray that His kingdom may come, His will be done in earth as it is in heaven; and one of his inspired apostles indicates his sense of the duty of Christian men and women under such circumstances in these words: "I exhort, therefore, that first of all, supplications, prayers, intercessions, and giving of thanks be made for *all men*; for kings, and for all that are in authority; that we may lead a quiet and peaceable life, in all godliness and honesty. For this is good and acceptable in the sight of God our Saviour, who will have *all men* to be saved, and to come unto the knowledge of the truth." * * * "I will therefore that men pray everywhere, lifting up holy hands, without wrath and doubting." 1 Tim. ii.

Alas, how far is the blessed kingdom of Christ from being yet come, and His righteous government from being set up in the hearts of many professing Christian people! What, then, is the obvious duty of those who truly have the witness in themselves, that to them "the Son of God has come and hath given them an understanding that they may know Him that is true?" Is it not to retire into

the secret place of the Most High, where they may abide under the shadow of the Almighty, and there seek for the spirit of grace and supplication, first, that the altar of their own souls may be sprinkled with the sanctifying blood which prepares for a pure offering, and to have the love of Christ shed abroad in their hearts, in whose name they may intercede for "all men," that they may submit themselves to the transforming power of Divine grace, and permit the "Prince of Peace" to establish His heavenly kingdom within them?

There is indeed a loud call for us all to humble ourselves under the mighty hand of God, and invoke His mercy, lest we as a nation be cut off in our sins. The late war of the rebellion, and its consequences; the depression of almost every industrial pursuit, the derangement of the circulating medium, the enforced idleness, bankruptcy and pauperism of so large a portion of our population in the midst of abundant crops, a land teeming with mineral wealth, and all the natural resources necessary for the support and comfort of man, speak plainly of the warning judgments of God, on account of the corruption in high places, the drunkenness, pollution and crime that abound throughout the land, and the pride, covetousness and forgetfulness of their Creator which are so prevalent even among those who do not come under the condemnation of the civil law. "Ten righteous would have saved a city one," and the true followers of Christ have been declared by Him to be the salt of the earth. Let no presumption or self-righteousness however lead any who have known the humbling power of the cross, and have tasted of the heavenly gift, and have been made partakers of the Holy Ghost, to think more highly of themselves than they ought to think, and thus lose their preserving savor, and be cast out and trodden under foot of men. The exhortation of Edward Burrough to his brethren in a time of tumult and agitation in the year 1660, may perhaps be fitly revived now. "Oh Friends? our kingdom and victory are not of this world, nor earthly, but from above and spiritual; wherein we have peace and comfort, endless and everlasting, which the world knows not of. I say unto you all that know these things, live in the peace, the victory and kingdom which is invisible, and mind the things as your greatest treasure that pertain to that kingdom, even the weighty matters of it which are infinite and eternal, and that every one of you may feel and enjoy a portion in that kingdom. It is precious for a people to be subjects of the heavenly kingdom, and for a man to have an assurance of life and peace in God; to be an heir of that kingdom that faileth not away, and to have his name written in the record of life. Blessed is every one whose hope and confidence, and peace and assurance are in the living God, and whose sonresth under the government of the Almighty, and who knows Him to be Judge, King, and Lawgiver in all things."

SUMMARY OF EVENTS.

UNITED STATES.—A strike of the iron and brakemen of the Baltimore and Ohio Railroad, which began on the 18th inst., has spread to the trunk lines of the States of Maryland, West Virginia, Ohio and Pennsylvania; with serious indications that it will extend to other roads also. The governors of these States have called out the military for the suppression of the riotous, threats of killing, and other unlawful means, by which the strikers, joined by large numbers of rioters, have endeavored to accomplish their designs. The most serious conflict which has thus far marked this

disgraceful outbreak, took place at Pittsburg on the 22d inst., in which it is reported 29 persons were killed, and many more wounded. The rioters first destroyed the Pennsylvania, and then the Pennsylvania, locomotives and cars. The Union depot, Pittsburg, Cincinnati and St. Louis Railroad freight depot, Pan Handle Railroad engine house, freight depot of Adams' Express Co., a large grain elevator, with 125 first class locomotives belonging to the Penna. Railroad, were burned. The local property is estimated at nearly \$1,000,000.

Forest fires, caused by long drought, and fanned by high winds, have raged for several days near Fort Fairfield, Maine. Large areas of timber land have been burned over, and many bridges destroyed. A tornado struck Elizabeth, N. J., on the night of the 19th, doing great damage in a tract not more than 300 feet wide.

A convention in the interests of Southern mail facilities, is appointed to meet at Fortress Monroe; 200 delegates from all parts of the South, and the President and members of the cabinet are expected to be present. During three days the despatches from the Post Office department for postal cards reached the unprecedented number, for that time, of 7,000,000.

California sent abroad 301 cargoes of wheat and flour during the year ending 6th mo. 30th, valued at \$18,427,590. The State has 3,800,000 fruit trees and 35,000,000 grape vines, and exports from 300,000 to 500,000,000 pounds of fruit yearly, this produces a large surplus, and foreign trade follows as a matter of course.

Specimens of silver ore taken from the Cerro de Pasco mines in Peru, show that the submerge portion of the mountain is very rich, and a rough estimate shows that a body of ore will be exposed by the tunnel which Henry Meigs is to build, worth from \$300,000,000 to \$500,000,000. These mines have laid under water for fifty years, and are scarcely known to the present generation, though they had been worked for 250 years, when the miners had to stop on account of water.

The population of the State of New York, on the week ending at noon on the 21st, was 438. Of this number 150 were adults, 288 children—188 of whom were under one year of age.

The Markets, &c.—The following were the quotations on the 21st inst.: American gold, 105½. United States 600, 121; 36 cent, 185; 107½. Do, 1897, 109; do, 1868, 112; new 75; 111½; new 1½ per cent, reg. 109.

Cotton.—Middleling sold in lots at 1¼ to 1½ cts. per lb. for upland and New Orleans. Petroleum—crude at 10½ cts. in bbls., and standard white at 14½ cts., and 18 and 19 cts. per gallon for home consumption.

Flour.—Sales of 1900 bbls.; Minnesota extra family, good and choice, at 88 a 85.50; fancy, 88.75 a 90.00; Pennsylvania do, do, 89 a 82.25; fancy, 29.50; very fancy, \$10. Rye flour steady at \$4.00.

Grain.—Wheat arriving freely and meets a fair demand. Sales of 8700 bushels of Jersey, Delaware, Maryland and Virginia, good and prime red and amber at \$1.55 a \$1.69; some Penna. at \$1.52 a \$1.55. Rye sold at 70 cts. for western, and 76 a 78 cts. for Pennsylvania. Corn is unsettled and higher—sales at 65 cts. Outside grain, 100 bushels at 43 a 45 cts.

Average price of hay during the week has been: prime timothy \$1.25 to \$1.35 per 100 lbs.; mixed and low, 60 cts. to \$1.00. Straw, 60 to 70 cts. per 100 lbs.

FOREIGN.—London.—The yearly review of trade, issued by the British Customs Commissioners, shows that the United States has resumed the position of the chief source of cotton supply, amounting to 1,000,000 lbs. India which sent 953,000 cwt. less in 1876 than in 1875. The whale boat New Bedford, which made the daring voyage across the Atlantic, arrived at Monroa's Bay, Cornwall, on the night of the 21st inst.

Some idea of the value of the oldest printed books may be gathered from the following contributions to the Caxton Exhibition sent from Earl Spencer's Althorpe Library alone have been insured for \$55,000.

The new German University established at Strasburg has about seven hundred students, those of the theology being the fewest, numbering 40, there are 170 in medicine, and 100 in law.

A telegram received from the consul at Glatz states that four vessels, containing about 260 cubic yards of stone, have been sunk by the Russians in the Sulina branch of the Danube, a mile and a half below the upper entrance. About 5000 cubic yards of additional stones have been sunk in the narrow channel, the vessels and the depth of water in the channel reduced to four feet.

The number of persons still receiving gratuitous relief in India is over 1,250,000.

The Spaniards now realize they had more freed under the Sardinian monarchy than they can expect to have under the French Republic. The new pretensions are compelling the association of the plotters against the influence of the local Republicans.

It is said the Spanish authorities are preparing to send 25,000 men to Cuba to fill the gaps caused by disease and death. The Ministers propose to raise necessary funds to forward these reinforcements and are employing the assistance of the planters and financiers who furnished the advance for those sent year ago.

The Treasury Department is informed by the department of State that the Government of Spain has adopted the Moore system in the measurement of tonnage of vessels in the Canary, and is willing to add the vessels of the United States which are admissible upon that system, into Spanish ports and the ports Cuba, accepting the tonnage expressed in the certificate of registry of American vessels, as the tonnage of Spanish vessels in ports of the United States.

Alpine tourists will this year have an opportunity of observing a new and unprecedented phenomena, the neighborhood of the small town of Burg St. Maurice is a mountain called by the people of the country the "Beo Range." It is connected with the outlying peaks of Little St. Bernard, and is 7,500 feet above the sea level. This mountain has been for some time crumbling to pieces. For three weeks past the bloc of solid stone of which it is, or was, built up, has been crumbling away, and the whole side of the mountain appears to be in course of pouring itself down the plain. The stone is described by a member of the French Alpine Club as resembling in the extreme, The boulders which detach themselves are often of immense size, and they leap down a steep slope at an extremely rapid pace, crushing literally to matchwood the trees and saplings which they encounter. The noise made by the descending masses resembles de distant peals of thunder.

FRIENDS' SCHOOL AT GERMANTOWN.

A well qualified woman teacher is wanted for the Prime Department of the Friends' School at Germantown to be given to one who has had the benefit of a thorough course of normal training. Apply to

Jane E. Mason, School Lane and Wayne St.
Margaret W. Jenkins, Coulter St., near Way
Elizabeth W. Cope, Haines St., Germantown.

WESTTOWN BOARDING SCHOOL.

A well qualified teacher of the Latin and Greek languages will be wanted for the opening of the new session, 10th mo. 29th. Apply to

Joseph Pssmore, Goshoville, Chester Co., Pa.
John E. Carter, 624 South 24th St., Philad., or
Wm. Evans, 252 South Front St., "

FRIENDS' ASYLUM FOR THE INSANE.

New *Westborough*, (*Westbury* Ward), *Philadelphical* Physician and Superintendent.—JOSHUA H. WORTINGTON, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board Managers.

DIED, at his residence in Clinton, Dutchess Co., N.Y. on the 30th of 3d mo. 1877, WILLIAM D. GREFFER, aged 53 years, a member of Stratford Monthly Meeting. Though feeling that he had much to make life desirable, and the thoughts of being separated from his family were for a time very painful; yet he was enabled, through the power of Divine Grace, to resign a life on earth with much cheerfulness, and to rejoice in a assurance of a blessed glory. He was a devoted and a pressed feelings of deep thankfulness for the many and pure comforts by which he was surrounded, but mo of all for the comforting presence of the Holy Spirit with which he was greatly favored, saying: "All else have it if they will ask for it. What should I do with my life? I have no other wish than to be in the arms of the Lord, if we ask Him for help and strength, He will be with us. I have asked a great deal, and received great deal." Thus depending wholly on the mercy of God, through Christ Jesus the holy Redeemer, he was sustained in peaceful endurance through a long season of weakness, as passed great a week, leaving a convincing evidence that he has entered into everlasting rest.

For "The Friend."

John Woolman.

Supplemental to the little sketch of John Woolman as given in "The Friend" of last week, the following are some reflections, or as they may be called, aphorisms, selected from the works of this wise and good man, viz.:

"He, whose tender mercies are over all his works, hath placed a principle in the human mind, which invites to exercise goodness towards every living creature; and this being *ingly attended to*, people become tender-hearted and sympathising; but being frequently and totally rejected, the mind becomes shut up in a contrary disposition."

"True religion consists in an *inward life*, wherein the heart doth love and reverence God the Creator, and learns to exercise true justice and goodness, not only towards all men, but also toward the brute creatures."

"Some glances of real beauty may be seen in their faces who dwell in true meekness. There is a harmony in the sound of that voice to which Divine Grace gives utterance, and some appearance of right order in their temper and conduct, whose passions are regulated; yet all these do not *fully show forth that inward life* to which we have not felt it: but his white stone and new name are known *rightly to such only* who have them."

"The outward modes of worship are various; but wherever any are true ministers of Jesus Christ, it is from the operation of his Spirit upon their hearts, first purifying them, and thus giving them a just sense of the condition of others."

"Being clearly convinced in my judgment, that to place my *whole trust* in God was best for me, I felt renewed engagements, that in *all things* I might act on an *inward principle of virtue*, and pursue worldly business no farther than Truth opened my way therein."

"My mind, through the power of Truth, was in a good degree weaned from the desire of outward greatness, and I was learning to be content with *real conveniences*, that were *not costly*; so that a way of life free from much entanglement, appeared best for me, though the income might be small. I had several offers of business that appeared profitable, but did not see my way clear to accept of them; believing the business proposed would be attended with more outward care and cumber than it was required of me to engage in. I

sw that a humble man, with the blessing of the Lord, might live on a little; and that where the heart was set on greatness, success in business did not satisfy the craving; but that commonly with an increase of wealth, but the desire of wealth increased. There was a care in my mind so to pass my time, that *nothing* might hinder me from *the most steady attention* to the voice of the true Shepherd."

"Through the revelation of Jesus Christ, I had seen the happiness of humility, and there was an earnest desire in me to enter *deeply* into it." "Deep humility is a strong bulwark; and as we enter it, we find safety and *true exaltation*: the foolishness of God is wiser than man, and the weakness of God is stronger than man. Being unclad of our own wisdom, and knowing the abasement of the creature, *therein* we find that power to arise, which gives health and vigor to us."

"We" were taught, by renewed experience, to labor for an inward stillness; at no time to seek for words, but to live in the spirit of truth, and utter that to the people which Truth opened in us."

"Acting contrary to present outward interests, from a motive of Divine love, and in regard to truth and righteousness, and thereby incurring the resentments of people, opens the way to a treasure better than silver and to a friendship exceeding the friendship of men."

"Through the humbling dispensations of Divine Providence, men are sometimes fitted for his service. The messages of the prophet Jeremiah, were so disagreeable to the people, and so reverse to the spirit they lived in, that he became the object of their reproach; and in the weakness of nature, thought of desisting from his prophetic office; but, saith he, 'His word was in my heart as a burning fire shut up in my bones, and I was weary with forbearing, and could not stay.' I saw at this time, that if I was honest in declaring that which Truth opened in me, I could not please all men; and labored to be content in the way of my duty, however disagreeable to my own inclination."

"Through the mercies of the Almighty, I had, in a good degree, learned to be content with a plain way of living. It had been my general practice to buy and sell things *really useful*; things that served *chiefly to please the vain minds in people*. I was not easy to trade in; seldom did it; and whenever I did, I found it to weaken me as a Christian."

"As every degree of luxury hath some connexion with evil; for those who profess to be disciples of Christ, and are looked upon as leaders of the people, to have that mind in them, which was also in Christ, and so stand *separate from every wrong way*, is a means to *help the weaker*." "I have felt an increasing care to attend to that Holy Spirit which sets right bounds to our desires, and leads those

who faithfully follow it, to apply *all the gifts of Divine Providence to the purposes for which they were intended*."

"Though trading in things useful is an honest employ; yet, through the great number of superfluities that are bought and sold, and through the corruptions of the times, they who apply to merchandize for a living, have great need to be well experienced in that precept which the prophet, Jeremiah, laid down for his scribe; 'Seekest thou great things for thyself? Seek them not.'"

"We may see ourselves crippled and halting, and from a strong bias to things pleasant and easy, find an impossibility to advance; but things impossible with man, are possible with God; and *our wills being made subject to his*, all temptations are surmountable."

"I find that to be a fool as to worldly wisdom, and *commit my cause to God*, not fearing to offend men, who take offence at the simplicity of Truth, is the *only way* to remain unmoved at the sentiments of others. The fear of man brings a snare; by *halting in our duty and giving back in the time of trial*, our hands grow weaker, our spirits get mingled with the people, our ears grow dull as to hearing the language of the true Shepherd, so that when we look at the way of the righteous, it seems as though it was *not far us to follow them*."

"Where people let loose their minds after the love of outward things, and are more engaged in pursuing the profits and seeking the friendships of this world, than to be inwardly acquainted with the way of true peace, *such we walk in a vain shadow*, while the true comfort of life is wanting; their examples are often harmful to others; and their treasures, thus collected, do many times prove dangerous snares to their children." "When we look toward the end of life, and think on the division of our substance among our successors; if we know that it was collected in the fear of the Lord, in honesty, in equity, and in uprightness of heart before him, we may consider it as his gift to us; and with a single eye to his blessing, bestow it on those we leave behind us. Such is the happiness of the plain way of true virtue. 'The work of righteousness shall be peace; and the effect of righteousness, quietness and assurance forever.'"

"In the bloom of youth no ornament is so lovely as that of virtue, nor any enjoyments equal to those which we partake of, in *fully resigning ourselves to the Divine will*."

"If the Lord be our God, in truth and reality, there is safety for us; for he is a stronghold in the day of trouble, and knoweth them that trust in him."

"It nearly concerns us to try our foundations impartially. Such are the different rewards of the just and unjust in a future state, that to attend diligently to the dictates of the Spirit of Christ, to devote ourselves to his service and engage fervently in his cause during our short stay in this world, is a *choice well becoming a free intelligent creature*."

J. W. was out on a religious visit in company with Peter Andrews.

"Contending with one equal in strength, is an uneasy exercise; but it the Lord becomes our enemy, if we persist to contend with him who is omnipotent, our overthrow will be unavoidable."

"While many, professing Truth, are declining from that ardent love and heavenly-mindedness, which were amongst the primitive followers of Jesus Christ, it is a time for us to attend diligently to the intent of every chastisement, and consider the most deep and inward design of them."

"To see the failings of our friends, and think hard of them, without opening that which we ought to open, and still carry a face of friendship, this tends to undermine the foundation of true unity."

"Where people are truly humble, use themselves to business, and are content with a plain way of life, it has ever been attended with more true peace and calmness of mind, than they have had who, aspiring to greatness and outward show, have grasped hard for an income to support themselves in it."

"I have seen, and the sight has affected me, that a conformity to some customs distinguishable from pure wisdom, has entangled many; and that the desire of gain to support these customs, greatly opposed the work of Truth."

"Things though small in themselves, being clearly enjoined by Divine authority, become great things to us."

"Remember, O, my soul! the quietude of those in whom Christ governs, and in all thy proceedings feel after it."

Cotton Culture in Texas.—Edward King, in his work called "The Great South," gives much valuable information respecting the present condition and the resources of the Southern States. The growth of cotton in Texas has increased rapidly since the war; the exports of uplands cotton from Galveston, which in 1866, were only 16,417 bales, worth \$2,146,224, had risen in 1873, to 333,502 bales, valued at \$32,423,806. He states the gratifying fact, that the freed negroes throughout Texas are in the main industrious and prosperous, and are extensively engaged in the culture of cotton. The freedman who is fortunate enough to have secured a tract of land, grows all the cotton he can, and if he would take more pains in cleaning and preparing it, would soon enrich himself in the profitable business. It is estimated that there are twenty millions of acres of cotton-bearing lands in Texas, but a small part of which has yet been brought into cultivation. The lands at the head of Galveston Bay, and on the adjoining San Jacinto Bay, as well as all the lands in immediate proximity to the Gulf, are said to be well adapted to the culture of sea-island cotton—equal in quality to the best grown upon the islands along the coast of South Carolina and Georgia. The writer thinks that the alluvial lands along the Gulf demand the presence of Chinamen, and that great wealth lies hidden in their flats.

The population of Texas, which at the time of annexation in 1845, was about 150,000, now amounts to considerably over one million. The State has very little public debt, and the taxable property is valued at \$300,000,000.

Great warriors, like great earthquakes, are principally remembered for the mischief they have done.

For "The Friend,"

Observations on the Rise of the Society of Friends, and the character and labors of George Fox.

(Continued from page 284.)

"The state of England at that time (1647) was most sad and perplexing. The civil war had been attended with great destruction of human life and devastation of property in all parts of the Kingdom. Three factions had been long struggling for pre-eminence. The king though a prisoner had not yet been brought to trial. It was uncertain whether Presbyterians or Independents would finally succeed in retaining the civil and ecclesiastical authority. The former gave evidence by the sanguinary laws passed by their party in Parliament, that the possessions and life of no man would be safe who would not conform his belief to certain articles prescribed by them; which were not to be openly discredited upon pain of death. The latter professed to favor liberty of conscience, but their whole course made it evident that they were determined to obtain and secure power by every means within their reach. The bloody conflict for supremacy, so long waged with the cruelty of jealousy and the blood-thirstiness of sectarian hate, employing the sword to decide between rival theories of religion and church government, appeared to be ended; but there was still much confusion in reference to ecclesiastical differences, and embittered discord between the parties striving for mastery; leading many to fear that the sword would never be sheathed if it to it was to be left the adjustment of spiritual interests. Men of thoughtful minds had come to see that though the war had been undertaken ostensibly to redress both civil and religious grievances, there was little prospect of attaining either end; and witnessing the deplorable losses and calamities attending it, and that their hopes of settlement and domestic comfort were disappointed, many of them had become earnest in seeking for more durable riches, and to find some solid foundation to rest on, amid the fluctuations of doctrines and ecclesiastical domination that surrounded them. Others than George Fox, wearied and disgusted with the self-seeking and hypocritical profession of many who made themselves conspicuous as spiritual guides, withdrew from the ordinary places of worship, and in retirement, self-examination and study of the Scriptures, sought to ascertain and to perform their religious duties.

"No party was so assured of retaining power as to deem it expedient to attempt to enforce laws for the repression of religious inquiry; so that the places for worship throughout the country were often occupied by teachers of different denominations, and discussions on theological subjects between persons of differing opinions were not uncommon.

"William Penn referring to this period and to the work assigned to George Fox, says, 'It was about that time that the eternal, wise and good God, was pleased, in his infinite love, to honor and visit this benighted and bewildered nation with his glorious Day Spring from on high; yea, with a most sure and certain sound of the word of Light and Life, through the testimony of a chosen vessel, to an effectual and blessed purpose, can many thousands say; glory be to the name of the Lord forever!'

"George Fox, as he went through various places in 1647, continued to preach to the

people, and to dispute with some who opposed the doctrine he promulgated. By this means he brought many to see how far they had fallen short of the truth as it is in Jesus, and by directing them to the Light of Christ in the heart, or the gift of Divine Grace, which Christ had purchased for every man, and in structing them in the alone means whereby they could know their salvation wrought out many were convinced, and brought to unite with him; and several meetings of Friends were set up. This success of his ministry and the fame of his piety and zeal brought many to see him, and a man of the name of Brown, when on his death-bed, prophesied that he would be an eminent instrument in the Lord's hand to convert the people. But George was fearful of being drawn aside from the strait and narrow way by these things and though he declined not to declare the truth to the people, yet he was careful not to be influenced by the applause of men. Nevertheless Satan suggested to him that he had sinned against the Holy Ghost; but as he could not see wherein that sin had been committed, he escaped the temptation.

"Seeing that the same work of the Lord was being carried on in others, his own sorrows and troubles were assuaged, and he says, 'Tears of joy dropped from me, so that I could have wept night and day with tears of joy to the Lord, in humility and brokenness of heart.'

"Being in the early part of 1648, at a great meeting of professors, at Mansfield, he was moved to pray, and so great was the power attending, that the house seemed to be shaken and the people observed, 'That it was as if the days of the Apostles, when the house was shaken where they were met.'

"1648. Speaking of the commission he had received, he says: 'I was sent to turn people from darkness to the light, that they might receive Christ Jesus; for to as many as should receive Him is his light, I saw He would give power to become the sons of God; which had obtained by receiving Christ. I was to direct people to the Spirit, that gave forth the Scriptures, by which they might be led into all truth, and so up to Christ and God, as those had been who gave them forth. I was to turn them to the Grace of God, and to the truth in the heart, which came by Jesus; that by this grace they might be taught, which would bring them salvation, that their heart might be established by it, their words might be seasoned, and all might come to know their salvation nigh. I saw Christ died for all men was a propitiation for all, and enlightened all men and women with his divine and saving light; and that none could be true believers but those who believed therein. I saw that the Grace of God, which brings salvation, had appeared to all men, and that the manifestation of the Spirit of God was given to every man, to profit withal.'

"When the Lord God and his Son Jesus Christ, sent me forth into the world to preach his everlasting gospel and kingdom, I was glad that I was commanded to turn people to the inward Light, Spirit and Grace, by which all might know their salvation and their way to God; even that Divine Spirit which would lead them into all truth, and which I infallibly knew would never deceive any. But with and by this divine power and Spirit of God and the light of Jesus, I was to bring people

off from all their own ways, to Christ the new and living way; from their churches, which men had made and gathered, to the church in God, the general assembly written in heaven, which Christ is the head of; and off from the world's teachers made by men, to learn of Christ, who is the way, the truth, and the life, of whom the Father said, "This is my beloved Son, hear ye him;" and off from all the world's worship, to know the Spirit of Truth in the inward parts, and to be led thereby, that in it they might worship the Father of spirits, who seeks such to worship him; which Spirit they that worshipped not, knew not what they worshipped.

"The public ministry of George Fox was now fairly begun, and from this time until his death, when out of prison, and not prevented by sickness, his travels, and other services for the Truth were continued almost uninterceptedly. In a 'Narrative of the Spreading of Truth,' &c., written by him, in 1676, he says:

"The Truth sprang up first to us, so as to be a people to the Lord, in Leicestershire in 1644, in Warwickshire in 1645, in Nottinghamshire in 1646, in Derbyshire in 1647, and in the adjacent counties in 1648, 1649, and 1650; in Yorkshire in 1651, in Lancashire and Westmoreland in 1652, in Cumberland, Durham, and Northumberland, in 1653 in London and most of the other parts of England, Scotland and Ireland in 1654.

"In 1655, many went beyond sea, where Truth also sprang up, and in 1656 it broke forth in America and many other places."

"Having by obedience to the manifestations of Divine Grace learned to distinguish between the voice of the true Shepherd and that of the stranger, he was made quick of discerning in the Lord's holy fear, those things in common observance in the professing church, and in the different ranks of society, which had been contrived by man to promote his self-interest or minister to the pride of the human heart. He thus found it enjoined upon him to keep strictly to the use of the Scriptural language of thou and thee to a single person; to refrain from the customary modes of salutation, as uncovering the head or bowing the body; also giving flattering titles to any. As he was convinced that the common use of the pronoun you to a single individual, was not only ungrammatical, but had originated from a corrupt source, and like the customary complimentary salutations and titles was untruthful and fostered the honor that men seek one from another, he felt required to bear testimony against them all. He saw that as all were required to speak the truth on all occasions, and as Christ and his Apostle James had positively forbidden swearing of any kind, so it was unlawful for a Christian to take an oath. And as Christ was the Prince of Peace, and had commanded his followers to love their enemies, to do good to all, to forgive all who trespassed against them, and to resist not evil, so his disciples could not fight, nor take part in war, let it be waged under what plea it might. He believed it right to banish from use the ordinary heathen names of the days of the week, and the similar names given to the months of the year, and in lieu thereof to name both numerically.

"Seeing the vanity and folly connected with dress, and how people were brought into bondage by fashion, and thereby betrayed into things destructive of a religious life, he

practiced great simplicity therein himself, and bore a decided testimony against ornamentation or changing with the fashions."

(To be continued.)

My Little Gentlemen.

There are five of them, and I presume all strangers to each other. One of them I met in the street-car one day—the ten-year-old boy who respectfully offered his seat to a lady whom no other occupant of the car appeared to see. The boy looked tired and had with him a heavy parcel which could not be trusted out of his hands. The seat was comfortable and he had thoroughly enjoyed it.

But this boy was too full of gentlemanly instincts, and too truly one of Nature's little noblemen, to retain his seat while a lady was standing. And, by the by, had you seen how poorly she was dressed, and noticed the shabby purse from which she took her fare, you would have thought her only a poor woman, a seamstress, may be. Perhaps she was; I only called her a lady because she did as ladies usually do—accepted the seat with a smile and a "Thank you, my boy!" which must have made my little gentleman well content to have yielded his place, and happy notwithstanding the fact that his small feet had only the ghosts of shoes upon them and his jacket was a coat of many colors, where loving mother-hands had patched it.

Another of my little gentlemen I saw in the street soon after. He was dressed in the style of the season, and looked the little aristocrat that he was. Several of his stylish little companions were with him, and they were having a grand sledding time as I approached. A beggar woman just then turned into the area of one of the handsome houses. I don't know whether she received help or no. But as she turned to come out a second after, her foot slipped, and basket and all, she fell flat amongst the merry and wild boys. They laughed, as what boys would not! but my little gentleman—the best dressed of the group—checked his laugh and kindly assisted the forlorn woman to her feet. Then he lifted the basket and with his daintily gloved hand gathered the cold pieces together until the basket was filled; and with a polite bow he handed it to the woman who stood grateful and speechless before him. When I passed a minute after I could not resist saying, "Your mother has a noble son, my boy!" and he answered confusedly, "O, that's nothing!" But it was something, little readers, was it not, in the eyes of those waiting angels who carry our good deeds to the Great Throne above?

My third little gentleman I found also in a street-car. I had an armful of packages and sank wearily into the seat two ladies rather unwillingly made for me between them. Standing in front of me was a little fellow about twelve years of age. Poor and very scantily clothed he was, but I noticed his face and hands were clean, and his eyes had an honest straightforward look that one likes to see.

Older passengers shoved him here and there, but he patiently clung to his strap and allowed others to sway him about as they liked. I had some difficulty in getting my fare out because of the bundles, but presently a low and rather timid voice said, "Please, ma'am I'll hold yer bundles if yer likes," and my little gentleman took them from me as I thanked him. The passengers about him looked pleased at such

an unlooked-for act of politeness on the part of the ragged boy, and he looked confused. But I shall never forget the little thankful act of this little gentleman of mine, and have no fear for the future of a boy whose heart is so noble.

The fourth of my class of noblemen was only a newsboy, quite unconscious of the title I soon gave him.

A blind man, with his cane and the brushes he was trying to sell, came feebly along the street, hesitating now and then as the blind must, uncertain as to what might be before him. Down the street came a crowd of newsboys just from the offices of the different papers, and screaming at the top of their lungs. One among them—a bright-eyed little fellow—only nine years old, I judged, noticed the blind man. "Hold on, fellows!" he cried, "don't run agin that old cove now. Wat's the use of hurting him when he's blind and can't look out for hisself?" I paused to watch the result. The other boys checked their speed a little and then hurried on, crying, "Oh, bother!" So my little gentleman stood beside the blind man until the crowd had passed and then silently withdrew. The old man, little dreaming of the youthful protector who had shielded him, moved slowly on, and I opened my heart to take in another, whose small head was already laurel-crowned in my opinion.

The fifth little gentleman was one of the better class of boys, that is, so far as station goes. He was passing along the street whistling and jingling a pocket-full of marbles. He seemed in haste—probably hurrying to join a comrade at their favorite game—but a little girl, thinly clad and crying bitterly, was crouching beside a cellar grating and peering down into the darkness below. I had just left the editor's office and stood a few minutes to wait for a car. The girl's sobbing attracted my attention and I turned to watch proceedings.

"Hallo! what's up?" asked the boy, pausing.

"I dropped my pennies down there, and—and—mother'll beat me sure when I go home, oh, dear!"

"Never you mind, sis," said the boy. "I haven't much time, but I'll see if I can find them for you. Wait here?"

Then he entered the store and asked permission to go down in the cellar. Leave granted, he searched for the pennies until they were found, and returned to the weeping girl. Her fearful smile was pleasant to see, and though she hadn't time to say "thank you," so speedily did the little boy run off, yet it was in her heart, no doubt, and I had one more to add to my adopted family of "Little Gentlemen."

Little gentlemen make big ones, we know, and fine clothes are by no means necessary to prove that fact. Only an accident of birth makes the difference between a nobleman and a noble man, and the first, perhaps, may hold his nobleness only in his title, while the latter receives from the hands of his Maker the title which makes him one of the great court above.—Wide Awake.

California Quicksilver.—The cinnabar deposits of California, which were discovered by accident, and at first supposed to be of little value, have been rapidly growing in importance and value. The supplies of all other

regions have been collected laboriously, and often with serious injury to the health of the workmen, while the California mines are worked with unequalled facility. Since the first discovery, the product of the mines has been about 800,000 flasks of 76½ pounds each, and the price has fallen from \$100 a flask to \$40. Seventy-five thousand flasks have lately been obtained in one year; of which 50,000 were exported, chiefly to Asia. The long wrought cinnamon-banded at Almaden, Spain, have been almost abandoned for a competition which leaves so small a margin of profit for those who work the mines.

Selected for "The Friend."

Extracts from letters of a beloved young Friend, who deceased the 15th of 11th mo. 1853, in the 36th year of her age.

Philadelphia, 12th mo. 11th, 1842.

My Dear — * * * One week ago you were with us, but the sad circumstances under which you came and the shortness of the time, made it feel scarcely like a visit. On Second-day morning I told our girls collectively of the death of dear little R. G. Bidle, but was so agitated as for a time to be scarcely able to do it (how desirable it is to have the feelings under better control)—the children were affected, but the disposition is so strong to throw off serious feelings, that many of them I fear, will soon forget it. Yesterday, near the close of school, Thomas Kite came in; we soon fell into silence, which was broken by Thomas in supplication; when referring to the removal of one who was recently a companion, he expressed his belief of her having been prepared through mercy, to enter into a state of rest, and petitioned for those who remained, that we also might be ready. Is it not a favor dear —, that notwithstanding our manifold transgressions, we are thus remembered. * * *

This morning, Thomas appeared in supplication at the breakfast table, and in testimony at meeting this afternoon. In the latter opportunity his concern was for some, who in time past had rejoiced in the light of the countenance of the Saviour, but were now encompassed by thick darkness, but believed as they endeavored to wait steadily on their Divine master He would in his own time change the dispensation. * * *

In the evening meeting Sarah Hillman arose with this passage, "Eye hath not seen, nor ear heard," &c., and went on to turn our attention to the light which maketh manifest. Thomas Kite followed her with a lively exhortation to parents, encouraging them to faithfulness in the discharge of their responsible duties. * * *

Second-day morning while the children were collecting, Sarah Hillman walked into my room, greatly to my satisfaction. After the girls had repeated their Scripture and we had been sitting some time in silence, S. said that a favor it was in all our trials and difficulties to have a Father to whom we could pour forth our sorrows; believed many prayers ascended to the throne of Grace on behalf of those present, and that many of them had desired preservation. Near the close of her communication she had a few words to the teachers, on this wise: "Though you often feel as though you were spending your strength for nought, yet if you look unto the Lord for strength morning by morning, He will bless the work in your hands," &c. This, dear —,

was a little encouragement. * * * I used to think myself willing to do almost any thing that appeared right, but I find as regards some things of latter times, it is hard work to arrive at any thing like resignation. The cross mostly comes just where the inclination would not place it, and therein is the cross. In speaking of children and the tenderness of visitation often at that period of life S. H. said, "Richard Jordan used to say, that was bounty money—in after life we would have to labor for our bread. Is it not true?"

Since writing the above I have heard the affecting intelligence of thy uncle's attack; if in the ordering of best wisdom, I shall be truly glad to hear of his recovery; he would be greatly missed in his meeting, and neighborhood, but especially in your family; I have thought much about you, and according to my measure have entered into sympathy. Should it please Him who doeth all things well, to deprive his friends of his labors at this time, though the blow would be keenly felt, He who dealt it knows what is best for all, and that is surely a support under every trial. * * *

Attacks of paralysis have been quite frequent of late, J. J. had one last Third-day; she was for a time blind and speechless; the last account rather more favorable. She, poor woman, has drunk deeply of the cup of *bitters*; for what can be a greater affliction than rebellious children. I would rather struggle with poverty to grey hairs than have everything riches could procure, if that must be joined with such affliction. In reflecting on the sorrow of heart children often inflict on worthy parents, I often thought how wrong it was to indulge inordinate grief for persons of any age who are prepared for the glorious change—particularly, guileless infants, and even when those of riper years are called, our Heavenly Father can raise up others to fill their places and pour comfort into the hearts of sorrowing relatives. I have loved to dwell upon Hannah's offering up little Samuel to serve the Lord, and thought, perhaps, if parents would in their hearts dedicate their infants and endeavor to hold them under the direction of the same all-wise Being, a blessing would attend them and their tender charge. Though I know parents cannot give grace, it has long been a subject of wonder and regret to see so frequently the children of pillars in the church acting in a manner that wounds their parents—things we cannot understand must be left.

Nine o'clock.—Just returned from evening meeting, which was a silent one—large and quiet. The upper gallery on the women's side well filled—ten in it and eight in the second. The men's side smaller. We go to meetings four times in the week, and how are we improving the time * * * how many there are who would be thankful for the very crumbs which fall from our tables. It is a very serious consideration that these opportunities must be accounted for. If, where "much is given much will be required," some of us should look well to it while the day lasts, for the night cometh when no man can work. When I look at the poor children who are nurtured in the lap of luxury and surrounded by flattery, I cannot but consider some of us, dear —, have been very mercifully dealt with—for myself, at least, I know my feeble nature would not be able to bear * * * and that though my path has

not been without many thorns, as soon as the wounds cease smarting a little, how prone I am to cling again to these perishable things! I suppose thou hast read the account of John Davis, which is concluded in this week's "Friend." This remark struck me: "The Lord by the sword of His eternal word, cut off many things my soul had been as it were *glued to*," and again, "I loved His judgments and was willing He should open my heart, and take out all which had given life to the things that had offended Him."

This is (as he says) "heart work" truly; but if there were more willing to submit to it there would doubtless be a greater number of *clean handed, clear sighted* laborers in the vineyard, who would not fear to attack the *high places* and sit in judgment without fear or favor.

I have invited our friend T. K. to add some thing to my letter. * * * How is my friend E. W. moving along? satisfactorily to her friends, I doubt not, if she is not to her self.

In sincere affection I am thy friend,
SUSANNA LIGHTFOOT.

Dear friend.—Susanna was induced to offer me the privilege of writing a few lines on the sheet; I avail myself of it, if it serve no other purpose than to show thee the interest I continue to feel in thy welfare, and to encourage thee cheerfully to submit to the operation of the Lord's holy power, which is able out of weakness to make strong, and to sanctify every trial and affliction so as to make them conduce to the good of his children and their advancement in the way everlasting. * * *

Thy uncle's case has presented a striking instance of the uncertainty which attends human life and its concerns. Indeed we have had many warnings of latter time some of them remarkably impressive, but few hours elapsing between vigorous health and an entrance upon the unseen world. How slow we are to learn! how heedful that we should thus often be reminded of the great truths of religion, the immortality of the soul, a future state of retribution, the importance of working out our soul's salvation doing through Divine assistance, all our Heavenly Father has for us to do, as good steward of the manifold grace of God. May these admonitions not be lost upon thee or me, but may we be unitedly encouraged to attend to the one thing needful: that so when the all important hour which decides our everlasting state may arrive, through abundant mercy we each may be entitled to the sentence of "well done, enter thou into the joy of thy Lord."

Thy affectionate friend,
THOMAS KITE.

For "The Friend."

The late Conference of Friends of Bea Creek Quarterly Meeting, Iowa, at which they were favored to present the condition of our Society in many places at this time, in such forcible and unmistakable language should cause us to feel humbly thankful to our Heavenly Father that He has preserved a remnant who are not ashamed to testify openly in His name against the grievous innovations now so prevalent, and which of latter years have made such sad inroads with in our borders. Truly the alarm has been sounded none too soon, and it is incumbent

we should take heed to these warnings and return to first principles.

I consider the declaratory document emanating from the said Conference, very lucid and temperate in tone, setting forth boldly and concisely the causes and effects of the pernicious teachings and practices which have obtained, of late, to the laying waste of our nice fair heritage. May the action of these concerned Friends have the effect to open the eyes of many well intentioned but misguided members in the various Yearly Meetings, who have tacitly acquiesced in, or sanctioned this changed condition within our Society, that they may see the dangers which beset us by overing our ancient standard, and dimming the lustre and purity of primitive Quakerism.

In thus calling together this and other Conferences of a similar character and purpose, or serious weighty deliberation, I reverently believe these Friends were actuated by the spirit of love and Divine wisdom, manifesting herein allegiance to their Lord and Master, who has been graciously pleased to give them a true sight and sense of our present lamentable condition, and enabling them to point out a remedy.

In this connection it was truly sorrowful to notice, by the proceedings of the late London Yearly Meeting, many unsound views and practices advocated even by those occupying important, responsible positions, giving currency to sentiments so entirely at variance with the long established and well settled usages of all our rightly gathered religious assemblies; by thus seeking to substitute the form for the substance, these over zealous ones are endeavoring to sap the very essence and life of true spiritual worship, which in its highest sense is the blessed privilege of every Christian believer, that whether in silent reverential waiting, or in the rightly authorized ministrations of the word, there may be nothing to mar the sweet union and communion between man and his Maker, through the divine power and vivifying influence of the Holy Spirit. I need not particularize these views, they being so apparent to the casual reader. It was painful to notice (according to the printed accounts of London Yearly Meeting) the absence of a more decided voice in controversy of these unsound and dangerous utterances—and still more so the paucity of numbers adhering "to the law and to the testimony," which many styling themselves Friends are seeking so persistently and effectually to subvert. May we not exclaim, "How are the mighty fallen!"

Although there may be few left to testify openly in favor of the simplicity and spirituality of the principles and testimonies of early Friends, yet as these seek for Divine help and guidance in childlike obedience and humility, their secret aspirations will reach the ever-listening ear of the "Lord of Sabaoth," and in due time He will arise for their help and preservation. Many of us doubt feel weak, despised, and outwardly isolated; but let none give up to discouragement, remembering "that the race is not to the swift, nor the battle to the strong," and the comforting promise, "Fear not little flock; for it is your Father's good pleasure to give you the kingdom."

As a feeble voice from this far-off land, I desire to send words of encouragement and greeting to all these faithful watchmen on the walls of Zion—build up the waste places

and repair the breaches, and an everlasting heavenly crown will be your glorious reward!

J. B.

San Jose, California, 7th month 15th, 1877.

For "The Friend."

The reading of the lines "Finish thy Work," brought to recollection the interesting account published in a former volume of "The Friend," of the last interview between Ruth Ely and Christopher Healy, which was as follows:

"After the Second month Quarterly Meeting (Becks), 1851, C. H. visited his ancient friend Ruth Ely. At the time of parting he took her hand, and said, 'Farewell! Perhaps we may meet again in mutability, and perhaps we may not.' 'It seems lively with me,' said Ruth, 'to say to thee what two valuable Friends said at parting: one said, 'We may see each other again,' to which the other replied: 'No; when thou comest this way again I shall be in Heaven.' Ruth added, 'I believe I am waiting—I had thought I must go out again; but I believe I am waiting.' Christopher said, after a pause, 'I must tell thee what I once heard a good old Presbyterian say to one who thought he was waiting: 'There is no waiting state until the work is done.' Then said Ruth with great solemnity, 'I must see what remains for me to do yet. This has been a very pleasant visit to me. The unity that has always been between us, is not to be broken, neither heights nor depths nor anything in this world can separate us.' After this interview R. E. paid several visits that were upon her mind, to her own comfort, as well as to that of the visited. She also got out once to meeting. When the work being done, and the waiting state attained, she was suddenly called home to the joy of her Lord, on the 18th of 3d month, 1851, in the 83d year of her age. The next time Christopher went that way was to attend her funeral, at which time he intimated he should soon follow her; in about three weeks after he was taken sick, and on the 16th of 5th month departed this life. An easy passage was mercifully granted him, his close being calm and peaceful; and his last words, 'Peace, peace!'"

Selected.

FINISH THY WORK!

Finish thy work, the time is short,

The sun is in the West;

The night is coming down, till then

Think not of rest.

Yes, finish all thy work, then rest;

'Till then, rest never!

The rest prepared for thee by God

Is rest for ever.

Finish thy work, then wipe thy brow,

'Till thou art free from thy toil;

Take thy breath, and from each weary limb

Shake off the soil.

* * * * *

Finish thy work, then go in peace,

Lili's battle fought and won;

Hear from the throne the Master's voice,

"Well done, well done."

Finish thy work, then take thy harp,

Give praise to God above;

Sing a new song of thankful joy

And thanks to love.

Give thanks to Him, who held thee up

In all thy path below;

Who made thee faithful to the death,

And crowns thee now.

—Bonar.

For "The Friend."

Random Notes of Travel in Europe.

(Continued from page 369.)

Brussels.—8th mo. 20th.—Arrived here yesterday, having stopped on the way for a few minutes at the Hague, and Delft—the parent of pottery. We had quite an interesting party in our compartment,—a government officer and his wife, from the Cape of Good Hope, absent from his post on account of his health, but expecting to return to the Cape in a few months. He informed us that he had been away from his own country, Holland, for thirty years. He and his wife were so affable and intelligent, and showed such a lively interest in the country through which we rode and from which they had been so long parted, that the time passed rapidly away. The wife was the daughter of a colonist, born in Africa, and her complexion, unlike that of her husband's, which had retained its freshness, stamped her at once as a native of a warmer clime than this. They had one beautiful child with them. Ah! said one of our travellers, what a pity that so pretty a child, so sweet and innocent, is obliged to learn to talk in Dutch! "Ja wohl!" (just so) mentally replied some others, not distant.

The country gradually lost its low, level appearance as we entered Belgium, and became, at least, undulating, before we entered the beautiful city of Brussels, its capital. The houses are generally of brick and stone, covered with a white cement, which gives them a very pure appearance, the dazzling whiteness being rather obtrusive beneath a noonday sun. Later in the afternoon, we walked through the old part of the town, treading its narrow streets, and ere long found ourselves in the Grand Place, opposite the famous Hotel de Ville, one of the grandest municipal palaces in the kingdom. The tower, of Gothic workmanship, was built in 1444. The abdication of Charles V. did not take place in this Town Hall, as is often stated, but in the old Ducal Palace, which was burnt down in 1733. It was in this square, before the Broodhuis, or Maison du Roi, which is now in course of repair, and therefore inaccessible, that the Counts Egmont and Horn were beheaded, by order of the Duke of Alva, in 1568. Their statues have been erected on the spot where they were executed. This great square, where an active traffic in flowers was being carried on, is very picturesque and imposing. Each side is formed of fine old houses, the Halls of various Guilds, or corporations. (Quaint carving, singular devices and inscriptions, told a tale of former greatness. The buildings are of stately height, without exception. It was in Brussels that the Protestant Confederates met, and drew up the celebrated "Request," or petition to Margaret of Parma, and their efforts finally led to the deliverance of the Netherlands from the yoke of Spain.

The famous Brussels lace, the special manufacture of the place, adorned many of the shop windows. "American ladies are requested to look at this!" was placarded on most of the gossamer robes exhibited at full length, in the windows. We were told, that these expensive dresses are rarely purchased, except by Royalty and our own country women!—a circumstance which we did not consider at all flattering to our national pride.

The field of Waterloo lies about 12 miles from Brussels. Sixty years had passed away since the cannon of Napoleon had thundered

from the heights around La Belle Alliance and Hougomont, or had swept across the narrow valley which lies between the former and the opposite eminence, where Wellington had stationed the centre of his army. And yet our guide, Pierson, gave us such a vivid picture of that eventful day, learned from his father, who had been a soldier in the French army, that one could readily understand how the battle had been fought and won. The great Belgian mound stands in the centre of the field, surmounted by her lion, who looks frowningly towards France. Beneath this small mountain are buried many of the dead who fell on that day. Near this is the museum containing a great number of relics, which no doubt are genuine. Around this was gathered a small group of men, among them the elder Pierson, who seemed very old and feeble. "Ah!" said the son, in his broken English, "my father used to say that he saw two Napoleons on that great day of the battle. In the morning he was lively and in good spirits; but in the evening, he wished that he might die! Ah, sir! he lost all hope when he saw Blucher come up that road round the hill, yonder. At first, he thought they were his own troops coming to his assistance, under Grouchy. And sir, I did take the Duke of Wellington around the last time he was ever here. He did say that they had spoiled his battle-field for him, by levelling down this little hill." He said he never wished to see the place again!" The hill he indicated was that to the left of the Lion mound, where the Duke had established his head-quarters, and which had been partially levelled, to form that, so preposterously surmounted by the Belgian emblem.

"And I had the pleasure," he added, "of taking Victor Hugo over the field, madam, which he wished to describe in one of his books that he was writing." He mentioned many other celebrities, whom "he had the honor of escorting."

The Prussians call it the battle of La Belle Alliance. The ground itself is undulating, and now divided into fields of grain and grass, among which the red poppies were conspicuous; their sanguinary color, harmonizing with every recollection of this fateful place. The day was dark and dreary, a drizzling mist giving a chill to the morning air. One solitary American, "from Boston," was wandering about, alone with his pocket guide, determining the localities for himself. Pierson took us to his cottage, not far from the museum, and gathered a bouquet of flowers for my acceptance. And I remembered that for years after the terrible carnage of that day, the corn and grass, "waved thickest, and were of a darker color," here than in almost any other place in Belgium.

From the thick sedge, the tangle, the dread heaps That late were living energy and youth, Hope enlows and lofy daring; strength, Which raised again from that corrupting soil Thro' Arden's desert unto utmost Rhine Might have spread culture; throughsands whose breadth Might have covered the breast of moorn, Or joyed the banquet, or with gifted hand Waked the cœstic lyre, adorning still With rich diversity of active power, Cottage or palace."

For a thousand years Europe has called herself a Christian land, and yet for a thousand years the purple tide of war has rolled unchecked over the nations. Some feeble voices have been raised in protest, here and

there; some minds found clear enough to discern, that this Juggernaut destroyer and debaser of the people, contained the very essence of all that is most opposed to the spirit of Christianity; that war is a barbarous and cruel pastime, which while kings play at, the burthen and the misery which follow the disastrous game must ever fall most heavily upon their oppressed people.

At the Weertz gallery of paintings, in Brussels, a curious collection, the product of a young artist of that name, now deceased, we noticed a full-length portrait of Napoleon, with his military cap drawn down in front over a dark frowning face, standing in the midst of flames, while women, kneeling around him were offering him blood to drink; and others were exhibiting broken limbs to his stolid gaze. It was a fearful picture. As we walked through the streets on our return, we saw a woman and a dog harnessed to a small wagon, and walking along as though they were quite accustomed to the companionship! Sitting at an open window were a number of old women, plaiting straw, and my companion, a young American girl, stopped to speak to them. She had spent the preceding winter at Heidelberg, with her family, to perfect herself in German, and was thus enabled to hold quite a lively conversation with the women. They told her they received about four cents (our money) a day for their labor. These, we thought, are among the consequences war and its excessive taxes bring upon an oppressed peasantry.

The Belgian farmer has no superior. In his economy of space he tolerates very few hedges or boundaries of any kind. It seems literally as though almost every inch of land is cultivated to its highest point. The fields are small, frequently in long narrow divisions, a light green contrasting, perhaps, with a light yellow, or brown with a warmer tint, giving to the whole country the appearance of a rich mosaic pavement. Very few single houses are seen, the farmers collecting in villages, and going from thence to their daily labors. Many of their habitations are spacious with every appearance of comfort, but far the larger number are small and rather dilapidated. I think Europeans care far less for the exterior of their dwellings than we do.

The Belgians differ from the Dutch in several essential points, and are incapable of any permanent union with them. While the Hollanders are Protestant and enlightened, ardent advocates of liberty, and have exhibited many striking traits of heroic patriotism, the Belgians are French in inclination and Roman Catholic in religion. Though free from the dull, plodding patience of their neighbors, the Belgians are equally devoid of the high-minded courage and ceaseless perseverance which have distinguished the Dutch. Though lovers of liberty, the Belgians have ever been dependent on a succession of foreign masters; and says Hallam, "Liberty never wore a more unamiable countenance than among her burghers," who had purchased their freedom by contributions to the Crusaders, and "who abused the strength she gave them by cruelty and insolence." The statues erected by a people are often emblematic of their character; those of the learned Erasmus, the Prince of Orange and Laurence Coster, one of the inventors of the art of printing, adorn the cities of Rotterdam, the Hague and Haarlem respectively; while an equestrian statue of Godfrey

of Bouillon, a leader of the Crusaders, occupies the most conspicuous position in the Place Royale in Brussels, and which would have found no place among the worthy and enlightened Dutch.

For "The Friend"

In looking over the 6th month number of "The Friend" (London), containing some account of Dublin, Philadelphia and London Yearly Meetings, I observe the following remarks by the editor. "It would have been an easy task to have expatiated on the evidence of weakness disclosed in the proceedings of all the Yearly Meetings we have spoken of. I have been a more grateful, and we think a more useful task, to dwell upon the manifestation of life, and to point to the indications of useful service accomplished by the recent gathering in Philadelphia, Dublin and London." This amiable spirit dictating the sentiment of paramount usefulness to dwell on the good and omitting to point out "the evidences of weakness" may be commended; but I think the sentiment itself a mistaken one, especially in times like these in our religious Society, when it continues to be a mooted point, among its members, whether it shall adhere to its original faith and testimonies, or consent to abandon many parts of them, as is persistently urged upon it.

Certainly it is far more grateful to dwell upon "manifestations of life" and "useful service," than to point out and expose error; but where those errors involve fundamental points of gospel truth on which Friends have been called to differ from other christian professors, their condemnation is, at least, of tantamount importance.

As indicating conclusions to which the doctrines introduced among the members of latter years, must naturally lead them, I offer for publication the following extract from the account given of the proceedings of Dublin Yearly Meeting. They may not be taken as the controlling sentiment in that meeting, but there is no evidence in the account of any rebuke or condemnation having been extended by the Clerk, except his denial that the meeting had given liberty to partake of the ordinances. The criterion remains unchanged, "By their fruits ye shall know them."

"T. P., Jun: The world accounts us a practical people; but are we? I sometimes ask myself, Why am I a Quaker? It is a very small body. It has had a great influence in proportion to its numbers. If we got six Friends together, and asked them what Friends' principles were, they would not agree, because they have not been instructed by pastors. Other bodies increase rapidly; why do we diminish, if we hold the truth, and we are told the truth must prevail? Discipline should be secondary, but it was important, and we should be loyal to it. Our young people are losing our distinctive views, because they were not taught. Evangelising is not the only service for ministers. We want authoritative teaching of our views,—in fact pastors. Our ministers have not the opportunity of giving pastoral care. We make them support themselves; this involves some nine hours' secular work every day. We have elevated notions into principles. With the present competition in business there is almost an impossibility of carrying out the service of the Church. When a man is known to be called of God to be a pastor, he should be set free

om business cares and duties, for the duties of a pastor. The question of pastoral care must be taken up. The time has come to do so. The laborer is worthy of his hire, and the Church should support him. I believe in the freedom of the Gospel; but when a man is proved to be a minister of the word, he should be supported. The best of the Society have joined other Churches, because they can get over the pastoral care and spiritual food they need. The Epistles are all to Churches, building them up in the faith. I do not believe that States will cease fighting in this dispensation, but that we, as Christians, cannot fight. Many of our members have been baptised with water; many take the bread and wine because they have not been instructed. All are called to preach, but all are called to live Christ. The man in his family, in his business, in the world, can preach the Gospel by living it. We can do this without imitating the old Puritan type. I don't at all agree with those who say that numbers are nothing, think we are in a low state; many other churches are in a higher spiritual state.

J. P.: It is agreed by common consent that we do not help ministers enough. Our ministers should use the simplest words in language so as to be understood by the young and old child. Our ministers avoid preparation; how can they communicate the truth in the best and most forcible words? We rarely feed Christ's lambs. Our ministers should lapt five minutes of each sermon to little children; they should avoid the sing-song style and try to draw the people. We should so endeavor to supply all our congregations with ministers. There is no authority for silent meetings in Scripture.

J. W. quoted Phil. ii. 15. Are we shining as lights, and holding forth the Word of life? That cannot be done by silent meetings, but by waiting on the Lord and going under the guidance of his Holy Spirit. We could have means for taking hold of ministers and supporting them; we should have prayer-meetings and a missionary school in every meeting; we ought not to allow our young members to leave us.

J. R. wished to see the old paths, and walk therein. In reference to worship he quoted 1 Cor. xiv. 24-26. This was not "one-man ministry." The spirits of the prophets are subject to the prophets. Has every member liberty to sing a psalm? When Friends are brought to the bed of death they often enjoy to hear the singing of hymns. In rebidding to sing we are departing from the apostles' teaching and the early Friends' doctrine. If our meetings for worship were light they should be open for praise and prayer. Every one that hath a psalm let him sing. How often we listen to long tedious discourses, and the singing of a psalm could bring life. We are quenching the Spirit. We shall never come to a right state until we have full liberty.

M. P.: The great error has been in con- viding the Church with the congregation, as George Fox's day the Society was mainly composed of converted men; such is not the case now, owing to birthright membership. Church officers are sometimes appointed of one who are unconverted. The life should be Christ-like and real; the tongue, also, could confess Christ. It is by the foolishness of preaching souls may be saved. We could judge no man, but those who are born

again ought to know it. Appointments in the Society should be confined to those who confess the Lord Jesus. "Be ye not unequally yoked with unbelievers." (2 Cor. vi. 14). God's work should only be done by God's people. The last people I would advise a young man who had been converted to join would be our Society, so long as that principle is unrecognized. I draw great comfort from our new Queries. I avail myself of the liberty of taking the bread and wine; the liberty of singing should be allowed.

M. G. would not find fault with Ministers and Elders; we should place such means at their disposal as would free them from business care. Take Dublin Meeting: a large number of its members are in another congregation during our own meeting time. The system of not contributing to the support of ministers was wrong. Within two years two ministers had commenced their ministry in Dublin, and are now in the provinces because business led them. He thought where they commenced their ministry God intended them to remain. I press on Friends that we ought to provide means for them to give up their time. Early Friends had no testimony against maintenance.

The Clerk corrected M. P.; we did not give liberty to partake of the ordinances, so called. J. R. would have holy Scripture read at the commencement of meetings; take a Gospel and read it consecutively through, and let members know beforehand, and study it through the week. Prayer was needed, we should be rightly so engaged. God will not withhold the spirit of prayer. Elders should feed the flock; if one of them would speak on the Scripture so read, it would be of use to the body at large.

A. A.: The Society will have to look at M. G.'s view. It is the duty of the Church to look around and see if there are any of that class who are not giving enough time to the work to liberate them, so as to enable them to devote themselves to the service.

A. W.: What has been said deserves consideration, especially T. P., Jr.'s remarks. Friends are so engaged in business, that they have not time for pastoral work. Persons are obliged to give so much time and attention to providing for their families that they cannot give themselves wholly to the work of the Gospel, as Timothy was enjoined to. I believe there is in this country an opening to go out into the highways and byways, and bring souls to Christ. In other bodies ministers continually visit their flocks; a relative of mine has lately gone to the North of Ireland, and although he was a member of the Church of Ireland, three ministers endeavored to get him to join their congregations. There is a lukewarmness among us. I feel much discouragement, although the Society is more healthy than four years ago. There is less regularity in the attendance of Meetings. Our Afternoon Meetings can scarcely be kept up, and Week-day Meetings are badly attended. What is the cause, and the remedy?

P. G.: We'll have to unlearn what we have learnt. If we have a true ministry there will be men to help them. There is too much of conferring with flesh and blood; would that it were more consistent Christians! It was a mistake to suppose that a minister must wait fifteen or thirty minutes before he can preach. We are told that if a

minister is asked to go anywhere and preach, that he cannot do so unless he is specially moved thereto.

W. W.: Our testimony on baptism and the supper is not neglected; very little is said that children could not understand. He that ministrereth let him wait on his ministry; at small meetings we could not get supplied by appointed or paid ministers. Concerned Friends not recorded might visit such and be blessed.

J. O. G.: How many of our members attend other places of worship? Do we really believe we are right? if so we should be willing to spend and be spent. There was worldly-mindedness,—want of food,—of entire consecration among us. Our Lord is as good as His word: "Where two or three," &c. There is a quenching the Spirit. If a Friend stands up and reads three or four verses there would be a condemning of that individual. If one felt moved of the Lord to sing a verse he would be condemned. E. J. had said that the trees in Lebanon became covered with a parasite. Let the fire of the Lord come in and burn up all our parasites.

J. C.: We differ in mind as much as in our features. If we had anything of paid ministry would it not lead the young Friends to think there was no room for them? Poor congregations have to put up with poor talent or young men; they soon desire to be called "Reverend," get priest-like, adopt a white necktie, and go on to Ritualism, and sometimes to Rome. If we have any testimony to hear it is to the freedom of Gospel ministry. Our children are more useful than we used to be.

The main and proper business of every traveller, who would succeed in his journey, is to keep close to his Guide, whether the road be joyous or more afflictive. Sometimes, by endeavoring to take a shorter, and, at other times an easier path, people have insensibly wandered away, and gone on without going forwards, and their mistake has been fatal. Sometimes a smooth path has, by its seeming straight direction, and contiguity to the right one, diverted us from arduous labor, and we have been induced to choose present ease, at the expense of true peace; and the danger of final miscarriage hath been hid for a time, but at last appeared with awful weight; happy where timely enough to retrieve the mistakes resulting from former indulgence or inattention.—*Samuel Fothergill.*

THE FRIEND.

EIGHTH MONTH 4, 1877.

True as is the declaration that no man liveth to himself and no man dieth to himself, it is no less true that every man liveth and every man must die by himself. Whatever the condition of life in which we may be placed, whether surrounded with friends near and dear; sharing in the joys of a happy domestic life, and participating in the active or passive duties and reciprocated helps of social and religious society; or passing a life of toil, in comparative obscurity, amid the struggles of penury, the paucity of home comforts, and but few of the advantages of enlightened or genial christian support and sympathy, each

one of us stands alone in our responsibility, each one must work out his own salvation, if it is ever effected, and each one must meet along the solemn summons to death and judgment.

However the obligations of religion may connect us with the interests of our fellow men, and the sensible experience of Divine love expand the heart in tender solicitude for their present and eternal welfare, yet in the individual relations to the Author of our existence and Judge of our eternal destiny, the soul is disconnected from all others and stands alone in its allegiance or revolt, in its temptations and conflicts, in its condemnation for disobedience and its reward for well-doing.

How should the conscientiousness of this truth stimulate each one to frequent self-examination, with sincere desires to see ourselves in the light of Truth. To discern whether our associations, the example of those whose good opinion we desire to cultivate, or the force of prevalent sentiment or practice, one or all may be inducing us to pursue a course which the unflattering witness in the secret of the heart at times makes us uneasy with or condemns, but which we may be extenuating to ourselves on the plea that we are countenanced in it by others, and that, under the circumstances, we may be excused for conforming to the general way of speaking or acting, for fear of giving offence or causing ourselves to be evil spoken of. Where this feeling or reasoning is allowed to have place in the mind, Satan is not wanting with his sophistry to persuade that a little more conformity to the views of others is unavoidable, that it will lessen the offensiveness of our religion in the circle in which we move, and perhaps may prevent that which we know to be good being opposed or spoken of disrespectfully.

But man, created originally by the omnipotent One in his own image, and not only endowed with reason but gifted with a measure of Divine Grace, is fitted to receive, to understand and to obey the law of the Spirit of Life written in his heart; and he cannot divest himself of his individual obligation to submit to its requisitions. His free agency is secured by the power of choice; but that power of choice is only between good and evil, between obedience to the divine will made known, or refusal to allow it to rule over him. The consequences of the choice he makes when called to decide, are as fixed as the laws of the universe. Let others do as they may, he must stand on one side or the other of the clearly determined alternatives, and take, though he cannot fathom the depths of the consequences he voluntarily draws upon himself.

How wise, how animating as well as peace-securing is it then to allow ourselves to be made, through the power of Divine Grace, disciples of Him, who, though despised and rejected of men, sticketh closer than a brother, and has assured his obedient children, Lo! I am with you always, even unto the end of the world. Let others say or do as they may, if we keep close to and depend on him, there are no temptations that can assail, no difficulties that may obstruct, no calamities that may sroud our path with gloom, but He will lead us through them all safely, and when we must bid farewell to all, the nearest and dearest, to lay off the shackles of mortality, He will go with us through the valley of the shadow of death, and, having washed us in his own

blood, will finally present us faultless before the throne of his glory.

SUMMARY OF EVENTS.

UNITED STATES.—The strike on the railroads, so far as it interferes with the running of trains, appears to be about at an end, and a hope is entertained that business generally will not assume its usual condition. In some of the coal districts of this State, the miners and iron workers continue to refuse work, and the flooding of mines occasions very heavy loss of property.

The favorable anticipations of the agriculturists of the South and West, respecting the coming season's crops to market, have been clouded by the uncertainty following the attacks made on railroad property, and the embargo laid on railroad traffic. The wheat and cotton crops have been extremely favorable, and they represent the staple products of southern and western buyers of eastern manufacturers. The Agricultural Department reports the wheat crop of this year will be more than 325,000,000 bushels; of which probably 100,000,000 will be available, and in demand for export. A month ago there was a fair prospect that bountiful harvests and a good foreign market, would improve business of all kinds, and help to restore prosperity to the country.

Captain de Hersey's operations on the wrecked steamer Rosland, at Long Branch, resulted in saving 19,000 packages; 500 were lost—of these it is stated not more than 75 were valuable.

The largest silk mill in Paterson, N. J., have received an order from Paris for the manufacture of a certain class of silk goods. This is probably the first order received from Europe for American silks, and comes from the nation which, having made a specialty of the manufacture, stands in the first rank as a producer. The judges at the Centennial Exhibition pronounced the machinery for the manufacture of silk goods superior to any in use in Europe, and expressed the opinion that its products would soon compete with similar manufactures in Europe.

There are only 450 square miles of anthracite coal in the United States. The Reading Company own one-third of the anthracite coal of the United States, and in America 200,000 square miles, and 8,000 square miles in Great Britain.

The wool clip of the United States, for 1876, was about 200,000,000 lbs.; of England, Ireland and Scotland, about 102,000,000, mostly combing; of the continent of Europe, about 463,000,000; of Australia, about 350,000,000; of Buenos Ayres and River La Plata, about 207,000,000. These are the principal wool-growing countries of the world, and produce 1,382,000,000 of the 1,419,000,000 of the entire globe. The selling value of the total clip would probably aggregate \$450,000,000.

A telephone, the first established in New York for business purposes, has been put in operation with the promise of working satisfactorily. The instrument used is the bell telephone. An ordinary telegraph wire passes through Brooklyn to Jackson street, then under the river to the New York side, a distance of about five miles.

The number of interments in Philadelphia for the week ending at noon on the 28th, was 406; 154 of these were adults, 254 children, 161 being under one year of age.

The Markets.—The following were the quotations on the 28th inst. American gold, 105½. United States 6's, 1881, 112½; 5-20 coupons, 1865, 107½; do. 1867, 109½; do. 1868, 111½; new 5's, 111½.

Cotton.—The demand is limited. 380 bales of middling-sizes Orleans sold at 12½ a 12½ cts. per lb. for uplands and 12½ for Orleans.

Flour.—The market is dull. Minnesota extra family, low grades, at \$8.00; choice, \$8.50; fancy, at \$8.75. Pennsylvania do. do., old wheat, choice \$9.50; do. do., new wheat, at \$8.25 a \$8.50. Southern do. do., old wheat, fancy and southern yellow, and 6's a 7½ cts. for western red. Oats, 45 a 48 cts. per bushel for western white; Ohio choice 47 cts.; Penna. do., at 50 cts.

Hay and straw. Prime Timothy sells at \$1.25 a \$1.35 per 100 lbs.; and mixed and new at 70 cts. a \$1. Straw 60 a 70 cts.

Heavy rain, accompanied with heavy thunder and lightning, passed over parts of Delaware

Co., Pa., on the afternoon of the 29th. About nothing but rain fell, and gave way, and the long volume of water thus liberated, caused considerable destruction of property. Still greater damage is reported in the village of Avondale, Chester Co., Pa., from similar causes. The streets of Washington, D. C., were flooded and cars on some lines stopped for a short time.

Foreign. The output of iron in Great Britain said to aggregate 50,000 tons annually; one-third which is exported to other countries. Australia beat the best customer, using 4,000 tons annually. There are over 2,000 varieties of nails and rivets made, some of them so small that 1,000 only weigh an ounce and a half. The best quality of iron for women and boys is 2 to 3 dollars, 4 to 5 for more laborers, and 6 to 10 for men who attend the machines.

The employment of women in the telegraph department has been a complete success in England. Over 1100 are employed in London; and there has been in one despatch in four years. Their hours of work from 8 A. M. to 8 P. M., each being on duty eight consecutive hours out of the twelve.

Last year, in England, 1,249 persons were killed on the railroads, while 1,928 were killed by carriages at wagon.

Times in its financial article says, the discount market is extremely inactive, and money finds employment with difficulty or not at all. A long continuance of this stagnation must prove the reverse of wholesome in many ways.

Late advices from China and Japan, state that China is not so far from the great rice straits districts of the north, and the crops are flourishing, except in some localities where the locusts are committing ravages. It is announced that the difficulty between Spain and China in reference to the Soverna matter has been settled, the Chinese government paying an indemnity to the Soverna's creditors. In the war continues, and drafts of men are sent from the tranquil to the disturbed provinces, but the public are kept in the dark as to the successes on either side.

M. H. De Fontaine, of the Society for encouraging National Industry in France, says the total annual value of the manufactures of France, Germany, Great Britain and America, has almost doubled within the past twenty years, and amounts now to 600,000,000 francs.

The Marquis of Salisbury, Secretary of State for India speaking of the condition of that country, says, there appears strong reason to fear that a second period of famine is setting down over the vast district which constitutes Southern India, and that that famine cannot do other than produce terrible mortality.

Subterranean telegraphing, on an extended scale, is to be tested in Germany—a line between Berlin and Mayence has been completed. The line includes several cities, is 80 long miles, and includes Mayence, Frankfurt, Leipzig, Cassel, Halle and Berlin.

The University of Heidelberg has lost by death, on of its most distinguished professors, Zepf, who, for the past 40 years had filled the chair of German political law.

The Kwidore's Nubian railroad is being rapidly pushed forward, and the first section, from Wadi-Kalfid on the Nile, twelve miles from the second catarract, is signally, has been opened. Six thousand fellows are now upon the second section, the terminus of which is Bengala. The river is to be bridged at Koye. Finland and Norway are suffering from the same country, in consequence it is said of the huts having no chimneys. Norway suffers from the same cause, but less degree. A comparison showed in Norway the blight were 13.6 in 70,000, in Finland 21.4.

FRIENDS' SCHOOL AT GERMANTOWN.

A well qualified woman teacher is wanted for the Primary Department of this school. Preference will be given to one who has had the benefit of a thorough course of normal training. Apply to

Jane E. Mason, School Lane and Wayne St.,
Margaret A. Jenkins, Coulter St., near Wayne
Elizabeth W. Cape, Haines St., Germantown.

WESTTOWN BOARDING SCHOOL.

A well qualified teacher of the Latin and Greek languages will be wanted at the opening of the next session, 10th mo. 29th. Apply to

Joseph Passmore, Goshenville, Chester Co., Pa.
John E. Carter, 624 South 24th St., Philada.
or Wm. Evans, 252 South Front St.,

WILLIAM H. PILE, PRINTER,

For "The Friend,"

Observations on the Rise of the Society of Friends, and the Character and Labors of George Fox.

(Continued from page 402.)

"Fully believing in the fundamental truths of the Gospel held in common by what were called the evangelical churches, he saw that the truths recorded in the Holy Scriptures were often mutilated or rendered nugatory by the construction put upon them by the unlearned in the school of Christ. He therefore constantly taught that the Scriptures could not be rightly understood or interpreted, except by the Spirit which dictated them, and that it was thus and thus only, that the *muti God* may be perfect, thoroughly furnished into all good works. The necessary deduction from this was, that the Spirit itself was superior to the Scriptures which had been written under its inspiration, and by which alone their sacred contents could be rightly interpreted and applied; and as Christ had enlightened every man that cometh into the world with a measure of this Spirit, or Divine Grace, so it was the primary rule of faith and practice; which, however, the Scriptures could never contradict.

"Christ being the glorified Head who alone could prepare for, ordain, and commission ministers in His church, so the ministers made by studying divinity and ordained by men, were not true ministers of the Gospel; but as men and women were one in Christ Jesus, He conferred the gift for the ministry upon both alike, whether learned or unlearned, and both could exercise it in the assemblies of the people, or wherever He called them thereto; and that when so exercised, it must be under the immediate inspiration of Him who alone knows the states of those addressed, and what is the spiritual food convenient for them. That the Gospel must be preached without money and without price, in accordance with the commandment of Christ to His disciples, 'Freely ye have received, freely give.' The several testimonies here enumerated, have been maintained by the members of the Society of Friends, who were led by the same Spirit as George Fox and his fellow laborers, ever since their day, and are felt to be as binding on them now, as they were on them.

"There were few of the testimonies which Friends were called to bear that caused them more cruel persecution and suffering than that relative to the use of the Scripture language

of *thou* and *thee*, and the refusal to bow or take off the hat, or to give the ordinary flattering salutations. Alluding to this, George Fox says: 'Oh! the blows, punchings, beatings, and imprisonments we underwent, for not putting off our hats to men. For that soon tried all men's patience and sobriety what it was.'

The bad language and evil usage we received on this account is hard to be expressed, besides the danger we were sometimes in of losing our lives for this matter; and that by the great professors of Christianity, who thereby discovered that they were not true believers.' [1648.]

"The doctrine promulgated respecting the true character of Gospel ministry, and the testimony borne against receiving pecuniary compensation for preaching, as it struck at the trade of the priests, and of all who made merchandise of what they call the Gospel, naturally roused their opposition and animosity; and consequently there was no class from whom Friends encountered more determined hostility, or at whose hands they underwent more bitter and prolonged persecution than the clergy.

"As the whole tenor of the principles inculcated by G. Fox and the early Friends was calculated to draw people off from the observance of forms and ceremonies, or a dependence on the teaching of men, and to centre their attention on the work of regeneration through the aid of the Holy Spirit in the heart, and also to lead to the attainment of a state of perfection or holiness, through its sanctifying power and influence; these also drew forth much contradiction and resistance from those who wished not to be disturbed in the belief, that Christ having paid the penalty for sin, and purchased salvation for them, there was no repentance, no suffering for sin, no cross-bearing and self-denial necessary on their part; and from those who contended that man could not escape from sinning in this life.

"Besides preaching repentance and amendment of life, G. Fox found a duty laid upon him to go to the courts, or to write to the judges, inciting them to avoid oppression, and to administer justice in all their doings; and also in warning those who kept ale houses and other places of entertainment, not to allow of drinking to excess, nor any immoral conduct; and to declare against all deceit or untruthfulness in buying or selling, likewise against stage plays, gaming, &c.

"Being at Nottingham on a First-day of the week, he went into the 'great steeple house' of the town, and bearing the priest give an incoherent explanation of the text which he took, he testified against it, and explained what he believed to be the true meaning. Whereupon the officers put him into a filthy, offensive prison, where he was kept for some time. Afterwards he was removed to the sheriff's house, who, with his wife, was 'much changed by the power of the Lord'; and allowed him to hold meetings at their

house. There seems to have been a wonderful evidence of divine power attending these gatherings, and many were convinced. The magistrates having neglected to bring their prisoner before the court when it was sitting, he was detained there 'a pretty long time,' and then set at liberty; this was his first imprisonment, and it occurred in 1649. At Mansfield Woodhouse, for speaking to the priest and people in their place of worship, they knocked him down, and he was cruelly beaten and bruised with their fists, Bibles and sticks.' They then haled him away and set him in the stocks, where he was kept for some hours. But, he says, 'The Lord's power soon healed me, and that day some were convinced of the Lord's truth, and turned to his teaching.'

"Travelling from place to place his ministry was so powerful that multitudes were convinced, and regular meetings of Friends were established in many places.

"1650. Being at Derby, and learning there was to be a great 'lecture' delivered there that day, at which many officers, priests, and preachers were to be in attendance, he felt it his duty to go to it; where, after the 'service' was through, he spoke to the congregation what he believed to be required of him. Although the people were quiet, he was taken before the magistrates. In the course of the examination, G. Fox was asked whether he was sanctified? he answered, 'Yes; then they asked if he had no sin? to which he answered, 'Christ my Saviour has taken away my sin, and in Him is no sin.' Being asked how he knew that Christ did abide in us? G. F. said, 'By His Spirit that He hath given us.' It was then temptingly queried, 'If any of us were Christ?' G. F. answered, 'Nay, we are nothing, Christ is all!'

"These magistrates, nevertheless, committed George Fox and a man of the name of John Fretwell to the 'House of Correction' for six months, as blasphemers. J. Fretwell proved unfaithful to the truth and so got released; but G. Fox, refusing the offer of his relatives to the magistrates, to be bound that he would not come any more there, was kept to the end of the six months in his first place of confinement, and nearly six months longer in the common jail. The change in the place of imprisonment took place in consequence of the Commissioners of Parliament, who were recruiting for the army, sending for George, when they knew that the time for which he was committed was nearly expired, and offered to make him a captain in the army, urging him to accept it, and said the soldiers were desirous to have him for their commander. But George says, 'I told them I knew from whence all wars arose, even from the lusts, according to James' doctrine; and that I lived in the virtue of that life and power that took away the occasion of all wars. Yet they courted me to accept of their offer, and thought I did but compliment them. But I told them

I was come into the covenant of peace, which was before wars and strifes were. They said, they offered it in love and kindness to me, because of my virtue; and such like flattering words they used. But I told them, If that was their love and kindness, I trampled it under my feet. Then their rage got up and they said, "Take him away, jailer, and put him into the prison amongst the rogues and felons." So I was put into a lousy, stinking place, without any bed, amongst thirty felons, where I was kept almost half a year; yet at times they would let me walk to the garden, believing I would not go away."

"Notwithstanding the vileness of the inmates of the prison, he was preserved from contamination, and was often engaged in reproving their wickedness and striving to reform them. There being a young woman there who was condemned to be hanged for stealing, George wrote to the judges, showing how wrong it was to take human life for such crimes; that it was contrary even to the Mosaic law, and altogether irreconcilable with the religion of Christ; and moving them to have mercy on her. She was taken to the gallows and there reprieved; and being returned to the prison, she afterwards became convinced of the truth and joined Friends.

"Seeing the pernicious effects resulting from keeping the prisoners so that they could mingle together promiscuously, and the older and more hardened convicts thus have opportunities to teach the younger offenders lessons of vice, and spread and increase wickedness, he thought it his duty to write on his observations and the conclusions to which they had led him, and communicate them to the judges; that they might adopt some measures to arrest an evil so detrimental to the safety of society. This is the first essay at prison reform of which we have account.

(To be continued.)

The Population of the Globe.—The most trustworthy estimate of the number of people on the earth for the year 1876, as furnished by the German statisticians, is 1,423,917,000. This is an increase of over twenty-seven millions on the estimate of 1875, but the augmentation is not the entirely to the excess of births over deaths, but largely to the obtaining of more accurate information regarding the population of regions hitherto little known, and to more perfect census returns from other countries.

Asia is still the home of a majority of the human race, after having supplied shoots from which have sprung great Western peoples. About four-sevenths of the earth's population is Asiatic, or 825,548,599; Europe comes next with over a fifth, or 299,178,300; Africa with about a seventh, or 194,921,600; America with less than a sixteenth, or 95,519,840; and finally, Australia and Polynesia, with the very small fraction of 4,748,600 people. Europe is the most densely populated, having 82 persons to the square mile; Asia comes next, with 48 to the square mile; Africa next, with 17½; and America and Australia have 5½ and 1½ respectively.

There are 215 cities on the earth with a population of over 100,000; 29 of half a million or more, and nine cities containing a million or more inhabitants. Of these last, four are in China. Including Brooklyn with New York, the greatest cities of the world stand in this order: London, 3,489,428; Paris, 1,851,-

792; New York, 1,535,622; Vienna, 1,091,999; Berlin, 1,044,000; Canton and three other Chinese cities, one million each.

Though there are not at hand statistics upon which to base an accurate statement of the fact, yet it is the opinion of all observers of the condition of civilized peoples that the average longevity of the human race has increased within a hundred years. Such reports of the death rate as we have go to support that conclusion, and the devastations of epidemic diseases are not so great now as formerly. In England the death rate has declined considerably during a quarter of a century. There and elsewhere in Europe, as also in this country, the subject of public hygiene has received great attention of late years, and its difficulties are being steadily overcome. The probability is that men now, on the average, live longer than their ancestors and in better average health.—*N. Y. Sun.*

For "The Friend."

Philip and Rachel Price.

It was about the year 1792, that Rachel Price first appeared in the ministry. After a period of probation her service was approved; and some notes left by her manifest the feelings that accompanied the event. "My friends of the Monthly Meeting of Concord thought it right to acknowledge and recommend me to the Quarterly Meeting of Ministers and Elders, as an approved minister. A minute to that effect was furnished the Select Meeting in the 4th mo. 1802. I attended that meeting in the 5th month, when the language of encouragement was handed forth by our valuable friend Eli Yarnall, in his usually impressive and affectionate manner. I considered it a privilege to be permitted to sit with those to whom I felt so nearly united, and to become associated with and placed more particularly under their care; but I found my exercise and concern not diminished thereby, nor my ability increased,—neither were my besetments lessened, by becoming incorporated with such valuable companions. After attending several meetings of the kind, and feeling rather disappointed, as I supposed if all were as good as I thought we ought to be before we were admitted to the Select Meeting, we might expect these to be Heavenly Communications without earthly interruptions,—and querying in my own mind why these meetings were sometimes so lifeless, even more so than the large mixed assemblies, Samuel Smith, of Philadelphia, arose and spoke very interestingly. He said,—"We are informed in the Book of Job, that when the sons of God came to present themselves before the Lord, Satan came also among them; and he believed there was not a station or situation that a man can attain unto in this life, beyond the assaults of the enemy of our souls' salvation; hence the necessity of the sacred injunction to all to watch and pray lest ye enter into temptation: that it is no sin to be tempted, but it is by obedience to temptation that we commit sin." He apprehended there might be present individuals who had not been long admitted to that meeting, and might have expected there would be but little to interrupt the worship in spirit and in truth. He thought it was in the ordering of Best Wisdom, if it was often permitted to be otherwise, that we might feel our own weakness and dependence; that of ourselves we can do nothing to advance the cause of righteousness on the

earth; that no flesh might glory in its own perfection, but that we might lie low in the abasement of self, so that He, whose right it is to rule and reign in our hearts, may direct according to his pleasure. If we who compose this part of the Society, were permitted generally to partake of the effusions of Divine love and regard, we might be induced to think that we had attained a higher state of perfection than our fellow members, and thereby become exalted in our own imaginations, ascribing that to the creature which only and alone belongeth to the Creator. This communion was very instructive and interesting to my inexperienced mind at the time, and strengthening when recurred to since. The substance yet remains fresh upon my memory (at the age of seventy), and I am willing to put it upon record and leave it, hoping that it may afford some comfort to some tried and discouraged minds when I am gone."

For some weeks in 1802, Philip Price traveled with Richard Mott, of New York, visiting the meetings of Friends in the south-eastern counties of Pennsylvania. The services of this ministering Friend are described as having been very close upon the unfaithful, in instances producing deep contrition, but unproductive of full relief to the mind of the faithful laborer, who apprehended he had passed by some meetings that he should have taken in his course. During this and other absences of her husband, Rachel Price directed the business of the household and farm with judgment, and was concerned to attend the meetings with the children, taking with her "seven or eight of them," a distance of two miles to Birmingham.

During the spring of 1804, Sarah Talbot and Rachel Price made a religious visit among Friends in Middle and East New Jersey. Leaving Philadelphia under discouragement, the latter wrote, "With health not very good, yet my mind enjoys such a comfortable degree of quietude in the belief that I am in the way of my duty, that I have scarce language to describe the different feelings of my mind now." * * "We are permitted sometimes to partake as it were of a brook by the wayside, whereby we are encouraged to move forward in the ability received, to the relief of our own minds." In the spring of 1805, they continued their travels together among Friends of South or West New Jersey: At Salem, met with John Simpson, Thomas Scattergood, "and many other precious Friends. I felt myself a poor thing among them, as thou mayest suppose, yet am favored at times from a degree of experience to acknowledge that in His presence there is life, and at His right hand there are rivers of pleasure forevermore." "We have been at meeting every day but one since we left home. Surely, some may say, we might be very good by this time, if going to meeting would make us so; but if we are but made sensible from time to time, that we are in the way of Divine appointment, and suffered to partake of even the fragments of the true bread, after witnessing it to be broken amongst us, so that we may know that we do indeed live, I believe we shall be satisfied." At Egg Harbor, R. Price probably first saw the ocean, with the lively sensibility and reverential emotion with which the great works of the Creator ever impressed her sensitive mind. "I am seated at the window, delighted with beholding the waves of the sea continually rolling, wave after wave, and

reaking on the shore. Oh, how awfully majestic,—how great the power, that hath et bounds even to the sea, and said: thus far shalt thou go and no farther: There shall thy proud waves be stayed." He hath placed the and for the bond of the sea, by a perpetual decree, that it cannot pass it; and though the waves thereof toss themselves, yet can they not prevail; though they roar, yet can they not pass over it."

The journey was pursued to satisfaction, but under circumstances of trial and discouragement to the partner left at home. She writes, "I have found my mind very much ensigned to my present allotment, whether in heights or in depths, so that I am but made ensic that I am in my place, and through Divine favor I may say (I trust without boasting) that I have from time to time felt the upward of sweet peace, which is all I crave for myself, hoping that thou wilt be made a partaker of a large share in thus giving me up." "Oh! patience and resignation to Divine allotments, how much do I still want of their influence to bring all into subjection, and be able to say, 'not my will, but Thine be done in all things!' and to bear crosses and adversity with the same calmness and fortitude as if all prospered, and was to our outward desires. Perhaps it is best for me to feel the hand of adversity and disappointment, lest I should grow forgetful and lose the sense of a grateful mind for the favors that are enjoyed." And again,—"I believe I have felt thee to be as near and precious to my life as at any time of it; indeed, our separation, I think, has felt more trying. I have been almost afraid to put my pen to paper to communicate with thee, lest I might imprudently drop something that might do more harm than hearing from us would give comfort, as it has not been my allotment to be much refreshed with the stream of consolation since thy absence; but enough, lest I now commit the error I have been afraid of."

The Land of Midian.—Gold, silver, and tin have been found in large quantities in the land of Midian. An expedition, sent out by the Khedive of Egypt, and in which Captain Burton occupied a prominent position, made this discovery, and it also found that each ruined town had its mining works, dams for washing the sand and crushing the rock, showing that a busy mining population had existed in this interesting region, which is said to be full of mineral wealth.—"T. B." writes to a contemporary from Weston super-Mare:—"With reference to the recent discoveries of Captain Burton, that the land of Midian abounds in gold, silver, tin and antimony, and that the country seems to be full of mineral wealth, it is interesting to note the fact, as recorded in the Old Testament, of the Midianites having not merely personal ornaments of gold, but tablets of gold and chains for the camels' necks, showing the great abundance of this metal. Among the spoils brought from the land of Midian (Numbers xxxi) were 'gold, silver, brass, iron, tin, and lead'; and in another expedition the quantity of gold taken was so great that Gideon made an ephod thereof, and set it up in his city (Judges viii). The discoveries of Captain Burton, if they should be verified, will be a remarkable confirmation of the truth of the Holy Record."—*Record.*

The Poor.

For "The Friend"

"Hearken my beloved brethren, hath not God chosen the poor of this world, rich in faith, and heirs of the kingdom which he hath promised to them that love him."—James ii. 5.

We have often been impressed with the forcible and beautiful application of the above text to many of those loving disciples whose poverty as well as humility, hide them from the notice of their fellow believers. They doubtless look at times with yearning hearts toward these: wishing, longing, for a kind recognition of their brotherhood, while the latter, in their social superiority pass them by, not exactly in a para-saical spirit, but with a thoughtlessness which some would do well to check in their intercourse with other men. One is your Master, even Christ, and all ye are brethren, is too broad a truth for any to ignore lightly. Many a mind well stored with the truths of the gospel, learned in the school of Christ—heart-knowledge, not mere head-knowledge—is found under the rough and soiled clothing of a day laborer. Many a precious soul, beloved of the Master, waits in the neglected poverty of this life, to be clothed upon in the life that is to come with the robes of righteousness which await the ransomed and redeemed who have loved their Lord here. Many a heartful thanksgiving is poured out over a humble meal; a meal which would be rejected by some of us who think ourselves humble Christians.

These lessons of trust—even that of waiting day by day for outward food, teach those in humble life where to look for help, and tend to lead many to apply to Him who can satisfy all their wants, spiritual as well as temporal, and very preciously do some learn the lessons. Truly these are those to whom the language of our dear Lord seems peculiarly applicable,—"Blessed be ye poor, for yours is the kingdom of heaven," and would it not be well for some of us were we more free to hail them as brethren beloved?

These thoughts were principally drawn out by the perusal of the following letter addressed to an aged colored man, by his wife. He is one who has learned to love his Lord, and who can also see the beauties with which the earth is clothed as the work of his loving and trusted Master, greatly thankful that he has been joined to so loving and pious a helpmate. The simplicity of the letter does not detract from its merit. It is as follows:—

"My dear husband,—It gives me much pleasure to hear from you, and I am getting along, thank the Lord, very well. * * Things are going on well. I am going to get the room plastered, do you think well of it? Take good care of yourself, for you know my happiness depends on your welfare. Remember your wife in your prayers, as I do you in mine.

Your affectionate wife."

Many children among us sustain a grievous loss by not being early and properly made acquainted with the principles we profess. For want of this instruction they become too easy a prey to the entomings of the world; and those habitudes, which should be as a kind of hedge about them, and protect from many temptations, are thrown down, and all the allotments of vice and folly suffered to reduce their affections, to their ruin.—*Dr. J. Fothergill.*

From the "Philadelphia Inquirer" of 7th mo. 18st.

Tropical Fruit.

Not many years ago tropical fruits, such as oranges, lemons, pineapples, bananas, and coconuts, were classed among the luxuries of life, and, yet, strange as it may now seem, the demand for the comparatively small quantities imported was not sufficient to give such luxuries an excessive value in the markets. The great mass of the people, content with the yearly cycle of domestic crops, were unwilling, except on rare occasions, to incur the slight additional expense of feasting on the luscious products of other countries, and it was only by the persistent efforts of a few enterprising importers that the consumption of tropical fruits became general. Now, however, the man so poor as to be unable to purchase a pineapple or a few bananas for his family table is poor indeed, while oranges and lemons have become some of the necessities of life in the summer season. Every city has some large importing house with numerous fast sailing vessels constantly endeavoring to supply the ever-increasing demand, and yet it is only in exceptional cases that the markets become overstocked, a very slight reduction in price being usually sufficient to regulate the demand to the supply. For the trade in this city there are 22 vessels engaged.

Oranges and lemons are brought direct from the Island of Sicily between the first of March and the latter part of July; after that time they are shipped from Sicily to Liverpool, and then transferred to steamers. Florida oranges make their appearance in the market in September, and continue until the 1st of March, the Sicily trade in the meantime reopening about Christmas. Bananas of the yellow variety are brought by fast-sailing schooners from Port Antonio, at the east end of the Island of Jamaica, and the red bananas come from Baracoa, Cuba. Pineapples are nearly all shipped from the Bahama Islands, the red variety being transferred to vessels at Abaco, Eleuthera, and the sugar loaf from San Salvador. A few pineapples are sent from Cuba, but fully nine-tenths come from the Bahama Islands. The trade in bananas and pineapples is now at its height, the vessels arriving daily loaded to the deck with the fruits. The demand for coconuts, however, is quite steady all the year round, as they are largely used in the manufacture of confections. Coconuts are grown in the islands which produce bananas and pineapples, and in shipping make excellent ballast. One firm in this city has this season imported about 135,000 bunches of bananas, 1,500,000 pineapples, and 2,000,000 coconuts. One Philadelphia confectioner alone uses over 300,000 coconuts annually, and his is by no means the largest house in the city.

About the middle of this month the peach season opens, and this year's crop will be one of unusual abundance. The first shipments come from Georgia by rail, and then the points of export move gradually north through South Carolina and Virginia to Maryland and Delaware, when the season reaches its height. Small quantities of the fruit are now arriving from Macon, Georgia, coming through on fast express trains, but those expected from Charleston will be sent by steamer. Between the latter part of July and the middle of August the California fruit trade, introduced last season, will open. These shipments include peaches, apricots, early plums, summer

pears, grapes, &c., over two hundred tons of California grapes being already engaged. The winter varieties of California pears begin to arrive in September. The great drawback on this trade is the immense freight, which often amounts to over \$1,300 a car.

One of the most interesting features of the tropical fruit trade is the almost superhuman effort necessary to bring them from the shipping ports to the markets with sufficient speed to prevent the fruit from becoming damaged. Twenty-four hours' delay is frequently enough to ruin an entire cargo, and the secret of success, therefore, lies in the employment of the fastest sailing vessels that can be made, and the service of experienced and fearless seamen. When the vessel once spreads her sails to the wind nothing but the most imminent and certain danger is permitted to interfere with her onward course, many captains keeping on full sail in the midst of a hurricane which few mariners would care to face. These fruit schooners may sometimes be seen on the ocean flying along their course, while other sailing vessels are making ready for a coming gale, and it frequently happens that in a storm the captain will refuse to reef a single yard of sail as long as there is one chance in ten of the vessel keeping afloat and making good time. Some idea of the fleetness of these schooners may be gained from the fact that the *Baracoa*, Captain McClintock, while hellsome some trivial custom offence under the guns of a Spanish man-of-war, suddenly spread her white wings and was far out in the high seas before the steamer could get within cannon shot of her stern. As soon as the peach season fairly opens the market for tropical fruit will decline, and continue at a low ebb until the latter part of the year, when the new cargoes will begin to arrive.

Extravagant Funerals.—The practice of impoverishing the estates of decedents by means of imposing and extravagant funerals, is severely criticized in a recent opinion delivered by Judge Rheme, of the Orphans' Court of Luzerne county. In a case in which the personal estate of the deceased was proven to be but \$551.82, an administrator sought to have the court allow the sum of \$139.75 for the expenses of burial, which was one fourth of the whole personal estate. This allowance Judge Rheme refused to grant, and, in his decision, after saying that "pompous processions of great length, glistening silver-plated casket and carved marble monuments, are unnecessary for Christian burial," he sums up his view of the law of the subject in the following words: "Such parades as are called 'fine funerals' may gratify the vanity of the living, but no respect for the dead demands them, and when a decedent's estate is limited and his debts are not paid, or where he leaves a family of helpless children, the expenses of such burials will not be allowed out of his estate. Those who contract for and enjoy such luxuries must pay for them themselves."

—*Late Paper.*

1810. The last sitting of the meeting of ministers and elders was held, and we were favored to separate under that solemn covering of silence, which subdues imaginations, and brings the thoughts into captivity; a marvellous power prevailing over the mind, which no words can fully set forth; it is more

precious and more refreshing to the immortal spirit than words can be.—*M. Capper.*

“HE LEADETH ME.”

“He leadeth me!” “He leadeth me!”
What joy the words impart,
Inspiring me to greater zeal;
Take courage, fainting heart.

When though the way be dark and drear!
This thought my fears dispel—
He'll lead me safe, through storm and strife,
Where saints and angels dwell.

Grant me to know from day to day
That I am owned of thee;
Be thou my Guard, be thou my Way,
O'er life's tumultuous sea.

O may I trust my all to thee
Whatever may betide!
Thy promises are ever sure,
My Saviour, and my guide.

And when my life-work here is done,
Its joys and sorrows o'er,
Take me to reign with thee above,
Where sin molests no more.

—*Christian Advocate.*

PATIENCE.

A gentle angel walketh throughout a world of woe,
With messages of mercy to mourning hearts below;
His peaceful smile invites them to love and to confide,
Oft follow in his footsteps, kept closely by his side!
To soft and tearful sadness he changes dumb despair,
And soothes to deep submission the storm of grief and care;

Where midnight shades are brooding, he pours the
light of noon,
And every grievous wound he heals, most surely if not soon.

He will not always answer thy questions and thy fear,
His watchword is, “Be patient, the journey's end is near!”

And ever through the toilsome way, he tells of joys to come.

And points the pilgrim to his rest, the wanderer to his home.

—Select 4 for “The Friend.”

Hat Honor.

William Penn, upon the occasion of a serious conversation with the Graf of Donau, at the house of the noble Princess Elizabeth of the Rhine, thus alludes to this very formal, vain, and world-conforming custom.

“This,” says W. Penn, “*choketh*; and the rather, because it telleth tales; it telleth what people are; it marketh men for separatists; it is blowing a trumpet visibly across the world; and that the tear of man (greatly prevalent with too many serious people in that land,) cannot abide, but starteth at, and runneth away from.

“Howbeit, the Lord enabled me to open the title to him; as that it [the hat honor] was no plant of God's planting, but a weed of degeneracy and apostasy; a carnal and earthly honor, the effect, feeder, and pleaser of pride, and of a vain mind, and that no advantage redounded to mankind by it; and how could they, that ought to do all to the glory of God, use that vain and unprofitable custom, which cannot be done to the glory of God? I entreated him seriously to consider with himself, the rise and end of it; whence it came, what it pleased, and what that was, which was angry that it had it not?”

He reminded this great man, of the sincere and serviceable respect which truth substituted in the place of this unmeaning ceremony; and after exhorting him to simplicity and poverty of spirit, and to be like that Jesus whom he professed to take for his Saviour,

they parted; the Graf taking his leave of them, with great civility.

Would that all the members of a Religious Society, called away from the pride-plearing and carnal deceitful honors of a world that lieth in wickedness, might look this conformity to a degenerate custom full in the face and thence, finding it an unmeaning ceremony, and “no plant of God's planting,” be, on all occasions, watchful over themselves even with a holy jealousy, lest the compromise of this righteous testimony, and a paying of tithes into the world's coffer, prove the loss of spiritual strength, by a denial of the Truth and a turning aside, through pusillanimous fear, from a faithful maintenance of the testimony and cross of Jesus we are so manifestly called to support before the people.

To the Lord alone this honor belongs; and in paying it to our fellow-worms, we rob Him unto whom every knee must bow and a whose feet every cross be laid, of that which is so pre-eminently his title and due.

As it is generally by despising or disregarding the day of small things that any gradually fall away from virtue and a self-denying straightforward walk before the Father of spirits; so on the other hand, it is by little and little, and through bringing to the Saviour the living sacrifice of obedient hearts that we can gain in spiritual stature and in the saving knowledge which is life eternal. Let none of us then compromise the Truth in what may be called *little things*; neither balk the profession we as a Society make to the world by a weak and inconsistent conformity to a custom, which has its root in vanity and pride; whose branches are an sightly, and fruit bitter.

Laying Submarine Cable.—Before laying a submarine cable between the proposed places it is extremely important to take soundings and otherwise survey the ocean, so as to determine the exact route the cable should take. A cable is too costly to be flung away anywhere on the sea bottom, and the sea bottom is sometimes of a very unfavorable character. It may be said that too little attention has hitherto been paid to this point in cable laying. Expensive cables have been manufactured at home, with their relative length of shore end, intermediate and main, determined by formula and usage, and then laid away in seas whose character had been largely taken for granted, the consequence being that a weighty and very costly shore end has been deposited in mud soft as butter, where it would be out of harm's way, while the unprotected main has been laid along the jagged surface of coral reefs. The depth and nature of the bottom, the strength and direction of currents, the temperature at the bottom, should all be ascertained beforehand by a special ship appointed to survey the proposed track of the cable. The best route for the cable is then laid down on the charts, as a guide to the navigator and engineers engaged in the laying. Great improvements have recently been made in the method of taking deep sea soundings. The ordinary plan is to carry the lead-line (a strong line or small rope of fine tarred Manila yarn) from the stern along the ship's side to the bows, and there drop the lead into the sea. As it sinks the rope runs out off the drum on which it is coiled, and when the lead strikes bottom the running ceases. The introduction of fine steel wire for the rope, by

Sir William Thompson, is a great improvement upon this clumsy method. The wire sinks quickly through the water, and is pulled again with a very great saving of time and labor; but the most ingenious of all contrivances for finding the depth of the sea is Siemen's bathometer, a very recent invention. The bathometer simply stands in the captain's cabin like a barometer, and indicates the depth of the sea over which the ship is passing, just as a barometer indicates the height of the atmosphere above. The action of this ingenious contrivance depends on the attraction of the earth on a column of mercury. This attraction is proportional to the earth's density, and the relative distance of its crust from the mercury column. Earth being denser than water, exercises a greater downward attraction on the mercury. If, then, there are say a hundred fathoms of water just under the mercury instead of a hundred fathoms of earth or rock, there will be less downward attraction on it. Taking advantage of this law, the mercury column is adjusted so as to indicate the power of the attraction and give the depth of water it corresponds to.—*Lambert's Journal*.

From John Churchman's Journal.
Divine Guidance.

"My mind had been for some time drawn towards Ireland, and being desirous to lose no time, we went to Whitehead, several vessels being there for Dublin; but on viewing them I had no freedom to take a passage, at which I was much straitened. Turning my mind inward, Ireland was hid from my view, and going to the house of a friend, we sat a while still, and I had freedom to let Friends know that I had no prospect but that the vessels might go their voyage with safety, and did not decline a passage on that account; but feeling a full stop in my mind, had no freedom to proceed any where at present, save to return with our friends, John and Hannah Harris, to Highfield.

We therefore returned with them, and attended Parslows Hall Monthly Meeting, where I had freedom to propose that Friends would enter on the service of visiting families. They informed me, that some years before they had nominated Friends for that service, but meeting with some discouragement, they had not performed it; and being about to turn over the book to see who were then appointed, considering it was a long time since, they concluded it was better to proceed to a new choice, but seemed at a stand about naming Friends. I had a freedom to let them know, that although I was a stranger, I could point out some who would answer the service if they would submit to it. After a solid pause, a Friend said, as our Friend has the matter before him, I am free that he should choose for us; to which I replied, that being a stranger to their members, one might be chosen who was under some impediment, and therefore it would be safer for the Meeting to choose, but perceiving they were at a loss, I pointed out a few Friends in great fear, with a single eye to the sense which I did believe Truth gave me, and the clerk took their names; a Friend said, he believed it was the Truth which had made the choice. I then mentioned, that if they could soon enter upon the service, I found a freedom to accompany them therein, if Friends found unity therewith, which several expressed,

some women Friends being also named by their Meeting to join in it." Before the service was much proceeded in, a heavy concern came upon me from a secret sense I had, that one of them was under the censure of some, by which I feared her service would be laid waste, unless it could be removed. Although I had no intimation of anything of the kind from any person, I became heavily exercised, and at length requested a Friend to invite the man and his wife to dine with him, who I apprehended were uneasy with the woman, and I desired her and her husband to come to the same house in the afternoon, who accordingly came, and thus the parties met unexpectedly to each other.

I was humbled under the weight attending my mind, and no others being present except the Friend and his wife at whose house we were, I ventured to let them know the exercise I had been under some days, from an apprehension of a difference, or prejudice subsisting between them, which, if not removed, would devour like fire, by which I believed they were already much affected. As I had not received information, more or less, I might be mistaken, and did not desire they should say anything on the subject before me, but honestly confer on it between themselves first, and if it was so, remove the cause, and if nothing was amiss, let me know, that I might be warned to be more cautious in future. I then left them and walked by myself about an hour, when the man of the house called me in, and they told me I was not mistaken, for there had been a hardness existing for some time, which they hoped was now done away.

But when in the course of our visit, we came to the house of the Friends who had been uneasy, I felt it as fresh as before, and told them I did believe that they were not easy that the Friend should go on in the service; to which one of them answered, if she judges herself to be clear and others are easy, I have no objection.

I asked what others were meant? The man replied, her husband and relations; and as the matter rested upon me, it appeared that endeavors ought to be used for reconciliation, before we could with satisfaction proceed on the visit. Believing the Lord had secretly engaged me, I hoped he would accompany and bless the labor for the restoration of peace, which in a few days he was pleased to accomplish, and then we proceeded more cheerfully, and I think I may say the Lord was with us, to the praise of his great and eternal name, who is worthy forever."

"Across Africa."

(Continued from page 395.)

"A sad and eventful day now arrived. It was on the 20th of October, as I lay on my bed prostrate, listless and enfeebled from repeated attacks of fever; my mind dazed and confused with whirling thoughts and fancies of home and those dear ones far away, that my servant Mohammed Malin, came running into my tent with a letter in his hand. I snatched it from him, asking at the same time, where it came from. His only reply was, "Some man bring him." Tearing it open, I found Jacob Wainwright's letter, dated "Ukhonongo, October, 1873." * * * "Your father died by disease beyond the country of Bisa, but we have carried the

corpse with us. Ten of our soldiers are lost, some have died." * * *

"Being half blind, it was with some difficulty that I deciphered the writing, and then, failing to attach any definite meaning to it, I went to Dillon. His brain was in much the same state of confusion from fever as mine, and we read it again together, each having the same vague idea.—Could it be our own father who was dead? It was not until the bearer of the letter—Chuma, Livingstone's faithful follower—was brought to us, that we fully comprehended what we had been reading. The writer had naturally supposed that the doctor's son was the leader of the Relief Expedition. We immediately sent supplies for the pressing needs of the caravan, and dispatched a messenger to the coast, announcing Dr. Livingstone's death.

"On the arrival of the body a few days later, Said bin Salim, Shaykh bin Nassib, Abdallah bin Nasib, and the principal Arabs without exception, showed their respect to Livingstone's memory, by attending to the reception of the corpse, which we arranged with such honors as we were able. Susi, on whom the command had devolved on the death of Livingstone, brought a couple of boxes belonging to him, and his guns and instruments. He also stated, that a box containing books had been left at Ujiji, and that shortly before his death, the doctor had particularly desired that they should be fetched and conveyed to the coast. Dr. Livingstone's death, so far as I could ascertain from the description given by his men, occurred rather to the westward of the place marked in the map published in "Livingstone's Last Journals." He had been suffering from acute dysentery for some time, but his active mind did not permit him to remain still and rest. Had he done so for a week or two after the first attack, it was the opinion of Dr. Dillon, upon reading the last few pages of his journal, that he would most probably have recovered.

"On the 9th of November, Livingstone's caravan, accompanied by Dillon and Murphy, started for the coast." The evening before we parted was a solemn time both for Dillon and myself. We talked of our homes, and of meeting in England; but whether we really cherished that hope of meeting again, I scarcely know. At this time I was nearly blind from ophthalmia, and almost unable to walk from pain in my back; while fever, which was still hanging about, had reduced me to a skeleton, my weight being only seven stone four on leaving Kihwarah. Still I was determined to go on, trusting in the mercy of God to enable me to accomplish the labor I had undertaken.

"As we were starting from Itumvi, a messenger from Murphy brought the dreadful news of poor Dillon's death on the 18th of November, caused by the terrible effects of African fever. The shock so stunned me in my enfeebled condition, that for a few days I appear to have existed almost in a dream, remembering scarcely anything of the march to Konongo, and leaving my journal a blank.

"Marching through a wooded country with beautiful open glades, the trees bursting into leaf, and the young grass clothing with a tender green the patches which had been burned in the dry season, and every thing looking fresh and spring like, I felt better than at any time since leaving Kihwarah; and, to my astonishment, I found myself able to follow

For "The Friend."

the shady path without suffering or fatigue. We rested at some pools of clear fresh water; and a baggage-donkey appreciating the comfort of a bath, went into one, and lying down commenced to roll. Pleasant as this might have been for the beast, it tended much to the detriment of a load composed of miscellaneous odds and ends, botanical paper, &c.

"Resuming our march, we reached, in a few hours, a large village in the centre of much cultivation. The men carrying my tent and cooking-gear having lagged behind, I took refuge from the sun's rays in the village public house, where I became the centre of a wondering crowd. There were two of these public houses—or perhaps they may be more properly termed "clubs"—in nearly every village in Unyamwizi, one for each sex. That appropriated to the women is not open to strangers; but at the one frequented by the men, all travellers of distinction are welcomed by the chiefs and elders. As soon as a boy attains the age of seven or eight years, he throws off the authority of his mother, and passes most of his time at the club, usually eating and often sleeping there. They are generally larger and better built than the other huts, and a standing bed place occupies a considerable portion of the interior.

"Again made a start, and after a long march reached Mapalatta. When first the caravan arrived, the people closed the doors of the village, for they had lately been harried by some slave-hunters, and had learned to view all strangers with suspicion. But after a time they professed themselves satisfied with our peaceful intentions and allowed us to enter. The chief of the village was a disgustingly dirty old man, suffering from delirium tremens—the only instance of this disorder which I saw in Africa, though drunkenness was by no means uncommon. The purchase of five days' food was however satisfactorily arranged with his wives, and we proceeded on the 10th of December. The country was perfectly charming, the trees delicately green and fresh, the open, grassy glades enameled with various wild flowers. Indeed, it would have required no great stretch of imagination to fancy one's self in the wooded part of a well-kept English park, except that gazelles bounding away in the distance, and the skulls of a lion and an elephant kept prominently in mind the fact that one was in an African jungle."

Jewish Settlement of Palestine.—We have just met with an article in your paper of April 26, on the re-peopling of Palestine by the Jews, which contains some statements that need correcting; this one in particular, "that the population of Palestine is double what it was ten years ago." If this refers to the Jews, it may be true, but of the entire population it is not true. This country, owing especially to the heavy drain upon the able bodied men to keep up the army, is rapidly being depopulated and impoverished. Deserted villages are everywhere to be seen. There is less wealth among the people, fewer camels, horses, and stock of all kinds, than ten years ago. Fruit and forest trees are also disappearing. Carmel was almost stripped of her timber for the Suez Canal; and as any fruit tree is taxed, whether it bears or not, few are now planted. Every thing here appears to be finished; there is no progress, no improvement of any kind.

There are about 30,000 Jews in all Palestine. They are mostly from Russia, and do not

come here to work or develop the country, but to die, that they may sleep with their fathers in holy ground. They are generally aged and poor, living on the charity of their people in Europe and America. It will require a different class of emigrants altogether to recover this cursed land. It is true there are new houses going up outside the city walls, but mostly small tenements built by committees for the benefit of their poor members. If any work has been done on those dwellings by night, it is to avoid the hot sun during the day, and not because there is such a demand for houses.

The latest programme for Palestine is not Jewish, but papal occupancy. The Jesuits of Europe are dissatisfied with the condition of things in Italy, and there is a movement on foot to make Jerusalem the head of the Latin Church. Commissioners have been appointed to negotiate for the territory; engineers have surveyed a railroad from here to Jaffa. Money is being collected for the erection of a magnificent palace for his Holiness on Mount Zion, to which the wealth of the Vatican is to be transferred. Here the successor to Pius IX. is to be installed, and the "City of the Great King" is to be the future head of the Pontifical Sec. Russia, however, may have something to say in the future disposition of Palestine. F. S. DE HASS.

Jerusalem, June 16, 1877.

—*Christian Advocate.*

For "The Friend."

John Barclay to his Sister.

"Margate, 8th of Seventh mo., 1836.

We rejoice that you are helped on your way, to advocate the good cause, even the way of the cross of our Lord and Saviour, in which so few walk, though so many can talk of it, and dress it up, or something else instead of it, to try to persuade themselves they are in the right way—Lo, here is Christ! lo, he is here!—and all else but themselves are not of the way. I have not a doubt that you have been often refreshed together with a remnant, a precious remnant, in the little scattered meetings in the districts you have been among. Indeed, I have been sometimes ready to take up the belief, and had to express it in a meeting, that if individuals of the small country meetings, the two's and the three's, were faithful in their day, and in their line and measure, their Lord and Master, the Head of his church, was bound to appear for them, and to do for them exceedingly abundantly, and to honor them, and to make them very fruitful, and even use them in building up each other, and the church also in other districts, even in those popular and once flourishing meetings where the enemy is sweeping away his victims, and laying waste the heritage with a wide wasting desolation. I reminded those on whom devolved the weights and burdens of Society, of the first planting of Truth in these parts by two or more youthful messengers, who walked from place to place, and enquired who were worthy, and directed them to the sure Teacher, and how to gather inwardly to Him.

Ah! it is my full persuasion, the Master is at work, (though the enemy be busy also,) and will yet, out of the mouth and by the means of those that may think themselves but babes and sucklings, ordain strength, and perfect His own praise; and such, in the right sense, we all ought to be, in order that His

strength may be made perfect in our abasement.

Farewell, my beloved sister, in the best of all bonds. May the same Hand that has done great things for us, help us to hold out to the end, in the faith and patience, through what ever awaits either of us.

Thy very affectionate brother,

J. B."

"Bradpole, 9th of Fourth mo., 1819.

Dear Edward,—I am sensibly and decidedly of the mind, that it is a day when the language, "Trust ye not in any brother;" (that is, implicitly and without due reservation,) is loudly preached in the ear of some minds. And now it is that the very princes in Israel frown, and are well nigh frightened at the bold and apparently forward steps of those that have not been long in the ranks, nor trained up to the battle, nor inured to the sound of arms, nor the shout of the enemy, but have been bred up to the shepherd's David, was whom his brethren despised. Oh! I could here tell thee how disheartened I have been when among the chief men, those accounted the veterans, to see them hang their heads as one ashamed or amazed at the desolation; and the fears, and the doubtings, and dispiriting, and hesitations that have been suffered to creep over them, and hem them in on all sides, like the net which the hunter lays for the lion of the forest. At such times to hear these reasons aside, and explain away, what Truth dictates to be done, reckoning upon the effects likely to ensue, and what they that are of the world, as well as I in the world, would think. Oh! this has given something that is good, and loves good in me, and I have said, "Oh! these time-servers, these men-pleasers; how I pity them!" Nevertheless, this is clear to me, and I dare not doubt it, viz., that such shall not be permitted to hinder the Lord's work longer than He please; for surely when the morning of the day dawns, if not already dawned, wherein He will take His own glorious work yet more evidently and eminently into His own mighty hand, to set up and establish his Jerusalem, a praise and an excellency in the earth, beautiful for situation, whose gates are salvation, and whose walls are praise, then shall there be judges as of old, and counsellors as at the beginning, kings and priests unto God, that shall be firm and faithful, bold and terrible against the workers of iniquity; that shall not spare the very best of the sheep, or oxen, or fattings of the Amalekites, that laid wait for Israel when he came out of Egypt; and who shall not foolishly pity that which the Lord hath no pity for, nor fondle nor dandle the babe of the false birth, unto which is reserved the fiery wrath of the Holy One.

[After alluding to his own course, he goes on thus], I desire, dear E.,—be assured I desire, to keep in the back-ground as long as ever I can; that is, to keep *self* in the back-ground, and would even have been willing to excuse myself from this speaking of myself in this letter; but I dare not, by a kind of voluntary humility, make *little* of the Power by which alone I am, or can be any thing to His glory who looketh on the heart. There is a holy authority, an awful dignity, which the true servant is clothed with (at seasons especially), as with the royal robes he acts in the King's name, though in the least service. Now the true humility is not inconsistent

with this honor; for none are thus honored with the true honor, but as they become willing to be humbled under the mighty Hand, bowed under the baptizing Power.

In writing the above, the glorious display of this Power through many favored instruments of old, has rapidly revived and renewed; one instance after another, as recorded in the Holy Scriptures, and much matter of instruction been derived to myself from many reflections thereupon; and I have said in my heart, and may say as much to thee, 'Oh! for Gideon, now that the enemies of the Lord are as grass-hoppers for multitude!' How vividly has this example revived and been presented before me! How did he boldly ascend down the altar of Baal? How did he reclaim the language, 'Whosoever is fearful and afraid, let him return;' and there returned, 2,000! Joshua also, and Samson, David, Izekiah, Elijah, and his servant that poured water on his hands; with Jeremiah, Daniel, and others too numerous to make allusion to, so eminently glorious, even in the infancy, in the dawning of the Gospel day, even when he shadows were scarcely yet dissipated, did he Light appear on the mountains, in the times of the apostles and primitive Christians; and is the Arm shortened, that in this day it cannot redeem with as evident a display, with so glorious a manifestation? Shall the light of the sun never 'be as the light of seven days?'

[After writing on another subject, he says:] Dear E., I am now writing on the beach, my foot stool a rock, my desk a rock, my seat a rock. It is a lovely evening; the sun nearly set, but the sea breeze very soft and cool. The cliff hangs over me very precipitous and offy, the sea beautifully blue and calm, scarcely a human creature near. I often think of thee, though myself in the midst of much enjoyment, or at least means of enjoyment to a mind awakened and alive to the beauties of natural scenery at this sweet season, to the comfort of retirement, and to the blessing of the society of those that are devoted to the ear and service of the good Master.

J. B."

The Value of Health.

There is perhaps nothing more indispensable to human happiness and yet more frequently disregarded in human strivings than the attainment of vigorous physical health. Very few appreciate how essential an element it is in all prosperity, and still fewer understand the laws on which it is based or are willing to obey those laws when revealed to them. It is yet very far from occupying the dignified position in public esteem as an object of life which it merits and will eventually obtain. It is not unworshipfully slighted, but it is secretly depreciated. We admit its value in theory, but deny it in practice. We all, in some degree, desire it, but we decline to make sacrifices for it. The young will not give up exciting pleasures, the business man will not moderate his labors, the student will not resign his dainties for the sake of health. That is, while all, in different ways, are eagerly seeking happiness, they refuse to pass through the gate which leads to it. While all are engaged in erecting edifices of various kinds, they are so interested in the architecture that they have neglected to lay the solid founda-

tion. Is it any wonder that they crumble and fall?

There is no one of life's objects, from the lowest to the highest, that can be fully attained, where the healthful vigor of the physical frame is wanting. Even appetite can only yield her pleasures through temperance. The epicure who indulges in every luxury soon destroys his powers of enjoyment, and finds too late that even the poor gratification he covets has eluded his grasp. It is only when the palate is quickened by natural hunger that food can yield any real enjoyment. Excess will poison the most luscious fruits and take away the flavor of the choicest delicacies. The same is true of every other pleasure, whether of private, domestic or social life. No matter how abundant may be the outward appliances, if health be absent, the capacity for enjoyment is gone, while on the other hand, though the external resources may be small, physical vigor will enable us so to use them as to receive and convey solid and enduring happiness.

Equally essential is health to the perfection of labor in all its forms. Both the amount and the quality of our work depend greatly on our physical well-being. We mourn over the sickness which deprives us of all power of action, but we rarely appreciate how close is the connection between superior work and superior health, and between inferior work and a depressed physical system. Horace Mann says that high health is at least equal to fifty per cent. more brain. If there is any truth in such a statement, how careful should those who desire a clear mind, powers of consecutive thought, or ability to form and execute plans, to strengthen their physical powers and ward off the approach of disease. Labor in all its forms is but human power put into useful action, and only by means of healthful vitality can this power be generated. —*Philada. Ledger.*

"We Don't Want the Guide."

These were the words of a party at the foot of the White Mountains, who were determined to find their own way to the top.

"But," said the keeper of the hotel, "I will let you have one at half price."

"No, we don't want one even at half price. We can find our own way well enough alone. We will follow the path, and we shall soon find our way to the Tip-top House."

"You may get lost," said the landlord. "Rather than have you go alone, I will send a guide who knows every mile of the road, for nothing."

"No, we don't want him even for nothing. We want to do something that will astonish our friends."

"But it is very dangerous."

"We are strong; we will risk it."

"But suppose you should find yourselves in a snow storm, what would your young ladies do then?"

"Ha, ha," said one of them; "that would be nice fun. A snow-storm in summer! I hope we will see one."

"Yes, yes," they all shouted; and so, with hearts full of hope, they started off to gain the top of Mount Washington. On they went as gay as larks, till, as they got near the top of the mountain, they saw a white cloud right above them. Up, up, they went, right into it, and they found what I have often seen in

Switzerland, a snow storm in among the mountains, while the sun was pouring its warm rays upon the people in the valley below.

"Isn't this fun?" said one to another. But after a while the snow got so deep they lost the path. Ah, then the "fun" was all gone, and they began to think of the warning words of the landlord who offered them a guide for nothing.

"Ah, how I wish we had that guide now," said one.

"But it's too late to go back for him; we must find our way alone."

And so they struggled on. Darkness came; they were lost, lost, lost in deep snow. But they kept moving upward as well as they could. The two ladies in the party got so tired at last they could not walk another step. It was bitter cold, and so they sank down in the snow and waited for daylight to come. In the morning the storm had cleared away, and as the keepers of the "Tip-top House" looked out they saw, not much more than a stone's throw from their door, the half buried and nearly frozen travellers. They went to them at once, but it was too late to save the life of one young lady who had frozen to death during that awful night, and all because she, with the rest, had said, "We don't want the guide." Ah, how foolish they were not to accept that guide offered to them so freely.

Christ is offered as a guide; but many reject Him, and undertake to make the journey of life alone without the guide. They start off gaily, with great self-confidence; but when the storms come they are bewildered, lost, and many perish helplessly near mercy's gate, but too blind and bewildered to find an entrance. —*The Christian Woman.*

THE FRIEND.

EIGHTH MONTH 11, 1877.

"For ye have not received the spirit of bondage again to fear, but ye have received the spirit of adoption whereby we cry, Abba, Father." Rom. viii. 15. "Wherefore thou art no more a servant but a son." Gal. iv. 7. The humble child of the new birth into righteousness is often led to review the steps by which he has been brought out of the land of bondage, and whilst conscious that nothing less than an Almighty Arm could have awakened him from the torpor of sensual security and carried him safely through the array of his spiritual enemies, so as to give him a true experience of that repentance and faith which are saving through Christ, there is often a lurking doubt left in with regard to the present dealings of his Heavenly Father. The pillar of the cloud by day and of fire by night which once so evidently pointed out the highway of salvation may seem obscured, and instead of the glad sense of the Redeemer's presence, a spirit of bondage may overtake, and fears beset that the wilderness now entered upon is to be trodden alone and may perhaps become the tomb of all his hopes. This condition of mind, the apostle above quoted was no stranger to. "For we know," says he, "that the whole creation groaneth and travaileth in pain together until now; and not only they, but ourselves also, which have the first fruits of the spirit, even we ourselves groan within

ourselves, waiting for the adoption, to wit, the redemption of our body." These feelings are traceable to those infirmities of the flesh which have resulted from the primal fall and that bondage of corruption in which the creature has become entangled by yielding to temptation; but it is truly consoling to remember that "the creature itself also shall be delivered from the bondage of corruption into the glorious liberty of the children of God." That whilst we are to watch and pray daily lest we enter into those temptations with which an unwearied adversary assails us, we are to take no anxious thought for the morrow, but implicitly to rely upon the Captain of our salvation, who has assured us that, as the life is more than meat, and the body than raiment, so the same Hand which supplies the least need of to-day, will assuredly not neglect the greater one of to-morrow.

The work of sanctification is a progressive one. Paul in writing to the Thessalonians converts addresses them as being "all the children of light and the children of the day;" and therefore they must have known the new birth, seeing that "God is light;" (1 John i. 4.) but he further prays for them, "that the very God of peace sanctify you wholly;" and "I pray God your whole spirit, and soul, and body, be preserved blameless unto the coming of our Lord Jesus Christ. Faithful is he that calleth you, who also will do it." (1 Thess. v. 5, 23, 24.) Whilst therefore no false idea of security without taking up the daily cross and walking in the narrow way is compatible with Christian safety, and we are to labor to enter into Christ's rest, there is a paternal assurance of final victory vouchsafed to those who follow Him who is the "way," even though they be led through the wilderness, and walk in seeming darkness. To these the consoling exhortation is extended by a compassionate Father, "thou art no more a servant but a son," and it will strengthen their drooping spirits, which yet groan in this earthly tabernacle, and earnestly desire to be clothed upon with their house which is from heaven, to remember that "He that spared not his own Son, but delivered Him up for us all, [shall] with Him also freely give us all things;" that He will not break the bruised reed, nor quench the smoking flax until He brings forth judgment unto victory. We believe that a spirit which glows with gratitude to Him who has offered himself to redeem us is not only acceptable, but obligatory upon His children; and that it is pleasing in His sight for such to maintain a cheerful and hopeful demeanor, "rejoicing in hope, patient in tribulation and continuing instant in prayer."

The privilege of sonship under the gospel is one that cannot be too highly appreciated. "Behold what manner of love the Father hath bestowed on us that we should be called the sons of God!" exclaims the beloved disciple, as if in ecstatic joy at the glorious promise. Do we realize that if children, then we are "heirs of God, and joint heirs with Christ?" that "He is not ashamed to call them brethren?" Surely these blessed truths should raise our hearts in grateful adoration, as they are opened to us by the Holy Spirit, and incite not only to diligence in His service, but also to rejoice with joy un-speakable and full of glory. "These things have I spoken unto you, that my joy might remain in you, and that your joy might be full.

SUMMARY OF EVENTS.
UNITED STATES.—There has been a general resumption of railroad travel throughout the country, in several sections fresh outbreaks of the riotous element in our community have occurred; these have been quelled by the military, with some loss of life.

A Washington telegram says the labor question has been discussed at several Cabinet meetings, to the exclusion of other subjects. Immediately upon receipt of a good portion of the President's first message to Congress will be devoted to that question.

Governor Irwin's ride from Ogden city to Utah, in point of speed and distance, and considering no special arrangements were made for it, may be set down as the fastest on record. Immediately upon receipt of the news from Pennsylvania, he turned his face homeward, and travelled night and day across the continent until Pittsburg was reached. The Chicago and Northwestern Railroad Company furnished a special engine and car, and it is said one stretch of 348 miles was made in eight hours and 21 minutes.

Within ten years no less than 12,000,000 acres of forest have been cut down or burned over in the United States. Much of the timber is used for fuel, 25 cities being on record as consuming from 5,000 to 10,000 acres each. Fences use up much timber, and railway sleepers require about 150,000 acres per annum. The amount of pine and lumber timber yet standing in the forests of the timber States is estimated at 225,000,000 feet. The sum of \$144,000,000 is invested in the timber industry, employing 200,000 men.

Europe, which pays more attention to the preservation of nature than America, is also careful not to waste wood used in her industries. Many railroad companies in Germany, Austria and Switzerland, impregnate their wooden "ties" or "sleepers" with chloride of zinc, tar oil or combinations of the two, to preserve them from decay. A few companies use corrosive sulphate of iron, and sulphate of copper for the same purpose. In 12 years the timber of the United States, while its life is extended from 70 to 300 per cent.

The Jackson and Sharp Company of Wilmington, Del., are now building a palace car for the King of Sweden. This car will be similar to the narrow gauge palace car built for the Emperor of Brazil. The same firm are building a passenger engine for the King of South America, and are building four more for that country.

More than 5,000,000 ears of corn are now packed in Maine, annually, and sold in every part of the world, yielding a business to that State of about \$125,000,000. From 1850 to 1870 the entire crop of corn in the United States during that period was 8,000 to 10,000 people during the parking season.

Burt's saw mill and salt works, near East Saginaw, Michigan, with 6,000,000 feet of lumber, and 8,000 barrels of salt, were destroyed by incendiary fire—250 men are thrown out of employment.

During the seventh month there arrived at New York 6713 immigrants, of whom 2788 were females; 1522 were from Germany, 1255 from England and Wales, 946 from Ireland, 832 from Sweden and Norway, 412 from Austria, 370 from Russia, 324 from Denmark, 242 from Italy, 237 from Scotland, 190 from France, 150 from Switzerland, and the remainder from various countries.

The mean temperature for last month, according to the local weather report, was 78 deg.; which is one degree less than same month last year. The highest, on the 27th, 95 degrees; lowest, on the 5th, 61 degrees; greatest daily range, on the 27th, 24 degrees. Total rainfall, 5.55 inches; number of rainy days 13; on eleven of these there were storms accompanied by lightning. This unusual amount of atmospheric electricity is considered to have had a marked effect upon the health of our city, as the mortality has been from 10 to 30 per cent. above the average.

The number of interments in this city for the week ending at noon on the 4th, was 407: 141 adults and 266 children—172 being under one year of age—325 were natives of the United States, and 55 of foreign birth.

The Markets, &c.—The following were the quotations on the 7th inst. American gold, 104 1/2 U. S. 97 1/2, 1871, 112; 1872, 104 1/2; foreign reg., 107; do. 4 per cent, 105 1/2; 5 per cent, 1865, 107 1/2; do. 1867, 109; do. 1868, 112.

Cotton selling in lots at 12 a 12 1/2 cts. per lb. for upwards and New Orleans. Flour, active but lower. Sales per lb. \$7.75 for good, to \$9.25 a \$10.00 for higher grades. Wheat, \$1.40 for extra, and southern, and \$1.30 for western choice, at \$1.60. Oats, 49 1/2 to \$1.20 to \$1.30 for prime Timothy, and extra do. 90 cts. a \$1.00. Straw, 60 to 70 cts.

FOREIGN.—The Bank of England having presented

to the British Treasury its collection of coins, it (duplicate) were disposed of, amounting in London several days ago. The coin which brought the highest figure was one of Charles I, the Oxford crown, which was sold for £80. The total of 184 lots, the actual money value of which was not above \$300, amounted to £707.

Telegraph it is stated a sanguinary conflict occurred on the 31st ult., near Plevna, between the Russian and Turkish armies, which resulted in a defeat of the former. The Turks fought on the defensive, and their loss is reported to have been much smaller.

A ukase has been issued ordering the mobilization of the entire corps of the Russian Imperial Guard, an several other corps of 175,000 men. The same law has also been ordered.

Renter's Constantinople dispatch of the 7th inst. says it is officially announced that it has been decided to form a camp of 70,000 men near the capital.

An imperial decree has been issued, reducing the salaries of all government officials fifty per cent. until the close of the war.

A convention between England and Egypt, for the suppression of the slave trade, has been signed.

Special dispatches to the Times report the village of Garsac, near Marienwerder, Prussia, has been destroyed by fire, on the 29th ult., by a fire of 1900 incendiary bombs.

A dispatch to the Times on the 5th, states the town of Sandvial, Sweden, has been almost totally burned.

The latest official reports state that Nepal, as well as Burmah and Assam, have had a sufficient rainfall, which averts the fear of famine in those districts.

RECEIPTS.

Received from Anna Francis, 10, per James Frame \$2.10, vol. 51; from Joseph Waring, Canada, \$2.10, to No. 23, vol. 51; from William B. Woodward, \$2.10, to No. 27, vol. 52, and Jesse Storer, George Pollard, and Thomas Cornell, \$2.10 each, vol. 51; from Chalkley Stokes, N. J., for Amy Barton and Ezra Brown, \$2.10 each, vol. 51, and for Naomi B. Haines and John G. Haines, \$2.10 each, vol. 51; from Thomas F. Scattergood, \$2.10, vol. 52, and for Mary B. Woodward, \$2.10, vol. 51; from Robert Knowles, N. Y., \$2.10, vol. 51, and for Benjamin Boss, Benjamin Knowles, Chester A. Weaver, George C. Carpenter, David Perham, Lorenzo Rockwell and Hubert Rockwell, N. Y., and David F. Knowles, Va., \$2.10 each, vol. 51; from Isaac Heald, \$2.10, vol. 51, and for James G. Janney, \$2.10, vol. 51; from Jacob Parrin, Pa., \$2.10, to No. 8, vol. 52; from Isaac W. Stokes, N. J., \$2.10, vol. 51; from Ann Sualwood, Pa., \$2.10, vol. 51; from Dr. George Thomas, Pa., \$2.10, to No. 21, vol. 52, and for J. Preston Thomas, \$2.10, to No. 23, vol. 52, and Jonah O'quely, \$2.10, vol. 51; from Thomas M. Harvey, Pa., \$2.10, vol. 51, and for Hannah Kirk, Martha H. Linton, Rebecca S. Conrad, Sen., Geo. T. Satterthwaite, and Isabella Christy, \$2.10 each, vol. 51; from John Bishop, N. J., \$2.10, vol. 51, and for Lucy A. Pancost, City, \$2, vol. 51; from Robert Parker, City, \$2.10, vol. 51; from Joseph Smith and Joshua Cope, Pa., \$2.10, vol. 51; from Deborah Satterthwaite, N. J., \$2.10, vol. 51; from Sarah North and Deborah Hunt, Pa., per William Webster, \$2.10 each, vol. 51; from David Heston, Fkfil, \$2.10, vol. 51, and for William Nuby, Colorado, \$2.10, vol. 51; from Eliza Stok, O., \$2.10, vol. 51; from Joseph Satterthwaite, Agent, Pa., \$2.10, vol. 51, and for Elizabeth S. Thomas, Jacob Parker, Charles S. Carter, Sarah Yarnall, Sarah C. Passmore, Alfred Eubree, and Jane B. Davis, \$2.10 each, vol. 51.

Realizations received after Fourth-day morning will not appear in the Receipts until the following week.

MALVERN BOARDING AND DAY SCHOOL will re-open Ninth mo. 10th, 1877.

For circular, address

JANE M. ELDRIDGE, Malvern, Pa.

CORRECTION.—In the Summary of Events published last week, 3d column, 5th line from top, Avondale, Chester Co., should have been "Avondale, Delaware Co., Penna."

DIED, on the 3d of 7th month, 1877, at his residence in Haverford, Del. Co., Pa., HENRY GRANTER in the 73d year of his age, a member of the Monthly Meeting of Friends of Philadelphia for the Western District.

WILLIAM H. PILE, PRINTER,
No. 422 Walnut Street.
